PART A: LEGAL AND POLICY FRAMEWORK

CHAPTER 1: INTRODUCTION

1.1. What is IDP

The legislation requires each municipality to develop a plan for the development of its area of jurisdiction. The law mandates that the plan should be holistic and integrated in its approach and content. The plan should be long-term, covering five years. The Integrated Development Plan (IDP) therefore is a five-year development blueprint for a municipality. According to the Municipal Systems Act, No 32 of 2000, the IDP is the principal strategic planning instrument which guides and informs all planning, budgeting, investment, development, management and implementation of development projects in a municipality.

The Executive Management Team and Middle Management are accountable for the implementation of the IDP, and this is reflected in the Performance Management System that links the IDP to the strategic framework, to the macro-scorecard, and from there to performance contracts for senior managers.

This Chapter introduces the IDP by locating it within the right legal and policy context. It also explains the approach followed in reviewing the Integrated Development Plan for 2013/2014 financial year..

1.2. Legislative context

1.2.1. The Constitution of the Republic of South Africa

The Constitution of the Republic of South Africa outlines the kind of local government needed in the country. According to the Constitution (sections 152 and 153), local government is in charge of the development process in municipalities, and notably is in charge of planning for the municipal area. The constitutional mandate gives a clear indication of the intended purposes of municipalities:

To ensure sustainable provision of services;

To promote social and economic development;

• To promote a safe and healthy environment;

To give priority to the basic needs of communities; and

To encourage involvement of communities.

The Constitution also demands local government to improve intergovernmental coordination and cooperation to ensure integrated development across the neighbouring communities.

1.2.2 The White Paper on Local Government

The White Paper on Local Government gives municipalities responsibility to "work with citizens and groups within the community to find sustainable ways to address their social, economic and material needs and improve the quality of their lives".

Critically, the White Paper on Local Government envisions a developmental local government and articulate instruments such as planning, local economic development and performance management system that should be harnessed to achieve developmental local government.

A suite of policies and legislative frameworks were subsequently enacted to realise the mentioned developmental vision for local government. These were:

• Local Government: Municipal Demarcation Act (Act 27 of 1998);

• Local Government: Municipal Structures Act (Act 117 of 1998);

• Local Government: Municipal Systems Act (Act 32 of 2000)

Local Government: Municipal Finance Management Act (Act 56 of 2003);

Local Government : Municipal Property Rates Act (Act

1.2.3 The Municipal Systems Act, No 32 of 2000

Section 25 (1) of the Municipal Systems Act stipulates that "Each municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan for the development of the municipality". The Act dictates that the plan should: link, integrate and co-ordinate plans and should take into account proposals for the development of the municipality. In addition, the plan should align the resources and capacity of the municipality with the implementation of the plan. Moreover,

the plan must form the policy framework and general basis on which annual budgets must be based. Furthermore, the plan should be compatible with national and provincial development planning requirements binding on the municipality in terms of legislation.

The IDP has a legislative status. Section 35 (1) states that an IDP adopted by the council of a municipality —

- (a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;
- (b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and
- (c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of' those persons have been passed as a by-law.

1.2.4 Municipal Systems Amendment Act, No 7 of 2011

The Municipal Systems Amendment Act, No 7 of 2011 heralded a new era in the history of local government in South Africa. In principle, it sought to professionalise local governance by ensuring that incumbents holding senior positions (i) have the appropriate qualifications and (ii) there is no conflict of interest between political office and local government administration by barring political officer bearers from holding senior positions in municipalities.

Section 56A (1) states that "A municipal manager or manager directly accountable to a municipal manager may not hold political office in a political party, whether in a permanent, temporary or acting capacity." A political office in relation to a political party or structure thereof, is defined as (a) "the position of chairperson, deputy chairperson, secretary, deputy secretary or treasurer of the party nationally or in any province, region or other area in which the party operates; or (b) any position in the party equivalent to a position referred to in paragraph (a), irrespective of the title designated to the position".

Another key amendment relates to the re-hiring of dismissed staff. Section 57 A. (I) states that "Any staff member dismissed for misconduct may only be re-employed in any municipality after the expiry of a prescribed period." The Act is much harsher on employees dismissed for financial misconduct. The Act stipulates that a staff member dismissed for financial misconduct, corruption or fraud, may not be re-employed in any municipality for a period of ten years (Section 57A (3)).

This Amendment Act contains proposals that are guaranteed to have profound impact on the governance of Mangaung Metro. Serious attempts will be made to accommodate these recommendations in the IDP.

1.3 Policy context and planning frameworks

The Constitution stipulates that all three spheres of governance are autonomous but interdependent. This therefore calls for closer collaboration between all these spheres of governance. Needless to mention, a number of national policies have a particular bearing on the provincial and local spheres of government. A few critical ones are highlighted below.

1.3.1 Medium Term Strategic Framework

The Medium Term Strategic Framework (MTSF, 2009–2014) is a statement of government intent. It identifies the development challenges facing South Africa and outlines the medium-term strategy for improving living conditions of South Africans. The MTSF base document is meant to guide planning and resource allocation across all spheres of government. National and provincial departments need to develop their five-year strategic plans and budget requirements, taking into account the medium-term imperatives. Municipalities are also expected to adapt their integrated development plans in line with the national medium-term priorities.

The MTSF identifies the following five development objectives:

- 1. Halve poverty and unemployment by 2014
- 2. Ensure a more equitable distribution of the benefits of economic growth and reduce inequality
- 3. Improve the nation's health profile and skills base and ensure universal access to basic services
- 4. Build a nation free of all forms of racism, sexism, tribalism and xenophobia
- 5. Improve the safety of citizens by reducing incidents of crime and corruption

1.3.2 The Government 12 Outcomes

From the development focus of the MTSF the government has derived twelve outcome areas that set the guidelines for more results-driven performance. The **TWELVE KEY OUTCOMES** that have been identified and agreed to by the Cabinet are:

- 1. Improved quality of basic education
- 2. A long and healthy life for all South Africans

- 3. All people in South Africa are and feel safe
- 4. Decent employment through inclusive economic growth
- 5. A skilled and capable workforce to support an inclusive growth path
- 6. An efficient, competitive and responsive economic infrastructure network
- 7. Vibrant, equitable and sustainable rural communities with food security for all
- 8. Sustainable human settlements and improved quality of household life
- 9. A responsive, accountable, effective and efficient local government system
- 10. Environmental assets and natural resources that are well protected and continually enhanced
- 11. Create a better South Africa and contribute to a better and safer Africa and world
- 12. An efficient, effective and development oriented public service and an empowered, fair and inclusive citizenship

Importantly, government has indicated which role its anticipate local government to fulfil in pursuing these outcomes

Table One; 12 Outcomes of Government and the Anticipated Role of Local Government

| 12 Outcomes of | Anticipated Role of Local Government | | | | |
|---|--|--|--|--|--|
| Government | • | | | | |
| 1. Improve the quality of basic education | Facilitate the building of new schools by: Participating in needs assessments Identifying appropriate land Facilitating zoning and planning Processes Facilitate the eradication of municipal service backlogs in schools by extending appropriate bulk infrastructure and installing connections | | | | |
| A long and healthy life for all South Africans | Many municipalities perform health functions on behalf of provinces Strengthen effectiveness of health services by specifically enhancing TB treatments and expanding HIV and AIDS prevention and Treatments Municipalities must continue to improve Community Health Service infrastructure by providing clean water, sanitation and waste removal services | | | | |
| 3. All people in South Africa are and feel safe | Facilitate the development of safer communities through better planning and enforcement of municipal by-laws Direct the traffic control function towards policing high risk violations — rather than revenue collection Metro police services should contribute by: Increasing police personnel | | | | |

| | | ■ Improving collaboration with SAPS | | | | | |

| development orio | ented |

public service and an Comply with legal financial reporting requirements

empowered, fair and inclusive citizenship

Ensure councils behave in ways to restore community trust in local government

Of the 12 outcomes above, Outcome 9 is closest to local government. The champion of the goal is the national Department of Cooperative Governance and Traditional Affairs. In order to achieve the vision of a "Responsive, accountable, effective and efficient local government system", seven outputs have been identified:

- Output 1: Implement a differentiated approach to municipal financing, planning and support
- Output 2: Improving Access to Basic Services
- Output 3: Implementation of the Community Work Programme
- Output 4: Actions supportive of the human settlement outcomes
- Output 5: Deepen democracy through a refined Ward Committee model
- Output 6: Administrative and financial capability
- Output 7: Single Window of Coordination

1.3.3 National Development Plan

The South African Government, through the Presidency, has published a *National Development Plan*. The Plan aims to eliminate poverty and reduce inequality by 2030. The Plan has the target of developing people's capabilities to be to improve their lives through education and skills development, health care, better access to public transport, jobs, social protection, rising income, housing and basic services, and safety. It proposes to the following strategies to address the above goals:

- 1. Creating jobs and improving livelihoods
- 2. Expanding infrastructure
- 3. Transition to a low-carbon economy
- 4. Transforming urban and rural spaces
- 5. Improving education and training
- 6. Providing quality health care
- 7. Fighting corruption and enhancing accountability

8. Transforming society and uniting the nation

At the core of the Plan is to eliminate poverty and reduce inequality is the special focus on the promotion gender equity and addressing the pressing needs of youth.

More importantly for efficiency in local government the NDP proposes 8 targeted actions listed below:

- 1. Stabilise the political- administrative interface
- 2. Make public service and local government careers of choice
- 3. Develop technical and specialist professional skills
- 4. Strengthen delegation, accountability and oversight
- 5. Improve interdepartmental coordination
- 6. Take proactive approach in improving national, provincial and local government relations
- 7. Strengthen local government
- 8. Clarify the governance of SOE's

The National Development Plan 2030 has been adopted by the National Cabinet in August 2012 and this place an injunction on the state and its agencies (including municipalities) to implement the Plan.

The Plan makes the following policy pronouncements and proposes performance targets that intersect with developmental mandates assigned to local government. Importantly, municipalities are expected to respond to these developmental imperatives when reviewing their Integrated Development Plan and developing the corresponding three-year Medium Term Revenue and Expenditure Frameworks.

- Youthful population presents opportunities to boost economic growth, employment and reduce poverty;
- Strengthen youth service programmes community based programmes to offer young people life skills training, entrepreurship training;
- Increase employment from 13 million in 2010 to 24 million in 2030;
- Ensure that skilled, technical, professional and managerial posts better reflect the country's racial, gender and disability makeup;
- Establish effective, safe and affordable public transport;
- Produce sufficient energy to support industry at competitive prices;
- Ensure that all South African have access to clean running water in their homes;
- Make high-speed broadband internet universally accessible at competitive prices;

- Ensure household food and nutrition security;
- Realise a developmental, capable and ethical state that treats citizens with dignity;
- Ensure that all people live safely, with an independent and fair criminal justice system;
- Broaden social cohesion and unity while addressing the inequities of the past;
- Public infrastructure investment focussing on transport, energy and water;
- Ensure environmental sustainability
- Professionalise the public service, strengthen accountability, improve co-ordination and prosecute corruption;
- Reduce the cost of living for low-income and working class households (cost of food, commuter transport and housing should be reduced);
- Invest in new infrastructure in areas affecting the poor (food value chain, public transport);
- Prioritise infrastructure investment in upgrading informal settlements, public transport, establishing municipal fibre optic network
- Ensure spatial transformation by 2030 increased urban densities, reliable public transport,
- Protect the natural environment in all respects, leaving subsequent generations with a least an endowment of at least an equal value;
- Reduce greenhouse gas emissions and improve energy efficiency;
- Review the allocation of powers and functions (Schedules 4& 5 of the Constitution) housing,
 water, sanitation, electricity and public transport
- Fight corruption at three fronts deterrence, prevention and education;

As indicated it is prudent for Mangaung Metro to take these issues into account when planning and reviewing development for the next five years.

1.3.4 FREE STATE GROWTH AND DEVELOPMENT STRATEGY (FSGDS)

The provincial government of Free State has developed a Free State Provincial Growth and Development Strategy (PGDS) Free Sate Vision 2030. The PGDS is the fundamental policy framework for the Free State Provincial Government. It is the embodiment of the broad strategic policy goals and objectives of the province in line with national policy objectives. The Strategy addresses the key and most fundamental issues of development, spanning the social, economic and political environment. It constantly takes into account annual provincial priorities and sets broad targets in terms of provincial economic growth and development, service delivery and public service transformation.

The Strategy has identified six priority areas of intervention by the province, namely;

1. Inclusive Economic growth and sustainable job creation;

- 2. Education innovation and skills development
- 3. Improved quality of life
- 4. Sustainable Rural Development
- 5. Efficient Administration and Good Governance
- 6. Building social cohesion

Importantly, the FSGDS identifies drivers, strategies and measurable performance targets (five year, ten year, fifteen year and twenty year targets) to ensure that there is performance in relation to the identified six priority areas. Equally, Mangaung Metro should ---- align its Growth and Development Strategy and the five-year development plans with those of the provincial government of Free State.

1.3.5 Millennium Development Goals

The Millennium Development Goals (MDG) and targets come from the Millennium Declaration, signed by 189 countries, including 147 Heads of State and Government, in September 2000 and from further agreement by member states at the 2005 World Summit (Resolution adopted by the General Assembly). At the Summit in 2000, the international community reached consensus on working to achieve eight critical economic and social development priorities by 2015. The eight development priorities were termed the Millennium Development Goals. The eight MDGs are, in their numerical order:

- To eradicate extreme poverty and hunger
- To achieve universal primary education
- To promote gender equality and empower women
- To reduce child mortality
- To improve maternal health
- To combat HIV/AIDS, malaria and other diseases
- To ensure environmental sustainability
- To develop a global partnership for development

As a member state of the United Nations, South Africa is a signatory to this agreement. Furthermore, South Africa has committed to these eight Millennium Development Goals and embraced them into a national set of ten priorities. Writing in the preamble of the third report on progress towards reaching MDGs by South Africa, President Jacob Zuma stated thus;

"let me emphasise that South Africa is committed to the MDG agenda and the Millennium Declaration of 2000. Our entire development agenda embraces the MDGs."

The South African government has sought to domesticate the MDGs so that they suit the local situation without compromising the chance of comparability. This has been achieved by developing specific indicators for each goal so that it could be easy to measure progress - see table 2.

Table2: Millennium Development Goals and their indicators

| Goal | Indicators for this Goal |
|------|--|
| 1 | Gini, dollar-based poverty measures, employment, income per capita, social services and |
| | government-based social assistance programmes. In some instances the data are disaggregated by |
| | sex and race to provide the socio-economic specificities of South Africa |
| 2 | Sex disaggregated population base data for children aged 7–13 and persons 15–24 years of age |
| 3 | Gender and race disaggregated data on education, employment and political life |
| 4 | child and infant mortality data |

As a result, the MDGs enjoy considerable attention in key government development priorities. The table below demonstrates how the MDGs have been domesticated into the current priority agenda of the government.

Table 3: Linkage between South Africa's national development planning and the MDGs

Source: Stats SA (2010) - MDG Progress Report

Noteworthy, among all the MDGs, gender equality and empowering women enjoys most support. Gender equality and women's empowerment are said to be critical to achieving the MDGs especially *Goal 1* on poverty reduction and to economic growth, *Goal 2* on universal primary education, *Goal 4* on reducing child mortality, *Goal 5* on improving maternal health, and Goal 6 on combating HIV/AIDS, malaria and other diseases.

It has been observed however, that gender equality perspectives are poorly reflected across all the MDGs in their current formulation. In the first place, most have either inadequate or no gender-sensitive targets or indicators, making them difficult to achieve. Second, the targets and their indicators are limited. And lastly, the MDGs appear as stand-alone goals, blurring the multi-sectoral links between all goals, targets and indicators, including the crosscutting gender link.

So as Mangaung Metro develops her 5-year development blueprint these national and international policy contexts need to be taken into serious consideration – their limitation notwithstanding.

1.4 The status of Mangaung IDP

The council of Mangaung last year adopted a comprehensive integrated development plan covering this term of local government (2012 -2016). Critically the comprehensive IDP for the city was embedded and informed by the following eight key development priorities of the city:

- Poverty eradication, rural and economic development and job creation
- Financial sustainability eg revenue enhancement, clean audit
- Spatial development and the built environment
- Eradication of bucket system, VIP toilets in Botshabelo, Mangaung and Thaba Nchu, focus on the basics, building solar farming, power plant feasibility, safety & security
- Human Settlement
- Public Transport
- Environmental Management and Climate change
- Social and community services

This document represents the reviewed IDP for 2013/2014

1.5 Approach to IDP

1.5.1 Introduction

MMM takes engagement with key stakeholders in the development of IDP very seriously. As a result a number of meetings, consultations and hearing were organised with all interested parties. Key amongst these parties have been national and provincial departments, organised business, traditional leadership, councillors, and members of the community. Below we provide analysis of these engagements.

1.5.2 Cooperation with other spheres governance

The law is emphatic on the need for local government to cooperate with other spheres of governance. The Municipal Systems Act states that municipalities must exercise their executive and legislative authority within the constitutional system of co-operative government. It further places an obligation on provincial and national

spheres of government to exercise their executive and legislative authority in a manner that does not compromise or impede a municipality's ability or right to exercise its executive and legislative authority.

For these reasons, the law requires that the planning undertaken by a municipality must be aligned with, and complement, the development plans and strategies of other affected municipalities and other organs of state so as to give effect to the principles of co-operative government.

As such utmost care has been taken to ensure that new IDP is aligned with national and provincial governments' plans - as well as other neighbouring municipalities' plans.. An IDP Alignment and Assessment Workshop was convened in April 2013 by the the Free State Provincial Department of Cooperative Governance and Traditional Affairs, that was attended by IDP officials from Mangaung Metropolitan Municipality and representatives of other sector departments (both national and provincial) wherein the draft reviewed IDP of municipalities were thoroughly reviewed and an assessment thereon was subsequently transmitted to all municipalities..

Furthermore, key development plans such as the National Development Plan and the Free State Growth and Development Strategy have been reviewed in order to ensure alignment with national and provincial development priorities.

1.5.3 Participation by political leadership

The law is clear on the role of political leadership in the plan for the municipal development priorities and the IDP in particular. The political leadership, especially the Mayor is supposed to provide guidance or vision for the Municipality for his Council's term of office. The political leadership in Mangaung has been highly proactive in the development of this IDP.

1.5.4 Community participation

The law mandates the council of a municipality to encourage the involvement of the local community and to consult the local community about (i) the level, quality, range and impact of municipal services provided by the municipality, either directly or through another service provider and (ii) the available options for service delivery. The law places special emphasis on gender equity. It instructs municipalities to promote gender equity in the exercise of the municipality's executive and legislative authority.

The law further accords members of the local community the right to (i) contribute to the decision-making processes of the municipality and (ii) submit written or oral recommendations, representations and complaints - to the municipal council or to another political structure or a political office bearer or the administration of the municipality. Moreover, residents have the right to be informed of decisions of the municipal council affecting their rights, and property.

Mangaung Metro has made every effort to ensure maximum participation by members of the local community in the development of the IDP. Up to 19 engagements with communities were made. They involve interaction with communities at ward levels and interactions with the reference groups (*rural communities, business and youth*) which represented various regions of the municipalities.

A number of development challenges were raised during these interactions. Table5 below provide an illustration of issues were that were raised per wards. These issues have in turn been aligned with key development thrust for the Municipality. The key development thrusts include:

- Poverty eradication, rural and economic development and job creation
- Financial sustainability (eg. revenue enhancement, clean audit)
- Spatial development and the built environment
- Eradication of bucket system, VIP toilets in Bots, Mangaung and TN, focus on the basics, building solar farming, power plant feasibility study, safety & security

- Human settlement
- Public transport
- Environmental Management and Climate change
- Social and community services

These would be elaborated upon in Chapters 3 and 4.

Table5 Key development challenges at the ward levels raised during consultations

| Sector | Issues Raised | Wards | City Response to Challenges |
|---------|---|--------------------------------------|--|
| Housing | Residents still don't have title deeds in Hostel people's title deeds are being sold by officials Raamkraal people that were taken out from hostels still don't have houses to stay There are people that have been staying in informal settlement for more than 15 years | 1, 7, 29, 34, 36, 39 and 40 | The city is responding to the title deed issue. For now hostels are for rental, title deeds will be applicable where hostels have been turned into family Units. Conveyance has been appointed for Botshabelo and the project will take 8 – 12 months A data is being compiled for instalment sale agreements Two CRU projects are planned for both Silver City and White City hostels . The development of seven (7) land parcels is planned to accommodate such households. |
| | Provision of shacks | 1 | Shacks are only provided in cases of emergencies |
| | Renovation of dilapidated houses | 2, 4, 5, 8, 15, 27, 29, 31 and 39 | Urban renewal started in Batho and will upscaled in other relevant areas. |

| Fast track the formalization | 6.7.9.20 and 40 | Motro has appointed UDA to compile ISII |
|-------------------------------|----------------------|--|
| | 6,7, 8, 39 and 49 | Metro has appointed HDA to compile ISU |
| of informal areas | | strategy |
| Building of RDP houses | 7, 31, 40, 41 and 36 | The Metro together with the Province have |
| | 7,02, 10, 12 and 00 | prioritized completing incomplete houses |
| | | |
| | | and will then address the building of RDP |
| | | houses. |
| Fast-tracking of housing | 8 | Verification exercise has been completed |

| | | | strategy of the facility which will be |
| | | | incorporated with the Navil Hill |
| | | | development. |
| | | | |

| | Homeless people staying in open fields | 22 | Together with Social Services and Social Development conceptualizing a special programme for vulnerable individuals |
|-----------------|---|-----------------------|--|
| | Build or renovate community halls | 15, 17, 42, 44 and 49 | The renovations have been included in the 2013/14 Maintenance Plan |
| | Maintenance and repair of a swimming pool | 16 | Project to an amount close to R2m has been awarded to the contractor. Work to be completed not later 31 Jul 2013 |
| | Building of a multi-purpose centre | 17, 40 and 42 | Provision to be made in future during budget process |
| | Building of a library | 17,40 | City will refer to Provincial office |
| | Fencing of cemeteries and provision of ablution facilities | 39, 40, 41, 42, 49 | Capital Budget provision needs to be made for the fencing of the cemeteries and building of ablution facilities. No provision is made in the 13/14 financial year to cater for this request. |
| | Cleaning of graveyards | 47 | Horticultural maintenance of cemeteries is done on an ongoing basis according to a Cemetery maintenance Plan and programme. |
| | There is bad smell in the ward South Park cemetery is very dirty why the council does not hire the community to clean it | 15 | Southpark Cemetery is maintained by using herbicides at certain demarcated areas(SP2,3) and by normal horticultural practices (SP1) |
| Law enforcement | Enforcement of bylaws regarding student resident houses | 22 and 23 | The following role players are involved dealing with student houses: Law Enforcement, Building Inspectors, |

| | FET has been given grants for students accommodation now this compound a mushroom of student houses in Brandwag | | Health Division Human Settlement and Housing (Zoning). If the student house is illegal then the different directorates will act according to their responsibilities and bylaws. The Law Enforcement Division is enforcing Councils bylaws regarding nuisance from a legal student house by issuing warnings and summonses to offenders. In some instances complains are received but when the officers arrive on the scene the occupants have switched off the sound systems and the officers cannot do law enforcement. If a person continues to contravene the law a criminal case docket will be open and submitted to the Department of Justice for prosecuting. The city is in discussion with the University on the student accommodation / The University and Higher education department are leading this process |
|----------------------------------|---|---|---|
| | Regular law enforcement of traffic | 23 | The city is regularly patrolling in the streets of Mangaung and also have road blocks in hotspots |
| | Businesses without permits in Dan Pienaar | 20 | Environmental Health in cooperation with Planning and will start with interventions |
| | Homes turned into business sites without permits | 22 and 44 | Environmental Health in cooperation with Planning and will start with interventions |
| Community/public and road safety | Road signage | 8, 15, 18, 22, 24,25 26, 28, 44 and 48 | The entire township lack signage sometimes because of vandalism the city is investigating safer and user friendly signage |

| Traffic control at school | 15 and 21 | The school must make a submission to the |
|---------------------------|------------------------|---|
| within the ward | | traffic division requesting traffic control. |
| Within the Ward | | The request will then be forwarded to the |
| | | training division which is responsible for |
| | | |
| | | scholar patrols. |
| | | Patrol arterial streets adjacent to schools to |
| | | promote road safety in the morning and |
| | | afternoon peak hour traffic. Point duty |
| | | every morning and afternoon at certain |
| | | schools such as Oranje Meisie School. Refer |
| | | traffic risks to Traffic and Transport for |
| | | further investigation and recommendations |
| | | in terms of additional traffic calming |
| | | methods to regulate the free flow of traffic |
| | | in and around schools eg. Brebner School, |
| | | Brandwag School and Onze Rust ect. The |
| | | traffic division conduct regular speed law |
| | | enforcement. Peak hour patrols. Road side |
| | | check points. Point duty every morning and |
| | | afternoon at schools (Eunice). Due to |
| | | insufficient personnel applications of other |
| | | schools could not be approved. Attend to |
| | | community complaints and accidents |
| | | |
| | | |
| Erection of speed humps | 5, 6, 7, 8, 9, 13, 15, | The Metropolitan Transport Planning |
| | 16, 18, 21, 22, 26, | Division is responsible for handling new |
| | 27, 29, 31, 37, 39, | applications for erection of speed humps, |
| | 40, 42 and 49 | where this matter will be discussed. |
| | | Erection of speed humps is the primary |
| | | responsibility of Infrastructure Division not a |
| | | direct line function of the Traffic Division |
| | | however when there is a request from the |
| | | community the complainant is normally |
| | | community the complainant is normally |

| | | | advise to write a letter to the Traffic Chief which will be submitted to the Traffic and Transport Committee which normally held their meetings once a month to attend to complaints from the community requesting erection of new road markings and signage. The Traffic and Transport committee comprises of Infrastructure Department, Metropolitan Transport Planning Division, Metro Engineers and Traffic. |
|-----------|---|------|---|
| | Prevention of public drinking and reckless driving at Langenhovenpark | 22 | The law enforcement division do regular patrols and if someone is caught drinking in the street then that person is warned to leave the area. If the person is a danger for himself or other he will be removed to his or her place for their own safety. Change in legislation prohibited law enforcement officers to arrest persons on the spot for drinking in public or to be drunk in public. The traffic division do regular patrols throughout MMM on a daily basis. Every Tuesday of the week all the station Commissioners from SAPs and other key stakeholders eg. Traffic, Law Enforcement, Immigration due a joint weekly planning to attend to reckless driving and crime prevention initiatives. Joint cluster operations with SAPS have been conducted and are on going with other stake holders |
| Education | Building of high school | 8,45 | Tease out to the department of Education |
| | Provide crèche at Mariasdal | 41 | The Matter will be reffered to the department Social development and |

| Building of clinics | 8, 41 and 49 | Refer to the department health |
|---|--|---|
| | | herer to the department health |
| Upgrading security at Heidedal clinic | 16 | To be reffered to the department of health |
| Fencing of a clinic at Moroto | 41 | To be reffered to the department of health |
| Upgrading of clinic and Lerato crèche | 48 | To be reffered to the department of health |
| Address irregular waste removal | 10, 11, 16, 24, 27, 28, 30, 31, 32 and 36 | City is busy with the round balancing exercise in order to be able to collect waste regularly in all wards |
| Address illegal dumping (and provision of big dustbins) | 10, 11, 12, 15, 16, 17, 18, 23, 27, 31, 32, 34, 39, 46, 47 and 49 | The City has through its Integrated Waste management plan developed a maintenance plan for illegal dumplings' and landfill sites |
| Removal of blue gum tree | 1 and 2 | The city will investigate and take appropriate action |
| Sufficient supply of refuse containers | 32 | The purchasing of additional bins will be done through our budgeting process in the MTREF |
| Cleaning of dustbins at bus stops | 22 | Round balancing exercise will cover the cleaning of bust bins at bus stops in all wards |
| Provision, connection and/or maintenance of waterborne sewerage system (toilets) in the place of VIPs | 3, 6, 8, 18, 28, 29, 31, 33, 38,39, 40, 41, 42, 43, 45, 46 and 49 | The City in this current term has prioritized the eradication of VIP toilets in Mangaung. There are currently projects in Botshabelo and Thaba Nchu to address this matter, the programme will be completed in six years. |
| | Fencing of a clinic at Moroto Upgrading of clinic and Lerato crèche Address irregular waste removal Address illegal dumping (and provision of big dustbins) Removal of blue gum tree Sufficient supply of refuse containers Cleaning of dustbins at bus stops Provision, connection and/or maintenance of waterborne sewerage system (toilets) in the place | Fencing of a clinic at Moroto Upgrading of clinic and Lerato crèche Address irregular waste 10, 11, 16, 24, 27, 28, 30, 31, 32 and 36 Address illegal dumping 10, 11, 12, 15, 16, (and provision of big 17, 18, 23, 27, 31, dustbins) Removal of blue gum tree 1 and 2 Sufficient supply of refuse containers Cleaning of dustbins at bus stops Provision, connection 3, 6, 8, 18, 28, 29, and/or maintenance of 31, 33, 38,39, 40, waterborne sewerage system (toilets) in the place and 49 |

| | | eradicate the VIP toilets in Mangaung. | |
|--|---|--|---|
| Provision of household water connections | 8, 17, 34, 39, 41, 44, 45, 46 and 49 | Provision of households with water will be done simultaneously with provision of Waterborne Sanitation. | |
| Upgrade Sewer system in Aucamp street and Van Rippen/ Pasteur streets in Fichardspark | 25 | The city has a block by block approach to respond to maintenance and refurbishment of infrastructure, including sanitation and water | |
| Bloemside 2 b and phase 3 a and b and Bloemside 2a there are no toilets (there is a total of 1200 households without toilets) | 8 | The city has a block by block approach to respond to maintenance and refurbishment of infrastructure, including sanitation and water | 5 |
| all streets in the wards are bad | 8 | Will be attended to through our roads maintenance and refurbishment programme. | |
| there is a problem of sidewalks in all main roads | 8 | Will be attended to through our roads maintenance and refurbishment programme. | |
| Erection of toilets in certain portions of Namibia and Kgatelopele | 4 | This will be done through and infill program of the city for toilet structures. | |
| Address sewer blockages in Namibia | 4 | Will be attended to through our maintenance programme. | |
| Provision of temporary sanitation service in informal settlements | 7 and 27 | Will be done in consultation with Human settlements directorate | |
| Repair of dilapidated and/or collapsed toilets including | 7, 33 and 39 | The dilapidated toilets will be attended to through the programme of eradication VIP toilets in the City with Waterborne | |

| VIPs | | sanitation. |

A further analysis of communities' priorities sketches an interesting picture. The key main issue affecting communities has to do with maintenance of existing infrastructure, particularly roads and drainage as well as sewage system - matters of safety and wellbeing of the residents received considerable attention too. Residents complained about low maintenance or lack of street or high mast lights. This has to do with personal safety. The erection of speed humps to reduce accidents garnered lots of votes across the Metro as well. This again, has to do with personal safety.

The next chapter looks at the developmental situation in Mangaung over the last ten years. The aim is to identify development challenges that should be addressed in the next five years.

CHAPTER 2: SITUATIONAL ANALYSIS

2.1. The State of Development in Mangaung – Social Analysis

2.1.1 Introduction

Mangaung covers 6 863 km² and comprises three prominent urban centres, which are surrounded by an extensive rural area. It is centrally located within the Free State and is accessible via National infrastructure including the **N1** (which links Gauteng with the Southern and Western Cape), the **N6** (which links Bloemfontein to the Eastern Cape), and the **N8** (which links Lesotho in the east with the Northern Cape in the west via Bloemfontein).

Bloemfontein is the sixth largest city in South Africa and the capital of the Free State Province. The City is the Judicial Capital of South Africa and serves as the administrative headquarters of the province. It also represents the economic hub of the local economy. The area is also serviced by an east/west and north/south railway line and a national airport.

Botshabelo is located 55km to the east of Bloemfontein and represents the largest single township development in the Free State. Botshabelo was established in the early 1980s and was intended to provide the much needed labour in Bloemfontein without the inconvenience of having labour at the employers' doorstep.

Thaba Nchu is situated 12km further to the east of Botshabelo and used to be part of the Bophuthatswana "Bantustan". As a result it exhibits a large area of rural settlements on former trusts lands.

The Mangaung Local Municipality (MLM) was established in 2000 with the amalgamation of four former transitional councils, but was recently (April 2011) elevated from category "B" municipality to a category "A" metropolitan municipality. This new status presents both challenges and opportunities to the Mangaung Metropolitan Municipality (MMM) and it is against this background that the Municipality is excited to fulfil its Constitutional mandate by focusing on effective and efficient municipal service delivery, growing the economy and empowering its community.

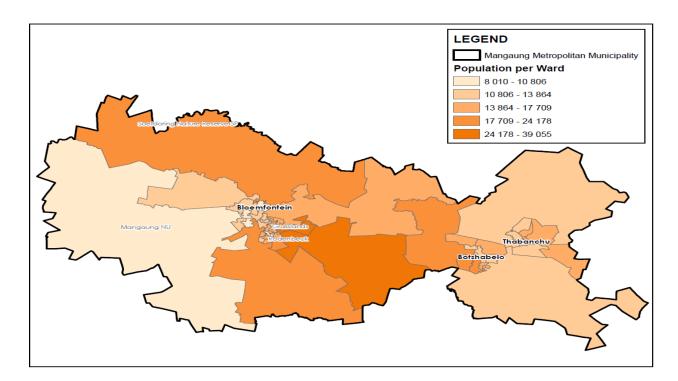

Figure 2.1. Mangaung population distribution, 2011

Source: census 2011

Since Bloemfontein forms the economic hub of the Municipality, as well as the Province, many people are attracted to the area, and continue to stream to the city for better living conditions and employment opportunities..

2.2 DEMOGRAPHIC ANALYSIS

Mangaung population is growing at a faster pace. According to statistics South Africa (Stats SA) in 2011, there were 747 431 people residing in the jurisdiction of Mangaung. This figure increased from 645, 438 in 2001 – see **Table**. The highest increase has been recorded among Indians or Asians followed by Coloureds

Table 7. Mangaung Population, 2001-2011

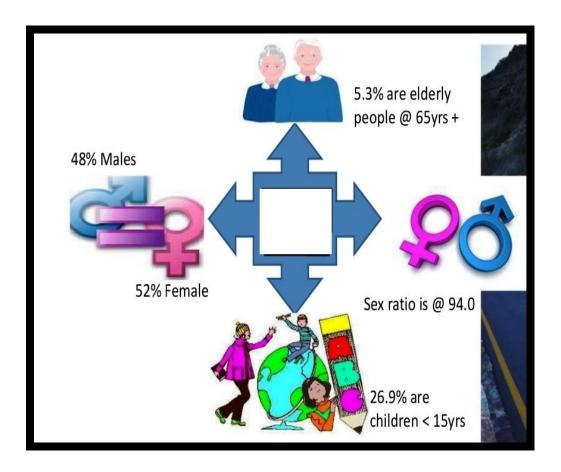

| Population group | 2011 | 2001 | Increase/ Decrease (%) |
|------------------|---------|---------|------------------------|
| Black | 622 383 | 534,429 | 16% |
| Coloured | 37 337 | 32,022 | 17% |
| Indian or Asian | 3 204 | 962 | 23,3% |
| White | 82 291 | 78,025 | 5% |
| other | 2217 | 0 | 2217% |
| Total | 747 431 | 645,438 | 16% |

Source: Stats SA (2001; 2011)

The cosmopolitan character of the metro would go a long way in facilitating social cohesion as citizens learn to live with people of other races, nationalities, religions and cultural practices.

Moreover, due to it being endowed with educational facilities of high quality, Bloemfontein attracts students across the province and the country. Many of the students end up finding employment in the City upon completing their studies thereby remaining permanently in our municipal area in most cases.

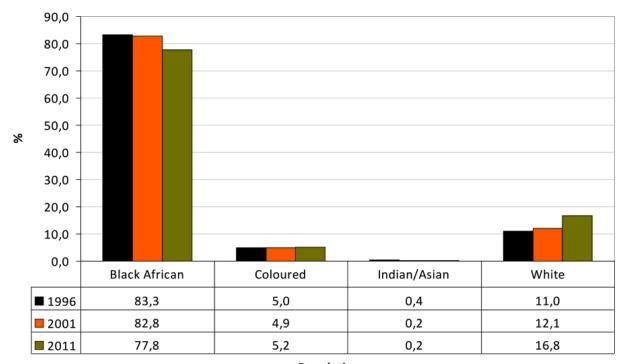

The planning process should bear in mind the likely impact of the phenomenon of in and out migration. Therefore, special attention should be paid to monitoring migration into our shores with the aim of developing and implementing appropriate intervention plans. The monitoring aspects should look at the volume of migration with particular emphasis on who migrates to our shores? What resources do they bring.

Source: Stats SA (2011)

As demonstrated by the graphic above the gender dimension of Mangaung population indicates that as with national trends, there were more women 385 245 than men; 362186 in 2011 At the same time, women seem to live longer than men, the population of Mangaung is fairly young.

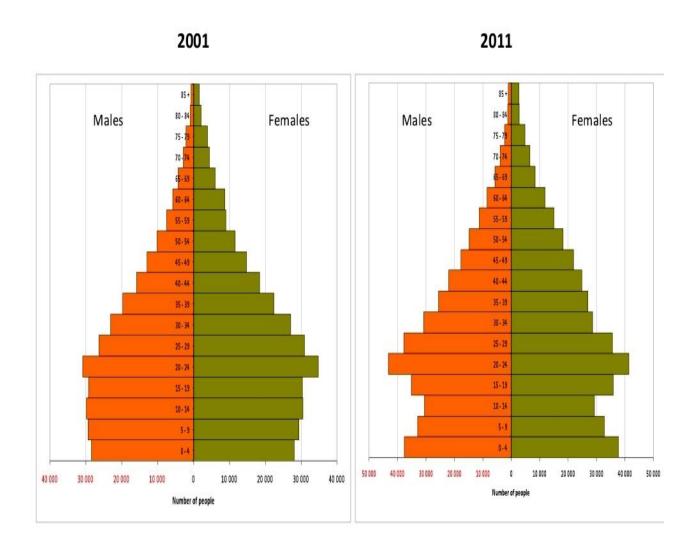

Population group

It would appear that there has been a slight decline in the number of blacks in the city from 83,3% to 77,8%, this trend is playing itself also amongst Asian and Indians but whites and coloureds are increasing this could be attributed to a number of reasons including out migration and pursuit of economic opportunities.

Figure 2.4 Percentage distribution of Mangaung population by gender, 2001 - 2011

As it was in 2001 and so it is in 2011 there are more young people between the ages of 16 and 44 years, this implies that development plans for Mangaung Metro should pay special attention to young people as well as children between 0 and 15, as the graph above demonstrate a growth in that segment of people, this will mean a focused efforts on the young people of the city.

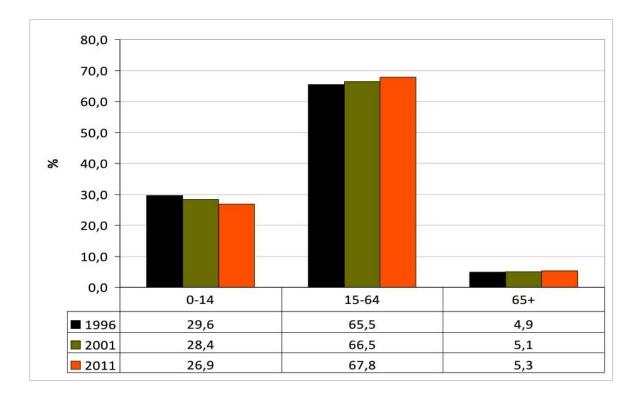

Figure 2.5 Percentage distribution of Mangaung population by age

Source: stats SA: 2011

Although there has been a steady decline between 1996 and 2011 in the ages between 0 - 14, this could be attributed to a number of factors including preventive measures by women and other general economic factors. There has been an interesting growth in the ages 15 - 64 and above which could speak to the victories scored in the fight against AIDS and healthy and responsible lifestyles of the people in the metro. This could encourage the municipality to further explore strategies and policy framework that could enhance this segment of the population including using the elderly into areas where their skills could be re used or used to assist the entry level young people into the mainstream of the economy.

2.3 Household Structure

In line with the population growth, there has been an increase in the number of households in Mangaung. In 2001 there were 185 013 households in Mangaung in 2011 they have increased to 231 921. The average household size in 2001 was 3,4% and in 2011 the size has decreased to 3,2%. Although the majority of households are headed by men, female headed households are also increasing rapidly from 40,6% in 2001 to 40,8% in 2011. This implies that although majority of males reside in their households, the increase in female headed households is worrying. The social ramifications of the migrant labour system in South Africa are well-documented. It is therefore, a positive

development to realise that more men resides in their households. This contributes positively to the stability of families. As demonstrated by figure 2.6 below it would seem that the population of Mangaung is generally stable owing to the social economic development efforts that the city and government generally bestow in communities, coupled to this is the religious and community based efforts that deal with the moral fibre of the communities, and although there is a steady drop in people getting married divorce rates are equally dropping.

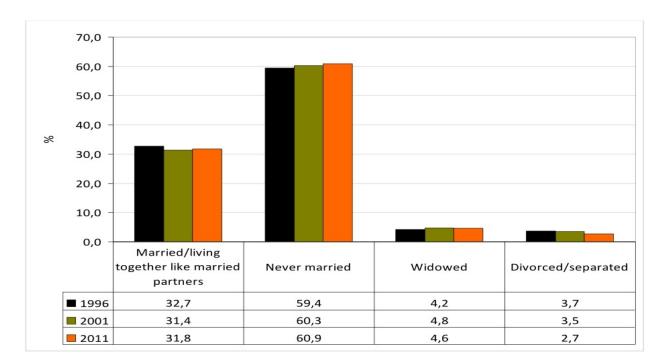

Figure 2.6: Percentage distribution of Mangaung population by marital status 1996 - 2011

Source: census 2011

2.4 Health and wellbeing

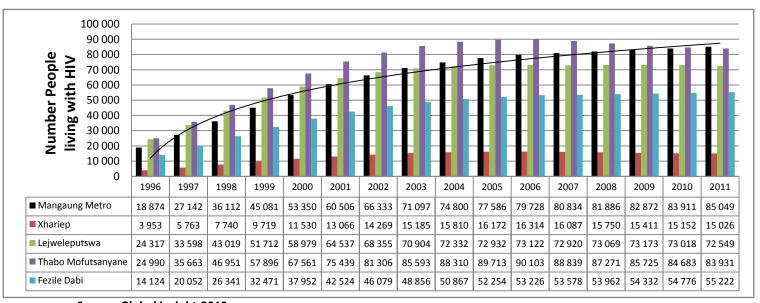

HIV, AIDS and Tuberculosis contribute significantly to the burden of disease faced by the South African Government. Huge amounts of resources are expended on serving the health needs of the citizens. If the situation continues unabated, it creates a situation whereby other services are sacrificed in order to meet the high costs of providing health services to a disproportionately large section of the population. It is for this reason that the South African Government has placed HIV/AIDS at the top of its health priorities.

The Mangaung Metro is equally challenged by its vulnerability to HIV/AIDS risks. Figure 2.75 shows the HIV prevalence in Mangaung. Between 1996 and 2005 the rate of infections was alarming at 6,603 infections per annum on average but between 2005 and 2011 the prevalence rate was 1,064 infections per annum on average. It

can never be over-emphasised that the situation needs serious and urgent attention to ensure that infection rate declines.

For South Africa to achieve its goal of eradicating HIV/AIDS by 2015, the responsibility lies with local municipalities, especially metropolitan municipalities, given their expanded functions which include the provision of health services and local municipalities' proximity to local residents.

Figure 2.7 Mangaung HIV-Estimates

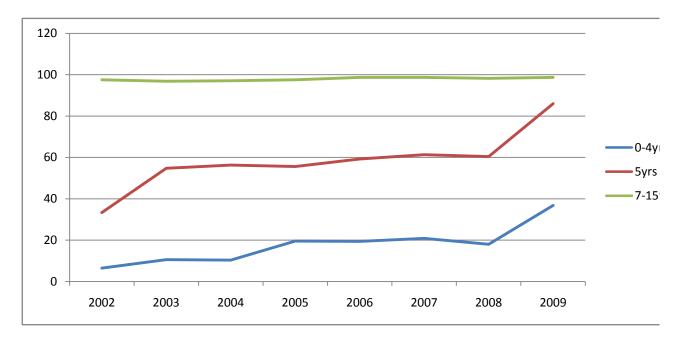

Source: Global insight:2013

2.5 HUMAN CAPACITY DEVELOPMENT

Education is one of the key pillars of fighting the problem of ubiquitous poverty in the region. Mangaung has institutions that cater for all levels of education commencing from pre-school, primary and secondary education to FETs and tertiary institutions. As such, the City is well positioned to nurture the skills of its citizens as well as those of neighbouring municipalities.

What is also encouraging is the level of school enrolment in the Free State. Figure Indicates that nearly all children aged 7-15 are enrolled in schools. Enrolment figures for early childhood development have been increasing at a high rate over the years.

Figure 2.8 Enrolment Rates for children aged 0-15 in Free State, 2002-2009

Source: Department of Basic Education (2011)

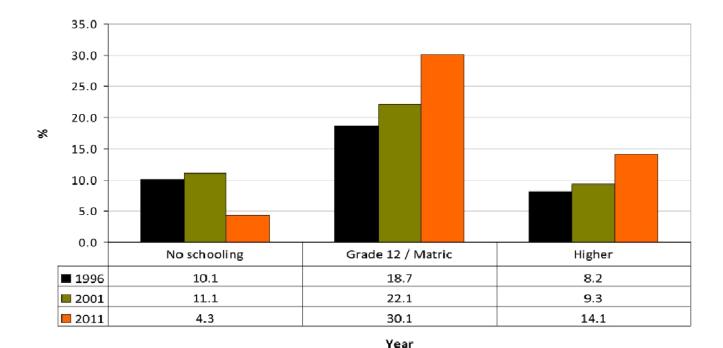

Figure 2.9 Percentage distribution of population aged 20+ by highest level of education, Mangaung 1996 - 2011

Source: Stats SA:2011

As the MMM positive strides are made to reduce illiteracy and increase ability of its citizens to read and write, People with no schooling have decreased from 10,1% in 1996 to 4,3% in 2011, People with matric have increased from 18, 7% to 30.1% in 2011 and those with higher education from 8.2% in 2001 to 14,1% in 2011.

Whilst this is a good development it provides immediate challenge to the municipality and Government generally to expedite interventions aimed at absorbing and retaining the skill that is provided by this development. This lay a solid foundation for a development of the skills base for the city and potentially this may have a positive knock on effect of attracting investments and enhancing the overall competiveness of the city. The MMM also has a lot of academic institutions that makes it possible to produce a lot of skill for the Metro

2.6 ECONOMIC ANALYSIS

GROWTH

Mangaung is the largest contributor to the GDP of the province and is regarded as one of the most diverse economies in nature. There is however a disturbing downturn in the Gross Value Added by the region when one looks at the broad economic sectors for both the municipality and the province. The relative contribution per sector for Mangaung is indicated in table 7

Table 8 GDP contribution per sector in 2011

| Sector | National | FS 96 | FS 2011 | MMM 96 | MMM 2011 |
|--|----------|-------|---------|--------|----------|
| Agriculture, forestry and fishing | 100% | 12,2% | 9,7% | 1,5% | 1,2% |
| Mining and quarrying | 100% | 13,6% | 9,1% | 0,0% | 0,1% |
| Manufacturing | 100% | 3,5% | 3,9% | 0,5% | 0,3% |
| Electricity, gas and water | 100% | 6,9% | 6,5% | 1,3% | 0,9% |
| Construction | 100% | 4,4% | 3,0% | 1,7% | 1,1% |
| Wholesale & retail trade | 100% | 5,1% | 4,8% | 2,2% | 2,1% |
| Transport , storage & communication | 100% | 5,7% | 4,3% | 2,6% | 2,0% |
| Finance, real estate & business services | 100% | 4,8% | 4,1% | 1,8% | 1,7% |
| General government services | 100% | 6,5% | 6,5% | 2,7% | 2,8% |
| Total industries | | | | | |

Source: Global insight (2011)

There are disturbing trends in the growth patterns of economic sectors in Mangaung, the majority of economic sectors have declined during the 1996 - 2011 period to the exception of the mining and quarrying and general government services where a modest increase of 0.0% to 0.1% and 2.7% to 2.8% was attained respectively.

Employment

The creation of employment opportunities amongst semi- and unskilled persons remains a challenge. According to Stats SA unemployment rate is at 27.7% in 2011 as compared to 40,1 % in 2001. This shows a significant decrease of unemployment however not enough as the youth unemployment rate is at 37.2.% as compared to 49,1% in 2001. As a result, unemployment figures are still unacceptably high beyond 30%, as indicated in Figure 2.10.

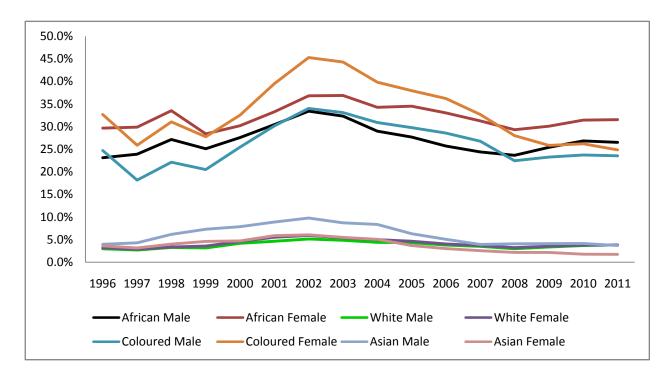

Figure 2.10 Employment trends in MMM, 1996 - 2011

As the national picture for the unemployment situation bears testimony, black women and young people are adversely affected by the lack of participation in the economy,

The **figure** above demonstrate the employment parities between men and women in the Metro and the gap that still exist between these groupings, included in this analysis is still the widening gap between African and Coloureds males and females and White and Asian males and females.

Income levels

It is estimated that 63.4% of households earned less than R3,200 a month in 2010. This compared better to the Free State (71.2%) and South Africa (64.4%). The largest income group in Mangaung (25.3%) earned between R1,600 and R3,200 a month in 2010. Only 0.5% of local households earned more than R102,400 a month in 2010. The weighted average income in Mangaung was R5,183, during 2010, compared with R3,740 in the Free State and R4,822 in South Africa.

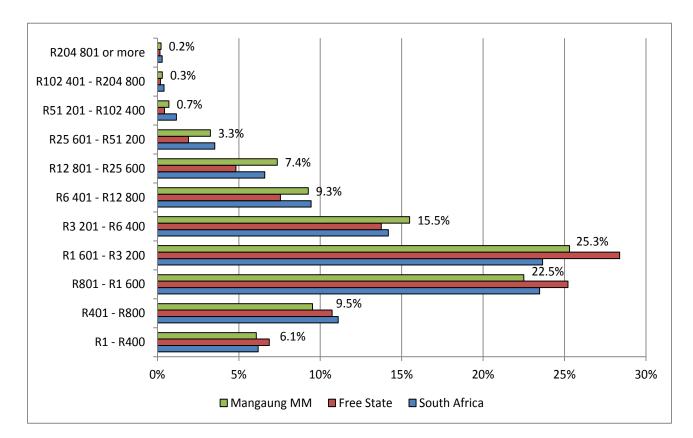

Figure 2.11: Income distribution amongst households in Mangaung, 2010

Quantec research: 2012

The nature of inequitable distribution of wealth and services is demonstrated by the fact that those exposed to severe poverty levels are township dwellers.

Botshabelo, Thaba Nchu and Mangaung township residents are the worst affected. In fact, Botshabelo is considered to be one of the most deprived areas in the metro and amongst the poorest in the Free State. In addition to facing economic hardships residents of these areas continue to experience inadequate levels of services compared to well-developed suburbs in Bloemfontein. The figure below shows inequality between the population groups in the metro with blacks continuing to be the most poor and sharing the smallest size of the pie of the economy.

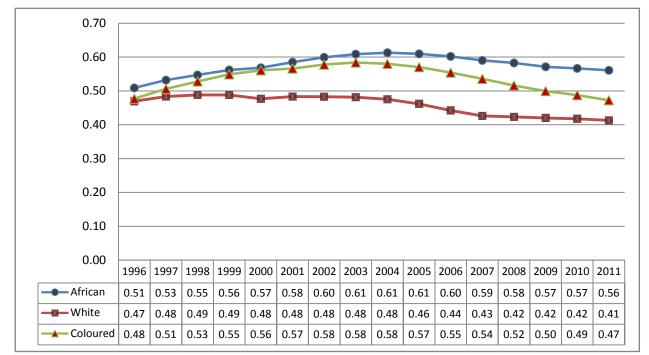

Figure 2.12: Inequality levels in Mangaung between race groups

Source: global insight: 2013)

There are still huge gaps between the population groups in Mangaung, black people are still the poorest then followed by coloureds. The figure above indicates Africans were at 0,51 in the inequality index in 1996 their situation has worsened in 2011 to 0,56 whereas other groups have been constant. The MMM may wish to carefully look into this state of affairs and introduce measures to ensure blacks are moving to the same economic bracket as the other groupings.

2.7 BASIC SERVICE DELIVERY

2.7 1 HOUSING

The City has a huge housing backlog compared with other municipalities in the Free State. More than half of the population in the City resides in Bloemfontein and in particular, in the Mangaung Township area because Bloemfontein is perceived as an economic hub of the City and people believe that there are better work prospects and better living conditions in this region.

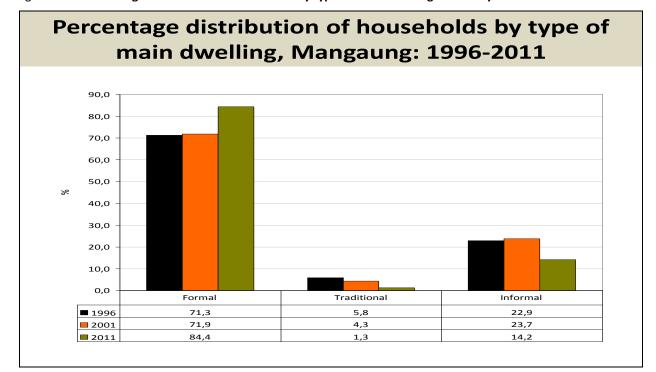

Figure 2.13: Percentage distribution of households by type of main dwelling in the City.

Stats SA, 2011

In terms of the above figure, the City has experienced an increase in the provision of formal housing; from 71.9% in 2001 to 84.4% in 2011. In the same years the City has experienced a decrease from 23.7% to 14.2% in the informal dwellings. Part of this decrease could be attributed to more formal houses being provided through a basket of government housing programmes.

An internal investigation by the Municipality during 2010 revealed that the current housing backlog stands at approximately 53,820 houses in Mangaung, the bulk of which are residing in the Mangaung Township. This figure has increased to 58 820 during 2011, with the demand mainly found in the affordable (GAP) and the rental markets.

The City has not been supplying affordable rental housing over a number of years thus compromising on the opportunity to improve spatial integration, urban efficiency, as well as on opening up economic potential in those planned areas where bulk infrastructure, like sanitation, water and transport may be under-utilised. It must be noted that the City still has to conduct a full investigation of the housing backlog so as to be able to plan effectively. However, the overall backlog and need across the City suggests that housing situation is characterised as follows:

Low-Income Housing

The low-income housing especially in older parts of the City is characterised by old houses, four-room houses built during the apartheid period as well as the government subsidised houses built since 1994. Added to the above are informal houses in the form of shack structures located either on developed sites, unplanned sites or in the backyard of formal houses. Many of the old houses are no longer suitable for human habitation and are thus a constant risk to the lives of the occupants.

The City has commenced with *in situ* redevelopment of these houses in collaboration with the Provincial Department of Human Settlements. In the area of Batho Township, urban renewal processes have also commenced. Old and dilapidated houses have been demolished and new houses built as part of urban renewal.

Demolition and reconstruction of better houses, MMM

The reconstruction of these houses will go along with the programme of verifying the legal status of the occupants of these houses and also to enable the formalisation of full ownership of these houses. Ownership of a number of other four room houses that belonged to the City has also been given to occupants through the discount homebenefit scheme.

Middle to High Income Housing

At this stage the market forces drive the majority of middle to high-income housing within the City, and in particular in Bloemfontein. It is generally characterised by high levels of services, which include metered water and electricity, water borne sewerage and tarred streets. The driving forces of high-income housing are property development and sale with prices comparable to other major urban centres. Financial institutions are active participants in this market.

Rural housing

Rural housing is found mostly in the Thaba Nchu area as well as on the farms. The City in collaboration with Provincial Department of Human Settlements has provided these rural communities with housing in line with applicable national and provincial policies. To ensure that these communities subsist, the City's plan is to work with them to repair and rehabilitate the existing irrigation infrastructure; assist in terms of the formation and support of co-operatives; skills development and agro processing.

At this stage there is concerted effort to address farm worker housing, especially the provision of secure tenure to farm dwellers. Tierpoort and Toegekregen farms have been identified for this purpose.

Inner City

Although there are residential flats within the inner city of Bloemfontein, the inner city is underutilised for residential settlement. The withdrawal of some companies from the city centre to the western side of Bloemfontein has left some buildings underutilised. These buildings would serve the right purpose to be used for residential occupation. The City is exploring options of redeveloping some of the properties into social housing units.

This strategy to enliven the city is accompanied by strict control measures to pre-empt the degradation of the city and the potential security risk. Mixed use developments have been prioritised in the inner city so that one block of flat can simultaneously provide for business/trading activity, office work and residential. The City has also considered converting some of its rental stock into social housing to promote densification and integration; a good example here is the Brandwag project.

Brandwag Social Housing Project

The Brandwag area, on which the municipal rental stock is located, was declared a designated restructuring zone, meaning a geographic area identified by local authorities and supported by provincial government for targeted, focused investment. Besides providing houses, this project is increasing the social and economic integration of the area in the sense that it is in close proximity to businesses, educational, health and recreational facilities. This project is currently under construction and once completed, it will produce 1 052 rental units purely intended for providing shelter to housing households earning between R 1 500 and R 7 500.

Informal Settlements

Informal settlements refer to areas that are not formally planned but nevertheless are occupied illegally by the dwellers. The upgrading of informal settlements is one of the four Outputs of the National Outcome 8 imperatives. The Informal Settlements Development Strategy currently being developed jointly by the City and Housing Development Agency (HDA) is aimed at ensuring that all urban informal initiatives are properly co-ordinated in terms of prioritisation, development planning, resources allocation and implementation.

At this stage the City is experiencing huge mushrooming of informal settlements, mainly in the Bloemfontein and Botshabelo regions. In these regions, the City is actually following on people who illegally invaded land, put up informal structures, at times in areas which are not promoting integration. There are currently approximately 28 informal settlement areas within the City. It is noted that the illegal occupation of land has continued, particularly in areas far away from job opportunities or along public transport routes, while backyard dwellings have decreased. The situation has promoted urban sprawl and low-density residential developments as opposed to medium to high density developments in the disadvantaged areas.

Current Status of Informal Settlements in the Metro

At present, there are 28 informal settlements in the Metro inhabited by approximately 25156 households. In the majority, 19 of these informal settlements are located in the Bloemfontein urban centre while the remaining 10 informal settlements are located in Botshabelo and Thaba Nchu. In Thaba Nchu are 3 informal settlements. Flowing from that understanding, it is imperative to also mention that, even in Bloemfontein and Botshabelo areas, there are pockets of informal dwellings scattered in invaded open spaces.

Below, is the list of all Informal Settlements in the Metro, categorised per Ward, with the indication of the development intention and/or projects, existing/running and planned.

Table 9: List of informal settlements

| Ward | Map ID | Settlement Name | Township Status | No. of | Planned |
|----------|--------|-----------------|------------------------------|--------|------------|
| | | | | erven | Action |
| 45 | I | Bloemside 9 | Township approved subject | 4200 | In-situ |

| 40 | Extention 27 (Thaba Nchu) | 213 | |
| | Total | 25 156 | |

Further; a lot of stress has been put on the infrastructural services as a result of this. Later in this plan it will be clearly demonstrated how the City intends dealing with this uncomfortable situation as well as land pockets identified to address same. Below is some of the informalities in the area called MK Square in Mangaung.

Informal settlements on former dumping area with difficult access

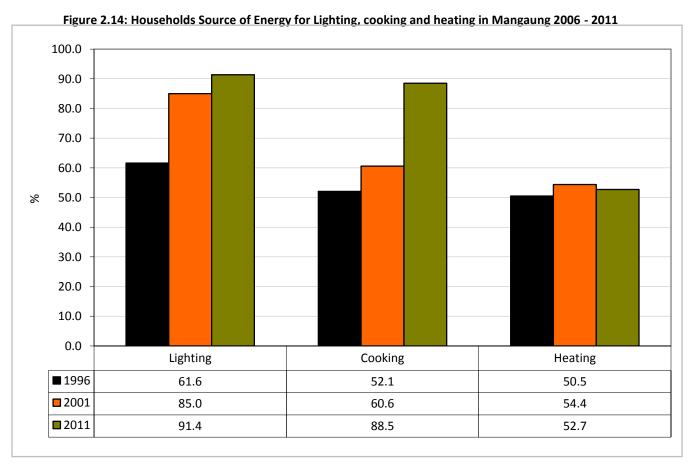

Please see the Municipal Integrated human settlement plan annexed

2.7.2 ELECTRICITY

CENTLEC is responsible for providing electricity in Mangaung. All formalized areas within Mangaung have been provided with electricity and technically there are no shortages.

In order to facilitate the provision of electricity in informal areas, the National Government has set up strategies and guidelines to encourage service providers to electrify un-proclaimed/informal settlements by making a contribution towards the cost of connection and treating these connections as part of Government's electrification targets. The initiative to support the electrification of un-proclaimed/informal areas was sanctioned by the Minister of Minerals and Energy, as a strategy to eradicate backlog and ensure "Universal Access" by 2012.

In order to supply electricity in a sustainable manner, Centlec prepares annual refurbishment and maintenance programmes and there is an urgent need of ensuring that adequate resources are provided to ensure reliable supply of electricity services.

Stats: 2011

We have increased significantly the provision of electricity to households in MMM, the number of households using source of energy for lighting has increased from 85% in 2001 to 91.4% in 2011.

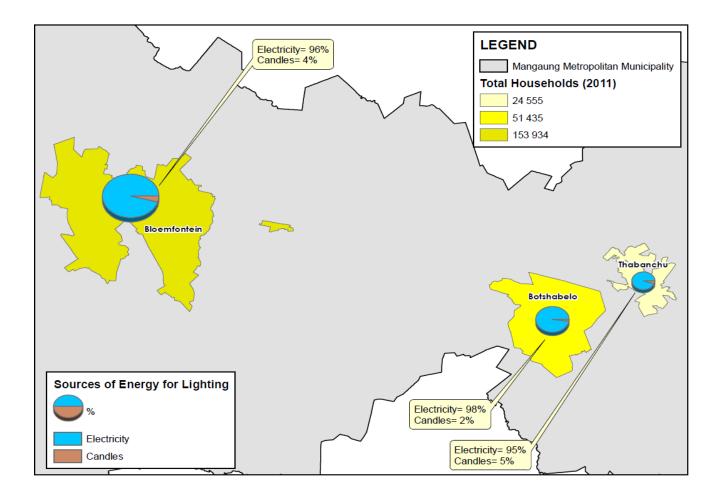

Figure 2.15: House hold source for lighting in Botshabelo, Thaba Nchu and Bloemfontein

Source: Stats SA 2011

Figure 2.15 above supports the observation that the majority of households in the metropolitan area have access to electricity services. On average 96.3% of households in Bloemfontein, Botshabelo and Thaba Nchu use electricity as a source of energy for lighting.

2.7.3 REFUSE REMOVAL

The Municipality has been improving in the delivery of refuse removal services within its communities, clearly between 2001 and 2011 our efforts have improved dramatically and we are able within our resource base to provide this service, over this period there was an increase in percentage of household accessing receiving household refuse removal services from 61,9% in 2001 to 81,8% in 2011.

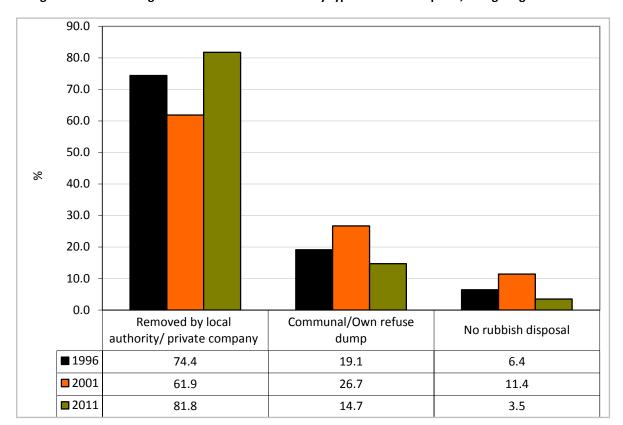

Figure 2.16: Percentage distribution of households by type of refuses disposal, Mangaung: 1996-2011

Stats SA: 2011

2.7.4 WATER USAGE IN MMM

Access to basic services such as water, is very high. Access to water is at 86, 7% average this relates to water inside the dwelling or in the yard. However, huge backlogs are still being experienced, especially in informal settlements.

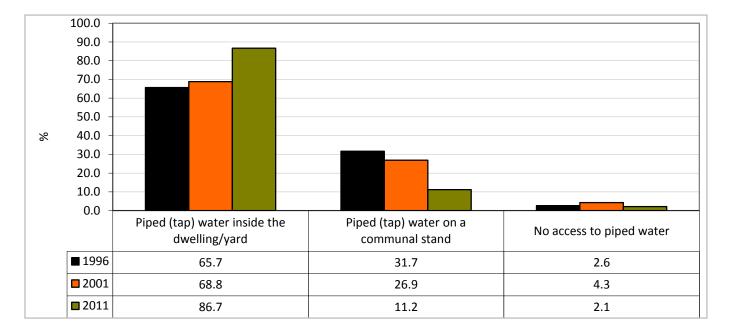

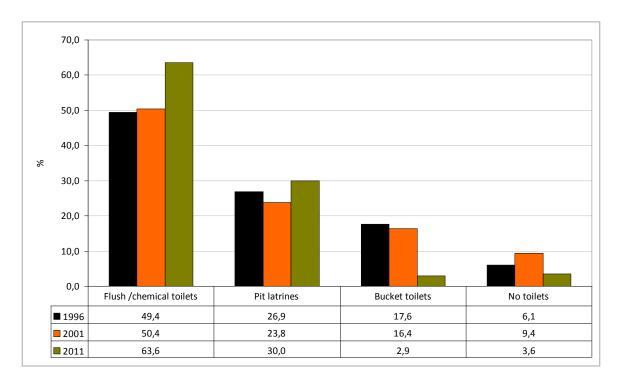

Figure 2.17: Percentage distribution of households by access to water, Mangaung: 1996-2011

Provision of water inside the dwelling has increased in the MMM from 65,7% to 86, 7% whilst piped water on communal stands has decreased from 31,7% to 11,2 % in 2011. No access to piped water has decreased as well from 2,6% in 2001 to 2,1% in 2011. Again the challenge the municipality faces is the mushrooming of informal settlements which then increases the backlog. Further problems relating to water backlogs have to do with critical SMME initiatives like car washes; this poses a balancing problem for the Metro as well in terms of retention of water services

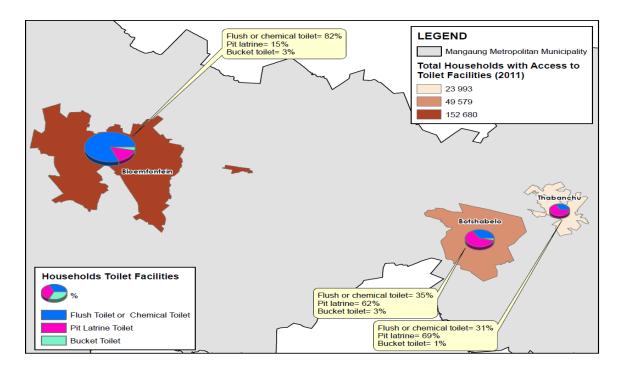

The City estimate the mentioned water service backlogs is 17,547 of formal ervens that still need to be provided with basic water connections. In order to eradicate the water connection backlog, the Municipality has set itself a target of connecting 3,300 formal erven each year. Considering the fact that the number of formal erven increases with approximately 1,000 new stands per annum, it will take approximately 8 years until 2020 to eradicate the water connection backlog.

2.7.5 SANITATION USAGE IN MMM

Figure 2.18 Percentage distribution of households by type of toilet facilities, Mangaung: 1996-2011

The figure above illustrate that the municipality has been making a steady progress in relation to provision of sanitation services to communities. Access to flush/ chemical toilets has increased from 50.4% in 2001 to 63.6% in 2011, and the provision of pit-latrines has increased from 23.8% in 2001 to 30.0% in 2011. Over this period, there has been a marked decrease of a percentage of households using bucket toilets from 16.4% in 2001 to 2.9% in 2011 and those with no toilets from 9.4% in 2001 to 3.6% in 2011

Source: Stats SA 2011

The City estimate its sanitation backlog as at November 2012 to be at 61,368 of formal ervens are yet to be provided with waterborne sewer connections, this is most acute at Botshabelo and Thaba where the provided Ventilated Improved Pit-latrines that are supposedly a basic level of sanitation have fallen into disrepair and would no longer be upgraded into waterborne sanitation as initially planned. In order to eradicate this backlog, the Municipality has made a commitment to make 11,300 connections each year, subject to availability of sufficient funds to upgrade the bulk networks alongside the set target. Considering the fact that the number of formal erven increases with approximately 1,000 new stands per annum, it will take approximately 6 years until 2018 to eradicate the sanitation backlog.

2.7.6 ROADS AND STORM WATER BLOCKAGES IN MMM

Roads and Storm water infrastructure constitutes an integral part of the country's economy. Chapter 7 of the Constitution of the Republic of South Africa provides a direction to Local Government Authorities to provide services to the communities in a sustainable manner. It is also imperative that those services are kept in satisfactory condition at all times. To this end, the Mangaung Metropolitan Municipality has heeded this call by putting such measures in place.

The Municipality appointed V&V Consulting Engineers in 2010 and in 2013 for the implementation of a Pavement Management System (PMS), of which the latter is still being finalized. The report presents a network level proposal for maintaining the roads in the area through an assessment of the network based on methodical visual ratings of each pavement section. When implementing a system it can be divided into a network and project level. It must be emphasized that the PMS implemented, is essentially a **network level tool**. Visual assessment forms the basis of evaluating of the condition of the road network and the need for specific actions. The collected information is processed to provide the output for top management for **strategic planning and budgeting purposes** as well as for maintenance engineers for tactical planning and execution purposes.

Different road sections require different types of maintenance varying from routine and normal to heavy rehabilitation. Possible project types range from routine maintenance (e.g. patching), to normal maintenance (resurfacing) through to heavy rehabilitation (e.g. thick overlays and reconstruction). With the limited funds available it is important that these funds be spent at the right place at the right time to ensure optimum use of funds. The use of PMS is generally accepted as an essential tool for determining the maintenance and upgrading needs/programs for pavements in a network of roads.

Roads and Storm-water backlogs in Mangaung

| Existing Developments | No House | Length (m) | Unit cost | Total estimated Cost |
|------------------------------|----------|------------|-----------|----------------------|
| | Units | | | |
| Mangaung Road backlog | 167,779 | 1186400 | R 6,500 | R 7,711,600,000 |
| Mangaung Storm-water Backlog | | 830480 | R 3,500 | R 2,906,680,000 |
| | | | | |
| Informal settlements | No House | Length (m) | Unit cost | Total estimated Cost |
| | Units | | | |
| Bloemfontein | 31627 | | | |
| Roads | | 790675 | R 6,500 | R 5,139,387,500 |

| | Units | Length (m) 273420 | Unit cost | Total estimated Cost R 1,777,230,000 |

BEPP 2013

Source: Stats SA 2011

The City will need a staggering *R21.8 billion* investment to upgrade its road and storm-water backlog that stand at 2 454 735 (m) and 1 766 180 (m) respectively. This demonstrates the acuteness of road and storm-water backlogs that should be dealt with meticulously in the medium to long-term.

Storm-water management remains a big challenge for the Municipality, since continued urbanization interferes with the natural discharge of storm water. The volumes of discharge, as well as peak flows, increase radically in comparison with underdeveloped areas. The objective of storm water management is to limit development in sensitive areas and to provide guidelines for development in order to limit peak flows or to convey storm water in a controlled manner. Precautionary measures are Included in the Storm-water Management System, in terms of which the relevant directorate is responsible to identify and prioritize projects, as well as to find solutions for problems via hydrological modelling.

PART B: DEVELOPMENT STRATEGIES

CHAPTER 3: DEVELOPMENT STRATEGIES

3.1. Vision

On 30 September 2011, the Executive Mayor of Mangaung Metropolitan Municipality, Clr TM Manyoni, during his inauguration, envisioned that the municipality will be striving to be a progressive municipality that is '... globally safe and attractive to live, work and invest in".

In line with the vision of our metro as a "globally safe and attractive municipality to work, invest and live in" the following elements are part of this vision:

- A democratic municipality, rooted in the Constitution, working with all sectors of the society to improve the quality of life of the people of Mangaung;
- A municipality whose community is united in diversity, recognising our common interests and greater equality of women;
- A municipality that provides high quality of service delivery and is constantly striving to ensure value for money;
- Create an ideal environment for our people to be able to work and have access to jobs and ensure that workers' rights are protected and the workforce skilled;
- Build a municipality that ensures that business is afforded an environment to invest and profit while promoting the common interests of the community, including descent work;
- An efficient municipality that protects local citizens, provides quality services and infrastructure as well as
 providing leadership for local development;
- Ensure that individual and communities embrace mutual respect and human solidarity
- A municipality that works closely with other spheres of government, business and civil society to built a better metro, province and country.
- A municipality that is vigorously driving the pro-poor agenda and intervening strategically and programmatically in breaking the cycle of poverty;
- The municipality that is alive to and recognises its operational context of the municipality, the city region, the province and being part of the country

During the strategic session held in February 2013 these elements were beefed up to include 6 important aspects:

- External Accountability (Communication with Citizens);
- Stability (Political Stability);
- Effectiveness of policy
- Adherence Regulatory Framework;
- Appreciation of the Role of Law and
- Control of Corruption

3.2. IDP Objectives

The reviewed IDP objectives for 2013/2014 still remain as follows:

3.2.1 Economic Development

The objective aims to grow and develop the economy through working programmatically with a wide range of stakeholders (other spheres of government, academic institutions, medical associations, business and civil society) and exploiting the full strength inherent in our economy. The municipality will be placing specific emphasis on the following:

- Attracting both local and international investors
- · Building partnerships for improving skills and capacity building
- Broadening partnership in economic development
- Promote competitiveness in the local market.
- Facilitate Industrial Development and Integrated Human Settlement Development towards the east of the City, especially along the vicinities of N8 Development zone.

Deliberate efforts will be expended to ensure that the development benefit the poor and ensure that we deracialise the built environment to be accessible to the poor for eking out a living and deal with inherited and distorted spatial patterns.

We need to work in ensuring that *the economy is growing in a complex and sustained way*, forge links with other cities on Human Development Strategy, skills, health and security. These interventions should be highlighted in the IDP and should articulate how as the City we are intervening on economic growth and what has been the effect.

A process of identifying and agreeing on what is a *comparative and competitive edge* of the municipality in relation to other municipalities and cities should be unfolded, primarily within the ambit of the City's growth and

development strategy to inform future development trajectories of the City. We need to tease out locational advantage of Mangaung within the national and international space and harnessing opportunities such as Business Process outsourcing and out-shoring. We need to determine which sectors of the economy and corresponding projects will be anchoring economic development.

3.2.2 Built Environment

This objectives aims to deal with distortions of the municipality's spatial configuration as it relates to housing, transport, economic development and community infrastructure. This matter should be progressively dealt with as it is critical to the economy of the city and its long-term financial viability.

The municipality will be striving towards the rejuvenation of the Central Business Districts (CBDs) of Bloemfontein, Botshabelo and Thaba Nchu to transform these into vibrant and integrated centres for our people, providing basic services, 24-hours centres of interaction, with active investment by both the private and public sectors. The municipality will explore using a bridge as an instrument to link city spaces where possible. Using some of the land parcels particularly VISTA area for dealing with inherited spatial distortions. Develop and implement a clear initiative at Botshabelo and Thaba Nchu and determine what type of industries should be attracted;

Furthermore, the municipality will strive to ensure that its future built environment must at least provide for:

- Development of suitably located and affordable housing (shelter) and decent human settlements;
- Transforming our CBD, including the CBDs of Botshabelo and Thaba Nchu as indicated (moving towards
 efficiency, inclusion and sustainability)
- Building equitable, cohesive, sustainable and caring communities with improved access to work and social
 amenities, including sports and recreational facilities (community development and optimal
 access/inclusion).
- De-racialising the built environment through the accelerated release of land and the development of the seven land parcels of Cecilia, Brandkop, Pellisier, Vista Park and Hillside View, to bring integration and create economic opportunities.

The reviewed spatial development framework, will not only provide normative guidelines on future land projections, but will also direct new developments eastward so as to integrate both Botshabelo and Thaba Nchu in the realisation of the N8 Corridor Development. *N8 Corridor Development will be implemented* with clear and time bound three / four projects. Need to tease out what impact will N8 Development yield on other parts of the City and CBDs.

Land development should be approached in a strategic and holistic manner; a single project approach was endorsed. An astute and visionary political leadership is imperative in relation to land development and inherent interest. Identify and develop ready to use land (that is serviced and planned). Conceptualise and implement a flagship projects with mixed land use and housing typologies. We need to establish a planning forum in the City that includes the participation of the province. We need to be the active players in planning the development trajectories of the City space. We need to immediately develop intelligence around why houses were not developed (incomplete), what is the magnitude of the problem, to enable us to engage with other sectors from the position of strength.

The municipality is conscious of a number of factors that inhibits speedy allocation of land for local economic development, for example, illegal occupations and land under the control of tribal authorities. However, we are in the process of finalising title deeds discrepancies with tribal authorities (Department of Land Affairs).

The municipality will be interacting periodically with the provincial and national departments who are involved in land development value chain to expedite and finalise township registers, and we will identify land and allocate sites where professionals (*such as nurses, police, teachers, etc*) can access land to build houses.

There is a need of dealing with *inherited spatial distortion*; we need to use space for visualising and representing what Mangaung City is all about.

3.2.3 Public Transport

This objective is geared towards reviving the public transportation system in the city and the upgrading and development of attendant infrastructure.

The municipality will take advantage of infrastructure and economic legacy of the 2010 Soccer World Cup, wherein the government developed Integrated Rapid Public Transport Network (IRPTNs) to ensure safe, efficient and affordable public transport, towards reshaping of public transport in South Africa and ultimately introducing priority rail corridors and Bus Rapid Transit (BRT) systems in cities. In this regard, the plan to begin with the construction of the IRPTN was halted and Mangaung is now committed to reviving our efforts on IRPTN so that our people and elsewhere coming to our metropolis have accessible, reliable and safe public transport.

Progressively develop and ensure certainty of the *public transport system* and proactively engage the Department of Transport to determine that other grants are available and would be accessed by the City,

3.2.4 Rural Development

The municipality will strive towards facilitating rural development to militate against rampant poverty afflicting citizens inhabiting rural areas, provide basic services and implement local economic development projects.

The municipality will adopt and implement an extensive integrated and sustainable rural development strategy, to capitalise on potential synergies among the various government programmes in order to promote and support more rapid and equitable rural development.

3.2.5 Provision of effective and reliable services

Harness opportunities for "bulk infrastructure" by proactively and systematically engaging sector departments and build a strong business case for leveraging additional resources. Capital outlay needed to deal with infrastructure backlog estimated at R2 billion seem prohibitively high, but if these is dealt with within the MTREF period it seem doable. Infrastructure development is a primary instrument to support economic growth and development. We need to ensure that all developers contribute to bulk and we need to make retrospective claim against past development to developers. A comprehensive bulk Infrastructure Master Plan should be developed and this should provide guidance on futuristic development charges. We need to exploit the existing "bulk infrastructure" capacity in the North and facilitate land development thereon.

The primary task of a municipality beyond and above its developmental mandate is the provision of basic services to its intended clients being households, business and service providers, the MMM in context with the backlogs that it has in housing it must therefore develop intervention strategies to curb this further blacklash, it is however known and appreciated that this kind of backlog can never be absolutely eradicated because of in migration, fertility and other economic activities, the MMM as a mega of the province is prone to these developments

Further it is encouraging that a very few households mostly informal are without electricity and all efforts are being carried out to ensure that all households have access to clean water by 2020.

3.2.6 Water Services development

We need to ensure that there is reliable water supply services and explore means of meeting future water demands of the City as BloemWater does not provide adequately for future development priorities of the City. A comprehensive water demand management programme should be implemented as expeditiously as possible to reduce the water line losses (that include civic education programme, community plumber's programme and replacement of ageing infrastructure). We need to recognise that South Africa is a water-scarce country and issues such as rain water harvesting should be explored.

Adopt a **balanced development to infrastructure develop** and ensure that extending infrastructure development to areas with no or minimal services will not have an unanticipated consequences of ageing the infrastructure in the well developed and serviced area of the City.

See the MMM water services development plan and the 5 year strategic management plan for the reduction of non revenue water in the MMM as *annexed* as one of the sector plans hereto.

3.2.6 Integrated Waste Management

Waste Management planning should be contextualised within the framework of national government, provincial government, district municipality and local municipality legal regulatory and policy framework. Development in Mangaung can be described from a waste management perspective as follows:

- Bloemfontein incorporates integrated residential, commercial and industrial development. This area has
 well developed infrastructure with substantial road networks and good access to all points of waste
 generations
- Botshabelo was established in 1978 as an apartheid engineered town for displaced people in the Free State, Development is substantially formal with a substantial internal road network providing access to most households.
- Thaba Nchu has been a home of Tswana people in the Free State for more than 180 years. Thaba- Nchu
 consists of urban area with private land ownership and rural area of both private communal land people
 living in 37 scattered villages. Development is fairly formal with an internal road network providing access
 to most households
- 23% of MMM area is farm land with a further 2% covered in small holdings and as such presents a new challenge to the expanded municipality, the area has basic road infrastructure

A detailed discussion on the MMM Integrated Waste Management Plan is annexed here thereto

3.2.8 Revenue Enhancement

This objective aims at restoring and stabilising the financial position of the City and achieving net-gains in revenue enhancement to ensure maintenance of existing assets, services, extension of services to underserviced areas and investing in infrastructure for growth and exploring new avenues for revenue.

Revenue enhancement plan should be implemented expeditiously - commence with the process of reducing the salary bill, and lodge claim retrospectively with Citizens that have been receiving services from the City but were

never billed to date. This should be preceded by a comprehensive diagnosis of the state of the municipal finance to inform our "Clean Audit 2014" initiative and the revenue enhancement plan.

3.2.9 Mainstreaming of Poverty Reduction

This objective at facilitating intervention programmes in partnership with critical stakeholders to have a positive knock on effect on poverty reduction in the city.

Mainstreaming of poverty reduction across programmes of the City to deal with rampant poverty and contribute towards food security as poverty is localised in our townships and Thaba Nchu and Botshabelo being the most affected. We need to determine what impact will be yielded by these programmes? We need to intervene strategically and ensure that the creation of a sub-node in Botshabelo will have a bearing on poverty alleviation, but we need to ensure that a pro-poor approach is a common thread_that runs through the way we do business as a municipality

3.2.10 Youth and Gender development

As discussed in the analysis MMM population is fairly young and is mostly female, it is important that development objectives and strategies of the municipality pursued through its projects reflect the bias towards Youth Development and empowerment.

Young people and children between the ages 0 -14 are the most in MMM thus properly the municipality to enhance its efforts on early childhood development, youth programmes and projects aimed at supporting women development

In 2004, the Mangaung Metro Municipality entered into a twinning agreement with the City of Ghent. As part of this partnership the Mangaung Metro Municipality has three Youth Centres, namely:

- Outdoor Youth Centre
- Heidedal Youth Centre
- Botshabelo Youth Centre

The purpose of these youth centres is to have a one stop youth service centre for young people of Mangaung. These youth centres are built around three activity pillars, namely:

- Education and Training
- Sports and Leisure
- Information, advice and support

These youth centres are fully fledged with games and other educational equipment to ensure that young people of Mangaung can go there for information, sports and fun games.

The Mangaung Youth Centres had Computer Classes running at all centres until around 2009/2010 when the centres experienced problems with the computer which are not working and of no use. The Mangaung Youth Centres hereby need more computers to continue with computer classes at all the centre (10 computers per centre). At Outdoor Youth Centre we have a limited space for programmes taking place as there are drama, dance and poetry sessions taking place. An extra building or temporary structure is needed.

At Thaba-Nchu there is a challenge of structure for a youth centre as there are no municipal buildings. Youth Unit only has a office and no youth centre. However, there is a need for a Youth Centre for young people of Thaba-Nchu.

3.2 11 Spatial Planning

The challenge our country sits with including the Mangaung Metropolitan is the skewed spatial patterns that were designed under the apartheid regime, The MMM should in its attempt to develop its communities deal with this matter of skewed spatial patterns that exist, in line with this challenge sits the problem of pockets of poverty in most Mangaung townships which limits economic activity and are far from economic opportunities..

Poor people particularly black travel far to access services, economic and employment centres, this not only hampers deeply on the already strained resources of these people but also represent a single most difficult challenge of defeating poverty and unemployment.

The spatial development framework of the municipality must embrace the concept of integrated human settlements; its intention should embrace environmental management and assist communities to access economic activities

3.3. DEVELOPMENT CHALLENGES AND PRIORITIES

The city has facilitated a series of public engagement and meetings with critical stakeholders to solicit input on the IDP so that the reviewed IDP for 2013/2014 financial year would be developed. These engagements and meetings with stakeholders assumed public hearings, a one day self assessment workshop with councillors and a Mayoral lekgotla formats. A self assessment dialogue sessions were convened on 30 October 2012 primarily to review progress attained during the course of the financial year (2012/2013), tease-out what has been achieved in the 1st quarter ending 30 September 2012, presented the draft Growth and Development Strategy for the City and tease-out challenges and opportunities to be dealt with in the medium to long-term. Furthermore, the sessions were to concretise the vision, for Mangaung Metropolitan Municipality highlighting the development priorities and strategies that will frame the subsequent revision of IDP for 2013/2014 and MTREF for 2013/14 – 2015/2016 period.

Importantly, these sessions were attended by the majority of councillors of Mangaung Metropolitan Municipality and representatives of different political parties represented in Council as well as Heads of Departments.

A report on the proceedings of the self assessment dialogue sessions indicate the challenges confronting the municipality, development priorities and corresponding opportunities that should be borne in mind in the development of the reviewed IDP 2013/2014 and MTREF for 2013/14 – 2015/2016 period.. A tabular representation of these challenges, development priorities and corresponding opportunities is hereto attached.

Table 1.1: an overview of challenges, development priorities and opportunities

| Key Focus Area | Challenges | Priorities | Opportunities | Threats |
|--|--|---|--|--|
| Municipal Transformation and Institutional Development | Ineffective implementation of decentralisation | Development of a City Growth and Development Strategy (GDS); | Growth and Development Strategy (GDS); | Lack of consensus and shared vision of a future development trajectories of the City |
| Municipal Transformation and Institutional Development (contd) | Having an established and operational Metro Police Department | The municipality being afforded a Metropolitan municipality status and establishment of critical departments such as Metro Police, Ambulance Services, etc in the medium to long term | Metro Police, Ambulance Services, etc. in the medium to long term | Demands on ambulance service may exceed what Metro can offer / deliver resulting in community complaints |
| | Developing a harmonious and cordial relationship with organised labour | Ensure an effective and operational LLF a | Effective local labour forum | Increase in industrial action |
| Service Delivery | Housing backlogs and incomplete housing projects; | Building of mixed housing (BNG, Gap Market and Bonded Houses); Attainment of Level 2 accreditation for Housing Delivery; | BNG, Gap Market and Bonded Houses); Level 2 accreditation for Housing Delivery; | Land invasion, mushrooming of informal settlement, urban sprawl |

| Key Focus Area | Challenges | Priorities | Opportunities | Threats |
|----------------|---|---|---|--|
| | Illegal settlements and land invasions in areas/lands planned for different development other than residential; | Accelerating development of seven (7) land parcels; Fostering of collaboration across the department of the City to deal with varied land development challenges | Accelerating development of seven (7) land parcels; Interdepartmental relations | |
| | Development of the disaster management centre | implementation of the concept paper on disaster management and establishing and resourcing the unit | disaster management unit | Disaster Management Centre not properly resourced will not be able to deliver in terms of the Disaster Management Act |
| | Ineffective service delivery – refuse and waste collection and ensuring reliable water supply | Implementation of Integrated Waste Management Plan and purchasing of compaction trucks for waster removal. | Alternative forms of acquisition of assets (vehicles) can be explored / implemented Regular water removal. Promotion of green environment. Regular and reliable water supply | Pullulated environment due to non collection of waste. Unreliable water supply due to demand exceeding the supply. |

| Key Focus Area | Challenges | Priorities | Opportunities | Threats |
|----------------|---|--|--|--|
| | Ageing service delivery infrastructure (including electricity and water line losses) and utilities (fleet); | Implementation of the recommendation of the bulk water reconciliation study for the greater Mangaung. Implementation of Water Conservation and Demand management Programmes. Implementation of Refurbishment and Rehabilitation programmes | Reduction and saving of water as a scares commodity. | Water losses becoming unacceptably high and water becoming unaffordable to consumers |
| | Shortage of personnel in critical division — infrastructure departments, supply chain, etc; | Policy position required on prioritizing vacancies – not all posts can have the same "weight" for example a Fire fighter compared to a Cleaner | | |

| Key Focus Area | Challenges | Priorities | Opportunities | Threats |
|-----------------------------|---|---|---|------------------------------------|
| | Moving the zoo to Kwaggafontein to ensure that the City is not cruel to animals | Movement of the Zoo to Kwaggafonteing is a possible plan to address problems identified irt to safety, health of kept animals | Zoo to Kwaggafonteing is a possible plan to address problems identified irt to safety, health of kept animals | |
| Local Economic Development | Provision of land to accommodate emerging township small farmers | Providing commonages in partnership with the Department of Agriculture to accommodate farming activity and grazing of animals | Providing commonages in partnership with the Department of Agriculture to accommodate farming activity and grazing of animals | Availability of land |
| | Ineffective revenue collection hence the reliance on Intergovernmental Transfers(including conditional grants); | Implementation of Revenue Enhancement Strategy Revenue protection and prudent cash flow management Proper management and accounting of municipal infrastructural assets | Implementation of new valuation roll and data purification | Non-payment for municipal services |

| Key Focus Area | Challenges | Priorities | Opportunities | Threats |
|----------------|---|---|---------------------------------|-----------------|
| | Shortage of personnel in critical division — asset management, debt collection , supply chain, etc; | Filling of vacant positions in asset management, debt collection, demand management, acquisition and compliance | Experienced and qualified staff | Staff turn-over |

3.4. Key developmental consideration

Key consideration to inform and influence the developmental agenda in the municipality in the medium to long term includes:

- Facilitate the development of N8 Corridor Development;
- Identify and harness the opportunity of creating a new "City" that spatially assist in integrating the City;
- activation of a second developmental node at Botshabelo;
- Achieve clean audit by 2014;
- Dealing with the fiscal gap by dealing with these critical issues viz billing completeness and accuracy, collections efficiency, debtors minimisation and management, tax and tariff increases for existing revenue sources and expenditure efficiencies. There is an urgent need of concluding the bulk contribution policy and ensure its expeditious implementation. Dealing immediately with the estimated 7000 properties that are not metered for varied services that the City is providing and these are in the Northern suburbs. A turn-around action plan informed by the 80:20 principles will be developed and implemented with time-bound milestone set for the immediate, medium to long-term;
- Deal with crises facing the city, lay the foundation for ushering the future;
- Ensure water service supply and sustainability, lobby the provincial and national government department to deal with service delivery challenges related to water;
- Mainstreaming of poverty reduction and thus incorporate in the IDP, CDS, directorates and individual performance scorecards;
- Development of Botshabelo and Thaba-Nchu to reduce transportation costs on the poor;
- Land development by accelerating Level 2 Housing Accreditation and to obtain full assignment for housing function by 2016; and
- Leveraging resources for a number of flagship project namely land development, Inner City
 Redevelopment, Township Rehabilitation (including greening, open spaces and cemeteries

4. PART C: PROGRAMMES AND PROJECTS

CHAPTER 4: PROJECTS

4.1. Introduction

The Mangaung Metropolitan Municipality has identified eight key development priorities for the next five years. These include:

- 1. Poverty eradication, rural and economic development and job creation
- 2. Financial sustainability (e.g. revenue enhancement, clean audit)
- 3. Spatial development and the built environment
- 4. Eradication of bucket system, VIP toilets in Bots, Mangaung and TN, focus on the basics, building solar farming, power plant feasibility study, safety & security
- 5. Human settlement
- 6. Public transport
- 7. Environmental Management and Climate change
- 8. Social and community services

We also placed "Good Governance" is one of the overarching development agenda for the Council.

4.2. Programme and projects

4.2.1. Poverty eradication, rural and economic development and job creation

4.2.1.1. Situation analysis

The link between poverty, economic development and job creation is pervasive. As is the case with the rest of the country and the Free State Province especially, Mangaung Metropolitan Municipality is equally affected by these problems. It has been indicated above that while the economy of Mangaung continues to experience a positive growth with modest increase in job creation, the economic growth is not sufficient to seriously the dent the plight of joblessness and thus accelerating the alleviation of poverty.

The City of Mangaung is fully cognisance of the fact that economic growth has many spin-offs. In addition to reducing the scourge of poverty through increased employment prospects, economically empowered individuals would become less of a burden on the state for basic services such as shelter, electricity and water. Furthermore, economic empowerment provides a great sense of dignity amongst the poor, and has the potential to reduce crimes levels thereby promoting social cohesion.

The City of Mangaung has identified Rural Development as the number one strategy to ensure food security, fight poverty, create jobs and rejuvenate the economies in these areas. In line with the national Comprehensive Rural Development Programme, we will take advantage of the available natural resources like land, water, tree plantations and agriculture to develop a Mangaung Metro Rural Development Implementation Plan.

4.2.1.2. Development objective

The objective is to grow the economy of Mangaung in order to address high levels of unemployment and ultimately eradicate poverty in our municipal area and facilitate rural development.

4.2.1.3. Strategies

The key strategies are:

| КРА | | Poverty reduction, job cr | reation, rural and economic development | | | | | | |
|-------------|---------------|---------------------------|---|---------------|---------------|--------------|----------|---------|------------------------|

4.2.2. Financial sustainability

4.2.2.1. Situational analysis

Even though Mangaung Metropolitan Municipality is faced with challenges in revenue and asset management, the municipality managed to improve audit outcomes from disclaimed audit opinion to qualification in the 2011-12 financial year.

The municipality's credit rating is stable and indicates the ability to meet its financial obligations in accordance with the terms of those obligations.

There is improvement in cash flow management and repayment of unspent conditional grants.

Revenue Enhancement Strategy focus for 2013-14 will be on the following:

- Illegal connections
- Replacement of faulty meters
- Collection of arrears

4.2.2.2. Development objective

The overarching objective of the municipality with regard to financial sustainability is to increase enhance the billing system in order to improve revenue collection. Adequate financial control cannot be overemphasized.

4.2.2.3. Strategies

The key strategies are:

| KPA | | | | | | bility | | | |
|---|--------------------------------------|--|--------------------------------------|--|--|---|---|---|---|
| Obia ati | | | Target | | | | | | |
| Objecti ve | Strategy | КРІ | 5-Year Target | 2012/13 Base Line | 2013/14 Target | 2014/15 Target | 2015/16 Target | 2016/17 Target | Programme/Project |

4.2.3. Spatial development and the built environment

4.2.3.1. Situation analysis

Best efforts notwithstanding, the Mangaung Local Municipality has been wholly successful in addressing the apartheid legacy of spatial planning and built environment. Communities are not yet fully integrated. Many communities, especially poor communities continue to reside far from places of work, shopping and entertainment. Many informal settlements continue to mushroom, once again very far from essential services. Moreover, township communities continue to be characterised by poor levels of services, especially infrastructure services such as roads, stormwater and sanitation.

For the above reasons, the Metropolitan Municipality has placed a high priority on addressing the disintegration in development planning and ensuring habitable built environment.

4.2.3.2. Development objectives

The key objective is to address the acute problem of housing backlog whilst simultaneously ensuring spatial integration.

4.2.3.3. Strategies

The key strategies include:

4.2.4. Eradication of bucket system, VIP toilets in Bots, Mangaung and TN, focus on the basics, building solar farming, power plant feasibility study, safety & security

4.2.4.1. Situational analysis

Access to basic services such as water, sanitation, electricity and storm-water is very high. Access to water is at 90% average. However, huge backlogs are still being experienced, especially in informal settlements. This is fuelled largely by migration by people from rural areas of the Municipality, neighbouring municipalities and Lesotho.

The status quo has placed enormous pressure on existing services while widen the gulf of unmet critical services such as shelter, water, electricity and sanitation. As a result, most informal settlements and the former Bantustan townships of Botshabelo and Thaba Nchu face severe backlog of sanitation. Most residents in these areas still rely on VIP toilets. The humiliating bucket system can still be found in some townships. This Council resolves to address this problem in totality by the end of its term.

4.2.4.2. Development objective

The objective of this goal is to improve sanitation service in Mangaung by ensuring that the bucket system and VIP toilets are eradicated. Furthermore, the Council aims to address the question of access to energy by exploring all energy alternatives including solar energy.

4.2.4.3. Strategies

The key strategies are:

| КРА | | Eradication of bu | | | _ | | ba Nchu, roads, age | eing infrastructi | ure, focus on the basics, |

4.2.5. Human settlement

4.2.5.1. Situational analysis

Generally, the Mangaung Metropolitan Municipality has a huge housing backlog compared to other municipalities in the Free State. The Bloemfontein region in particular is disproportionately affected as more than half of the population in Mangaung reside in region. This is mainly due to the fact that Bloemfontein is the economic hub as such expectations of finding employment opportunities and bettering their living conditions here are unrealistically high.

In order to address the shortage of housing, especially among the gap market; developments around Vista Park Phases 2 & 3 as well as the Hillside View are being fast-tracked. These projects will consist of both BNG and bonded houses. Furthermore, the City is also focusing on nodal developments at the Bram Fischer Airport and in Botshabelo-Thaba Nchu. On the other hand receipt of Accreditation Level Two will go a long way in ensuring accelerated service delivery within the City.

A business plan supporting full assignment of the housing function to the City has been developed and approved as such by the City.

4.2.5.2. Development objective

- a) To reverse the spatial effects of apartheid;
- b) To address housing backlog;
- c) To redress land ownership disparities;
- d) To improve access to basic services;
- e) To promote innovation and alternative technologies within sustainable development (human settlements) paradigm.
- f) To guide the prioritisation of human settlements projects;

4.2.5.3. Development objective

4.2.5.4. Strategies

The key strategies are:

4.2.6. Public transport

4.2.6.1. Situational analysis

Largely as a result of the legacy of dis-integrated development planning, transport is not well coordinated in the Municipality. Worse, commuting distance to-and-from work is extremely long. The poorer communities are worse-hit by the situation. For example, poor communities between Thaba Nchu and Botshabelo travel 60km and 70km respectively to work. The situation does surely does not help their financial plight. The Municipality is not spared the associated costs. There is an urgent need to address the sorry state of affairs.

4.2.6.2. Development objective

The overall objective is to provide safe and affordable public transport in Mangaung through integrated public transport system.

4.2.6.3. Strategies

The key strategies are:

| КРА | | | | | Public transpo | rt | | | |

4.2.7. Environmental Management and Climate change

4.2.7.1. Situational analysis

The Mangaung Metropolitan Municipality places high emphasis on clean environment and factors that mitigates the impact of climate change. The cleanliness of the Metros CBDs is high on the agenda of the Council. The municipality has deployed commendable resources to the campaign. The municipality is also keen to mitigate the negative impact of climate change by monitoring the air quality, promoting the energy safe campaigns as well advocating and investing in alternative sources of energy, especially renewable energy such as air and sun.

4.2.7.2. Development objective

The objective is to provide adequate energy to the residents of Mangaung without exacerbating the negative impact of climate change.

4.2.7.3. Strategies

The key strategies are:

4.2.8. Social and community services

4.2.8.1. Situational analysis

5. The elevation of Mangaung Local Municipality to a Metropolitan Municipality implies that the municipality needs to provide extended services that are the competency of such an authority. The Council needs to approve the establishment of the Metro Police and a Municipal court. Council has already approved the submission of a request to the MEC for Health in the Province for the assigning of ambulance services to the municipality. The Mangaung Metropolitan Municipality is expected to have a fully fledged Disaster Management Centre. A physical locality for the Centre has been identified and it is envisaged that the second phase of the project will be executed in 2013/2014. Given the strategic nature of Disaster Management Council has approved the establishment of a new sub – directorate in the Directorate Social Services.

5.1.1.1. Development objective

The objective is to provide social services of high quality to all the residents of Mangaung Metropolitan Municipality.

5.1.1.2. Strategies

The key strategies are:

5.1.2. Good Governance

5.1.2.1. Situational analysis

Good governance is critical to effective and efficient utilization of Municipal resources to meet the needs of the residents of the municipality. This Council will place a strong emphasis on good governance by ensuring strong leadership, accountability and prudent management of resources, especially financial resources.

5.1.2.2. Development objective

The objective is to provide strategic leadership to ensure high performance, management and accountability.

5.1.2.3. Strategies

The key strategies are:

CHAPTER 5: SPATIAL DEVELOPMENT FRAMEWORK

5.1 Spatial background and purpose of the SDF

The spatial fabric of South African society was engineered through Apartheid planning, which led to the unequal distribution of resources, low-density sprawl, the lack of opportunities in disadvantaged areas and too much emphasis on private transport. Mangaung's Spatial Development Framework (SDF) has been designed to address these inequalities and to create a more sustainable spatial environment.

5.1.1 Role of the SDF

Section 35(2) of the Municipal Systems Act, No 32 of 2000 (as amended), stipulates that the SDF, as contained in the IDP, will prevail over a plan defined in Section 1 of the Physical Planning Act No 125 of 1991 alias the old guide plans. The SDF therefore has statutory power once the IDP is adopted by the Council and will guide all land use management within the municipal area. In terms of section 25(a) of the act, the SDF, as part of the IDP, must link, integrate and co-ordinate plans (projects from sector and service plans) with spatial implications, and takes into account proposals for the development of the municipality and (b) aligns the resources and capacity of the municipality with the implementation of the plan.

The purpose of the SDF is not to infringe upon existing land rights but to guide future land uses. No proposals in this plan create any land use right or exempt anyone from his or her obligation in terms of any other act controlling land uses. The maps should be used as a schematic representation of the desired spatial form to be achieved by the municipality in the long term. The boundaries created through this process should therefore be left for interpretation and not be scaled.

5.1.2 Public Participation

The SDF review followed a process of consultations with the Ward Committees and Ward Councilors to identify the key spatial issues and related strategies that should be incorporated into the SDF. Consultations were also held with the provincial planning department, district and local municipalities within the district to identify the regional issues that should be considered in the review. Within the municipality there were consultations with the sector departments and IDP programmes to integrate the SDF with the IDP objectives.

Public participation process was officially conducted in November 2012 and February 2013 in line with the IDP public participation sessions. Further public comments were invited in accordance with the date of advertisements in accordance with the IDP process plan.

5.2 The Current Development Situation and Trends

5.2.1 Spatial Characteristics

The Mangaung area comprises 3 urban centres and a surrounding rural area that accommodates both commercial and communal mixed farming. The central locality of the municipal area in relation to the rest of the country ensures that a number of major arterial and access routes transverse the area, of which the N1, N6 and N8 routes are the three national roads that link the municipal area with the rest of the country. A number of provincial, secondary and tertiary roads have also been established to complement the national road network.

The area is also serviced with an east/west and north/south railway line and a national and municipal airport just outside Bloemfontein. An airport was also developed outside Thaba Nchu, but is currently no longer in operation.

5.2.2 Bloemfontein

Bloemfontein is the economic hub of the municipal area and will remain the locus for future development. The city is centrally located in South Africa and is served by major roads such as the N1 which links Gauteng with the southern and western Cape, the N6 which links Bloemfontein to the Eastern Cape and the N8 which links Lesotho in the east with the northern Cape in the west via Bloemfontein. The city has developed around the central business district (CBD) in a sectoral form, with the majority of the poor and previous disadvantaged communities living in the south-eastern section. The north/south railway line creates a definite barrier between communities and has distanced the poor from the economic opportunities that are mainly concentrated to the west of the railway line. Except for the industrial areas which flank these settlements, the previous disadvantaged areas offer very few job opportunities to these individuals and people need to travel up to 15 kilometres to get to the centre of the town.

There has been a major relocation of services from the Bloemfontein CBD to suburbs, particularly to the west, which has led to under-utilised office space in the central business district. Manufacturing is declining in the city,

which is a matter of concern. The areas surrounding the CBD have also developed as transgression areas, with a mixed land use character.

5.2.3 Botshabelo

Botshabelo are located 55 km east from Bloemfontein. The urban node was spatially designed along a major access route that runs in a north/south direction through the centre of the area, giving rise to a linear urban form. This creates a problem to the most southern communities as they need to travel as far as 8 kilometres to access the economic opportunities which have developed more to the northern parts of the town. The area is characterised by an oversupply of school sites and public open spaces. The allocated business sites are not developed, which inhibits the sustainable neighbourhood development and contributes to the movement of people over long distances to the central business area in the north of the area.

The FDC Industrial Park is the most important node for economic development and consist of 138 warehouses with a total floor area of 200 000m² with a rand value of R500 million. Factories manufacture textile, food processing, electrical enclosures, paraffin stoves and minor engineering services. To the east of Botshabelo are located the Supreme Chicken farms with a chicken abbatoir located in the FDC Industrial Park. The current occupancy rate at the node stand at 89, 54 % and employ 6000 people.

The unemployment rate is very high as a result of the huge urban dependency on Bloemfontein. Approximately 13 000 commuters that commute on a daily basis between Botshabelo and Bloemfontein. Approximately R200 million is annually spent on transport subsidies for bus transport in the MMM area of which the larger part is for bus transport between Botshabelo, Thaba Nchu and Bloemfontein.

Large open spaces (mostly flood plains) separate the different residential areas and ample sites have been planned for public amenities throughout the area. A sports stadium has also been developed next to the Klein Modder River, which runs through the town. Many residents keep cattle within the urban environment and the open spaces and communal land are grazed extensively. Signs of overgrazing are visible. Towards the south is located a Game Reserve and the Rustfontein Dam with some tourism potential that needs to be explored. In the same area is found a smaller dam with potential for small scale agricultural activities.

5.2.4 Thaba Nchu

Thaba Nchu are located 67 km east from Bloemfontein and has a more scattered development pattern with 37 villages surrounding the urban centre, some as far as 35 kilometres from the closest urban centre. 4 of these villages have recently been formalised. The area is characterised by vast stretches of communal grazing areas that surround the urban centre. Many residents still keep cattle within the urban area and this creates a problem to residents. The majority of new urban developments have developed towards the west along Station Road, while the central business district has developed to the east of these extensions. Again, this leads to some urban communities centred around the urban core to be as far as 8 kilometres from these economic opportunities. The area has also two industrial areas, one that developed to the west near the railway station and one that developed to the east of the CBD. The western industrial area was developed along the railway line and has therefore sideline facilities and is the more viable of the two. There are 38 FDC factories with an occupancy rate of 65%.

Thaba Nchu has always been a major service centre to the Eastern Free State with many government departments establishing regional offices in this area. However, recently many of these offices and amenities have closed down, thus leaving the town crippled in terms of economic investment. The town has also a very rich cultural history and more emphasis should be put on cultural tourism. The town currently accommodates one of two casinos in the municipal area. Mmabana Cultural Centre is also a cultural resource in this area.

Thaba Nchu stadium is situated opposite Naledi Sun and is a major events stadium in the area. Selosesha grounds and scattered sports fields supplement this, but all of these facilities need upgrading. Public facilities like the sanatorium, the military base, the college and the reformatory school have all closed down in Thaba Nchu. This leads to fewer visits from outsiders and a decrease in spending in town. This has contributed to the outflow of factories and businesses.

5.2.5 Rural areas

The rural area is characterised by extensive commercial farming in the west, mainly mixed crop production and cattle farming. There is intensive farming along the lower drainage area of the Modder river in the north-west and the west. The area surrounding Thaba Nchu and Botshabelo is Trust land, which is utilised by subsistence and small farmers. The area is also characterised by high unemployment rates. Most employed people are migrant workers in Bloemfontein and elsewhere, due to the limited employment opportunities in the area.

Glen Agricultural College to the north of Bloemfontein is an asset to the rural area, especially in offering support to the establishment and sustenance of emerging farmers.

Several dams are located in the rural area of which the Krugerdrift dam, Tierpoort dam, Mockes dam, Rustfontein dam and Moutlatsi Setlogolo dam are some of the more prominent water sources. Water for agricultural use is very limited in the MMM area, which is a major constraint for agricultural development in the area.

5.2.6 Development trends

There has been a lot of recent building activity in Bloemfontein, mainly new residential township establishments in the Grasslands, Woodland Hills and Vista Park areas, offices and retail developments primarily in the suburbs to the western side of town, mixed land use development in the Estoire area and extensive retail development at the Loch Logan Waterfront as well as the expansion of high density walled townhouse complexes to the west of the N1. However there has been very limited investment in Thaba Nchu, Botshabelo, former Mangaung township, and the CBD's. This has led to the deterioration of these areas and an under-utilisation of existing infrastructure in some areas. There are however improvement with new buildings being erected in the CBD eg newly completed public works building in President Brand Street, intermodal facility, department health building, and improvement to various buildings along Maitland and West-Burger Street. Nodal Development along the Mangaung Activity Corridor brought much improvement to the area with the development of the new municipal regional office, home affairs building and shopping center along Moshoeshoe Road in Rocklands. The new Twin City shopping center in the Heidedal Area encourages investment to the area.

Development has continued to concentrate along major traffic routes and this has given rise to typical ribbon developments along these roads. In some cases such as Curie Avenue, Church Street and Nelson Mandela Avenue, these developments have led to a decline in the traffic service levels of the relevant streets. The illegal occupation of land has continued, particularly in areas far away from job opportunities or along public transport routes, while backyard dwellings have decreased. This has given rise to a continuation of urban sprawl and low-density residential developments in favour of medium to high density developments in the disadvantaged areas, which has lead to longer travelling distances and the dislocation of poor people on the fringe of the urban areas.

Another problem that stemmed from this is the increase in congestion experienced on Dr Belcher Road as the link between Mangaung township and the CBD. Substantial upgrading of this transport corridor has recently been completed, which will bring much relief to the traffic capacity constraints along this important traffic arterial. Land use transgressions into residential areas adjacent to the CBD of Bloemfontein have been evident. There has been a big increase in the number of illegal small business operators or home-industries that conduct business from home

without permission. This has given rise to traffic and safety problems as these areas were not designed for this purpose. A number of guesthouses have established in recent years throughout the municipal area. There has also been an upsurge in the amount of student accommodation, particularly in areas surrounding the two universities, which has socio-economic consequences and a considerable impact on municipal and other services in the particular areas. Due to poor land use control measures, management of land use become impossible. The high prevalence of illegal land uses also contribute to serious loss in revenue.

Various businesses have been established along Milner Road and around Preller Square, Genl Dan Pienaar Ave in Dan Pienaar. There is also a trend towards the development of warehousing in Ribblesdale on the M30 Road between Andries Pretorius and N1. There are mainly construction and transport companies located in the area.

Towards the South Eastern areas appear a high prevalence of informal brick manufacturing plants just east of the De Wets Dorp Road. Developments still favour private motor vehicles as the mode of transport and there is a lack of non-motorised transport routes, proper pedestrian walkways and public transport amenities at bigger developments. Inadequate on-site delivery facilities are provided with most of the new developments while insufficient taxi amenities leads to littering and pedestrian-vehicle conflict. There is increasing pressure for small agricultural subdivisions of farmland and small -holdings, particularly around the urban centres within the municipal area and in the Bainsvlei area to the west of Bloemfontein. Informal settlements are still found in the south eastern quadrant of Bloemfontein and in the Botshabelo. The total number of informal settlements in the Mangaung area is 23 informal settlements with 6215 informal dwellings (shack in back yard) and 27 143 informal dwellings (shack not in back yard) (Source: Mangaung Metropolitan Municipality).

5.2.7 Provincial Urbanisation Trends

In respect of the settlements types, urban areas were growing at 2.2% between 1991 and 2001 in the province. This urban growth rate has placed immense pressure on the ability of municipalities to provide basic services.

Larger urban areas have been growing at about 0.65% despite a decline in real numbers in the Goldfields and Botshabelo. However, it should be noted that Bloemfontein and Sasolburg have experienced immense growth since 1991. In Bloemfontein, the annual growth rate was more then 3% per annum between 1991 and 2001. Despite the loss of more than 40 000 to 50 000 people in Welkom and Botshabelo, nearly 70 000 people were added in terms of real numbers between 1991 and 2001.

According to the Free State Provincial Growth and Development Strategy (2007) rural areas in the province experienced a population decline of 3.4 % per annum between 1991 and 1996 and larger decrease of 3.7% between 1996 and 2001. It would appear that a second wave of urbanisation is developing which entails the migration of people from small towns to bigger urban centers (Marais 2003 from FSGDS, 2007).

5.3 Mangaung Approach to the Development Facilitation Act

5.3.1 Commitment to social justice

The DFA Chapter One principles are interpreted by MMM as a set of interrelated intentions to guide land planning and development and entrench a more equitable and developmental planning system for the municipality. MMM has adopted a strong commitment to social justice and through this commitment they specifically intend to improve the living conditions of the poorest and historically most disadvantaged members of MMM.

Flowing from this commitment and overarching interpretation of the principles, the role of spatial planning in relation to land development is ultimately to serve the people who live within MMM and future generations. To this end spatial land development planning in MMM is concerned with:

- Promoting equity;
- Promoting efficiency;
- Protecting the public good;
- Ensuring the effective use of scarce resources, and;
- Protecting the environment.

MMM has adopted two normative planning approaches to give effect to the principles. These are:

- a people-centred approach with its main purpose being to pay particular attention to achieving social justice, through assisting the poorest members of society to meet their basic needs and requirements, and;
- an awareness and respect for the environment which recognise its constraints and the opportunities it provides, in a sustainable way

5.3.2 The planning system

The MMM believes that the intentions of the principles are to create a better planning system which is proactive and developmental, using laws and controls where appropriate, and one which positively accommodates the needs of all its people, where rural and urban areas are integrated, reinforcing an efficient system in which all people have access to the opportunities which arise.

5.3.3 Spatial integration in development planning

The approach to spatial integration in development planning should occur across the different levels of planning (Figure a) and across spheres of government (Figure b).

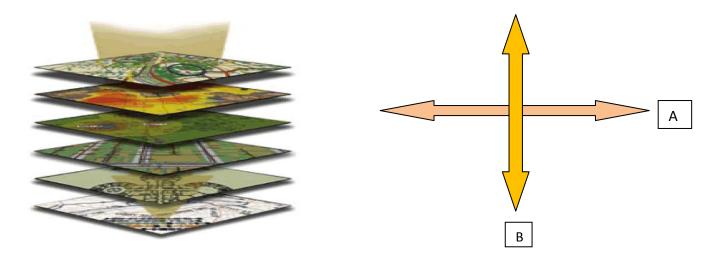

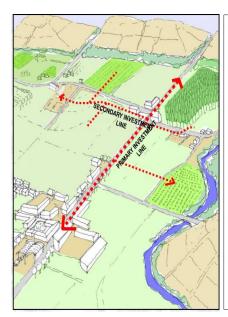

Figure Levels of planning

Figure b: Horizontal and Vertical Planning

The horizontal and vertical alignment of plans is absolutely critical in coordination of plans. Horizontal alignment (A) refer to the coordination of plans and budgets between sector departments and vertical coordination (B) between the three spheres of government.

It should also occur between public and private sector investment through co-ordinated programmes and commitment to the spatial patterns of future public spending. This should in effect be articulated in a capital investment framework. To this end the SDF should predetermine only a minimum number of significant structural actions necessary to give clear direction to the development of land in the future in MMM indicating:

- where development should not occur for sustainability, environmental and access reasons;
- the proposed pattern of public spatial investment;
- areas where particular types of investment will be encouraged, eg light industry;
- areas of high impact uses and special service requirements, and;
- zones and locations where high intensity activity will be allowed.

Extending the concept of an investment framework is based on the establishing points within the system where investments should be made.

The concept proposes that where particular investment lines meet or in places with an established presence, these would become the ideal locations to serve as investment centres.

Based on the position of particular settlements and the different levels of investment lines, certain points within the system would serve as higher order investment centres whilst others serve a more local function.

Whilst initially serving as investment centers primarily for the public sector investment, renewed investment is likely

An important function of this approach is to facilitate ongoing partnership between MMM and private developers by clearly indicating a spatial development framework within which the partnership needs to occur.

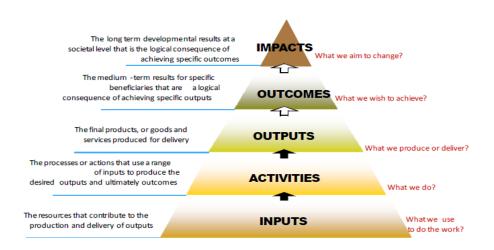

The approach to spatial integration is one of reinforcement, where all parts and elements of a settlement should reinforce and complement each other. This approach is to be applied to a number of forms of integration and in the following situations:

- Between urban and rural areas where the urban system provides markets, social, cultural and economic services for rural inhabitants.
- Urban Rural Linkages should be clearly defined to enhance the above-mentioned objective
- Between spatial structuring elements such as public transport and social facilities,
- Between land uses ranging from mixed land use to a reasonable proximity of different uses,

- Between existing and new development where the new development is benefiting from the proximity to historic investment in social, economic and infrastructure services, and
- The integration of different socio-economic groups where all people are treated as part of the same settlement, benefiting from their respective and complimentary resources and abilities.

The concept of integration does not call for artificially enforced mixing of any of the above, but rather to create the spatial opportunities within which all potential land uses can be located to suit their own requirements. These different forms of integration require planning to be driven by concerns about the whole of Mangaung, rather than by concerns for the performance of the individual areas of parts of the Municipality, while recognising that constructive compromise will be necessary to achieve this.

Strong emphasis should be placed in the planning of projects on what we aim to change and the societal impact of MMM interventions. This would essentially compel planning to take an outcomes based approach.

The performance management system should therefore be attentive to definition and operationalization of projects with a focus on improving efficiency and effectiveness in service delivery.

5.3.4 The spatial structuring of settlements

MMM's central concern underpinning the Chapter One principles is the need to create a new spatial form and structure for the settlements in its area of jurisdiction to improve their performance. The principles, as interpreted

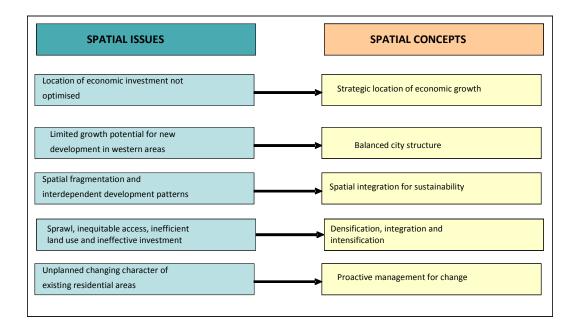

by MMM, reject the low density, sprawling, fragmented and largely mono-functional settlement forms that resulted under apartheid and which imposed considerable hardship on people. MMM believes the principles call for the emergence of settlement patterns which create benefits accessible to the people of Mangaung. For this approach to be realised all settlements in Mangaung should strive to achieve the following qualities:

- To generate a wide range of economic opportunities;
- To be convenient to inhabitants to conduct their daily activities, easily and as inexpensively as possible,;
- To offer a choice of living conditions to all,;
- To be equitable in the sense that all inhabitants have reasonable access to the opportunities and facilities which support living in settlements,;
- To promote the efficient use of resources,; and
- To give dignity to people through the quality of the public spatial environment.

5.4 Spatial Issues from the Current Reality and Concepts

In this section, the key spatial issues of the SDF are presented which are derived from an assessment of the current reality according to the process described in section1. Each spatial issue is then followed by a presentation of the spatial concepts which have been defined to respond to them. The following figure illustrates this approach and provides a route-map through this section of the report. The issues and the concepts have been presented in a linear relationship to each other. Although the issues were identified separately from one another, there is relationship between them. In addition, many issues relate to more than one concept, so the issue/concept relationship should not be seen in too linear terms. The concepts should not be read in isolation from one another either.

Figure 5.4.1: Summary of spatial issues and concepts

5.4.1 Location of economic investment not optimised

Bloemfontein is currently located on the N1 route between Gauteng and the Western Cape (which passes along the western edge of Bloemfontein) and the N8 route running in an east-west direction, while the vast majority of people reside and work in the centre or to the east of the city. While the Bloemfontein airport is also located to the east of the city, there is a planned outer ring road around the city but is not complete in the eastern area, to the north and south of the N8. There is also well located and underutilised land to the north and south of the N8 between the eastern edge of the CBD and the incomplete ring road to the east beyond the airport.

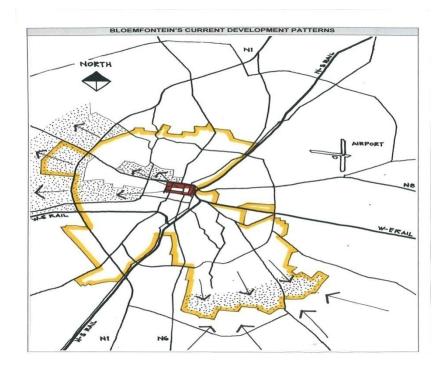

Bloemfontein as the economic hub of Mangaung needs to provide for locational opportunities for further long term economic growth that are more accessible to the growing populations residing in the south-east of Bloemfontein and Botshabelo and Thaba Nchu further to the east.

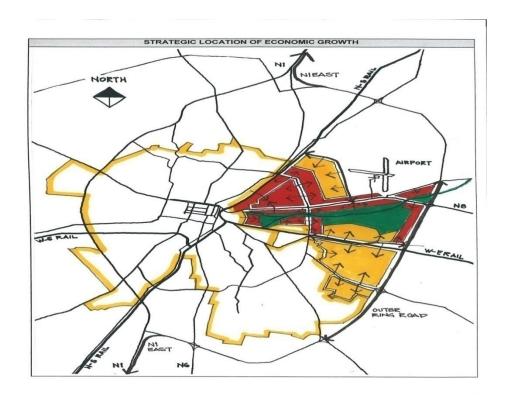

Box 5.4.1 Strategic location of economic growth

The concept of a desirable location for economic growth should provide sufficient impetus to generate a longerterm growth pattern that is more accessible, creates potential for significant investment over time and takes advantage of the potentials to be derived from the efficiencies of a radial and concentric city structure.

The location of the well located and underutilised land along the N8 national road between the eastern edge of the CBD and the incomplete outer ring road some nine kilometres further east, holds the potential to provide for the strategic location of economic growth. It has strategic locational value as it complements the concept of efficient city structuring, and will enhance major infrastructure investment in the airport node and outer ring road once complete.

The outer ring road could be linked by an intersection with off-ramps and on-ramps to the N1 creating an alternative route to the east of the city (N1 East). This will improve the transportation system generally around the city, assist the constraints and bias of development experienced in the western area in providing alternative locations to the east and for a significant amount of densification, intensification and infill in a suitable location. It also begins to move investment at scale in the direction of spatially integrating an underutilized and sizable wedge of the city into Bloemfontein, and the city with the remote areas of Botshabelo, Thaba Nchu and the rural settlements.

5.4.2 Limited growth potential for new development in the western areas of Bloemfontein

The western areas of Bloemfontein have experienced rapid growth during recent years with major office and retail development in the Brandwag area, and more recently, extensive, mostly residential development in the Langenhovenpark area. Numerous new developments are still being planned in Langenhovenpark and its surrounds.

The shift to developing to the west and away from the traditional CBD has contributed significantly to the decline in the CBD and created changes to travel distances. Travel distances and times from the eastern areas of Mangaung have increased, as has travel time to and through the western area as it is clearly not designed with sufficient and appropriate infrastructure to be an intensive business district nor is it located at the centre of the Bloemfontein radial street system, as only a few roads serve the area.

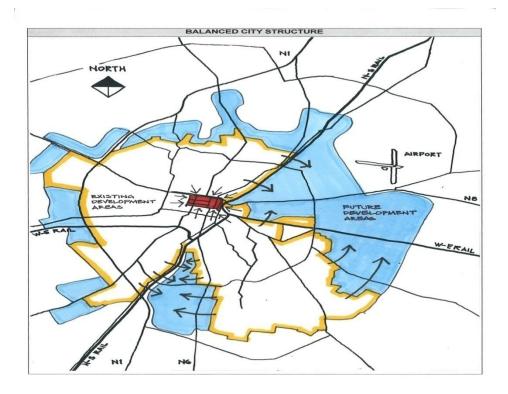

Allowing new development without ensuring acceptable levels of service will have a detrimental effect on the functioning of the city and will in the long run have considerable negative economic implications for the city as a whole. Therefore development in the Spitskop area has to be managed in the confines of the Spitskop Development Plan.

For development in the Cecelia area development of the road linkage to N8 Petrusburg road will have to be encouraged.

Box 5.4.2 Balanced City Structure

The spatial concept that is applicable to respond to this issue is to create a more balanced city form which uses existing social and infrastructure services in the inner city, northern and south-western area and exploits spatial opportunities and resources in other parts of the city to the north-east and east. These opportunities would provide a choice of residential and economic developments that intensifies use, densifies and infills development in underutilised areas.

5.4.3 Spatial fragmentation and interdependent development patterns

Mangaung has predominantly four spatially fragmented but necessarily interdependent development patterns that are currently under severe stress. The issue of spatial fragmentation of Mangaung and the tenuous but essential interdependence of these patterns on one another is being driven from different but interrelated parts of the municipality. They are:

- (i) the CBD, the core asset of the municipality is in decline;
- (ii) the rapid growth in opposite spatial directions of the south-eastern and north-western areas, which is pulling Bloemfontein apart;
- (iii) Botshabelo and Thaba Nchu being remote urban dependants of Bloemfontein; and
- (iv) Imbalanced linkages between the urban areas of Bloemfontein, Botshabelo and Thaba Nchu and remote rural dependants and neighbours in other municipalities.

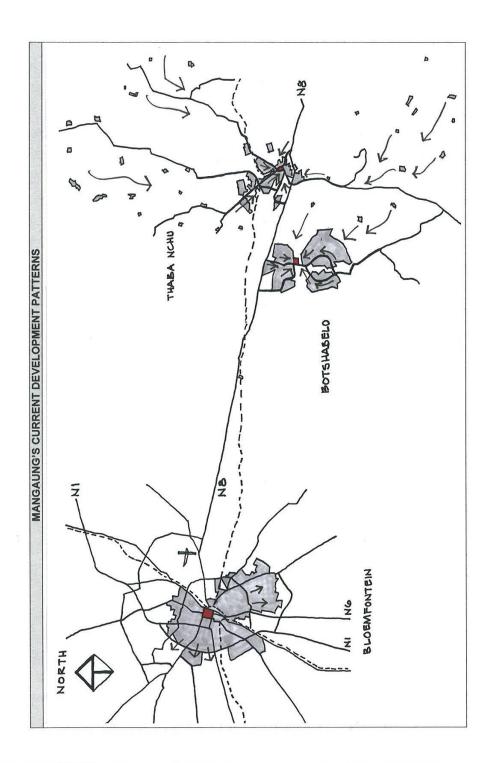

Box 5.4.3 Spatial integration for the sustainability of Mangaung

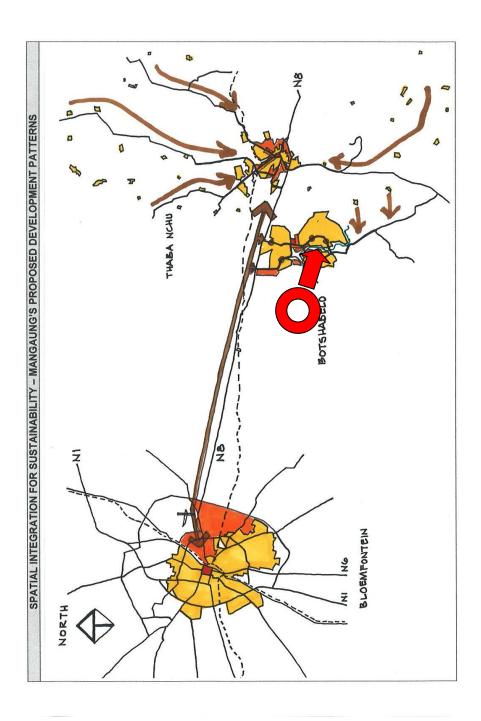

To tackle the spatial fragmentation and reduce the stresses on the necessary interdependence of the different development patterns it is important to address the spatial relationships between:

- the unemployed and job opportunities;
- the existing infrastructure and future housing;
- workers accommodation and employment; and
- institutional, commercial and recreational services and the vast majority of the population.

Improving the spatial integration and by reducing the separateness of these development patterns of the CBD, south-eastern, north-western areas, Botshabelo, Thaba Nchu and the rural areas will directly contribute to the long-term sustainability of Mangaung.

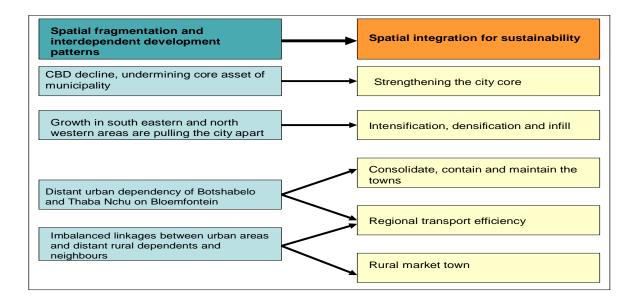

Achieving this integration will reduce the competing pressures between each development pattern while reinforcing the soundness of the basic city structure, its inherent strengths and its development pattern, while optimising a more focused use of limited public and private sector resources.

In the following sub-sections these issues and concepts are unpacked in more detail, as summarised in the following figure.

Figure 5.4.3 Summary of integration issues and concepts

5.4.3.1 CBD decline, undermining the core asset of the municipality

The original city structure is centred around a strong business district with numerous radial arterials converging on the CBD area. This structure has historically accommodated a variety of different sectors to integrate the many opportunities and services that benefit a select group of communities of the previously demarcated municipality. These benefits are currently still not available as effectively anywhere else in the region, except partially for the inhabitants residing and working to the west of the CBD.

If the CBD is not prioritised for regeneration the implications, as is evident in the rapid development in the western and south-eastern areas, significant residential and business development outside of the CBD can be expected to occur at the expense of other areas and in particular the CBD. This will also result in an even less balanced city structure with further significant traffic congestion while travel distances and time from some areas will increase, especially to and from the south-eastern areas in Bloemfontein and Botshabelo and Thaba Nchu further east.

If the current development trends being experienced in the western area are not rectified, the impact will not only have an ongoing effect on the CBD but will have a major impact on the benefits and functioning of the city generally and the ability of the CBD to integrate the different communities of the municipality as a whole.

Box 5.4.3.1 CBD regeneration – Strengthening the city core

This spatial arrangement of a city core requires strengthening to support city integration and ensure relatively short travelling distances between all the residential areas of the municipality and the main business area. The strengthening of the CBD would also support the future viability of public and non-motorised transport as well as city centre parking. This basic city structure could be further improved if transport linkages are improved, the bias of development to the western areas is corrected, and the physical and town planning barriers created for the separation of racial groups between the south-eastern areas and the CBD are overcome. The primacy of the CBD should be strengthened through regeneration in order to shape the city to enhance integration to the advantage of all residents of the municipality and the region.

5.4.3.2 Growth in the south-eastern and north-western areas are pulling the city apart

The south-eastern area of Bloemfontein is the traditional township of Mangaung and is wedged between rail and road infrastructure and land zoned for industry and small-scale farming on the area's northern and western boundaries. The spatial growth pattern in the south-eastern areas (predominantly residential) in the recent past has been of sectoral (linear) bands of development progressively moving further away from the economic and social benefits of the city centre, which the disadvantaged communities residing in the south-east areas are dependant on. This is resulting in low-income growth pulling away from the city core further outwards in an easterly and a south-easterly direction and consequently undermining the integration potential of the CBD.

Similarly, the north-western area of Bloemfontein is also stretching the resources available for development further outwards but in the opposite direction to the south-east. This too is resulting in social and economic integration around the city core being undermined. The city consequently is being further socio-economically

divided through the spatial pattern of development currently occurring. The upper-income and predominantly White population is growing in a north-westerly direction with new retail, commercial and residential facilities being developed in this area and continuing to move further westwards while low-income and predominantly Black population is growing in a south-easterly direction through the consolidation of informal settlements and further informal settlements occurring on an ongoing basis.

This pattern of development is leading to further sprawl of the city and creating a backlog in the provision of land, services, social and commercial facilities to these rapidly developing areas while the CBD, which has many of the services and facilities needed, is underutilised. This is inefficient and is destroying the economic and cultural heritage of Bloemfontein's CBD

Box 5.4.3.2 Intensification, densification and infill – making the development patterns more compatible for the good of the whole

To decrease this pulling effect, development in these areas growing in opposite directions should be minimised and managed more proactively. Alternative locations should also be developed through infill development in the existing developed areas. This would include areas such as Hamilton, Heidedal, Ooseinde, Bloemspruit, Grassland, Sonskyn, Estoire, Transwerk industrial land, and to the north of Bloemfontein, where spare social and infrastructure capacity exists, and undeveloped and underutilised areas can be developed, and new social and infrastructure capacity can more easily and efficiently be created with higher densities and intensification of use.

This spatial concept will reinforce the inherent benefits of the basic city structure and extend them to better located areas within the city fabric, while at the same time and with the similar resources also reduce the prominence and spatial extremes of development in these competing areas.

5.4.3.3 Distant urban dependency of Botshabelo and Thaba Nchu on Bloemfontein

Botshabelo and Thaba Nchu is structurally dependant on the economy of Bloemfontein with their own economies providing very limited opportunities. This occurs in the context of the large distance of over 50km between them

and Bloemfontein, with a limited and subsidised public transport link to gain access to economic opportunities, social and institutional services and facilities.

The shift of higher income development to the western areas and decline of the CBD of Bloemfontein have exacerbated the already fragmented spatial patterns and dependence on Bloemfontein further, while some of the opportunities, services and facilities that were recently available in Botshabelo and Thaba Nchu have closed down. The local economies of Botshabelo and Thaba Nchu are struggling to attract significant future investment to their business or agricultural areas to make them more supportive of their own economies.

Box 5.4.3.3 Regional transport efficiency, safety and affordability coupled to consolidation, containment and maintenance of existing town developments

The spatial concept is to make the opportunities that are located in Bloemfontein more efficient, safe, affordable and accessible to the people residing in Botshabelo and Thaba Nchu who are structurally dependent on them.

The opportunities and limitations of integration across this spatial divide need to be complemented by public investment (ie rail and an Integrated Public Transport System) in these areas (and other existing viable minor development nodes).

The concept for future investment in Botshabelo is to develop a new urban node to the north of the N8 in Botshabelo and integrate the node with Thaba Nchu to the east. To stimulate investment in the area would be essential to establish a Spatial Economic Zone (hereafter SEZ) which would provide for incentive packages for potential investors. The new node would place a strong emphasis on industrial development to enhance job creation. Further aspects for the redevelopment of Botshabelo will focus on;

5.4.3.4 Imbalanced linkages between the urban areas and distant rural dependants and neighbours

The rural settlements that exist to the north and south of Thaba Nchu and many of those in municipalities bordering Mangaung are also significantly dependant on Bloemfontein and to a lesser and decreasing extent on the urban areas and facilities of Thaba Nchu and Botshabelo. There are also fragile links that exist between some of the rural settlements that provide minimal social, infrastructure and economic support services to the inhabitants of these areas.

Box 5.4.3.4 Regional transport efficiencies, safety and affordability coupled to a rural market town

The conceptual approach is to spatially integrate Thaba Nchu and Bosthabelo. The concept for future investment in **Thaba Nchu** is one that requires major investment and interventions.

This includes:

- Develop a CBD urban renewal plan to strengthen the node with linkages along Station road which will culminate in an activity corridor.
- Develop an urban renewal strategy for the areas Flenter, Mokwena adjacent to the CBD.
- reinforcing the business district through better management of the traffic flow, informal traders, land and under-utilised building stock owned by absent landlords and decongesting the bus and taxi rank;
- reinforce the existing rural service centre function supportive of rural development initiatives which maximises livestock farming and beneficiation of related products;
- creating rural eco-tourism incorporating the environmental and historic opportunities that exist; and
- establish 3 agri villages in Sediba , Feloana and Woodbridge
- Providing high density housing with better access to the business district along the main road between the station and the business district.

5.4.4 Sprawl, inequitable access, inefficient land use and ineffective investment

The current spatial development patterns of Mangaung and particularly of Bloemfontein are characterised by the following issues:

- low density in most of the old and new residential areas catering to the lower, middle and upper income groups contributing to the sprawl of the city;
- inequitable access to the opportunities and benefits of the urban areas due to the historic spatial structure and more recent locations of residential and economic development;
- inefficient land use in the overall spatial distribution of residential development areas, economic opportunity and social services and facilities; and

• low intensity of investment outside of the CBD of Bloemfontein complimented by low density development.

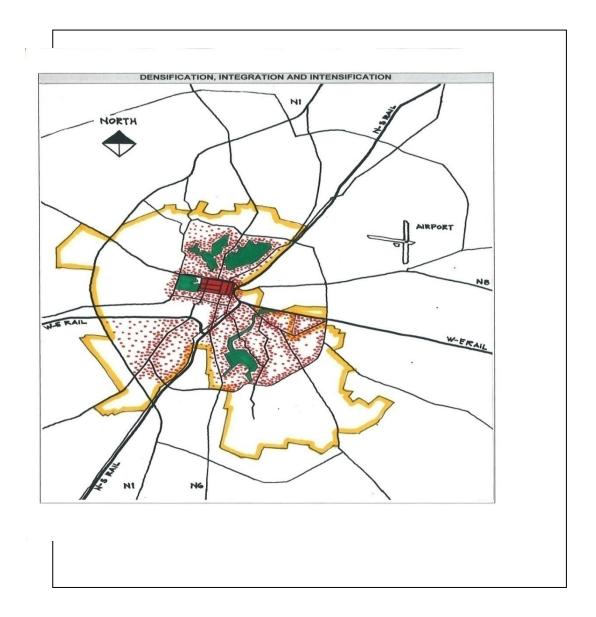

Box 5.4.4 Integration of socio-economic groups through densification of use and intensification of activities

Given the different socio-economic groups making up the population seeking to reside in the urban areas of Bloemfontein and the need for ease of access to employment opportunities across the city, it is desirable for the urban area of Bloemfontein to be more compact in its spatial form which will offer maximum opportunities of choice, greatest ease of use, and maximum and optimal effectiveness. The intention is not only for residential densification but also for people to be part of, and have ready access to, a wider urban system in which the broader range of day-to-day needs can be met. This will also contribute to redressing spatial and structural inequalities currently experienced in Mangaung.

The nodes and activity spines are the places where access to a wide range of urban opportunities should be greatest. Mixed use, intensified development and strong spatial clustering should occur along the radial routes and those ring/connector routes between the radial routes and at nodal points.

The existing pattern of development must become more continuous through infill development on well located but underutilised pieces of land to shape a coherent city form through appropriate density, and zoning practices and policies. However it must be recognised that it is highly unlikely that there will ever be continuous ribbon or corridor development from Bloemfontein to Botshabelo. Rather there should be more concentrated development at nodes well-connected by public transport, so that linking occurs through effective transport rather than continuous sprawling development

These concepts jointly will begin to address the issues of city sprawl, inequitable access, inefficient land use and ineffective investment.

5.4.5 Unplanned changing character of existing residential areas

The impact of unregulated and ad hoc change in land use on the character of a number of residential areas in Mangaung is increasing. Some of the areas that are typical of this change are the residential areas adjacent to the Bloemfontein CBD, the smallholdings in the northern and western areas of Bloemfontein, the areas surrounding the universities, zones within and on the edge of the south-eastern areas and the large open spaces within Botshabelo. Associated with this situation is the conflict arising between uses and the inability and degradation of services to support such change without adequate provision being mad

Box 5.4.5.1 Proactive management to regulate and facilitate change

The concept to respond to the situation is a more proactive management approach aiming to:

- regularise, encourage and maximise the benefits of the investments and the land use changes where suitable
 in relation to other uses and interests;
- provide the support services and infrastructure needed; and
- provide an effective and accessible procedure to minimise the conflicts in use and interests that arise.
- Develop a contribution policy for rezoning, second dwellings and subdivisions and create an infrastructure development fund.
- Revise penalties in regard to land use violations

In summary the structural challenges of restructuring the spatial legacy of apartheid finds expression in two different but prominent spatial development patterns in Mangaung. They are the relatively close proximity of the south-east area of Bloemfontein to the CBD, and the remote towns of Botshabelo and Thaba Nchu.

The south-eastern area, although close to the CBD, has its access to the CBD constrained by numerous impediments including railway lines, high order road infrastructure, sewage treatment plants, industrial development, broad underdeveloped buffer strips and significant topographic changes in level. There are some radial routes from the developed area of the south-east to the CBD and recent access routes have been provided through the industrial and undeveloped areas to the rest of Bloemfontein. Although this provides some access to the city, the south-east remains a spatially separate area not able to benefit efficiently and effectively from the city's opportunities.

The towns of Botshabelo and Thaba Nchu on the other hand are some 50+ kilometres to the east of Bloemfontein and are only connected by the N8, a national road, and a limited public transport system. The majority of land between Bloemfontein and these towns is zoned for agricultural use. The working age population is dependant on the employment opportunities in Bloemfontein, which has a far larger economic base and is the closest place for employment in the region. Bloemfontein also offers the largest variety of economic and social services and facilities closest to these towns.

Industrial job creation initiatives, in the towns and between the towns and Bloemfontein, have had limited success in providing employment historically and are in decline predominantly due to lack of ability to attract and sustain private industrial and residential investment in these areas.

The movement between the towns and Bloemfontein displays a weekly and daily migration pattern from the central bus and taxi facilities in each of the towns to the central rank on the east of the Bloemfontein CBD and where in many cases from there to the other parts of the city.

Box 5.4.5.2 Restructuring the spatial legacy

The challenge to address these spatial conditions requires sustainable and effective public investment which should also attract private sector investment. The concept for restructuring the spatial legacy aims to contain and limit the spatial effects of the past; limit the number of people that are affected and begin to redress the situation through:

- strategic location of economic growth towards the east of the Bloemfontein CBD, providing greater opportunities in Bloemfontein for future settlement and economic development at scale;
- creating a balanced city structure in Bloemfontein;
- spatial integration for the sustainability of Mangaung that strengthens the interdependent development patterns;
- CBD regeneration to strengthen the city core, the vital asset of MMM;
- intensification, densification and infill to make the development pattern more compatible for the good of the whole;
- integrate Botshabelo and Thaba Nchu as an independant self sustainable economic node
- regional transport efficiencies, safety and affordability, and develop strategies focussed on the economic
 enhancement of Botshabelo and Thaba Nchu (coupled to consolidation, containment and maintenance of
 Botshabelo, considering the economic potential of a labour-based manufacturing hub.
- pro-active public management to regulate and facilitate the current change occurring, and the intended spatial restructuring process.

5.5 Applying the spatial concepts to the IDP objectives

As indicated previously, the spatial concepts presented in the preceding sections respond to the spatial issues raised during the planning process and the intentions of the IDP objectives and associated programmes. Table 5.5.1 below demonstrates how some of the IDP objectives will be supported by the spatial concepts. Only the most directly strategic SDF concept/IDP relationships are indicated. However, indirect support relationships will materialise in most if not all of the others relationships, as well as for the objectives of Mangaung Safe and Secure, Education and AIDS Action and Community Resilience and Self-reliance, which do not form part of the table.

In overview, the SDF concept's main contributions to meeting the objectives of the IDP can be summarised as follows:

- The creation of improved spatial efficiencies and development patterns;
- Improving use of existing investments and resources of the CBD;
- Providing more efficient access to resources for support;
- Maximising existing resources & creating easier access to the supply of new resources;
- Creating greater efficiencies to access locations;
- Intensifying locations that are more accessible;
- Focusing economic investment to maximise the potential of the current situation;
- Improving the existing environmental opportunities through consolidation & maintenance to maximising their benefits; and
- Providing a spatial picture of the proposed approach to development and investment.

Table 18. outlines each of these contributions by unpacking the relationship between each SDF concept and the 6 most related IDP objectives.

| | | | investments and shelter strategies | | | |

The tables below further demonstrate in more detail how the SDF concepts contribute to and integrate with 6 IDP objectives with major spatial relationships:

- Promoting economic development;
- Sustainable shelter;
- CBD regeneration;
- Services for all;
- Clean environment;
- Rural development.

Table 5.5.2 Linkage between Economic Development Programme and SDF Concepts

| SDF concepts | Promoting economic development |
|--------------------|--|
| Strategic location | By maximising locational advantages to support economic growth in the area along the |
| of economic | N8 identified for future investment by national and international investors as it is close |
| growth | to the airport, proposed provincial ring road, and is easily accessed from northern and |
| | south-eastern residential areas. The area should be clearly illustrated in the marketing |
| | materials. The area could also accommodate a venue for trade exhibitions and fairs, and |
| | a transport logistics hub |
| | |

| SDF concepts | Promoting economic development |
|--------------------|---|
| Strengthening the | By creating more intense use of existing & new resources and investments. This would |
| | 1 |
| city core | include a science park, SMME Service Centre, and hawking facilities. Also establishing |
| | support initiatives that; sustain MMM as a regional sports events venue and builds on |
| | the advantage of Bloemfontein being the judicial capital city of the country |
| Intensification | By creating more intense use of existing & new resources and investments, including the |
| densification and | growth of the SMME sector and jobs created |
| infill | |
| | |
| Regional transport | By improving regional access, transport and mobility efficiencies through a planning and |
| efficiency | implementation framework for the N8 development corridor and activity nodes along |
| | the route. |
| | |
| Consolidate, | By focusing economic investment to sustain and improve the current situation in |
| contain & maintain | Botshabelo and Thaba Nchu. A feasibility study for an intensive industrial zone or UDZ in |
| the towns | Botshabelo will inform the investment approach and provide for a SMME Service Centre |
| | and provision of hawking facilities in the central business areas of Botshabelo and Thaba |
| | Nchu |
| Rural market town | By spatially focusing economic investment to maximise the potential of the rural services |
| Rufal market town | |
| | currently provided by Thaba Nchu |
| Balanced city | By creating improved spatial efficiencies and so supporting key sectors to develop |
| structure | effectively and the N8 development of the corridor between the east of the CBD and the |
| | outer ring road |
| | |

Table 5.5.3 Linkage between Sustainable Shelter Programme and SDF concepts

| SDF concepts | Sustainable Shelter |
|--------------------|--|
| Strategic location | By locating higher density residential environments in close proximity to employment |
| of mixed-use | through the development of a significant portion of the 11500 new houses and |

| SDF concepts | Sustainable Shelter |
|---|---|
| economic growth | serviced land for housing development in the underdeveloped areas that are in close proximity to the N8 corridor development |
| Strengthening the city core | By creating improved existing & new resources and opportunities for livelihoods support through the development of a portion of the 2500 high density housing units with a variety of tenure options |
| Intensification densification and infill | By creating improved existing & new resources and opportunities for livelihoods support through the development of 2500 high density housing units with various tenure options |
| Regional transport efficiency | By making livelihoods support services more accessible and effective for remote communities |
| To integrate Botshabelo and Thaba Nchu | To establish a new urban node to the north of Botshabelo and integrate Thaba Nchu and Botshabelo |
| Consolidate, contain & maintain the towns | By improving the existing investments and maximising their benefits through the development of a portion of the 11500 new houses and serviced land for housing as infill development in Botshabelo |
| Rural market town | By consolidating the benefits of small town efficiencies through the development of a portion of the 11500 new houses and serviced land for infill development in Thaba Nchu |
| Balanced city structure | By maximising existing resources & creating easier access to new resources through the development of a portion of the 11500 new houses and 2500 high density housing with a variety of tenure options in the underutilised land in the Hamilton area |
| Proactive management for change | By increasing access to day to day services and recognising people's own investments and shelter strategies in specific locations for infill development including the Hamilton area, the area in close proximity to the N8 corridor development and CBD on the east of Bloemfontein and other locations for densification in the developed parts of Bloemfontein |

Table 5.5.4 Linkage between CBD Regeneration Programme and SDF Concepts

| SDF concepts | Regenerating the CBD |
|-----------------------------------|--|
| Strengthening the city core | By contributing to the regeneration of the CBD to create a coherent and integrated city centre through: |
| city core | establishing a Business Improvement District (BID) within the Bloemfontein CBD; developing and implementing a plan that integrates the Bloemfontein CBD with the historical precinct in the Westdene /Willows/Park West area and the recreational precinct in the Kings Park/Loch Logan area; modelling of traffic flows resulting from potential pedestrianisation of roads; demarcation of pedestrian-only zones; the design and landscaping of Hoffman Square; landscaping & planting of grass, shrubs and trees; providing street furniture and lighting; landscaping & redesign of street surface in car-free zones and erecting hawker facilities; installing CCTV; preparing an audit and renovating historic buildings in state of disrepair in the CBD and providing an incentive to owners to leverage investment on the buildings; upgrading of public ablution facilities; conducting a feasibility study to enlarge the Bloemfontein CBD eastwards over the railway line to connect more directly to the N8 corridor development and provide easier access to the south-eastern area; developing and managing the CBD Master plan; implementing security patrols, more frequent cleaning operations, maintenance of streets & storm water drainage; a street trader management system and the design and erection of suitable structures to accommodate street traders. |
| Intensification densification and | By maximising more holistically the potential and resources of the city fabric to increase the residential density within the CBD of Bloemfontein, Botshabelo and |
| infill | Thaba Nchu, to ensure that informal traders are thriving and providing an attractive |

| SDF concepts | Regenerating the CBD |
|--------------------|--|
| | and useful service for residents and visitors in these areas through: |
| | designing the covering over the spruit to reclaim land above Bloemspruit; |
| | • implementing the KPA 1-3 upgrade Dr. Belcher/Fort Street/CBD in Mangaung |
| | Activity Corridor; |
| | facilitating discussions and establishing Memoranda of Agreements with landlords |
| | for upgrading or converting offices to residential accommodation; |
| | conducting a study to identify high density residential Zones in the CBDs (CBD) |
| | Master plan); |
| | secure funding for at least 2000 units in high density housing in the Bloemfontein |
| | CBD; and |
| | upgrading the Batho market. |
| Regional transport | By making the CBD a more accessible resource to remote areas through providing a |
| efficiency | more extensive, effective, efficient, convenient, reliable and integrated public |
| | transport system to service the municipal area, including all the CBDs. Also to |
| | improve the accessibility of the CBDs for all modes of transport by reducing traffic |
| | congestion problems.(, implementing the inter-modal transport facility on the east |
| | end of the Bloemfontein CBD). Reinstating the traffic counting system at main |
| | intersections. Develop an Integrated Transport Plan clearly indicating current road |
| | infrastructure capacity. |
| Consolidate, | By establishing a Business Improvement District (BID) within the CBD of Botshabelo, |
| contain & maintain | increasing the residential density within and immediately surrounding the area and |
| the towns | ensuring that informal traders are thriving and providing an attractive and useful |
| | service for residents and visitors in the area. To do this a feasibility study should be |
| | conducted in Botshabelo to establish possible decentralization of business to nodal |
| | centres and developing a plan to address traffic congestion in Botshabelo CBD. |
| Rural market town | By establishing Business Improvement Districts (BIDs) within the CBD of Thaba Nchu |
| | and increasing the residential density within and immediately around the CBD and |
| | ensuring that informal traders are thriving and providing an attractive and useful |
| | service for residents and visitors in the area. |
| Balanced city | By improving use of existing investments and resources of the CBD, and not wasting |
| | resources having to recreate what exists in the Bloemfontein CBD in order to create a |

| SDF concepts | Regenerating the CBD |
|----------------|--|
| | |
| structure | coherent and integrated city centre. |
| | |
| Proactive | By creating Business Improvement District with stakeholders working together |
| management for | effectively to address issues related to the future development of the CBDs. |
| change | |
| | |

Table 5.5.5 Linking Services for All programme and SDF Concepts

| SDF Concepts | Services for All | | | | |
|--------------------|--|--|--|--|--|
| Strategic location | By maximizing existing infrastructure and creating more efficient supply of new | | | | |
| of economic | services to ensure a safe, efficient and reliable traffic and transport infrastructure | | | | |
| growth | and engineering services network | | | | |
| Balanced city | By maximizing existing resources and creating more efficient supply of new resources | | | | |
| structure | through a needs analysis for water, sanitation and roads in formal, informal and rural | | | | |
| | settlements, and through exploring alternative ways of delivering municipal services | | | | |
| | sustainably and efficiently. | | | | |
| | | | | | |
| Strengthening the | By maximizing existing resources and creating more efficient supply of new resources | | | | |
| city core | through maintaining a clean road and storm water network and by reducing the | | | | |
| | occurrence of vandalism and ensuring a safe, efficient and reliable traffic and | | | | |
| | transport infrastructure network | | | | |
| Intensification, | By maximizing existing resources and creating more efficient supply of new resources | | | | |
| densification and | through providing for maintenance of infrastructure in accordance with World Bank | | | | |
| infill | recommendations and upgrading of waterborne services networks to an appropriate | | | | |
| | standard and ensuring a safe, efficient and reliable traffic and transport | | | | |
| | infrastructure network | | | | |
| | | | | | |
| Regional transport | By improving existing infrastructure and maximizing its benefits through upgrading of | | | | |
| efficiency | arterial and other roads to appropriate standards and ensuring a safe, efficient and | | | | |
| | reliable traffic and transport infrastructure network. | | | | |
| | | | | | |

| Consolidate, | By improving the existing investments and maximizing their benefits through | | | | | |
|--------------------|--|--|--|--|--|--|
| contain and | upgrading of major and secondary storm water canals and conduits networks and | | | | | |
| maintain the towns | maintenance of basic sanitation through a needs analysis for water, sanitation and | | | | | |
| | roads in formal, informal and rural settlements, and through exploring alternative | | | | | |
| | ways of delivering municipal services sustainably and efficiently. | | | | | |
| | | | | | | |
| Rural market town | By focusing on more efficient infill investment to consolidate the planning pattern of | | | | | |
| | the town and providing basic sanitation as an interim measure to replace bucket | | | | | |
| | systems in the short term. | | | | | |
| | | | | | | |
| | | | | | | |
| Proactive | By conducting a customer needs analysis for water, sanitation and roads, exploring | | | | | |
| rioactive | | | | | | |
| management for | alternative ways of sustainable and efficient municipal service delivery, development | | | | | |
| change | and implementation of a maintenance plan/strategy, development of an | | | | | |
| | Infrastructure Master Plan and developing and implementing an Affordable Levels of | | | | | |
| | Service Strategy. | | | | | |
| | | | | | | |

Table 5.5.5 Linking Clean Environment Programme and SDF Concepts

| SDF Concepts | Clean Environment | | | | |
|-------------------|--|--|--|--|--|
| Balanced city | By consolidating the use of the environment for greater benefit through the developing a | | | | |
| structure | greening plan for Bloemfontein | | | | |
| Strengthening the | By improving, protecting, upgrading and maintaining valued environmental features | | | | |
| city core | including providing adequate public sanitation facilities where people congregate. | | | | |
| | | | | | |
| Intensification, | By reducing levels of water pollution through sewage contamination, investigating and | | | | |
| densification and | implementing a MOSS linkage plan, releasing for development open spaces not being | | | | |
| infill | utilized optimally, implementing the Quaggafontein Open Space Master Plan and | | | | |
| | developing and implementing the Naval Hill Master Plan. | | | | |
| | | | | | |
| To integrate | To develop a regional park between Thaba Nchu and Botshabelo and develop | | | | |
| Botshabelo and | environmental friendly industrial development programmes | | | | |

| Thaba Nchu | | | | | |
|-------------------|--|--|--|--|--|
| Consolidate, | By improving the existing environmental opportunities through consolidation and | | | | |
| contain and | maintenance to maximize their benefits including investigating the central open space in | | | | |
| maintain the | Botshabelo for more amenable use. | | | | |
| towns | | | | | |
| | | | | | |
| Rural market town | By improving the existing environmental opportunities through consolidation and | | | | |
| | maintenance to maximize their benefits including investigating the opportunities related | | | | |
| | to the conservation areas in and around Thaba Nchu. | | | | |
| | | | | | |
| Proactive | By improved access to effective decision-making through developing an Integrated | | | | |
| management for | Environmental Management Policy and Integrated Environmental Management Plan, | | | | |
| change | developing an Integrated Waste Management Plan, finalizing an Urban Open Space Policy | | | | |
| | and Plan, and developing a Strategic Environmental Management Plan, and reviewing | | | | |
| | existing environmental by-laws | | | | |
| | | | | | |

Table 5.5.6 Linking the Rural Development Programme with SDF Concepts

| Promoting Rural Development |
|--|
| |
| Establish three Agri Villages in rural Thaba Nchu. Develop Tourism Nodes at Rustfontein |
| Dam. Contain and mantain existing game reserves to support rural development. Identify |
| and demarcate land suitable for peri-urban farming and developing well managed |
| commonages. |
| |
| Integrating Botshabelo and Thaba Nchu. Restrict further development of Thaba Nchu to |
| the east and encourage development of Thaba Nchu to the west. |
| |
| By intensifying locations that are more accessible for the demand of goods and services. |
| |
| |
| |
| By making urban markets and livelihood services more accessible, through improving the |
| transport system and road infrastructure in rural areas and access to urban services by |
| rural communities, identify transport needs in rural areas and developing an Integrated |
| |

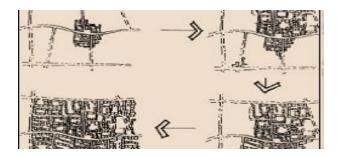

| | Transport Plan to address rural transport needs | | | | |
|-------------------|--|--|--|--|--|
| Consolidate, | By improving the existing investments in and environments of the towns to maximize their | | | | |
| contain and | benefits and decreasing rural-urban migration, through engaging with the Free State | | | | |
| maintain the | Department of Public Works, Roads Transport to perform the Extended Public Works | | | | |
| towns | Programme in upgrading and maintaining the roads in rural area, ensuring that that all | | | | |
| | service plans (capital & maintenance) include the rural areas, and that MMM facilitates | | | | |
| | the provision of government services to rural areas and residents. | | | | |
| | | | | | |
| Rural market town | By reinforcing and consolidating existing rural economic activities and supporting new | | | | |
| | activities through increased agricultural activity and supporting emerging farmers to | | | | |
| | become more commercial in their operations. MMM should promote rural agricultural | | | | |
| | products, agricultural and agri-business projects and establish well managed commonages | | | | |
| | in Botshabelo and Thaba-Nchu including the purchase of additional land. Establish three | | | | |
| | Agri Villages in the Thaba Nchu area at Sediba, Feloana and Woodbridge 1 and 2 | | | | |
| | | | | | |
| Proactive | By facilitating the establishment of local agriculture development forums and creating a | | | | |
| management for | platform/forum for interaction between MMM and the House of Traditional Leaders. and | | | | |
| change | demarcating suitable land for peri-urban farming | | | | |

5.6 Spatial Structuring Elements

The Spatial Development Framework needs to be indicative and therefore there is a need to adopt a set of structuring elements that can give future structure to the urban and rural form of the municipal area. Four key spatial structuring elements were identified. The following is a brief explanation.

5.6.1 Urban Centres and Nodes

These are areas where development (facilities, services and economic opportunities) tends to concentrate. Different types of nodes can be distinguished:

- *Urban Centers* are larger concentrations of people and investment in a large but specific area such as a town or city. These centers have an impact at the regional scale and offer a spectrum of supporting infrastructure and services. There are three urban centers Bloemfontein, Botshabelo and Thaba Nchu;
- **Development Nodes** are specific locations where there is local economic growth or where it will be promoted. Social and public amenities may also be located within or nearby the development node. The size, scale, nature and form of a node will differ from one another as a variety of activities will tend to cluster in and around the node.

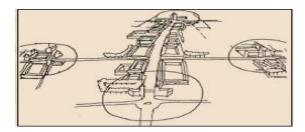

The larger the sphere of influence of a node, the more intense the development associated with the node and the greater the density and area which the node will occupy. Nodes within neighbourhoods also tend to concentrate public amenities, e.g. schools, recreation facilities, etc. and some commercial activity;

 Rural Service Nodes are places where services can be rendered from a central point more economically to surrounding farming communities.

5.6.2 Corridors:

Corridors occur along a variety of transport routes. The different types of corridors that can be distinguished include:

- Metropolitan Transportation Corridors occur along major routes that connect urban centers with one another
 and along which public transport is regarded as a priority. Since the emphasis is to connect major urban
 centers, these corridors are characterized by high vehicle speeds (higher than 80 km/h), promoting mobility
 and limiting direct access to adjacent land uses as far as possible;
- Movement Corridors form the primary mobility network of roads within urban nodes. The term "movement" describes the importance of protecting the mobility of these roads, implying that direct access to adjacent land uses should be restricted. Speed limits of 60 km/h or 70 km/h are typically imposed along these corridors. As with metropolitan transportation corridors, public transport forms an integral part of a movement corridor;
- **Development Corridors** are characterized by ribbon-like development along routes that would otherwise be classified as movement corridors. Mobility is still regarded as a priority, but access to adjacent land uses can be considered if it complies with specific design criteria. Redevelopment of land to higher order land uses (larger traffic generators) can usually only be considered if smaller erven are consolidated into larger units. These routes still form part of the primary road network within urban development centres;
- Activity Corridor/Street gives preference to pedestrian and public transport movement and less emphasis is
 placed on mobility. Such corridors/streets are characterized by lower vehicle speeds and close spacing of
 accesses. Economic activity is usually limited to adjacent properties and is primarily focussed on pedestrians
 and surrounding residential areas

5.6.3 Metropolitan Open Space System

The Metropolitan Open Space System (MOSS) is a rationalised network of open spaces aimed at complementing the built fabric by providing the urban environment with natural open space for recreation and general amenity, protecting biodiversity in urban areas and providing animal and plants species with habitats and protecting heritage or cultural sites where possible within the system.

5.6.4 Districts:

Districts have a significant common identity and character and usually have a homogeneous land use associated with it. Different kinds of districts have been identified:

- Mixed land use district is the integration of a suitable and compatible set of residential and non-residential
 land uses within the same area. It is aimed at facilitating a wide range of residential types within close
 proximity to employment educational, social and recreational opportunities;
- Neighbourhood districts are self-contained areas with regard to daily facilities. They include public and
 private investments, which ranges from residential, social, recreational and institutional facilities. However
 they do not contain high concentrations of workplaces, although isolated pockets of small commercial
 activities or home industries may be evident;
- Industrial districts are areas where warehousing, manufacturing, processing or assembly of articles, commodities, goods or foodstuffs takes place;
- Agricultural district is an area surrounding intense human settlement (urban nodes), usually associated with agricultural activities;
- Institutional districts accommodate land uses that are utilized by hospitals, education facilities, government departments and military complexes, etc;
- Corporate districts are a concentration of large office development within an area and are occupied by corporate companies; and
- *Historical Precinct District* is an area dedicated to the preservation and restoring of old buildings, cultural artifacts or places of historic significance.

5.6.5 Peri – Urban Area

The area defined as a peri-urban area is located at the periphery of the node Bloemfontein and is characterized by predominantly small holdings and various agricultural land uses. The area is located beyond the urban edge indicated as a hatched area (see SDF map).

The intention of the smallholding zoning is seen to accommodate extensive residential residing, other urban uses (as listed per permitted and consent uses), as well as agricultural utilization at the periphery of the town lands and not for the zoning of small portions of agricultural land in rural areas that are utilized for commercial farming. Land Use Management in the demarcated area will be evaluated in terms of the Bloemspruit and Bainsvlei Town Planning Schemes. This section should read in conjunction with section 5.2.7.1 (g) of this text.

5.7 Integrating the SDF and the Land Use Management Systems

The objective for the SDF in the IDP is that the legacy of spatial distortions in Mangaung is diminishing and growth is occurring in a way that is sustainable and integrated spatially. The SDF strategies to achieve the objective are:

- To improve urban intensification, densification and infill to contain sprawl in Bloemfontein;
- To improve urban integration to redress spatial imbalances of the past;
- To strengthen links between urban, town and rural livelihoods;
- To consolidate, contain and maintain Botshabelo;
- To reinforce Thaba Nchu as a rural market town supportive of rural development;
- To establish accountable and proactive management of change in land use and to the development patterns.

The SDF is expressed at two different levels. The first is at the macro framework level, which deals with the relationship between the various geographical areas and the urban-rural linkages and the second is at the micro framework level which deals in more detail with focused development areas and related strategies identified in the IDP/SDF review process. The SDF and the various Town Planning Schemes should be interpreted in conjunction with one another. The current operational Town Planning schemes will be replaced once the LUMS are approved by Council.

5.7.1 The Macro Framework

The macro framework sets forth the future relationship between the various geographical areas and the urbanrural linkages and is described below in terms of the spatial structuring elements:

5.7.1.1 Nodes

Urban Centres

Bloemfontein is currently the largest urban centre, followed by Botshabelo and Thaba Nchu and most public and private investment will be in these areas. It is foreseen that Bloemfontein will remain the focus for future development as it is predicted that Bloemfontein will house approximately 65% of the total population in 2016.

Development Nodes

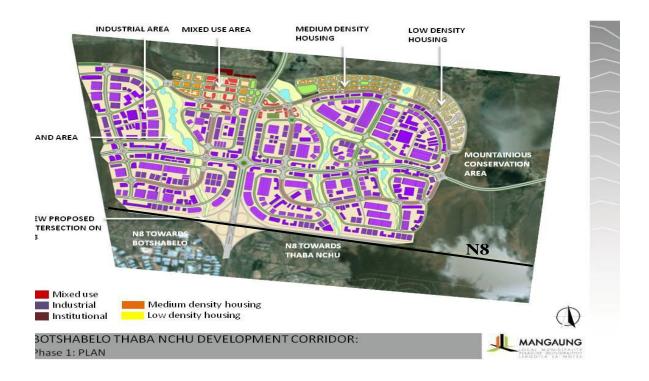

New commercial development nodes have been identified at major intersections, particularly in the previous disadvantaged areas to encourage economic investment in these areas. It is proposed that nodal development be encouraged at the intersection of Kruger Avenue and the N8 road. The horse race course and the Bloemspruit drainage area lean itself to a mixed land use area. However proper measures should be put in place to guard against flooding hazards. Development nodes proposed in the eastern quadrant of Bloemfontein are mixed land use in nature and adhere to the basic requirement for integrated human settlements. The objective of this development is to enhance economic development in close proximity to the previously disadvantaged communities in the south eastern quadrant of Bloemfontein.

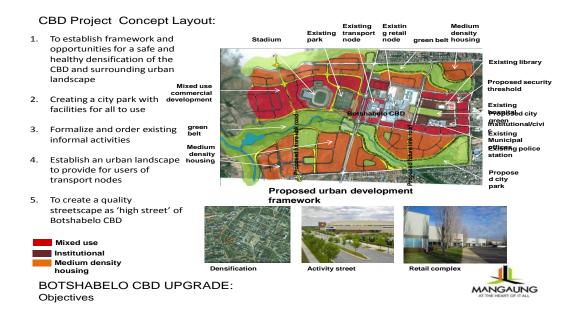

Other development nodes that are proposed in the Bloemfontein area, are at the intersections of the Dewetsdorp road and Inner Ring Road, Moshoeshoe Street/Inner Ring Road and at Highway Supermarket along the Dewetsdorp Road. Further development of the Corobrik site should be encouraged as a node which provide for various mixed land uses.

It is also proposed that the strategic location of the N1 should be utilised more fully and commercial and light industrial activities could therefore be supported along the N1, with the precondition that the visual impact of new developments along the N1 should contribute to enhance the image of the MMM area. A series of new smaller nodes have been identified along the activity corridor in Moshoeshoe Street and it is foreseen that the existing development centres like Mimosa Mall, Waterfront, Show Grounds and Hyperama, will remain important draw cards for development in future.

In Botshabelo, five decentralised nodes have been identified at strategic localities throughout the urban area to improve accessibility of commercial and other services to the total community of the town. The development consists of a new node north of the N8 Corridor. The Nodal Development put a strong emphasis on industrial and light industrial development to address the need for economic development in the area.

Further Nodal developments are towards the south of the N8 Corridor with the development of an interchange to link the two nodes on both sides of the N8.

The nodes hold various investment opportunities and are clearly focussed on inviting private sector and public sector investment.

Two development nodes are proposed for Thaba Nchu, namely at the western access from the N8 to the Thaba Nchu central business area/road to Thaba Nchu Sun, where the focus should be on tourism trade, and a further node on Station Road, at the railway station. However strong emphasis should be placed to contain and maintain the existing urban node with urban renewal projects. The development of a regional taxi rank will be essential to enhance development in Thaba Nchu and movement from the tribal villages and Bloemfontein.

All CBD's will remain high density and high intensity commercial nodes with office development concentrating in and around it. Social service nodes should be established at strategic locations in the rural areas of Thaba Nchu, based on the number of people in the area and the availability of infrastructure to ensure maximum access.

5.7.1.2 Corridors

Two high potential corridor development projects are envisaged for the MMM area;

- (a) An Activity Corridor development project along the road section comprising Fort Street, Dr Belcher Road, Mkuhlane Street, Brits Street, Ramatsoele Street and Moshoeshoe Street, to integrate the Mangaung township with the Bloemfontein CBD and to stimulate economic development within the Mangaung township; and
- (b) Commercial/Industrial development along the N8 route between Bloemfontein and Botshabelo / Thaba Nchu, in particular along the road section between the Bloemfontein CBD and the proposed intersection between the N8 and the Eastern Outer Ring road. A comprehensive study with specific recommendations to guide future development along the N8 corridor has been completed and adopted by Council and now serves as the strategic development master plan for the corridor. This study and its recommendations should be read in conjunction with the SDF.

5.7.1.3 Districts

Neighbourhoods

The micro frameworks of the respective urban centres identify areas for future development for a mix of compatible land uses. The emphasis was on addressing the imbalances of the past while creating a much more sustainable environment in future. Land for new neighbourhood districts has been identified in localities ensuring the compaction of the city. It is therefore foreseen that higher density developments will feature in future in close proximity to the urban core, which will enable more affordable service delivery and improve the viability of a more sustainable public transport network.

In the Bloemfontein region, the following areas have been identified for larger scale residential development:

(a) West

- Brandkop Motor Race Track Area (Higher density, lower middle class residential units); and
- Parts of Cecilia / Kwaggafontein Area (Higher density, lower middle class residential units).

(b) North

- Rayton and rest of the small-holding area to the north of Heuwelsig, Dan Pienaar and Hillsboro up to the N1 route;
- Infill development on small-holdings in Reynecke Avenue between Tempe Military Base, the N1 route and Frans Kleynhans Road;
- Undeveloped land to the north of Pentagon Park/Helicon Heights on both sides of the Bultfontein Road up to the N1 route;
- Undeveloped land to the north of the Bayswater Township, east of the Bultfontein Road up to the Bloemfontein/Johannesburg railway line in the east and the farm Tafelkop 2876 in the north. (Higher density, lower middle class residential units on Council owned land).

(c) North-East

• Small holding area to the north-east of Rudolf Greyling Avenue, between the Bloemfontein/Johannesburg railway line in the north and the N8 route in the south (excluding the first two rows of small holdings adjacent to Rudollf Greyling Avenue and the N8 route)

(d) East

 Grassland area and Bloemspruit smallholdings between the farms Sunnyside 2620 and Elite 2630 (north), the Meadows Road (south) and the future outer ring road (east).

(e) South

- Undeveloped land to the south of the Blomanda/JB Mafora/Turflaagte/Chris Hani townships up the Outer Ring Road in the south and between Blomanda and Church Street extension in the west;
- Infill development of the old Hamilton Rifle Range area.

(f) South-West

- Further development in the Lourierpark area;
- Development on the farm Brandkop 702;

To give effect to the concepts and strategies adopted to guide the future spatial structuring of MMM, applications for township establishment in areas not earmarked for this purpose, will only be considered once proven merits exist that the areas demarcated for urban expansion in the direct vicinity of such applications, have been filled up with development to such extent that the proposed development is warranted and adheres to the development concepts of the SDF.

In the future development areas indicated as yellow on the SDF Map, that land indicated as a neighbourhood district should not be subdivided into smaller units or holdings but that the township establishment procedure be followed. A minimum of 30% of the residential units in all new township establishments be single residential. The rezoning process cannot be used as an alternative for a township establishment and should not be applied in the yellow area to encourage densification or change of land use to commercial or business, except for approved mixed land use areas.

Rezonings will only be applicable to individual erven in an approved township establishment where the supply of bulk infrastructure was satisfactorily addressed in line with the requirements of the MMM. No township establishment by means of special uses will be allowed. It is important that pro-active measures be developed in the urban expansion zone (yellow zone) to secure land for servitudes and social amenities. It is absolutely critical that areas like Woodland Hills, Langenhoven Park and areas beyond the N1 (North Western Quadrant) should be provided with schools to encourage sustainable neighbourhood development.

It is important to note that the designation of any particular area(s) for future neighbourhood development in the SDF, does not necessarily imply that all or any bulk municipal and/or other required services are available, or will be made available, to accommodate any development in the particular area(s). Specific investigations will have to be conducted as part of the normal planning processes by developers to establish the needs for such services, whereupon the responsibility for the installation of such services will have to be negotiated between the developers and MMM.

Owing to the limited growth currently taking place in the Botshabelo and Thaba Nchu areas, further residential development (should focus on integrating Bothabelo and Thaba Nchu and introduce urban renewal strategies in the Flenter, Mokwena areas close to the CBD) (in these areas should as far as possible adhere to the principles of infill development), with special emphasis on providing physical linkages and access links between physically separated areas.

The Military base in Thaba Nchu, like many other redundant public buildings, should be used for alternative uses. It is proposed that the military base could be used for a skills development centre, while some parts of it could be used for future neighbourhood development. Proper sport facilities should also be developed here to enable the communities to the west to access these facilities. It is proposed that some of the redundant buildings could be turned into multi-purpose centres that offer supporting services to the bigger region.

Sensitive areas, like the Seven Dams conservancy, an environmental management plan be developed based on the pressure for development vis a vis the protection of the environment in the area.

It is proposed that the existing light industrial area in Botshabelo be allowed to expand along the N8 route towards the west, while those in Thaba Nchu should be developed to their fullest potential. New access roads from the N8 to both industrial areas in Thaba Nchu should be developed to increase the viability of these areas. It is further proposed that Botshabelo and Thaba Nchu be integrated and a new urban node be established to the north of Botshabelo.

In the Bloemfontein area, new industrial development should be concentrated within the N8 Development Zone where industrial development will be supported on the Transworks land as well as on the land directly adjacent to and on both sides of the N8 route, between the Bloemfontein CBD and the proposed future intersection of the N8 and the Outer Ring Road. Similarly, industrial ribbon development will also be encouraged on both sides along Rudolf Greyling Avenue. Further light industrial be encouraged to the north of Tibbie Visser and in the Noise Zones/ Inner Ring Road between Andries Pretorius Street in the north and the Bloemfontein / Maseru railway line in the south.

Mixed land use, including industrial, should be allowed along the western side of the future Outer Ring road between the N8 route in the north and the Bloemfontein / Maseru railway line in the south. Access to these developments should conform to access requirements pertaining to the relevant road classification of the Ring Road, once implemented.

Informal Settlements

Informal settlements refer to areas that are not formally planned but nevertheless are occupied illegally by the dwellers. Thus, the security of tenure remains a mirage in such areas. Lack of basic services and/or infrastructure is often a grotesque challenge. Emergency services are also hard to come by. It is thus paramount to collectively focus all energies and efforts towards changing these unacceptable living conditions, so that dwellers in these areas also enjoy fruits of human rights like other citizens. In the collective, relevant stakeholders are the government, the private sector and the informal settlement dwellers as the affected and interested party. The resultant product of the Strategy will lead to community ownership of the Strategy and the product of these schools of thought, exhibits elements of convergence. Mainly, they attempt to deal with informality and related disfunctionalities of these settlements. The only glaring difference is the intensity of the implementation Informal Settlements Upgrading Strategy aims at changing the situation of informality into formalised settlements that ideally serves the dwellers in the same way as other urban areas. Simply put, it refers to the changing of informality entrapments and the related paraphernalia.

One school of thought has it that, Informal Settlements Upgrading focuses on the lighter issues of informality entrapments and that it does not go deeper to address comprehensively the settlement and the features of the land and body - scape. On the other hand, the second school of thought focuses on the eradication of informal settlements, completely. Close scrutiny to both and the scope of work to be covered. Therefore, the practical and comprehensive strategy must encompass both the elements of each school of thought.

Current Status of Informal Settlements in the Metro

At present, there are 28 informal settlements in the Metro inhabited by approximately 25156 households. In the majority, 19 of these informal settlements are located in the Bloemfontein urban centre while the remaining 10 informal settlements are located in Botshabelo and Thaba Nchu. In Thaba Nchu are 3 informal settlements. Flowing from that understanding, it is imperative to also mention that, even in Bloemfontein and Botshabelo areas, there are pockets of informal dwellings scattered in invaded open spaces.

Below, is the list of all Informal Settlements in the Metro, categorised per Ward, with the indication of the development intention and/or projects, existing/running and planned.

| Ward | Map ID | Settlement Name | Township Status | No. of | Planned |
|----------|--------|--------------------------|------------------------------|--------|------------|
| | | | | erven | Action |
| 45 | ı | Bloemside 9 | Township approved subject | 4200 | In-situ |
| | | &10 | to conditions | | upgrading |
| 46 | F | Bloemside | Land Surveying to be | 260 | In-situ |
| | | Phase 4 (Sonnerwater) | completed | | upgrading |
| 4 | N | Kgatelopele | Awaiting approval from | 185 | In-situ |
| | | | Land Use Advisory Board | | upgrading |
| | | | | | and |
| | | | | | relocation |
| 10,18,12 | К | Kgotsong/ | SG plans lodged already | 10 000 | In-situ |
| | | Caleb Motshabi | | | upgrading |
| 6,13 | E | MK Square | There is a problem with soil | 490 | Relocation |
| | | | conditions (geo-technical | | |
| | | | report has shown this) | | |
| 7 | Н | Kaliya Square | No township application | 20 | Relocation |
| | | and Winkie | | | |
| | | Direko | | | |
| 6 | В | Saliva Square | No township application | 118 | Relocation |
| 6 | С | Thabo-Mbeki | No township application | 41 | In-situ |
| | | Square | | | upgrading |
| 6 | Α | Jacob Zuma | No township application | 114 | In-situ |
| | | Square | | | upgrading |
| 6 | D | Magashule | No township application | 48 | In-situ |

| | | Square | | | upgrading |
|--|---|---|--|-------------|----------------------------------|
| 13 | Q | Rankie Square | No application for township submitted | 15 | Relocation |
| 1 | Р | Lusaka Square | No application for township submitted | 23 | Relocation |
| 1 | М | Tambo Square | No application for township submitted | 24 | Relocation |
| 1 | R | Codesa 2 and 3 | No application for township submitted | 15 | Relocation |
| 4 | 0 | Joe Slovo | No application for township submitted | 50 | Relocation |
| | | Settlement Name | Township Status | No of erven | Planned Action |
| 46 | J | Bloemside Phase 7 | Land acquisition completed. Planning commenced | 2500 | In-situ upgrading and relocation |
| 4 | S | Namibia Erf 27921 &27778 | Awaiting township approval | 52 | In-situ upgrading |
| 46 | L | Grassland Phase 4 (Khayelisha) | Land acquisition completed . Planning commenced | 4000 | In-situ upgrading |
| 7 | G | Mkhondo | Feasibility to be undertaken | 80 | |
| 27 | X | Botshabelo West | Township approved subject to conditions | 3700 | In-situ upgrading |
| 30,29,31 ,30,34,3 3,32,29, 28,35,38 | Υ | Various settlements Botshabelo (H,G.T,L,C,F,K) | Opening of township register underway for 80% of these areas | 1200 | In-situ upgrading |
| 39 | Z | Thaba-Nchu (7 extensions) | Township registers to be opened by DRD. They own | 2480 | Township extensions |

| | | this land | | |
|----|---------------------------------------|-----------|--------|--|
| 42 | Bultfontein 1 Ext 14 Thaba Nchu | | 820 | |
| 43 | Motlatla Thaba Nchu | | 70 | |
| 40 | Extention 27 (Thaba Nchu) | | 213 | |
| | Total | | 25 156 | |

Steps followed in the Upgrading of informal settlements

Key steps followed in the development or upgrading of informal settlements, are as follows:

- 1 Audit, register and number shacks
- 2 Count and register households
- 3 Profile households
- 4 Profile settlements
- 5 Name streets
- 6 Purchase land, if still in private hands
- 7 Plan and survey developable areas
- 8 Install infrastructure and
- 9 Consolidate areas

Strategy

Based on the above key steps, the Strategy can then be formulated in accordance to the realities on the ground, as per settlement. Therefore, the above key steps will be the backbone of our Metro's Strategy.

Worth – mentioning at this stage is the fact that the Metro, the provincial department of Human Settlements, the national department of Human Settlements, the Housing Development Agency and the National Upgrading Support Programme Team are working towards formulating the Strategy within the Informal Settlements Upgrading Programme mandate as crafted by the national department of Human Settlements.

Recommendations

Foregoing propositions therefore recommends that:

The Strategy being formulated is in accordance to the Key Steps alluded to above

relevant by – laws be enforced to prevent further mushrooming of informal settlements and data so captured and collated be acknowledged as official and e-managed within the principle of once – capture and, multi – use rather than the usual multi – capture, once –off - use

The MMM have to provide holding areas for squatters to prevent illegal occupation of land.

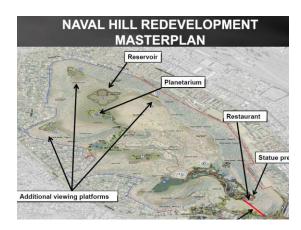

Agricultural

The surrounding rural areas are predominately commercial mixed farming areas, with the exception of the tribal area surrounding Thaba Nchu, where communal farming practices are established. The Rural Development programme includes encouraging subsistence farmers in the area to move towards commercial production. Three commonages have been identified in the Bloemfontein area, namely at Bloemfontein Airport, Brandkop 702 and at Bloemdustria. It is, however, essential that policy be developed for the effective management of these commonages, which should be viewed as temporary settlements for small-scale farmers. Based on a developmental strategy, these farmers should be channelled to permanent settlements in the rural area.

It is recognised that all land used for cultivation or grazing should be protected from urban development and that future expansion of the urban area be guided by in-depth analyses that takes into account soil potential, carrying capacity, type of agriculture, availability of water, etc. Smaller subdivision of agricultural land and change of land use will thus be considered on an individual basis in context of Act 70 of 1970.

Tourism

The MMM area has significant natural and cultural features which are being proposed in the IDP to be utilised for focused tourism development. The Naval Hill Development Master Plan is one of the Municipality's flagship tourism development projects.

The project is now in implementation phase and phase 1 and 2 of the project already commenced. Various other tourism nodes where identified in the metropolitan area.

Specific locations include the intersection of the Thaba Nchu Sun and N8 road, the Maria Moroka Game Reserve, Giel de Wet, Maselspoort and Philip Sanders Resorts and eco-tourism possibilities on Thaba Nchu mountain (hiking trails, rock climbing, etc.), linking it with Botshabelo mountain, as well as Rustfontein Dam, Tierpoort Dam, Mockes Dam, Maselspoort, Krugerdrift Dam.

The above —mentioned resorts would be regarded as approved resorts. The development of chalets should be confined to approved resorts and will not apply in the Bainsvlei or Bloemspruit Planning Scheme area's. Other cultural and historical features include Anglo-Boer War sites like Sannaspos, Queens Fort and the President Acre, the historical precincts in Bloemfontein a range of museums and monuments, the rich history of areas like Batho, the fact that the ANC was established in Bloemfontein, Naval Hill and the Zoo.

5.7.1.4 Metropolitan Open Space Framework

A Metropolitan Open Space Framework has been identified and includes major physiographic features, like the river systems, dams and hillocks that depict the topography of this area. This natural open space system will be linked, where possible, with the public open spaces developed in the urban areas to ensure a system of continuity. The framework has been incorporated into the Urban Open Space Policy and Framework.

All classifications and definitions attached to open spaces should be read in conjunction with the open space framework. Flood line areas in particular need to be kept open and informal settlements within these areas need to be prohibited. The public participation processes indicated that the open spaces of the SDF should be reviewed.

5.7.1.5 Urban Edge

Based on the strategic spatial development concepts, objectives and strategies of the SDF as detailed earlier in this document, an Urban Edge has been delineated for each of the respective urban nodes (i.e. Bloemfontein, Botshabelo and Thaba Nchu) within the MMM area. The location of the Urban Edge of each of the relevant areas is indicated on the respective Micro Framework Plans of the SDF. The area enclosed by the Urban Edge is regarded as the designated area within which urban development/township establishment will be allowed to take place within the 5-year planning horizon of the SDF. Essentially the urban edge delimits the area within which sustainable urban development can take place whilst adhering to the principles for urban expansion as set out in the Mangaung Metropolitan Municipality's IDP.

The delineation of the urban edge is furthermore predominantly subjected to the availability of bulk services in the relevant areas. It is therefore critical that an Infrastructure Master Plan be developed as soon as possible for the three urban nodes in the MMM area to guide strategic future development.

5.7.2 Micro Frameworks

Micro Framework Plans have been prepared for each of the 3 urban centres. Some areas within these centres have been identified as areas that are prone for redevelopment. These areas mostly concentrate around the CBD's and their surrounding areas. A number of areas have been identified and each will be discussed separately:

5.7.2.1 Bloemfontein

For practical purposes and for the sake of more clearly describing the Micro Framework of Bloemfontein, this urban centre is divided into 6 distinctive areas, namely the Central Business District (CBD), 4 quadrants, namely a north-eastern, south-eastern, south-western and north-western quadrant, and the area beyond the urban edge/peri-urban area.

(a) CBD

Regeneration of the CBD is one of the key IDP Programmes. Some spatial opportunities include:

• links be established between the CBD and the Westdene area, the Free State University and other parts of the city. It is furthermore suggested that Elizabeth Street be developed as an activity street. This implies that it will partially be closed for traffic and that pedestrian movement will get priority. It needs to be "greened" and

- made more pedestrian friendly. The street could therefore be developed with amenities like litter bins, fountains, benches, cafes, etc;
- the Bloemspruit canal through the CBD be developed into an asset for the city. It is proposed that it be
 developed into a water feature that stretches from the Loch Logan Waterfront in the west to the Central Park
 bus station and shopping complex in the east.
- medium and high density housing complexes be developed along the Spruit with provision for safe pedestrian
 movement along the relevant section of the canal, thus allowing pedestrians to walk from the sports stadiums
 to Central Park in a safe environment;
- that the old buildings in Fichardt and East Burger Streets be revamped;
- Hoffman Square be redeveloped as a gathering place. It should be seen as the area where people could meet
 and relax and the redevelopment should focus on the creation of an attractive environment for this kind of
 activity. There should be planting of trees, water features, benches, etc. and regulated hawking activities;
- Maitland Street be beautified by focusing on a "greening" activity;
- hawking activities in the CBD be formalised and properly managed. Facilities for hawkers should be erected at carefully selected localities. This will help to create a more safe and secure environment;
- areas in the CBD with particular historical value, such as the Bloemfontein Railway Station Building, Maitland Street, Pres Brand Street, Church Street and St George Street, be developed as a historical precinct and buildings in this area should be conserved. Pedestrian walkways should be developed to link these various historic buildings;
- The Old Presidency be maintained as a historical site.
- where practically possible, vacant office blocks be turned into residential units. These should preferably be well-developed residential units that cater for a wide spectrum of residents, also including some social housing complexes. The number of residents in a flat should be regulated and landlords and owners should be penalised if this is not adhered to. A mix of uses can be accommodated within one building e.g. the ground level can be used for retail, second and third levels for offices and the rest for residential units. Some buildings could even be converted into public amenities to serve as schools, clinics, etc. within the CBD. Where possible, open spaces should be created for people living within the CBD. To this effect, it is proposed that derelict properties located within the area between Fraser Street (West), Harvey Road (East), St George Street (South) and Douglas Street (North), be identified during the process of compiling the CBD Development Master Plan and that the relevant properties be reclaimed by MMM for strategic redevelopment purposes;
- a monument be erected at the south-eastern entrance to the CBD in Hanger Street in commemoration of South African women;
- the main taxi rank at Russel Square, which has serious capacity problems, be expanded. One should consider
 the area between Central Park, the Bloemfontein Railway Station and Bastion Square for future expansion and
 the establishment of an Inter-Modal Public Transport Facility; and

- Consideration be given to the railway station being totally revamped to form an integral part of the proposed inter-modal facility.
- The CBD be expanded to the Waterfront, along Zastron and Nelson Mandela Streets to Mimosa Mall.
- Advertising be managed as an income generator for the City.
- Effective traffic, security and waste removal systems be introduced in the CBD which will encourage the objective of creating a save investor friendly environment to live and work.

The details of the above and other proposals and the implementation strategies associated with individual projects are set out in the CBD Development Master Plan, which is one of the priority projects in the CBD Regeneration Programme.

(b) North-Eastern Quadrant

This area basically comprises the north-eastern sector of Bloemfontein, located between the Bloemfontein-Johannesburg railway line in the west and the Bloemfontein-Maseru railway line in the south. The quadrant, inter alia, Buitesig and Ooseinde Industrial Area, the small-holding areas of Estoire, Roodewal, Olive Hill, Vaalbank Zuid, Bloemspruit and Shannon, the Sunnyside area, Bloemfontein Airport and Bloemspruit Air Force Base. The area be governed by the relevant town planning schemes and local structure plan;

- Bloemfontein Town Planning Scheme
- Bloemspruit Town Planning Scheme
- Bloemspruit Density Plans

The following proposals are made with respect to the north-eastern quadrant:

- Transwerk property be developed as a mixed light and service industrial area which can be linked with Hilton and Buitesig in future;
- That corporate commercial/ light industrial be encouraged along the N8 in the Estoire area. The mixed land use area along Rudolph Greyling to be extended to the northern side of Tibbie Visser and the Noise Zones. Warehousing to be encouraged in the noise zone area of Estoire. The southern side of Tibbie Visser remain a neighbourhood development area. The Tibbie Visser Road to be upgraded to acceptable standard and proper linkage road be designed with Rudolph Greyling to allow proper access to the area.
- That corporate commercial/industrial development be encouraged along the N8 route between the future intersection of the N8 and the outer ring road and the Bloemfontein CBD;

- That a mixed land use development be planned and developed on the Farm Sunnyside (Airport Node) which
 should include a passenger railway station on the Bloemfontein Thaba Nchu Rail link to the south. This
 development should be done in conjunction with the N8 development plan.
- Industrial ribbon development be encouraged along Rudolf Greyling Avenue/Inner Ring Road between Andries Pretorius Street in the north and the Bloemfontein/Maseru railway line in the south;
- Mixed land use, including industrial, be allowed on the western side of the proposed future outer ring road, between the N8 route in the north and the Bloemfontein/Maseru railway line in the south;
- Pedestrian and cyclist movement, especially along the major movement corridors in the area such as
 Dewetsdorp Road, Dr Belcher Road, Inner Ring Road and widening of Meadows Road be encouraged (This
 matter should be addressed in more detail in MMM's Integrated Transport Plan)
- Tourism development encouraged in the earmarked zones in the Maselspoort area. The following specific land
 uses will be considered in this area: Guest houses, restaurants/coffee shops/tea gardens; picnic facilities;
 horse riding facilities; tourism related facilities.
- In the Maselspoort area and any river front development flood line restrictions be applied and acceptable standard of bulk infrastructure must be provided to support the development and to prevent any form of pollution and natural hazards. A development management plan to be developed for river front developments and bylaws to manage development effectively in the area.

Bloemfontein Airport is located within this quadrant, which affects the use of land in the area. Noise contours, as depicted on the Micro Framework Plan for Bloemfontein, have been determined by the South African Bureau of Standards to inform and guide development in the area surrounding the airport. The following criteria have been laid down by the SABS in this regard:

- (a) No residential development with buildings without acoustic insulation within the area with a Noise Index (NI) higher than 65;
- (b) No residential development with buildings with acoustic insulation within the area with a NI higher than 75;
- (c) No schools, universities, technicons, colleges, hospitals and churches may be developed within the area with a NI higher than 60.

It is further recommended that all land use development in the Bloemfontein Airport area be conducted in context of the Bloemfontein Airport Development Framework.

(c) South-Eastern Quadrant

This quadrant is located between the Bloemfontein-Maseru railway line in the north and the Bloemfontein-Cape Town railway line in the west. The area basically includes the total Mangaung township area, Heidedal, the "old Corobrick" site, Hamilton industrial area, Ehrlich Park, the old Hamilton rifle range area, South Park Cemetery, the southern land fill site, small-holding areas of Ferreira, Bloemspruit, Shannon Valley, Grasslands and Rodenbeck as well as undeveloped land on the farms Turflaagte 881 and Liege Valley 1325.

The following proposals are made regarding the south-eastern quadrant:

- mixed land use development with economic and recreation facilities and diverse residential development be
 encouraged on the Corobrick site. It is suggested that the development of the site be actively promoted;
- Heidedal be extended across Leeubekkie Street and road reserve on Inner Ring Road be decommissioned to allow for the expansion of the township known as Rykmanshoogte (Heidedal).
- A mixed land use area be created at the intersection of the inner ring road and the Meadows Road.
- Batho's historical value be capitalised upon and tourism attractions be developed. It is also one of the areas
 that are easily accessible and economic opportunities should be developed in this area to improve access to
 job opportunities closer to residential areas; Batho Urban Renewal Project is currently in progress. Various
 strategies should be developed to link Batho with Oranjesig and the CBD.
- Traffic congestion in Dr Belcher Road and Moshoeshoe Street be addressed. Implementation of the Mangaung
 Activity Corridor is currently in progress. The key objectives of this initiative are to stimulate economic
 development in the Mangaung township area, to make the area more pedestrian friendly, to promote nonmotorised transport and to create an environment which is conducive for public transport;
- Development of the business node at intersection of Dr Belcher and Inner Ring Road be planned and marketed.
- To encourage the development of the identified smaller nodes along the Mangaung Activity Corridor through
 various incentives schemes. Dilapidated business be demolished and replaced with proper building structures
 constructed according to their various zoning rights.

- nodal development be encouraged at the intersections of the Dewetsdorp Road/Inner Ring Road, Moshoeshoe Street/Inner Ring Road, Groot Vlei Motors and at Highway Supermarket along the Dewetsdorp Road;
- pedestrian and cyclist movement, especially along the major movement corridors in the area such as
 Dewetsdorp Road, Dr Belcher Road, Meadows Road and the Inner Ring Road, be improved. (This matter
 should be addressed in more detail in MMM's Integrated Transport Plan.); and
- Emphasis be placed on developing green areas in the Mangaung township area. This could be linked with the Metropolitan Open Space Framework for the area.
- That in cases of new township establishments the areas of Bloemspruit, Maxley, Grasland, Sonskyn, Rodenbeck, Leige Valley, Turf Laagte, J.B Mafora and Chris Hani is governed by Annexure F.
- Further commercial development is encouraged in the previously disadvantaged areas.
- Much emphasis should be placed on urban renewal projects in Phahameng, Batho, Botshabela and Ashbury (part of Heidedal)
- In the Bloemside and Grasslands area Provincial Government be encouraged to decommission and transfer roads to the Mangaung Metropolitan Municipality. Roads like Meadows Road require urgent upgrading.
- In the area of Vista Park 3 a regional hospital to be developed.
- As part of the Vista Park 2 and 3 developments the road link connecting Church Street and Vereeniging Avenue to be upgraded to allow the relevant developments.

(d) South-Western Quadrant

This area comprises the south-western sector of Bloemfontein and is located between the Bloemfontein-Cape Town railway line in the east and the Bloemfontein-Dealesville road in the north. The area, inter alia, includes the Bloemfontein neighbourhoods of Gen. De Wet, Uitsig, Fleurdal, Fauna, Lourier Park, Pellissier, Fichardt Park, Hospital Park, Wilgehof, Gardenia Park, Universitas and Langenhoven Park. The Park West, Willows and Oranjesig areas are typical transition areas surrounding the Bloemfontein CBD. Oranjesig has been developed as a mixed-light industrial and service industry area while Willows has a mixture of medium to high residential development, offices and some retailing. The area also includes the small-holding areas of Hope Valley, Bloemdal, Quaggafontein and Spitskop.

The following proposals are made with regard to this quadrant:

• Kings Park be regarded as a "no-go area" for any development that is not conducive to or in support of the present character of this asset of the city. This is the heart of the City and should therefore remain the focus

- point for relaxation and events development within this area, which is the focus point for events tourism, be encouraged to expand into the CBD to the east;
- the Park West area be regarded as the focus of residential orientated developments in support of the events node (Kings Park area and sports facilities) and surrounding educational facilities. It is proposed that developments like guesthouses or student accommodation be allowed to develop in this area.
- Park West, which area is characterised by historical areas/places, be treated as a precinct which can be linked to the historical areas in the CBD;
- Planning be conducted to formalize parking area on the northern side of the "Old Presidency" site which
 should serve as parking to the magistrate court, with the provision that a management plan be developed to
 preserve to historical site.
- development along Haldon and Victoria Roads be limited and access controlled to retain their high mobility function;
- the Falck/Crause Street link between Batho and this area be strengthened. This area could also create a new area for job opportunities for the adjacent area;
- the first row of houses along Park Road be allowed to be developed for commercial uses including offices and restaurants in support of the events node;
- Oranjesig be developed as a mixed-use area focusing on service industries;
- the concentration of medical services at the intersection of Falck Street and Harvey Road be reinforced;
- Queens Fort and the President Acre with its historical value be developed into tourist attractions. It is also proposed that the Basotho monument be relocated/redeveloped to a more suitable place.
- existing commercial developments along Nelson Mandela Drive should remain, but no further commercial
 development be encouraged to the west of Parfitt Avenue/General Dan Pienaar Drive. The strengthening of
 the Mimosa Mall/Brandwag Shopping Centre node should only be allowed if it can be proven that the street
 network will be able to accommodate the resultant additional traffic impact of such intensification;
- A portion of the farm Brandkop 702 be earmarked for neighbourhood development, subject to the developer conducting the necessary investigations regarding the availability of all required municipal services, including a comprehensive traffic impact study, investigating the traffic capacity and upgrading needs of the Curie Ave/Kolbe Ave/Pres Boshoff Street/Markgraaff Street traffic arterial and that the developer carries all costs related to the upgrading requirements to the said road that may be necessitated by development on the relevant land.
- Research and Planning be conducted to relocate the "Show Grounds" and "Oranje Hospital".
- No further subdivisions or sectional titles be permitted on the farms Morgenzon 339 and 4/ Bredenkamp 2861
- Erf 16/26408 Willows be earmarked for mixed land use without industrial and incorporated within the Willows /Parkwes Structure Plan.

Land Use Management must be conducted within the prescribes of the Rosepark, Willows, Park West and Oranjesig Local Structure Plans.

(e) North-Western Quadrant

This area comprises the north-western sector of Bloemfontein and is located between the Bloemfontein-Dealesville road in the south and the Bloemfontein-Johannesburg railway line in the east. The area includes the Bloemfontein neighbourhoods of Brandwag, Westdene, Arboretum, Dan Pienaar, Waverley, Heuwelsig, Hillsboro, Pentagon Park, Kiepersol, Bays Valley, Helicon Heights, Bayswater, Noordhoek, Navalsig and Hilton. The area also includes the small holdings of the Stirling, Rayton and Lilyvale areas. The Woodland Hills Wildlife Estate Development is also located inside this quadrant.

The following proposals have been made

- The Westdene area has been the subject of intense development over the last few years. This is regarded as positive, but concerns have been raised in terms of future developments in the area.
- Second Avenue should be developed as an activity street where mixed uses are encouraged. It needs to link
 with the waterfront, and from here in an easterly direction towards the CBD, as well as in a westerly direction
 along the Zoo to UFS and south to tourism centre. This area should be made pedestrian friendly.
- Park Road should be developed into an activity street from Markgraaff Street to Parfitt.
- Westdene should remain a transitional area but not beyond Brill street in the north. This is an ideal area for small professional firms. It is therefore important to keep the coverage and density low. The area should be promoted for mixed uses, but as a conservation area, should receive special treatment to allow the area to retain its present character. Land management should be evaluated within the prescribes of the Westdene Structure Plan.
- open spaces within the Westdene area such as Victoria Square and directly adjacent natural open spaces in the Dan Pienaar neighbourhood, should be conserved to retain the character of the area. Arboretum will form the green link while the activity street and pedestrian walkways will also be used to provide some greenery to the area
- existing commercial developments along Nelson Mandela Drive should remain and further corridor development be explored. The strengthening of the Mimosa Mall/Brandwag Shopping Centre node should

- only be allowed if it can be proven that the street network will be able to accommodate the resultant additional traffic impact of such intensification;
- Westdene, which is characterised by historical areas and places, be treated as a precinct which can be linked to the historical areas in the CBD;
- the Brandwag area, which is changing character and which is being used for low to medium cost housing, be encouraged to develop further in this way;
- the municipal flats in Brandwag be upgraded. They are located along a major arterial road and do not create a
 good image of the city at present, entering from the West. However, there is still a need for this kind of
 housing facility in this area. Additional medium to high density residential units should be developed in future
 in this area;
- in accordance with the recommendations of recent road planning studies, land reservations be made to accommodate new required road links between Nelson Mandela Drive and Mc Hardy Avenue and between Mc Hardy Avenue and Kellner Street over the vacant land directly to the north of the municipal flats, and over the vacant land on the north-western side of the Furstenburg Road/Nelson Mandela Drive intersection and also over the land currently occupied by the OVV and St Michael's School on the northern side of Kellner Street opposite Mimosa Mall;
- development of guesthouses be encouraged in the area between Brandwag Shopping Centre and Hugo Street.
- Frans Kleynhans Road be upgraded and linkage roads be created with between Frans Kleynhans and Jan Spies
 / Frans Kleynhans and Du Plessis Avenue in Langenhovenpark which should form part of any township development in the area.
- Pertaining to the Langenhovenpark Area no commercial development be encouraged beyond Du Plessis Ave
 on the Dealesville Road except for the demarcated mixed land use area.
- Land use management in the Hilton area will be evaluated within the prescribes of the Hilton Local Structure
 Plan.
- That the rezoning method cannot be applied as a replace a method to encourage densification. Therefore
 rezoning will be restricted to approved township establishments or parallel to alternative agricultural related
 uses.
- A Local Structure Plan be developed for Universitas and Brandwag area's
- That a development plan for Naval Hill be planned this will maximise the tourism value of this asset subject to the preservation of the natural fauna and flora of the area.

Area Beyond the Urban Edge and the Peri-urban area

This area basically refers to the peri-urban and agricultural areas located outside the urban edge. For any development, land use changes, subdivision of land and other related matters within these areas, the policies and strategies as contained in the relevant town planning schemes and/or local structure plans for the areas will apply until such policy is replaced by new policy to this effect.

NOTE: Applications for subdivision of all land within the areas of jurisdiction of the Bainsvlei Structure Plan and the Bloemspruit Density Map will allow for a maximum of 3 subdivisions (including the remaining portion) of the subject property.

The application of Act 70 of 70 should be applied to farm land which does not include small holdings and such applications should be circulated to the MMM. Subdivision of farm land should be discouraged by the MMM.

 The "special use zonings" should be discouraged and cannot include residential densification. A maximum of 2 single residential buildings with outbuildings will be allowed subject to the amendment and approval of the amendment of the SDF.

The Rural Node indicated as mixed land use, will be restricted to the first 100m on both sides of the road alongside the Abrahamskraal road.

5.7.2.2 Botshabelo

The strategic objective pertaining to future development in Botshabelo is redevelop Botshabelo. From this point of view, the following proposals are made in regard development within this urban centre:

- A new node be established to the north of Botshabelo and linked with an effective public transportation system with the existing suburbs in Botshabelo. The Node should further be linked with a dual carriage way road to link with Thaba Nchu CBD and station road.
- the central business area of Botshabelo be cleaned and secured for pedestrians, national tenants be
 encouraged to develop here, the area be properly managed and be allowed to expand onto the undeveloped
 land directly to the north thereof;
- the development of decentralised activity nodes be encouraged through SMME development at blocks E, F, H, N and W in Botshabelo to enable communities to do their shopping closer to their residences;

- the apparent over supply of school sites and public open space be re-evaluated and utilised for residential development before outward expansion of the town is considered;
- that higher density residential development be encouraged on the undeveloped land directly to the south of the central business area and also along the western side of the main road between blocks J and T;
- the development of the open space between blocks F, J, BA, C, T, U and W, through residential infill development, be investigated to encourage integrated development of the town;
- road links be provided between blocks W and F and also between blocks R and N to improve accessibility to the respective areas;
- that mixed land use commercial development and higher density residential development be encouraged on the western side of the main road, directly opposite the central business area; and
- the provision of safe pedestrian crossings across furrows and water channels between communities and local areas in Botshabelo, be investigated.
- That Eskom be engaged to reroute the powerlines along the N8 which inhibits development along N8 Corridor.
- Further development be encouraged towards the North of Botshabelo

5.7.2.3 Thaba Nchu

The following proposals are made regarding the Thaba Nchu area:

- the public transport facilities in the Thaba Nchu central business area be properly managed and a new taxi rank for long distance taxis be developed in Joseph Street;
- development be stimulated along Main Road and Station Road, with mixed land-use (with commercial) and high density development to link with the new node in Botshabelo north
- mixed land use development with commercial be encouraged along all the main roads surrounding the central business area and also on both sides of Station Road in the vicinity of the railway station;
- the road between the N8 route and the Selosesha industrial area be upgraded to maximise access towards this area and the Thaba Nchu railway station;
- infill residential development be encouraged on undeveloped land within the urban edge to address the
 current distorted planning structure of the town and to maximise intensification and infill planning before
 expansion of the town should be considered;
- the provision of safe pedestrian crossings across furrows and water channels between communities and local areas in Thaba Nchu, be investigated;
- planning investigations be done to improve the distorted planning structure of Thaba Nchu extensions 19 and
 20.

- Urban Renewal Projects be planned to improve esthetical image of Thaba Nchu in the areas of Morokka Extention 16 and 19, Thaba Nchu Ext 22, Mokwena Extension 20, Ratlou Extention 18, Flenter Extention 21, Ratau Extention 16.
- CBD Upgrading Projects be conducted and historical sites be preserved.
- Develop a Regional Cultural Village in Thaba Nchu
- Redevelop the Thaba Nchu Airport

5.8 Summary of the SDF Programme

Based on what has been discussed so far, the overall objective for the SDF is:

By 2016 the legacy of spatial distortions in Mangaung is diminishing and growth is occurring in a way that is sustainable and integrated spatially.

The key targets for this are:

| Indicator | Proposed 2013/ 2014 target |
|--|---|
| | |
| | |
| Amount of investment per m² of floor area for new | 10 000 m² |
| industrial and commercial developments in areas | |
| demarcated in the SDF for this purpose | |
| | |
| Average travel times for people in employment | Same in Bloemfontein |
| | 5 % decrease between the urban centres |
| Percentage of public investment in public | Within 5% of previous financial years expenditure |
| environment, amenities and facilities in historically | |
| black areas | |
| | |
| Average improvement of HDIs access (availability, time | 60% of HDIs are satisfied with level of access to daily |
| and distance) to daily goods and services | goods and services |
| | |

| Indicator | Proposed 2013/ 2014 target |
|---|----------------------------|
| Amount of investment per m² of floor area for new | 10 000 m² |
| industrial and commercial developments in areas | |
| demarcated in the SDF for this purpose | |
| | |

The strategies for achieving the targets are:

| Identifier | Proposed strategies | Target for 2013/2016 |
|------------|---|--|
| SDF 1 | Improve urban intensification, densification and infill to contain sprawl in Bloemfontein | 5% increase in residential density within the urban edge No township establishment recommended for approval beyond urban edge. Densification in the peri-urban area should be discouraged and rezoning to business be restricted to existing mixed land use areas. |
| SDF 2 | Improve urban integration to redress spatial imbalances of the past | Plan and Development of the affordable programme should be effected in the areas earmarked ie Vista Park 2 and 3, Hillside, Cecelia , Brandkop 702, Brandkop Race Track and Pellisier. All additional transportation linkages needed to give access across the historic buffer strips running north-south and east-west are identified and technically modelled Develop precinct plans along De Wetsdorp Road and Meadows Road to stimulate economic development 1000 formal job opportunities created in close proximity to historically disadvantaged areas All additional transportation linkages needed to give access across the historic buffer strips running north-south and east-west are |

| Identifier | Proposed strategies | Target for 2013/2016 |
|------------|--|---|
| | | Develop an Urban Renewal Programme for Mangaung Townships, Heidedal (Ashbury). Redevelop and plan parts of Thaba Nchu, Bothabelo where required. |
| SDF 3 | Promotion of economic opportunities in strategic locations for sustainable development | An implementation programme for the completion of the outer ring road is complete including agreement reached with stakeholders to co-ordinate the N8 development with outer ring road 10 000 m² gross leasable area developed for commercial and industrial use in areas identified for growth within the urban edge. |
| | | 1500 higher density residential units created in the 3 CBD's 1000 formal job opportunities created in close proximity to historically disadvantaged areas |
| SDF 4 | Strengthen links between urban, town and rural livelihoods | A plan and implementation programme for development to strengthen urban-rural links is agreed by all affected parties An urban-rural strategy and implementation programme is agreed by all affected parties |
| SDF 5 | Consolidate, contain and maintain Botshabelo | Development frameworks and implementation programmes for the 5 decentralised development nodes in Botshabelo is finalised Management strategies for trading areas in the industrial zone and the central business area is complete and ready for implementation All necessary planning actions for implementation of north-south and east-west access routes between sections F & W and S & N respectively is complete and ready for implementation Formal township establishment for regularisation of informal settlements is complete |

| Identifier | Proposed strategies | Target for 2013/2016 |
|------------|---|--|
| | | An investigation and recommendations for infill development in central open space and higher density residential development around the central business area is finalised and ready for implementation |
| SDF 6 | Reinforce Thaba Nchu as a rural market town supportive of rural development | A final comprehensive development and transport plan for the central business area is complete and ready for implementation A final economic development plan for livestock activities and beneficiation, mixed land use development related to the N8, and tourism related to historic and environmental sites are complete and ready for implementation A final upgrade plan for extensions 19 & 20 is complete and ready for implementation |
| SDF 7 | Establish accountable and pro-active management of change in land use and to the development patterns | Final policies for social amenities, defining the urban edge, contributions to provision of infrastructure for private developments are approved for implementation Final Local Area Plans for 3 pilot areas are complete and the strategy and implementation programme is approved for roll-out to other relevant areas in MLM Final policy for defining the urban edge, the approach and application is approved A land audit of well located public owned land and buildings in MLM is complete 10 monthly SDF Management Forum meetings held and actions for co-ordination and facilitation documented and monitored The capacity of the Land Use Violations Inspectorate unit is increased by 6 people |

| Identifier | Proposed strategies | Target for 2013/2016 |
|------------|---------------------|--|
| | | The transfer of all selected land and /or buildings owned by previous and other authorities to MLM in Thaba Nchu is complete |

The following table summarises the projects/activities/services per strategy

| Identifier | Strategy and project/activity/service to achieve this |
|------------|--|
| SDF 1 | To improve urban intensification, densification and infill to contain sprawl in Bloemfontein |
| SDF 1.1 | Identify main public transport routes that can serve as mixed land use activity spines with higher densities for a variety of income groups. |
| SDF 1.2 | Develop settlement and social housing options and locate sites for development, to accommodate lower income groups including weekly and other migrants working in Bloemfontein |
| SDF 1.3 | Plan more convenient public transport drop-off points in the CBD with sufficient space for accommodating pedestrians walking and hawkers trading. |
| SDF 1.4 | Develop an office park at the current Parks Offices and relocate Parks to a suitable area along the N8 |
| SDF 1.5 | Investigate alternative locations for middle and upper income development inside the urban edge. |
| SDF 1.6 | Convert vacant and underutilised buildings in the CBD to appropriate accommodation for commercial and residential use in the Urban Development Zone |
| SDF 1.7 | Plan and Develop various Nodes along the N8, with a priority on Airport Node |
| SDF 1.8 | Reinforce the Moshoeshoe activity strip to more efficiently accommodate safe pedestrian, social and commercial activity |
| SDF 1.9 | Link the Loch Logan Waterfront precinct eastwards into the CBD and southwards into Westdene |

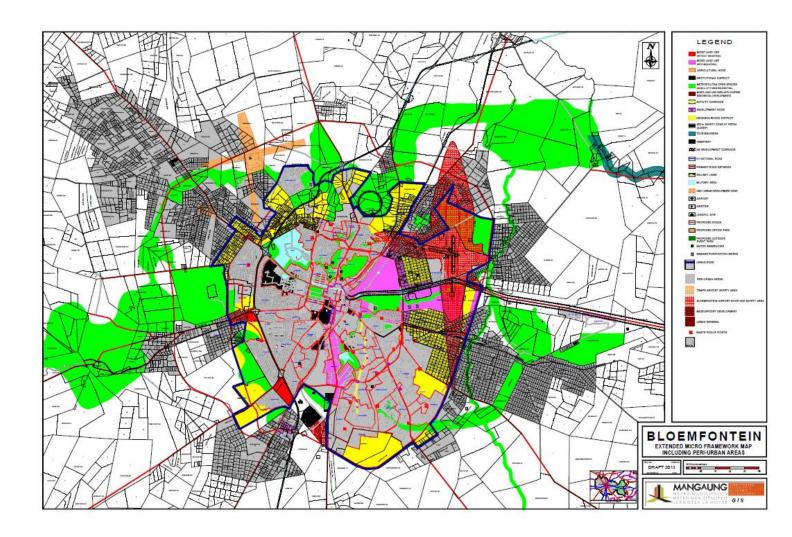

| Identifier | Strategy and project/activity/service to achieve this |
|------------|---|
| SDF 2 | To improve urban integration to redress spatial imbalances of the past |
| SDF 2.1 | Upgrade the environmental quality of the public spaces in the south-eastern area |
| SDF 2.2 | Compile an Integrated Transport Plan: |
| SDF 2.3 | Upgrade traffic signage and erect street name signs in entire MLM area |
| SDF 2.4 | Prepare development plans for Hillside 2830, Cecilia, Brandkop Raceway area, Hillside View |
| | (Bloemanda), Vista Park 3 and Extension of Ehrlich Park |
| SDF 3 | Promotion of economic opportunities in strategic locations for sustainable development |
| SDF3.1 | Reinforce the Moshoeshoe activity strip to more efficiently accommodate safe pedestrian, |
| | social and commercial activity |
| SDF3.2 | Prepare a feasibility study for the area along the N8 between the east of the CBD and the |
| | incomplete outer ring road to intensify utilisation of the undeveloped and underdeveloped |
| | area for mixed use development |
| SDF 3.3 | Engage with provincial government to complete the outer ring road with interchanges at |
| | the existing and proposed intersections. This is required between the Maselspoort and |
| | Dewetsdorp roads to improve access to the proposed mixed-use corridor, industrial, |
| | residential and environmental areas along the N8 and between the outer ring road and the |
| | CBD |
| SDF 3.4 | Convert vacant and underutilised buildings in the CBD to appropriate accommodation for |
| | commercial and residential use in the Urban Development Zone as part of the CBD |
| | Development Master Plan |
| SDF 3.5 | Investigate the feasibility to extend the Bloemfontein CBD eastwards across the north- |
| | south railway line and N8 entrance to the city to integrate the station, Buitesig and areas |
| | immediately surrounding it and Mangaung township beyond. Redevelop the station and |
| | make it more accessible. |
| SDF 3.6 | Extend development at strategic locations along the N1, at the N8/N1 intersection, at the |
| | Jagersfontein/N1 intersection and at the N1/outer ring road (South) intersection to support |

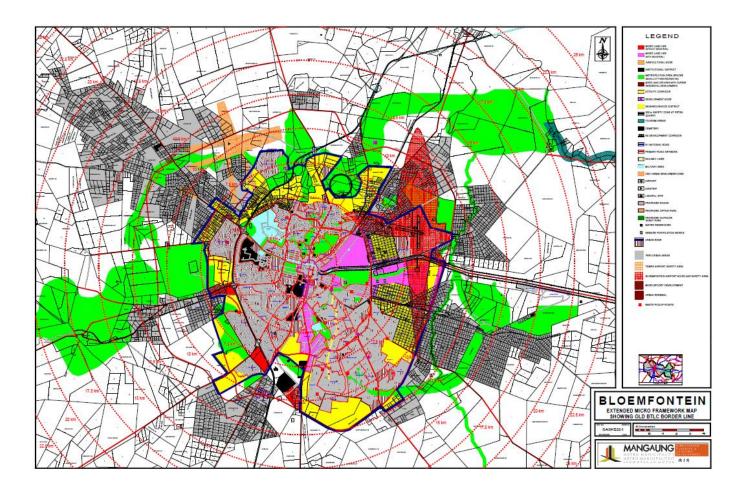

| Identifier | Strategy and project/activity/service to achieve this |
|------------|--|
| | commercial and light industrial growth through supporting rezoning applications |
| SDF 3.7 | Encourage consolidation of the Moshoeshoe activity corridor at the proposed nodes to |
| | stimulate economic activity within Mangaung township through supporting rezoning |
| | applications |
| SDF 4 | Strengthen links between urban, town and rural livelihoods |
| SDF 4.1 | Improve spatial planning traffic flow and public transport facilities at the central taxi and bus rank |
| SDF 4.2 | Prepare a feasibility study, plan and implementation programme for the area along the N8 |
| | between Bloemfontein, Botshabelo, Thaba Nchu and the rural settlements, to; improve |
| | transportation efficiencies, safety and affordability on the N8 and between Thaba Nchu and |
| | rural settlements, intensify the land use on land bordering the N8, reinforce nodal |
| | development points in close vicinity to the N8, including at entrance routes to Thaba Nchu |
| | & Botshabelo, and to create easier and safer pedestrian access across the N8 between |
| | Botshabelo and Thaba Nchu |
| SDF 4.3 | Develop an urban-rural strategy to support rural development, links between the rural |
| | settlements and the urban centres and consolidating the provision of social services, |
| | facilities, livelihoods strategies and access to limited resources |
| | (See SDF 4.1 above) |
| SDF 5 | Redevelop Botshabelo |
| SDF 5.1 | Develop a new Node to the north of Botshabelo and integrate with Thaba Nchu |
| SDF 5.2 | Develop an effective public transport system to link the new node with existing suburbs in |
| | Botshabelo |
| SDF 5.3 | Plan, design stormwater channels for Botshabelo |
| SDF 5.4 | Prepare a Master Plan for an 'improvement district' to re-organise the central business |
| | area and to manage the pollution and conflict of uses between formal & informal traders, |
| | pedestrians and vehicles |
| | |

| Identifier | Strategy and project/activity/service to achieve this |
|------------|--|
| SDF 5.5 | Develop a Tourism Node at Rustfontein Dam for recreation and tourism and build a tarred road as a link with the N8. |
| SDF 5.6 | Upgrade roads in clay areas severely affected by wet conditions, open storm water channels and pit latrines |
| SDF 5.7 | Provide lighting to public areas which are consistently used by pedestrians, especially at the bus and taxi stops and bridges |
| SDF 5.8 | Investigate the establishment of a fresh produce market in the proposed node on the main road, south of the business district |
| SDF 5.9 | Prepare a spatial & economic feasibility study for SMME development along the N8 in the Botshabelo area. |
| SDF 5.10 | Develop Master Plan to encourage higher density residential development on the undeveloped land directly to the south of the central business area and along the western side of the main road between sections J & T |
| SDF 5.11 | Formalise the current informal settlements and prioritize development of human settlements towards new node and along activity corridor towards Thaba Nchu |
| SDF 5.12 | Develop Master Plan for development along Activity Corridor towards Thaba Nchu |
| SDF 5.13 | Develop Regional Power Station between Thaba Nchu and Botshabelo |
| SDF 5.14 | Provide names to suburbs and streetnames to effect the functioning of emergency services |
| SDF 6 | Redevelop Thaba Nchu and Botshabelo as an sustainable independant economic node |
| SDF 6.1 | Prepare a Master Plan: Develop an activity corridor along station road and link with new node in Botshabelo for an 'improvement district' to regenerate the underutilised land and buildings under the authority of MMM, parastatals/development agencies and the private sector. Develop Urban Renewal Strategies for priority areas in Thaba Nchu |
| SDF 6.2 | Prepare a traffic management plan to improve traffic flow and bus and taxi rank facilities in the central business area and consider the separation of minibus taxi facilities for local and |

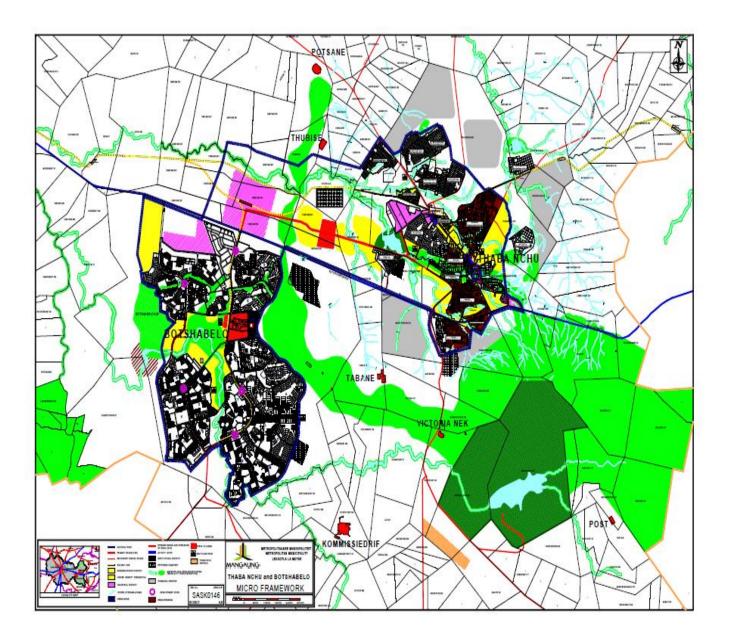

| Identifier | Strategy and project/activity/service to achieve this |
|------------|---|
| | long distance operations in the central business area as part of the Integrated Transport Plan |
| SDF 6.3 | Define a strategy to consolidate and support livestock activities and the beneficiation of related products |
| SDF 6.4 | Intensify use of land along the N8 around the entrance roads to Thaba Nchu for commercial and industrial mixed land use development |
| SDF 6.5 | Plan dual carriage road to link new Botshabelo Node with Thaba Nchu . Prioritize settlements development in areas to integrate Botshabelo and Thaba Nchu. |
| SDF 6.6 | Prepare a strategy to consolidate and support the eco-tourism opportunities of historic and environmental sites that are underutilised |
| SDF 6.7 | Identify additional cemetery sites that are closer to Thaba Nchu |
| SDF 6.8 | Provide public lighting to public areas which are consistently used by pedestrians |
| SDF 6.9 | Conduct planning investigation to upgrade the informal planning in extensions 19 and 20 |
| SDF 6.10 | to reinforce and maintain the central business area through land use management support for infill, densification and intensification of land use in the area and along Main, Excelsior and Station Roads for an 'improvement district' to regenerate the underutilised land and buildings under the authority of MMM, parastatals/development agencies and the private sector. Develop Urban Renewal strategies for Flenter, Mokwena areas |
| SDF 7 | To establish accountable and pro-active management of change in land use and to development patterns |
| SDF 7.1 | Develop a social amenities policy for township establishment for sustainable neighbourhood settlement |
| SDF 7.2 | Establish an SDF management forum to co-ordinate the implementation of the SDF projects amongst service units, and monitor progress |

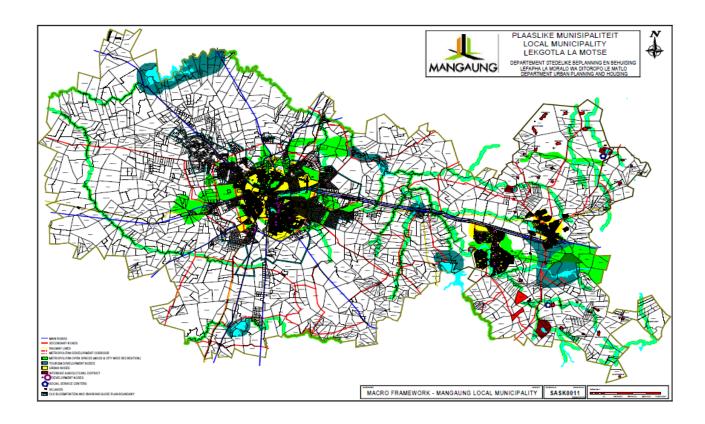

| Identifier | Strategy and project/activity/service to achieve this |
|------------|---|
| SDF 7.3 | Develop an Infrastructure Development Master Plan and sustainable financing strategy for |
| | MMM to co-ordinate the provision of support services and infrastructure to accommodate |
| | change in land use where suitable |
| SDF 7.4 | Transfer land to MMM that is held by the previous authorities in Thaba Nchu |
| SDF 7.5 | Prepare a land audit of well located public owned land to support project location and |
| | strategy of intensification, densification and infill in Bloemfontein |
| SDF 7.6 | Prepare 3 Local Area Plans initially to pilot methodology and develop roll-out strategy for |
| | areas under stress and those that hold significant development potential for the future, |
| SDF 7.7 | Regulate shebeens and taverns and identify more suitable locations which are less |
| | disturbing to residents and negotiate their relocation as part of Land Use Management |
| | System |
| SDF 7.8 | Prepare a policy to define the urban edge for Bloemfontein, Botshabelo and Thaba Nchu |
| SDF 7.9 | Develop a policy to define MMM's and developers' investment contributions towards the |
| | provision of bulk and local infrastructure |

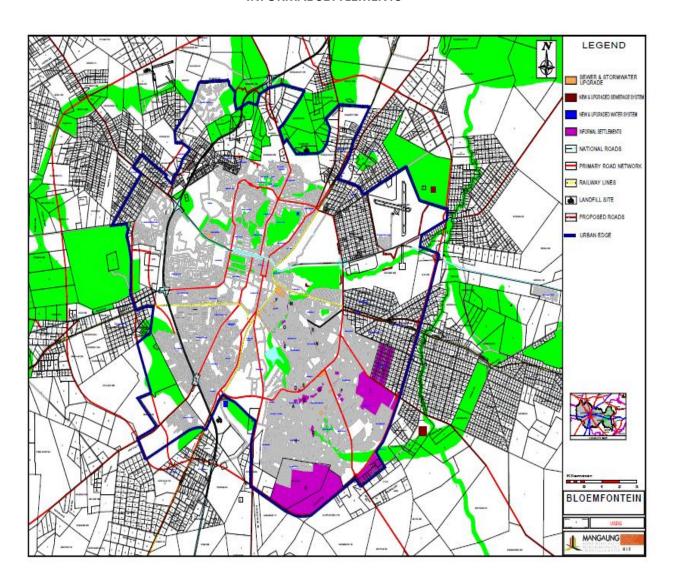

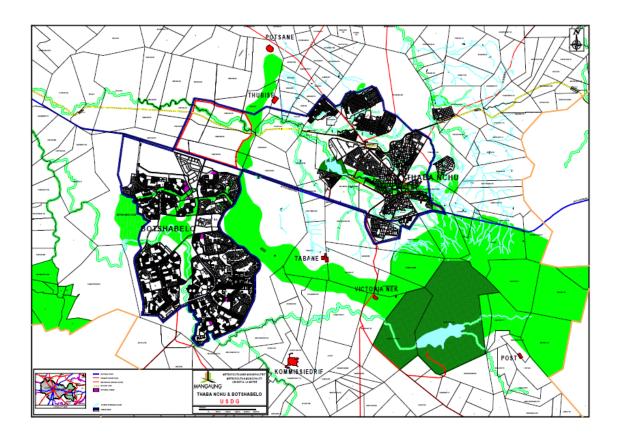

THE SEVEN LAND PARCELS DEVELOPMENT PROJECT

INFORMAL SETTLEMENTS

CHAPTER 6 GOVERNANCE AND MANAGEMENT

6. INSTITUTIONAL OVERVIEW

6.1. Management structure

The municipal administration is divided into many different departments and sub-departments, all of which deliver specific services. Some sub-departments focus on service delivery, whilst others are more concerned with internal affairs, such as the Corporate Services.

The administration of the Municipality is based on seven departments, as well as an executive support which are vested in one Deputy Executive Director in the Office of the City Manager, namely:, Performance Monitoring and Evaluation.

The Mangaung Metropolitan Municipality has 97 councillors all together with 49 of them being ward councillors, In all the wards there are functional ward committees. The council is comprised of the ANC with 65 councillors, DA with 26 councillors, COPE has 3 councillors and APC has 1 councillor. Since becoming a Metropolitan Municipality which meant that the district Municipality Motheo has ceased to exist and that its staff became Mangaung staff that means that the municipality is currently undergoing a staff placement process that will see all its staff being placed in positions that suit their skills and experiences but also those positions that will make the organisation work to its optimal.

The Municipality has all section 79 and 80 committees including audit committees (MPAC), all these committees are functional and do their work in context of relevant legislative parameters

Audit Committee

The Mangaung Metropolitan Municipality has an Audit Committee in terms of section 166 of the MFMA, which is made up of five members. The Audit Committee is an independent body that advises the Executive Mayor, other office bearers and the Municipal Manager. The Audit Committee through its chairperson reports to Council.

Oversight Committee

The Oversight Committee is elected from members of Council. It is composed proportionally out of members of the different political parties represented on Council and reports to Council through its chairperson. At the base of oversight and reporting arrangements for Mangaung, is the integrated IDP that outlines the short- to long-term,

big and bold objectives and outcomes. The IDP contextually informs the planning approach, business plans, programmes and projects.

Internal audit

The Internal Audit plays an internal performance auditing role, which includes monitoring the functioning of the PMS and compliance to legislative requirements. The internal audit role also involves assistance in validating the evidence provided by Heads of Directorates in support of their performance achievements.

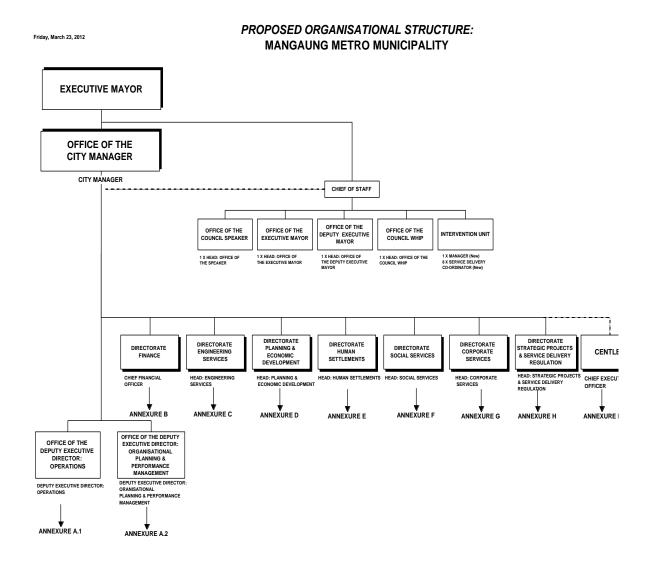

Executive Mayor and Mayoral Committee

They manage the development of the municipal PMS and oversee the performance of the City Manager and Heads of Department.

Council and Section 79 Committees

They play an oversight role and consider reports from the Mayoral Committee on its functions on different portfolios, and how this impacts on the overall objectives and performance of the Municipality.

Figure 6.1.1: Organisational Structure for Mangaung Metropolitan Municipality

CHAPTER 7. PERFORMANCE MANAGEMENT SYSTEM

7.1 Introduction

The Mangaung Performance Management System (PMS) is the primary mechanism to monitor, review and improve the implementation of the IDP, and to gauge the progress made in achieving the objectives set out in the IDP. It links the municipality-wide to individual level of performance management. Furthermore, the IDP informs the development of key areas of performance and targets across all performance levels. This ensures the appropriate alignment between organisational and individual performance. Performance management forms part of a strategic management approach to ensure integration with the municipal strategy, planning and budgeting. This process enables the Municipality to improve planning and budgeting, effectively monitor and measure performance, and transparently and convincingly report on achievements.

Legislation that governs performance management in local government includes the Municipal Systems Act, 32 of 2000 (MSA); the Municipal Planning and Performance Management Regulations, 2001 (MPPMR); the Municipal Finance Management Act, 53 of 2003 (MFMA); the Municipal Performance Regulations for Municipal Managers and Managers directly accountable to Municipal Managers, 2006.

7.2 The Municipal Systems Act, (Act 32 of 2000)

The Municipal Systems Act requires all municipalities to promote a culture of performance review through the establishment of a PMS. The PMS must set out key performance indicators (KPI) and targets, as well as monitor, review and report on municipal performance, based on indicators linked to the IDP, including the national indicators prescribed by the Minister responsible for Local Government.

7.3 The Municipal Finance Management Act, (Act 53 of 2003)

The MFMA requires the Mayor to ensure that the performance agreements of the section 56 employees comply with the requirements of the MSA to promote sound financial management and linked to measurable performance objectives approved with the budget and included in the SDBIP, which outlines the strategic scorecard of the municipality. Additionally, the Act sets out reporting obligations of the municipality on the budget and IDP implementation.

The Municipal Planning and Performance Management Regulations, 2001.

The Municipal Planning and Performance Management Regulations require that a municipality ensures that the PMS complies with the requirements of the MSA, demonstrates the operation and management of the PMS, clarifies roles and responsibilities, as well as ensures alignment of employee performance management and the IDP processes.

7.3.1 The Municipal Performance Regulations for municipal managers and managers directly accountable to municipal managers, 2006.

In August 2006, the Department of Provincial and Local Government (DPLG) promulgated regulations for Section 56 employees, setting out how the performance of municipal managers and their Heads of Department must be planned, reviewed, improved and rewarded. The regulations make provision for the conclusion of written employment contracts, performance agreements and personal development plans.

The Municipality's process of establishing and developing the PMS ensures integration between strategic planning and performance management, by linking the planned IDP priorities and objectives to the indicators and targets used to measure performance. In addition, the process promotes alignment between planned organizational performance, as reflected in the IDP and organisational scorecard and individual performance as contained in the individual performance agreements.

7.4 Implementation of the PMS in Mangaung

The PMS in the Municipality is implemented in a manner that reflects the relationship of organisational to individual performance. At the municipal level, the PMS incorporates the IDP and Sector Plans, and these are translated into the SDBIP which is the municipal scorecard. In terms of legislative prescripts the City Manager is the custodian of the municipal scorecard and agrees with the Executive Mayor on the delivery aspects of the scorecard. The Audit Committee reviews the performance of the City Manager in implementing the organisational or City scorecard.

Organisational performance is monitored through assessment of progress on the implementation of the SDBIP (the municipal scorecard) and reported on SDBIP through quarterly reports. The quarterly SDBIP reports are consolidated to inform the municipality's annual performance report and ultimately the Annual Report for submission to the Auditor-General, the MEC for Local Government and other relevant stakeholders as legislated by the MSA. At the departmental level, all business plans serve as a linkage between organisational and individual performance. Effectively, the sector plans form the foundation for the development of business plans which in turn informs the development of the individual Head of Departments' (Section 56 Employees') scorecards, which are an endorsement of the City Manager's scorecard. All the Section 56 employees sign performance agreements for the financial year as required by the MSA. The signing of performance agreements and the development of scorecards is an element of performance planning, which is part of the Municipality's PMS cycle that covers performance planning, reviewing and rewarding stages.

7.5 Managing PMS in Mangaung

7.5.1 Audit Committee

The Mangaung Local Municipality has established an Audit Committee in terms of section 166 of the MFMA, which is made up of five members. The Audit Committee is an independent body that advises the Executive Mayor, other office bearers and the Municipal Manager. The Audit Committee through its chairperson reports to Council.

7.5.2 Performance Management Panel

The City has established a Performance Management Panel in lieu of a Performance Evaluation Committee as provided for in statutes as an advisory body to the Executive Mayor and the City Manager to assist the process of evaluating the performance of the City , the City Manager and Head of Department and provide advice on the future development trajectories of the City.

The Panel will be constituted by experts that have garnererd extensive experience in government and will be operational during the next financial year 92013/2014

7.5.3 Oversight Committee

The Oversight Committee is elected from members of Council. It is composed proportionally out of members of the different political parties represented on Council and reports to Council through its chairperson. At the base of oversight and reporting arrangements for Mangaung, is the integrated IDP that outlines the short- to long-term, big and bold objectives and outcomes. The IDP contextually informs the planning approach, business plans, programmes and projects.

7.5.4 Internal audit

The Internal Audit plays an internal performance auditing role, which includes monitoring the functioning of the PMS and compliance to legislative requirements. The internal audit role also involves assistance in validating the evidence provided by Heads of Directorates in support of their performance achievements.

7.5.5 Executive Mayor and Mayoral Committee

They manage the development of the municipal PMS and oversee the performance of the City Manager and Heads of Department.

7.5.6 Council and Section 79 Committees

They play an oversight role and consider reports from the Mayoral Committee on its functions on different portfolios, and how this impacts on the overall objectives and performance of the Municipality.

7.5.7 Community

Community members play a role in the PMS through the annual IDP consultation processes, which are managed by the Office of the Speaker, working in close conjunction with the IDP and Organisational Performance Unit. MMM also encourages communities to comment on draft Annual Reports.

7.6 Conclusion

The Municipality will continuously review its PMS to keep with the evolving nature of performance management. The current performance management policy will as a result need to be updated to comply with legislative requirements and the alignment to the PMS across the entire Municipality.

CHAPTER 8: MANGAUNG METROPOLITAN SECTOR STRATEGIES

Section 26 of the Local Government Municipal System Act on Core components of the Integrated Development Plan provides for the development of a suite of sectoral plans to enhance the IDP. At a minimum the municipality is expected to develop the following sectoral plans as core components of the IDP. This document flags 8 sector plans but does not discuss the spatial development framework in this chapter as it is discussed at length in Chapter 5 and also the budget as it is also discussed at length in Chapter 10. The following are MMM sector plans

- Spatial Development Plan;
- Disaster Management Plan;
- Financial Plan; (Budget)
- Integrated Human Settlement Plan;
- Integrated Waste Management Plan;
- Local Economic Development Strategy;
- Water Services Development Plan;
- Five Year Strategic Management Plan for the Reduction of Non-Revenue Water.

This chapter only provides a snapshot of these sector plans (*detailed sector plans as approved by council are hereto annexed*).

8.1 Integrated human settlement Plan

The Constitution of the Republic of South Africa (Act 108 of 1996) has given municipalities developmental responsibilities. Sections 152 and 153 of the Constitution provides that local government is responsible for the provision of services to communities in a sustainable manner and must structure and manage its administration, and budgeting and planning processes to give priority to the basic needs of the community.

The Municipality undertook a process to develop the Housing Sector Plan which was adopted by Council in 2004. The 2012/2012 – 2016/2017 Integrated Human Settlement Plan is actually a complete review of the current Housing Sector Plan of 2004 and takes into cognisance all the current legislative imperatives that are relevant in the sector. The main aim of the Mangaung Metropolitan Municipality (MMM) Integrated Human Settlement Plan (IHSP) is to provide a strategic direction for future human settlements developments within the municipal area of jurisdiction.

The plan should provide a strategic context in relation to the human settlements needs of the Mangaung citizens in line with the national and provincial legislation as well as all the national housing programmes.

This plan is guided by the National Development Plan, 2011; the Comprehensive Plan for the Development of Integrated Human Settlements, 2004 and the Guidelines for the Housing Chapters of Integrated Residential Plans as presented in Part 2 of the National Housing Code 2009.

Objectives of Mangaung Metro Integrated Human Settlements Plan

The objectives of the Mangaung Metro Integrated Human Settlements Plan (IHSP) are as follows:

- g) To reverse the spatial effects of apartheid;
- h) To ensure the development of integrated human settlements and shorten travel distances;
- i) To redress land ownership disparities;
- j) To guide the prioritisation of human settlements projects;
- k) To ensure focus of human settlements in the Metro's Integrated Development Plan

8.2 Local Economic Development Strategy

The purpose of this strategy is to investigate the options and opportunities available to broaden the local economic base of the Mangaung Metropolitan Municipality in order to promote the creation of employment opportunities and the resultant spin-off effects throughout the local economy.

This report forms part of the LED process and is one of the stepping-stones toward understanding economic development within Mangaung. It is important to understand that Mangaung hosts poverty-stricken communities that are currently experiencing high levels of unemployment. It is imperative to take action by promoting value-adding activities in the secondary and tertiary sectors.

An important developmental principle underlying economic development is the broadening of the local economic base. This includes the introduction of new activities to Mangaung (e.g. introducing new industrial activities), exploiting latent resources identified through beneficiation, and the consequent establishment of SMMEs.

Local Economic Development furthermore strives to enhance the multiplier or trickle-down effect that Mangaung stands to gain from the successful implementation of the strategic outcomes outlined in the presentation. Multipliers refer to the synergy impact, achieved by creating new jobs and businesses, as well as improving the quality of existing jobs and expanding existing businesses. The purpose of this strategy further is to provide an overview of the economic and socio economic indicators in Mangaung in relation with the Free State and South

Africa. Critical areas of analysis include the manifestation of poverty in the area, the employment structure and analysis of the first and second economies with a perspective on what interventions are required to unlock economic potential in the Municipality.

This becomes the basis of identifying the blockages to and opportunities for development that need to be addressed in development strategies so that the appropriate development path can be determined.

Local economic development (LED) offers local government, the private sector, and local communities the opportunity to work together to improve the local economy. It focuses on enhancing competitiveness, increasing sustainable growth and ensuring that growth is inclusive.

8.3 Integrated Waste Management Plan

Waste Management planning should be contextualised within the framework of national government, provincial government, district municipality and local municipality legal, regulatory and policy frameworks. Development in Mangaung can be described from a waste management perspective as follows:

- Bloemfontein incorporates integrated residential, commercial and industrial development. This area has well
 developed infrastructure with substantial road networks and good access to all points of waste generations
- Botshabelo was established in 1978 as apartheid engineered town for displaced people in the Free State,
 Development is substantially formal with a substantial internal road network providing access to most households.
- Thaba –Nchu has been a home of Tswana people in the Free State for more than 180 years. Thaba- Nchu
 consists of urban area with private land ownership and rural area of both private communal land people living
 in 37 scattered villages. Development is fairly formal with an internal road network providing access to most
 households
- 23% of MMM area is farm land with a further 2% covered in small holdings and as such presents a new challenge to the expanded municipality, the area has basic road infrastructure

8.4 Water Services Development Plan

The MMM is a political economy of space with 2 central features namely the radically based spatial planning and a political economy that meant development for some at the expense of the majority. Such cities were designed to separate races and classes into district segments, poor especially poor black residence were pushed to the boundaries of the city, these areas on the periphery were generally poorly served with urban infrastructure and had very little or no work or social opportunities.

Bloem water supplies the Mangaung Metropolitan Municipality with bulk water, Bloem water also serves neighbouring municipalities with bulk water, this complicates the integrated planning, with ageing infrastructure running at almost at design capacity the MMM need to address the risk of redundancy in supply.

Sustainable surface water is not only some distance away but are also very vulnerable and seasonal, whilst ground water is limited and vary in quality.

8.5 Disaster Management Plan

Disaster Management encompasses a continuous, integrated, multi-sectoral and multi-disciplinary process of planning and implementation measures incorporating strategies for pre disaster risk reduction as well as post disaster recovery, aimed at:

- preventing or reducing the risk of disasters
- mitigating the severity or consequences of disaster
- emergency preparedness
- rapid and effective response to disasters
- post disaster recovery and rehabilitation

It is important to note that these measures should not be regarded as a sequence of separate phases or stages but as a continuous and integrated process with the emphasis shifting according to the relationship between hazards and vulnerabilities, and with development as the continuous thread woven into the fabric of this management concept. A disaster is a progressive or sudden, widespread or localized, natural or human caused occurrence which causes or threatens to cause:

- death, injury or disease
- damage to property, infrastructure or the environment; or
- Disruption of the life of a community; and is of a magnitude that exceeds those affected by the disaster to cope with its effects using only their own resources.

8.6 Five Year Strategic Management Plan for the Reduction of Non-Revenue Water

The Mangaung Metropolitan Municipality (MMM) recognised the need to focus on the reduction of Non-Revenue Water (NRW) as part of its overall Water Conservation/Water Demand Management strategy as well as its contribution towards the objectives of the National Water Conservation/Water Demand Management (WC/WDM) initiatives currently underway throughout the country in support of the protection of a scarce water supply resource. Non-Revenue Water is defined as the difference between System Input Volume (SIV) - determined as the volume of water produced/bought for supply to a distribution system - and the total Billed Authorised Consumption (BAC). This Master Plan is concerned with volumes only – revenue collection and debt analysis did not form part of the scope of this appointment. It was therefore decided to prepare a strategic Non-Revenue Water Reduction Master Plan that covered a 5-year outlook in terms of minimizing water losses through the Municipality's area of supply. The objectives of this Master Plan were as follows:

- Determine the baseline situation in terms of water balances for each supply system in accordance with international and national best practice;
- Identify areas of possible NRW reduction, by water balance component and per supply system, prioritise these
 in order of impact and prepare a consolidated NRW Reduction Intervention programme;
- Establish targets in terms of NRW by volume, supported by Key Performance Indicators and budget/funding requirements;
- Address the internal requirements necessary for the successful implementation of a NRW reduction programme in terms of resources, systems and critical success factors; and
- Identify short-term problems that are being experienced with the Municipality's billing database and determine any necessary corrective actions.

PART D: INTEGRATION

CHAPTER 9: TRACKING GOVERNMENT FOOTPRINT IN MANGAUNG

Corporative governance dictates' that the 3 spheres of government must work in collaboration and corporation to bring service delivery to its citizens, it is also noteworthy to mention that local government is not always better placed to be able to respond to community needs in their totality hence it is necessary to collaborate with sister departments both at provincial and national level. There are many other aspects of governance that are not a competency of local government like Education which must be responded to by provincial and national government but because these interventions have and are implemented in a municipal space it is important that they find reflection in a municipal integrated development plan

9.1 HEALTH

| Name of | Project Name | Locality/Ward | Budgeted | Targeted Date | |

PART E: FINANCIAL PLAN

CHAPTER 10:

MEDIUM-TERM REVIEW FRAME WORK

SUMMARY OF THE MEDIUM TERM FINANCIAL OUTLOOK

The municipality is in terms of Section 24 of the Municipal Finance Management Act, 56 of 2003, the annual

budget of the municipality's total revenue is R 6,193,762,852, operating expenditure of R 5,368,472,823 and

capital expenditure of R 865,988,708 for the financial year 2013/14.

The operating revenue budget is projected at R 6,193.7 billion in 2013/14, representing an increase in revenue of R

637,74 million (11.48%) on the 2012/13 Adjustment Budget of R 5,556 million. The allocation for the outer two

years of the MTREF period is R 6,994,8 billion and R 7,629.14 billion respectively.

b. MEDIUM TERM BUDGET FOR 2013/14 TO 2015/16

The MFMA requires the mayor of a municipality to provide general political guidance over the budget process and

to priorities that must guide the preparation of a budget. The new National Treasury Budget Regulations gives

further effect to this by prescribing that the mayor of a municipality must establish a Budget Steering Committee

to assist in discharging the mayor's responsibility set out in Section 53 of the Municipality Financial Management

Act. Compilation of the Municipality's annual budget commenced with the presentation of the budget parameters

to the Budget Committee, composed of executive political representatives. The committee's terms of reference

include the following:

To provide guidance on budget principles

To consider draft budget operational and capital parameters

To review directorates' budget inputs via budget hearings after tabling of the draft budget, and

To review and advice on the outcome of the MTREF

The Mangaung Metropolitan Municipality's IDP outlined the key areas for development in the short to medium

term. These are commitments that the Metropolitan Council will take forward. By and large the Mayoral

Committee played a significant role in shaping these priorities and it was necessary to link them to the national,

provincial, district and sector departments priorities and plans.

Council has set the following Mayoral Priorities:

Page | 306

- Poverty reduction, job creation, rural and economic development
- Financial sustainability
- Spatial development and the built environment
- Eradication of bucket system, VIP toilets in Mangaung, Botshabelo and Thaba Nchu, roads, ageing infrastructure, focus on the basics
- Human settlements
- Public transport
- Environment management and climate change
- Social and community services
- Good governance

2013/14 MTREF Budget continues to address the following IDP interventions that are informed by the guidelines of Output 8. These emphasise the development in an integrated manner.

10.1 Operating Revenue

The operating revenue budget is projected at R 6,193.7 billion in 2013/14, representing an increase in revenue of R 637,74 million (11.48%) on the 2012/13 Adjustment Budget of R 5,556 million. The allocation for the outer two years of the MTREF period is R 6,994,8 billion and R 7,629.14 billion respectively. Revenue generated from rates and services charges forms a significant part of the revenue basket of the city. Rates and services charges constitutes 63.61% (2012/13 - 54.63%) of the budgeted revenue (excluding capital grants and transfers) in the 2013/14 budget year.

10.3 Capital Budget

The capital budget has declined by R 129.91 million for the 2013/14 financial year to R 865,99 million as compared to the approved Adjustment Budget of R 995,9 million for the 2012/13 period. The projected capital expenditure budget for the two outer years of the MTREF period has been set at R 955,25 million and R 1,019 million respectively.

10.4 Funding of the Capital Budget

The budget is funded mainly out of Government grants and subsidies, external loans and internally generated funds (out of surplus funds). The Urban Settlement Grant (USDG) remains the biggest source of the government grants and subsidies. Contribution of the grant to the capital budget basket averages 69.70% over the MTREF period.

| | Budget Year 2013/14 | Budget Year 2014/15 | Budget Year 2015/16 |
|----------------------------------|------------------------|------------------------|---------------------|
| External Loans | 36,684,148 | 35,711,597 | - |

Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

Table A2 gives an overview of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enable the National Treasury to compile 'whole of government' reports.

Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

Table A3 gives an overview of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organisational structure of the municipality. This means it is possible to present the operating surplus or deficit of a vote

Table A6 - Budgeted Financial Position

Table A6 is consistent with international standards of good financial management practice and improves understanding of the councillors and management of the impact of the budget on the statement of financial position (balance sheet). This format of presenting the statement of financial position is aligned to GRAP 1, which is generally aligned to the international version which presents Assets fewer liabilities as 'accounting' Community Wealth. The order of items which each group illustrates items is order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.

Table A7 - Budgeted Cash Flow Statement

The budgeted cash flow statement is the first measurement in determining if the budget is funded. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget

Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of the MFMA Circular 42 - Funding a Municipal Budget. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at the year end and secondly reconciling the available funding to the liabilities/commitments that exist. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be 'funded'.

10.5 Financial Sustainability Programme

The Municipality has prepared a financial sustainability programme to ensure a healthy trajectory for the municipality in terms of development and the financial viability of the Municipality. The overall objective is "to ensure that the organisation's finances are managed in a sustainable manner and meet the needs of the community".

The budget for the 2013/14 to 2015/16 financial years was prepared on the assumption that there will be minor changes to the Council's priorities as contained in the current IDP document. It is also prepared within the context of approved Council policies and legislative framework as promulgated by the National Parliament. The Council's approach of using infrastructural development programmes to attain the national development objectives of extending delivery of basic services to all, addressing inherit disparities within our community, job creation, skills development and black economic empowerment will be maintained.

The following policies that govern the municipality's budget, compilation and/or implementation thereof:

- Supply Chain Management Policy
- Banking and Investments Policy
- Land Disposal Policy
- Indigent Policy
- Tariffs Policy
- Asset Management Policy
- Leave Policy
- Pre-payment Water Meter Policy
- Credit Control and Debt Collection Policy
- Water Estimates Policy
- Funding and Reserves Policy
- Borrowing Policy
- Capital Infrastructure Investment Policy
- Policy on Long Term Financial Planning
- Virement Policy
- Policy on the writing off of Irrecoverable Debt
- Budget Policy

The abovementioned policies are available on the Mangaung Metropolitan Municipality's website (www.mangaung.co.za)

10.6 Amendments to Policies

The following amended draft policies are being tabled in Council with this final budget:

- Virement Policy\
- Environmental policy
- Property rates Policy
- Indigent Policy
- Credit Control and Debt Collection Policy
- Supply Chain Management policy
