Part 1 – Annual Budget

1.1 Mayor's Report

To be distributed during the Council meeting.

1.2 Council Resolutions

- 1. The Council of Joe Gqabi District Municipality, acting in terms of section 16 of the Local Government: Municipal Finance Management Act (MFMA), (Act 56 of 2003) tables:
 - 1.1. The annual budget of the municipality for the financial year 2017/18 and indicative allocations for the two projected outer years 2018/19 and 2019/20; and the multi-year and single-year capital appropriations as set out in the following tables:
 - 1.1.1. Budgeted Financial Performance (revenue and expenditure by standard classification) as contained in Table 12;
 - 1.1.2. Budgeted Financial Performance (revenue and expenditure by municipal vote) as contained in Table 13;
 - 1.1.3. Budgeted Financial Performance (revenue by source and expenditure by type) as contained in Table 14; and
 - 1.1.4. Multi-year and single-year capital appropriations by municipal vote and standard classification and associated funding by source as contained in Table 15.
 - 1.2. The financial position, cash flow budget and cash-backed reserve/accumulated surplus are tabled as set out in the following tables:
 - 1.2.1. Budgeted Financial Position as contained in Table 16;
 - 1.2.2. Budgeted Cash Flows as contained in Table 17; and
 - 1.2.3. Cash backed reserves and accumulated surplus reconciliation as contained in Table 23;
- 2. The revised Integrated Development Plan (IDP) is tabled as reflected in the agenda.
- 3. The Council of Joe Gqabi District Municipality, acting in terms of section 24(2)(c)(i) and (ii) of the MFMA, sections 74 and 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) tables the tariffs for the provision of water and sanitation.
- 4. The measurable performance objectives for capital and operating expenditure by vote for each year of the medium term revenue and expenditure framework as set out in Supporting Table SA7 be noted.
- 5. The Budget related policies including any amendments are tabled for the budget year 2017/18.
- 6. The Department of Roads allocation of R38 million, R11 million on Water Working for Water/Wetlands will only be spend once the money has been transferred to the primary bank account of Joe Gqabi District Municipality. There are signed SLA's in place for the abovementioned grants:

1.3 Executive Summary

This section contains an Executive Summary of the Joe Gqabi District Municipality's (JGDM) Budget followed by a more detailed explanation of its Operating and Capital components over the next three years.

The application of sound financial management principles for the compilation of the Municipality's financial plan is essential and critical to ensure that the Municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities.

National Treasury's MFMA Circular No.85 and 86 was used to guide the compilation of the 2017/18MTREF.

The main challenges experienced during the compilation of the 2017/18 MTREF can be summarized as follows:

- The ongoing difficulties in the national and local economy;
- Aging and poorly maintained infrastructure;
- The need to prioritise projects and expenditure within the existing resource envelope given the backlog in infrastructure maintenance;
- Wage increases is anticipated to exceed consumer inflation; and
- Affordability of capital projects Municipal Infrastructure Grant, Regional Bulk Infrastructure Grant, Water Services Operating Grant and Municipal Water Infrastructure Grant funding were allocated towards developing of new capital infrastructure assets; and
- Outstanding Service Level Agreements

The following budget principles and guidelines directly informed the compilation of the 2017/18 MTREF:

- The 2016/17 Adjustments Budget priorities and targets, as well as the base line allocations contained in that Adjustments Budget were adopted as the upper limits for the new baselines for the 2017/18 annual budget;
- Tariff increases should be affordable and should generally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality, for instance the cost of bulk water, employee related costs and other costs drivers. In addition, tariffs need to move towards being cost reflective, and should take into account the need to address infrastructure backlogs;
- Working for Water and Department of Roads and Transports grants are not gazetted but have been included in the budget. All other grant funding, allocated has been gazetted as required by the annual Division of Revenue Act;

In view of the aforementioned, the following table is a consolidated overview of the proposed 2017/18 Medium-term Revenue and Expenditure Framework:

Table 1 Consolidated Overview of the 2017/18 MTREF

	Adjusted Budget	Budget 2017/18	Budget 2018/19	Budget 2019/20
	2016/17	-		-
Total Revenue (excluding capital transfers				
and contributions)	418 734 927,00	509 347 981,93	514 341 288,55	508 665 983,44
Total Expenditure	480 213 386,00	518 271 972,29	515 836 408,03	510 887 968,12
Surplus / (deficit) - Operational	(61 478 459,00)	(8 923 990,36)	(1 495 119,48)	(2 221 984,68
Total Capital Expenditure	287 438 248,52	258 546 000,00	234 381 000,00	247 415 000,00
Total Capital Funding	278 358 378,00	254 155 000,00	232 626 000,00	246 125 000,00
, ,	(9 079 870,52)	(4 391 000,00)	(1 755 000,00)	(1 290 000,00
Surplus / (deficit) - Total	(70 558 329,52)	(13 314 990,36)	(3 250 119,48)	(3 511 984,68
Adding back Non-Cash items:				
Accumulated depreciation	50 650 661,00			
Debt impairment	20 875 142,00			
Surplus / (deficit) - Total Cash	967 473,48	(13 314 990,36)	(3 250 119,48)	(3 511 984,68

Total Revenue has increased by 10 percent or R 66.4 million for the 2017/18 financial year when compared to the 2015/16 Adjustments Budget.

Total operating expenditure for the 2017/18 financial year has been appropriated at R 518.3 million, which represents an 8 percent increase as compared to the 2016/17 Adjustment Budget.

The capital budget amounts to R258.5 million for 2017/18, which represents an 10 percent decrease as compared to the 2016/17 Adjustment Budget.

1.4 Operating Revenue Framework

JGDM is heavily reliant on grants. The service charges are not making meaningful contribution to the revenue in the short-term, which warranted the introduction of the fire tariffs. This should improve in the medium term.

The following table is a summary of the 2017/18 MTREF (classified by main revenue source):

Table 2 Summary of revenue classified by main revenue source

Less: Revenue Foregone		(2 887 066,60)	(3 060 290,60)	(3 243 908,03)
Grand Total	697 093 305,00	763 502 981,93	746 967 288,55	754 790 983,45

Operating grants and transfers total R 330.5 million in the 2016/17 Adjustment Budget and increases to R 355.4 million in 2017/18. Note that the year-on-year increase for the 2017/18 financial year is 8 percent. This is largely due to an increase in Equitable Share of 7 % and a larger amount from the MIG funded grant being used on operating water and sanitation projects.

The following table gives a breakdown of the various operating grants and subsidies allocated to the municipality over the medium term:

Tariff-setting is a pivotal and strategic part of the compilation of any budget. When rates, tariffs and other charges were revised, local economic conditions, input costs and the affordability of services were taken into account to ensure the financial sustainability of the municipality.

National Treasury continues to encourage municipalities to keep increases in rates, tariffs and other charges as low as possible. Municipalities must justify in their budget documentation all increases in excess of the 6.45 percent. Excessive increases are likely to be counterproductive, resulting in higher levels of non-payment. The basic charges and consumption charges were increased by 6 percent.

It must also be appreciated that the consumer price index, as measured by CPI, is not a good measure of the cost increases of goods and services relevant to municipalities. The basket of goods and services utilised for the calculation of the CPI consist of items such as food, petrol and medical services, whereas the cost drivers of a municipality are informed by items such as the cost of remuneration, bulk purchases of electricity and water, petrol, diesel, chemicals, cement etc. The current challenge facing the Municipality is managing the gap between cost drivers and tariffs levied, as any shortfall must be made up by either operational efficiency gains or service level reductions. Within this framework the Municipality has undertaken the tariff setting process relating to service charges as follows.

1.5 Operating Expenditure Framework

The Municipality's expenditure framework for the 2017/18 budget and MTREF is informed by the following:

- The asset renewal strategy and the repairs and maintenance plan;
- Balanced budget constraint (operating expenditure should not exceed operating revenue) unless there are existing uncommitted cash-backed reserves to fund any deficit;
- Funding of the budget over the medium-term as informed by Section 18 and 19 of the MFMA;
- The capital programme is aligned to the asset renewal strategy and backlog eradication plan;

The following table is a high level summary of the 2017/18 budget and MTREF (classified per main type of operating expenditure):

Fig 2: Expenditure by major type

The budgeted allocation for employee related costs for the 2017/18 financial year totals R 186.9 million, which equals 36 percent of the total operating expenditure. The South African Local Government Bargaining Council recently entered into a three-year Salary and Wage Collective Agreement for the period 01 July 2015 to 30 June 2018. The agreement reached is as follows:

2015/16 Financial Year – 7 per cent

2016/17 Financial Year – average CPI (Feb 2015 – Jan 2016) + 1 per cent

2017/18 Financial Year – average CPI (Feb 2016 – Jan 2017) + 1 per cent

The municipality has budget 7.45 percent as per circular for the 2017/18 financial year. The employee related costs however increased by 3 percent. This is largely due to provision made for the implementation of the Department of Environmental Affairs shared fire services, resulting in no provision being made for employee costs relating to fire services. This resulted in a reduction of employee costs of R 8 million.

The cost associated with the remuneration of Councilors is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (Act 20 of 1998). The most recent proclamation in this regard has been taken into account in compiling the Municipality's budget.

The provision of debt impairment was determined based on Annual Financial Statements for the year ended June 2016 and the Debt Write-off Policy of the Municipality. For the 2017/18 financial year this amount equates to R 20.9 million. While this expenditure is considered to be a non-cash flow item, it informed the total cost associated with rendering the services of the municipality, as well as the municipality's realistically anticipated revenues.

Provision for depreciation and asset impairment has been informed by the Municipality's Asset Management Policy. Depreciation is widely considered a proxy for the measurement of the rate asset consumption. Budget appropriations in this regard total R 46.9 million for the 2017/18 financial year and equates to 9 percent of the total operating expenditure.

Finance charges consist primarily of the repayment of interest on long-term borrowing (cost of capital). Finance charges make (R 2.3 million) of operating expenditure excluding annual redemption for 2017/18 financial year.

Bulk Purchases are allocated R 9 million for 2017/18 financial year, which represents a 111 percentage increase from the 2016/17 adjustment budget

Repairs and Maintenance allocation is R 30 million (excluding the employee costs of departments responsible for repairs and maintenance) for the 2017/18 financial year. The portion reflective as repairs and maintenance is only 6 percent of total operational expenditure, however bulk of the cost associated with repairs and maintenance comprises of employee costs. This is however not included due to the municipality not operating on a job costing basis.

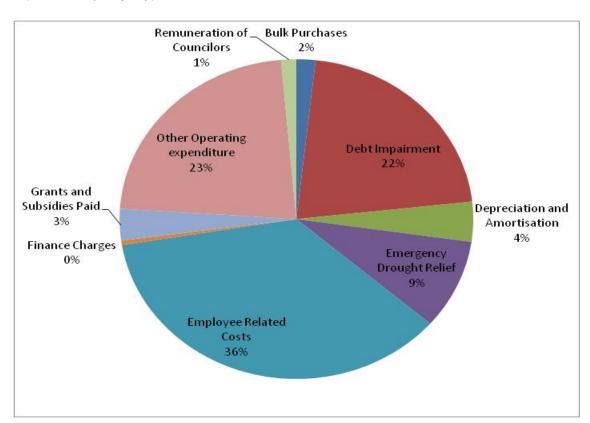

Fig 3: Expenditure by major type – 2017/18

Free Basic Services: Basic Social Services Package

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. To receive these free services the households are required to register in terms of the Municipality's Indigent Policy. The qualifying indigents will be provided with 6kl of water per month

The cost of the social package of the registered indigent households is largely financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act.

Capital expenditure 1.6

The following table provides a breakdown of budgeted capital expenditure by vote:

Explanatory notes to MBRR Table A1 - Budget Summary

- 1. Table A1 is a budget summary and provides a concise overview of the Municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
- 2. The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
- 3. Financial management reforms emphasises the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
 - a. The operating surplus/deficit (after Total Expenditure) is positive over the MTREF
 - b. Capital expenditure is balanced by capital funding sources, of which
 - i. Transfers recognised is reflected on the Financial Performance Budget;
 - ii. Borrowing is incorporated in the net cash from financing on the Cash Flow Budget
 - iii. Internally generated funds is financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The amount is incorporated in the Net cash from investing on the Cash Flow Budget. The fact that the municipality's cash flow remains positive, and is improving indicates that the necessary cash resources are available to fund the Capital Budget.
- 4. The Cash backing/surplus reconciliation shows that in previous financial years the municipality successfully managed to restore its financial viability and consequently its obligations are cash-backed.

Explanatory notes to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

- Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms if each of these functional areas which enables the National Treasury to compile 'whole of government' reports.
- 2. Note the Total Revenue on this table includes capital revenues (Transfers recognised capital) and so does not balance to the operating revenue shown on Table A4.
- 3. Note that as a general principle the revenues for the Trading Services should exceed their expenditures.
- 4. Other functions that show a deficit between revenue and expenditure are being financed from rates revenues and other revenue sources reflected under Finance and Asset Management.

Explanatory notes to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure
per municipal vote. This table facilitates the view of the budgeted operating performance in relation to
the organisational structure of the Municipality. This means it is possible to present the operating
surplus or deficit of a vote.

Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)

- 1. Total revenue is R763.5 million in 2017/18.
- 2. Transfers recognised operating includes the local government equitable share and other operating grants from national and provincial government.
- 3. Employee related costs and other expenditure are the main cost drivers within the municipality and alternative operational gains and efficiencies will have to be identified to lessen the impact of wage and bulk tariff increases in future years.

Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, standard classification and funding source

1. Table A5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multi-year and single-year appropriations); capital expenditure by standard classification; and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.

- 2. The MFMA provides that a municipality may approve multi-year or single-year capital budget appropriations.
- 3. Multi-year capital expenditure has been appropriated at R 254.15 million for the 2017/18 financial year.
- 4. Single-year capital expenditure has been appropriated at R 4.39 million for the 2017/18 financial year.
- 5. Unlike multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year.
- 6. The capital programme is funded from capital and national and provincial grants and external loans. For 2017/18, capital transfers totals R 254.15 million.

Explanatory notes to Table A6 - Budgeted Financial Position

- 1. Table A6 is consistent with international standards of good financial management practice, and improves understandability for councilors and management of the impact of the budget on the statement of financial position (balance sheet).
- 2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as "accounting" Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.
- 3. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
- 4. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment

which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

Explanatory notes to Table A7 - Budgeted Cash Flow Statement

- 1. The budgeted cash flow statement is the first measurement in determining if the budget is funded.
- 2. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.

Part 2 - Supporting Documentation

2.1 Overview of the annual budget process

Section 53 of the MFMA requires the Mayor of the municipality to provide general political guidance in the budget process and the setting of priorities that must guide the preparation of the budget. In addition Chapter 2 of the Municipal Budget and Reporting Regulations states that the Mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging the responsibilities set out in section 53 of the Act.

The Budget Steering Committee consists of the Municipal Manager and senior officials of the municipality meeting under the chairpersonship of the Executive Mayor and/or MMC for Finance.

The primary aim of the Budget Steering Committee is to ensure:

- that the process followed to compile the budget complies with legislation and good budget practices;
- that there is proper alignment between the policy and service delivery priorities set out in the Municipality's IDP and the budget, taking into account the need to protect the financial sustainability of municipality;
- that the municipality's revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and
- that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

2.2 Budget Process Overview

In terms of section 21 of the MFMA the Mayor is required to table in Council ten months before the start of the new financial year, a time schedule that sets out the process to revise the IDP and prepare the budget.

The Mayor tabled in Council the required the IDP and budget time schedule in August 2016. In accordance with the original budget time schedule the Draft IDP and annual budget for 2017/18 have to be adopted by Council on 30 March 2017.

2.2.1 Financial Modelling and Key Planning Drivers

As part of the compilation of the 2017/18 MTREF, financial modelling to ensure affordability and long-term financial sustainability, was undertaken. The following key factors and planning strategies have informed the compilation of the 2017/18 MTREF:

- Municipality growth.
- Policy priorities and strategic objectives.
- Asset maintenance.
- Economic climate and trends (i.e inflation, tariff increases, household debt).
- The approved 2016/17 adjustments budget and performance against the SDBIP.
- Cash Flow Management Strategy.
- Debtor payment levels.
- Loan and investment possibilities.
- The need for tariff increases versus the ability of the community to pay for services.
- Improved and sustainable service delivery.

In addition to the above, the strategic guidance given in National Treasury's MFMA Circular 66 has been taken into consideration in the planning and prioritisation process.

2.2.2 Community Consultation

The draft 2017/18 MTREF will be tabled before Council for community consultation. Thereafter it will be published on the municipality's website, and hard copies made available at, municipal notice boards and various municipal offices.

All documents in the appropriate format (electronic and printed) will be provided to National Treasury, and other national and provincial departments in accordance with section 23 of the MFMA, to provide an opportunity for them to make inputs.

Submissions received during the community consultation process and additional information regarding revenue and expenditure and individual capital projects will be addressed, and where relevant considered as part of the finalisation of the 2017/18 MTREF

2.3 Overview of alignment of annual budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process.

Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political incumbents. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery.

Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

It is important that the IDP developed by municipalities correlate with National and Provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area. Applied to the Municipality, issues of national and provincial importance should be reflected in the IDP of the municipality. A clear understanding of such intent is therefore imperative to ensure that the Municipality strategically complies with the key national and provincial priorities.

The aim of this revision cycle was to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance. One of the key objectives is therefore to ensure that there exists alignment between national and provincial priorities, policies and strategies and the Municipality's response to these requirements.

In order to ensure integrated and focused service delivery between all spheres of government it was important for the Municipality to align its budget priorities with that of national and provincial government. All spheres of government place a high priority on infrastructure development, economic development and job creation, efficient service delivery, poverty alleviation and building sound institutional arrangements.

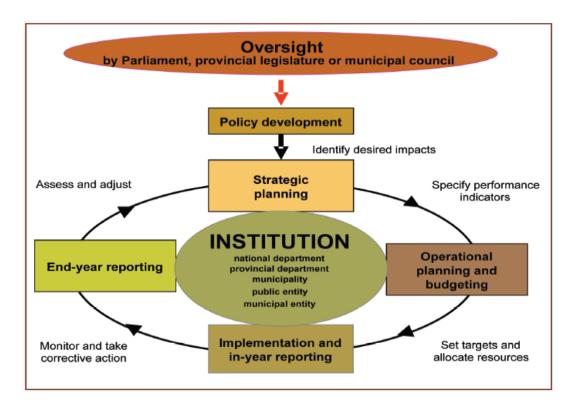

The identification of strategic focus areas which informed the preparation of the IDP and Budget is based on the five key performance areas contained in the 5 Year Local Government Strategic Agenda which are:

- Spatial rationale and analysis.
- Institutional development and transformation.
- Local economic development.
- Infrastructure and service delivery.
- Good governance.
- Financial viability.

2.4 Measurable performance objectives and indicators

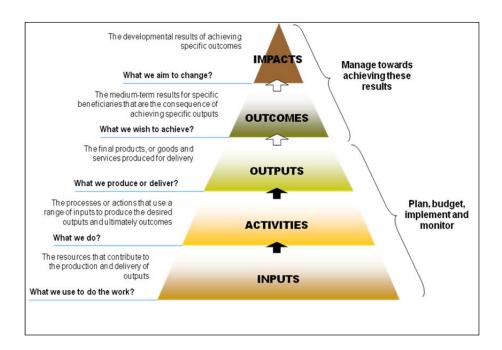

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities. In accordance with legislative requirements and good business practices as informed by the National Framework for Managing Programme Performance Information, the Municipality has developed and implemented a performance management system of which system is constantly refined as the integrated planning process unfolds. The Municipality target, monitors, assesses and reviews organisational performance which in turn is directly linked to individual employee's performance.

At any given time within government, information from multiple years is being considered; plans and budgets for next year; implementation for the current year; and reporting on last year's performance. Although performance information is reported publicly during the last stage, the performance information process begins when policies are being developed, and continues through each of the planning, budgeting, implementation and reporting stages. The planning, budgeting and reporting cycle can be graphically illustrated as follows:

The performance of the Municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations.

The performance information concepts used by the Municipality in its integrated performance management system are aligned to the *Framework of Managing Programme Performance Information* issued by the National Treasury:

The following table sets out the municipality's main performance objectives and benchmarks for the 2017/18 MTREF.

Table 15 MBRR NT SA8 – Performance indicators and benchmarks

2.5 Performance indicators and benchmarks

2.5.1 Borrowing Management

Capital expenditure in local government can be funded by capital grants, own-source revenue and long term borrowing. The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position. As with all other municipalities, Joe Gqabi District Municipality's borrowing strategy is primarily informed by the affordability of debt repayments.

The structure of the Municipality's debt portfolio is dominated by annuity loans. The following financial performance indicators have formed part of the compilation of the 2017/18 MTREF:

- Capital charges to operating expenditure is a measure of the cost of borrowing in relation to the operating expenditure. It can be seen that the cost of borrowing has steadily increased from 1.1 percent in 2016/17 to 1.2 percent in 2017/18. This increase can be attributed to the raising of loans to fund portions of the capital programme (municipal vehicles). While borrowing is considered a prudent financial instrument in financing capital infrastructure development, this indicator will have to be carefully monitored going forward as the Municipality will eventually reach its prudential borrowing limits.
- Borrowing funding of own capital expenditure measures the degree to which own capital expenditure (excluding grants and contributions) has been funded by way of borrowing.

The Municipality's debt profile provides some interesting insights on the Municipality's future borrowing capacity. Firstly, the use of amortising loans leads to high debt service costs at the beginning of the loan, which declines steadily towards the end of the loan's term.

2.5.1.1 Safety of Capital

• The gearing ratio is a measure of the total long term borrowings over funds and reserves. The ratio has been consistent at 0.4 percent.

2.5.1.2 Liquidity

- Current ratio is a measure of the current assets divided by the current liabilities and as a benchmark the Municipality has set a limit of 1, hence at no point in time should this ratio be less than 1. For the 2017/18 MTREF the current ratio is 1.3:1. Going forward it will be necessary to improve these levels.
- The liquidity ratio is a measure of the ability of the municipality to utilize cash and cash equivalents to extinguish or retire its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations. For the 2016/17 financial year the ratio was 0.2 and it has deteriorated to 0.03:1 in 2017/18 financial year. A negative liquidity ratio needs to be considered a pertinent risk for the municipality as any under collection of revenue will translate into serious financial challenges for the Municipality. As part of the longer term financial planning objectives this ratio will always have to be set at a minimum of 1 which will be exceeded in the MTREF.

2.5.1.3 Other Indicators

• Employee costs as a percentage of operating revenue continues to increase over the MTREF. This is primarily owing to the high increase in other expenditure which directly increases revenue levels, as well as increased allocation relating to operating grants and transfers.

2.5.2 Free Basic Services: basic social services package for indigent households

The social package assists residents that have difficulty paying for services and are registered as indigent households in terms of the Indigent Policy of the Municipality. Only registered indigents qualify for the free basic services.

A summary of the free basic services package is set out below:

• All registered indigents, including consumers in the rural areas, will receive 6 kl of water per month fully subsidised.

The cost of the social package of the registered indigent households is largely financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act.

2.6 Overview of budget related-policies

The Municipality's budgeting process is guided and governed by relevant legislation, frameworks, strategies and related policies.

2.6.1 Review of credit control and debt collection procedures/policies

The Credit Control and Debt Collection Policy has been approved by Council in May 2012. While the adopted policy is credible, sustainable, manageable and informed by affordability and value for money there has been a need to review certain components to achieve a higher collection rate. Some of the possible revisions will include the increasing of the credit periods for the down payment of debt. In addition emphasis will be placed on latest legislation changes and court rulings to ensure that credit control and debt collection efforts are not fruitlessly wasted on these debtors.

The 2017/18 MTREF has been prepared on the basis of achieving an average debtors' collection rate of 80 percent on current billings. In addition, the collection of debt in excess of 90 days has been prioritised as a pertinent strategy in increasing the Municipality's cash levels. A service provider, to specifically deal with historical debt, is to be appointed.

2.6.2 Asset Management, Infrastructure Investment and Funding Policy

A proxy for asset consumption can be considered the level of depreciation each asset incurs on an annual basis. Preserving the investment in existing infrastructure needs to be considered a significant strategy in ensuring the future sustainability of infrastructure and the Municipality's revenue base.

Within the framework, the need for asset renewal was considered a priority and hence the capital programme was determined based on renewal of current assets versus new asset construction.

Further, continued improvements in technology generally allows many assets to be renewed at a lesser 'real' cost than the original construction cost. Therefore, it is considered prudent to allow for a slightly lesser continual level of annual renewal than the average annual depreciation. The Asset Management, Infrastructure and Funding Policy is therefore considered a strategic guide in ensuring a sustainable approach to asset renewal, repairs and maintenance and is utilised as a guide to the selection and prioritisation of individual capital projects. In addition the policy prescribes the accounting and administrative policies and procedures relating to property, plant and equipment (fixed assets).

2.6.3 Supply Chain Management Policy

No changes were made to the existing Supply Chain Management Policy.

2.6.4 Budget and Virement Policy

The Budget and Virement Policy aims to empower senior managers with an efficient financial and budgetary amendment and control system to ensure optimum service delivery within the legislative framework of the MFMA and the Municipality's system of delegations. With the implementation of mSCOA deadline of 1 July 2017, virements from repairs and maintenance to operating expenditure will not be possible. This is to improve the municipality's ration to Property, plant and equipment, which has been below the recommended threshold in recent years.

2.6.5 Cash Management and Investment Policy

No changes were made to the Municipality's Cash Management and Investment Policy. The aim of the policy is to ensure that the Municipality's surplus cash and investments are adequately managed, especially the funds set aside for the cash backing of certain reserves.

2.6.6 Tariff Policy

The Municipality's tariff policy provide a broad framework within which the Council can determine fair, transparent and affordable charges that also promote sustainable service delivery. The policy has been approved on various dates and a consolidated tariff policy is envisaged to be compiled for ease of administration and implementation over the next two years.

2.7 Overview of budget assumptions

2.7.1 External factors

Owing to the economic slowdown, financial resources are limited. This has resulted in declining cash inflows, which has necessitated restrained expenditure to ensure that cash outflows remain within the affordability parameters of the Municipality's finances.

2.7.2 General inflation outlook and its impact on the municipal activities

There are five key factors that have been taken into consideration in the compilation of the 2017/18 MTREF:

- National Government macro economic targets;
- The general inflationary outlook and the impact on Municipality's residents and businesses;
- The impact of municipal cost drivers;
- The increase in prices for bulk electricity and water; and
- The increase in the cost of remuneration. The wage agreement negotiated by SALGBC.

2.7.3 Collection rate for revenue services

The base assumption is that tariff and rating increases will increase at a rate slightly higher that CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

2.7.4 Salary increases

The collective agreement regarding salaries/wages as negotiated by SALGBC is 7.45%, as budgeted for the 2017/18 financial year.

2.7.5 Impact of national, provincial and local policies

Integration of service delivery between national, provincial and local government is critical to ensure focussed service delivery and in this regard various measures were implemented to align IDPs, provincial and national strategies around priority spatial interventions. In this regard, the following national priorities form the basis of all integration initiatives:

- Creating jobs;
- Infrastructure Development
- Enhancing education and skill development;
- Improving Health services;
- Rural development and agriculture; and
- Strengthening financial management in public sector

To achieve these priorities integration mechanisms are in place to ensure integrated planning and execution of various development programs. The focus will be to strengthen the link between policy priorities and expenditure thereby ensuring the achievement of the national, provincial and local objectives.

2.7.6 Ability of the municipality to spend and deliver on the programmes

It is estimated that a spending rate of 100 percent is achieved on operating expenditure and on the capital programme for the 2017/18 MTREF of which performance has been factored into the cash flow budget.

2.8 Overview of budget funding

2.8.1 Medium-term outlook: operating revenue

The following table is a breakdown of the operating revenue over the medium-term:

Table 16 Breakdown of the operating revenue over the medium-term

Description	Adjusted Budget 2016/17	Budget 2017/18	Budget 2018/19	Budget 2019/20
Grants & Subsidies Received - Capital	278 358 378,00	254 155 000,00	232 626 000,00	246 125 000,01
Grants & Subsidies Received - Operational Income for Agency Services Interest Earned - External Investments Interest Earned - Outstanding Other Revenue	330 534 230,00	355 444 400,00	351 466 000,00	336 867 000,00
	119 392,00	992 000,00	800 000,00	-

	2 866 317,00	13 078 000,00	13 862 680,00	14 694 440,80
Nett Conventional Service charges	14 369 241,00	397 293,82	420 743,15	445 165,33
	67 477 747,00	121 856 659,30	129 168 058,86	136 918 142,38
Service Charges	127 935 393,00	147 840 258,69	156 710 674,22	166 113 314,67
Less: Revenue Foregone	(60 457 646,00)	(25 983 599,39)	(27 542 615,36)	(29 195 172,29)
Nett Prepaid Service charges		13 539 628,81	14 352 006,54	15 213 126,93
Service Charges		16 426 695,41	17 412 297,14	18 457 034,96
Less: Revenue Foregone		(2 887 066,60)	(3 060 290,60)	(3 243 908,03)
Grand Total	697 093 305,00	763 502 981,93	746 967 288,55	754 790 983,45

2.8.2 Medium-term outlook: capital revenue

The following table is a breakdown of the funding composition of the 2017/18 medium-term capital programme:

Table 17 Sources of capital revenue over the MTREF

Source of Funding	Budget 2017/18	Budget 2018/19	Budget 2019/20
National Government	174 155 000,00	232 626 000,00	246 125 000,00
Provincial Government	80 000 000,00		
Internally generated funds	4 391 000,00	1 755 000,00	1 290 000,00
	258 546 000,00	234 381 000,00	247 415 000,00

The capital programme is funded from National Grants and transfers.

An additional funding in the form of borrowings have been assessed for other Capital projects, including the acquisition of municipal buildings, which have been excluded from the list of projects in the current budget. Planning is underway relating to frontloading and the acquisition of municipal buildings. Capital projects funded from borrowings will be included in the 2017/18 Adjustment Budget, depending on the cash flow and terms of the funding agreements.

2.8.3 Cash Flow Management

Cash flow management and forecasting is a critical step in determining if the budget is funded over the medium-term. The table below is consistent with international standards of good financial management practice and also improves understandability for councillors and management. Some specific features include:

- Clear separation of receipts and payments within each cash flow category;
- Clear separation of capital and operating receipts from government, which also enables cash from 'Ratepayers and other' to be provide for as cash inflow based on actual performance. In other words the actual collection rate of billed revenue., and
- Separation of borrowing and loan repayments (no set-off), to assist with MFMA compliance assessment regarding the use of long term borrowing (debt).

2.8.4 Cash Backed Reserves/Accumulated Surplus Reconciliation

This following table meets the requirements of MFMA Circular 72 which deals with the funding of a municipal budget in accordance with sections 18 and 19 of the MFMA. The table seeks to answer three key questions regarding the use and availability of cash:

- What are the predicted cash and investments that are available at the end of the budget year?
- How are those funds used?
- What is the net funds available or funding shortfall?

A surplus would indicate the cash-backed accumulated surplus that was/is available. A shortfall (applications > cash and investments) is indicative of non-compliance with section 18 of the MFMA requirement that the municipality's budget must be 'funded'.

Non-compliance with section 18 is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded (budgeted spending is greater than funds available or to be collected). It is also important to analyse trends to understand the consequences, e.g. the budget year might indicate a small surplus situation, which in itself is an appropriate outcome, but if in prior years there were much larger surpluses then this negative trend may be a concern that requires closer examination.

2.8.5 Funding compliance measurement

National Treasury requires that the municipality assess its financial sustainability against fourteen different measures that look at various aspects of the financial health of the municipality. These measures are contained in the following table. All the information comes directly from the annual budgeted statements of financial performance, financial position and cash flows. The funding compliance measurement table essentially measures the degree to which the proposed budget complies with the funding requirements of the MFMA. Each of the measures is discussed below.

2.8.5.1 Cash/cash equivalent position

The Municipality's forecast cash position was discussed as part of the budgeted cash flow statement. A 'positive' cash position, for each year of the MTREF would generally be a minimum requirement, subject to the planned application of these funds such as cash-backing of reserves and working capital requirements.

If the municipality's forecast cash position is negative, for any year of the medium term budget, the budget is very unlikely to meet MFMA requirements or be sustainable and could indicate a risk of non-compliance with section 45 of the MFMA which deals with the repayment of short term debt at the end of the financial year.

2.8.5.2 Cash plus investments less application of funds

The purpose of this measure is to understand how the municipality has applied the available cash and investments as identified in the budgeted cash flow statement. The reconciliation is intended to be a relatively simple methodology for understanding the budgeted amount of cash and investments available with any planned or required applications to be made. This has been extensively discussed above.

2.8.5.3 Monthly average payments covered by cash or cash equivalents

The purpose of this measure is to understand the level of financial risk should the municipality be under stress from a collection and cash in-flow perspective. Regardless of the annual cash position an evaluation should be made of the ability of the Municipality to meet monthly payments as and when they fall due. It is especially important to consider the position should the municipality be faced with an unexpected disaster that threatens revenue collection such as rate boycotts. As indicated above the Municipality aims to achieve at least one month's cash coverage in the medium term, and then gradually move towards two months coverage. This measure will have to be carefully monitored going forward.

2.8.5.4 Surplus/deficit excluding depreciation offsets

The main purpose of this measure is to understand if the revenue levels are sufficient to conclude that the community is making a sufficient contribution for the municipal resources consumed each year. An 'adjusted' surplus/deficit is achieved by offsetting the amount of depreciation related to externally funded assets. Municipalities need to assess the result of this calculation taking into consideration its own circumstances and levels of backlogs. If the outcome is a deficit, it may indicate that rates and service charges are insufficient to ensure that the community is making a sufficient contribution toward the economic benefits they are consuming over the medium term.

It needs to be noted that a surplus does not necessarily mean that the budget is funded from a cash flow perspective and the first two measures in the table are therefore critical.

i	1	1							l	1	1	l	

Joe Gqabi District Municipality – 2017/18 Final Budget and MTREF (for Approval by Council) (24 May 2017)

2.8.5.5 Debt impairment expense as a percentage of billable revenue

This factor measures whether the provision for debt impairment is being adequately funded and is based on the underlying assumption that the provision for debt impairment (doubtful and bad debts) has to be increased to offset under-collection of billed revenues. Considering the debt incentive scheme and the municipality's revenue management strategy's objective to collect outstanding debtors of 90 days, the provision is well within the accepted leading practice.

2.8.5.6 Capital payments percentage of capital expenditure

The purpose of this measure is to determine whether the timing of payments has been taken into consideration when forecasting the cash position. The municipality aims to keep this as low as possible through strict compliance with the legislative requirement that creditors be paid within 30 days.

2.8.5.7 Transfers/grants revenue as a percentage of Government transfers/grants available

The purpose of this measurement is mainly to ensure that all available transfers from national and provincial government have been budgeted for. A percentage less than 100 percent could indicate that not all grants as contained in the Division of Revenue Act (DoRA) have been budgeted for. The Municipality has budgeted for all transfers.

2.8.5.8 Repairs and maintenance expenditure level

This measure must be considered important within the context of the funding measures criteria because a trend that indicates insufficient funds are being committed to asset repair could also indicate that the overall budget is not credible and/or sustainable in the medium to long term because the revenue budget is not being protected.

2.8.5.9 Asset renewal/rehabilitation expenditure level

This measure has a similar objective to aforementioned objective relating to repairs and maintenance. A requirement of the detailed capital budget (since MFMA Circular 28 which was issued in December 2005) is to categorise each capital project as a new asset or a renewal/rehabilitation project. The objective is to summarise and understand the proportion of budgets being provided for new assets and also asset sustainability. A declining or low level of renewal funding may indicate that a budget is not credible and/or sustainable and future revenue is not being protected, similar to the justification for 'repairs and maintenance' budgets.

2.9 Expenditure on grants and reconciliations of unspent funds

2.10 Contracts having future budgetary implications

In terms of the Municipality's Supply Chain Management Policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years). In ensuring adherence to this contractual time frame limitation, all reports submitted to either the Bid Evaluation and Adjudication Committees must obtain formal financial comments from the Financial Management Division of the Treasury Department.

2.11 Capital expenditure details

The following tables present details of the Municipality's capital expenditure programme.

Table 22 2017/18 Capital expenditure by asset class

2.12 Legislation compliance status

Compliance with the MFMA implementation requirements have been substantially adhered to through the following activities:

1. In year reporting

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Executive Mayor (within 10 working days) has progressively improved and includes monthly published financial performance on the Municipality's website.

2. Internship programme

The Municipality is participating in the Municipal Financial Management Internship programme and is intending to employ interns to undergo training in various divisions of the Budget and Treasury Office.

Budget and Treasury Office

The Budget and Treasury Office has been established in accordance with the MFMA.

4. Audit Committee

An Audit Committee has been established and is fully functional.

5. Service Delivery and Implementation Plan

The detail SDBIP document is at a draft stage and will be finalised after approval of the 2017/18 MTREF on the 30 March 2017 directly aligned and informed by the 2017/18 MTREF.

6. Annual Report

Annual report has been compiled in terms of the MFMA and National Treasury requirements.

MFMA Training

The MFMA training module in electronic format is presented at the Municipality's internal centre and training is ongoing.

.
