MAYOR'S FOREWORD

Cllr Matwa

Mayor - Kopanong Local Municipality

Once again it is a privilege for me to introduce this 3rd review of our Integrated Development Plan third generation. This municipality wants to implement and to attain the following objectives.

- To address the provision and maintenance of services such as water, electricity, solid water, road and sanitations.
- To contribute towards financial viability.
- To promote organizational cohesion and performance management.
- To promote effective governance and accountability.
- To promote healthy and safer environment

Key Policy Developments

IDP 2014/2015 is now aligned to the budget. The Mayor's point of emphasis was the Local Economic Development (LED) strategy and the development of HIV/AIDS Plan. This council has approved our LED strategy which is now aligned with the reviewed the Integrated Development Plan (IDP). The Service Delivery and Budget Implementation Plan (SDBIP) was developed and signed by the Mayor within prescribed timelines of the municipal finance management Act. All other budget related policies were reviewed and approved by this Council simultaneously.

Basic Service Delivery

- On basic service delivery, the municipality managed to collect all refuse removal weekly in all our areas including informal settlements. One of the major challenge remaining is the bad conditions of our municipal roads
- The other challenge is the water problem in Jagersfontein and particularly in Fauresmith and the ageing infrastructure in all our towns. The bulk water project for Jagersfontein and Fauresmith is completed, the municipality and Department of Water Affairs (DWA) were busy with the second phase which was completed in November 2013
- A total of 400 electrifications were planned and completed in Trompsburg, Bethulie, Fauresmith and Jagersfontein for financial year 2012/2013.
- The municipality was able to fence cemeteries in Reddersburg, Edenburg, and Trompsburg and it is currently busy with Phillipolis, we also fenced and renovated halls in Trompsburg, Springfontein and Phillipolis with the limited resources that we are having.

Financial Viability

- Revenue generation remains the other challenge facing the municipality. The culture of non-payment of services and rates by resident remains a thorny issue for our municipality. The municipality have implemented the credit control policy, we have

started to disconnect the services in improving the revenue and the Mayor has launched a programme called '**PATALA DI TSHEBELETSO**', which means **Pay Your Municipal Services**. Our municipality wrote off debts for all indigent people that amounted to R46 million.

Public participation and good governance

- The **IDP/BUDGET** public participation was conducted in the municipality. The mayoral Imbizo and Patala Ditshebeletso meetings remain the priorities in our municipality. These meetings seek to inform the communities on how they can access services, how to be registered in the indigent register and how the municipality can help refer them to relevant department or service providers where the request is outside the scope of this municipality.
- The Auditor General issued a disclaimer audit opinion in 2011/2012; however mechanisms for improvement were put in place and implemented. The invention of weekly Whippery meetings between the Mayor, Chief - Whip, Speaker, Municipal Manager, Chief Financial Officer and Chief Internal Auditor assisted in realising an improved audit opinion . The municipality managed to achieve a qualified audit opinion in 2012/2013.

Conclusion

- In conclusion, we were only able to achieve this objective through co-operation with the communities, relevant departments and employees that were passionate about the municipality. My sincere thanks and gratitude to the Speaker, Exco Members, Councillors, Municipal Manager, and staff members. I have confidence that together we will achieve high levels of success for our municipality and our people

Mayor of Kopanong Local Municipality

MUNICIPAL MANAGER'S FOREWORD

Me. LY Moletsane

Municipal Manager: Kopanong Local Municipality

According to the Municipal Structures Act, Act No. 117, 1998 the primary purpose of the municipality is:

1. A municipal council must strive within its capacity to achieve the objectives set out in section 152 of the Constitution,
2. **A municipal council must annually review**
 - (a) *The needs of the community;*
 - (b) *Its priorities to meet those needs;*
 - (c) *its process for involving the community;*
 - (d) *its organizational and delivery mechanisms for meeting the needs of the community; and*
 - (e) *its overall performance in achieving the objectives referred to in subsection (1)*

3. A municipal council must develop mechanisms to consult the community and organizations in performing its functions and exercising its powers;

Emanating from the municipal strategic planning session, we concluded strategic priorities accompanied with quarterly service delivery targets to be achieved; which are aligned with the resources at our disposal and it is believed that all these targets can be a realised only if our municipality is getting total support from the community through enhanced revenue collection and effective public participation. We have also made our Communities aware that a process of revising the municipal Vision and Mission was completed during that municipal strategic planning session and is incorporated in this IDP.

Besides, the developmental role that local government is called to play, we are also expected to maintain existing infrastructure which, in most cases, is aged and in a state of ill repair The Integrated Development Plan (IDP) therefore needs to reflect a balancing act between providing access to basic services to new recipients and the maintenance of existing infrastructure to avoid power cuts, water leaks, pot holes, etc.

Underpinning successful service delivery is the availability of funds to do so. Whilst a substantial amount of funding is made available through the National and Provincial fiscus through conditional grants such as the Municipal Infrastructure Grant (MIG) and others, the only way that the Municipality will realize service delivery to its fullest potential is by ensuring optimal revenue generation by collecting payment due for services rendered by the Municipality. In addition to debt collection, the municipality has developed a Revenue Enhancement Strategy that will increase our reserves to enable us to plan and implement capital projects beyond the provision of grant funding.

The Municipality will also fast-track the process of finalising the approval of the Local Economic Development (LED) Strategy. This will assist us in radically attacking service delivery challenges, strengthening our local economic muscle and development, promoting emergence of cooperatives, entrepreneurs and public-private partnerships. We are continually implementing the Turn-Around Strategy driven by the inter-governmental organs of state which will through the IDP address the social and development agenda for change.

The development and implementation of corrective action plans is put at the forefront by administration to ensure that we address and clear issues rose by the Auditor General and obtain an Unqualified Audit Report by 2014.

In the previous financial year Kopanong Local Municipality started to implement GRAP and consultants were appointed to implement and compile the financial statements. This process has continued during this financial year we have even gone further to appoint consultants in assisting with the unbundling of assets. There are continuous meetings amongst the Mayor, the Municipal Manager and Chief Financial Officer to ensure the smooth running of the municipality and also to see to it that systems and internal controls are in place. Our goal is to achieve a better audit opinion and deliver services in an accountable and sustainable manner.

In addition Kopanong Municipality has addressed the issues of alignment within 2014/2015 IDP review by aligning it with National Development Plan, Free State Growth Development Strategy and also reflecting on the draft Medium Term Strategic Framework. Municipality of Kopanong have the following sector plans that are still outstanding namely: Integrate Transport Plan, Integrated Infrastructure Plan, Tourism strategy and review of Water Service plan, Spatial Development plan and LED strategy.

To address the issues that affects Municipality as whole and also to do introspective the Management and the Councillors has embarked on the 2 days strategic plan in March 2014. Municipality has advertised for the Development of Institutional Sector Plan, and all matters raised from the strategic plan will be covered inside the Institutional Plan and be reflected in the final Draft IDP documents before adopted by council in May 2014.

In conclusion, i will like to thank management and all staff members I have worked with during the year to ensure that we achieve the best results for Kopanong, not forgetting the members of Kopanong Council, especially the Mayor for his support, the Speaker for her support and also the Councillors.

Ms LY Moletsane

Municipal Manager: Kopanong Local Municipality

Executive Summary

1.1 Introduction And Background

In terms of the Local Government: Municipal Systems Act 2000 and the Municipal Planning and Performance Management Regulations 2001 each council must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan for the development of the municipality which:

- a) Links, integrates and coordinates plans and takes into account proposals for the development of the municipality
- b) Aligns the resources and capacity of the municipality within the implementation of the plan
- c) Forms the policy framework and general basis on which annual budgets must be based
- d) Is compatible with Chapter 5 of the Local Government: Municipal Systems Act 32 of 2000
- e) Is compatible with National and Provincial development plans and planning requirements binding on the municipality in terms of legislation

Much of the South African public sector has been undergoing profound transformation of its internal functions, organization, management and broader purpose to enable it to focus on service delivery and performance. Although, to a large extent, the pressure for such change can be attributed to the political, economic and social situation in South Africa, the changes have been adopted and are increasingly driven from within the organizations and departments themselves. There is therefore within many municipalities the desire to begin the task of redefining their institutional existence and fundamental service delivery responsibilities within the context of accountability, cost-effectiveness, transparency and service provision.

Through the Integrated Development Plan (IDP) and its associated planning process the municipalities are envisaged to:

- Make more effective usage of limited resources
- Speed up delivery
- Attract additional funding
- Strengthen the democracy
- Overcome the legacy of apartheid at the local level
- Promote intergovernmental co-ordination.

The IDP is envisaged to be the result of a process through which the municipalities prepare a strategic development plan for the following five-year period. The IDP is to perform the task of being the principal strategic planning instrument which guides and informs all planning, budgeting, management and decision making in the municipality.

The IDP as a legislative requirement has a legal status and it super cedes all other plans that guide development at local government level. It carries both the mission and vision for the Municipality with clear objectives and strategies linked to the term of office for Councilors.

The IDP for the period 2012/17 Kopanong Municipality seeks to have the following impacts:

- A Programme specifying the time frames for the different planning steps;
- Integrated and sustainable human settlements;
- Appropriate mechanisms, processes and procedures for consultation and participation of local communities, organs of state, traditional authorities, and other role players in the IDP drafting process;
- Environmental Sustainability; and
- Mechanisms and procedures for vertical and horizontal alignment and therefore a strengthening of inter-governmental relationships.

As part of the IDP preparation process, Council resolved to establish an IDP Steering Committee which comprises the Kopanong Local Management Committee, Councilors, the Municipal Manager and the IDP Manager.

The IDP Representative Forum (IDP RF) was constituted as part of the preparation phase of the IDP and will continue its functions throughout the annual IDP Review processes. The proposed composition of the IDP RF include Councilors, Ward Committee Chairpersons, Senior municipal officials, Stakeholder representatives of organized groups, resource persons, other community representatives, National and Provincial Departments' regional representatives, NGO's, Parastatal organizations, Tourism Association, Farmers Association and Ratepayers Association.

During this IDP process the main roles and responsibilities allocated to each of the role players have been set out.

Four major functions can be aligned with the public participation process namely:

- Needs orientation and prioritization;
- Appropriateness of solutions;
- Community ownership; and
- Empowerment.

The Kopanong Municipality seeks to actualize and make real the principles of the Constitution, the Freedom Charter and the Free State's Citizen's through the IDP and its processes, the Municipality seeks to:

- Actively engage with citizens of the Municipality and its partners;
- Operate fairly and be accessible to everyone;
- Promote choice within the area;
- Continuously develop and improve the quality of life of all its citizens;
- Effectively and efficiently utilize resources allocated to it; and
- Improve the opportunities and quality of life in the communities it serves.

During the Audit the Auditor-General have raised an exception that Kopanong Local Municipality does not have a Strategic Planning document in place. Therefore, municipality has to develop this document as it serves as a guiding and operational tool for the municipality.

The mission, vision as well as the core value of Kopanong Local Municipality was also discussed and endorsed by the Honorable Councilors during the session as outlined below;

Vision

- By 2020 the Kopanong Local Municipality should be a vibrant, sustainable and successful municipality which provides quality services.

Mission.

- To promote working relationship with stakeholders and communities
- Promoting and providing effective and efficient administration, political leadership to ensure a safer and healthier environment
- Promote shared and integrated service delivery
- To uphold the principles of Good Governance in a transparent and accountable manner
- To promote sound financial management and increase revenue base

1.2 Who are we?

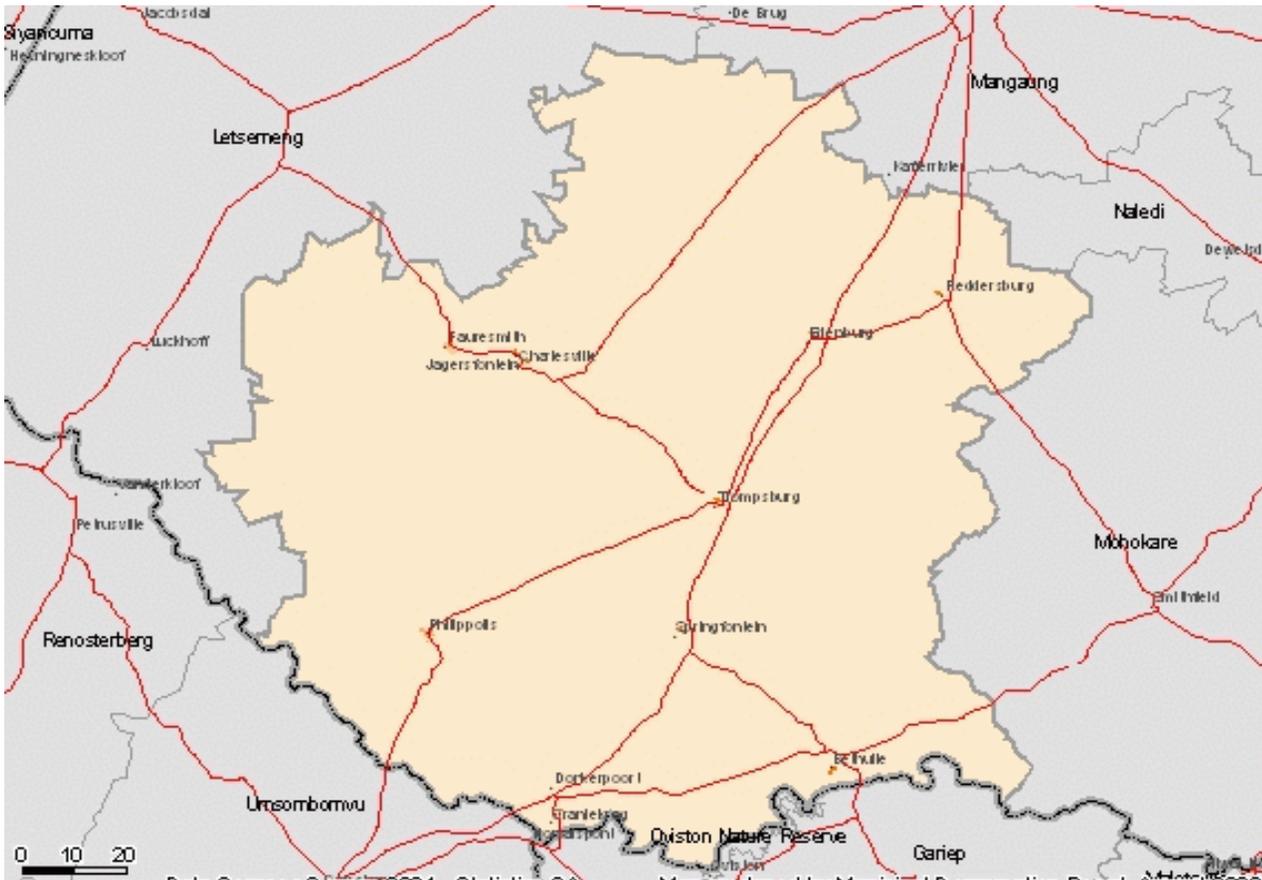

Kopanong Local Municipality forms the middle section of the Xhariep District and comprises of nine towns of which Trompsburg is the main centre it is the biggest local municipality in the Xhariep District in terms of area and covers 11.7% of the Free state which 1523 407 hectares.

The other Municipalities in the Xhariep District are Mohokare, Letsemeng and Naledi. Kopanong Local Municipality is the Water Service Authority.

The Kopanong Municipal consists of nine towns i.e. Reddersburg, Edenburg, Fauresmith, Jagersfontein, Trompsburg, Springfontein, Phillipolis, Bethulie and Gariep Dam

Basic agricultural products are exported from the area for processing and re-imported into the areas as consumer products – very little processing of agricultural products should be considered as a strategy to reduce dependence of the area on production of products that are processed elsewhere

MAP OF KOPANONG LOCAL MUNICIPALITY

Historical events that took place in the municipality, aspects of the natural and man-made environment and local activities may form the basis for promoting tourism as a significant economic activity. Some of these events, man-made and natural environment aspects are:

- “Lake Gariiep” and the Gariiep water festival;
- Game reserve at Lake Gariiep
- Jagersfontein Mine;
- The “ tiger project” at Phillipolis;
- The Orange River Ravine from the Gariiep Dam wall to the Water-Kloof Dam Wall;
- Battlefields of significant battles conducted during the Anglo-Boer War, e.g. Mostar’s hoek
- Phillipolis “witblits” festival;
- Historical building in Phillipolis, e.g. the Dutch Reformed Church, library, old jail, the house where Laurens van der Post was born, Adam Kok, the Griqua leader’s house, kraal and structure where gunpowder was kept, and
- Fauresmith horse endurance runs.

1.3. Soils

Southern areas of the Free State mostly have calcareous soils. According to the FSGDS the whole of the Xhariep District mainly has soils of intermediate to poor suitability for arable agriculture or forestry or grazing where climate permits. Xhariep with Thabo Mofutsanyane have the highest percentages of soils for conservation only.

The Kopanong Local Municipality area is situated in the Southern Free State. It has the largest surface area of the four local municipalities in the Xhariep District, covering 15 190 square kilometres (44, 5%). Nine towns from part of Kopanong namely:

- Trompsburg, it is situated approximately 108km south of Bloemfontein, it is a small agricultural town and one of the Free State's best Marino sheep product manufacturers.
- Gariep Dam, it is situated approximately 62 km south of Trompsburg and it is the largest expanse of fresh water in the country.
- Springfontein, it is situated 150 km Southwest of Bloemfontein on the N1, this town history relates directly to the struggle and especially to the hardship.
- Bethulie, it is situated approximately 52 km South of Trompsburg; it serves as the Regional agricultural service centre within Kopanong.
- Jagersfontein, it is the world oldest diamond mining town and the 1st place where the diamond was discovered.
- Phillipolis, It is situated approximately 53km ,southwest of Trompsburg
- Fauresmith, it is situated approximately 77km northwest of Trompsburg; it serves as a general agriculture service centre within Kopanong.
- Reddersburg, it is situated approximately 65km northeast of Trompsburg. The main social and economic functions of the town is to serve as a general agricultural service centre to surrounding farming areas and social functions such as residence ,education and medical service.

Edenburg, situated 83km south west of Bloemfontein was founded in 1862 when the farm Rietfontein was purchased to build a church.

2. ECONOMY

The economy of Kopanong is, like the remainder of the Southern Free State, is dominated by agricultural activities, with Kopanong contributing 45% (R95, 545,000) to the GGP of Xhariep in 1996. Almost a third (4,700 persons) of the employed population is employed in the agricultural sector. The agricultural sector is dominated by large/extensive commercial farms with few small scale farms being found in the area.

The predominance of agriculture as primary economic activity in the area means that cycles of prosperity and decline experienced in the agricultural sector, impact on the economic prospects (i.e. whether their economies grow or decline) of the nine urban settlements.

The second biggest contributor to the district's GGP in 1996 was general government, contributing R58, 567,000 followed by financial services with R33, 341,000.

The extremely narrow economic base of Kopanong, i.e. the dependency of local communities on agriculture production, increase the area's vulnerability to economic downturns caused by adverse agricultural conditions, to economic downturns caused by adverse agricultural conditions, such as prolonged droughts, low prices for agricultural goods, e.g. wool prices, rapidly increasing wage in the agricultural sectors and so on. It is therefore important that the central thrust of any economic development strategy for the areas should aim to diversify the economic base.

Economic output is usually measures in terms of Gross domestic Product (GDP). At the national Gross Geographic product (GGP) is used. Figure 2.3.2 (b) provides an overview of annual economic growth since 1995. The overall ten year growth rate between 2001 and 2011 was -1, 31%

3.1.DEMOGRAPHIC PROFILE

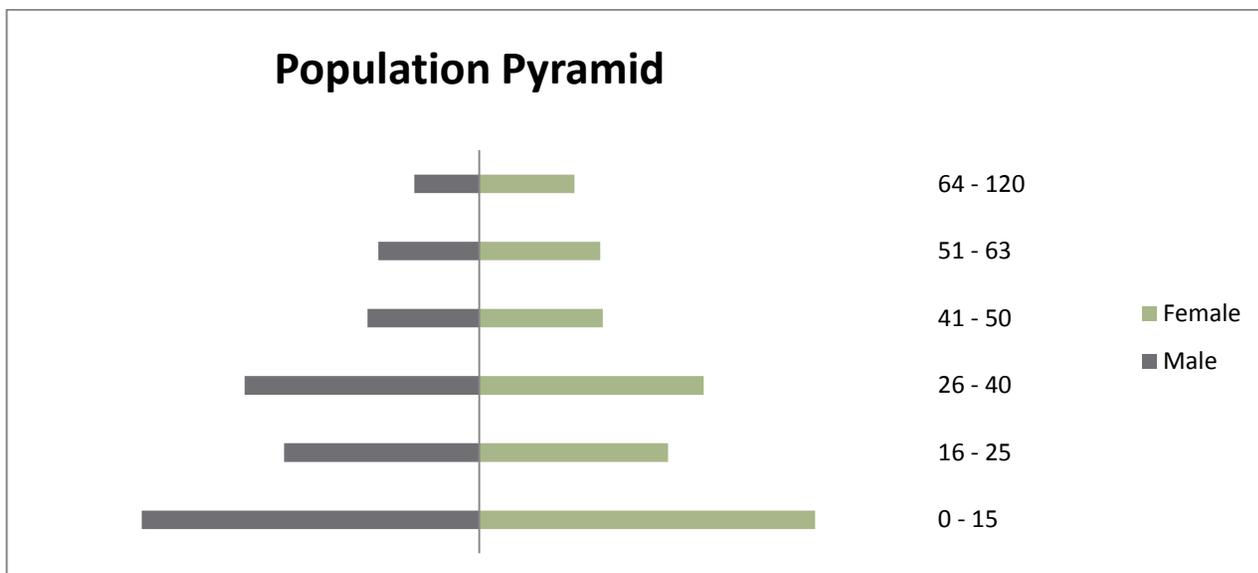

3.1.1Demographic analysis

Following below is a number of Tables that summarize the population of Kopanong in terms of numbers, growth, gender, age, etc.

3.1.2 Population Distribution

- The total population in the Municipality was **56,079** in 2001 of which **29 187** were female and **26892** male and **49 171** in 2011
- It is doubtful whether there is any major migration of people from outside the municipality into other municipality. Migration tends to be from commercial farms to the informal settlements within the municipality. And due to fact that Trompsburg is the Administrative Headquarters of both Kopanong and Xhariep there is a trend of people moving inward.
- The total population were organized as 17,527 households in 2001 and 15,643 showing decline in 2011 with the bulk of households (85%) being five or less members.
- If we look at the table below compare the statistical report between 2001 -2011, we will see the slightly difference in terms of number of population between 2001 census and 2011 census report.
- That simply shows the migration of people from the municipality to other municipalities due to number of factors like jobs.

➤ Population size as recorded in Census 2001 and 2011 Census

Statistics South Africa Dwellings Sub Place Enumeration area type for Household weighted, FS162: Kopanong										
Formal residential	Informal residential	Traditional residential	Farms	Parks and recreation	Collective living quarters	Industrial	Small holdings	Vacant	Commercial	Grand Total
12732	48	-	2688	12	-	12	30	117	-	15639
<i>Statistics South Africa: Web page: www.statssa.gov.za Support: info@statssa.gov.za Copyright © 2010 Statistics South Africa. All rights reserved.</i>										

- The table above shows status of tenure within the Kopanong Municipality in terms of people renting and owning houses for the 2011 census. It also shows a decline in percentages between people renting and owning houses within the municipality and that reflect level of affordability in buying property within municipality.

Economic Growth

In terms of the Census 2011, 68% of the population is rural, and 29.7% are under the age of 14yrs. 13.4% of the adult population has no education and only 6.4% of the population older than 20 years of age with a higher education qualification. This poses significant challenges for managing the municipality and specifically growth of the economy in the municipality.

4.1 What opportunities do we offer?

- Kopanong Local Municipality has abundance of land to can develop.
- Tourism attraction site or areas
- Agricultural areas especially livestock farming
- Job creations like construction of Albert Nzula Academic hospital
- Mining
- Construction of Xhariep Energy Solar Hub

5.1 What are we doing to improve ourselves?

Kopanong Municipality is putting appropriate systems in place to build capacity and deliver services to communities.

This is achieved through the Municipality's alignment of the various line function departments, as well as the District Municipality, in order to provide residents with access to basic services. The Municipality is also devoting substantial energy and resources to kick-start the local economy with innovative projects, Energy Solar Hub Project, EPWP projects and development of LED strategy and Tourism Strategy.

6.1 What can you expect from us over the next 5 Years?

The approach that needs to be followed is that Kopanong Local Municipality together with Xhariep District Municipality balance the provision of basic services, with the need to develop skills and create economic opportunities for Local Economic Development. With greater potential incomes and increase levels of employment through EPWP projects, community members are better able to pay for services and this making the roll-out of services quicker and more effective.

7.1 How will progress be measured? (See attached PMS document)

In terms of answering the question of “How will our performance be measured?”

- Kopanong Local Municipality has developed a Performance Management System in line with section 41 of the Local Government: Municipal Systems Act and section 9 of the Municipal Planning and Performance Regulations of 2001.
- The Municipal Manager’s office will coordinate and ensure good quality reporting and reviews and will also ensure conformity to reporting formats and timelines.
- The Organizational Management Performance Framework is in place and signed Performance Agreement of section 56 and MM.
- Development of EPAS to be cascaded to Managers and Officers
- By improving the Audit Opinion for the year 2013/2014 financial year
- Indeed, Audit Opinion has for 2012/2013 has improved to Unqualified Audit Opinion

2.Situational Analysis

2.1 Introduction

To identify and prioritize development issue an analysis of the current situation in Kopanong is done in order to develop a basis for strategic planning. The strategic plan will include objectives and identify intervention and projects.

It needs to be noted that for the purpose of this Chapter we use both official statistic from Stats S.A and available statistics from Kopanong municipality, as indicated statistics or data that is used by Kopanong it derived from data collected by fieldworkers and.

Background of regional analysis

The overall vision for development of the Free State is outlined in the Free State Growth and Development Strategy (FSGDS) towards 2014. Development goals and the economic growth rate of 6% per annum guide Integrated Development planning. Kopanong municipality should align its development plans in accordance with this objective for economic growth.

This part of the IDP shares basic information on the municipality, identify key trends and suggestions from the data and make some comments and suggestions in respect of the strategic plan for Kopanong.

The information retrieved from the regional analysis serves to:

- provide an economic and infrastructure profile of Kopanong;
- apply the principles of the National Spatial Development Perspective (NSDP) where possible on Kopanong; and
- analyse the basic demographic and environmental conditions in which the economy of the Kopanong finds itself

This part consists of:

- A brief overview of the environmental situation
- Economic output and trends
- Employment trends
- An application of the NSDP to identify development potential
- An analysis of the level of infrastructure and services
- An overview of social infrastructure
- Safety and security issues in the area
- Millennium Development Goals
- National Development Plan

Methodology

The baseline set of data is retrieved from Census data from Statistics South Africa. It was difficult to detect specific detail data for Kopanong before the new statistical report be published in February 2013. See attached table below:

Population and percentage change by province

Municipality	1996	2001	% change 1996-2001	2011	% change 2001-2011
Letsemeng	35449	42847	17.3	38628	-10.9
Kopanong	50017	56079	12.1	49171	-14.0
Mohokare	36238	36321	0.2	34146	-6.4
Naledi	24912	27479	10.3	24314	-13.0
Xhariep	146616	162727	11.0	146259	-11.3
Mangaung	603528	645440	6.9	747431	13.6
Free State	2633504	2706775	2.8	2745590	1.4

your leading partner in quality statistics

8

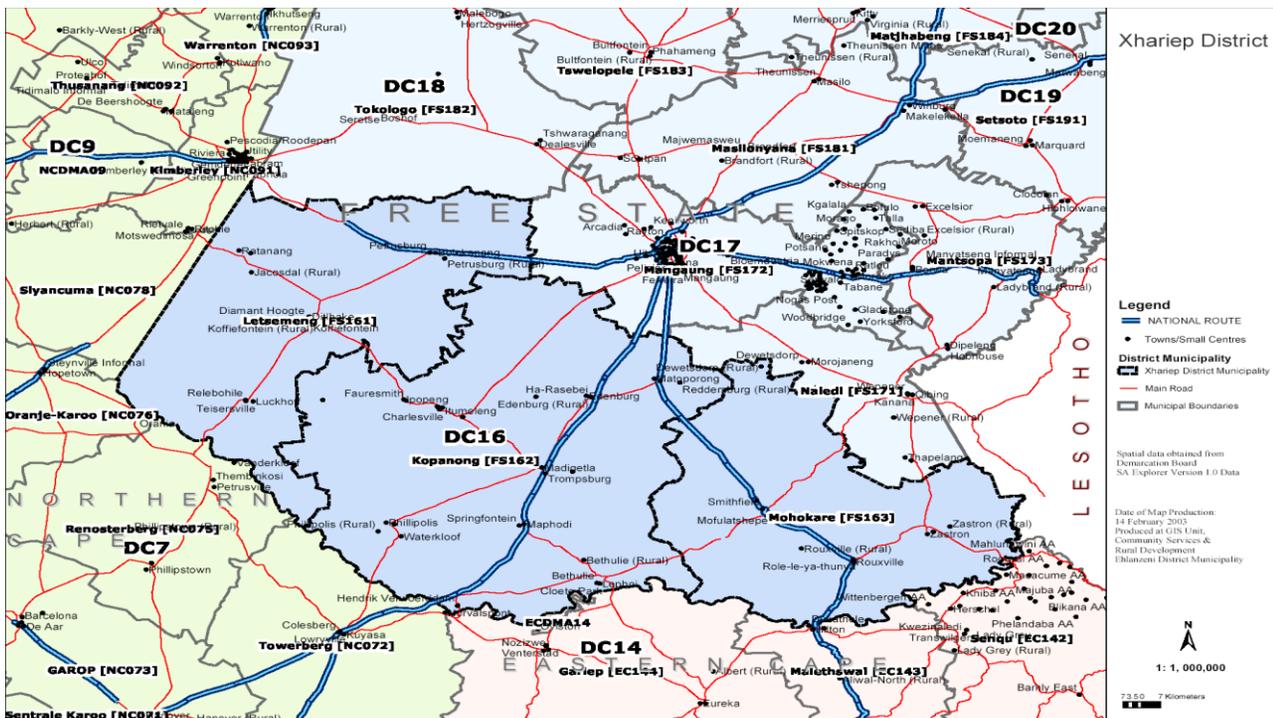

Furthermore:

- The emphasis on trends over a number of years provides valuable information for planning. In the case of census data, focus was placed on comparisons between 1996, 2001 and 2011 census report. Other data revealed comparisons between 1996 and 2007 community survey.
- In respect of the economic data, Gross Value Added (GVA) is mostly used as appose to Gross Domestic Product (GDP). The main reason is that GDP is not always available at sub-regional level. The main difference between GVA and GDP is that GVA does not include taxes and subsidies. In practice, there is thus virtually no difference when growth rates and relative economic contribution are determined.

2.2.3 Spatial analysis of Kopanong

Most of the information shared in this paragraph relates to information acquired from the reviewed IDP 2012/13, the latest available statistics and National spatial development perspective.

Kopanong Municipality is the biggest Local Municipalities in Xhariep District in terms of area and covers 11.7% of the Free State which is 15 190 kms¹. The other Municipalities in the Xhariep District are Mohokare and Letsemeng.

Map 1: Xhariep District Municipality (IDP 2005/2006)

The Kopanong Municipal consists of eight towns i.e. Reddersburg, Edenburg, Fauresmith, Jagersfontein, Trompsburg, Springfontein, Phillipolis and Bethulie

Basic agricultural products are exported from the area for processing and re-imported into the areas as consumer products – very little processing of agricultural products should be considered as a strategy to reduce dependence of the area on production of products that are processed elsewhere.

Proposed Developments

Kopanong is busy with review of SDF 2013/2014 under the guidance of Department of Rural Development and Land Reform. Municipality have also engaged with the department of Human Settlement to assist with the surveying of 500 sites in Reddersburg, Edenburg 500, Springfontein 500, Jagersfontein 500, Phillipolis 500, and Fauresmith 500 and also submitted business plan for another 500 sites in Trompsburg. Kopanong has engage Department of Water affairs in Bloemfontein in assisting with the completion of Water Service plan as is incomplete.

Municipality has allocated 1500 ha of land for the purpose of Energy Solar Hub in Bethulie the project will assist in reducing the level of unemployment within the Municipality and the district at large. Kopanong Municipality has also embarked on a land audit project together with Department of Agriculture particularly to assess how many hector land belong to the Municipality to can assist emerging farmers.

Kopanong Municipality has entered into lease agreement with “Because We Care” company to develop Bethulie Holiday Resort for the purpose of promoting tourism and creating of jobs around the area. Municipality is busy with discussion about the opening of Edenburg titanium mine.

Kopanong local Municipality have anticipated constructing a taxi rank in Trompsburg and shopping complex in the next financial year. This is due to numerous meeting and engagement with the Department of Police, Roads and Transport and a Service Provider have been appointed by the abovementioned department to roll-out the project this include the development of Integrated Transport Plan for the whole of Kopanong municipality . The service provider has been appointed to develop institutional plan for the municipality.

2.2 No of Households

Definition of Households in terms of Stats SA:

The informal employment could be significant as indicated in the figures of 2011 (Census). The information provided next indicates that there is still a long way in terms of ensuring that there is work for all employable people in the area.

The total labour force of the Municipality, divided into employment and unemployment and economic inactive people is provided. The rate for people living in poverty in Kopanong according to the FSGDS² is approximately 40.2% which enforce a high demand for job opportunity creation.

Statistics South Africa Labor Force Sub Place Geography by Official employment status for Person weighted						
	Employed	Unemployed	Discouraged work-seeker	Other not economically active	Age less than 15 years	Not applicable
Matoporong - Reddersburg	978	510	186	1314	-	1902
Kopanong NU - Ha-Rasebei	4956	1005	270	3252	-	4698
Ipopeng - Fauresmith	483	255	171	1326	-	1395

From an analysis of information it is apparent that the economy of the region is dominated by agriculture followed by community services.

Formal Employment per sector

Agriculture, Forestry and Fishing

Economic: Formal Employment 2005	Employment		Industry	I01: Agriculture, forestry and fishing							
CONCEPT				Units	Value						
Year	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005
P4D01: Xhariep District Municipality	10021	10256	10390	10504	10623	10709	10779	10623	11155	10829	10909
P4D01M02: Kopanong Local Municipality	3609	3686	3726	3760	3795	3819	3838	3776	3959	3838	3804

Table 2.4.2 (d) Employment – Agriculture, forestry and Fishing, Kopanong, 1995 - 2005

From the data acquired, this sector reflects a consistent employment rate with limited growth from 1995 to 2005.

Community, social and other personal services

Economic: Formal Employment 2005	Employment		Industry	I24: Community, social and other personal services							
CONCEPT				Units	Value						
Year	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005
P4D01: Xhariep District Municipality	3696	3687	3859	4029	4201	4376	4556	4761	4737	4858	4342
P4D01M02: Kopanong Local Municipality	1544	1538	1608	1678	1748	1820	1894	1978	1965	2014	1803

Table 2.4.2 (e) Employment – Community, Social and other personal services, Kopanong, 1995 - 2005

Compare to the performance of the District overall, a growth of approximately 17% over a period of 10 years which is insignificant is demonstrated for both the District and the Municipality

Construction

Economic: Formal Employment 2005	Employment		Industry	117: Construction							
CONCEPT				Units	Value						
Year	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005
P4D01: Xhariep District Municipality	1180	1095	1072	975	821	790	785	764	720	689	887
P4D01M02: Kopanong Local Municipality	562	517	502	453	378	361	355	342	319	301	399

Table 2.4.2 (f) Employment – Construction, Kopanong, 1995 - 2005

A decline of employment in the construction industry is visible for both the District and the Municipality. With the current building activities in Trompsburg (including a hospital) one can assume that for at least the next two to three years this figure could increase

**rural development
& land reform**

Department:
Rural Development & Land Reform
REPUBLIC OF SOUTH AFRICA

2.1.3 WASTE REMOVAL AND WASTE MANAGEMENT:

- Most Towns experienced problem with the Refuse removal and waste disposal sites
- Landfill sites are not regulated and lack administrative fundamentals pertinent for waste disposals.
- The urban areas are serviced, with refuse removal on a weekly basis; the effective and the co-ordinate function of these services need to be addressed.
- The municipality has appointed a service provider to assist with registration and rehabilitation of the new areas
- Status of Landfill-sites in Kopanong:

Location of Landfill site	Registration status	Fenced	Operational status	Remaining Life –Span.
Reddersburg	Not Registered	Fenced Partly	Operational	Almost Full
Edenburg	Not Registered	Due for rehabilitation	Operational	4-Years
Jagersfontein	Registered(14/09/92)	Fenced	Operational.	
Fauresmith	No Registered	Fenced	New	New
Phillipolis	Not Registered	Not Fenced	Operational	
Trompsburg	Registered	Not Fenced	Operational	
Bethulie	Not Registered	Not Fenced	Operational	Almost Full
Gariiep Dam	Not Registered	Not Fenced	Operational	Almost Full
Springfontein	Not Registered	Not fenced	Operational	
Edenburg	Not Registered	Not fenced	Operational	

2.1.4 ELECTRICITY.

- Total backlog of electrification 2012 financial year:

WARD	SETTLEMENT(S)	NEWLY DEVELOPED SITES	HOUSE CONNECTION NEEDED	TOTAL CONNECTION REQUIRED

SECTION F

Organizational Performance Framework

Introduction

This framework is a policy document that Kopanong Local Municipality (“KLM”) has embarked on a comprehensive review, and is to serve as a formal Performance Management Framework. Although chapter six of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) provides no definition of Performance Management System (“PMS”), the Municipal Planning and Performance Management Regulations of 2001 define the *PMS as a* framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed, including determination of roles of the different role-players.

Furthermore, this policy-framework sets out the requirements that the Kopanong Municipality's PMS will fulfil, the principles that informed its development and subsequent implementation, the preferred performance model of the Municipality, the process by which the system will work and the delegation of responsibilities to different role-players in the process and an implementation plan for the system.

The legislative framework for performance management

KLM PMS framework is largely influenced by policy instruments such as Chapter 6 of Municipal Systems Act and Regulations 32 of 2000, and the Municipal Planning and Performance Regulations, 2001 provides that,

“Involving communities in developing some municipal key performance indicators increases the accountability of the municipality. Some communities may prioritise the amount of time it takes a municipality to answer a query, others will prioritise the cleanliness of an area or the provision of water to a certain number of households. Whatever the priorities, by involving communities in setting key performance indicators and reporting back to communities on performance, accountability is increased and public trust in the local government system enhanced”

The above-quoted White Paper is also supported by Batho Pele principles, which policies were given legal stature through the enactment of the Local Government: Municipal Systems Act 2000 (Act 32 of 2000). The said Act requires all municipalities to:

- Develop a performance management system
- Set key performance indicators and performance targets for each of the development priorities and objectives as contained in Integrated Development Plan (IDP)
- monitor and review the performance of the Municipality against the key performance indicators and targets, as well as the performance management system itself;
- Publish an annual performance report on the performance of the Municipality as part of its annual report required by the Local Government: Municipal Finance Management Act 2003 (Act No 56 of 2003) (MFMA);

- Incorporate and report on a set of national key performance indicators as prescribed by the Minister responsible for local government;
- Conduct, on a continuous basis, an internal audit of all performance measures;
- Have their annual performance report audited by the Auditor-General;
- Involve the community in setting indicators and targets and reviewing municipal performance.

The then Minister of Provincial and Local Government published the Municipal Planning and Performance Management Regulations (2001) in terms of the Municipal Systems Act setting out in detail the requirements for performance management. The Regulations also contain the general indicators prescribed by the Minister.

The (MFMA) contains various important provisions related to municipal performance management. It requires that a municipality must, together with its annual budget, approve measurable performance objectives for revenue from each revenue source and for each vote in the budget, taking into account the municipality's IDP. It further requires the mayor to ensure that she/he approves a service delivery and budget implementation plan (SDBIP) within 28 days after the council adopted its budget. An SDBIP must include service delivery targets and performance indicators for each quarter. In terms of section 72 of the MFMA, the municipal manager must not later than 25 January each year assess the performance of the municipality during the first half of the financial year and submit a report thereon to the mayor and the National and Provincial Treasuries. The mayor must submit the mid-year assessment report to the council not later than 30 January. The Municipality must lastly compile an annual report, which must include the Municipality's performance report compiled in terms of the Municipal Systems Act.

3. KLM's approach to performance management

KLM's performance management approach must be part of a broader system of strategic management. This strategic management process must ensure that the Municipality is managed and directed through the integrated development planning, budgeting and performance management processes. The figure below shows how the performance management process both mirrors and integrates with the planning process.

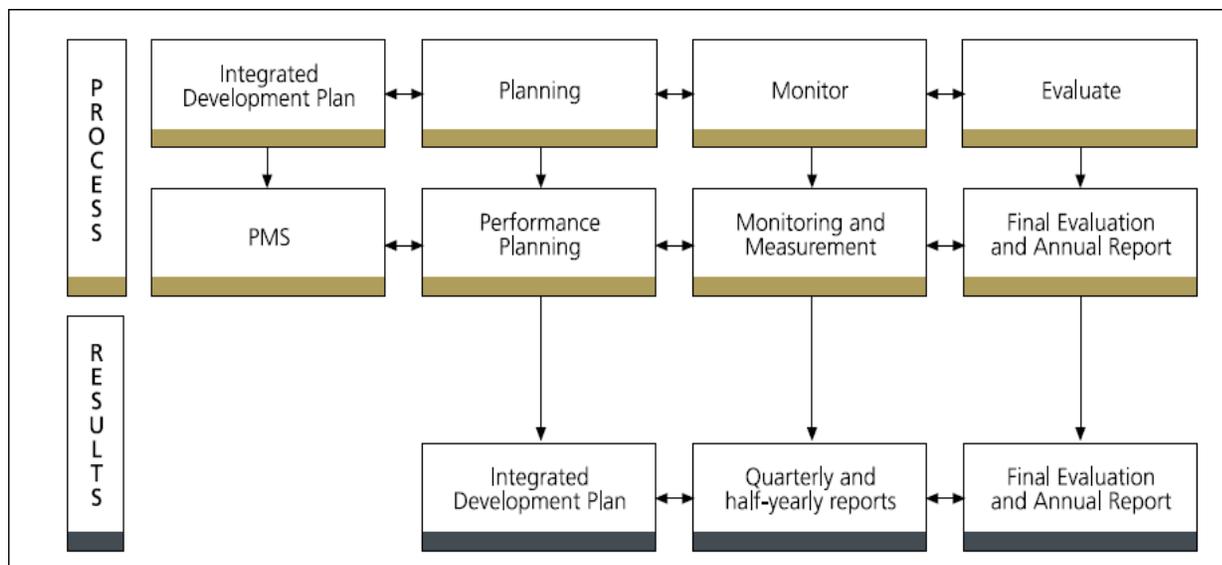

Figure 1: Relationship between the performance management and the planning process

The performance management process then unfolds at a number of different levels, each aligned to the next.

Performance management can be applied to various levels within any organisation. The legislative framework as set out above provides for performance management at various levels in a municipality including strategic (sometimes also referred to as organisational, institutional or corporate) level, operational (also referred to as services, departmental or section/team) level and lastly, individual level.

At strategic level, the five-year IDP of a municipality forms the basis for performance management, whilst at operational level the annual SDBIP forms the basis. The IDP is a long-term plan and by its nature the performance measures associated with it will have a long-term focus, measuring whether a municipality is achieving its IDP objectives. The SDBIP (both for the municipality as a whole and that of a department) is more short-term in nature and the measures set in terms of the SDBIP, reviewing the progress made with implementing the current budget and achieving annual service delivery targets.

The key performance indicators and performance targets set for the Kopanong Municipality at strategic level are captured in organisational scorecard. The organisational scorecard has been divided into the following key performance areas:

- Financial Viability and Management
- Democracy and Governance
- Infrastructure and Services
- Institutional Transformation & Development
- Social and Economic development

A separate scorecard was also developed for reporting on the general key performance indicators set by the Minister of Provincial and Local Government.

By cascading performance measures from strategic to operational level, both the IDP and the SDBIP, form the link to individual performance management. This ensures that performance management at the various levels relate to one another as required by the Municipal Planning and Performance Regulations. Once the municipality has finalised the SDBIP it should be integrated/included with the performance management system to ensure the cascading of performance measures into the performance agreements of the Municipal Manager and managers directly accountable to her.

The MFMA specifically requires that the annual performance agreements of senior managers must be linked to the SDBIP and the measurable performance objectives approved with the budget.

The Municipality's performance management system should be both dynamic and evolving. It is premised on principles of continuous need for improvement. In ensuring continuous improvement to the Municipality's performance management system, a number of initiatives should be undertaken to nurture and harness the system's capability at all three levels:

- Cascading of the performance management to individuals within the Municipality is the cornerstone of the system. The performance management system at the individual level is aimed at clearly identifying what it takes to achieve the strategic agenda and political priorities;
- Ensuring that management and staff understand what they are responsible for in achieving the Municipality's goals. The following initiatives should be undertaken to ensure that accountability for performance is constantly assigned and well understood:
- Managers and strategic support officials, once an appropriate and user-friendly system is adopted, need to be capacitated on the operationalisation and utilisation of the appropriate system to simplify performance management and performance reporting;
- Performance agreements of all section 57 employees must be concluded within one month after the beginning of the municipal financial year;
- New scorecards (2013/2014) must outline both the annual as well as quarterly targets to accommodate the performance tracking system as shall be developed by the Municipality;

All employees must be encouraged to develop individual development plans in order to acquire competencies necessary to ensure higher levels of performance on their respective key performance areas.

Objectives of Performance Management System

As indicated above the Municipality's PMS is the primary mechanism to monitor, review and improve the implementation of its IDP and to gauge the progress made in achieving the objectives as set out in the IDP. The PMS should seek to achieve the following objectives:

Facilitate increased accountability

The PMS should provide a mechanism for ensuring increased accountability of employees to the Council and councillors to local communities and other external stakeholders

Facilitate learning and improvement

The PMS should facilitate learning in order to enable the Municipality to improve service delivery.

Provide early warning signals

It is important that the system ensure decision-makers are timeously informed of performance related risks, so that they can facilitate intervention, if and when necessary.

Facilitate decision-making

The PMS should provide appropriate management information that will allow efficient, effective and informed decision-making, particularly on the allocation of resources.

Principles governing the PMS of the Municipality

The process of developing a PMS for the Municipality was guided by the planning framework, which includes the principles that informed the development of the Municipality's PMS. The said principles are the following:

- simplicity so as to facilitate implementation given any current capacity constraints,
- politically acceptable to all political role-players
- administratively managed in terms of its day-to-day implementation,

- implementable within any current resource constraints,
- transparency and accountability both in terms of developing and implementing the system,
- efficient and sustainable in terms of the on-going implementation and application of the system,
- public participation in terms of granting citizens their constitutional right to participate in the process,
- integration of the PMS with the other strategic management processes within the Municipality including the IDP,
- objectivity based on credible information and lastly,
- Reliability of the information provided on the progress in achieving the objectives as set out in its IDP.

Preferred performance management model

A performance management model can be defined as the grouping together of performance indicators, sometimes based on the type of indicator, into logical categories or groups (often called perspectives), as a means to enhance the ability of an organisation to manage and analyse its performance. As such a model provides a common framework for what aspects of performance are going to be measured and managed. It further ensures that a balanced set of measures are employed that are not relying on only one facet of performance and therefore not presenting a holistic assessment of the performance of an organisation.

A number of performance models are available and any of them could be applied by the Municipality. The available models include the Municipal Scorecard, Balanced Scorecard, Performance Excellence Model and the Key Performance Area Model. KLM has chosen the Key Performance Area Model as its preferred model. In terms of the said model all indicators are grouped together into five key performance areas namely financial viability and management, institutional transformation and development, infrastructure and service delivery, social and economic development and democracy and governance, and all the Municipality's performance scorecards have been structured accordingly.

In terms of Regulation 10 of the Municipal Planning and Performance Management Regulations, 2001, all municipalities must report on general national KPIs by the end of the

financial year. The reasons why it is important to incorporate the national KPIs into the municipality's set of measures is to:

- Ensure accountability.
- Direct municipalities to focus on national goals and priorities.
- Measure the impact of municipalities on national transformation, development and service delivery programmes.
- Enable benchmarking and create the basis for performance comparison across municipalities.
- Bring some uniformity in the system by ensuring that there is commonality of measures in performance evaluation across municipalities.

The seven (7) general KPIs are provided for in Regulation 10 of the 2001 Municipal Planning and Performance Regulations and are listed below:

- the percentage of households with access to basic level of water, sanitation, electricity and solid waste removal;
- the percentage of households earning less than R1100 per month with access to free basic services;
- the percentage of the municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan;
- the number of jobs created through the municipality's local, economic development initiatives including capital projects;
- the number of people from employment equity target groups employed in the three highest levels of management in compliance with the municipality's approved employment equity plan;
- the percentage of the municipality's budget actually spent on implementing its workplace skills plan; and
- the municipality's financial viability as expressed by the ratios for debt coverage, outstanding service debtors to revenue and cost coverage.

Provide Baseline Information for each KPI

KLM will determine the baseline indicator for each set KPI. A baseline indicator is the value (or status quo) of the indicator prior to the period over which performance is to be monitored and reviewed. This process will be together with setting annual performance targets for each identified KPI. Performance targets will comply with the smart principles (Specific, Measurable, Achievable, Realistic and Time related). It is important to guard against setting too many performance targets.

Target dates for the completion of actions should be set in conjunction with those Departments responsible for their achievement. It is important to be realistic in the setting of target. If realistic targets are not set the municipality will create false expectations and also set its employees up for failure. A need to align and develop risk management strategies to targets is necessary.

These targets will then be followed by unpacking of each of the annual targets and dividing them into quarterly targets. Provision must be made in the organizational scorecards for targets to be met in respect of the first, second, third or fourth quarter.

Allocating Responsibility

It is also necessary to decide who takes responsibility for what actions. In the case of the organisational scorecard responsibility would be allocated to a Department. With regards to departmental and other lower echelon scorecards a name must be placed alongside each action described above. This is also a way of cascading the responsibility from the strategic level down to the operational level and from the organisational goals right down to individual employee performance. The allocation of responsibility should be consistent with the employees' duties and functions as identified on the incumbent's job description or profile. In this way individual employees can also see exactly what their roles are in achieving the strategic objectives.

The process of managing performance

The annual process of managing performance at organizational level in the Municipality involves the steps as set out in the diagram below:

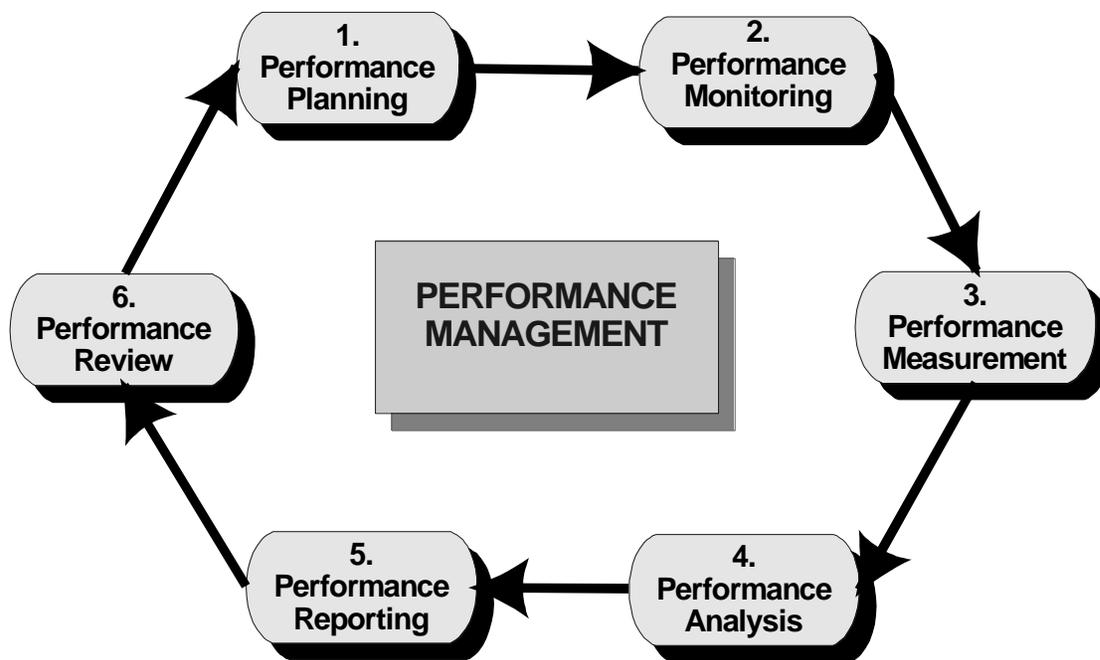

Figure 2: Performance management process

The following table spells out in more detail the role of all relevant role-players in each of the above steps:

Stakeholders	Performance Planning	Measurement and Analysis	Performance Reporting & Reviews
Citizens and Communities	<ul style="list-style-type: none"> Influence the choice of indicators and setting of targets 		Be given the opportunity to review municipal performance and suggest new indicators and targets
Council	<ul style="list-style-type: none"> Adopt indicators and set targets 		Review municipal performance bi-annually
Executive Committee and the IDP Steering Committee	<ul style="list-style-type: none"> Recommend indicators and targets Communicate the plan to other stakeholders 		Conduct the major reviews of municipal performance, determining where goals had or had not been met, what the causal reasons were

Stakeholders	Performance Planning	Measurement and Analysis	Performance Reporting & Reviews
			and to adopt response strategies
Municipal Manager + HODs	Assist the Executive Committee in <ul style="list-style-type: none"> Identify and propose indicators and targets Communicate the plan to other stakeholders 	<ul style="list-style-type: none"> Regularly monitor the implementation of the IDP, identifying risks early Ensure that regular monitoring (measurement, analysis and reporting) is happening in the organisation Intervene in performance problems on a daily operational basis 	<ul style="list-style-type: none"> Conduct regular reviews of performance Ensure the availability of information Propose response strategies to the Executive Committee
Directorate Managers	Develop service plans for integration with other sectors within the strategy of the organisation	<ul style="list-style-type: none"> Measure performance according to agreed indicators, analyse and report regularly Manage implementation and intervene where necessary Inform decision-makers of risks to service delivery timeously 	Conduct reviews of service performance against plan before other reviews
Internal Audit Section		Audit the reliability of performance reporting	<ul style="list-style-type: none"> ✗ Audit the functionality of the performance management system ✗ Initiate the annual review of the performance management system

Table 1: Role-players in the performance management process

The balance of this framework looks at each of the steps in more detail and how they will unfold in the process of managing performance in the Municipality. Although the steps and what follows relates mainly to performance management at strategic level, the principles and approaches as espoused could also be applied to performance management at operational level.

Performance Planning (March – June)

The performance of the Municipality is to be managed in terms of its IDP and the process of compiling an IDP and the annual review thereof, forms an important component of the process of planning for performance. It should be noted that the last component of the cycle is that of performance review and the outcome of such a review process must inform the next cycle of IDP compilation/review by focusing the planning processes on those areas in which the Municipality have under-performed.

Performance monitoring (In -Year)

Performance monitoring is an ongoing process by which a manager accountable for a specific indicator as set out in the organisational scorecard (or a service delivery target contained in an annual SDBIP) continuously monitors current performance against set targets. The aim of the monitoring process is to take appropriate and timely corrective action if it is anticipated that a specific target will not be met by the time that the formal process of performance measurement, analysis, reporting and review is due.

In the instance of KLM, it is **recommended** that the organisational scorecard of the Municipality be reported on a six monthly basis to the Council.

Performance monitoring requires that between formal performance measurements appropriate action should be taken if it becomes evident that a specific performance target is unlikely to be met. It is therefore **proposed** that managers track performance trends against targets for those indicators that lie within the area of accountability of their respective Departments at least on a monthly basis as a means of early identification of performance related problems and to take appropriate remedial action.

It is further **recommended** that each manager delegate to the direct line manager the responsibility to monitor the performance for his/her unit. Such line managers are, after all, best placed given their understanding of their unit to monitor on a regular basis whether targets are being met currently or will be met in future, what the contributing factors are to the level of performance and what interim remedial action needs to be undertaken.

Performance measurement (Quarterly)

Performance measurement refers to the formal process of collecting and capturing performance data to enable reporting to take place for each key performance indicator and against the target set for such indicator. Given the fact that initially at least the Municipality will have to rely on a manual process to manage its performance, provision has been made in the organisational scorecard for the name of an official responsible for reporting on each

indicator (please note that this might not necessarily be the same official accountable for performance on an indicator).

The said official will, when performance measurement is due, have to collect and collate the necessary performance data and capture the result against the target for the period concerned on the organisational scorecard and report the result to his/her manager making use of the required reporting format after completing the next step (see performance analysis below). It should be noted at this stage that for each of the scorecards two formats exist, namely a planning format and a reporting format. The planning format is used to plan and capture the data relating to each performance target for each indicator every month whilst the reporting format is used to report actual performance quarterly against targets to the Executive Committee.

Performance analysis

Performance analysis involves the process of making sense of measurements. It requires interpretation of the measurements as conducted in terms of the previous steps to determine whether targets have been met and exceeded and to predict whether future targets is likely to be met or not. Where targets have not been met, performance analysis requires that the reasons therefore should be examined and corrective action recommended. Where targets have been met or exceeded, the key factors that resulted in such success should be documented and shared so as to ensure Organisational learning.

In practice, the afore-mentioned entails that the manager responsible for each indicator will have to, after capturing the performance data against targets on the organisational scorecard, analyse the underlying reasons why a target has/has not been met and capture a summary of his/her findings on the performance report. The manager will thereafter have to compile a draft recommendation of the corrective action proposed in instances where a target has not been met and also capture this in the performance report. Provision has been made on the reporting format to capture both the reason for the performance status (in other words the results of the analysis undertaken) and the 'corrective action' proposed.

The completed Organisational scorecard must be submitted to a formal meeting of the senior management team for further analysis and consideration of the draft recommendations as captured by the relevant managers. This level of analysis should examine performance across the organisation in terms of all its priorities with the aim to reveal and capture whether any broader organisational factors are limiting the ability to meet any performance targets in addition to those aspects already captured by the relevant manager.

The analysis of the organisational scorecards by senior management should also ensure that quality performance reports are submitted to Councillors and that adequate response strategies are proposed in cases of poor performance. Only once senior management has

considered the Organisational scorecard, agreed to the analyses undertaken and captured therein and have reached consensus on any corrective action, can the organizational scorecards be submitted to the Executive Committee for consideration and review.

Performance reporting and review (Quarterly and Annually)

The next two steps in the process of performance management, namely that of performance reporting and performance review will be dealt with at the same time. This section is further divided into three sections dealing with the requirements for in-year versus annual reporting and reviews respectively and, lastly, a summary is provided of the various reporting requirements.

In-year performance reporting and review (Monthly, Quarterly, mid-Year, Annually)

The submission of the organizational scorecards to the Executive Committee for consideration and review of the performance of the Municipality as a whole is the next step in the process. The first such report is a major milestone in the implementation of any PMS and it marks the beginning of what should become a regular event, namely using the performance report as a tool to review the Municipality's performance and to make important political and management decisions on how to improve.

As indicated earlier it is **recommended** that the organisational scorecards be submitted to the Executive Committee for consideration and review on a six monthly basis. The reporting should therefore take place in January (for the period July to the end of December) and July (for the period January to the end of June).

The review in January will coincide with the mid-year performance assessment required by section 72 of the MFMA.

Performance review is the process where the leadership of an organisation, after the performance of the organisation has been measured and reported to it reviews the results and decides on appropriate action. In reviewing the organisational scorecards submitted to it on a six monthly basis, The Executive Committee will have to ensure that targets committed to in the scorecard have been met, where they have not, that satisfactory and sufficient reasons are provided by senior management and that the corrective action being proposed is sufficient to address the reasons for poor performance. If satisfied with the corrective action as proposed, these must be adopted as formal resolutions of Council.

Annual performance reporting and review

On an annual basis a comprehensive report on the performance of the Municipality must be compiled. The requirements for the compilation, consideration and review of such an annual report are set out in chapter 12 of the MFMA. In summary it requires that:

- All municipalities for each financial year compile an annual report;
- The annual report must be tabled in the council within seven months after the end of the financial year;
- The annual report must immediately after it has been tabled, be made public and the local community invited to submit representations thereon;
- The Council must consider the annual report within nine months after the end of the financial year and adopt an oversight report containing the council's comments on the annual report;
- The oversight report as adopted by the council must be made public;
- The annual report as tabled and the Council's oversight report must be forwarded to the Auditor-General, the Provincial Treasury and the Department of Cooperative Governance
- The annual report as tabled and the Council's oversight report must be submitted to the Provincial Legislature.

The oversight report provides the opportunity for the Council to review the performance of the Municipality. The requirement that the annual report once tabled, and the oversight report be made public, provides the mechanism for the general public to review the performance of the Municipality. It is however **proposed** that in an effort to assist the public in the process and subject to the availability of funding, a user-friendly citizens' report be produced for public consumption in addition to the formal annual report. The citizens' report should be a simple, easily readable and attractive document that translates the annual report for public consumption.

It is also proposed that annually a public campaign be embarked upon to involve the citizens of KLM in the review of the Municipality's performance over and above the legal requirements of the Municipal Systems Act and the MFMA. Such a campaign could involve all or any combination of the following methodologies:

- Various forms of media including radio, newspapers and billboards should be used to convey the annual report.
- The public should be invited to submit comments on the annual report via telephone, fax and email.
- Public hearings could be held in a variety of venues across the Municipality to obtain input on the annual report.

- Making use of existing structures such as ward committees to disseminate the annual report and invite comments.
- Hosting a number of public meetings and road shows at which the annual report could be discussed and input invited.
- Producing a special issue of the municipal newsletter in which the annual report is highlighted and the public invited to comment.
- Posting the annual report on the Municipality's website and inviting input.
- The public review process should be concluded by a formal review of the annual report by the IDP Representative Forum of the Municipality.

Lastly it should be mentioned that the performance report of a municipality is only one element of the annual report and to ensure that the outcome thereof timeously inform the next cycle of performance planning in terms of an IDP compilation/review process, it is **recommended** that the annual performance report be compiled and completed as soon after the end of a financial year as possible but ideally not later than two months after financial-year end.

Summary of various performance reporting requirements

The following table, derived from both the statutory framework for performance management and this PMS framework, summarises for ease of reference and understanding, the various reporting deadlines as applied to the Municipality:

Report	Frequency	Submitted for consideration and/or review to	Remarks
1. Departmental SDBIPs	Continuous	Manager of Department	See MFMA Circular 13 of National Treasury for further information

Report	Frequency	Submitted for consideration and/or review to	Remarks
2. Monthly budget statements	Monthly	Executive Mayor	See sections 71 and 54 of the MFMA
3. Organisational scorecards	Six monthly	Executive Committee	This PMS framework (see section 7.5.1 above)
4. Mid-year budget and performance assessment	Annually during January of each year	Executive Mayor	See sections 72 and 54 of the MFMA
5. Performance report	Annually	Council	See section 46 of the Municipal Systems Act. Said report to form part of the annual report (see 7 below)
6. Annual report	Annually	Council	See chapter 12 of the MFMA

Table 2: PMS reporting requirement

REPORTING

Who Reports to Whom?

The reporting process will follow the lines of accountability as detailed in the performance monitoring, measurement and review phases above. Reports will be submitted to all different stakeholders using following internal processes as outlined above and through the different political and community stakeholders as required by the Municipal Systems Act, the Municipal Finance Management Act and the Performance Regulations. Reports will be submitted to the following stakeholders during the timelines outlined in the municipality's performance process plan as shown under the **Performance (Cycle) Management process** section: pg 11-1

- **KLM Council** reporting to Communities;
- **KLM Council** reporting to Ward Committees;
- Mayor reporting to Council;
- Municipal Manager reporting to the Mayor and the Mayoral Committee;
- Heads of Departments reporting to the Municipal Manager, through the Executive Management Team, and to Portfolio Committees;
- Section Managers reporting to Heads of Departments; and

- Employees reporting to their section managers and supervisors.

Tracking and Managing the Reporting Process

To ensure that the reporting processes runs smoothly and effectively, the PMS Unit in the Office of the Municipal Manager will co-ordinate all activities related to efficient reporting. The functions of the Unit in this instance include the following:

- Developing a process plan or timetable for all reporting processes for the year;
- Prepare logistics for reporting;
- Improve the reporting format, should there be a necessity to do so;
- Track and monitor reporting processes;
- Control the quality of reports going to reviews at political levels in terms of alignment with the adopted reporting format;
- Analyse departmental performance reports;
- Compile quarterly organisational performance reports and the annual report; and
- Review the reporting process and suggest improvements.

Publication of Performance Reports

The annual report is required by legislation to be availed to the public. KLM will, however, within its resources and capacity, keep the communities more frequently informed of performance information through, these will depend on your communication strategy and budget:

- a. Publication of reports in the municipal website
- b. Press releases
- c. Press Briefings
- d. Publication of pamphlets or newsletters
- e. Local Radio programmes
- f. Ward Committee meetings.

Public Feedback Mechanisms

Public feedback on reported performance will be during IDP review processes, annual customer surveys and through ward committee meetings.

THE AUDITING OF PERFORMANCE MEASURES:

The role of internal audit in performance management

In order for the performance management system to enjoy credibility and legitimacy from the public and other stakeholders, performance reports, particularly the annual performance report, must be audited. Audits should ensure that reported performance information is accurate, valid and reliable.

The MFMA requires that the Municipality must establish an internal audit unit. Section 45 of the Municipal Systems Act stipulates that the results of the Municipality's performance measures must be audited by the Municipality's internal auditors as part of the internal auditing process. The Auditor-General must annually audit the Municipality's performance measurement results.

The Municipal Planning and Performance Management Regulations stipulate that the internal auditors must on a continuous basis, audit the performance measurements of the Municipality and submit quarterly reports on their audits to the Municipal Manager and the Municipality's performance audit committee.

In terms of the provisions of the Municipal Systems Act and the Performance Regulations of 2001, the annual performance report must be audited internally, and before being tabled and made public, the annual performance report will also be audited by the Auditor-General. It is therefore important to allow sufficient time between completion of annual reports and the tabling of the annual report for auditing.

After being reviewed by the council, the annual report must then be submitted to the Auditor-General before 31 August of every year, for auditing and be submitted to the MEC for local government in the province for the MEC to complete an annual report of performance of all municipalities in the province, identifying poor performing municipalities and proposing remedial action and submit the provincial report to the national minister. The national minister will then present a consolidated report to parliament.

Internal performance auditing must include an assessment of the following:

- (i) The functionality of the municipality's performance management system.
- (ii) Whether the municipality's performance management system complies with the Act.

- (iii) The extent to which the municipality's performance measurements are *reliable* in measuring the performance of municipalities by making use of indicators.

Each of the aforementioned aspects will now be looked at briefly.

- **Functionality**

A system, process or mechanism functions properly if it operates as expected. Applied to the Municipality's PMS it means that the internal auditors must determine and give an opinion on whether the PMS and its various components operate as intended.

- **Compliance**

To comply means to act in the way as was commanded by the law-maker. Applied to the Municipality's PMS the requirements of the Municipal Systems Act, Municipal Planning and Performance Management Regulations and the MFMA must be met. This compliance check would require that the Municipality's internal auditors, at least on an annual basis, verify that the Municipality's PMS complies with the said legal requirements.

- **Reliability**

To be reliable means to be trustworthy or dependable. Reliability in the context of PMS refers to the extent to which any performance measures reported upon are reliable, i.e. factually correct and believable. Auditing the reliability of the Municipality's performance measurement results will entail the continuous verification of data supplied as performance results. This will require that the Municipality establishes a proper information management system (electronically or otherwise) so that the internal auditors are able to access information regularly and to verify its correctness.

Internal Auditing of Performance Measurements

The Internal Audit Unit of KLM

In terms of Regulation 14 of the Planning and Performance Regulations of 2001, every municipality must develop and implement mechanisms, systems and processes for auditing the results of performance measurements as part of its internal auditing processes. The functions of the internal audit unit include the assessment of the following:

- (i) The functionality of the municipality's performance management system;
- (ii) Whether the municipality's performance management system complies with the provisions of the Municipal Systems Act; and
- (iii) The extent to which the municipality's performance measurements are reliable in measuring performance of municipalities on its own indicators and the national indicators

The Regulations further provides that the municipality's internal auditors must:

- (i) On a continuous basis audit the performance measurements of the municipality; and
- (ii) Submit quarterly reports on their audits to the municipal manager and the performance audit committee.

KLM has established an Internal Audit unit whose functions are provided for by the 2001 Performance Regulations as indicated in the above extract. The Internal Audit Unit will be responsible for quality checks balances of all performance information submitted for measurement and review. Quality control is the central and key function of the Unit that will ensure achievement of effective and efficient performance by **KLM** the Municipal Manager and the Mayor will place reliance on the performance audit risk assessments and audit reports to make informed decisions and motivate for any reviews and improvements to the municipal council and communities.

Performance Audit Committee

The MFMA and the Municipal Planning and Performance Management Regulations require that the Council establish a performance audit committee consisting of a minimum of three members, the majority of whom may not be employees of the municipality. No councillor may be a member of the performance audit committee.

The performance audit committee must:

- Review the quarterly reports submitted to it by the internal auditors

- Review the municipality's PMS and make recommendations in this regard to the Council
- At least twice during a financial year submit an audit report to the Council

Performance Investigations

The Performance Audit Committee should be able to commission in-depth performance investigations where there is either continued poor performance, if the reported performance measurements are unreliable or on a random ad hoc basis. The performance investigations should assess:

- The reliability of reported information
- The variance between actual performance and set targets
- The reasons for any material variance
- Corrective action and improvement strategies

While the internal auditors may be used to conduct these investigations, it is preferable that external service providers, who are experts in the area to be audited, should be used. The Council should set clear terms of reference for each such investigation. It is crucial that Organisational PMS be paired with Individual PMS

EMPLOYEE PERFORMANCE MANAGEMENT

Legal Framework that Governs Employee Performance Management

In local government, municipal employees now fall into two broad categories: namely, the employees who are governed by Section 57 of the Municipal Systems Act (as amended, section 54A) and enter into time-specified employment contracts with the municipality, and those that are employed on permanent basis and are governed by the provisions of the Local Government Bargaining Council. In this policy framework, all the employees employed under Section 57 (as amended) will be referred to as “**Section 57 Managers**” and those under the Bargaining Council will be referred to as “**Permanent Employees**”.

The local government legislation has provided guidance on managing and rewarding performance of Section 57 Managers, i.e. the Municipal Manager and all Managers directly accountable to her. The Performance Management Regulations for Municipal Managers and Managers Directly Accountable of 2006 make special provisions for employment and managing performance of these employees. The pertinent provisions will be outlined

briefly below. However a full copy of the Regulations will be attached as one of the appendices to this policy framework.

Section 57 managers must enter into employment contract with the municipality within sixty (60) days on assumption of duties and the regulations give a detailed guide on the elements of an employment contract;

Performance Agreements must be signed on each financial year or part thereof;

A new **performance agreement** must be concluded within **one month** after the commencement of the new financial year, i.e. by 31 July of every year;

A **personal development plan** must be documented at the end of the performance review and form part of the performance agreement;

The employee's performance must be assessed against two components:

Key Performance Areas (KPA's) at (80%) and Core Competency Requirements (CCR's) at (20%);

A 5 - point rating scale should be provided for each Key Performance Indicator in the employees scorecard;

The municipality must establish Evaluation Committees who must meet annually to evaluate the performance of the Municipal Manager and the managers directly accountable to the Municipal Manager;

The Municipal Manager's annual performance must be evaluated by the Mayor, Chairperson of the Performance Audit Committee, Member of the Mayoral Committee, Mayor and/or Municipal Manager from another municipality and Member of a Ward Committee nominated by the Mayor;

Managers directly accountable to the Municipal Manager must be rated by the Municipal Manager, Chairperson of the Performance Audit Committee, Member of the Mayoral Committee and a Municipal Manager from another municipality.

A performance bonus ranging from a minimum of 5% - 14% maximum of the all-inclusive remuneration package may be paid as follows:

A score of 130 - 149% is awarded a bonus from 5% - 9%

A score of 150% and above is awarded a bonus from 10% - 14%;

Guaranteed annual cost of living adjustment to salaries must be paid and this is not linked to performance;

Rewarding of Performance for Section 57 employees must be done after the tabling of the annual performance report and the financial audited statements in February annually.

As can be seen from the above provisions, the Section 57 employees in the Kopanong Local Municipality will align with the above regulations and their performance will be measured through their performance plans/scorecards. The same organizational scorecard will where applicable be cascaded to the employee scorecard and these will form part of their performance agreements.

It is the intention of this policy framework to formally incorporate the permanent employees into the overall performance management system of the municipality. This will translate into all employees of the Kopanong Local Municipality developing annual scorecards that are aligned to their functional areas of responsibility and thereafter entering into performance agreements with their respective supervisors. Just like in the Section 57 employee performance provisions, the performance agreements of the permanent employees will include a personal development plan.

The formats of all scorecards and reporting formats will be similar for all employees to create uniformity and consistency in monitoring performance on both employee and organizational KPIs and performance targets.

The phases of managing individual performance are outlined below:

Aligning Individual Performance to the Organizational

Performance Management System

The performance of an organisation is integrally linked to that of staff. If employees do not perform an organisation will fail. It is therefore important to manage both the organizational and individual performance at the same time. The relationship between organisational performance and employee performance starts from planning, implementation, monitoring and review. All the 5 phases in the organizational performance apply to the management of individual performance. The monitoring system using weekly, bi-monthly, monthly and quarterly reports is informed by individual activities at sectional and departmental levels. However, individual performance reviews differ from organizational reviews. Each phase will be discussed briefly below.

Phase 1: Planning for Employee Performance

The IDP yields a set of indicators and targets. These become an undertaking of the municipality to the community. The IDP informs the development of the SDBIP and the organizational scorecard. The components of the organizational scorecard will be cascaded to the municipal manager's performance scorecard and performance agreement as she is responsible for the implementation of the IDP. The municipal manager will then extract relevant indicators to inform scorecards of the different Departments. These indicators would then become the indicators and targets of the Heads of Departments to be incorporated in their performance scorecards and agreements. The Heads of Departments will in turn cascade the indicators and targets to lower levels in line with the scope of responsibilities at that level. Therefore, this policy framework establishes a system of individual performance management linked to the organizational performance through the scorecard model.

Effecting Weighting and Rating on Employee Scorecards

The KLM will adopt a weighting approach to show the relative importance of one indicator against another indicator. Every indicator in an employee's performance scorecard/plan will be assigned a weighting. The total of the weightings on the performance scorecard must add up to 100 points. An important indicator may, for example, be assigned a weighting of 50 out of the total of 100 whereas a less important KPI may be assigned a weighting of 15 out of 100. The purpose of the weightings is to show employees what the key focus areas are in their work.

The weighting of indicators in the scorecard of the Section 57 employees will follow the line of the provisions of the 2006 Performance Regulations. The weighting of 80% will be allocated to KPA-related indicators and 20% of the weighting will be allocated to CCR-related indicators.

The five-point rating scale will apply in evaluation process of all employee performance. The 2006 Performance Regulations sets out the rating as in **Table 1** below.

Table 1: The 5-Point Rating Scale for Employee Performance Appraisals

LEVEL	TERMINOLOGY	DESCRIPTION	RATING
5	Outstanding Performance	Performance far exceeds the standard expected of an employee at this level. The appraisal indicates that the Employee has achieved above fully effective results against all performance criteria and indicators as specified in the PA and Performance plan and maintained this in all areas of responsibility throughout the year.	
4	Performance significantly above expectations	Performance is significantly higher than the standard expected in the job. The appraisal indicates that the Employee has achieved above fully effective results against more than half of the performance criteria and indicators and fully achieved all others	
3	Fully effective	Performance fully meets the standards expected in all areas of the job. The appraisal indicates that the Employee has fully achieved effective results against all significant performance criteria and indicators as specified in the PA and Performance Plan.	
2	Performance not fully	Performance is below the standard required for the job in key areas.	

	effective	Performance meets some of the standards expected for the job. The review/assessment indicates that the employee has achieved below fully effective results against more than half the key performance criteria and indicators as specified in the PA and Performance Plan.	
1	Unacceptable performance	Performance does not meet the standard expected for the job. The review/assessment indicates that the employee has achieved below fully effective results against almost all of the performance criteria and indicators as specified in the PA and Performance Plan. The employee has failed to demonstrate the commitment or ability to bring performance up to the level expected in the job despite management efforts to encourage improvement.	

Table 1: The 5-Point Rating Scale for Employee Performance Appraisals

Local Government: Municipal Performance Regulations for Municipal Managers and Managers directly accountable to MM, 2006.

The outcome of the planning phase in the individual performance management will result in all employees having signed performance agreements and scorecards at the beginning of every financial year. The provision for employees on probation should apply for employees joining the organisation well after the beginning of the financial year. An employee scorecard template is attached as **Appendix III**.

Phase 2: Implementation, Monitoring, Data Analysis and Measurement.

When projects and programmes are implemented, the monitoring system as proposed in the organizational performance phases will apply. All the reporting timelines and information management responsibilities will be carried out as detailed in these phases.

Phase 3: Coaching

Should an employee not be achieving the agreed indicators in his/her performance scorecard the manager/supervisor must assist the employee by managing his/her performance more closely. It is not appropriate that the first time an employee hears about his/her non-performance is at the formal performance review. Employees must be coached and given feedback at least quarterly before review.

Phase 4: Employee Performance Review

This phase involves jointly assessing actual performance against expectations at the end of the performance cycle so as to review and document planned vs. actual performance. The following guidelines will be applicable for conducting individual performance reviews:

A Manager/supervisor will prepare ratings of employee's performance against key performance indicators. The rating will be done by considering the year end actual cumulative as well, the evidence which was documented during the coaching cycle as well as any other relevant input.

The Manager/supervisor will request the employee to prepare for formal appraisal by assessing and rating him/herself against the agreed key performance indicators on their scorecards.

The Manager/supervisor and the employee meet to conduct a formal performance rating with a view to conclude a final rating. The employee may request time to consider the

rating. A second meeting will then take place. In the event of a disagreement, the manager/supervisor has the final say with regard to the final rating that is given. The employee reserves his/her right to invoke the applicable grievance procedure should they be in disagreement with the rating awarded.

After the ratings have been agreed upon the scores are calculated.

The Manager/supervisor must make own notes during the formal review meeting. All the criteria that have been specified must be taken into consideration.

Only those KPIs relevant for the review period in question should be rated according to the five point scale as shown above.

After the year-end review the manager/supervisor and the employee prepare and agree on a personal development plan.

The total score is determined once all the indicators have been rated and scored. This is done with a view to establish if an employee is entitled to a notch increase or an accelerated salary progression or a non-financial award. Annual inflation related increments will not be affected by the implementation of the performance management system and cascading it down to all employees.

Phase 5: Rewarding Performance

This phase establishes the link between performance and reward. It aims to direct and reinforce effective work behaviours by determining and allocating equitable and appropriate rewards to employees.

The performance reward system applied to Section 57 Employees is different from the performance reward system applied to Permanent Employees who are not Section 57 Employees. Section 57 employees reward system is clearly spelt out in the 2006 Performance Regulations and these rewards are be allocated after the tabling of the receipt of the audit report and tabling of the annual report, i.e. in February of each year.

If an employee is a permanent employee of the KLM and is thus covered by the conditions of service of the municipality, performance is not directly linked to pay. Currently permanent employees receive an annually bargained increase determined by the South African Local Government Bargaining Council (SALGBC). Permanent employees who perform outstandingly will receive non-cash rewards, until such time as a national remuneration policy dictates otherwise.

The non-cash rewards that will be awarded to permanent employees appear in **Table 2** below.

Table 2: Non-Cash Rewards that will be awarded to Permanent Employees

Performance levels	Examples of non-cash reward
Outstanding/above performance levels	A. Employee is granted “free” leave days. B. Merit Awards C. Mayoral Excellence Awards D. Promotions
Average performance	No specific reward
Below average performance	Compulsory performance counselling and monthly coaching sessions by manager/supervisor

The employer reserves the right to apply the non-cash rewards for its employees.

Critical Dates and Timelines

Over and above the different management processes that Kopanong Local Municipality will be using to implement its this Performance Management Policy Framework, it will also comply with critical dates and timelines that will make the management of performance align with corporate governance principles and enable other stakeholders to perform their roles and responsibilities efficiently and effectively. The critical dates and timelines are listed below in **Table 3: Critical Timelines**

PHASE	ORGANIZATIONAL ACTIVITIES	INDIVIDUAL ACTIVITIES	TIME FRAME	RESPONSIBILITY
PLANNING	Development and approval of the SDBIP and organizational scorecard		March – May	Council
		Signing performance Contracts/Plans with rest of staff	31 July	Mayor Section 57 Managers
		Signing performance Contracts/Plans with rest of staff	March – June	Municipal Manager All staff
MONITOR MEASURE & REVIEW	Monthly Monitoring	Monthly Monitoring	Monthly	Municipal Manager Senior Managers Section managers/ Supervisors
	Quarterly Review/s	Quarterly Reviews	September December March	Municipal Manager Senior Managers Managers/ Supervisors

		Annual Performance Appraisal	June	Mayor Municipal Manager Senior Managers Managers Supervisors
		Reward and Recognition	June and February	Mayor Municipal Manager Senior Managers
REPORTING	Quarterly and Mid-Term Reports	Quarterly Reports	September December March	Management Team
	Annual reports	Annual Employee Performance Reports	31 August	Mayor Municipal Manager
		Departmental and Section Heads Reports	Monthly	Management Team Section managers
IMPROVEMENT	Performance Improvement Plans		June	Management & employees

General issues relating to performance management

The following are some general issues relating to performance management that need to be taken into consideration in implementing the PMS of the Municipality:

- Annual review of the Performance Management System: Review Annually

One of the functions of the performance audit committee is to review the PMS at least annually alongside IDP. It is envisaged that after an annual review and reporting cycle is complete and the performance audit committee has met, the internal auditors will compile a comprehensive assessment/review report on whether the Municipality's PMS meets the system objectives and principles as set out in this framework and whether the system complies with the Systems Act, the Municipal Planning and Performance Management Regulations and the MFMA. This report must be considered by the performance audit committee and any recommendations regarding amendments or improvements to the PMS, submitted to the Council for consideration.

The Municipal Systems Act requires that the Municipality must annually evaluate its PMS. The review undertaken by the performance audit committee and its recommendations must serve as input into the wider review of the PMS. It is proposed that after the full cycle of the annual review is complete, the Municipal Manager should initiate an evaluation report, taking into account the input provided by departments and the performance audit committee. The report will then be discussed by the Management Team and finally submitted to the Council for consideration.

It is of paramount importance that the municipality not only pay attention to poor performance but also good performance, and it is in this instance that a further recommendation is made for due acknowledgement of excellent performance both at organisational and individual level. It is therefore proposed that an Annual Mayoral Award for Excellence be introduced in order to reward excellent performance.

In order to stimulate and inculcate a culture of performance throughout KLM, an Employee Performance Appraisal System ("EPAS") is highly recommended and such will need to be developed and linked to the Municipality's Organisational Performance Management System. The proposed EPAS should be sufficiently supported by an Incentive Policy that will include appropriate incentive schemes such as municipal budget provision for tuition fees, and other ancillary costs at Institutions of Higher Learning. Such recognition for excellent performance can often motivate teams in the work-place to perform better and yield excellent results.

Amendments to key performance indicators and targets

The Municipality should adopt a policy on in-year amendments to indicators and targets. Ideally a KPI or performance target should not be changed until an annual performance cycle is completed. However, it is accepted that extra-ordinary circumstances may demand a change to any KPI or target. It is recommended that such amendments may be proposed but will be subject to the approval of the Executive Committee.

Institutional arrangements

Implementation of the PMS requires a fair amount of management time. It is recommended that the management of the PMS be assigned to a responsible manager in the municipal manager's office. The manager responsible for the PMS must ensure that key performance indicators and performance targets are set; the performance measurements are regularly carried out and reported on.

At the level of employee performance management the responsibility for co-ordination, administration and record keeping should be assigned to the manager responsible for human resource management.
