CHAPTER 1 - STRATEGIC OVERVIEW

1.1 MAYORS' FOREWORD

I am privileged to present once more the Draft Integrated Development Plan and Budget for 2016/2017 financial year, which is the last IDP review for the period 2012-2017. This as well is the last year of the current Council in office as 2016 is an election year, and elections are expected to take place before 18th August 2016.

The Municipal Systems Act No. 32 of 2000 mandates Councils to develop and review their IDP's for their current term of office. The system of local government in South Africa fortifies the partnership between the governed and those who govern, making a reality - Chapter 4 of the Municipal Systems Act No. 32 of 2000.

This As such, a collective of Umzimvubu Local Municipality Council has endorsed the Draft IDP and Draft Budget, afterwhich the Council will embark in an EXCO-led IDP Roadshows in April – May 2016 to communicate the projects that will be implemented and the budget for 2016/2017 financial year after the budget processes have been completed. This IDP will become a contract between government and the public. In terms of this contract,

democratically elected leaders do not reduce democratic citizenship to regular exercise of *voting*, but rather involve the electorate in determination of priorities, determination of development trajectories, and formulation of programmes.

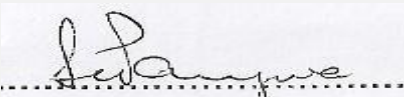

We did this so that the Draft IDP will find expression in the delivery of services to our people which is our key function as the local sphere of government. We need to put in place processes and mechanisms to boost our institutional capacity. This would surely enable us to broaden access to service delivery. The IDP is our bold statement of governance and commitment to serve our community to the best of our ability. Our intention is that the infrastructure we develop must create jobs for the local community, improve the rural economy, improve accessibility and alleviate poverty.

We will continue to achieve visible advances with improving the quality of life of all our people through a consultative and participatory process. More significantly, as elected leaders, we have an obligation to be transparent and accountable about service delivery, budget plans and allocations, as well as report on progress on a structured and consistent basis. This will help ensure that the local community is well informed of all our activities and programmes that have a direct impact on their lives.

We do not cease to applaud the contribution made by other spheres of government and or sector departments in our jurisdiction to improve the lives of our people. We are grateful of the surfacing done by SANRAL on N2 which cuts across our municipality. We expect the 2nd phase of this initiative to start soon from Ngcweleni in Mt Ayliff to Mt Frere. We applaud the development of human settlements, improvement and access to health facilities, rural development initiatives, improved access to electricity - to mention but a few. Despite the strides we have made, challenges such as crime, underdevelopment, clean governance still remain. We need to partner in dealing with such challenges in order for us to triumph.

Our IDP focus relates more strongly to the capital budget in infrastructure development in response to the State Presidents call on his State of the Nation Address 2016. We remain determined and dedicated to serve the populace of Umzimvubu to meet the expectations of our people through this integrated approach of development.

This IDP will serve as a guiding tool and a beacon of hope for the better service to our people.

Cllr S.K. Phangwa
Mayor, Umzimvubu Local Municipality

1.1. Introduction

In terms of the Municipal Systems Act, 2000 Chapter 5, Municipal Councils are expected to develop their Integrated Development Plans within a prescribed period into office. The Council of Umzimvubu Local Municipality has adopted a process plan in August 2014 that guides processes towards review of its Integrated Development Plan that informs development trends in the municipal space, from the 5 year IDP that was developed on the assumption of term of office of the current council.

The Integrated Development Planning is a process that is a central planning tool for local government, and is the doorway comprehensive service delivery programme of government. Integrated Planning has been developed as a consolidated municipal wide planning process that provides a framework for planning of future development in a Municipality.

The IDP provides a platform for horizontal and vertical co-ordination, alignment and integration of delivery programmes across the all spheres of government: be it National, Provincial and Local Government. Moreover, it will be based on the national and provincial development imperatives such as the five priorities of government derived from the manifesto of the ruling party, the Medium Term Strategic Framework (MTSF), the Provincial Strategic Framework (PSF), the National Outcomes Approach, that National Spatial Development Perspective (NSDP), Accelerated and Shared Growth Initiatives for South Africa (ASGISA) and the Eastern Cape Provincial Growth the Development Strategy (PGDS) and the Alfred Nzo District Strategic Goals.

Umzimvubu Local Municipality considers Community participation and stakeholder involvement as one of the pillars to achieving a credible and implementable integrated development plan as enshrined in the Chapter 4 of the Municipal Systems Act of 2000. These pillars are critical in the development of the IDP as the municipality endeavours to bring about responsive, developmental and accountable local government. The IDP will molded by inputs from communities in a form of ward priorities and civil society, as well as direction from the new political leadership.

In the review of our IDP for 2015 to 2016, the following have been considered:

- The NDP Vision 2030
- The IDP Framework Guide
- Stats SA – Census results 2011
- Comments from the MEC for the previous IDP assesment
- Municipal boundaries as per the municipal demarcation board
- Ammendments in response to changing circumstances and
- Improving the IDP process and content
- Maximum participation of sector departments
- Institutional issues
- Sector plan and associated spatial framework
- IDP and budget link and
- Ward based Priorities

In accordance with a philosophy behind the Municipal structures act, 1998, section 84 (i) that states A local Municipality has the following functions and powers:-

(a) Integrated Development Planning for its area of jurisdiction.

The Municipal Finance Management Act 56 of 2003 section 21 (1)(a) provides that the Mayor of the Municipality must:

- (a) Co-ordinate the processes for preparing the annual budget and for developing and reviewing the Municipality's Integrated Development Plan and budget related policies to ensure that the tabled budget and any revisions of the Integrated Development Plan and budget related policies are mutually consistent and credible.

- (b) At least ten months before the start of the budget year, table in the municipal Council a time schedule outlining key deadlines for :-
(ii) (aa) the annual review of the Integrated Development Plan in terms of section 34 of the Municipal Systems Act 32 of 2000.

The Municipal Systems Act 32 of 2000 section 34 provides that a Municipal Council:-

(a) Must review its Integrated Development Plan

- (i) Annually in accordance with an assessment of its performance measurements in terms of section 41 and
- (ii) To the extent that changing circumstances so demand; and
- (iii) May amend integrated development plan in accordance with a prescribed process.

Section 27 (1) of the Municipal Systems Act, further states that, each district municipality, within a prescribed period after the start of its elected term and after a consultative process with local municipalities within its area, must adopt a framework for integrated development planning in the area as a whole”.

Objectives

- To draw up a process plan that would engender inclusivity and transparency;
- To encourage participation by all stakeholders and communities;
- To solicit and determine priorities of the Municipality; and
- To enhance service delivery and development.

1.3 Organisational Arrangements

(a) Role players

The following role players will be involved in the IDP review process:

- Council
- Mayor
- Executive Committee
- Municipal Manager
- IDP Steering Committee
- IDP Technical Steering Committee
- Ward Councilors and ward committees
- Community Development Workers
- IDP Representative Forum (residents, communities and other stakeholders)
- ANDM
- Provincial Government Departments in terms of their sector programmes

(b) Roles and Responsibilities

- (i) **Council**

The Council will consider and adopt the process plan.

(ii) The Honorable Mayor

The Honorable Mayor must ensure that the IDP is developed and reviewed annually.

Chairs the IDP Representative Forum

Chairs the IDP Steering Committee

(iii) Executive Committee

The Council of Umzimvubu Municipality through the Mayor and his/her Executive Committee is legally responsible for managing and formulating the Municipality's IDP. In terms of Section 30(b) of the Systems Act, 2000 this responsibility can be delegated to the Municipal Manager.

(iv) Municipal Manager

The Municipal Manager has delegated the function of the IDP development, review and implementation to the Assistant Director IDP, IGR and Municipal Performance under the Municipal Manager's Office; therefore the division of IDP, IGR and Municipal Performance will co-ordinate the IDP review process for 2011/2012.

The terms of reference include:

- Preparing the process plan
- Undertaking the overall management and co-ordination of the planning process ensuring:
 - ⇒ Participation and involvement of all different role players
 - ⇒ That time frames are adhered to
 - ⇒ That the planning process is aligned to the Provincial Growth and Development Strategy
 - ⇒ Conditions for community participation provided
 - ⇒ That the results of the planning and IDP review process are documented.
- Responding to comments on the draft IDP from the public and other spheres of Government to the satisfaction of the municipal Council
- Accommodates and consider IDP comments and proposals from the office of the MEC for Housing, Local Government and Traditional Affairs

(v) IDP Steering Committee

The IDP Steering Committee will assist the Honorable Mayor in guiding the review process. It comprises of the following members:

- Honorable Mayor
- Selected relevant Executive Committee Portfolio Heads
- Municipal Manager
- Assistant Director IDP, IGR and Municipal Performance
- Budget and Treasury Office Manager
- Deputy CFO
- Corporate Services Manager
- Citizens and Community Services Manager
- Infrastructure Planning and Development Manager
- Chief Operating Officer
- Local Economic Development Manager

Terms of reference

The terms of reference for the IDP Steering Committee shall be the following:

- To draw terms of reference for the various planning activities
- Establish sub-committees
- Commission research studies
- Consider and comment on:
 - Inputs from sub-committees, study teams and consultants
 - Inputs from provincial sector departments and support providers
 - Processes, summarize and document inputs
 - Make content recommendations
- Define the terms of reference for the IDP Representative Forum
- Inform the public about the establishment of the IDP Representative Forum
- Identify stakeholders to be part of the Forum in such a way that the public is well represented
- Providing relevant technical, sector and financial information for analysis and for determining priority issues
- Contributing technical expertise in the consideration of financial strategies and identification of projects
- Providing operational and capital budget information
- The IDP Steering Committee is chaired by the Honorable Mayor or his/her delegate. The secretariat for this committee will be Corporate Services Department.
- The IDP Steering Committee may delegate some or all its responsibility to the IDP Technical Steering Committee.

(vi) IDP Representative Forum

The IDP Representative Forum of Umzimvubu Municipality is the organizational mechanism for discussions, negotiations and decision-making between stakeholders within our municipal area. It is envisaged that the following organizations and/or stakeholders may be involved:

- Councilors
- Ward Committees
- Community Development Workers
- Inter Governmental Forums
- Traditional Leaders
- Ministers Fraternal
- Stakeholder Representatives of Organized Groups
- Advocates of Unorganized Groups
- Community Representatives
- Resource Persons
- Traditional Leaders

Terms of Reference

The terms of reference for the IDP Representative Forum shall be as follows:

- Represent the interests of their constituents in the IDP process
- Provide an organizational mechanism for discussion, negotiation and decision-making between stakeholders including municipal government
- Ensure communication between all stakeholders including municipal government
- Monitor the performance of the planning and implementation process.
- Provide a platform for engagement, input and feedback to stakeholders on the IDP and PMS.

The IDP Representative Forum is chaired by the Mayor or duly delegated Councilor.

The Secretariat for the IDP Representative Forum shall be an official from the Corporate Services Department of the Municipality duly appointed or delegated such function by the Manager Corporate Services.

Code of Conduct

The IDP Representative Forum needs to have a code of conduct which will regulate such issues as:

- Meeting schedule (frequency and attendance) based on phases of the IDP
- Agenda, facilitation and documentation of meetings
- Understanding by members of their role as representatives of their constituencies
- Feedback to their constituencies
- Resolution of disputes
- Conditions of attendance of meetings

(vii) IDP Technical Steering Committee

Our IDP Technical Steering Committee will do the ground work and feeds the information into the IDP Steering Committee, it will involve:

- Municipal Manager
- HOD's
- MANCO members,
- Relevant officials

Terms of reference

The Terms of reference for this committee shall be as follows:

- ❖ Collect and collate information for IDP Steering Committee
- ❖ Conduct research and
- ❖ Advises the IDP Steering Committee

1.4 The IDP Technical Steering Committee shall focus on the following KPA:

KPA	PRIORITY ISSUES
Municipal transformation and Institutional Development	<ul style="list-style-type: none">• Municipal Administration• Human Resources• Research• Legal Services• Information & Communication Technology
Financial Viability and Management	<ul style="list-style-type: none">• Budget and Treasury• Revenue Enhancement• Supply Chain Management• Clean Audit

Socio-Economic Development	<ul style="list-style-type: none"> • Agriculture • Manufacturing • Tourism • SMME Development • Forestry • Municipal/Environmental health • HIV/ AIDS • Disaster Management and Fire Fighting • Primary Health Care • Environmental Services • Waste Management • Law Enforcement • Community Safety
Infrastructure Development and service delivery	<ul style="list-style-type: none"> • Water and Sanitation • Roads • Telecommunication and electricity • Land and Housing • Public Transport • Community Facilities • Building Control
Good governance and public participation	<ul style="list-style-type: none"> • Intergovernmental Relations • Communications • IDP Co-ordination • Performance Management System • Public Participation • Special Programmes

1.5 Mechanism and Procedures for Public Participation

Umzimvubu Local Municipality comprises a large geographical area with many people. This situation requires that public participation be structured.

The structure for public participation in as far as the IDP process is concerned is the IDP Representative Forum. In order to ensure that there is representation of the various organized and unorganized groups within our municipal area. The following approach shall be used:

- Placing adverts in our local newspaper(s), including the Daily Dispatch, in English and isiXhosa which people and organizations to be part of the Representative Forum
- In order to reach those parts of our community that do not read newspapers, the information of the Representative Forum will be announced through radio stations such as Alfred Nzo Community Radio Station and Umhlobo Wenene
- Making use of other methods such as flyers, ward councilors, ward committees and community development workers, announcements through church gatherings and community based organizations, posters etc.
- Making an effort to reach unorganized groups and marginalized groups to ensure that their voices are heard. We will do this by approaching non-governmental organizations that represent the need of such groups.
- Our Local Communicators Forum will be utilized as another platform to mobilize for these meetings.

The IDP Representative Forum will meet throughout the IDP process with most meetings being held in the first, second and third phases of the review. The frequency of meetings will be highlighted in the “Action Programme” section.

It is envisaged that all meetings will be held at Umzimvubu Local Municipality, or alternatively, determined as and when need arises.

In order for members of the IDP Representative Forum to report to their constituencies, three weeks after each meeting will be allowed to make responses and comment on what is presented at the meeting, that is, should what is discussed at the meeting require a feedback.

Inputs to the IDP Representative Forum will be in the form of documentation, presentations and other forms deemed acceptable.

1.6 MECHANISMS AND PROCEDURES FOR ALIGNMENT

Phase	Structures Involved	Activity
Analysis	Category B's and the District Municipality	<ul style="list-style-type: none"> • Re-defining priority issues • Incorporating aspects of sector information (assessing plans from relevant sectors) • Agree on parallel process
Strategies	Category B's and the District Municipality	<ul style="list-style-type: none"> • Vision, goals and objectives • Aligning strategies to the ISRDS, Social Plan etc.
Projects	Relevant Government Departments, Sector Specialists, Project Task Teams – Category B's and District	<ul style="list-style-type: none"> • Technical inputs by relevant sectors and governments • Relevant sector plans in order to align with project proposals accordingly • Business plans <p>Project proposals with budgets</p> <ul style="list-style-type: none"> • Alignment of projects and plans with government department plans and budget
Integration	Category B's, District Municipality and Government departments – Technical Specialists	<ul style="list-style-type: none"> • Screening of project proposals and making the necessary adjustments • Developing integrated programmes
Approval	Category B's, District Municipality	Final comments and adjustments and approval by the Council.

1.7 Monitoring And Amending

It is critical that the monitoring and review mechanisms be catered for in the planning process. The following with regards to monitoring and amendment of the Process Plan is recommended:

- That the Municipal Manager and IDP Manager coordinate and monitor the whole process;
- Progress to be reported to the Municipal Manager and any deviations from the municipality's process plan be highlighted;
- The Mayor be mandated by Council to make amendments to the process plan should these be required.

1.8 Action Programme

In line with the district framework plan and process, the action plan has begun with the drafting and adoption of this process plan by the end of August 2012. Our action plan, programme and the overall process plan has been aligned with the budget process plan. The action programme will be developed in consultation with the Steering Committee and will be reviewed from time to time when necessary

1.9. IDP & BUDGET PROCESS PLAN FOR 2016 TO 2017

The table below provides a concise summary of the critical deadline / milestone dates for the IDP process. It provides an overall strategic timeline indicating key activities. The process plan was adopted by Council in August 2015.

1.10. THE ACTION PLAN

Each phase of the IDP development will be initiated by the Steering Committee meeting followed by the Representative Forum. The action plan with activities and proposed dates for such activities is by law, binding to the municipality as its custodian is the municipal council.

The integrated development planning methodology comprises five interrelated phases namely;

- ⇒ Analysis
- ⇒ Strategies
- ⇒ Projects
- ⇒ Integration
- ⇒ Approval

The analysis phase aims to assess the existing level of development within the Municipality through analysis of the prevailing environment and impact of the prevailing environment on the inhabitants of the Municipality. The analysis process facilitates the identification and analysis of the environmental challenges facing the municipality and allows the municipality to accurately prioritise these challenges.

The ensuing phases of the integrated development planning process build on the analysis phase, and it is therefore imperative that the analysis phase be compiled accurately. Planning, budgeting, decision making and service delivery are largely informed by the existing environment and its inherent challenges. A plan that is not based on an accurate understanding of the current environment will lack credibility and efficacy.

This report will contain a comprehensive analysis of the Umzimvubu Local Municipality including the legislative and policy environment, the new municipal vision and mission, the geographic positioning and composition of the study area, and an environmental analysis in the broadest sense of the word that includes a demographic, socio economic, spatial and biophysical environmental analysis. An analysis will also be done of service provision including infrastructural services, community services and community facilities.

Economic growth and development will be analysed with specific reference to current trends in terms of poverty, employment trends and the predominant sectors. An analysis of the institutional and governance environment as well as the financial viability of the Umzimvubu Local Municipality will also be done to ascertain its capacity to provide sustainable service delivery.

2. CHAPTER 2 - LEGISLATIVE AND POLICY FRAMEWORK

Municipalities are subject to a myriad of policy and legislation. This section aims to provide an overview of legislation and policy that is directly relevant to the integrated development planning process. A brief overview will also be provided of other legislation and policy that Municipalities need to take cognisance of.

2.1 Republic of South Africa Constitution Act 108 of 1996

The Republic of South Africa Constitution Act provides a fundamental legal framework that Municipalities must adhere to and uphold. Section 239 of the Constitution defines an organ of state as any “department of state or administration in the National, Provincial or Local sphere of Government”. All references to organs of state in the Constitution therefore include the local sphere of government.

Chapter 2 of the Constitution contains the Bill of Rights. The Bill of Rights applies to all law and binds the legislature, the executive, the judiciary and all organs of state¹. The state has an obligation to respect, promote and fulfil the rights contained in the Bill of rights². Municipalities, being an organ of state must comply with these obligations.

Chapter 3 of the Constitution deals with the principle of co-operative governance. The Government of the Republic comprises a National, Provincial and Local sphere of Government which are distinctive interdependent and interrelated. This chapter sets out a number of principles which collectively provide the co-operative governance framework that all spheres of government must adhere to³.

Chapter 7 regulates the local sphere of government. Section 152 stipulates the local government objectives which a municipality must endeavour to achieve within the confines of its financial and administrative capacity. These objectives are:

- ⇒ “To provide democratic and accountable government to the communities
- ⇒ To ensure the sustainable provision of services to the community
- ⇒ To promote social and economic development
- ⇒ To promote a safe and healthy environment
- ⇒ To encourage communities and community organisations to get involved in local government matters”

Section 153 provides that municipalities have a developmental duty. This duty entails managing and structuring the budget, administration and planning processes of the municipality in a manner that prioritises the basic needs of the community while promoting the social and economic development of the community. Municipalities are required to participate in National and Provincial development programmes.

Section 154 expounds the role of municipalities within the cooperative governance framework by requiring national and provincial governments to support and strengthen the capacity of municipalities to manage their own affairs, exercise their powers and perform their functions.

2.2 Municipal Legislation

The following paragraph gives an overview of municipal legislation that is most relevant to the IDP process; namely the Municipal Structures Act 1998, Municipal Systems Act 2000, the Municipal Performance Management and Planning Regulations 2001 and the Municipal Finance Management Act 2003.

¹ Republic of South Africa Constitution Act 108 of 1996: (8)

² Republic of South Africa Constitution Act 108 of 1996: (7)(2)

³ Republic of South Africa Constitution Act 108 of 1996 (40 &41)

2.2.1 Local Government Municipal Structures Act, 117 Of 1998

Chapter 3 deals with municipal councils. Section 19(1) reiterates the Constitutional obligation of municipalities to achieve the objectives of local government. Municipalities are required to review the needs and priorities of their communities on an annual basis. Municipalities must set priorities to enable them to meet the needs of their people, develop processes for involving the community in the determination of these needs and establish organisational and delivery mechanisms for meeting the needs of the community and evaluating their overall performance in achieving the objects of local government as required by the Constitution. Section 19(3) obliges a municipality to develop mechanisms to consult the community and community organisations in performing its functions and exercising its powers.

Chapter 4 deals with internal structures and functionaries. Section 73 provides for the establishment of Ward Committees. The duties of Ward Committees entail making recommendations on matters affecting their wards to the Ward Councillor or to the Executive Mayor /Executive Committee or Municipal Council through the Ward Councillor. Ward Committees they are integral to the local IDP process.

Chapter 5 deals with functions and powers of municipalities. Section 84 regulates the division of powers and functions between local and district municipalities. Subsection (1)(a) provides that a district municipality must do integrated development planning for the district as a whole, which includes developing a framework for the integrated development plans of the local Municipalities who share a jurisdiction with the district municipality. District municipalities and the local municipalities within the area of a district municipality must co-operate with one another by assisting and supporting each other.⁴

2.2.2 Local Government Municipal Systems Act, 32 Of 2000

Chapter 2 regulates the legal nature, rights and duties of a municipality. Section 2 defines the legal nature of a municipality and provides that a municipality is composed of the political structures, administration and the community of the municipality. The emphasis of this provision is that the community form an integral part of the municipality.

Chapter 4 is devoted entirely to the regulation of community participation. A municipality is required to develop a culture of community participation by encouraging and creating conditions for the local community to participate in the municipality's affairs. Section 16(1) (a) stipulates certain activities of the municipality where public participation must be encouraged and includes the preparation, implementation and review of the integrated development plan.

Chapter 5 deals with the principle of integrated development planning. Integrated development planning is one of the core functions of a municipality in the context of its developmental mandate.

Section 24 requires municipalities to adopt an inclusive plan for the development of municipality which;

- ⇒ “Links, integrates and coordinates plans and takes into account proposals for the development of the municipality;
- ⇒ Aligns the resources and capacity of the municipality with the implementation of the plan;
- ⇒ Forms the policy framework and general basis on which annual budgets must be based; and
- ⇒ Is compatible with national and provincial development and planning requirements that are on the municipality in terms of legislation”

All municipalities are required to adopt an IDP which is the key strategic planning tool of the municipality. A municipality must give effect to its IDP and conduct its affairs in a manner consistent with its approved IDP⁵

⁴ Local Government Structures Act 117 of 1998: 88

⁵ Local Government Municipal Systems Act 32 of 2000 section 36

The integrated development plan is defined as:

“The principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development in the municipality”.⁶

Municipalities are legally obliged to give effect to their integrated development plan and conduct their affairs in a manner which is consistent with their integrated development plan.⁷

An integrated development plan must be reviewed on an annual basis and adjusted and revised in accordance with the monitoring and evaluation of existing performance and changing circumstances. The development and review of an IDP must take place within the parameters of a prescribed process. Section 27 requires a district municipality to adopt a framework for integrated development planning in the area as a whole. Section 28 requires all municipalities to adopt a process plan that guides the planning, drafting, adoption and review of the integrated development plan.

Chapter 6 deals with performance management. It requires all municipalities to establish a performance management system that is in line with the priorities, objectives, indicators and targets as contained in its IDP. Municipalities must also create a culture of performance management within their administration, council, political structures and political office bearers. The performance of the municipality in relation to its achievement of the objectives as contained in the IDP must be monitored, reviewed and reported on annually.

2.2.3 Local Government Municipal Planning And Performance Management Regulations, 2001

These regulations supplement the provisions of the Municipal Systems Act by outlining the requirements and core components of the performance management framework and integrated development plan.

2.2.4 Local Government Municipal Finance Management Act, 56 Of 2003

The Municipal Finance Management Act (MFMA) seeks to regulate financial planning and management in municipalities as public institutions. The object of this Act is to secure sound and sustainable management of the fiscal and financial affairs of municipalities and its entities by establishing norms and standards and other requirements for;

- ⇒ ensuring transparency, accountability and appropriate lines of responsibility in the fiscal and financial affairs of municipalities and municipal entities
- ⇒ the management of their revenues, expenditures, assets and liabilities and the handling of their financial dealings
- ⇒ budgetary and financial planning processes and the co-ordination of those processes with the processes of organs of state in other spheres of government
- ⇒ borrowing
- ⇒ the handling of financial problems in municipalities
- ⇒ supply chain management
- ⇒ Other financial matters.

Section 21(1) of the MFMA requires municipalities to coordinate the process of preparing the annual budget and revising the IDP to ensure that there is integration between the two. MFMA also provides for the drafting of a Service Delivery Budget Implementation Plan (SDBIP). The SDBIP is a detailed plan approved by the Mayor/Executive Mayor of the municipality for the implementation of service delivery in accordance with the annual budget. The SDBIP should include monthly revenue and expenditure projections, quarterly service delivery targets and performance indicators.

2.2.5 Inter-Governmental Relations framework, Act 13 of 2005

This Act supplements the provisions of Chapter 3 of the Constitution which regulates co-operative governance. The Act provides a framework to promote and facilitate functional horizontal and vertical relationships between the various departments of government, and the various spheres of government. The Act also provides mechanisms and

⁶ Local Government Municipal Systems Act 32 of 2000 section 35 (1)

⁷ Local Government Municipal Systems Act 32 of 2000 section 36

procedures to facilitate the settlement of inter-governmental disputes. The envisaged multi sector nature of the IDP is dependant on sound intergovernmental relationships.

2.2.6 Development Facilitation Act, Act 65 Of 1995 (DFA)

Chapter 1 of the DFA sets out a number of principles, which apply to all land development. The following principles would apply to the formulation and content of a Spatial Development Framework:

- A. Policies, administrative practice and laws should:
 - i. Provide for urban and rural land development;
 - ii. Facilitate the development of formal and informal, existing and new settlements;
 - iii. Discourage the illegal occupation of land, with due recognition of informal land development processes;
 - iv. Promote speedy land development; and
 - v. Promote efficient and integrated land development in that they:
 - ⇒ Promote the integration of the social, economic, institutional and physical aspects of land development
 - ⇒ Promote integrated land development in rural and urban areas in support of each other;
 - ⇒ Promote the availability of residential and employment opportunities in close proximity to or integrated with each other;
 - ⇒ Optimize the use of existing resources including such resources relating to agriculture, land, minerals, bulk infrastructure, roads, transportation and social facilities;
 - ⇒ Promote a diverse combination of land uses, also at the level of individual erven or subdivisions of land;
 - ⇒ Discourage the phenomenon of “urban sprawl” in urban areas and contribute to the development of more compact towns and cities;
 - ⇒ contribute to the correction of the historically distorted spatial patterns of settlement in the Republic and to the optimum use of existing infrastructure in excess of current needs; and
 - ⇒ Encourage environmentally sustainable land development practices and processes.
- B. Members of communities affected by land development should actively participate in the process of land development.
- C. The Skills and capabilities of disadvantaged persons involved in land development should be developed
- D. Policy, administrative practice and laws should promote sustainable land development at the required scale in that they should:
 - i. Promote land development which is within the fiscal, institutional and administrative means of the Republic;
 - ii. Promote the establishment of viable communities;
 - iii. Promote sustained protection of the environment'
 - iv. Meet the basic needs of all citizens in an affordable way; and
 - v. Ensure the safe utilization of land by taking into consideration factors such as geological formations and hazardous undermined areas
- E. Each proposed land development area should be judged on its own merits and no particular use of land, such as residential, commercial, conservational, industrial, community facility, mining, agricultural or public use, should in advance or in general be regarded as being less important or desirable than any other use of land.
- F. Land development should result in security of tenure, provide for the widest possible range of tenure alternatives, including individual and communal tenure, and in cases where land development takes the form of upgrading an existing settlement, not deprive beneficial occupiers of homes or land or, where it is necessary for land or homes occupied by them to be utilized for other purposes, their interests in such land or homes should be reasonably accommodated in some other manner.
- G. A competent authority at national, provincial and local government level should coordinate the interests of the various sectors involved in or affected by land development so as to minimize conflicting demands on scarce resources.
- H. Policy, administrative practice and laws relating to land development should stimulate the effective functioning of a land development market based on open competition between suppliers of goods and services.

2.3 Policy And Development Initiatives

2.3.1 The mandate for the current term of government focus on five key priorities (**2009 manifesto priorities**).

- Creation of decent work and sustainable livelihoods
- Education
- Health
- Rural development, food security and land reform, and
- Fight against crime and corruption

2.3.2 Medium Term Strategic Framework

- The Medium Term Strategic Framework (MTSF) translates the electoral mandate into a clear and time-bound government delivery programme.
- MTSF is a statement of intent identifying the developmental challenges facing the country and outlining the medium-term strategy for improvements.
- MTSF is meant to guide planning and resource allocation across all spheres of government.
- National and provincial departments' five-year strategic plans and budget requirements take into account MTSF imperatives.
- Similarly, municipalities are expected to adapt their Integrated Development Plans (IDPs) in line with the national medium-term priorities.

2.3.3 Medium Term Strategic Framework 10 Priorities

1. Speed up economic growth & transform the economy to create decent work & sustainable livelihoods
2. Massive programmes to build economic and social infrastructure
3. A comprehensive rural development strategy linked to land and agrarian reform and food security
4. Strengthen the skills & human resource base
5. Improve the health profile of society
6. Intensify the fight against crime and corruption
7. Build cohesive, caring and sustainable communities
8. Pursue regional development, African advancement and enhanced international cooperation
9. Sustainable resource management and use

10. Build a developmental state, including improving of public services & strengthening democratic institutions.

2.3.4 The Provincial Strategic Framework

- Taking the tune from MTSF, the Provincial Strategic Framework (PSF) was endorsed by the Provincial Executive in June 2009.
- It is a **high level medium term strategic framework** that responds to the provincial challenges by translating the electoral mandate into a government programmes.
- It allows for the cascading of the current national Medium Term Strategic Framework (MTSF) into the province.
- In the context of the planning in the province, the PSF is a strategic framework that unpacks the strategic objectives, priorities and targets of an electoral term.
- PSF have links to other planning instruments, which includes the PGDP and the Programme of Action.

The PGDP is a blue-print that focuses on a longer term vision of the province.

2.3.5 Provincial Strategic Priorities

Strategic Priority 1: Speeding up growth and transforming the economy to create decent work and sustainable livelihoods

Strategic Priority 2: Massive programme to build social and economic infrastructure

Strategic Priority 3: Rural development, land and agrarian reform and food security

Strategic Priority 4: Strengthen education, skills and human resource base

Strategic Priority 5: Improving the Health profile of the Province

Strategic Priority 6: Intensifying the fight against crime and corruption

Strategic priority 7: Building a developmental state and improving the public services, and strengthening democratic institutions

Strategic priority 8: Building cohesive, caring and sustainable communities

2.3.6 National Outcomes Approach

- National outcomes – government constantly seeks to improve its ability to delivery services for a better life for all
- Introduce Measures to improve its ability to plan and monitor in the long term through a coherent and efficient manner
- National outcomes aim to directly lead to the achievement of expected real improvements in the lives of all South Africans rather than just carrying out of its functions.
- It clarifies what Government is expected to achieve, how it is expected to achieve it and how government will know whether it is achieving it

2.3.7 Twelve (12) distinct priority outcomes emerge from the Manifesto and MTSF

- Quality basic education
- A long and healthy life for all South Africans
- All people in South Africa are and feel safe
- Decent employment through inclusive economic growth
- Skilled and capable workforce to support an inclusive growth path
- An efficient, competitive and responsive economic infrastructure network
- Vibrant, equitable, sustainable rural communities contributing towards food security for All
- Sustainable human settlements and improved quality of household life
- Responsive, accountable, effective and efficient Local Government system
- Protect and enhance our environmental assets and natural resources
- Create a better South Africa, a better Africa and a better world
- An efficient, effective and development oriented public service and an empowered, fair and inclusive citizenship

The table below is the alignment of LG KPA'S to Strategic Priorities of National and Provincial Government

ALIGNMENT OF LG KPAS TO STRATEGIC PRIORITIES OF NATIONAL & PROVINCIAL GOVT

National Priorities	Provincial Priorities	Local Gov. KPA	Outcomes
<p>Improve health profile of the nation.</p> <p>Comprehensive rural development strategy linked to land and agrarian reform & food security.</p> <p>Massive programme to build economic & social infrastructure; Sustainable resource management and use.</p>	<p>Improve the health profile of the province.</p> <p>Rural development, land and agrarian transformation, and food security.</p> <p>Massive programme to build social and economic and infrastructure.</p> <p>Building a developmental state.</p>	<p>Basic Service Delivery and Infrastructure Development.</p>	<p>An efficient, competitive and responsive economic infrastructure network.</p> <p>A long and healthy life for all South Africans.</p> <p>Sustainable human settlements and improve quality of household life.</p> <p>Protect and enhance our environmental assets and natural resources.</p>

THE NATIONAL, PROVINCIAL IMPERATIVES TO LOCAL GOVERNMENT SPHERE

The following paragraphs provide an overview of National and provincial policy frameworks most relevant to the IDP process

2.3.8 National Spatial Development Perspective (NSDP)

The key priorities for the new Government were for the increase in economic growth and promote social inclusion. National Spatial Development Perspective (NSDP) is a critical instrument for policy coordination, with regard to the spatial implication of infrastructure programmes in national, provincial and local spheres of government.

NSDP has been approved as an indicative tool for development planning in government. In order to contribute to the growth and development policy objectives of the government, the NSDP puts forward a set of 5 normative principles:

Principle 1: Rapid economic growth that is sustained and inclusive is a pre-requisite for the achievement of other policy objectives, amongst which poverty alleviation is key.

Principle 2: Government has a constitutional obligation to provide basic services to all citizens (e.g. water, energy and education facilities) wherever they reside.

Principle 3: Government spending on fixed investment should be focused on localities of economic growth and/or economic potential in order to gear up private sector investment, stimulate sustainable economic activities and create long-term employment opportunities.

Principle 4: Efforts to address past and current social inequalities should focus on people, not places. In localities where there are both high levels of poverty and demonstrated economic potential, this could include fixed capital investment beyond basic services to exploit the potential of those localities. In localities with low demonstrated economic potential, government should, beyond the provision of basic services, concentrate primarily human capital development by providing social transfers such as grants, education and training and poverty relief programmes and reducing migration cost by providing labour market intelligence so as to give people better information opportunities and capabilities to enable people to gravitate, if they chose to, to localities that are likely to provide sustainable employment and economic opportunities.

Principle 5: In order to overcome the spatial distortions of Apartheid, future settlement and economic development opportunities should be channeled into activity corridors and nodes that are adjacent or link to the main growth centres. Infrastructure investment should primarily support localities that will become major growth nodes in South Africa and the SADC region to create regional gateways to the global economy.

2.3.9 Provincial Growth And Development Plan (PGDP)

The provincial growth and development Plan (PGDP) for the decade 2004-2014 focuses on opportunities to rapidly improve the quality of life of the poor. The plan sees opportunities in:

- Natural resource development particularly in the former homelands of Ciskei and Transkei. The plan suggests irrigation of 32 000ha from under-used (sic) rivers as well as forestry schemes of 120 000ha. It also proposes the allocation of state and prime land to Community Public and Private Partnership (CPPPs) for the establishment of natural resource enterprise (e.g. onshore or inland fisheries, nature reserves, cultural sites, tourism) within the existing land tenure system. Rural enterprises are identified as small-scale irrigation, rainwater harvesting, home gardening, maize and mixed cropping, local mining, agro-forestry, diary, small stock and poultry. The Transkei Rapid Impact programme (TRIP) is set to expand forestry production through support to small scale saw millers and 50 000ha of individual and community woodlots are planned for development.
- The plan is a strategic document that focuses on the exploitation of natural resources without due consideration of the limitation on the carrying capacity of the natural environment, or the impact of the proposed schemes.
- Industrial diversification. The plan proposes the expansion of agricultural production is set to support agro-processing industries such as food processing, leather goods, wood products, furniture production, wool and mohair clothing, crafts and tourism.

Tourism development

- The plan recognizes the eco-tourism potential of the province and acknowledges the challenges of protecting environmental assets while optimizing socio-economic benefits to local communities. The PGDP acknowledges constraints to development opportunities as presented by:
 - Poverty (defined as “a lack of access to opportunities for a sustainable livelihood”) particularly in the former Ciskei and Transkei regions;
 - Skewed income distribution and inequality in income generation;
 - Low annual economic growth that is insufficient to address backlogs and increasing unemployment;
 - Constraints on provincial expenditure resulting from a limited revenue base, static fiscal transfers from the National Government, lack of financial management capacity within the provincial government and municipalities and huge and increasing social and economic needs of the population co-existing with budget in the provincial treasury;
 - Lack of development and social infrastructure in the former homelands of Ciskei and Transkei during the Apartheid era that has resulted in deep structural poverty in these areas and a low capacity for state delivery;
 - Fragmentation in the labour market into the core consumer economy (manufacturing, government and other industries) and marginal modern sectors (commercial agriculture, domestic services and mining) together with a decline in formal employment opportunities has led to large numbers in the peripheral labour force (subsistence agriculture, informal sector and the unemployed);
 - Under-development of agricultural potential in the province particularly in the former homelands; and
 - The HIV/AIDS pandemic and its impact on economic growth

Implications for the Umzimvubu Local Municipality in as far as Umzimvubu Local Municipality is concerned, the implication of the PGDP is that the majority of the opportunities and constraints identified by the plan are in many ways applicable to Umzimvubu Local Municipality. However the implementation of projects and programmes which may be facilitated by the PGDP must be sustainable and must take into consideration recommendation of the SDF.

2.3.10 Eastern Cape Provincial Spatial Development Plan (ECPSDP)

The Eastern Cape Provincial Spatial Development Plan (ECPSDP) gives guidance on the principle that should underpin the strategic approach to spatial development and management. The ECPSDP proposes a hierarchy of nodes and development areas based on a range of socio-economic indicators analysis of development potentials. The rationale is to reinforce nodes of existing development strength and areas of development potential to guide public investment in infrastructure and services.

Three levels of services are proposed:

1. **Basic Need to All** – whereby the provision of basic services based on constitutional rights are targeted at areas of highest need.
2. **Building Capacity** – whereby public sector investment, particularly economic infrastructure, is prioritized in areas of growth and opportunity
3. **Targeted Focus Area** – in which public investment is used to “crowd in” private sector investment in areas of high growth potential.

2.3.11 Accelerated And Shared Growth Initiative For South Africa (Asgisa)

ASGISA has economic and social objectives. Economically, it aims to achieve economic growth of four comma five percent (4, 5 %) in the first phase of development from 2005 to 2009. Also, economic growth of six percent (6%) should be reached by 2014. Social objectives on the other hand include the improvement of the environment and opportunities for labour –absorbing and ensure that the fruits of growth are shared in such a way as to eventually eliminate poverty.

AsgiSA recognizes some of the binding constraints against which the policy operates. These include:

- The volatility and level of the currency.
- The cost, efficiency and capacity of the national logistics system.
- Shortage of suitably skilled labour amplified by the cost effects on labour of apartheid spatial patterns.
- Barriers to entry, limits to competition and limited new investment opportunities.
- Regulatory environment and the burden on small and medium businesses.
- Deficiencies in state organization, capacity and leadership.

Also, the policy highlights a series of interventions to counter these constraints.

The following are the six categories into which the interventions were grouped:

- Macroeconomic issues;
- Infrastructure programmes;
- Sector investment strategies (or industrial strategies);
- Skills and education initiatives,
- Second economy interventions; and
- Public administration issues.

Other strategic interventions in the infrastructure arena include further development of the country's research and development infrastructure, and further improvement in the modalities for public-private-partnerships in the development and maintenance of public infrastructure. Public sector infrastructure spending has considerable potential spin-offs in terms of the generation or regeneration of domestic supply industries, small business development and empowerment. Government is seeking to maximize the positive impact of these spin-offs on the domestic economy.

In addition to the general infrastructure programmes, provinces were asked to propose special projects that would have a major impact on accelerating and sharing growth. A set of projects has been selected for finalization of implementation plans. Also, the policy introduced sector strategies that aim at promoting private sector investment. These are inclusive of the following:

- ***A broader National Industrial Policy framework:*** Two sectors were identified for special priority attention: business process outsourcing (BPO) and tourism, and a third which is at a less advanced stage of development, biofuels. What all of these industries have in common is that they are labour intensive, rapidly growing sectors world wide, suited to South African circumstances, and open to opportunities for Broad Based Black Economic Empowerment (BBBEE) and small business development.
- ***Education and Skills Development:*** For both the public infrastructure and the private investment programmes, the single greatest impediment is the shortage of skills—including professional skills such as engineers and scientists, managers such as financial, personnel and project managers; and skilled technical employees such as artisans and IT technicians. The shortfall is due to the policies of the apartheid era and the slowness of our education and skills development institutions to catch up with the current acceleration of economic growth.
- ***Eliminating the second economy:*** Without interventions directly addressed at reducing South Africa's historical inequalities, growth is unsustainable. Interventions to address deep-seated inequalities and that target the marginalized poor are interventions to bridge the gap with the second economy, ultimately eliminating the second economy.

Of importance with regards to the governance and institutional interventions, the framework for the planning and management of land use was highlighted as a key area for institutional reform. Many investment projects are unnecessarily held up by the weakness of local or provincial planning and zoning systems, or the cumbersome Environmental Impact Assessment system. The EIA system is being reformed so that it will reduce unnecessary delays, without sacrificing environmental standards. A complimentary activity must be improvements in the planning and zoning systems of provincial and local governments.

2.3.12 Framework Guide For Credible IDP's

The National Department: Provincial and Local Government (DPLG) prepared an Evaluation Framework for credible IDPs. This Evaluation Framework is intended to serve as a tool to guide the assessment of a credible IDP and the core criteria to demonstrate municipal strategy, vision and compliance with both legislative and policy intent have been crafted to assist the assessors during the analysis process.

This framework is not intended to serve the purpose of a performance measurement tool, but rather a reference tool or guideline towards establishing the quality of a credible IDP. Umzimvubu Local Municipality has taken cognizance of the Credible IDP Evaluation/assessment Framework as a guide in

the development of its IDP for 2012 to 2017. The following aspects are considered to be relevant in respect of the preparation of the credible IDP:

- Consciousness by the Umzimvubu Local Municipality of its constitutional and policy mandate for developmental local government, including its powers and functions;
- Awareness by Umzimvubu Municipality of its role and place in the local, regional, provincial and national context and economy;
- Awareness by Umzimvubu Municipality of its own intrinsic characteristics and criteria for success;
- Comprehensive description of the Umzimvubu Municipal Area in terms of the environment and the spatial characteristics;
- A clear strategy, based on local developmental needs;
- Insights into the trade-offs and commitments that are being made regarding economic choices, establishment of Sustainable Human Settlements, integrated service delivery, etc.;
- The key deliverables for the next five (5) years;
- Clear measurable budget and implementation plans aligned to the SDBIP
- A monitoring system;
- Determining the capacity and capability of Umzimvubu Local Municipality;
- Communication, participatory and decision making mechanisms;
- The degree of intergovernmental action and alignment to government wide priorities.

The framework outlines six key focus areas namely;

- ⇒ Spatial Development Framework
- ⇒ Service Delivery
- ⇒ Sustainable Economic Growth and Development and LED
- ⇒ Financial Viability
- ⇒ Institutional Arrangements
- ⇒ Governance and Organisational Development

2.3.13 Other relevant legislation

There is a myriad of other legislation making that municipalities need to take cognisance of during their planning. The following table provides an overview of these statutes and their purpose. This is not an all inclusive list.

Table 1: Legislative overview

Legislation	Overview
<i>Legislation giving effect to Constitutional rights</i>	
Promotion of Access to Information Act, 2000	To control and regulate the right of all persons to access to information in terms of the Constitution of the Republic of South Africa 1996
Promotion of Fair Administrative Justice Act, 2000	To give effect to the right to administrative action that is lawful, reasonable, and procedurally fair in terms of the Constitution of the Republic of South Africa 1996
Promotion of Equality and Prevention of Unfair Discrimination	To promote equality and to eliminate unfair discrimination and to prevent and prohibit hate speech and to provide for matters connected therewith in terms of the Constitution of the Republic of South Africa 1996

Legislation	Overview
Act, 2000	
<i>Municipal legislation</i>	
Local Government: Municipal Demarcation Act, 1998	To provide for the demarcation of boundaries of municipalities for the establishment of new municipalities
Organised Local Government Act, 1997	To provide for the recognition of National and Provincial organisations representing the different categories of municipalities and the designation of representatives to participate in the National Council of Provinces.
Promotion of Local Government Affairs Act, 1983	To provide for the co-ordination of functions of general interest to local authorities and of those functions of local authorities which should be co-ordinated in national interest
Local Government Property Rates Act 6 , 2004	To regulate general property valuation and collection of rates
Municipal Accountants' Act, 1988	To provide for the establishment of a Board for Municipal Accountants, registration of Municipal Accountants and the control of their profession
<i>Legislation that applies to all organs of state</i>	
Development Facilitation Act, 1995	To provide for Integrated Development Plans, reflecting current planning and to institutionalise development tribunals for evaluating applications
Electoral Act, 1998	To manage and regulate elections on national, provincial and local government level
Division of Revenue Act	To provide for a fair division of revenue to be collected nationally between national, provincial and local government spheres for each financial year and for matters connected therewith
National Environmental Management Act, 1998	To provide for co-operative environmental governance by establishing principles for decision making on matters affecting the environment and to provide for matters connected therewith
National Building Regulations and Building Standards Act, 1977	To provide for the promotion of uniformity in the law relating to the erection of buildings in the areas of jurisdiction of local authorities and for the prescribing of building standards
National Water Act, 1998	To provide for fundamental reform of the laws relating to water resources
Water Services Act, 1997	To provide for the rights of access to basic water supply and sanitation, national standards and norms for tariffs and services development plans

Legislation	Overview
Electricity Act, 1987	To provide for and regulate the supply of electricity and matters connected thereto
Disaster Management Act, 2002	To provide for an integrated, coordinated and common approach to disaster management by all spheres of government and related matters
Fire Brigade Services Act, 1987	To provide for the rendering of fire brigade services and certain conditions to the rendering of the service
Gatherings and Demonstration Act, 1993	To control public gatherings and procession of marches
Prevention of Illegal Eviction from and Unlawful Occupation of Land Act, 1998	To provide for the eviction of unlawful occupants of land and the protection of the rights of such occupants under certain conditions
South African Police Service Act, 1995	To provide, inter alia, for a municipal (city) police and Community Police Forums
Health Act, 1977	To provide for the promotion of the health of the inhabitants of the Republic, for the rendering of health services, to define the duties, powers and responsibilities of certain authorities which render such services and for the co-ordination of the services
National Road Traffic Act, 1996	To regulate traffic on public roads, the registration and licensing of motor vehicles and drivers, including fitness requirements and incidental matters
National Housing Act 107,1999	To facilitate a sustainable housing development process; establish general principles of housing development in all spheres of government and define the functions of national provincial and local governments in housing delivery
<i>Employment and labour relations</i>	
Occupational Health and Safety Act, 1993	To provide for occupational health and safety in the work place and the protection of persons outside the work place against hazards to health and safety arising from activities of persons at the work place
Employment Equity Act, 1998	To promote the constitutional right of equality and the exercise of true democracy To eliminate unfair discrimination in employment To redress the effect of unfair discrimination in the work place to achieve a workforce representative of the population
Basic Conditions of Employment Act, 1997	To give effect to the right to fair labour practice To provide for the regulation of basic conditions of employment
Compensation of Occupational Injuries and Diseases Act, 1993	To regulate the categories of persons entitled to compensation for occupational injuries and diseases, and to determine the degree of disabled employees

Legislation	Overview
Labour Relations Act, 1995	To regulate the organisational rights of trade unions, the right to strike and lock-outs, to promote and facilitate collective bargaining and employee participation in decision making and to provide simple procedures for labour disputes
Skills Development Act, 1998	To provide for the implementation of strategies to develop and improve the skills of the South African workforce, to provide for learnerships, the regulation of employment services and the financing of skills development
Skills Development Levies Act, 1999	To provide for the imposition of a skills development levy and for matters connected therewith
South African Qualifications Authority Act, 1995	To provide for the establishment of a National Qualifications Framework and the registration of National Standards Bodies and Standards Generating Bodies and the financing thereof
Unemployment Insurance Act, 1966	To provide for the payment of benefits to certain persons and the dependants of certain deceased persons and to provide for the combating of unemployment

2.3.14 POWERS AND FUNCTIONS

Umzimvubu Local Municipality is a Category B Municipality as defined under Section 3 of the Local Government: Structures Act No. 117 of 1998. The municipality is authorized to perform the following functions: **(P) indicating function performed**

- Air pollution
- Building regulations P
- Child care facilities
- Local tourism P
- Municipal airports
- Municipal planning P
- Municipal public transport
- Storm water P
- Trading regulations
- Billboards and the display of advertisements in public places P
- Cemeteries, funeral parlours and crematoria P
- Cleansing P
- Control of public nuisance P
- Control of undertakings that sell liquor to the public P
- Facilities for the accommodation, care and burial of animals P
- Fencing and fences P
- Licensing of dogs
- Licensing and control of undertakings that sell food to the public P
- Local amenities P
- Local sports facilities P
- Markets P
- Municipal abattoirs
- Municipal parks and recreation P
- Municipal roads P
- Noise pollution P

- Pounds P
- Public places P
- Refuse removal refuse dumps and solid waste management P
- Street lighting P
- Street trading P
- Traffic and parking P

3. CHAPTER 3 SITUATIONAL ANALYSIS

Analysis of the current situation or status quo within the study area forms an integral and important part of strategic planning exercise. Situation analysis ensures that decisions and recommendations are based on knowledge of availability and accessibility to resources that influence development within the municipal area as well as priorities as identified by the communities.

The status quo analysis will address the following:

- The Study area
- Settlement patterns
- Demographics
- Socio economic
- Infrastructure
- Environment
- Local Economic Development
- Institutional Development and Transformation
- Financial Viability

3.1 THE STUDY AREA

The study area shall be the Umzimvubu Local Municipality (EC442). The municipality is one of four local municipalities situated within the Alfred Nzo District Municipality (DC44). The municipality is located in the Eastern part of the Eastern Cape Province. The municipal area covers an area approximately 2506 km² with a total population of about 191 620 of which 10% of the total population live in the urban area. The municipal area accommodates a significant rural/traditional population, both community-based and communal farming.

ULM is an inland Local Municipality in the North-Eastern extremities of the Eastern Cape Province, neighboring the Kwa-Zulu Natal province. The municipal area comprise of 27 administrative wards and two main urban centers known as Mount Frere and Mount Ayliff. The municipality is located in the Alfred Nzo District Municipality, as presented in Figure 3.1.1 and is bordered by the following local municipalities:

- Matatiele to the North
- Kokstad to the North-East
- Ntabankulu to the East
- Mhlontlo to the South-East
- Elundini to the west

Figure 3.1.1 Locality of Umzimvubu in the Eastern Cape

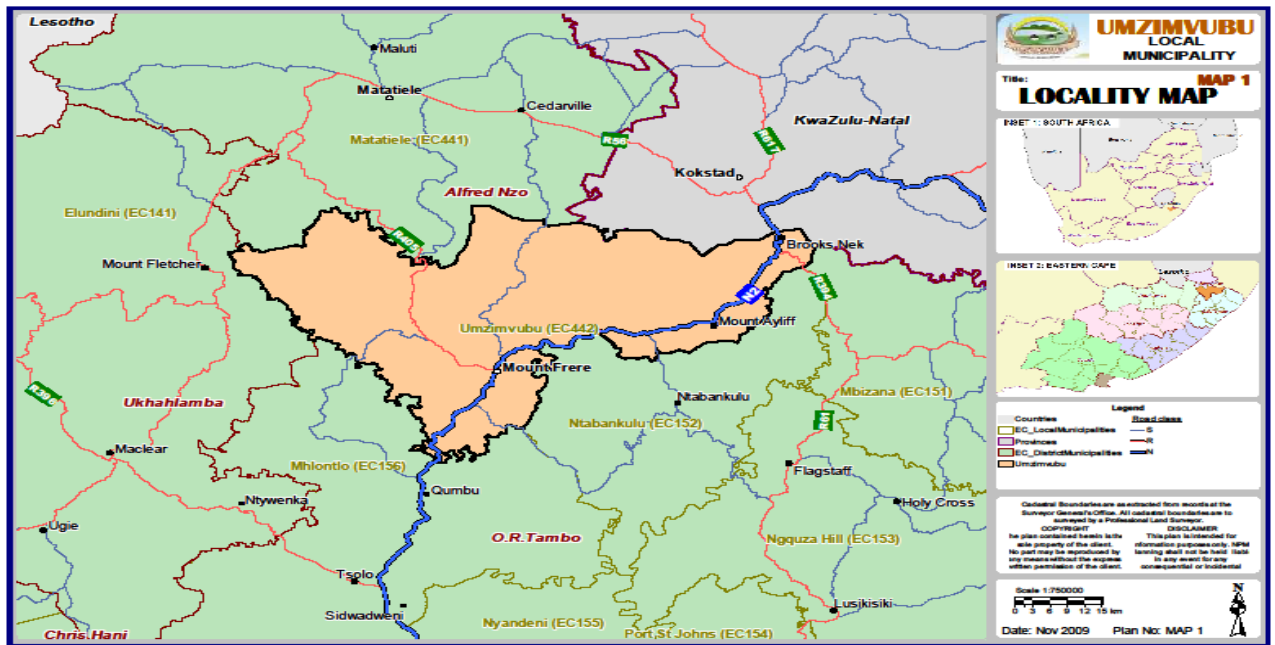

Figure 3.1.2 shows the umzimvubu as one of four municipalities in the Alfred Nzo District, with three other local municipalities being Matatiele, Mbitjana and Ntabankulu. The municipal area covers an area of approximately 2506 km². The national road (N2) traverses the southern part of the municipality, and provides connectivity between Mthatha and East London and on a broader scale the cities of East London and Durban. There is no rail linkage within umzimvubu and no operational airstrip. There are two primary settlement nodes in Umzimvubu, the town of Mount Frere and Mount Ayliff which are both situated along the national N2 road. Mt frere is the larger town and serves administrative functions for the municipality, as well as functioning as a retail hub for the area. Mt ayliff is the other urban area and is seen as a 'gateway' town to Kokstad and the Kwa-Zulu Natal province. The municipal area comprises of 27 administrative wards and secondary nodes in the municipality are found in Phakade and Phuti junction.

Umzimvubu is a largely rural municipality, with an estimated 90% or more of the population residing in villages. There are 250 villages which spread throughout the geographical extent of the municipality. The climate in the summer rainfall ranges from very pleasant warm summers to mild winters. Annual rainfall ranges between 650mm to 1100mm with thunderstorms and hail being a common feature in summer. The municipality is a malaria free area.

Umzimvubu accounts for 23% of the total square meters of the district.

Municipality	Area K m ²	Percentage of the district area
Matatiele Local Municipality	4352	39%
Mbizana Local Municipality	2806	25%
Umzimvubu Local Municipality	2506	23%
Ntabankulu Local Municipality	1455	13%
Alfred Nzo District Municipality	11119	100%

3.2 SETTLEMENT PATTERNS

There are two levels of settlement of hierarchy identified in Umzimvubu Local Municipality viz. urban and rural settlement. The urban settlements are the main service centers i.e. Mount Frere and Mount Ayliff. A broad appraisal of land use and settlement patterns within Umzimvubu Local Municipality indicates that the urban settlement is dominated by the residential settlement with the secondary urban area being central business district (CBD).

Non urban land within the municipality is characterized by either distinctive enclaves of rural settlement where rural and peri-urban settlements accommodate over 90% of the total municipal population. The rural settlement comprises of at least 250 villages throughout the municipal area. Each village consists of

between 50 and 250 homestead. The remainder of land is owned and utilized communally for grazing and subsistence farming.

The municipality comprises of only the primary and secondary nodes. These are areas where economic potential currently exist. We will elaborate further on these in the following chapter.

Primary Node:

Mount Frere, and
Mount Ayliff

Secondary Node:

Pakade, and
Phuti Junction

3.2.1 Mount Frere

Mount Frere is known as a service center providing a range of land uses from residential through institution to business, health and educational facilities. Therefore Mount Frere town is classified as a primary node.

The table below sets out an indication of the range and variety of land use found in Mount Frere urban area.

LAND USE	NO OF SITES	AREA (m ²)	AREA (ha)
Abandoned Building	1	4151	0.415
Agricultural	49	4163370	416.337

Total	1301	21389596	2138.960

Table 3.2 Mt Ayliff Land use survey

3.2.4 Rural Area

The municipal area is characterized by rural areas in which a large number of the population resides. At least 90% of the municipal population resides in these areas with inadequate resources and very poor infrastructure. The rural areas encompasses dispersed settlements and free-range grazing, however

these areas are increasingly gaining access to potable water, electricity. Houses in these areas are built of mud blocks, poles and thatch, alongside cement blocks and corrugated iron roofing.

3.2.5 Land Ownership

According to the Statistics South Africa Community Survey 2007, 50.9% of the Umzimvubu population owns their homes. This is under par with the District norm of 60% and the Provincial norm of 63%.

The Umzimvubu Municipality faces numerous challenges in terms of security of tenure. The traditional settlements that constitute the majority of the district are primarily subject to traditional forms of tenure such as PTOs (Permission To Occupy Certificates), 99 year leases and quitrent arrangements. These provide little in the form of secure tenure as it is understood in urban centres, where ownership by title deed is the norm. However, the traditional laws and community structures ensure that each household has recognized membership of the community and has the right to obtain access to household and arable land. Widows do not lose their homes and arable lands upon the death of their husbands.

There is a high prevalence of rural community land claims which delay development, even though the municipality has had some positive outcomes in the processing of these land claims which was very slowly due to the complexity of the history and current socio-political relationships prevalent amongst land claimant groups. Another factor is that there is a dire shortage of alternative land near enough to claimant communities as almost all land has land right allocations in place, some of them of very long standing. The prevalence of land claims has a crippling effect on the development opportunities and economic opportunities in the area and hampers housing delivery. This is, in part, due to the land restitution legislation that makes it very difficult, if not impossible, to legally undertake developments on land under claim.

The municipality has however developed a strategy in partnership with traditional leaders and land claims commission to resolve pending land claims. In the past year, i.e. 2012/13 the municipality has made some strides in resolving the issue of land claims wherein an agreement was drawn between the municipality and communities who were implicated to release land for development purposes in exchange for a project such as building a community hall for the community.

The Provincial Land Reform Office of the National Department of Land Affairs has recently completed the Area Based Planning Project that has identified the distribution of state land, land under claim and other forms of tenure. This information will soon be available to the District and Local Municipalities for use in planning.

3.2.6 Urbanisation

Urbanisation trends are led by migration of people from their rural to urban areas to seek better education, better jobs and better life style. This urbanisation leads to increase in informal houses on available vacant land adjacent to the town. The Municipality is currently formalizing all informal settlements in the two urban areas. The Department of Human Settlement is currently constructing rural housing to curb migration of people to urban areas. The municipality is also disposing off land for residential and business developments in both towns.

3.3 DEMOGRAPHIC PROFILE

There are various estimates for the population of the Umzimvubu Municipal area. For the purpose of the situation analysis the official Census 2011 and Community survey 2007 and Urban-Econ EC Calculations based on Quantec, 2010 will be used and these figures are widely used within all spheres of government.

Population Estimates

Umzimvubu Local Municipality has a total population of approximately 191 620 people on 2506 square kilometers area, 99.8% are Africans and the remaining 0.2% of the population includes the Coloureds, Asians and Whites. The average population density of Umzimvubu Municipality is 88 people per square kilometers which is higher than the district average of 70 people per square kilometers but is relatively low.

3.3.1 Population Profile and Household Trends

This section will briefly discuss trends and changes in the Umzimvubu populace. These are characterized in Table below within the district's standing, and allow for a better understanding of the area as an investment destination.

Table 3.3.1 Population profile

Indicator	Year	Umzimvubu LM	Alfred Nzo DM
Area km ²			
Population Size	2009	223 330	481 601
	1999	205 779	413 853
Number of households	2009	50 969	108 060
	1999	46 511	95 513
Population Density p/km	2009	89	70
Household Density (h/h p/skm)	2009	20	15
Average H/H Size (people)	2009	4.3	4.4
Average Population Growth Rate per year (1995-2009)	2009	0.85%	1.64%
		2009 0.85% 1.64%	
Age structure	2009	0-14: 40.3% □□ 15-34: 36% □□ 35-64: 17.9% □□ 65+: 5.6%	0-14: 40.3% □□ 15-34: 35.5% □□ 35-64: 18.7% □□ 65+: 5.3%

(Urban-Econ EC Calculations based on Quantec, 2010)

The Umzimvubu IDP (2010/2011) estimates that **90% of the population reside in rural areas**, with the rest being found in the two urban centres of Mt Frere (15 444 people) and Mt Ayliff (6 618).

The area has a large population given its rural nature and relatively **spatial extent**, as seen through the population and household densities. The population grew at a slow rate between 1999 and 2009, both in absolute and relative terms, mirroring Eastern Cape provincial trends. The average household size brings out the rural nature of the area.

With regards to the municipality's age structure, it emerges that juvenile cohort (0-14) have a high level of representation. Converse experienced individuals are to be found

17.9% of the population. What thus stands out is thus the area has a youthful population, which is a factor to be characterized in the economic development of Umzimvubu.

3.3.2 Age and Gender Profile

The age profile for age groups 0 – 14, 15 – 65 and 65 and up is reflected in the table format below. These categories represent infants and school going age category, school leaving and economically active category and retired category, respectively.

The municipality comprises of 54% female and 46% male of the total population.

Age	Male	Female	Total	%
0 – 14	47 924	45 803	93 727	42
15 – 65	48 811	62 886	111 697	51
65 and up	4 992	10 214	15 206	7
Total	101 727	118 903	220 630	100

Table 3.3.2 Age and Gender profile (CS 2007)

Figure 3.3.1 Population Distribution by Gender

3.3.3 Racial Profile

The population of Umzimvubu municipal areas is predominantly African. African people constitute 99.8% of the population. The table below reflects the overall race breakdown of the population in the municipal area.

Figure 3.3.3 Racial Groups

3.4 SOCIO – ECONOMIC ANALYSIS

This section considers salient features that define the Umzimvubu area. The characteristics of an area determine its present investment climate, and also have a bearing on its suitability for various forms of economic activity in the future. If the planning principles and guidelines brought out in the previous section are to be implemented effectively, a good understanding of the area’s socio-economic traits is needed, as will be developed in brief in this section.

Level of Education and literacy

The education levels achieved by a group of individuals are indicative of the level of human development within a population group. It furthermore serves as **the potential of the population** generate an income, thereby increasing the capital (social and otherwise) circulating in the micro-economy. The average educational attainment levels of residents of the Umzimvubu area are presented in Figure 3.4.1. The area has a low number of high and primary schools (SDF, 2010), as well as one higher learning institute (Ingwe Training College).

From the figure above it can be seen that the area has **low levels of educational achievement**, with only 7.1% of the population having completed Matric or higher. This compares poorly against the Eastern Cape and is less than half of the provincial average of 16.5%. This has implications on the worker profile, as individuals that have not reached a certain level of educational attainment are often faced with barriers to entry into the formal employment market. This has further bearing on the nature of investment activity that will be feasible and sustainable in the area. Without the provision of adequate education and training, a skills deficit may constrain future development within the umzimvubu area.

Although there appear to be an adequate number of primary education facilities in the district, there is a conspicuous lack of senior secondary schools with less than 10% percent of schools providing secondary level education. This is aggravated by poor access to these facilities. The only tertiary education facility is a FET College in Mount Frere.

This lack of secondary and tertiary education facilities contributes significantly to the low literacy and education levels and lack of graduates in the area..

3.4.2 Employment Status & Occupation

As was indicated in the education profile, education levels have an impact on employment levels in an area. Employment in turn has an impact on household income levels and the **overall economic structure** of an area. An investment plan such as this takes due characterized of the relationship between the levels of education and how these translate into characterized economy employment opportunities for the residents of the area. Any actions by the Umzimvubu local municipality must thus consider the current state of employment in the area.

For the purposes of this section, people’s employment status may be categorized as employed, unemployment and not economically active. These statuses may be defined as:

Employed have within the last seven days performed work for pay.

Unemployed (i.e. Those people within the economically active population who: did not work during the seven days prior to the interview; want to work and are available to start work within two weeks of the interview; and have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview.)

Not economically active (i.e. A person who is not working and not seeking work not available for work)

Umzimvubu has a working age population of approximately 118 122 individuals. However, given the low levels of functional literacy in the area (adult population that has gained at least a grade six level of education), the **quality of the Umzimvubu labour pool is compromised**, giving rise to a small base of employable individuals from the area.

Employment levels are very low, with fewer than one in three adult residents engaged in gainful employment of a formal or informal nature. It is further estimated that almost a quarter of all employment in the area is informal in character. This leads to a **low labour force participation rate** of 38% in the area (Quantec, 2010)

It can be seen from the high percentage of individuals classified as 'not economically active' that there is a **high level of worker discouragement in the area**, which are those individuals that have given up their attempts to gain employment, because of perceived futility in the action. This undermines the otherwise low level of unemployment and puts to the fore the reality of

Skills mismatch (given the educational profile of the area)

New entrants into the labour market (given the youthful population demography of the area)

Barriers to entry into the job market (geographic and financial, especially given the rural nature of the area)

Low wages in the area in comparison to wages commanded in other places such as Kokstad.

The high level of economic inactivity and de facto unemployment is a structural issue that is to be addressed by planning documents such as this investment plan

Figure 3.4.2: Employment Levels

The nature of employment in the area is presented above, with most employment opportunities arising for semi-skilled individuals. The implication of this is that:

There are limited opportunities for highly skilled labour to be employed in the area, which may perpetuate structural brain drain

The majority of the population which is unskilled is also not fully catered for through labour-absorbing opportunities

These two factors serve to undermine the quality and robustness of the Umzimvubu labour pool

3.4.3 Household Income

The demographic make-up of an area, coupled with its educational characteristics and employment trends all have an impact of household incomes. Household incomes in the context of this report are important insofar as they function as a proxy that reveals the extent of poverty in the area. An investment (social, infrastructural, financial or otherwise) that takes place in Umzimvubu will be undertaken within the socio-economic parameters enforced by poverty and income levels of local households.

Household income is defined as the combined income of all members of a household. The determination of the income includes:

- Labour remuneration
- Income from property
- Transfers from government (including pensions)
- Transfers from incorporated businesses
- Transfers from other sources

Figure 3.4.3 shows the distribution of households per different income categories in the Umzimvubu locality.

Household income is concentrated and compressed in the lower brackets, with a cumulative 65.4% of all households earning less than R1 600 per month. Although South African government does not prescribe to any universal measure of poverty, based on the Bureau of Market Research's Minimum Living Level and the UNDP's parity US\$1 per day, **over 65.4% of all households subsist to varying degrees in income poverty.**

The low levels of income have wide-ranging ramifications on the Umzimvubu economy, perpetuating depressed HDI score cycles and limited access to economic opportunities within the area. This corresponds with a high percentage of the population being dependant on grants, subsidies and other forms of transfer payments from the government for their daily livelihoods.

The low levels of household income negatively affect the effective dependency ratios, which compares the portion of those in the population not **able** to work with those that make up the productive labour pool in Umzimvubu

3.4.4 Employment per Sector

The employment per sector categories for the study area reflected in the column graph below. The information is derived from the 2007 community survey.

The employment sector is dominated by elementary occupations and occupations requiring low skills levels. Elementary occupations constitute 34.3% of the employment sector. Craft and related workers, service shop market and sales workers, and clerks jointly constitute a further 22.5% of the employment sector. Professionals, technicians and associate professionals and legislators /senior managers jointly constitute only 36.8 % of the employment sector. If one compares Matatiele Local Municipality to Umzimvubu Municipality, there is a significantly higher number of the latter group in Umzimvubu Local Municipality which is probably attributable to a high number of government services in the municipal area, including a Local Municipality, District Municipality and the District offices of several Government Departments as Mt Ayliff was declared by the Provincial Legislature as the home of district offices of sector departments.

This dominance of elementary and other low level occupations is testimony to the low skills base of the area. This is aggravated by an absence of tertiary educational institutions which contribute significantly to the low levels of graduates in the area. Consequently there is an acute shortage of skilled artisans, engineers, project managers, business management skills and technical skills in agriculture, tourism, forestry and environmental management.

3.4.5 Dependency On Social Grants

There is a high level of dependency on social grants. 79789 people or 31.3 % of the population are dependant on social grants which include the following;

- Old age pension
- Disability grants
- Child support grants
- Care dependency grants
- Foster care grants
- Grant in aid
- Social relief

Child support grants and old age pensions respectively constitute 68.6% and 20.9% of the allocated grants. Only 2.7% of the population is receiving disability grants as compared to the 4% of the population who have a disability. Given the high poverty levels, the Municipality needs to facilitate a process to ensure that all potential beneficiaries of grants receive what they are entitled to.

Poverty Levels

Increasing levels of absolute poverty have been recorded in the Eastern Cape and 74% of the people of the Eastern Cape live below the poverty line of R800 or less a month. Poverty levels in the Alfred Nzo District are higher than the Provincial norm at 82.3%. Poverty levels within Umzimvubu Local Municipality are 81.1% which is higher than the Provincial norm but on a par with the District norm. High poverty levels imply a high dependency on social assistance in the form of grants. Municipal planning therefore needs to focus strongly on poverty alleviation mechanisms.

3.5 SOCIAL INFRASTRUCTURE

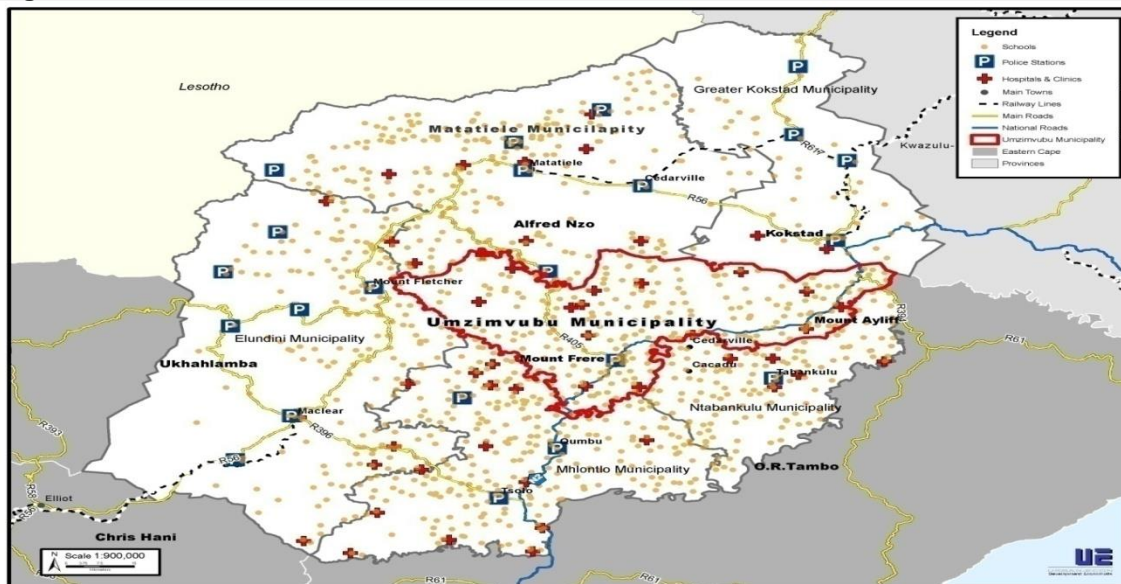

Investment decisions are based on the availability of resources, infrastructure that supports the extraction and processing of such resources and a third element which is often under-looked, but plays a pivotal in shaping the Umzimvubu business environment. Social and institutional capital factors have a bearing on the Umzimvubu business environment is of far as they:

- Influence investment decisions based on ‘soft’ issues such as perceptions
- Determine the working environment from which entrepreneurs will either be supported and thrive, or stifled and fail
- Affect the quality of life enjoyed or endured by residents of the locality.

3.5.1 Social Services

The socio-economic profile reviewed some pertinent developmental indicators that determine the quality of life enjoyed by residents of Umzimvubu. This section will look at the provision of various form of social infrastructure. The provision of social services has a bearing on the quality of life and whether a labour-force can be sustained to enjoy fulfilling lifestyles out of the workplace.

Figure 3.5.1: Provision of Essential Services in Umzimvubu

(Municipal demarcation Board, 2009)

Figure 3.5.1 shows the provision of various essential services in Umzimvubu. This is illustrated through the location of police stations, hospitals and clinics throughout the locality of the municipality.

From Figure 3.5.1 an indication of the following can be garnered:

- **The adequacy of health institutions**

One factor that influences the investment decision is the provision of health facilities in an area, as proximity to these often affects the quality of healthcare afforded to one's workforce. There are district hospitals in Mt Frere and Mt Ayliff as well as 20 fixed premise and 2 mobile clinics in Umzimvubu.

- **Safety and security**

From Figure 3.5.1 it can be seen that there are 2 police stations in Umzimvubu's urban areas. The location of police stations has a strong impact on crime prevention and community safety, which are both factors that affect the decision to relocate to a certain area or not. In Umzimvubu the risks and dangers of burglary at residential premises and stock theft in non-urban areas are cited by stakeholders as often affecting business location decisions. There is local safety forum which operates under Intergovernmental Relations Framework Act. The forum deals with issues in the community safety plan.

- **Education**

The decision to do business in an area is affected by the provision of educational facilities insofar as they influence the quality of one's labour pool, and the quality of education that one's dependants may receive if one relocates to an area. In the Umzimvubu Local Municipality area there are approximately 245 educational facilities. Of these facilities there are 7 Junior Primary Schools, 29 Senior Primary Schools, 172 Junior Secondary Schools and 21 Senior Secondary Schools. (There are 13 other schools such as preschools) In total, these educational facilities have 80445 learners and 1281 educators.

Although there appear to be an adequate number of primary education facilities in the district, there is a conspicuous lack of senior secondary schools with less than 10% percent of schools providing secondary level education. This is aggravated by poor access to these facilities. The only tertiary education facility is a FET College in Mount Frere. This lack of secondary and tertiary education facilities contributes significantly to the **low literacy and education levels** and lack of graduates in the area.

- **Library Services**

The municipal area is currently developing Two Libraries to assist in the provision and promotion of a culture of reading, library usage and learning so as to enrich communities. Umzimvubu Municipality in collaboration with Coega Development Agency (an implanting agent contracted by Department of Sport, Recreation, Arts and Culture) to develop a Library in Mount Frere and Mount Ayliff town, they are both on their final stages awaiting for an official hand-over.

- **Museums**

Umzimvubu Local Municipality in collaboration with the Department of Sport, Recreation, Arts and Culture are currently developing a Regional Museum in Mount Ayliff in an attempts to bring about an interactive system for the management and empowerment of society to nurture and conserve 'their heritage resource so that they may be bequeathed to future generation.

- **Sport & Recreation Facilities**

The Municipality is managing two sports fields (one in Mount Ayliff and 1 in Mount Frere). They are both valued for its contribution to the sporting, recreation and social life of the people of Umzimvubu Local Municipality, visitors and surrounding areas. It is also valued for the benefits it will bring for future generations. The Mount Ayliff sports field artificial turf development is completed and handed over. Badibanise sports field in Mt Frere is currently under-developed, even though there are plans in place to develop the facility starting with phase one in 2013/14. However, general maintenance has been done. There are no proper sports fields in some rural areas, which poses a concern as our population is largely characterised by youth.

There are plans underway to develop a multi-purpose centre in Mt Ayliff sports field which will include a tennis court, swimming pool... This upgrading of the facilities and the will cater for school and local community events.

Public, Social and Recreation facilities and amenities play a major role in the overall social development of the society such that these activities moral discipline, keep youth out of the streets. The ever – increasing crime and other social ills (i.e. teenage pregnancies, drug abuse etc.) gave rise to the importance of these activities and they should be viewed as the productive alternative that the youth can engage itself with. Although there is a lack of adequate standard sports and recreational facilities within the Municipal area, Umzimvubu's existing sports facilities hosted various sports events including school, local community events and inter-municipal sports competitions.

- **Parks and Public Open Spaces**

The Municipality is operating and managing two Parks to provide active and passive recreation to communities. Ntsizwa Park upgrade is completed, Sophia recreational Park Development is under construction phase.

A number of public open spaces have been maintained, the activities include amongst other things the followings:

- Trees and shrubs that obstruct streets, alleys and sidewalks cutting and pruning.
- Grass cutting.
- Landscaping and greening maintenance.

- **Cemeteries**

Umzimvubu Local Municipality has continued to operate and manage four Cemeteries (two Mt Ayliff and Two Mount Frere), and they are all maintained on regular basis. The maintenance activities include the following:

- Landscaping and Greening
- Grass cutting,
- Removal of unwanted vegetation,
- Grave digging and allocation, and
- Access control
- The operation activities involve the following:
- Cemetery management System

- **Community Halls**

A large number of community multi-purpose halls are available for use by community members. This is where the municipality obtains some of its revenue by letting these halls. There are approximately 26 halls existing in the area. However these halls are not equally shared amongst the 27 administrative

boundaries. At least 5 wards do not have halls and some wards have more than one hall. The halls are in a good to fair state.

The municipality prioritized construction of two halls in two wards in 2013/2014. The halls have been completed and awaiting handing over.

- **Integrated Solid Waste Management (ISWM)**
- **Domestic Waste Collection**

Umzimvubu Municipality is responsible for Domestic Waste collection in their own area of jurisdiction. The Municipality do waste collection services (Street sweeping, litter picking, refuse bag provision/curb side collection and waste bin provision/servicing) in 2 urban centers or towns and 8 rural areas, 5 days a week in residential area and 7 days a week in urban areas.

At present the municipality collects an estimated 11% of the sorted and unsorted Municipal waste from households, suitable properties and businesses to waste facilities (GCB-) for recycling and final disposal. The higher waste collection backlog percentage is sitting with rural areas and illegal waste dumps.

In an attempt to address the backlogs the municipality should prioritise:

- Identification of new/additional rural areas using EPWP Food for waste programme and other EPWP under Environmental and Cultural Sector.
- Embark on process to rehabilitate illegal dumping sites;
- Full implementation of ULM Integrated Waste Management Plan

During the year under review the municipality has engaged itself in lot of activities which included the following; refuse removal and transportation, Landfill Site Management, Illegal dumping site rehabilitation, Waste Information System, Waste Recycling, By- Law Enforcement and Education and Communication. In light of the above, Umzimvubu has plant, equipment, tools, facilities, man power, waste collection crew and operations systems to ensure effective and efficient domestic waste collection service. During this period ULM was able to install 85 waste side bins for temporally storage of waste and to curb littering. Other activities included the following kerb collection services, street sweeping, litter picking and workers are operating on their schedules and adhere to waste collection map. Business waste is collected on daily basis and on residential sites waste is collected twice a week.

ULM works under a licensed land fill site which was a great achievement during the financial year of review and has appointed a service provider for the supply and installations of WIS that will assist the municipality to capture routine data on tonnages of waste generated, recycled and disposed on monthly and annual basis

There are wide ranges of recycling initiatives that took place during the year under review in relation to waste minimization. To the year end 4 permits have been issued in an attempt to promote sustainable waste minimization programs and to regulate salvaging on land fill sites. Scavenging is only permitted at both sites from 16: 30 daily after operations on site have ceases for the health and safety purposes. Waste by back center has been developed and is in operation indicating that some amounts of money are generated per month. We have entered in services level agreement with 3 cooperatives running the centre so as to be able ascertain the waste stream recycled in terms of waste volumes, type and money generated in the process so as to enable to plan, report and enhance programme. Mthe following is the more detailed description of some activities under ISWM:

- **Refuse Removal and Transportation.**

Two Refuse standard Trucks, two Refuse Compactor Trucks, 7 operating on time, on schedule and adhered to refuse removal map. All waste collection points and suitable properties were serviced; the

refuse has been transported to our waste facilities for a final disposal off. Furthermore, we are working on FM GPS refuse truck tracking unit installation for accurate records travel times and distances, Geofences, and a detailed telemetry information (Accurately recording speeds, times, cadastral, locations, and distances) to develop reports. To this end the unit has been procured and installed.

- **Landfill site Management**

The Municipality operates and manages two GCB- waste facilities, they are both permitted. We are currently working on four working faces/landfill cells for a final waste disposal off and cell operations (compaction, covering and litter picking), controlling and directing waste vehicles from households and businesses for proper working face areas. access control, logging of vehicles that access the facilities and direct vehicles for proper working face.

- **Illegal Dumping sites**

Approximately 200 active illegal waste dumping sites have been identified and mapped, estimates that over 150 of these sites are within 20-30 metres of schools, homes and sensitive biodiversity areas. To this end, the Municipality is working/rehabilitating almost all the sites.

- **Waste information System**

WIS provides a mechanism for obtaining accurate waste balance information through online submission of data by waste facilities. Our Waste Information System is currently up and running as required in terms of Section 60 of the Waste Act. This system is used by ULM to capture routine data on tonnages of waste generated, recycled and disposed of on a monthly and annual basis. To this end, both Mount Frere and Ayliff waste data have captured.

- **Waste Buy Back Centre**

Solid waste buy back centre assist in addressing the challenges of dealing with increase generation of solid waste and the scarcity of land for disposal. This centre also reduces the challenges of unemployment through promoting entrepreneurs to operating waste recycling businesses. To date, tonnages of recyclable material have been diverted from landfill.

Cooperatives have been established to deal with waste recycling for economic purposes. Partnerships have been form with international companies with regards to construction of buy back centres in the municipal area. There is a food for waste programme that is aligned to EPWP Principles that implements waste practices.

According to the Statistics South Africa Community Survey 2007, only 4% of households have access to a weekly refuse removal service. 84% of households make use of their own refuse dumps which implies a high level of indiscriminate dumping and little regard for the impact on the environment. In spite of this, the municipality has installed “**no illegal dumping**” signs in areas that were identified to have high volumes of dumping. Waste bins have been installed in both towns, and the public response in using the bins is well commendable.

- **Disaster Management**

The Alfred Nzo District Municipality is responsible for the provision of Disaster Management and Fire Services in the District. ANDM has a Disaster Management plan in place to effectively manage disasters which stem primarily from natural causes (tornadoes, storms and winds etc). Services are rendered from the central disaster management centre in Mount Ayliff and a satellite centre in Mount Frere urban area

both serve the Umzimvubu Local Municipality. However, the municipality has a disaster management plan. The Local Municipality cooperates with the ANDM in the provision of these services.

- **Roads and transportation**

It is important to consider the state and extent of road networks in Umzimvubu. Roads serve as a gateway into the Umzimvubu interior, allow access to natural resources, and facilitate the transportation of goods out of sites of economic activity to their intended markets.

The impact of roads on the nature of economic activity in Umzimvubu is presented in Figure 3.5.2 which overlays population density upon the area's road network. From Figure 3.5.2 it can be seen that the N2 national road and the R405 serve as a spine from which settlement patterns in the area is determined. Both town centres of Mt Frère and Mt Ayliff are fully accessible by road and from the Figure shown below and it can be deduced that **the road network in Umzimvubu thus has a strong bearing on the spatial spread of economic activity.**

The provision of roads is thus an important factor that stimulates economic activity in Umzimvubu. The provision of tarred and well graded gravel roads throughout the municipality is also essential. These would take the form of secondary roads that provide access to settlements other than Mt Frere and Mt Ayliff. Good quality and well maintained secondary roads are important in Umzimvubu as they allow:

- Tourists to venture to different areas
- Villagers to transport agricultural produce to market areas
- Forestry stakeholders to access land in which plantations may be established
- Cheap carriage and delivery of essential retail goods to villages spread throughout the locality

Figure 3.5.2: population density and transport routes

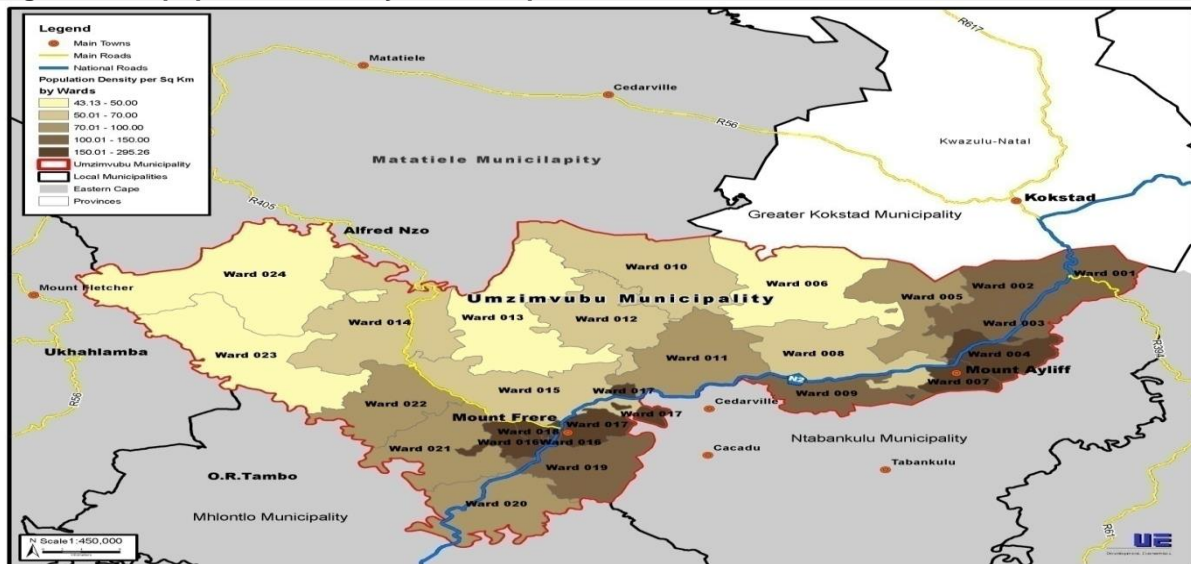

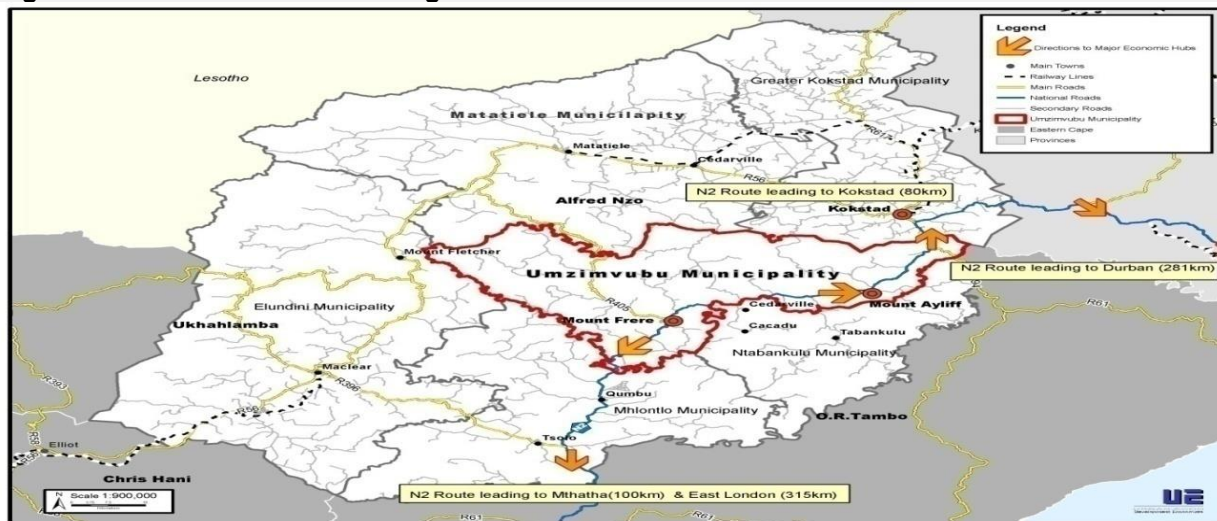

Figure 3.5.2 shows the extent of the secondary road network in Umzimvubu as compared to that in neighbouring municipalities. Umzimvubu has 658.68km of secondary roads that provide access to a municipal area of 2506 km². This is a low figure when consideration is made of the fact that Umzimvubu has over 250 village settlements within its locality. The implication is thus that very few communities are fully accessible by road, with those that are located in close proximity to the N2 and the R405. These areas include the secondary nodal points of Shinta, Phakade and Rode.

From Figure 3.5.2 it is evident that Umzimvubu has a markedly lower level of internal connectivity (from village to village) than its neighbouring municipalities. This has implications on the real and effective costs of doing business, and **compromises the competitiveness of Umzimvubu as an investment destination**. In addition, a low level of connectivity places a ceiling on the level of economic participation that is afforded to residents of Umzimvubu.

Having considered the extent of the road network, the next factor to look at is the quality of the roads that are available. The quality of roads has a strong bearing on how business is done in Umzimvubu as it has an impact on the willingness of and cost at which entrepreneurs conduct business. Poor quality roads increase fleet maintenance costs and accelerate the rate at which motor vehicle assets depreciate, increase delivery times, and may function as de facto physical barriers to market access.

The Department of Roads and Public Works has however invested on surfacing the road to Siphethu Hospital. This will have a positive impact on our road users from the municipal area.

Figure 3.5.3: Road distances to regional destinations

Only 2.65% of roads in Umzimvubu are tarred, which provides an indication of the state of roads in the area. The SDF (2010) states that poorly constructed and maintained rural gravel roads are frequently water logged and do not survive heavy rains in the summer, which is compounded by the absence of a comprehensive after care programs. This in effect becomes a physical trade barrier in Umzimvubu. It must however be noted that part of the reason why there is a low level of connectivity is found in Umzimvubu's terrain being mountainous particularly in the central and northern parts of the municipality, which increases the cost and difficulty of road construction.

Figure 3.5.3 also shows the distance from Mt Frere to key regional destinations. The following routes have been earmarked in various planning documents (Annual reports, Integrated Development Plans and spatial Development Frameworks) as needing newly constructed or upgraded roads. The absence of good quality routes that link up these areas is seen as a formidable barrier to development. Given the areas' tourism potential, physical features (such as rivers) access to natural resources, large populations and proximity to municipal nodal growth points, the following routes have been identified as priority roads:

- Mt Ayliff to Madzikane, Qwidlana falls and Nopoyi
- Umzimvubu valley e.g. route linking to Mbiyana-shared initiative
- Route linking Ncome to Matatiele
- Siqhingeni to Ndakeni
- Nkungwini to Ntlabeni
- Sipolweni to Cabazana

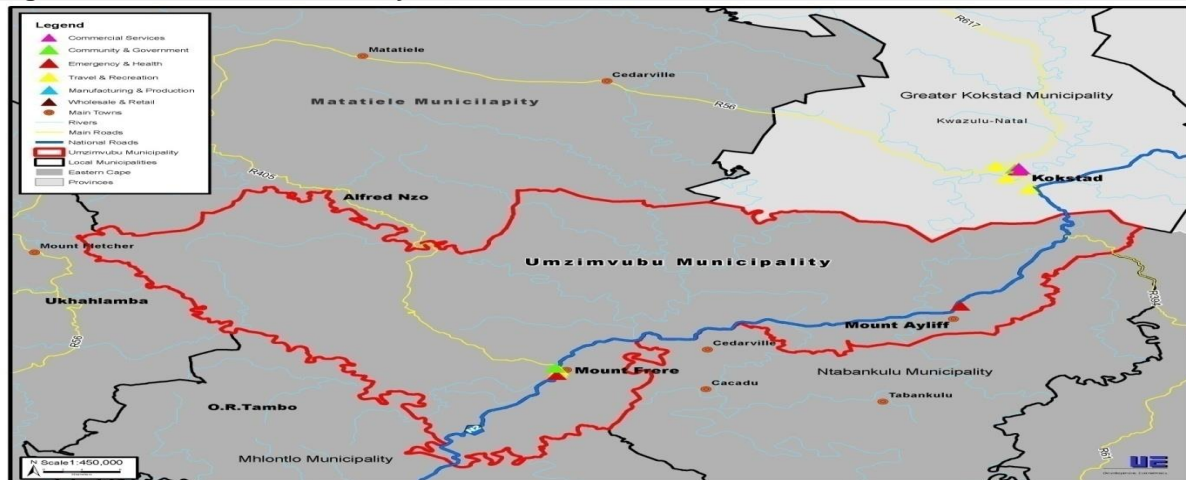

- Ngwetsheni – Mt. White
- **Comprehensive Infrastructure Plan**

The municipality has Comprehensive Infrastructure Delivery Plan. The CIP give effect to services that are rendered by Umzimvubu Local Municipality and those of the Alfred Nzo District Municipality and other sector departments.

3.6 PROVISION OF ANCILLARY ECONOMIC INFRASTRUCTURE

This section shall briefly consider the supply and quality of auxiliary services that are necessary for the creation of an environment that is conducive to the sustainability of business activity. The figure below shows the provision of various services in Umzimvubu and Kokstad as per DPLG classification of different settlements in South Africa. Comparison can thus be made between the two municipalities with regards to the provision of various services.

Figure 3.6: Provision of ancillary economic infrastructure

(DPLG, 2007)

From Figure 3.6.1 it is evident that Mt Frere and Mt Ayliff are only classified as having significant economic infrastructure for Community services, Emergency & Health, small scale manufacturing. In comparison, Kokstad is classified by the DPLG as having economic infrastructure for wholesale and retail, commercial services and travel and recreation, in addition to that which is provided for in Umzimvubu.

Umzimvubu this performs poorly in comparison to Kokstad in the provision of essential ancillary economic infrastructure which serves as a determinant for economic growth. Although Umzimvubu does have some commercial services, wholesale and retail and travel and recreation, it fails to achieve critical mass in the provision of facilities to support such activity. This undermines the ability of clustering and agglomeration advantages to be exploited.

3.6.1. Water

Infrastructure for water and sanitation services to the Umzimvubu municipality area is the responsibility of the district municipality. Therefore ANDM is the Water service Authority (WSA) for the area under its jurisdiction. The Water Service Development Plan (WSDP) 2007/08 reflects that out of 47, 000 total

households 12, 000 household have no water, 6, 000 are provided water but below RDP standard and 22, 000 are provided with water according and above RDP standards.

3.6.2 Sanitation Infrastructure

The ANDM's mandate is to also provide the sanitation services to the municipal area. The WSDP 2007/8 reflects that out of 47 000 total household 19, 000 household are served by flush toilets, VIP or septic tanks and 27, 000 households are deemed to be un-served.

3.6.3 Electricity

Eskom is responsible for provision of electricity to the municipal area. The Figure below illustrates the number of household that have access to electricity for lighting purposes. The information is based on the Census 2001.

However, the access to electricity for lighting has improved from 2001 (24.1%) to 45.2% in 2011, (census 2011). Despite the improvement, there still remains a huge backlog within the area. Households without access to electricity use a range of alternatives for lighting and cooking, such a candles, gas, paraffin, and solar forms of energy.

Implementation of the Indigent Policy

- The municipality has an indigent policy in place and it was approved by council.
- The indigent register is reviewed annually whereby all beneficiaries are invited to verify their economic status.
- The municipality is providing Free Basic Services in a form of a Gel and oil lamp to designated beneficiaries.
- There is a cooperative that was established to deal with FBS by being distributors locally.
- Grid electricity beneficiaries are benefiting from Eskom when they buy electricity.

Figure 3.6.3 Access to Energy

3.6.4 Telecommunication

Figure 3.6.4 below illustrates the number of household that have access to Telecommunications. The information is based on the Census 2001. Access to telephone is assessed by the quality of cellular network reception in an area. Although fixed land lines are available in some communities, the cell phone network remains the largest telephone medium by far.

Figure 3.6.4 Access to telecommunications

3.6.5 Public transport

Despite some investments in new roads and maintenance there remain local communities who are isolated and disconnected due to poor road infrastructure. This has significant consequences in terms of local economic development as well as service delivery, especially accessibility to emergency ambulance services.

Transport whether motorized or non-motorized faces many challenges within the Municipal area. These can be summarized as follows:

- Poor conditions of roads
- Inadequate pedestrian signs and markings and off loading areas especially within the few urban areas
- Limited traffic calming measures within areas of high accidents
- An absence of traffic lights, especially at major intersections
- Unavailability of adequate public transport facilities especially for the disabled
- Lack of cooperation between public transport operators and the municipal authorities
- Lack of institutional capacity at Local and District Municipal level to manage transport planning and implementation
- Outdated/non-existent information at the taxi registrar
- Lack of pedestrian and non-motorized transport facilities

In spite of the above, the municipality and the Department of Roads and Transport have initiated some of the following initiatives:

- Paving of streets in the urban areas that is implemented along with surfacing of streets in urban areas.
- Development of underway bridges.

- The Shova Kalula bicycle project which benefited a number of schools in the District.
- The AB 350 which established 12 busses on various routes in Umzimvubu.
- Scholar transport was operated by a number of schools in the Municipal area.
- Airstrips in Mt Ayliff
- The municipality also utilizes some of its own funds (municipal revenue) for development of roads infrastructure.

3.7 NATURAL RESOURCE MAPPING

As a rural economy in which livelihoods are linked to land, the natural resources in Umzimvubu have a strong bearing on development. The combination of the physical contextual characteristics of the Umzimvubu Area, including land, water systems, climate and vegetation, has a direct effect on economic activity (in particular related to settlement patterns, agricultural production and tourism). This section will thus seek to profile the natural resources available in Umzimvubu, insofar as they are linked to present economic activity and any future potential investment that may take place.

3.7.1 Land

A key issue that affects the nature and form of business activity in Umzimvubu is land use and land cover, predicated on:

- The availability of land to purchase or lease within urban and rural areas
- Management and planning to guide the spatial development of the Municipality
- The capability of land to undertake different economic activities
- The security of land tenure

Table 3.7.1: Land cover in Umzimvubu

Description	Hectares	%
Cultivated: commercial dryland	84	0.03
Cultivated: semi-commercial/ subsistence	30 672	12.22
Degraded: unimproved grassland	82 589	32.89
Forest	3 041	1.21
Forest plantations	5 587	2.23
Thicket and bushland	12 284	4.89
Unimproved grassland	106 398	42.38
Urban/ built up land	10 010	3.99
Water bodies	41	0.02

(DAFF, 2010)

Table 3.7.1 shows the different land cover classifications in Umzimvubu, and reveals that :

- A negligible amount of land is currently used for commercial agriculture
- **Almost a third of all land is categorized as degraded.** This is made up of permanent or seasonal man-induced changes such as removal of trees, bush or herbaceous cover in comparison to surrounding natural vegetation.
- Land covered by forests is limited and comparable in extent to that occupied by the built up areas.
- The availability of land to purchase or lease is a significant impediment to development in Umzimvubu.
- In urban areas vacant land is often under-utilised because of delays in zoning applications and a reluctance by present land-owners in and around urban areas to either sell their land or develop it. This means that **land (which is well situated, serviced and accessible to markets) as a factor of economic production is under-supplied in Umzimvubu.** Areas that are earmarked for the expansion of urban areas cannot be developed.

- In rural areas **unresolved land claims** limit the potential for private sector involvement in agricultural and tourism initiatives as most land is under tribal authority through various occupation and usage regimes.
- These two factors mean that the ease of doing business in Umzimvubu is reduced by difficulty in acquiring land
- The municipality has put in place a draft policy to combart land invasion.

Figure 3.7.1: Umzimvubu land capability

(AGIS, 2010)

Figure 3.7.1 shows land capability for various activities in Umzimvubu. Land capability is determined by the collective effects of soil, topography, hydrology and climate features. It indicates the most intensive long-term and sustainable use of land and at the same time highlights the permanent limitations associated with different land use classes as shown in the Table below. This shows the nature of agricultural activity that can be feasibly undertaken throughout the municipality.

From Figure 3.7.1 it can be seen that vast tracts of land in Umzimvubu are suitable for:

- Moderate crop production
- Livestock grazing in pastures
- Rain-fed Forestry and plantation

Table 3.7.2: Classification of Land capability

Land Capability		Intensity of use for rain-fed agriculture						
		Grazing and Forestry			Crop Production			
Non-arable	Classes	Forestry	Veld	Pastures	Limited	Moderate	Intensive	Very Intensive
	I	x	x	x	x	x	x	x
	II	x	x	x	x	x	x	
	III	x	x	x	x	x		
	IV	x	x	x	x			
	V	x	x	x				
VI	x	x						

VII	x	x					
VIII	x						

(Directorate of Agriculture Land Resource Management, 2002)

Umzimvubu land thus has the capacity to support various forms of agriculture. **Access to land is however a major impediment to this capacity being tapped into and 70haracte.**

3.7.2 Water Systems

As part of the assessment of natural resources in Umzimvubu, it is important to consider water resources in Umzimvubu. Umzimvubu has a well developed river system which forms a foundation for aesthetic appeal and high environmental quality. Perennial streams in the area converge to form the primary tributaries of the upper Umzimvubu catchment area. The major rivers in Umzimvubu are:

- The perennial Umzimvubu River which crosses from the North-East to the South-Western. It is crossed by three bridges at Ndarala, Mhlotsheni and the N2 between Rode and Mount Frere.
- The Umzintlava river which cuts across the eastern boundary
- The Mkemane and Mvenyane rivers which flow from north west, and join the Umzimvubu south of the N2.
- The Kinira river which joins the Umzimvubu river near Rode

Umzimvubu has high levels of rain in comparison to neighbouring municipalities such as Ntabankulu, Matatiela, and Greater Kokstad. **Mean Annual Precipitation for the municipality is 780mm**, ranging from 620-816mm in the dryer and wetter parts respectively. Rainfall is a key variable that shapes the developmental landscape in Umzimvubu by affecting:

- Rural livelihoods
- Tourism
- Subsistence agriculture
- Commercial agriculture

(SDF, 2007)

Figure 3.7.2: Rainfall in Umzimvubu and surrounding areas

(Agis, 2008)

Water resources provide a variety of direct and indirect ecosystem services. Not only is drinking water essential to human survival, but water resources are also critical to cultivation, processing and manufacturing. In addition the river systems of Umzimvubu contribute to the sense of the place of the Umzimvubu river valley and in the future may become important tourist and recreational resource.

At present the nature of business in Umzimvubu is not influenced by the area's river systems, rainfall patterns or hydrology to a great extent. Recreational tourism linked to the river systems (such as seasonal rafting on the Kinira and Umzimvubu rivers, cliff diving and visits to Tshisa springs) does not take place on a commercially notable scale.

Commercial agriculture that uses irrigation from the rivers or summer rainfall is also not taking place on a notable scale. In addition to this, subsistence agriculture is based primarily more on settlement patterns (the location of villages which is often based on historical factors) than rainfall patterns as depicted in Figure 2.5. The land issues highlighted in the previous section are cited as the main contributory factors that lead to the private sector not 71 characterize on the economic opportunities linked to the river systems in Umzimvubu.

It is worth noting that the high rainfall in Umzimvubu when considered in light of poor livestock grazing techniques can potentially lead to high levels of land degradation through top soil erosion and the formation of gulleys.

3.8 Climate and Vegetation

The vegetation in an area represents an integration of climate, soil and a number of other biological factors. Physical factors including geomorphology and geology also act as variables that determine vegetation types and biodiversity. Climate and vegetation in this section are seen as determinants of:

- Forestry
- Livestock farming
- Crop farming

Umzimvubu lies in a subtropical climatic zone, meaning that the area is characterized by warm summers and cool winters. The average temperature ranges from 7^oC to 10^o C in winter and 18^oC to 25^oC in summer. (SDF, 2007)

Umzimvubu Municipality is composed of a blend of three biomes (grassland, thicket and forest margin) and has the following main types of vegetation:

East Griqualand Grassland 61%
Drakensberg Foothill Moist Grassland 31%
Eastern Valley Bushveld 7%
Southern Mistbelt Forest 1%
(SDF, 2007)

Soils are mostly red–yellow apedal freely drained soils and provide the best cropping lands due to their high levels of iron and other minerals. The soils found widely in this area are however subject to severe erosion with a thin topsoil

The temperature range means that a wide range of agricultural produce may be grown and cultivated in Umzimvubu. This is supported by the high rainfall levels and good soils.

This potential is however limited by the fact that the soils are vulnerable to erosion, which may be a contributory factor to 32% of the land in Umzimvubu being classified as degraded. Often the land is degraded in rural areas due to poor agricultural practices by farmers. These rural farmers then often move onto other patches of land, in many cases earmarked for private sector activity. Such circumstances often lead to land claims, which take long period of times to be resolved, and ultimately limit the amount of private sector activity in Umzimvubu agriculture.

The area in which the thicket and grassland biomes meet close to Rode and Ntsizwa has a high level of fauna diversity. This creates the possibility of eco-tourism.

In the context of the area's vegetation, agriculture and tourism have not been pursued by the private sector in Umzimvubu because of a lack of direction in terms of environmental regulation, enforcement and management. The Umzimvubu municipality does not have an adequate environmental policy framework in place to govern development, and this is further hindered by the lack of human resource capacity that is involved with environmental affairs. This leads to a delay in the pace of development as permits for environmental compliance are often delayed by capacity bottlenecks.

This may be illustrated by the fact that permits for forestry activity in Umzimvubu take an average of 9-24 months due to delays in acquisition of various environmental permits as per the National Environmental Management Act, National Water Act and the conservation of Agricultural Resources Act. (DEDEA, 2010)

3.9 AGRICULTURE AND FORESTRY

Agricultural activities taking place in the municipal area are in the form of livestock farming (sheep, goats and cattle) and crop farming (maize, potatoes, cabbage and spinach) at a subsistence level. There is no large scale/commercial farming. Some of the land that has been utilized for agricultural has been depleted due to unsound agricultural practise. The major agricultural zones are adjacent to Umzimvubu and Kinira Rivers.

It is notable that there are large pieces of vacant arable land within the municipal area. These pieces of land need to be explored and utilized to the fullest. The employed population in the agriculture sector is very low but has potential to growth should the municipality invest more. The grazing vegetation (grasses) covers most of the study area therefore the study area could capitalise mostly on in extensive livestock farming. The study area however is not very typical forest vegetation therefore not a lot of forestry takes place within the study area.

There seems to be scattered wildlife agricultural potential within the municipal area. This is an opportunity for game farming and could boost the tourism sector and employment opportunities. The major forestry zones are adjacent the National Road (N2) in Intsizwa area and the Regional Road (R405). Forestry is available in the form of indigenous forest and commercial plantation. Indigenous forest representation is very limited in Umzimvubu and consists of mainly of the mistbelt forest known for its fine yellowwood specimens. This specimen is found in the Intsizwa area. The indigenous forests are not well protected as it should be.

The District Municipality is responsible through its Disaster management - fire services to curb veld and forest fires. They often assist in Communities in making fire-belts.

The topography of Umzimvubu Municipality is directly influenced by two main geomorphological formations i.e. River Valleys and Mountainous formations. The Municipality is mainly drained by the Umzimvubu River Basin, comprised of a number major river including the Umzimvubu River, Mzintlava River, Tina River, the Kinira River, and other small tributarie which traverse through the Municipality. The river basins range from a low of 600m – about 1400m above sea level, while the Plateau and Steep slopes and ridges in the western side of the Umzimvubu Municipality leading towards the Drakensberg Mountains rise up to above 1800 – 2000m above sea level. A slope map showing the topography of the Municipality shows that large portions of the Municipality lie within fairly steep areas.

3.10 GEOLOGY & SOILS

Mudstone and sand stone of the Beaufort Group of the Karoo Sequence predominate, but sedimentary rocks of the Molteno, Elliot and Clarens Formations are also present. The dominant soils on the sedimentary parent material are well drained, with a depth of 500-800 mm and clay content from 15-55%. The soils are Hutton, Clovey, Oatsdale forms on sediments and Shortlands on dolerite. Most common land types Fa and Ac.

3.11 ECONOMIC DEVELOPMENT ANALYSIS

This section seeks to bring out relevant features and characteristics of the Umzimvubu development landscape as it is expressed through the local economy, social factors and planning imperatives. The Umzimvubu economic development is aligned to multi-tier governmental strategic documents. As such our economic analysis is comprised of several sections, namely the:

- **Policy and planning context;**
- **Economic sector baseline**

Data will be obtained from a number of databases developed by Quantec Research (Pty) Ltd. These databases have compiled data from several surveys conducted by StatsSA including the 2001 Census and the annual Labour Force surveys. The 2007 Community Survey is used as the primary source of data. However it is characteristic that due to the smaller sample size used in the survey, figures presented may be under/over stated. The static analysis provides a detailed picture of the state of the Umzimvubu developmental landscape

3.12 POLICY AND PLANNING CONTEXT

This section will review key documents whose outcomes and resolutions have a bearing on the investment climate. A key outcome of this section will be the gaining of an improved characteristic of strategic imperatives that emanate from different tiers of government that will have an impact on the development of Umzimvubu Local Municipality.

3.12.1 Eastern Cape Industrial Strategy

The Eastern Cape Industrial Strategy (ECIS) is a strategy that was developed to guide industrial development in the province. It is based on the national and provincial policy strategies that deal with regional growth, industrial development, the manufacturing sector, inclusive community development and other such strategies. In this light, the provincial strategy is in fact a means of articulating the national and provincial developmental policy framework. This framework is constituted of documents such as the Accelerated Shared Growth Initiative For South Africa (ASGISA) Provincial Growth and Development Plan (PGDP), Integrated Sustainable Rural Development Strategy (IRSIDS), Regional Industrial Development Strategy (RIDS). As a practical manifestation of the policy framework it provides guidelines for intervention, based on economic analyses. From a broad perspective, the strategy will contribute towards achievement of the ASGISA's and PGDP's targets of 6% growth and halving unemployment by 2014. The strategy then effectively becomes a 'landing strip' for policy initiatives.

3.12.2 The Eastern Cape Provincial Spatial Development Plan (ECPSPD)

This plan gives guidance on the principles that should underpin the strategic approach to spatial development and management. To this end, a targeted and phased approach to development is recommended based on:

Settlement hierarchy: This involves focusing investment strategically at three levels of support. The plan promotes identification of nodes and corridors with opportunity and targets development initiatives which promote consolidation of settlements to facilitate cost effective development.

Flexible zoning: allowing for flexibility for special kinds of investment.

Resources sustainability: Monitoring of the use of resources to ensure sustainability and minimization of environmental impacts in all land developments

Restricted development zone: identification of environmentally sensitive areas and ensuring that developments do not occur, for example wetlands, state forest, dune systems, river estuaries, game and nature reserves, heritage sites etc.

Spatial Integration: promotion of integrated development with maximum spatial benefits, integrating communities and the spatial economy.

3.12.3 Eastern Cape Rural Development Strategy

The Eastern Cape Rural Development Strategy is a sustained and long-term programmatic intervention in response to endemic poverty in the province. It is premised on the belief that through self 74haracterize of communities, government, the private sector and other actors in the developmental arena, inroads can be made in the fight against chronic poverty in the province.

The rationale for a rural development strategy that caters to the specific needs of the province can be found in the status of:

- Structural factors that lead to 74haracterized74i of societies and inequality of opportunities
- The historical political economy, whose legacy in rural hinterlands is experienced through low levels of economic integration
- Land and agrarian relations, which give rise to a skewed distribution of natural resources
- Settlement and migration patterns that lead to a divide between rural and urban areas
- A marked need for improved food security, based on agrarian transformation linked to indigenous ways of life
- Past initiatives, that have had mixed fortunes in their ability to deliver a lasting impact on rural development

In order to achieve the dual goals of transformed rural areas that are socially and economically developed, and a conducive institutional environment for rural development, the following pillars will give effective articulation to the rural development strategy:

- Land reform
- Agrarian transformation
- Non-farm rural economy
- Infrastructure development
- Social and human development
- Enabling environment

3.12.4 Alfred Nzo District Municipality Spatial Development Framework

With relevance to the Umzimvubu Local Economic Development, this document focuses on the following principles as being important in unlocking the area's potential:

Access Routes as investment lines: The hierarchies of access routes represent the spines around which development will be attracted and which provides guidance to levels of development as well as its intensity.

A service centre strategy: creating a hierarchy of service centre offering a range of facilities and activities throughout the municipality. Three levels of centres are suggested to include primary, secondary and tertiary centres accommodating both economic and institutional development, amenities and facilities as well as an appropriate range of residential accommodation.

Environmental integration: the natural environment is regarded as prime asset and resource base for the district. Environmental sustainability, restoration and rehabilitation and appropriate usage forms the basis for this approach. The 75 character of natural resources is suggested to inter alia contribute to appropriate local economic and social development. The natural environment needs to be integrated into development approaches of other development components.

Establishing a management Framework: Such guidance should include the identification of primary land use zones such as environmental conservation zones, agricultural zones, areas for residential settlement, a hierarchy of nodal development, tourism nodes etc.

3.12.5 Alfred Nzo District Growth and Development Summit Agreement

In response to the National Growth and Development Summit (GDS) held in June 2003 and the Eastern Cape Provincial Jobs Summit in February 2006, the Alfred Nzo District Municipality hosted a District Growth and Development Summit at which a range of agreements entered into by development stakeholders from across the spectrum. The objective was to consult stakeholders for a common growth and development path, and reach broad agreement on a growth and development plan for the District, including identification of areas of priority and areas of potential in the short- medium- and long term.

With regards to economic growth and the broader focus of this document of investment planning, declarations were made regarding:

- Promoting business activity
- Access to Finance
- Facilitating ASGISA Interventions
- Cooperatives Development
- Land Reform
- Addressing Human Resource Challenges in the Public Services
- Commercial Property Development
- Environmental Management

3.12.6 Alfred Nzo District Local Economic Development Strategy

The vision for local economic development of ANDM as developed in this strategy is:
“To develop a vibrant and sustainable local economy for the benefit of the local population through creating sustainable business growth, infrastructure development and creation of jobs”.

This vision is articulated through several goals, which speak to the development of human capital, positioning the ANDM as one of the Eastern Cape’s eco, cultural and adventure tourism destinations, investment attraction and place marketing To achieve this, the strategy puts forth programmes for:

- Small business promotion, expansion and retention
- Business development strategy
- Agriculture revival
- Developing tourism potential

3.12.7 Umzimvubu Spatial Development Framework

The Umzimvubu Spatial Development Framework outlines guiding principles, strategies, approaches and concepts pertaining to nodal development, clustering, investment and urban edges within the locality. The Umzimvubu SDF focuses on the following themes:

- Human and socio-economic development;
- Community capacity building and empowerment;
- Appropriate service provision;

- Improved characterization of existing and potential future development opportunities of the local municipality;
- Rural and urban development; and
- Increased tourism development

It identifies Mt Frère & Mt Ayliff as primary nodes for investment in infrastructure. Cancele and Pakade are selected as secondary nodes where concerted feasibility study on the establishment of intensive economic development in these areas is to be considered.

Municipal mobility routes are identified along the N2 from Mthatha – Kokstad and along the R405 from Mount Frere to Matatiele. The Mount Frere Main Road (N2) and the Mount Ayliff Main Road are further selected as activity routes. In the context of this of local economic development, some gaps in the planning environment are also highlighted in the SDF, and these include the facts that: The municipality does not have a **land development programme** that would avail serviced sites to those who want to engage in construction activities.

There is no sectoral plan for the development of heritage sites and areas as part of a broader **tourism plan**, which would include more detailed spatial development guidelines (than those contained in the SDF) to guide development of such areas. Furthermore investment in infrastructure development as part of its Integrated Development Plan at such sites cannot take place until such a plan is in place. The effectiveness of the implementation of the proposals and programmes contained in the SDF and IDP depends to a great extent on their facilitation via a land acquisition and assembly process linked to a **land reform programme**. In the absence of such clear land tenure programmes, many future development proposals and programmes may be hindered by tenure and land administration complications. The lack of **zoning** for different land uses has resulted in expansion of inappropriate uses for specified land types.

The Municipality has an **environmental management plan**
The Municipality has a **land use management system (LUMS)** to provide development control measures for future development.

3.12.8 Umzimvubu Economic Development Policy

Economic development policy of the Umzimvubu Municipality is founded on the shared economic vision for the area of:

“a diverse and resilient economy, able to exploit the competitive advantages of the municipality while building appropriate skills”

The policy recognizes the importance of Local Economic Development in coordinating, facilitating and implementing integrated service delivery programs through community involvement and resource mobilization for sustainable livelihoods.

It proposes that the LED function focus on Investment promotion, Agriculture and agrarian reform, Agro-based industry, SMME development, Community Based Forestry, Tourism and Environmental Waste Management. With regards to implementation strategies for the policy, it states that the Umzimvubu Local Municipality shall:

- Ensure that economic fundamentals such as an appropriate trade and investment regime, property rights, political stability, good infrastructure and skilled workforce are in place.
- Ensure that the Umzimvubu Local Economic Development Strategy will be used as a tool to promote, attract and monitor the broader impact of investment into the area.
- Develop a policy implementation framework that favors the application of incentives to attract and retain existing businesses in line with the Public Finance Management Act.

3.12.9 Umzimvubu Trade & Investment Policy

The purpose of this policy is to attract new private sector investment into key priority Economic sectors and help retain existing investment into the municipal area. Among the measures included in this policy is a commitment by the ULM to Partner ASGISA EC in packaging of hydro and agri-tourism investment opportunities and attracting investment into the Umzimvubu Development Zone.

Establish a functional interdepartmental Task Team consisting of LED, Finance and Infrastructure /Engineering departments to co-ordinate matters relating to investor applications, investor support and red-tape reduction in municipal investment processes.

3.12.10 Umzimvubu Industrial Development Policy

This policy is intended to assist the Umzimvubu Local Municipality in targeting the following sectors:

- Tourism
- Paper Industry
- Milling Industry
- Quarrying

3.13 ECONOMIC SECTOR BASELINE

This section looks at the local economy of the Umzimvubu area. The performance of the local economy over time is considered, as is its current configuration. The objective of this analysis is to identify the key economic drivers in the area and sectors that provide opportunities for growth. The present state of the various sectors that comprise the Umzimvubu economy will also be discussed in order to understand the dominant features.

The economic performance in the region is usually evaluated by means of the Gross Geographical Product (GGP), which is a measure of the value of final goods and services produced within the geographical area. Classification of economic activity in this report shall be based on the South African Standard Classification of all Economic Activities (SIC) approach, under which similar forms of economic activity are organised together

3.14 OVERALL ECONOMIC PERFORMANCE OF ULM

Table 4.14.1 shows the performance of the Umzimvubu economy over time. Comparison is made to the provincial GGP. The comparison is made in order to characterize the performance of the Umzimvubu economy in terms of how the other municipality within the Alfred Nzo district and the Eastern Cape Province as a whole changed between 1995 and 2009.

It must be characterized that the figures presented in Table 4.14.1 are approximations based on statistics made publicly available by Statistics South Africa in its quarterly bulletins. Although the values set out in Table 4.14.1 may not be completely accurate to the last rand, they are useful in so far as they allow comparison and contrasting of the performance of different localities, as well as the performance of different output sectors of the economy.

Table 3.14.1: Overall economic performance

Year	1995	2002	2009
Umzimvubu GGP (R'000 at 2000 prices)	459 270	472 091	621 215
Umzimvubu Average Annual GGP Growth Rate	1995-2002: 0.09%	2002-2009: 5.26%	1995-2009: 2.52%

Eastern Cape Average Annual GGP Growth Rate	1995-2002: 2.61%	2002-2009: 4.34%	1995-2009: 3.19%
---	-------------------------	-------------------------	-------------------------

(Urban-Econ EC Calculations based on Quantec, 2010)

From Table 3.14.1 it can be seen that:

- **The Umzimvubu economy grew at a slow pace**

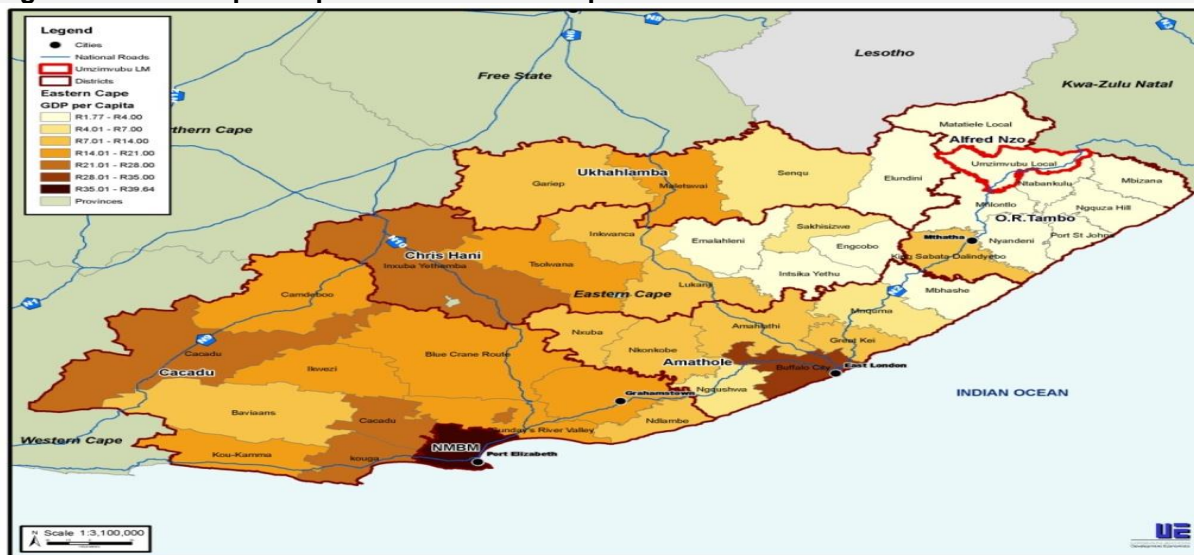

Formal sector output lagged the province throughout the period from 1995 to 2009, despite this growth coming off a small base to begin with. It also grew at a slower pace than its neighboring locality, Matatiele in the same time period.

- **Umzimvubu has a small economy, with a formal sector output of just over half a billion rand**

The approximate value of output from the Umzimvubu area of R621 215m may be compared with surrounding local municipalities, and it comes out lowest when juxtaposed to those of Mhlonlto (R901 526m), Matatiele (R1 007 305m) and Kokstad (R 1 324 845m).

This point is further emphasized in the figure below, which shows per-capita GGP output throughout the Eastern Cape Province. The map reveals an approximate value of the goods and a service produced per person in the Eastern Cape and is based on the output and populations of each Local Municipality in the province

Figure 3.14.2 GGP per Capita in the Eastern Cape

(Urban-Econ EC Calculations based on Quantec, 2010)

The map shows that Umzimvubu’s GGP per capita is below the provincial average, which may point to low levels of worker productivity. Figure 3.14.2 also reveals how Umzimvubu’s stunted economic output mirrors surrounding LMs, which is symptomatic of endemic poverty

The poor performance of the Umzimvubu economy from 1995 to 2009 will have been detrimental to efforts to accelerate output growth as set out in the policy and planning context. Slow growth means that the economy may not generate and sustain enough activity to balance out the youth population growth discussed in the socio-economic profile, and hence increase the probability of chronic poverty being perpetuated

3.15 UMZIMVUBU ECONOMIC STRUCTURE

This section will look at which sectors of the economy are most active and dominant in the Umzimvubu area. The relative contribution of each economic sector to GGP shows how important each is to the overall functioning of the local economy.

Figure 3.15.1 shows historic trends of how much each economic sector has contributed over the period 1995 to 2009. It must be noted that official statistics only show activity in the formal economy, and do not reveal the full extent of activity in the informal economy.

Figure 3.15.1: Sector contribution to GGP 1995-2009

(Quantec, 2010)

From Figure 3.15.1 it can be seen that:

- **Slow growth translated into inter-sectoral stagnation**

Overall from 1995 to 2009, the structure of Umzimvubu's economy has remained largely static, with little evidence of a structural shift or a change in focus of activity. A structural shift would be represented by a significant change in the contributions of either the primary, secondary or tertiary sectors. A change in focus of activity would be evidenced by a large change in the composition of the economy in terms of specific sectors. It can then be said that the Umzimvubu economy experienced inter-sector stagnation, as none of them managed to effectively grow by a large absolute amount.

- **Almost half of all economic activity in the area can be attributed to, or has its origins in the public sector**

Government services accounted for 42.6% of all economic activity in Umzimvubu. Although this contribution has gone down since 1995, it is still high, and underscores the reliance of society on government driven initiatives in this area.

- **A dual economy operates within Umzimvubu**

As a largely rural area, access to urban areas, markets, and formal sector business is limited for most residents of the municipality. This means that while figure XX reveals official output statistics, the existence, importance and value of the informal second economy in Umzimvubu must not be excluded or undermined

- **The primary sector makes a small contribution to formal output**

Agriculture (which also incorporates forestry and fishing) and mining make up what are known as the primary or extractive sectors of the economy. These are based on resource-intensive activity, and are intrinsically linked to the area's natural attributes. In Umzimvubu, these two sectors make a combined contribution of 2.3% of all formal value addition in Umzimvubu. It is important to note that emphasis is made on **formal** output, as agriculture and mining do in fact have an important role in sustaining household socio-economic existence in Umzimvubu, albeit mostly through informal activity that is not recorded in the national accounts.

3.16 RELATIVE IMPORTANCE OF SECTORS

It is prudent to consider how sectoral employment compares with sectoral output and growth. This will allow identification of those sectors that are capital or labour intensive and thus driving potentially driving job creation in Umzimvubu

Figure 3.16.1 reveals the relative importance of different economic sector in Umzimvubu as seen through their:

Average R-GDP Growth rates from 1995 to 2007

Average contribution to R-GDP from 1995 -2007

Average employment contribution

The ideal situation for the local economy would be one in which the bubbles (which each represent an economic sector in the study area) are of a similar size, and are clustered around a proximal region on the x-axis and high up on the y-axis. This would indicate a highly diversified economy that is characterized by high output growth, and a balanced distribution of employment creation opportunities.

Figure 3.16.1: Importance of each sector in the Umzimvubu economy

(Urban-Econ EC Calculations based on Quantec, 2010)

From the Figure above, it can be seen that the bubbles representing different economic sector are of varying sizes, and are interspersed throughout the plot area of the graph. It can be deduced that:

3.17 THE STUDY AREA HAS AN UNDER-DEVELOPED ECONOMY

The reliance on and dominance of unproductive sectors is seen in Figure 3.16.1 with government featuring as the largest employer, and contributor to GGP. The second largest contributor to GGP is trade, which in Umzimvubu is characterized by consumptive 81 haracte. The importance of government intervention in the local economy is thus underscored by Figure 3.16.1.

- **Government services, trade and manufacturing are the three largest employing sectors**

As the largest bubbles, these sectors employ the most people in Umzimvubu. This is in line with expectation for Government services and trade, which are the two largest contributors to economic output.

- **Productivity in the agricultural sector is low**

The high levels of employment in the agriculture sector when compared with its minute contribution to total GGP output indicate a low level of worker productivity. Agriculture in the area can thus be said to be labour intensive.

- **None of the sectors experienced high levels of growth**

The manufacturing sector experienced the highest levels of growth for the productive sectors, albeit from a small initial base. All the other sectors experienced otherwise mediocre rates of output growth.

- **The economy is concentrated in a few forms of activity**

A commonly used measure that indicates the level of concentration or diversification of the economy is the **Tress index**. The Tress index will allow the importance of the sectors shown in Figure 3.16.1 to be quantified, so as to show how mixed the range of activity in Umzimvubu is. A Tress index of 0 (zero) indicates a totally diversified economy, while a number closer to 100 indicates a high level of concentration in the economy.

The Umzimvubu Tress index was calculated at 65.5, and above the provincial average. It has however, been declining since 1995, which is a positive development that indicates sectors other than government services playing a more important role in the local economy.

3.17 Comparative advantage

Comparative advantage refers to a local economy's ability to produce a particular good or render a service at a lower opportunity cost and more efficiently than another local economy. The comparative advantage that a specific sector has in the economy may be measured through the calculation of a location quotient.

The location quotient compares the relative contribution of a sector in the local economy, with the contribution of the sector to the regional economy. By interpretation, a location quotient of more than one (1) would indicate that the local economy enjoys a comparative advantage in that particular sector, and vice versa. A location quotient, as a tool, does not take into consideration external factors, such as government policies, investment incentives and proximity to markets etc., which can influence the comparative advantages of an area.

The location quotient can be interpreted as follows:

A Location Quotient greater than 5 is very high and suggests a high level of local dependence on this sector.

If the location quotient is greater than 1.25, than that sector is serving the needs that extend beyond the boundaries of the local area. This sector is therefore likely to be 'exporting' goods and services.

If the location quotient is between 0.75 and 1.25, the community is self-sufficient in this sector.

A Location Quotient of 1 occurs when local percentage employment is equal to provincial percentage employment.

If the location quotient is less than 0.75, local needs are not being met by the sector and the municipality is 'importing' goods and services in that sector.

Table 2.3 presents the location quotients (LQ) of employment for each economic sector in the Umzimvubu municipality for 1999 and 2009.

Table 3.17.1: Location Quotient

Sector	1999	2009
Agriculture	1.48	1.34
Mining	5.53	3.64
Manufacturing	0.69	0.83
Utilities	1.37	0.59
Construction	1.89	1.09

Trade	2.09	1.87
Transport & communication	1.85	1.71
Finance and business services	1.10	1.00
Government	0.20	0.37

(Urban-Econ EC Calculations based on Quantec, 2010)

The location quotient figures calculated in Table 3.17.1 must not be taken at face value, but rather be interpreted as follows:

The somewhat high location quotient for agriculture is in line with Umzimvubu being a rural area, which is dependant on subsistence agriculture for household livelihoods

The high value computed for mining is in line with the Eastern Cape being at a comparative disadvantage in the extraction of mineral resources, and is not indicative of Umzimvubu being particularly proficient in this form of activity

The high value for the trade sector may be attributed to Mt Frere serving as a retail shopping hub destination for its rural dwellers.

Despite the area's dependence on government sector activity, severe capacity constraints have the effect of rendering it at a comparative disadvantage when compared to the provincial level.

- **Exploit comparative and competitive advantage for industrial activities**

The LED Department has business retention and expansion strategy, the main purpose of this plan is to carefully analyze and practical identification of the "infrastructural grid" required by business for sustainable development based on sound service delivery;-

1. To identify of the needs, opportunities, constraints and barriers to business development ;
2. To analyze Sector specific issue analysis and linkages to district and regional value chain opportunities;
3. For clear identification of credible sector specific opportunities; and
4. Ensuring business sector satisfaction across the municipal area and with potential partners at regional and international levels.

To date there is trading facility in Ward 07 in Mt Ayliff, the structure that can accommodate 6 new businesses that were only found in Kokstad and Mthatha in that way economic leakage is plugged.

There is a development of Mt Ayliff Mall – ward 07 underway that would ensure that retail shops that were ordinarily not found in Umzimvubu Area are attracted and are retained within the local space.

There is initiation of a development of a shopping, truck in stop, filling station and other facilities in Ward 11 – Rode A/A of Umzimvubu Local Municipality. This development would ensure that the dream of rural development is attained in our local communities with people developing themselves in areas where they reside. The Hlubi Traditional Council are the main drivers of the project with secondary stakeholders such as the municipality and all other departments that would need to render their support in line with their legislative mandate.

There is Peach Value Addition business based in Ward 01 Mt Ayliff where peaches will be processed into jams, peach juices and dried fruit and some will be planted in order to supply them as fruit.

Aloe processing plant in Ward 04 Mt Ayliff is intending at adding value to local grown aloe into aloe ferox, shampoo, aloe juice and perfumes.

Commercial Nursery in Ward 17 Mt Frere is selling seedlings and fruit trees to local businesses and communities

Fresh Produce Market, which is Ward 18 Mt Frere, is aiming at selling fresh fruit and vegetables, fresh milk and eggs

Mobile Pole treatment Plant based in ward 20 treats pole trees and is aiming at processing trees into furniture

Responsible tourism plan has a clearly vision “ to be preferred tourism destination” The Municipality is exploring competitive advantage through diverse culture that it possess, there is tourism DVD and brochure showcasing our unique products and as such each year there are tourism celebrations at Emaxesibeni craft centre.

About competition the municipality understands that development knows no boundaries hence programmes are linked with other municipality in order to complement each other

About 30 functional co-operatives are operating within the municipality and small business association in each town. NAFCOC is dominated by medium to well established businesses while FABCOSA is predominantly dominated by young people in business

- **Intensify Enterprise support and business development**

With regards to business development the municipality is offering quarterly workshops on tender filling and BEE awareness. SMME's in catering are also assisted with training of catering health and hygien which results in them being graded. There are also business and agrarian seminars, which are looking at providing business, support to SMME's.

Annually the municipality has flea market where by institutions that are offering business support showcase with the assistance targeting them. With regards to SMME's established within the municipality about 60 & benefitted and on EPWP 340 people were employed.

- **Support Social investment program**

Currently there is a gap between first and second economy however plans to curb the challenge is in place, much emphasis is towards providing support to local SMME's and co-operatives in terms of securing markets so that job opportunities can increase. Database for local unemployed people is available on a ward basis.

- **Sector Profiles**

This section provides a brief overview of all the economic sectors in Umzimvubu, profiling the nature and extent of activity to be found as well as their defining traits. This step is undertaken so as to inform the analysis of potential and constraints within the Umzimvubu economy, to be undertaken at a later stage in this document.

It must be noted that this section is largely developed using available information and data from stakeholders. Procurement of specific information in some sectors was encumbered by information availability challenges

3.19 AGRICULTURE

The agricultural sector includes all activities related to growing of crops, gardening and horticulture, farming with animals, agricultural husbandry services, hunting, trapping and game propagation, forestry and logging, fishing and operation of fish hatcheries

Agriculture in Umzimvubu may be classified under the following categories:

- Commercial agriculture
- Emerging farmer livestock rearing
- Subsistence mixed cultivation

3.20 FORESTRY

This is in line with variables such as proximity to urban areas, distance to markets, extent of available land and environmental factors

Official statistics approximate the value of all agricultural activity in the area at only 2% of GGP. It must be 85characteri that these figures only account for formal sector activity, and do not reflect the rural subsistence nature of agriculture in Umzimvubu. These official figures also do not make provision for agricultural produce that originates within the Umzimvubu area, is sold in neighbouring Local Municipalities (such as Matatiele and Kokstad), and thus only shown in the GGP figures of these other localities and not of Umzimvubu. This caveat is of importance in Umzimvubu where there is often limited market access for agricultural produce, driving farmers to sell their produce and livestock in surrounding areas outside of Umzimvubu.

3.21 COMMERCIAL AGRICULTURE

Commercial agriculture is a marginal form of activity in the locality, with some commercial enterprise situated in the north-western parts of the Umzimvubu municipality engaged in mixed farming (crop and stock farming) .

The scope for commercial agriculture in the area is severely reduced by a sub-optimal land tenure system. This hinders inward private sector investment as potential farmers often have no guarantee regarding their ownership or use-rights of land.

This is evidenced by the presence of vast tracts of under-utilised agricultural land in many parts of the municipal area: Limited access to land, uncertainty surrounding title deeds and on-going land disputes hamper massive commercial crop production and productivity in this municipal area.

3.22 EMERGING FARMER LIVESTOCK REARING

Emerging farmers represent previously disadvantaged individuals (PDIs) who operate on commonages leased out from the Umzimvubu Municipality, the Department of Agriculture or through various arrangements with their local chieftains. Group and cooperative activity dominates as the most common form of 85characterize due to limited resources (such as land and equipment) and skills)

Beef cattle form the largest percentage of livestock kept (approximately 60%), with goats, sheep, donkeys and horses making up the rest of the distribution. Goat farming has seen a marked increase since 2004, as a result of various programmes The Umzimvubu Livestock Farmers Association is an organisation that seeks to advance the cause of emerging farmer livestock rearing through various means and structures. The National Emergent Red Meat Producers Organisation (NERPO) also provides assistanceintended to assist in maximising the profitability and market share of locally produced red meat and meat products.

(DAARD, 2010)

This form of agriculture has faced constraints in the form of:

- Shortage of adequately equipped stock handling facilities in the remote rural areas with limited connectivity. Well managed sales pens and auctions, abattoirs and slaughter houses are far (with the nearest being in Cedarville and Kokstad) and do not specifically cater to the particular needs of emerging farmers, which increases the effective cost of engaging in this form of agriculture.
- A Lack of dipping and allied veterinary services to protect beasts against diseasesDifficulty in transforming activity to meet commercial standards because of an unmet need for red-meat feedlots
- Limited understanding of modern farming methods and practices, which compromises the quality of the cattle raised in the municipal area as seen through symptoms such as overgrazing,
- A genetically low quality stock of animals because of the effects of poor animal husbandry .often good quality cattle breeds are compromised by regular mixing of cattle during breeding periods. This lowers the demand for the cattle that are born in the process.
- Poor commonage management techniques leading to land degradation

3.23 SUBSISTENCE MIXED CULTIVATION

This form of agriculture is premised on the good quality of Umzimvubu's soil as well as its favourable climatic conditions, which give rise to significant potential for highly productive cultivation of various crops. As such the bulk of the Umzimvubu locality has been designated as undertaking subsistence agriculture by the Department of Agriculture, as depicted in Figure 3.23.1.

Subsistence mixed cultivation is often undertaken with the homestead, village commonage as the centre of production. The dominant form of production is dryland cropping, with a heavy dependence on summer rainfall and the river systems. By definition, this form of agriculture is made up of people residing in villages and townships that use agriculture as a means to supplement their food and income requirements. This form agriculture receives support from a range of stakeholders, including the Department of Agriculture and Rural Development, ASGISA-EC and the ECDC

The Umzimvubu SDF identifies major agricultural zones adjacent to the Umzimvubu and Kinira Rivers as well as in the Kinira-Mpoza area. The mixed cultivation takes the form of extensive monoculture maize for grain, potatoes, vegetables and orchard fruits (mainly deciduous such as peaches), based on family unit needs, as well as seed availability and silage requirements.

(DAARD, 2010)

Figure 3.23.1: Agriculture in surrounding Local Municipalities

The socio-economic profile revealed a youthful population that often migrates from rural to urban areas to seek economic opportunities. The impact of this has been a reduction in the popularity of home garden production (for daily vegetable consumption and seasonal crop cultivation) because of a substitution effect caused by remittances from urban areas. While this has kept households at an income equivalence point, a negative outcome of this development has been a loss of traditional knowledge linked to agricultural practices.

There has also been a significant shift from crop cultivation to pasture and fodder production of low-maintenance grasses as cropland has been transformed for livestock rearing purposes in the last fifteen years. The total area under formal agriculture has fluctuated over time, with yields and production dependent on factors including:

- Availability of storage facilities for the preservation of crop products, especially maize, as this affects the price at which yearly harvests are sold for in relation to true market values and food security (linked to vagaries of the weather and the treat of some insect populations).

- Accessibility of milling plants in areas where they are needed the most

- Provision of modern farming machinery such as tractors, fuel, electricity and implements

- The state of the fields to be planted, as influenced by land and soil productivity, desertification and soil erosion

(DAARD, 2010)

3.24 FORESTRY

The fourth form of agricultural activity that takes place in Umzimvubu as per the SIC is forestry. This involves both commercial plantations managed by various entities for profit, and natural forests used by communities around the locality for their household consumption.

The DWAF has undertaken a Strategic Environmental Assessment (SEA) of areas that are biophysically suitable for forestry in Water Management Area 12 which includes Umzimvubu as well as the majority of the Eastern Cape Province. The study also looked at the current state of forestry in the province. Table 2.24.1 shows the ownership of plantations in Umzimvubu while Table 2.4 provides information on their quantity, geographical extent and labour absorbing capacity. The bulk of information is from the DWAF

SEA, but where applicable this has been updated through interaction with local forestry sector stakeholders (including Hans Merensky).

Table 3.24.1: Ownership of plantations in Umzimvubu

Ownership	Hectares	Percentage of total
Private	419	12.3
State	2 812	64.1
Community	203	5.96

(DWAF, 2007)

Most of the state plantations are operated under category A leases, which allow for private sector management of resources. As the largest owner of plantations in the municipality, the state has an important role to play in facilitating development through:

Speedy processing of applications for 88haracterized88ion of local natural forests and plantations, Expediting of the process of transferring forests and forestry plantations to private operators, Commissioning of feasibility studies and environmental impact assessments, the development of policies and by-laws has been done.

Table 3.24.2: Status Quo of forestry

Type	Total geographical extent (Ha)	Number	People permanently employment
Commercial plantation	3 149	6	118
Woodlot	285	26	
Natural forest	4 597	-	3

From Table 3.24.2 it can be seen that the area does have a notable amount of forestry activity underway in its agricultural sector. In addition to this, the DWAF has identified 159 035 Ha. Of afforestation potential of which 27 746ha of this is deemed as good, the rest being of a moderate quality. The areas with forestry potential were identified on the basis of biophysical criteria after filtering out existing forestry, areas of high biodiversity, conservation value, socio-economic value, hydrological restrictions, infrastructural constraints, and urban and residential settlements (Scott, 2010)

Umzimvubu is notable as being the area with the highest forestry potential and where the hydrological impacts are likely to be lowest in the Eastern Cape and Kwa-Zulu Natal, which are the DWAF's focus areas for future afforestation. Umzimvubu has one of the lowest total requirements for water in the country, due to relatively high rainfall and low levels of economic activity.

3.25 MINING

This sector includes the extraction and beneficiation of minerals occurring naturally through underground and surface mines, quarries and all supplemental activities for dressing and beneficiating for ores and other crude materials.

The municipality does not have economically exploitable deposits of any valuable mineral or metallic resources. There is thus very little mining activity, and this often takes the form of quarrying for various rocks and sands used in the construction industry. As such, Quantec (2010) notes that this sector only contributes towards approximately 0.2% of all formal economic activity in the area.

It is worth noting that a lot of quarrying activity does take place illegally in the area through unregulated pit excavations undertaken by unregistered operators. The various materials that are extracted like river sand and stone are used in construction projects such as the building of houses both urban and rural areas.

Several planning documents including the municipal SDFs and IDPs have indicated that this illegal activity has the potential to permanently scar the local landscape and lead to irreparable land degradation. This comes about from the fact that quarrying is often undertaken in environmentally sensitive areas such as close to rivers.

3.26 MANUFACTURING

This sector is broadly defined as the physical or chemical transformation of materials or compounds into new products and can be classified into 10 sub-groups namely:

1. Food, beverages and tobacco
2. Textiles, clothing and leather goods
3. Wood and paper; publishing and printing
4. Petroleum products, chemicals, rubber and plastic
5. Other non-metal mineral products
6. Metals, metal products, machinery and equipment
7. Electrical machinery and apparatus
8. Radio, TV, instruments, watches and clocks
9. Transport equipment
10. Furniture and other manufacturing

The Manufacturing sector is thus the sector where natural resources and other intermediate goods are converted through value adding processes into final products for the Trade sector

As has been discussed previously in this document, the Umzimvubu municipality is a predominantly rural area with limited economic activity underway. This situation results from a combination of low levels of human capital, low investment inflows and limited provision of economic infrastructure.

As such, most of the manufacturing sub-sectors listed above are not present in Umzimvubu, with the only activity linked to **food**, **textiles** and **wood** products. These forms of activity are not capital intensive, and are linked to the area's rural background which involves resource-intensive production.

Food and textiles

The Umzimvubu goats project which needs revival is an ISRDP poverty node anchor project that came about from multi-stakeholder collaboration. The Umzimvubu goat project represents manufacturing activity in the **food** and **textiles** subsectors. Goat that are raised by cooperatives throughout the local municipality are brought to a central processing facility whereby value addition is undertaken through the following, as presented in Figure 3.26.1:

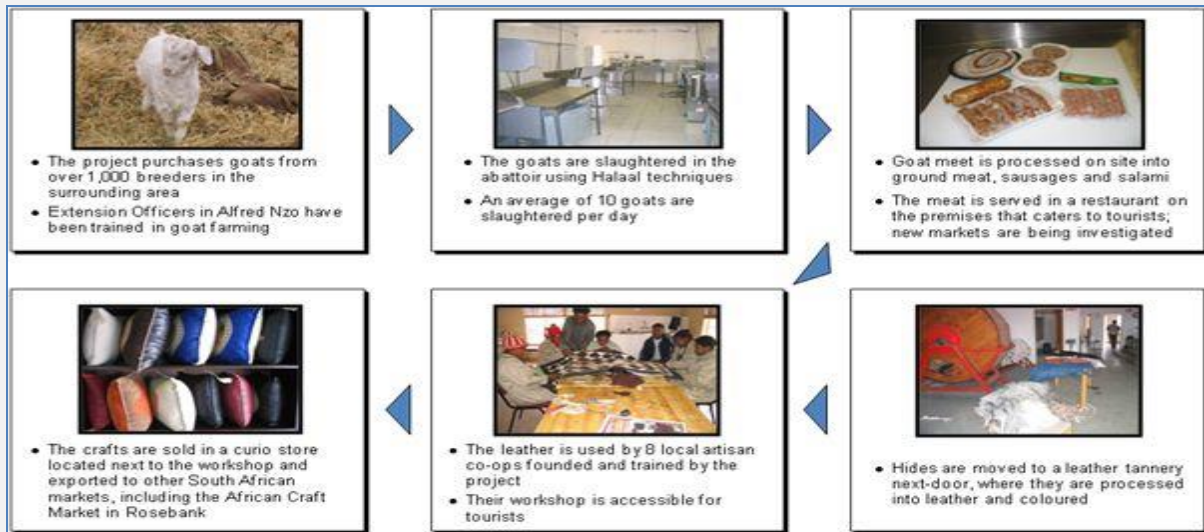

Abattoir

Meat processing plant

Leather tannery

Craft workshop

Figure 3.26.1: Goat Production

(Alfred Nzo Development Agency, 2010)

Although this operation has been faced by operational constraints, it represents a significant investment into the manufacturing sector with potential for employment creation, sustainable income creation, value chain 90characterize clustering and agglomeration. Employment creation may arise from the need for people to undertake duties such as meat processing, leather tanning, and animal slaughtering. Sustainable income creation may arise from further use of the cooperative model to advance rural development. Value chain 90characterize may come from an expansion of the range of activity undertaken.

(ANDA, 2010)

Small scale artisanal manufacturing is also represented through a crafts hub and garment manufactures (ANDM IDP)

- **Wood products**

Umzimvubu has 4 established sawmills that are involved in the transformation of trees grown in the forestry sector into different **wood** products. Mt Ayliff hosts the Alfred Nzo district's only sawmills, which provides it with a district-wide absolute advantage in the manufacturing of wood products.

The medium sized sawmill in Mt Ayliff has a peak production capacity of 13 500m and the three small sawmills have a combined capacity of 3 600 m.

It must be noted that the manufacturing of wood products in Umzimvubu has an uncertain growth trajectory as other components of forestry cluster development such as a timber processing and chipboard plant are to be found in Elundini and Kokstad, which are both in close proximity to Umzimvubu. Research is currently underway into the feasibility of a pole treatment plant in Mt Ayliff, which would help to capture and secure important elements of the wood products value chain.

In addition to this, charcoal production was recently added to the area's manufacturing capacity. The charcoal production involves the use of waste-products from the various forestry activities in the area as an input. Where the sawmills represent more capital intensive manufacturing in Umzimvubu, the charcoal production has a higher labour intensity in its production methods. (Scott, 2010)

The goats project which began in 2000 and the operation of sawmills in the area have led to an increase in the still small manufacturing sector of Umzimvubu. This is seen in how the sector's contribution to GGP has increased from 5.2% in 1995 to 12.2% in 2009. Despite this, it must still be 90characteri that

Umzimvubu has no 91haracteri large or medium-scale manufacturing activity as a result of its underdeveloped resource intensive primary sector.

3.27 CONSTRUCTION

The construction sector includes activities related to site preparation, construction of buildings, building installations, building completion and the renting of construction equipment. The range of activity contained within the construction sector thus includes shop fitting, plumbing, electrical contracting, painting and decoration

It must be noted that the construction sector has a 'derived productivity'. The performance of the construction sector can thus be taken to be an indicator of the general amount of developmental activity taking place within an economy

The Umzimvubu construction sector has in the recent past registered stagnant growth, with the value of output only increasing from approximately R12m in 1995 to R13.5m in inflation adjusted terms. The construction sector is underdeveloped, as a result of generally low levels of public and private sector investment into the area, which are seen through low levels of economic growth.

The value of output for the local construction sector at approximately R13.5m in 2009 is a low amount that is not inclusive of the value of all construction activity that took place in Umzimvubu in 2009. This means that construction of a value of more than R13.5m took place in Umzimvubu in 2009, but was remitted to other areas. This is because a shortage of qualified, registered and skilled firms offering construction services in Umzimvubu often drives investors to contract construction firms based outside of Umzimvubu in areas such as Kokstad and Mthatha.

Umzimvubu has an excess supply of construction firms with elementary skills such as bricklaying and the construction of simple buildings. However, for more complicated projects requiring competencies such as plumbing and electrical wiring, there are no suitably qualified construction firms in Umzimvubu. This is reflected in the fact that there is no single construction firm in Umzimvubu that is a member of the Eastern Cape Master Builders Association.

(MBA, 2010)

3.28 TRADE

The trade sector is defined as the resale (sale without transformation) of new and used goods to the general public for personal or household consumption or use by shops, department stores, stalls, hawkers etc.

The trade sector entails wholesale, commission trade, retail trade and repair of personal household goods; sale, maintenance and repair of motor vehicles and motor cycles; hotels, restaurants, bars, canteens, camping sites and other provision of short-stay accommodation. It can thus be seen that this sector involves a broad spectrum of activity which is diverse and varied in nature.

The retail trade sector is the second largest economic sector in Umzimvubu, and is centered mostly in Mt Frere, which functions as service centre for local residents' small scale shopping needs. The local retail sector is based on transactional requirements of residents of Mt Ayliff, Mt Frere and the villages in close proximity to these two nodal points.

The retail trade sector is dominated by the sale of some lower order services, perishables and semi-durables with very limited provision of durables and high-order services.

The trade sector is a derived demand because it is dependent on the amount of income the consumer has at his/her disposal to engage in a trading transaction. Trade, in its turn, is not only a function of the amount of money available within a population, but is also influenced by non-economic considerations such as personal taste, availability of alternatives and the current fashions. For this reason, the sector can be used as a crude measure of economic performance and the confidence the people and industry have in the local economy.

From 1995 to 2009 the Umzimvubu trade sector grew at a pace of only 0.71% per year on average. It can thus be deduced that as a crude measure of economic performance, the Umzimvubu trade sector was symptomatic of the general malaise and low levels of investor confidence in the local economy. Umzimvubu has high levels of poverty, which limit the ability of people to spend on retail goods and services. In addition to this, there is a significant amount of expenditure leakage to other towns as those that do have relatively high levels of income often choose to spend in Kokstad and Mthatha. The local retail sector is characterized by owner-managed shops that deal as liquor stores, butcheries, cell phone shops and hair salons. There are also some national retailers involved in the sale of furniture, cosmetic products, supermarket groceries, hardware, clothing and take-aways. Wholesalers also make up a significant amount of the retail supply in Mt Frere and Mt Ayliff as they cater to the needs of rural villagers and spaza shop operators. These target the low-income market given the area's socio-economic profile:

Table 3.28.1: Umzimvubu retail

Type of business	Example	National/ local
Take away	Captain Dorego's	National
Furniture	Barnetts	National
	Stop discount furnisher shop	Local
Hardware	Cash build	National
Butchery	Eat sum meat	Local
Supermarket	Boxer super store	National
	Solis super spar	Local
Clothing and accessories	Jumbo Fashion shop	Local
	PEP	National
Personal care	Just-on cosmetics	National

3.29 FINANCE AND BUSINESS SERVICE

The finance and business services sector includes activities related to obtaining and redistributing funds, including for the purpose of insurance, real estate or commercial and business services. Some of the activities that fall under this sector include financial intermediation; insurance and pension funding; real estate activities; renting or transport equipment; computer and related activities; research and development; legal; accounting; bookkeeping and auditing activities; architectural, engineering and other technical activities; and business activities not classified elsewhere.

The Service sector supports primary and secondary sectors by providing the 'soft' components of any economy.

In Mt Frère this sector is dominated by financial service providers with organisations that cater both to mainstream banking needs (such as FNB, Standard Bank and Capitec) and community-oriented lending facilities (through entities such as Finbond microfinance, Eyethu community finance and Marang financial services). It is worth noting that at the time of the compilation of this report, Capitec bank was in the process of expanding its branch network in Umzimvubu, with the launch of a branch in Mt Ayliff to support the already operational Mt Frere branch.

Business oriented services such as accountants, estate agents, architects and lawyers and other professional entities do not have a strong presence in Umzimvubu. This is because of the low levels of demand for such services. Business services in Mt Frere are thus often provided for by firms in nearby Mthatha, Matatiele and Kokstad. (Ngoyini, 2010)

3.30 GOVERNMENT SERVICES

The government services sector includes **community, personal and social services** rendered by private and public institutions. Activities classified within this sector include public administration and defence activities, activities of government, government departments and agencies; education, public and private; health and social work; sewage and refuse disposal, sanitation and similar activities.

This sector accounts for 42% of all economic activity in Umzimvubu and as such is currently the most important sector of the economy. The government sector is also the largest employer of workers in Umzimvubu.

The contribution of the government sector shows the importance of public sector- funded expenditure in sustaining economic activity in the study area. The rural nature of the area means that economic infrastructure and necessary capital that would create a conducive environment for private sector activity does not exist. It is for this reason that government services, through departmental spending and poverty alleviation efforts, makes such a significant contribution to the local economy. This dependence and reliance on government sourced expenditure is underscored by the fact that in 2007 79 789 grant payments were made in Umzimvubu, an area with a population of 223 330 (ANDM IDP, 2010)

Government in this instance refers to

Local governing bodies (The Umzimvubu Local municipality and the Alfred Nzo district municipality, with offices in both Mt Frere and Mt Ayliff)

Sector departments (The departments of Social development, Home affairs, and Education, all have offices within the municipal bounds and other departments without offices in the area are often engaged in various activities within Umzimvubu)

Agencies (such as SEDA, which has offices in Umzimvubu and others such as ECDC and, ASGISA-EC)

Health and Educational facilities (such as Ingwe FET College)

3.31 TOURISM

The Standard Industrial Classification (SIC) used to classify economic sectors in the South Africa economy does not recognise tourism as a separate sector. This is because the tourism industry is a consumption based service industry that does not produce a tangible product. It does however, utilise the products and services of other classified industries including Trade, Transport and Business Services. Due to its increasing importance as an income and employment creator in South Africa, this report will discuss Tourism separately from the other sectors.

Tourism is a sector that has been mooted in multiple district and local level policies and strategies as a sector to be prioritised and developed within Umzimvubu.

However despite strategic prioritisation, tourism in Umzimvubu is underdeveloped, with a low number of tourists visiting the area.
(Matolweni, 2010)

The nature of tourism in Umzimvubu is predominantly business-oriented, with people spending time in the area when on business there. Umzimvubu is not seen by tourists as a stop-over destination because of its proximity to larger service centres in Kokstad and Mthatha, as well as the small number of accommodation and dining facilities on offer.

Local tourism sector is not governed or guided by a sector plan, and on a municipal level, there is no tourism information assistance office or support post. The local tourism sector has thus not grown much in the last fifteen years.
(Matolweni, 2010)

There is however, significant potential for tourism growth in the area, based on several traits that Umzimvubu possesses such as:
 Forest scenery between the grassland and subtropical thicket biomes particularly in the Rode and Ntsizwa areas
 Unique vegetation in the Mdeni-Siroqobeni valley, and the Nkanje valley, north-west of Mount Ayliff Mountain ranges, such as the 1976m high Nungi mountain range allow for hiking trails at Ntsizwa and Mvenyane
 River systems based on the Umzintlava, Kinira and Mvenyane Rivers which make water sports a possibility
 Wildlife such as rare bat species in the Ntsizwa mine area
 Cultural and heritage including Bhaca food, (SDF, 2007)

3.32 DEVELOPMENTAL INSTITUTIONS

The business environment in Umzimvubu is also influenced by the actions of various development institutions. These stakeholders undertake programmes and projects that may make some forms of business activity more lucrative, and provide a disincentive to engage in other forms of business enterprise. This section shall briefly discuss the activities of various stakeholders in the Umzimvubu development arena, as presented in Table 4.32.1.

Table 3.32.1: Developmental interventions

Organisation	Focus area	Projects currently or recently undertaken
Alfred Nzo Development Agency (ANDA)	Local Economic Development	Goat project Livestock and poultry production programmes Vegetable production programmes
ASGISA-EC	Rural development	Integrated dry-land cropping programme: Maize
Department of Agriculture and forestry	Emerging farmer support	Afforestation CASP

		Land care Massive Siyakhula Siyazondla Letsima
Department of Economic Development and Environmental Affairs (DEDEA)	Agricultural value addition	Peach value addition Pole treatment
Thina Sinako	Institutional capacity	Local government support fund
Small Enterprise Development Agency (SEDA)	SMME development	Training of cooperatives
Independent Development Trust (IDT)	Livelihoods support	EPWP
Eastern Cape Development corporation (ECDC)	Agricultural value addition	Horticultural tunnel farming
LED forum	Local Economic Development	Stake holder engagement Management and Accountability to all LED initiatives

The organisations listed in Table 3.3.4 all have an important role to play in fighting poverty, improving competitiveness and inducing economic growth in Umzimvubu, as per their respective mandates.

The planning and implementation of programmes has a strong bearing on the business environment as programmes in Umzimvubu may

Improve the returns of engaging in certain forms of agriculture (e.g. productive assets and infrastructure for goat farming)

Create perverse incentives that militate against certain forms of economic activity (e.g. tragedy of the commons in maize farming)

It is important to outline the nature of the projects listed in Table 3.4, as well as their outcomes. Whilst the list in Table 3.4 only shows projects currently or recently undertaken, it will be prudent for the Umzimvubu municipality to create a database of all previous projects undertaken by development institutions. This recommendation will be discussed in later chapters of this report. This will allow investment decisions to be made based on all available information (symmetry) as it pertains to:

Undertakings that have taken place in the past

Reasons for the success and failure of such undertakings

Existing infrastructure (physical or otherwise) that was put in place to support such initiatives

How future investment by the private sector may feed into present activity to take advantage of clustering or agglomeration advantages.

4. CHAPTER 4

4.1 LESSONS LEARNT FROM PROVINCIAL IDP ASSESSMENT

4.1.1 The MEC for Local Government comments on the analyzed draft Integrated Development Plan (2012/13)

The IDP analysis session took place from the 16th – 20th April 2011 by Sector Departments according to their departmental specific expertise from both Provincial and National Departments as well as State Owned Enterprises.

4.1.2 IDP Analysis Rationale

In compliance with Section 32(2) of the Municipal Systems Act, No. 32 of 2000 as amended, the MEC for Local Government may within 30 days after receipt of a copy of the IDP or an amendment to the plan make some adjustment proposals to the Municipal Council. In this regard, I hereby submit some suggestions and advice based on the findings of the analysis.

The MEC comments are basically meant to ensure that priorities of government spheres are clearly articulated and aligned by all spheres to ensure the optimal utilization of government resources to accelerate service delivery. This could only be achieved through the crafting of credible IDPs.

4.1.3 IDP Analysis Methodology

The IDP Assessment process was once again provincially centralised and municipal delegates participated in the analysis process and this interactive engagement approach has enabled collective agreement on scores and pollination of information at a peer level and from specialists in various disciplines for improved and accelerated service delivery.

Six commissions composed of delegates from district and local municipalities, Provincial and National sector departments and state owned entities were established in line with the following Key Performance Areas as contained in the IDP Analysis Tool.

Based on their findings, each Commission was requested to allocate an objective overall rating per Key Performance Area.

4.1.4 The ratings ranged from low, medium to high within the following context:

Score/ Rating	Performance Description	Action Required
Low	Poor	Immediate intervention
Medium	Satisfactory	Support required
High	Good	Benchmarking

4.1.5 The municipality score per KPA as follows:

KPA	RATING 2009/10	RATING 2010/11	RATING 2011/12	RATING 2012/13	RATING 2013/2014	RATING 2014/2015	RATING 2015/2016
Spatial Development Framework	Medium	Medium	High	High	High	High	High
Service Delivery	Medium	Medium	Medium	High	High	High	High
Financial Viability	Low	Medium	High	High	High	High	High
Local Economic Development	Low	Medium	High	High	High	High	High
Good Governance & Public Participation	High	Medium	High	High	High	High	High
Institutional Arrangements	Low	Medium	High	High	High	High	High
Overall Rating	Medium	Medium	High	High	High	High	High

5. CHAPTER 5 - THE OVERARCHING STRATEGY

5.1 VISION OF THE MUNICIPALITY

This vision statement of the municipality captures the ideal and long term dream of the municipality. It represents its futuristic and ambitious goal, hope and change for the municipality, constituencies, communities and citizens. Accordingly, the ultimate intention of this vision statement is the following specific goals;

It creates a single point of departure for the coordination of service delivery and development programmes within the municipality by all three spheres of government and the private sector, It is intended to provide the broader community of umzimvubu with hope for the future, It creates a unified and single minded long term goal of where the leadership wants to take the municipality in the next five years and far beyond,

It helps to galvanise support and unity of purpose for the attainment of the long term goal for those inside and outside of the municipality, It inspires both the leadership and the officials in the municipality to relate their everyday efforts in pursuit of the greater good of the municipality and the communities in it and therefor to maintain their focus on the goals at all times,

It is a confidence builder to everybody in the municipality and those who have relations with the municipality.

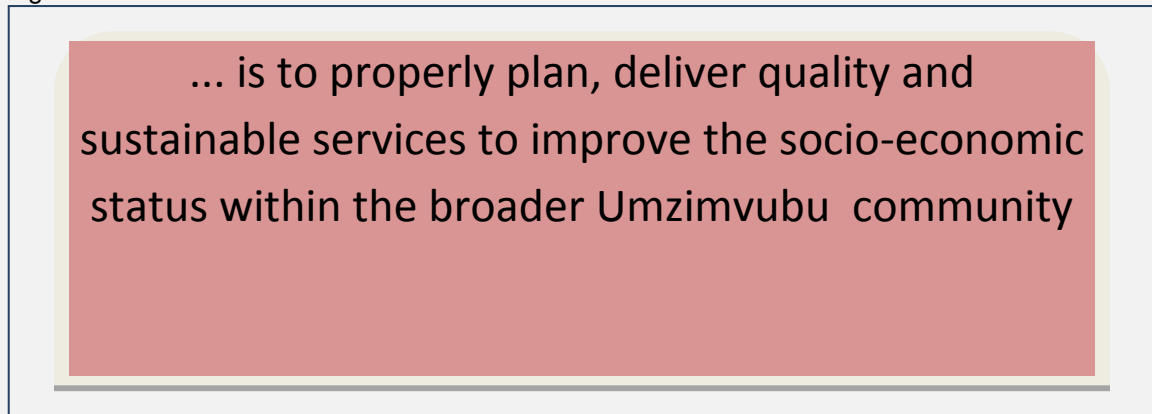

Figure 5.1.1 - the vision

5.2 THE MISSION STATEMENT

Essentially this mission statement captures the essence of the mandate and business of the municipality and provides the first tangible step towards the realisation of the vision statement of ULM. In a very high levelled manner the mission statements clarifies the critical questions of what it is that the municipality is doing to realise the goal of being the best run municipality in the country.

Figure 5.2.1 - the mission

5.3 THE STRATEGIC GOALS

The formulation of the strategic goals of the umzimvubu local municipality has been framed to coincide with the key performance areas (kpa) for the local government sector in South Africa. The figure below provides an illustration of the five (5) KPA's.

Figure 5.3.1 - 5 local government KPA's

In terms of this local government analogy each kpa represents a strategic goal for achievement by the municipality. Simply translated to the next five year period the municipality's strategic goals are as follows: To achieve the goal of financial viability of the municipality where the twin responsibilities of revenue and income generation and prudent financial control will subscribe to the highest standards,

To improve the municipality's good governance capacity by ensuring that all institutions of the council and municipality fulfil their constitutional and administrative role with distinction,

To effectively manage the institutional development and transformation of the umzimvubu municipality to fully align with the challenges of developing a modern and developmental organisation,

To improve the economic development of the municipality by mainstreaming led initiatives as a catalyst for the modernisation of the local economy and improvement of the quality of life across the board,

To rationalise the municipality's service delivery mechanism and consolidate the delivery of services to all the stakeholders and communities equally across the municipality.

The fulfilment of the strategic goals will be achieved through a protracted implementation process that will see these goals being broken further down to enable an incremental implementation, monitoring and evaluation of performance of the five year period.

The table below provides a further delineation of the strategies required to take the municipality a step further in its quest to being the best.

Table 1 - strategic goals and supporting objectives

Strategic goals	Supporting strategic objectives
Financial viability	To achieve a 100% of rate collections by the end of the 2017, Consistently (over the five years) maintain the unqualified audit status rating by the auditor general and to earn the clean audit political tag,
Good governance	To strengthen the ULM's IGR participation and influence to improve collaboration with government departments at provincial and national levels in order to coordinate service delivery on concurrent and functions performed by other spheres, To enhance public participation and inclusivity in support of ulm programmes to deepen democracy and the partnership between the municipality, communities and all stakeholders,
Institutional development and transformation	To build the municipality's profile as a caring and employer of choice to current and prospective employees (through skills retention, skills development, wellness programmes, sound labour relations, recognition of good performance, etc), To undertake the transformation of the municipality's systems and policies across the board, as a cornerstone of building a modern and world-class developmental organisation, To promote, deepen and champion the understanding of pacd values and batho pele principle as the foundation for transforming the way things are done and the things that are done in and on behalf of the municipality,
Local economic development	The development of agriculture as a primary and number one economic base for the municipality, To sustain epwp financed and run programmes and project beyond the partnership through effective planning and prudent budgeting, To create conditions that are conducive for investment and to attract investors for job opportunities and other economic development, To increase business opportunity of local businesses (smme) through ulm scm policies and processes, To develop a comprehensive spatial planning f(environment) or the entire

Strategic goals	Supporting strategic objectives municipality including rural areas, The development of the smakamaka mountain lodge and entertainment centre, To build the municipality’s human capital by lobbying for increased provisioning of educational institutions to cater for the needs of the municipality,
Service delivery improvements	To facilitate the development of middle income and social housing in the two urban towns of the municipality to create space to a boom of middle income citizens brought by the relocation of provincial departments to the municipality, To facilitate the development of middle income and social housing in the two urban towns of the municipality to create space to a boom of middle income citizens brought by the relocation of provincial departments to the municipality, To develop a modern civic centre with conference facilities to ensure the reduction of reliance on other municipality’s and the kzn province, To sustain the access roads maintenance programme and build on this success in coordinating efforts to modernise the municipality’s road network, To expand the municipality’s service offerings to include municipal services previously not performed by the municipality, To coordinate bulk services provisioning and eradication of backlogs .e.g. Electricity, water and sanitation to.

5.4 THE MUNICIPALITY’S VALUES

As umzimvubu local municipality we recognise that our ability to achieve the broad strategic direction for the next five years and beyond will depend to a very large extent on the kind of values that permeate our organisation both a group and individual level.

Accordingly, although intangible our values are the flip side of our tangible (vision, mission and goals) reality. They will help define and sustain an environment within which our leaders (political and administrative) and officials will conduct their business, interface with their clients and the general public as well as assess how well they are achieving their tangible goals.

The municipality fully commits itself to the wholesale facilitation of the pacd values to achieve a single-minded goal of ensuring that every single employee and leader of the municipality is fully oriented to their strategic place in its everyday business.

To help internalise the pacd values the slogan ***“we are pacd for you”*** will become a cliché used by all in the organisation to demonstrate their unqualified support for the values and provide a rally point everyday application of these values.

Table 5.4.1 - pacd values

	Value	Our context at umzimvubu
P	Assion	Our employees and councillors are driven by passion. A passion for our work, for serving the community and our municipality. We will at all times demonstrate our readiness and pleasure for serving.
A	Ccountability	Through our actions and attitudes, we will demonstrate the highest standards of accountability to our clients and the community of umzimvubu. Our service will be reliable, accurate

	Value	Our context at umzimvubu
C		and friendly as it will be inspired by batho pele principles.
	Ompetitiveness	In line with the vision of our municipality to be the best, our employees and leaders will strive for excellence and to be competitive in their endeavours.
D	Iversity	Our municipality is a hub of different cultures. We will always respect this diversity, nurture it and promote it to be the defining character of our service approach to our people.

5.5 STRENGTH AND WEAKNESS OF THE MUNICIPALITY

	Strength	Weaknesses
Political Factors	One ruling party with a vision of better life for Political stability in the municipal area Public participation is enhanced, Establishment of active community structures	Understanding of the local government spheres owing to many new councillors to the councillors after local government elections,
Economic Factors	Major roads that goes through the municipality and connects with the towns and provinces, e.g. N2, R 56, T17 LED policies in place and adopted by Council, Increased EPWP created jobs, Existing potential market for economic expansion, Growing trade and retail centres in the two towns within the municipality, The natural beauty and cultural heritage found in the municipal area, Umzimvubu river basin	Low levels of education amongst the population of the municipality, Reliance on social grants by the majority of the citizens within the municipality, High levels of unemployment and economic inactive by many citizens, Low household incomes by the majority of the citizens of the municipality, Low and provisioning of bulk services especially electricity, water and sanitation, Traffic congestion in Mt Frere,
Social Factors	Social cohesion and unity in diversity within the municipality, Public participation through structures of people's power through formalised structures and policies , Formal participation of traditional leaders in the business of the council and municipality,	Coordination of traditional and cultural activities within the municipality, e.g. initiation schools, Limited availability of community facilities/amenities, e.g. child care facilities, recreational facilities, sport grounds, swimming pools, etc.
Legislative Factors	The constitution of the republic that provides that basis for the existence of municipalities and delineates their powers and functions, Strong legislation that governs the business of municipalities, e.g. ; Municipal Systems Act, Municipal Structures Act, Division of Revenue Act,	Non-compliance with some legislations that prescribes the performance of legislative functions, Failure to enforce municipal by-laws, Non-compliance with some policies of the municipalities, Lack of understanding of legislation by communities and individual citizens, Over legislation.

5.6 OPPORTUNITIES AND THREATS

	Opportunities	Threats
Political Factors	Better empowerment of the councillors on the understanding and knowledge of the local government environment External funding has been forthcoming due to political stability, e.g. DBSA, Interrelations with higher structures from other spheres of government, Improvement working relations between the municipality and traditional leaders.	Intra-political squabbles within the ruling party spills over to council, Limited funding for service delivery purposes,
Economic Factors	Development of agriculture into a major economic activity in the municipality, Take fully advantage of the forestry opportunities available in the municipality, The N2 road with the traffic that goes through the municipality, Potential for afforestation, The availability of EPWP funding for roads maintenance and beautification projects, Agriculture a huge value addition potential for the municipal economy,	Climate change and the effects of delayed rain in the municipality affects food production, HIV/AIDs and other communicable diseases prevalence amongst the economically active citizens, Continued increase of fuel and food costs, Dependency on social grants, The relocation of the N2 road away from the municipality,
Social Factors	Sector departments have moved their offices to the municipal jurisdiction, , The realisation of the objectives of the IGR act,	Poor intergovernmental relations within the district and provincial government departments Limited funding for the delivery of services, Land invasions and land claims, Poverty and its manifestations like crime, Unemployment and low literacy level, Moral degeneration, Housing and settlement patterns with more people moving to slums in urban areas away from rural areas.
Legislative Factors	Prohibition of public servants from involvement government tenders will open opportunities for SMME's, EPWP funding and job creation programmes, Sector departments have moved their offices to the municipal jurisdiction, Latest SCM regulations act.	Application of National Environment Act, Land claims that undermine and delay development within the municipality, Equitable share formula and its failures to acknowledge the unique and dire situation of small rural municipalities, Divisions of powers and functions between the municipality and other sphere of government and public entities, Ineffective Intergovernmental Relations amongst parties within the district and provincially,

5.8 INSTITUTIONAL ANALYSIS

5.8.1 Political Structure Overview

Umzimvubu Local Municipality is a Category B Municipality as established in terms of Chapter 2 of the Municipal Structures Act 1998. The Municipality functions under the Collective Executive system consisting eight Executive Committee Members and the Mayor, making up a total of nine members. The Umzimvubu Municipal Council has Fifty Four including the Mayor, Speaker, Chief Whip and Executive Committee Members.

There are six portfolio standing committees that have been established in terms of Section 80 of the Local Government Municipal Structures Act, (Act 117 of 1998). Each portfolio committee is headed by a Member of the Executive Committee. There are standing committees for the following portfolios;

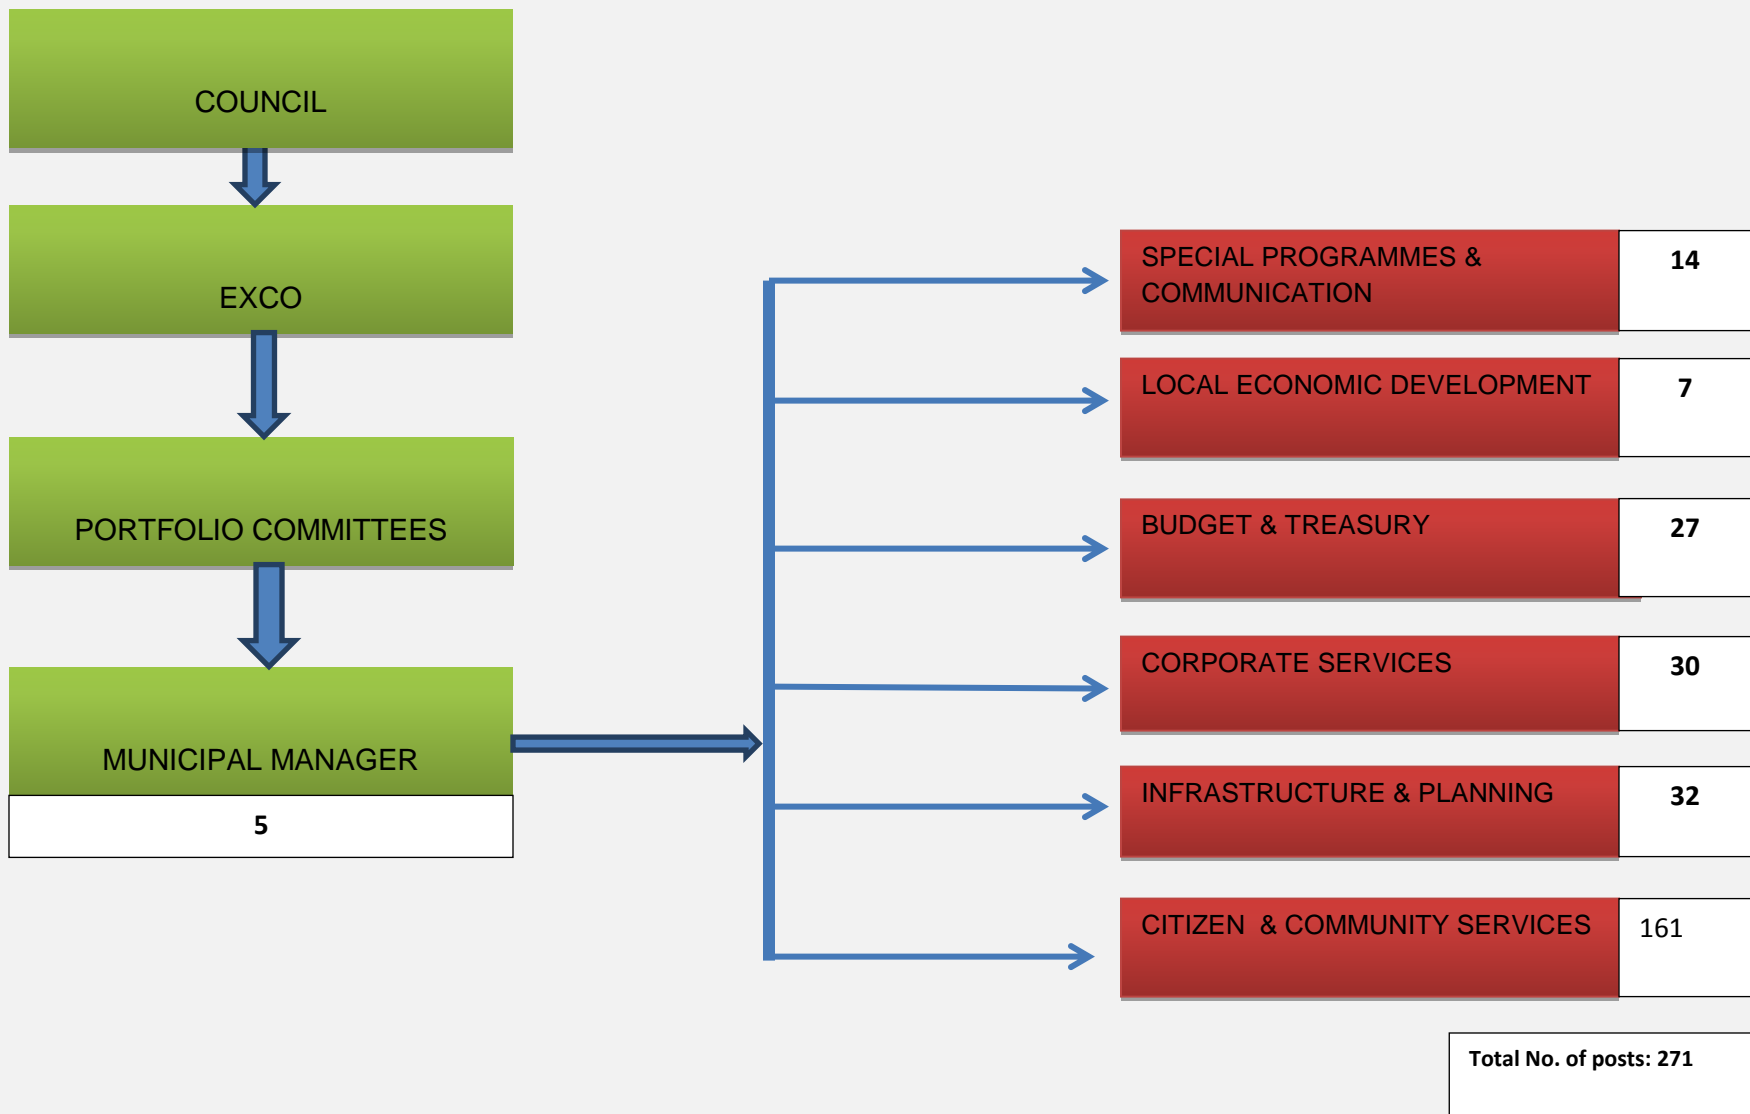

- Infrastructure and Planning
- Corporate Services
- LED and Environmental Management
- Social and Community Development
- Budget and Treasury
- SPU and Communications

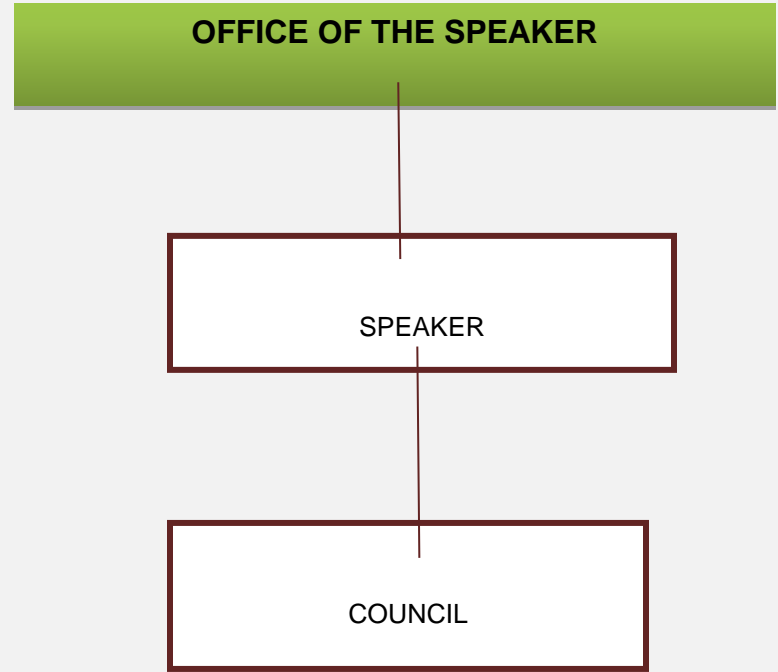

The Municipality also has the Municipal Public Accounts Committee (section 79 Committee). The committee is made up of 11 non-executive councilors from parties in the council. The MPAC Committee is chaired by a councilor from the Opposition party.

5.8.2 Municipal Administration

The municipality has a staff compliment of 271 full time staff as provided in the revised Organogram. The municipal organogram makes provision for a Municipal Manager, 6 Senior Managers (Head of Departments) and 21 Assistant Managers. The figure below is an adopted ULM organogram for 2012/13.

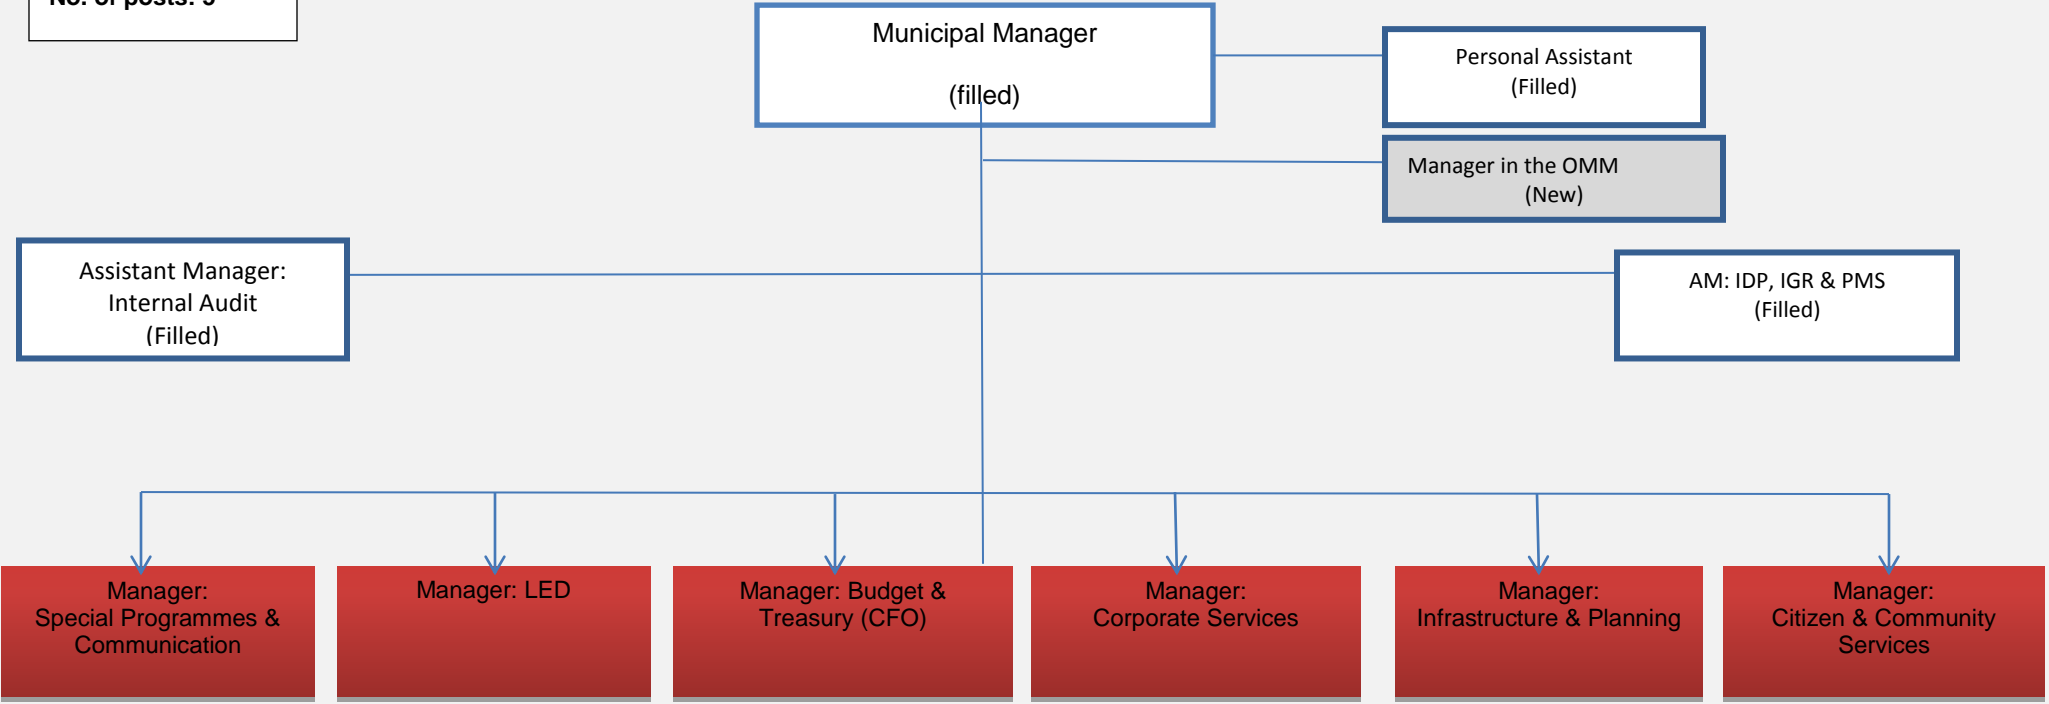

The municipality has a Human Resources Manual/Strategy that guides all human resources issues of the municipality.

5.9 EMPLOYMENT EQUITY

Umzimvubu has developed an Employment Equity Plan, as a long term plan to address any imbalances in employee representation in the work place. It also aims to promote gender equity and eliminate unfair discrimination. An Employment Equity Manager was designated to ensure that the Employment Equity plan is implemented. An Employment Equity Committee has also been established which comprises employees from all categories and Councillors.

The Employment Equity Plan has been submitted to the Department of Labour, and regular reports are submitted on progress made and targets met. Umzimvubu still faces challenges in terms of implementing employment equity particularly on senior levels.

Figure 5.9.1 below provides an overview of employment equity in terms of race, gender, disabilities and management (Section 57 Managers).

Figure 5.9.1: Employment Equity

5.10 PERFORMANCE MANAGEMENT

Umzimvubu has developed a Performance Management Framework in terms of Section 38 of the Municipal Systems Act. The process includes the development and implementation of an organisational performance management system which will not only regulate the performance of Section 57 Managers but which has also been cascaded down to other managers and officials within the municipality. Senior Managers conclude performance agreements on a yearly basis and these are sent to the department of local government and traditional affairs. Middle Managers also conclude performance agreements with their managers. Quarterly reviews are conducted for Senior Manager and Bi-monthly assessments for Middle Managers.

Beyond the fulfilling of legislative requirements, Umzimvubu Municipality has established a performance management system that is effectively monitored, reviewed and improving the implementation of the municipality's IDP, which ensures accountability, facilitate learning and improvement, provide early warning signals and facilitate decision-making.

5.11 SKILLS DEVELOPMENT AND TRAINING

Umzimvubu has acknowledged that skills training is expensive but has taken a decision that training, education and development is an investment in the Municipalities future rather than an expense. The Municipality has adopted a Workplace Skills Plan in accordance with the Skills Development Act. The plan aims to address the identified skills shortage within the municipality. A skills audit to identify training needs and suitable training and development courses is conducted annually.

5.12 INSTITUTIONAL POLICY DEVELOPMENT

The following policies have been developed and approved by Council:

- Bursary Scheme Policy
- Training and Development Policy
- Placement Policy
- Code of conduct for staff
- Acting Allowance policy.
- Employee Assistance Policy
- HIV/AIDS policy
- Recruitment and selection policy
- Human Resource Development Strategy
- Retention Strategy
- Employment Equity
- Children, Women, Youth, Elderly People, People with Disabilities Strategy

5.13 FINANCIAL VIABILITY

5.13.1 Financial Management Strategy

The Umzimvubu Local municipalities have reviewed its financial policies and were adopted with the in May 2015. Tariff restructuring has been implemented on waste management so at least the section could reach the break-even point as the past years the municipality is running the service at loss.

The municipality as measure of improvement, continuous training of its budget and treasury on the financial system, and has purchased Caseware as its reporting tool for monthly reports and Financial Statements. The municipality has invested an amount of R10 million with Investec as part of its strategy towards going concern.

The municipality has went through a data cleansing project in current financial year, this has lead in separation of consumer debts (old and new) as from the 1 July 2011 as the municipality would be its first time charge interest on outstanding amounts on its consumers. However, the municipality only collects 30% of its billed amount per month, which this affects our revenue enhancement strategy. The Budget and Treasury is striving by all means to ensure accuracy of monthly billing to consumers. The following measures are in place to ensure the accuracy of billing system:

- System generated exception reports for huge variances against monthly trends are analysed, investigated and rectified on monthly basis.
- The above is carried out before the bills are finalised

The municipality pay it creditors within the prescribed period of 30 days in accordance with section 65(2) (e) of the MFMA. The municipality has implemented controls to ensure that monthly creditors' reconciliation are performed and reviewed by manager Expenditure, and invoice register is maintained in order to be able to comply with the 30 days.

Three Bid Committee systems as prescribed by the MFMA are in place with proper delegations and terms of reference for each committee. Procurement of goods and services in excess of R200 000 is done through the Bid Committee system

An electronic centralised contracts register has been designed and populated with all relevant information in terms of SCM Regulations and Umzimvubu SCM Policy. Contract files containing all relevant documents pertaining to that contract as per the tender register are maintained. Umzimvubu municipality is medium capacity and had fully GRAP compliant Asset register which is updated and maintained on a monthly basis,

	-303 236 906	79 220 743	143 026 820	4 171 748	4 600 000	130 516 578	58 298 983

The priorities reflected within this budget are fully aligned with the strategy and priorities of the National and Provincial spheres of government. Whilst changes in policy and direction cannot simply happen overnight there have been significant shifts in Council thinking whilst maintaining at all times a synergy with the Constitutional requirements of local government in respect of basic services and within the general dictates of National Treasury guidelines.

This budget continues to fight the problems that the Umzimvubu economy continues to find itself in. Indeed it is unlikely the economic position will change much in the next three to four budget cycles at least. The budget therefore follows a conservative approach to rates and tariffs but also slowly begins to plan in anticipation of improved economic conditions from 2018/19 onwards. Considering the fact that more budget is targeted toward infrastructure and Local economic development.

The new budget for Umzimvubu Municipality amounts to some R300 million in 2015/16, being R86 million for capital and R216 million for operating. The budget approved for 2014/15 was 101 million and R177 million respectively and this new budget represents an increase of 5% from the 2016/17 approved budget and 7% from the 2014/15 adjusted budget, this is as a result of DBSA loan that will be invested on infrastructure programmes by the municipality. In the 2014/15 financial year the capital budget spend only managed to achieve a level of 71%. That was a situation that was not acceptable going forward and the management has instigated far more stringent review processes to ensure that whatever moneys are appropriated for budget purposes are indeed spent on what the original budget required.

Despite the on-going economic concerns, Umzimvubu municipality continues to grow but so do the demands of all its residents. What is coming through profoundly is that more and more demands for services are coming from those areas where services and service standards were historically poor and were incorporated to Umzimvubu by the results of demarcation. This is exactly why the constitutional mandate of Local Government places the emphasis on basic services and is the current and future reality of Umzimvubu and of every other local authority in South Africa. However it also has to be clearly recognised by all that the well-established areas of in our Province and National and abroad have taken, in some instances, hundreds of years and millions of rands to reach their current mature service levels if any. To believe that all areas can reach the same levels and standards within twenty years is simply naive and not grounded in financial reality.

Table 5.13.4 Summary of revenue classified by main revenue source

The 2016/17 budget for Umzimvubu Municipality is in line with the dictates of National Treasury guidelines. The inflation forecast for the MTREF is 6%, and the municipality's aim is not to exceed inflation forecast.

5.13.5 Revenue Strategies

Umzimvubu Municipality does not only maintain but also continue to improve the quality of services provided to its citizens it needs to generate the requisite revenue. Local communities must understand that the continued generation of cash via good prudent budgeting, credible income policies and sound financial management systems is critical to the financial sustainability of every municipality. The reality is that we are faced with development backlogs and poverty.

The municipality has no strategy in place and has appointed a debt collector, however has started to map its strategy on the following key components:

- National Treasury's guidelines and macro-economic policy;
- Growth in the Municipality and continued economic development;
- Efficient revenue management, which strives to ensure a 70 per cent annual collection rate for property rates and other key service charges;
- The municipality's Property Rates Policy approved in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA);
- Increase ability to extend new services and recover costs;
- The municipality's Indigent Policy and rendering of free basic services; and Tariff policies of the Municipality

Table 5.13.5 Summary of Expenditure classified by Type

The municipality pay it creditors within the prescribed period of 30 days in accordance with section 65(2) (e) of the MFMA. The municipality has implemented controls to ensure that monthly creditors' reconciliation are performed and reviewed by manager Expenditure, and invoice register is maintained in order to be able to comply with the 30 days.

Three Bid Committee systems as prescribed by the MFMA are in place with proper delegations and terms of reference for each committee. Procurement of goods and services in excess of R200 000 is done through the Bid Committee system

An electronic centralised contracts register has been designed and populated with all relevant information in terms of SCM Regulations and Umzimvubu SCM Policy. Contract files containing all relevant documents pertaining to that contract as per the tender register are maintained. Umzimvubu municipality is medium capacity and had fully GRAP compliant Asset register which is updated and maintained on a monthly basis

Grants Allocation

Description	2013/14	2014/15	2015/16	2016/17	2017/18
MIG	40 066 000	43 294 000	44 864 000	46 584 000	49 163 000
FMG	1 500 000	1 600 000	1 600 000	1 625 000	1 700 000
MSIG	890 000	934 000	930 000	957 000	1 033 000
EPWP	1 220 000	1 593 000	1 737 000	1 832 535	1 933 324
INEP	20 000 000	25 000 000	33 000 000	30 000 000	30 000 000

All conditional grants specified above have been fully spent i.e. 100% expenditure rate.

5.13.6 Financial Management Policies

Council's financial policies are reviewed annually and amended according to need and/or legislative requirements. These financial policies are designed to ensure uniformity and sound financial management of the municipality.

They are the following:

- Budget Policy
- Rates Policy
- Supply Chain Management Policy
- Petty Cash Policy
- Bank and Cash Management Policy
- Tariffs Policy
- Subsistence and Travelling Policy
- Asset Management Policy
- Indigent Policy
- Debt and Credit Control Policy
- Banking Policy

These policies were adopted by council with the 2012/13 draft budget and IDP after they were reviewed and changes were made, which gives effect to by- laws.

5.13.7 AUDITS STATUS

Year	Status
2010/11	Unqualified
2011/12	Unqualified
2012/13	Unqualified
2013/14	Unqualified
2014/15	Unqualified

The municipality has developed the audit action plan to respond to matters raised by the Auditor General. A deadline of 31st May 2016 was set by the municipality to have resolved all queries raised by AG.

5.13.8 AUDIT, REPORTING AND RISK MANAGEMENT

The institution is required in terms of Section 165(1) of MFMA to establish an Internal Audit Unit and that was established in March 2010. The Unit evaluates and monitors the system of internal controls as designed by Management and make recommendations. It is required to ensure that each department operates within the policies, procedures, laws and regulations as established by all statutory requirements.

The unit at the moment is composed of an Internal Auditor. Internal Audit Unit has been able to perform the following functions:

- A three year strategic risk assessment and fraud response plans are in the process of being reviewed.
- The Internal Audit Unit is in the process of developing an annual risk assessment plan.
- The Internal Audit Charter that outlines the responsibilities of the function has been completed.
- The unit has been able to perform ad hoc audits within the institution.
- The management has been taken through a session on risk assessment to enable them to work towards minimizing the risks and exercising internal controls.

The municipality has a fully functional Audit Committee which has an Audit Charter which was adopted by Council. The Audit Committee is composed of three members, two who are Chartered Accountants and 1 who is a Certified Internal Auditor. The Audit Committee has served two terms, and as such, its term has come to an end with effect from 31st March 2016. A new audit committee will take reigns from April 2016 and will be appointed for a 3 year term.

- The internal audit unit is also a link between external auditors and the municipality and has facilitated and/or coordinated external audit work and also ensured that the management responds to audit queries.
- The risk committee has been established and terms of reference are in place.

5.13.9 INTERGOVERNMENTAL RELATIONS

The Municipality participates in District IGR structures, even though they are not fully operational at this stage. These structures are composed of the Technical Task Group and District Managers Forum. The ULM uses IDP Steering committee as the platform for intergovernmental relation structure.

The reason for this is to ensure that sector departments are involved during the planning processes of the IDP. The IGR structures should be mainly utilized to solve problems affecting service delivery as well as shared priorities for development. This process is hampered by the inconsistency of member department's representation to the structures and the attendance of these fora by people who do not have decision making capacity and impact on budgeting processes. This negatively affects integration. It should be noted though that there are departments which are committed to the process while others are never form part of the IGR structures. This then leads to disintegrated service delivery or undermines integrated development. IGR structures also do form part of processes that review spatial frameworks. Service level agreements are being entered into where services are to be provided collaboratively by different departments. The municipality is in the process of developing IGR Framework policy for its IGR operations.

Partnerships and Strategic Relationships

Umzimvubu has recognised the potential of strategic partnerships to develop its capacity. The Municipality is in process of concluding a partnership agreement with Ekurhuleni Metro. The Municipality also benefits from strategic partnerships concluded by the Alfred Nzo District Municipality.

5.13.10 COMMUNITY AND PUBLIC PARTICIPATION

The Umzimvubu Municipality has adopted a culture of public participation as it is required in terms of section 16(1) of the Municipal Systems Act. Section 16 (1) of the Municipal Systems Act requires municipalities to develop a culture of municipal governance that complements formal representative government with a system of participatory local government. As such the Umzimvubu Municipality has adopted the Ward committee system in each of the 27 Wards.

Each Ward committee is chaired by the Ward Councillor. Ward committees are established for purposes of enhancing participatory democracy in local government and to make recommendations on any matter affecting their wards through the Ward Councillor. The Municipality has made administrative arrangements to enable ward committees to perform their functions and exercise their powers effectively and is continuously looking at provision of capacity building and development opportunities for committee members as a means of enhancing their understanding of developmental local government.

The Municipality also liaises and makes use of the following Community Structures:

- Project steering committees
- Audit committee
- Village committees
- Volunteers
- Civic organizations
- Non governmental organizations
- Public pressure groups
- Customers

6. WARD BASE PLANNING

During the period of October to November 2015, Umzimvubu municipality embarked itself on community outreach programme. The purpose of the IDP outreach was to involve communities from the initial stage and so as to get an understanding of what would be their priority projects that can be incorporated into the IDP document. All 27 wards were visited and the participation was satisfactory. Table below is the list of priorities that were identified by communities per ward:

IDP Ward Priorities
