# **CHAPTER 1: INTRODUCTION**

This document presents the reviewed Integrated Development Plan for the City of Ekurhuleni for the term 2016/17 to 2020/21. This is the fifth (5) generation IDP that the City has developed since the establishment of local government in terms of the Local Government: Municipal Local Government Structures Act (Act No. 117 of 1998).

Integrated Development Planning is a process through which municipalities prepare a strategic development plan which extends over five years aligning with the term of Council. The integrated Development Plan is the product of the IDP process, which then serves as a municipal strategic planning instrument which guides and informs all planning, budgeting, management and decision making processes in the city.

# 1.1 Legislative Context

In terms of the Constitution of the Republic of South Africa (Act 108 of 1996), local government is in charge of its own development and planning processes. This Constitutional mandate to relate management, budgeting and planning functions to objectives, clearly indicates the intended purpose of the municipal IDP as to:

To ensure sustainable provision of services;

To promote social and economic development:

To promote a safe and healthy environment;

To give priority to the basic needs of communities; and

To encourage community involvement.

It is crucial that the relevant legislation and policies regulating integrated development planning be thoroughly analysed to ensure that the process and its outputs address the principles outlined in the legal framework.

## Constitution of the Republic of South Africa (Act 108 of 1996)

Section 151 of the Constitution, states that developmental local government should make provision for a democratic and accountable government for communities. It also encourages municipalities to ensure the provision of services to communities in a sustained manner in order to promote social and economic development. Local government must promote a safe and healthy environment and encourage community involvement in matters of local government such as municipal transport, municipal health services, municipal roads, and municipal parks and recreation.

Section 152 of the Constitution says that local government should provide democratic and accountable government for local communities. It should ensure the provision of services to communities in a sustainable manner, promote a safe and healthy environment as well as encourage the involvement of communities and community organizations in matters of local government.

Section 153 of the Constitution states that "each municipality should structure and manage its administration, budgeting, and planning processes to give priority to the basic needs of the community and to promote the social and economic development of those communities." Municipalities should participate in national and provincial programmes and infrastructure development programmes. Section 153 of the Constitution also encourages municipalities to involve communities in their affairs.

## Municipal Systems Act (Act 32 of 2000)

The Municipal Systems Act 32 of 2000 (Act 32 of 2000) requires municipal planning to be developmentally oriented, and further that municipalities must undertake an integrated development planning process to produce Integrated Development Plans in order to:

- To achieve the objects of local government set out in Section 152 of the Constitution;
- Give effect to its developmental duties as required by Section 153 of the Constitution.

The Systems Act further prescribes under section 25 that each municipal Council that comes into office after the local government elections must prepare and adopt a single, inclusive and strategic plan (an IDP) for the development of the municipality which:

- Links, integrates and coordinates plans and takes into account proposals for the development of the municipality;
- Aligns the resources and capacity of the municipality with the implementation of the plan;
- Forms the policy framework and general basis on which annual budgets must be based.

The municipal council is further required in terms of section 34 of the Systems Act to annually review the Integrated Development Plan on the basis of an assessment of its performance measures and to the extent that changing circumstances so demand. Section 26 of the Act further outlines the core components of the integrated development plan of a municipality. It requires the Integrated Development Plan of a municipality to reflect:

- The municipal council's vision for the long term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs;
- An assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;
- The council's development priorities and objectives for its elected term;
- The council's development strategies which must be aligned with any national or provincial sector plans and planning requirements binding on the municipality in terms of the legislations;

- A spatial development framework which must include the provision of basic guidelines for a land use management system of the municipality;
- The council's operational strategies;
- Applicable disaster management plan;
- A financial plan, which must include budgeted projects for at least the next three years, and;
- The key performance indicators and performance targets determined in terms of the Act.

## **Municipal Finance Management Act (Act 56 of 2003)**

The Municipal Finance Management Act was promulgated to secure sound and sustainable management of the financial affairs of municipalities and other institutions in the local sphere of government. The Act provides a mandatory provision that relate to financial and performance management. Section 2 of the Act stipulates that the objective is to secure sound and sustainable management of the financial affairs of local government institutions to which this Act applies by establishing norms and standards for:

- Ensuring transparency, accountability and appropriate lines of responsibility in the fiscal and financial affairs of municipalities and municipal entities;
- The management of revenues, expenditures, assets and liabilities and the handling of financial dealings, budgetary and financial planning processes;
- The coordination of those processes with those of the other spheres of government,
- Borrowing;
- Supply chain management; and
- · Other financial matters.

## White Paper on Local Government (1998)

The White Paper on Local Government (1998) views that Integrated Development Planning as a way of achieving developmental local government. It provides that the Integrated Development Planning intends to:

- Align scarce resources around agreed policy objectives;
- Ensure integration between sectors with local government;
- Enable alignment between provincial and local government and
- Ensure transparent interaction between municipalities and residents, making local government accountable.

The paper establishes a basis for developmental local government, where, "local government is committed to working with citizens and groups within the community to find sustainable ways to meet their social, economic and material needs and improve the quality of their lives". It also encourages public consultation on policy formulation and in the monitoring and evaluation of decisions and implementation.

## **Performance Management Systems**

A municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance, planning, measurement, review, reporting and improvement will be conducted, organized and managed, including determining the roles of the different role – players. It is critical that political leadership, managers and staff be involved to ensure that the municipality embraces the IDP and its implementation (which is performance management in practice). Implementing the processes and systems needed to operationalise the IDP will determine the ultimate success of the municipality. The following needs to be taken into consideration when starting to implement the IDP:

- Plan for performance by clarifying objectives, outcomes and outputs to be achieved;
- Clarify performance expectations by setting standards and targets for each indicator to assess and evaluate performance in practice:
- Monitor, measure, assess and evaluate performance, and
- Link strategic priorities, goals and objectives agreed in the IDP by:
- Enabling staff to understand how their job contributes to the aforementioned;
- Ensuring resources are directed and used in efficient, effective and economic ways by each person in the municipality;
- Including communities and other stakeholders; decision making, monitoring and evaluation:
- Learning from experience and using it to continuously to improve what is achieved, and maintaining transparency and accountability and promoting good governance as articulated in the Batho Pele principles.

# 1.2 Establishment in Terms of Legislation

The City of Ekurhuleni is a Category a Municipality established in terms of the provisions of the Local Government Municipal Structures Act 117 of 1998 which provides for the establishment of municipalities in accordance with the requirements relating to the categories and types of municipalities, the division of functions and powers between municipalities and the appropriate electoral systems.

# 1.3 Powers and Functions

The Constitution contains two main sections for dealing with the powers and functions of municipalities, namely section 156 and 229. Section 156 reflects the powers and functions of municipalities whilst section 229 contains Municipal fiscal powers and functions. It must be borne in mind that the Constitution sits at the top of the legislative hierarchy; consequently, no national or provincial legislation may contain provisions which conflict with those contained within the Constitution.

Section 156 (a) of the Constitution of the Republic of South Africa states that a municipality has executive authority in respect of, and has the right to administer the local government matters listed in Part B of Schedule 4 and Part B of Schedule 5. Therefore, the powers and functions of the City of Ekurhuleni in so far as the Constitution is concerned are listed hereunder as follows:

#### Local Government matters listed under Schedule 4 Part B

Local Government Matters	Functions cur CoE.	rently with	Responsible authority if function is not run by CoE
	Yes	No	
Air pollution	$\sqrt{}$		n/a
Building regulations	<b>V</b>		n/a
Child care facilities	$\sqrt{}$		n/a

Municipal roads	$\sqrt{}$	n/a
Noise pollution	√	n/a
Pounds	<b>V</b>	n/a
Public places	$\sqrt{}$	n/a
Refuse removal, refuse dumps and solid waste disposal	V	n/a
Street trading	√ √	n/a
Street lighting	V	n/a

# 1.4 Strategic focus for 2016-2021

The current Council assumed office in August 2016 after the local government election and opted to develop a new IDP for the new term of office. The resolution was that in so doing, recognition and consideration should be given to the work that has been done during the previous (2011 - 2016) term as the foundation upon which to build moving forward. The agenda for the 2016/17 – 2020/21 term of Council will be a 'Pro Poor' one wherein the focus will be on:

- Short and medium term priorities meant to support improved and impactful service delivery;
   and
- Accelerating and broadening access to quality municipal services to the poor while maintaining quality service levels in affluent areas.

This 5 year IDP will continue to facilitate the implementation of the City's long term planning framework – the **Growth and Development Strategy (GDS 2055)** which was approved by the previous Council. The objectives of GDS 2055 are about establishing a high performing metropolitan government that is proactive in character and posture, to enhance the commitment towards building a social inclusive, locally integrated and competitive global player as reflected in the model of Gauteng City Region.

The GDS sets out three-stages of transition to 2055 and identifies a range of imperatives that serve as a guide towards each transitional period. The transition to a 'Delivering City' is targeted for the period 2016 – 2021 which coincide with the 5-year term for the current Council (refer to chapter 3 for further detail on GDS 2055).

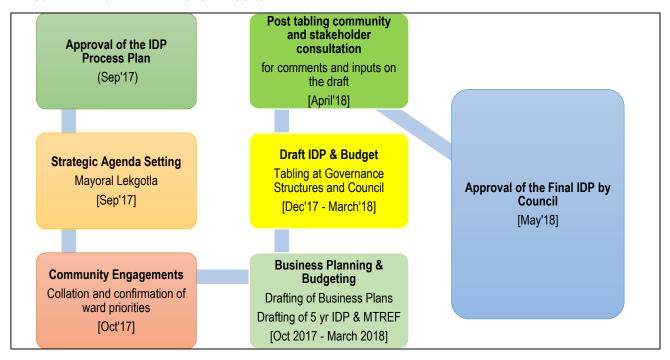

The reviewed IDP will continue to serve to highlight the City's contribution towards international, continental and regional commitments towards sustainable livelihoods, economic development and social cohesion amongst others as espoused by Sustainable Development Goals and the African Agenda 2063 etc. It will also re-enforce the City's commitment towards national and provincial planning frameworks and directives such as the National Development Plan 2030 as well as the Provincial ten-pillar programme of radical Transformation, Modernization and

Reindustrialization which has been identified as a strategic roadmap to move the Gauteng City Region forward over the next five to ten years.

## 1.5 Process followed for the review of the 2016-2021 IDP

The diagram below depicts a high-level process followed towards the development of this IDP and budget.

FIGURE 1: ANNUAL IDP AND BUDGET PROCESS

Community and stakeholder engagement plays a central role in the development and implementation of the 5-year plan; this therefore means that the 5 year IDP together with its subsequent annual revisions must and will ensure that the needs and aspiration of communities particularly at ward level are considered and followed through. The following are some of the structures consulted and processes undertaken; the inputs of which have informed this IDP. These are in line with the IDP and Budget Process Plan as approved by Council during September 2016.

# 1.5.1 Mayoral Lekgotla: Strategic Agenda Setting

The first Mayoral Lekgotla was held in September 2016 with a Theme: Charting a Socially Transformative Path to the Delivery City. The objective of the Lekgotla was for setting the agenda and pronouncing on the development priorities for the term of Council (2016/17 – 2021). The Lekgotla resolved that the focus areas and priorities as agreed upon must guide and inform the 5 year IDP, the MTREF and the subsequent annual plans (SDBIP's).

The Lekgotla set the agenda for the 2016/17 – 2020/21 term of Council as a '*Pro Poor*' agenda wherein focus will be on:

- Short and medium term priorities meant to support improved and impactful service delivery;
   and
- Accelerating and broadening access to quality municipal services to the poor while maintaining quality service levels in affluent areas

The following have since been pronounced as specific areas of intervention to be pursued during the term:

- Improve service delivery through visible and impactful programmes supported by Capex spending;
- Electrification of all informal settlements;
- Construction of 100 000 housing units;
- Provision of 59 000 serviced stands;
- Making informal settlements more habitable through up-scaling of services;
- Promote preservation of water usage and continue investing in water infrastructure to ensure security of supply;
- Making land available for development;
- Improved Organizational culture, relations between the staff and employer;
- Strongly pursue the issue of an Ekurhuleni University;
- Establish a commission to fight Fraud and Corruption;
- Ekurhuleni Power Station to broaden accessibility and ensure security of supply;
- Building capacity to minimise outsourcing of key Municipal Services;
- Increase the number of local clinics piloting the 24-hour health care programme;
- Accelerate Wi-Fi rollout;
- Create a signature mega arts and culture festival for the City; and
- Implementation of the 10-point economic revival plan which include the following:
  - A clear roadmap for the effective implementation of the Aerotropolis Master Plan;
  - Revitalisation of the manufacturing sector;
  - Enabling Public Transport System;
  - Acceleration of IDZ / SEZ programme;
  - Land availability for strategic development:
  - Implementation of Township Economy Strategy;
  - Empowerment and support of SMMEs through public procurement;
  - Massive infrastructure investment;

- Promote support of local products (Buy Local); and
- Skills and capacity development.

# 1.5.2 Community engagement

Council adopted an approach that each ward was to identify its 5 key/top priorities for inclusion in the IDP for the term. The first round of engagements with communities was conducted in October 2016; where ward level meetings were held and Ward Councilors requested to submit confirmed ward priorities for their respective wards. Ward Councillors were requested to coordinate and facilitate their respective ward meeting; for the purpose of collating and confirming such 5 key/top ward priorities. Consolidated needs were then forwarded to departments for consideration during budgeting process. Further details on community engagements and extent to which the identified needs are being responded to is contained in chapter 6 of this document.

# 1.5.3 Inter-governmental engagement

The provincial technical IDP steering committee was convened during November 2017 and again during February 2018 by Gauteng COGTA and was attended by municipalities and GPG Sector Departments. This engagement was meant to provide a platform for meaningful engagement on issues emanating from IDP public participation sessions as collected by municipalities; and for the sector departments to subsequently incorporate gathered community needs into their 2018/19 Annual Performance Plans.

The aforesaid platform is very important as it promotes bottom-up planning and gives GDP Sector Departments an opportunity to access, understand and budget for community felt needs. Details of the projects and programmes to be rolled-out by sector departments within the municipal area are listed as an Annexure to this document.

# **CHAPTER 2: SITUATIONAL ANALYSIS**

## 2.1 Introduction

Section 26 of the Municipal Systems Act, 2000 requires that the Integrated Development Plan (IDP) of the municipality reflects its long-term vision, placing special emphasis on development and transformation needs. As per the same act, the IDP should provide an assessment of the existing levels of development as well as the needs of communities. It is on the basis of these legislative prescripts that this chapter outlines the prevailing situation within the service delivery environment in the City; and expand on the City's efforts in progressively realizing its constitutional mandate as set out in Section 152 (1) (2).

# 2.2 Historical Background

The City of Ekurhuleni emerged over seventeen years ago as a key Metropolitan Municipality in Gauteng comprising of approximately two million inhabitants living in an agglomeration of nine small towns and seventeen townships. The amalgamation of two existing regional entities, namely Kyalami Metropolitan and the Eastern Gauteng Services Council served as the beginning of the a now large City that accommodates in recent years a population of about three and half million inhabitants. At the heart of the City's plans and service delivery operations are the communities of, Tembisa, Katlehong, Vosloorus, Duduza, Daveyton and Thokoza that collectively house over sixty-eight percent of the City's total population.

Ekurhuleni's journey to establishing an effective and efficient local government started with the mammoth task of having to merge the different administrative systems responsible for governance and service delivery in the nine towns and seventeen townships. The City differs vastly from other large cities in the country like Johannesburg, Cape Town, Pretoria and Durban that re-invented themselves around relatively mature colonial city centers. Much like the heterogeneous confluence of locals that make up its citizenry, the City of Ekurhuleni had to chart a new path in rationalizing its administration, and consolidating its spatial footprint into a single identity. The absence of an urban core, juxtaposed with high population densities over vast stretches of land supporting largely, mining, agriculture, logistics and industrial economic activities, would in time expose the City to being the perfect arena for a new approach to spatial and economic trasnformation. The City was confronteted with having to create a single uniform identity, create and optimize linkages between towns, townships and economic centers. This included the promotion of access to services and facilities and the protection and maintenance of open spaces and lakes with the vision of the Gauteng City region in mind.

The city's unique spatial configuration further provided a platform from which key development corridors and nodes would begin to emerge. The City had extensive work to do in identifying

strategic land parcels that were to be developed into mixed use developments ranging from small animal farming, agriculture and agro processing as well as residential, light service industries and larger commercial activity nodes. These land parcels once fully developed and functioning were envisaged to become catalytic developments for socio-spatial integration for communities and city regions.

By the end of the 2011-2016 term, R20 billion rand had been channeled into projects in three major corridors in the City. The Thami Mnyele Corridor is envisaged to strategically link Tembisa and Vosloorus through the provision of roads and transport infrastructure. The Thelle Mogoerane Corridor, which includes the Thelle Mogoerane Hospital Precinct stretches between Vosloorus and Nigel and includes among other developments, the Carnival Junction and the OR Tambo inland Port. This corridor will be central in expanding logistic capacity in the City. Also approved and costed to the tune of R30 billion is the Aerotropolis Master Plan and accompanying projects, which would be at the heart of the Eastern Development Corridor.

# 2.3 Demographic Analysis

The City's population has grown exponentially since its establishment in the year 2000. The population has nearly doubled in the last seventeen years from an estimated 2 368 283 in the year 2000 to 3 453 603 in 2017. Mid-year total population estimates for 2017 came in at 56.e million people living in South Africa. The City's population growth rate is steady at 2.47% per annum, coming down from a high of 4% per annum in the period between 1996 and 2001. The current population represents over 6% of the total population of South Africa (StatsSA: 2017). An important feature of growth in the Ekurhuleni population is the net migration into the City. Ekurhuleni, together with Tshwane and Johannesburg are the largest recipients of in-migration in the country. Of the people living in Ekurhuleni, a significant majority are between the ages of 25-39, however the 0-4 age group which stands at 142 851 is the third highest population group in the city and forms 4.14% of the total population. This number is even higher than the 35-39 age group (IHS: 2017).

Much like the rest of South Africa. Ekurhuleni has a significantly young population, with babies and toddlers emerging as a key demographic. The City has remained abreast of these changes and trends in population growth. It has since the 2011-2016 term placed Early Childhood Development as a key intervention in its socio-economic development efforts.

The building, equipping and support of Early Childhood Development Centers remains as a key intervention area for the Municipality. In 2016, 176 ECD practitioners were trained in an accredited ECD training programme. As part of the cognitive development programme targeting ECD learners, the City implemented 16 ECD Centers support programmes. Through its accredited ECD programmes, the City reached out to a total of 10437 children aged 3-6 years.

FIGURE 2 KEY POPULATION STATISTICS

Population Attribute	2011 Census Statistic <sup>1</sup>	2016 Community Survey Statistic <sup>2</sup>
Total population	3,178,470	3379104
Young (0-14)	24,3%	34.7%
Working Age (15-64)	71,7%	56.2%
Elderly (65+)	4%	9.1%
Dependency ratio	39,4	
Sex ratio	105	
Growth rate	2,47% (2001-2011)	
Population density	1609 persons/km2	
Number of households	1,015,465	
Household size	2.9%	
Female headed household	31.3%	

In the figure below, the 2011 population pyramid of Ekurhuleni is embedded on the outline of that of South Africa which shows that the population composition of Ekurhuleni is typical of that of the rest of South Africa. Firstly, it can be seen that the City is undergoing a demographic transition at the base of the pyramid driven largely by declining fertility – observable for the whole of SA in general, and secondly by the effect of in-migration of typically the 25 - 64 year olds – in search of economic opportunities. Analysis of the 1996, 2001 and 2011 census data indicates that the transition of the pyramids is not yet stable, but it is largely occurring at the bottom of the pyramids.

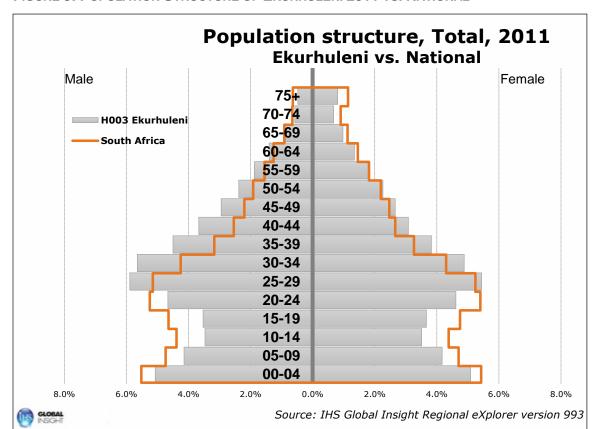

FIGURE 3: POPULATION STRUCTURE OF EKURHULENI 2011 VS. NATIONAL

Comparing the 2005 with the 2015 population pyramid for the City of Ekurhuleni, interesting differences are visible:

- In 2005, there were a larger share (albeit marginal) of young working age people aged 20 to 34 (30.7%) compared to 2015 (29.6%).
- Fertility in 2005 was slightly lower compared to that of 2015.
- The share of children between the ages of 0 to 14 years is slightly smaller in 2005 (25.4%) compared to 2015 (26.0%).
- Life expectancy appears to be increasing. This is broadly in line with national trends as revealed in the latest mortality rates and causes of death report, 2015 (released in February 2017). In terms of this report South Africa is experiencing fewer deaths in an increasing population and that life expectancy is also increasing in the country.

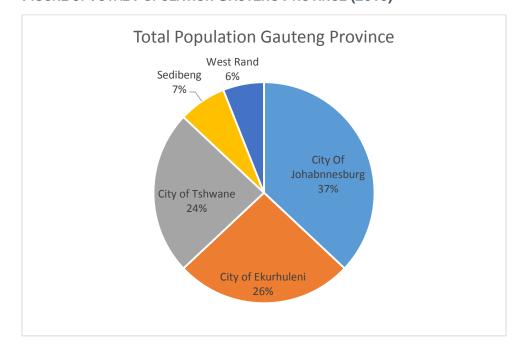

In 2015, the female population for the 20 to 34 years' age group amounted to 14.6% of the total female population while the male population group for the same age amounted to 16.0% of the total male population. In 2005 the male working age population at 15.4% still exceeds that of the female population working age population at 14.2%.

FIGURE 4: TOTAL POPULATION: EKURHULENI VS PROVINCIAL VS NATIONAL

	Ekurhuleni	Gauteng	National Total	Ekurhuleni as % of province	Ekurhuleni as % of national

2014	3,310,000	12,900,000	54,100,000	25.7%	6.1%
2015	3,380,000	13,200,000	54,900,000	25.7%	6.2%
Average Annual gr	owth				
2005-2015	2.39%	2.67%	1.51%		

With 3.38 million people, Ekurhuleni housed 6.2% of South Africa's total population in 2015. Between 2005 and 2015 the population growth averaged 2.39% per annum which is close to double than the growth rate of South Africa as a whole (1.51%). Compared to Gauteng's average annual growth rate (2.67%), the growth rate in Ekurhuleni's population at 2.39% was very similar to that of the province.

FIGURE 5: TOTAL POPULATION GAUTENG PROVINCE (2015)

When compared to other regions in Gauteng, Ekurhuleni accounts for a total population of 3.38 million, or 25.7% of the total population.

FIGURE 6: TOTAL POPULATION (EKURHULENI REGIONS)

2005	2010	2015	Average Annual growth
859,000	942,000	1,030,000	1.79%
812,000	944,000	1,100,000	3.11%
995,000	1,110,000	1,250,000	2.29%
2,666,206	2,992,665	3,376,818	2.39%
	859,000 812,000 995,000	859,000 942,000 812,000 944,000 995,000 1,110,000 2,666,206 2,992,665	859,000 942,000 1,030,000 812,000 944,000 1,100,000 995,000 1,110,000 1,250,000

Northern sub-metro region increased the most, in terms of population, with an average annual growth rate of 3.1%, the South sub-metro region had the second highest growth in terms of its population, with an average annual growth rate of 2.3%. The Eastern sub-metro region had the lowest average annual growth rate of 1.79% relative to the others within Ekurhuleni.

Based on the present age-gender structure and the present fertility, mortality and migration rates, Ekurhuleni's population is projected to grow at an average annual rate of 1.8% from 3.38 million in 2015 to 3.7 million in 2020.

This will have an impact on the spatial plans of the municipality as well as the delivery of basic services to the Ekurhuleni community.

# 2.4 Economic Analysis

The 2016 State of the Cities Report buttresses the central role of the contribution of the South African cities in the national economy and showing the 5 largest cities Johannesburg, Cape Town, Tshwane, Ekurhuleni and eThekwini playing a dominant role<sup>3</sup> in the national economy. Ekurhuleni's contribution to the national economy has increased from 8.2% in 1995 to 8.8% in 2016, overtaking eThekwini as the fourth largest city in the process<sup>4</sup>.Between 1995 and 2013, four of the cities increased their share of South Africa's GVA: Johannesburg (11.7% to 13.9%), Cape Town (10.3% to 10.9%), Tshwane (8.9% to 9.2%) and Ekurhuleni (8.2% to 8.8%), but the shares of eThekwini and all the three smaller metros declined.

Community services and general government	20.1	18.3	20.2	20.9	

#### Source Global Insight 2016

The structure of the City of Ekurhuleni's economy is dominated by four sectors: manufacturing, finance and business services, community services and general government and to a lesser extent the trade and hospitality sector. Over the past 15 years, major structural shifts have occurred in the structure of the economy principally involving the decline of the dominance of the manufacturing sector which dropped from 30.3% in 2000 to 22.7% in 2015 and a comparable increase of the contribution of the finance and business services sector which increased its share from 14.8% in 2011 to 21.3% in 2015. The continuing decline of the manufacturing sector is a big challenge for the municipality and for that reason the revitalization of the manufacturing sector is a key strategic focus area for the municipality.

#### **Gross Value Added**

With a GDP of R 301 billion in 2015 (up from R 128 billion in 2005), Ekurhuleni contributed 21.43% to the Gauteng Province GDP of R 1.41 trillion in 2015 increasing in the share of the Gauteng from 22.18% in 2005. The City of Ekurhuleni contributes 7.51% to the GDP of South Africa which had a total GDP of R 4.01 trillion in 2015 (as measured in nominal or current prices). It's contribution to the national economy remain constant in importance from 2005 when it contributed 7.5% to South Africa, but it is lower than the peak of 7.8% in 2005. The declining percentage contribution of Ekurhuleni to the national GDP is consistent with the decline in manufacturing that was highlighted above.

FIGURE 8: GDP-R

	Ekurhuleni	Gauteng	National Total	Ekurhuleni as % of province	Ekurhuleni as % of national
2005	127.7	575.5	1,639.3	22.2%	7.8%
2006	142.3	641.5	1,839.4	22.2%	7.7%
2007	159.4	723.2	2,109.5	22.0%	7.6%
2008	179.4	818.0	2,369.1	21.9%	7.6%
2009	188.6	864.7	2,507.7	21.8%	7.5%
2010	208.4	955.9	2,748.0	21.8%	7.6%

2012	242.9	1,122.4	3,254.0	21.6%	7.5%
2013	262.3	1,221.0	3,549.2	21.5%	7.4%
2014	289.4	1,332.3	3,812.6	21.7%	7.6%
2015	301.3	1,405.8	4,013.6	21.4%	7.5%

In 2015, Ekurhuleni achieved an annual growth rate of 0.34% which is a significant lower GDP growth than the Gauteng Province's 1.54%, and is lower than that of South Africa, where the 2015 GDP growth rate was 1.18%. Contrary to the short-term growth rate of 2015, the longer-term average growth rate for Ekurhuleni (2.70%) is very similar than that of South Africa (2.58%). The economic growth in Ekurhuleni peaked in 2006 at 7.12%.

		Source: IHS Global Insight Reg	ional eXplorer version 993	

The City of Ekurhuleni had a total GDP of R 301 billion and in terms of total contribution towards the Gauteng Province, Ekurhuleni ranked third relative to all the regional economies to total Gauteng GDP. This ranking in terms of size compared to other regions of Ekurhuleni remained the same since 2005. In terms of its share, it was in 2015 (21.4%) slightly smaller compared to what it was in 2005 (22.2%). For the period 2005 to 2015, the average annual growth rate of 2.7% of Ekurhuleni was the fourth relative to its peers in terms of growth in constant 2010 prices.

In 2020, Ekurhuleni's GDP is forecasted at an estimate of R 251 billion (constant 2010 prices) or 21.2% of the total GDP of Gauteng. The ranking in terms of size of the City of Ekurhuleni will remain the same between 2015 and 2020, with a contribution to the Gauteng Province GDP of 21.2% in 2020 compared to the 21.3% in 2015. At a 1.74% average annual GDP growth rate between 2015 and 2020, Ekurhuleni ranked the third compared to the other regional economies.

While the economy of Ekurhuleni outpaced that of Gauteng in 2005, 2006 and 2007, its economy has lagged that of the latter since 2008 with the exception of 2010 and 2014 as depicted in the figure above. The clear trend from the analysis is the slowing growth rate for all the three economies (national, provincial and Ekurhuleni) depicted in the figure of the 11-year period from growth rates of over 5% in the first 3 years (2005, 2006, and 2007) to below 2% in 2015 with the Ekurhuleni economy taking the biggest strain. In addition, the catastrophic impact of the global financial crisis in 2008 can also be seen in the negative growth rates in 2009.

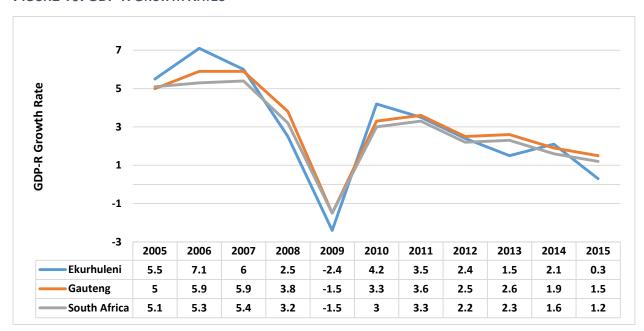

FIGURE 10: GDP-R GROWTH RATES

The above figure illustrates the GDP growth rates for Ekurhuleni, Gauteng and South Africa 2005-2015, 2010 Constant Prices

The lackluster performance of the economy of Ekurhuleni is symptomatic of a number of issues. For example, notwithstanding the locational benefits of OR Tambo International Airport, Ekurhuleni has struggled to attract Greenfield foreign direct investment (FDI) as compared to its peers, Johannesburg, Tshwane and Cape Town. While Johannesburg attracted US \$6,104 billion, Cape Town US \$3,046, and Tshwane US \$2,952 billion, Ekurhuleni only benefitted from US\$510 million between 2009 and 2015<sup>6</sup>.

#### Labour

# • Economically Active Population

The City of Ekurhuleni's EAP was 1.64 million in 2015, which is 48.47% of its total population of 3.38 million, and roughly 25.32% of the total EAP of the Gauteng Province. From 2005 to 2015, the average annual increase in the EAP in Ekurhuleni was 2.33%, which is 0.464 percentage points lower than the growth in the EAP of Gauteng's for the same period.

## • Total Employment

In 2015, Ekurhuleni employed 1.19 million people which is 23.92% of the total employment in Gauteng (4.96 million), 7.71% of total employment in South Africa (15.4 million). Employment within Ekurhuleni increased annually at an average rate of 2.54% from 2005 to 2015. The City of Ekurhuleni's average annual employment growth rate of 2.54% exceeds the average annual labour force growth rate of 2.33%.

FIGURE 12: TOTAL EMPLOYMENT - EKURHULENI, GAUTENG AND NATIONAL

2005-2015	2.54%	2.94%	2.05%	

In Ekurhuleni the economic sectors that recorded the largest number of employment in 2015 were the finance sector with a total of 261 000 employed people or 22.0% of total employment in the City. The trade sector with a total of 259 000 (21.8%) employs the second highest number of people relative to the rest of the sectors. The mining sector with 7 190 (0.6%) is the sector that employs the least number of people in Ekurhuleni, followed by the electricity sector with 8 160 (0.7%) people employed.

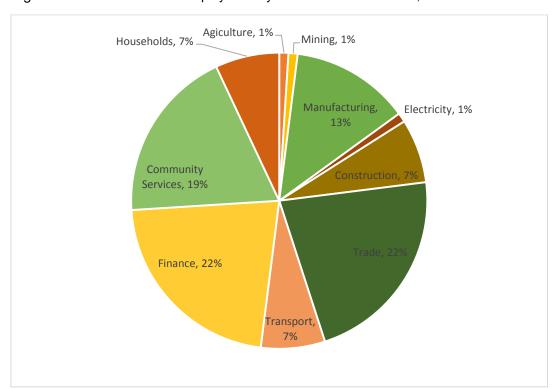

Figure 13: Ekurhuleni Total Employment by Broad Economic Sector, 2015

## Formal and Informal Employment

The number of formally employed people in the City of Ekurhuleni counted 1.03 million in 2015, which is about 86.71% of total employment, while the number of people employed in the informal sector counted 158 000 or 13.29% of the total employment. Informal employment in Ekurhuleni increased from 128 000 in 2005 to an estimated 158 000 in 2015.

## Unemployment

In 2015, the unemployment rate in Ekurhuleni (based on the official definition of unemployment) was 29.72%, which is an increase of 0.868 percentage points. The unemployment rate in Ekurhuleni is higher than that of Gauteng as can be seen in the figure below. The unemployment rate for South Africa was 25.28% in 2015, which is a decrease of 1.27 percentage points from 26.55% in 2005.

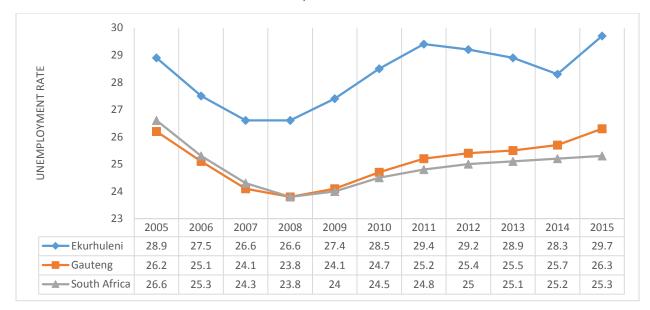

FIGURE 14: UNEMPLOYMENT RATE - EKURHULENI, GAUTENG AND NATIONAL

In terms of unemployment, Ekurhuleni as with both Gauteng and South Africa have witnessed a steady increase in the unemployment rate from 2009. From a low of 26.6% in 2006, unemployment rose to 29.7% in 2015 for Ekurhuleni. The number of people employed in the City of Ekurhuleni declined from 1 190 000 in the second quarter of 2015 to 1 161 000 in the second quarter of 2016.

For the period under review, unemployment in Ekurhuleni has consistently been higher than the provincial and national figures as demonstrated in the figure below.

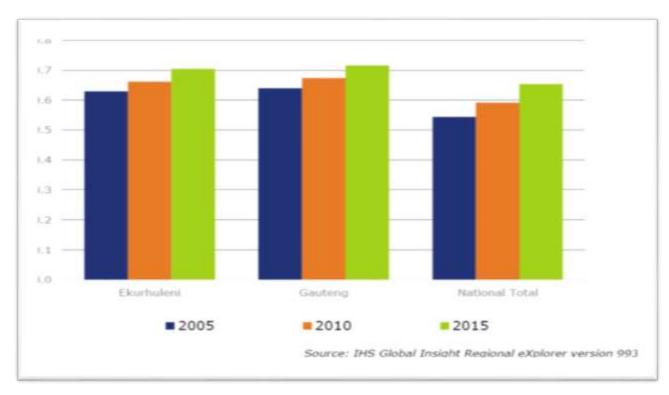

FIGURE 15: UNEMPLOYMENT RATE - EKURHULENI, GAUTENG AND SOUTH AFRICA

## **Socio-Economic Development**

## • Human Development Index

FIGURE 16: HDI – EKURHULENI, GAUTENG AND NATIONAL

The **Human Development Index** examines three **important** criteria of economic development (life expectancy, education and income levels) and uses this to create an overall score between 0 and 1. 1, where 1.1 indicates a high level of economic development and 0 a very low level. Therefore, HDI measures a Country or Region's overall achievement in its socio-economic dimensions. In 2015 the City of Ekurhuleni had an HDI of 0.704 compared to the Gauteng with a HDI of 0.716 and 0.653 of National Total as a whole.

Seeing that South Africa recorded a lower HDI in 2015 when compared to Ekurhuleni this translates to a lower human development performance for South Africa as compared to Ekurhuleni in 2015. South Africa's HDI increased at an average annual growth rate of 1.85% and this increase is higher than that of Ekurhuleni (1.13%). This means that Ekurhuleni's performance on the three dimensions (education, life expectancy, and income levels) is improving at a slower rate as compared to South Africa. A detailed analysis is necessary to understand in which specific socio-economic dimensions the City is not performing well and put in place interventions (within its competency) to improve the situation. At face value, taking into account an improved overall country's performance on life expectancy, it is likely that it is on the dimension of income levels and education that Ekurhuleni is not performing well.

## • Gini CoEfficient

The Gini index is a measurement of the income distribution of a country's residents. This number, which ranges between 0 and 1 and is based on residents' <u>net income</u>, helps define the gap between the rich and the poor, with 0 representing perfect equality and 1 representing perfect inequality. It is typically expressed as a percentage, referred to as the Gini CoEfficient.

In 2015, the Gini CoEfficient in the City of Ekurhuleni was at 0.633, which reflects a marginal decrease in the number over the ten-year period from 2005 to 2015. The Gauteng Province and South Africa had a Gini CoEfficient of 0.638 and 0.63 respectively. The percentage difference between Ekurhuleni, the province and the Country is marginal averaging 0.63 across the tiers of government. Inequality in South Africa is generally regarded as high meaning that the country has an unequal society. Municipalities are not responsible for majority of state instruments to turn around inequality, but certainly they have a role to play. Inequality is as a result of a myriad of factors and Ekurhuleni needs to closely examine what contribution (taking into account these many factors) it can make to improve to incrementally move in the direction of an equal society. There is general scholarly agreement that schooling plays a critical role in reducing inequality in the long run. Critical questions therefore have to be asked as to whether the municipality is doing enough at an early child development level and in providing support for learners at other levels of education.

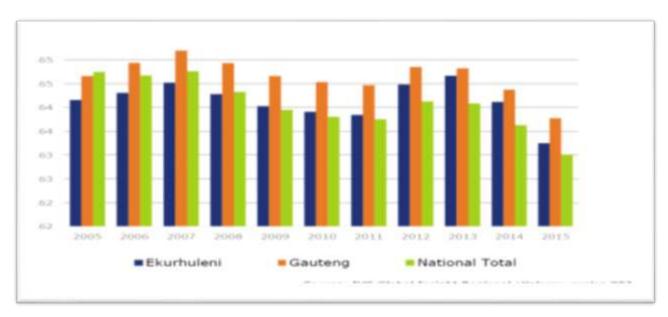

FIGURE 17: GINI COEFFICIENT - EKURHULENI, GAUTENG AND NATIONAL

## Poverty

In 2015, there were 1.21 million people living in poverty, using the upper poverty line definition, across Ekurhuleni - this is 6.27% higher than the 1.14 million in 2005. The percentage of people living in poverty has decreased from 42.83% in 2005 to 35.94% in 2015, which indicates a decrease of 6.89 percentage points.

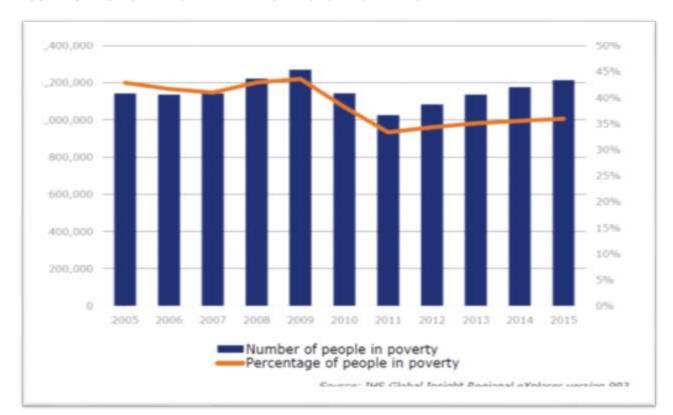

FIGURE 18: EKURHULENI: NUMBER AND PERCENTAGE OF PEOPLE IN POVERTY

#### Education

Within the City of Ekurhuleni, the number of people without any schooling decreased from 2005 to 2015 with an average annual rate of -4.83%, while the number of people within the 'matric only' category, increased from 538,000 to 818,000. The number of people with 'matric and a certificate/diploma' increased with an average annual rate of 4.82%, with the number of people with a 'matric and a Bachelor's' degree increasing with an average annual rate of 6.33%. Overall improvement in the level of education is visible with an increase in the number of people with 'matric' or higher education.

FIGURE 19: HIGHEST LEVEL OF EDUCATION

# 2.5 Economic Development

In June 2017 Moody's downgraded Ekurhuleni along with six other Metros including the City of Cape Town and the City of Johannesburg. Ekurhuleni has been downgraded from a Baa2 to a Baa3 status. Along with the downgrade of the City's credit rating, Moody's has downgraded the rating of the East Rand Water Care Company (ERWAT) to mirror the changed rating of the parent municipality. ERWAT has been changed from a Ba1 to Baa3 status. Moody's Baa3 is a lower tier of the medium grade. It is a part of the tiers characterized as investment status. The wholesale downgrade of 10 local government administrations and their associated public entities was accredited to what Moody's views as reduced growth prospects in the medium term, which Moody's viewed as a threat to their financial viability. The outlook envisaged by Moody's was one where financial pressures on national government would lead to increased budget cuts. The financial burden would be transferred to municipalities with existing moderate to high levels of debt thus adding rigidity to their budgets.

The ratings institution acknowledged that these Cities have rich economic bases, sound financial administration and good governance and that, the reduced rating is as a result of their forest of macro-economic factors surrounding the municipalities. Inversely to this finding and premature crediting rating review, the national economy continued to rally in the second and third quarter of 2017 with positive growth recorded in both quarters. While the South African economy shrunk by 0.7% in quarter 1 of 2017, the revised figures for quarter two of 2017 showed a rise of 2.8% in GDP. Figures for the third quarter of 2017 came in at a promising 2% rise in GDP. This translated into an increase of 92 000 jobs in the country. This growth has been credited largely to production surpluses in agriculture and a slight rise in production and manufacturing. The overall growth rate

for 2017 averaged at 0.8%. In January 2018, the World Bank in its Global Economic Forecast estimated South Africa's growth rate at a potential 1.1% of GDP.

While the economy continues to grow and transition toward automation and areas driving the fourth industrial revolution, traditional economic functions like manufacturing and agriculture still hold sway over the South African economy. The understanding of this fact is reflected in the City's priorities as outlined in the GDS 2055. While the city embraces new technologies and is working to employ these to grow township economies and to support production in the various corridors in the City. The role of agriculture and manufacturing has not been overlooked. The City continues to identify and support cooperatives in the agricultural space. Also supported is the development of agro-processing in the city.

According to figures released by Statistics South Africa at the beginning of 2017, South African factories sold R160 billion worth of goods in December 2016. This was no surprise given that the value of assets sold off in December 2015 came to R153 billion (Stats SA: 2017). While the economy has transitioned since 1996 towards services, logistics and other skills and capital-intensive activities; education and skills gaps have kept substantial numbers of working age adults out of work and from full and meaningful participation in the region's economic output. Ekurhuleni's economic activities continue to support airspace and defense industries, 56 of the country's 184 foundries are in Ekurhuleni. These contribute extensively to manufacturing output and activity in the City. The City's industrial footprint once extended as far as Witbank and Secunda before 1996. The City's plans for re-industrialisation are set to chart a new path of growth that will see the City break new ground in terms of production and innovation. Ekurhuleni is poised to become a responsive economy based on re-imagined airport, logistics, manufacturing and beneficiation. New manufacturing activities such as the production of building materials using recycled foundry sand are key to reinvigorating what was once the heart of manufacturing and mining activity in Gauteng.

#### ANNUAL PERCENTAGE CHANGE IN MANUFACTURING PRODUCTION

	2011	2012	2013	2014	2015	2016 January to July*	Average for the whole period 2011–2016 to date

<sup>\*</sup> preliminary

Source: Stats SA: 2016 "South African manufacturing production and the rand.

The Ekurhuleni GDS 2055 recognizes the role of manufacturing as a catalyst for growth and development. The City has positioned manufacturing as one of the five pillars in progressing the city from a fragmented City to a delivering City. The Industrial Policy Action Plan (IPAP) articulates the vision for minerals mining and beneficiation, agriculture and agro-processing, energy, attracting investments and growing the oceans economy. Ekurhuleni's current and planned activities are in alignment to this plan, which is an expression of one of the components of the Presidential nine-point plan. The City's alignment of its plans to national priorities will serve to channel resources to its projects. The Enterprise Project Management Systems put in place in the City's administration is at work to ensure that, Ekurhuleni receives its equitable share of project funding and support and that adequate human capital is available to implement the many projects aimed at economic development in the City.

The GDS's Re-Industrialise initiative is looking to strengthen industrial competitiveness in existing industries within the City by putting in infrastructure that will support industries. Ultimately, the plans entailed in the strategy are to enhance production development and allow for the creation of new value chains. The City is seeking to lead the re-undustrialisation agenda in Gauteng.

The City hosted the Manufacturing Indaba at Emperors Palace from 27 to 28 June 2017. The two-day conference and exhibition hosted in partnership with the Department of Trade & Industry, the Department of Science & Technology, the Department of Public Enterprises, the Manufacturing and the NCPC-SA. The aim to outline and pursue focus points for boosting key industry sectors within manufacturing, namely: automotive, construction, metals, forestry, paper and packaging, chemicals, aerospace and defense.

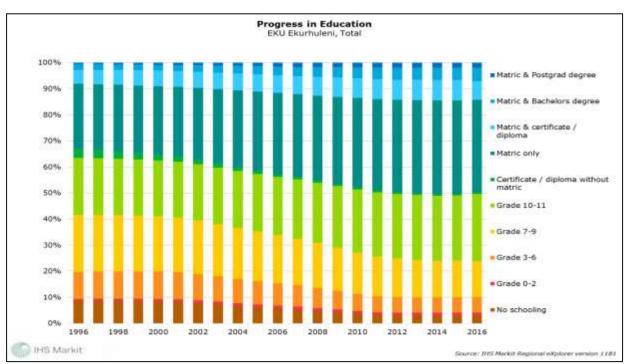

FIGURE 3. EDUCATION LEVELS IN EKURHULENI 1996-2016

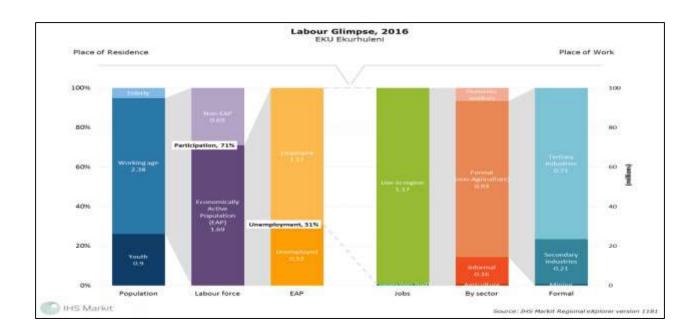

A little over a third of working age adults in the City have only a matric level education. Although this may not seem like much of an achievement given the skills and knowledge thresholds required for meaningful participation in the majority of Gauteng's economic activities. The near 36% of working age adults in possession of a matric qualification was very different from under 25% in 1996. The fees must fall movement which emerged in 2016 highlighted the plight of the poor in South Africa when it came to matters of access to tertiary education. The concerns outlined by this movement focused on the cost drivers of education within tertiary institutions as well as other related factors such as residence fees, the cost of books and cost of living for students from poor households. These factors can be used as a lens from which to view factors impeding the poor who are primarily and in majority black.

The Commission of inquiry appointed by the President released its recommendation in November 2017. The report is a comprehensive document of over seven hundred pages, which looks into the elements that make up tertiary education in contemporary South Africa. The document presented an in-depth interrogation of higher learning from issues of curriculum design, accreditation and institutional administration serve as a baseline from which the City will learn and extract findings to support its own efforts of establishing a university for the City. After having assessed these factors and exploring alternatives to contact learning, the report could not outline a feasible avenue for the introduction of fee-free education. In the absence of a tertiary institution in the area, the City through its internship and in-service training programmes serves as a learning Centre where students gain much needed work experience.

The year 2018 presents new opportunities for the youth of Ekurhuleni. The Ekurhuleni North education district ranked fourth in the top ten performing districts in the country with 89% matric passes. The President in contradiction to the feasibility assessment provided in the above-mentioned report announced the provision of free education for the poor. This announcement has the potential to influence the trajectory of the lives of thousands of leaner's enrolled in no-fee schools in Ekurhuleni. In 2014, there were 186 no fee schools in the City, of which 55 are secondary schools. Ekurhuleni North's no fee high schools had 21 733 learners in 2014, meaning 89% of the matric portion of this number now have the doors of higher education opened to them. This number will be free to pursue vocational training in TVET colleges or engage in any academic pursuit through at any public university. Education levels in the City had been on the rise regardless of challenges surrounding access to higher education. This announcement could serve as a precursor for unprecedented levels of higher education access for youth in the City and with time could transform the skills profile and productivity of the City and presents greater opportunities for social and economic upward mobility in the City.

According to figures released by the GCRO in June 2017, 22 % of the City's population are in possession of both a matric certificate and tertiary education. As the country becomes increasingly aware of the value of education and Gauteng schools experiencing unprecedented highs in matric pass rates, matriculation figures in the City have edged up higher to 37% of the population having matric?. Of the 2.38 million working age adults in the City, 1.69million are economically active. High on the mayoral list of priorities is the establishment of a Centre for applied sciences.

The envisioned institution currently referred to as Ekurhuleni Applied Sciences and Technology University (EAST-U) will have the core focus of developing the cognitive and technical expertise needed by the City's population, so that they will be able to play a role in realizing the mega projects of the City which are in various phases of inception and implementation.

Average household income in Ekurhuleni is R8 646 per month. Households in the City are estimated to be 2.9 people per household on average. Economic participation in Ekurhuleni stood at 71% in 2016 with the bulk of persons employed working formal nonagricultural, secondary and tertiary industries. A little over 10% are employed as domestic workers while over 15% work in the informal economy. Those currently working in agriculture, mining and manufacturing form about 1% respectively. The promising employment numbers in the informal economy may serve as a gage for measuring the impact/success that the City is having with the establishment of township economies. Manufacturing and agriculture are among the most productive sectors in the City's economy, though they do not employ as many people as the other sectors. Although agriculture and manufacturing have to remain on the cutting edge of their respective technologies in order to be relevant and competitive, avenues for more labour intensive work within these sectors are worth investigating.

The Gauteng City Region for the economic revitalization of township economies has been initially funded at R160 million at provincial level. Further funding has been provided by the city to support SMMEs, cooperatives and entrepreneurs who have been identified as relevant partners for the creation of the Gauteng Industrial Development Zone and its' accompanying corridors and hubs. Among these is the Vosloorus Industrial Park Phase 2, which is part of the Eastern Corridor. The Innovation hub is in the process of establishing three additional eKasiLabs that are set up to develop and support entrepreneurs, one of these will be in Katlehong (GPG 2017: Moruo Issue 19).

Poverty numbers had been on the decline in Ekurhuleni in the years 2004-2006, the trend in declining poverty overturned with the international economic downturn of 2008. Poverty indicators have shown marked poverty increases from just over 50% in 2008 to over 60% in 2016.

The downturn in economic performance in the country, the region and within Ekurhuleni has prompted the City to intensify its pro-poor economic development efforts. The City's programmes are aligned to the five pillars guiding economic development activities in the city i.e. spatial reconfiguration and urban regeneration, critical infrastructure development, industrialization and investment, skills development through job creation and the stimulation of township economies through the entrepreneurship support.

The holistic approach adopted by the City in its poverty alleviation efforts is informed by the understanding that poverty is resultant from exposure from a myriad of factors. Poverty levels can be exacerbated by small elements of daily life that when not adequately managed can create challenges that exclude individuals from competing for self-development and ultimately jobs and/or entrepreneurial activities. Poverty can exist in its blatantly manifest form of food poverty. It can also creep in, in the form of exorbitant costs of transportation, communication and access to services, thus the numbers reflected in the graph below.

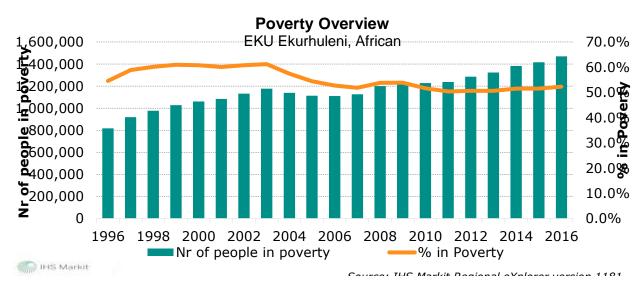

FIGURE 5. POVERTY OVERVIEW OF EKURHULENI

Thus project support for projects linked to these broad strategic goals are financed are made possible by strategic partnerships with development financiers, private business and public corporations while keeping in mind that the growth and development of the City should shy away from having the undesired result of gentrification which will further marginalize the already disadvantaged.

### 2.6 Municipal Services

The City of Ekurhuleni, like other major cities in the city region, is at the epicentre of migration phenomenon facing South Africa which presents a set of challenges and opportunities for the development of both cities. The in-migration, notwithstanding, the City is confronted with historical backlog of housing and municipal services. The intersection of rapid population growth spurred by in-migration, the historical backlogs and lackluster housing delivery has resulted in a phenomenon low intensity land invasions and the growth of informal settlements. In responding to these challenges, the City must of necessity deliver spatially integrated human settlements that respond to the need to redress apartheid geography, but also attend to immediate basic needs of people (whilst at the same time improving the liveability) in informal settlements.

The housing challenge of Ekurhuleni manifests perhaps most clearly in terms of the proportion of households living in informal settlements, with over 21% of the households in the City living in the 119 informal settlements spread across the City. The figure below shows that the percentage of households living in formal settlements has declined from 29.1 in 1996 to 21.3% in 2015. Informal settlements also pose other service delivery challenges in particularly those linked to infrastructure such as water supply, sanitation, electricity, roads and storm water reticulation.

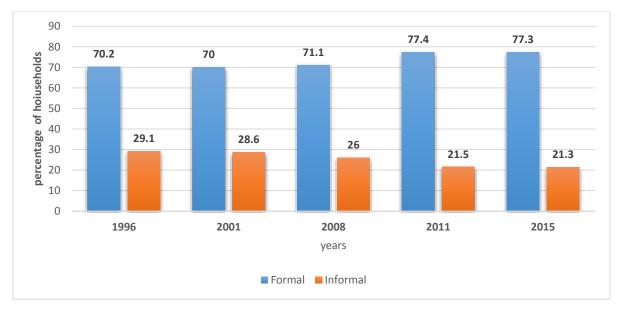

FIGURE 20: HOUSEHOLDS BY DWELLING TYPE: FORMAL AND INFORMAL

The figure below profiles the access statistics of some basic municipal services in Ekurhuleni between 1996 and 2015. It is clear from this table that remarkable strides have been made in the provision across all major municipal services (electricity, water and refuse removal).

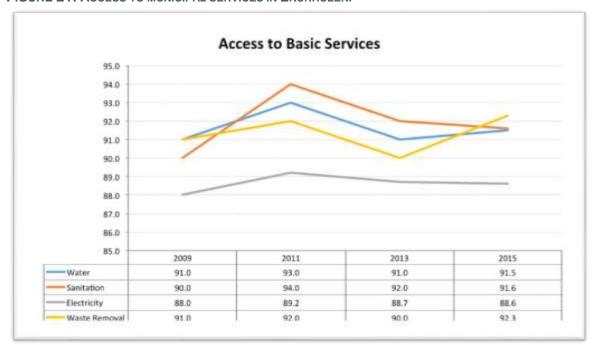

FIGURE 21: Access to municipal services in Ekurhuleni

Source: GCRO Quality of life Survey's 2009, 2011, 2013, 2015

The Metro has achieved the following service delivery milestones in the 2016/2017 financial year;

- Paving of 61.618 kilometers of road;
- The addition of 79 storm water systems to the existing storm water network;
- The upgrading of sports, recreation, arts and culture facilities such as swimming pools, tennis courts and libraries;
- 1.35% reduction of mother-to-child HIV transmission;
- The introduction 21 Chronic Medication Pick Up Points in our communities;
- Completion of six clinics;
- The construction of three Early Childhood Development (ECD) to the tune of R19.9 million;
- The upgrade of existing ECD facilities to the tune of R155.5 million;
- Provision of bursaries through a bursary fund which has been grown from R10 million to R100 million;
- The conversion of 729 Peace Corps into Traffic Wardens;
- R12,1 million spent on the towards the construction of four EMPD precincts.
- Delivery of a total of 100 713 240 liter sized bins to households;
- R65 million spent in the upgrade of dumping sites and about R39 million more on the purchase of specialised vehicles and equipment for waste disposal and recycling;
- Maintained the blue drop status of greater than 95%;
- Payment of 85,8% of our invoices in less than 30 days.

### 2.6.1 Water and Sanitation

A long term Integrated Funding Strategy enabled the provision of nine kiloliters of free basic water to registered indigents. The provision of water and sanitation within the City has progressed on a positive trajectory with the City earning an award at the Blue Drop Awards in 2015 for having the best drinking water in the Region. This was verified by the GCRO Quality of Life Survey, which ranked Ekurhuleni as the Metro affording its citizens with the highest quality of life. The City is still dealing with challenges of ageing sanitation infrastructure and an increasing backlog for infrastructure in new developments. The City recorded commendable progress in the provision of sewer connections to 2392 additional households in formal dwellings while all informal settlements were provided with free chemical toilets by June 2017.

A total of 10,899 free chemical toilets were provided and this contributed to the improvement of the ratio of chemical toilets to households from 1:10 to 1:5 in some of the informal settlements. The efforts to improve sanitation infrastructure resulted in the replacement, upgrading and extension of 15.518 kilometers of sewer pipes. Furthermore, the provision of free basic sewer of 3 kiloliters per household per month to indigent households continued. The City also provided free basic sewer of 6 kiloliters per household per month to all households in Ekurhuleni.

### **2.6.2 Energy**

The City has taken decisive action to demonstrate its commitment to clean, renewable energy in the last term as it established a solar farm at the OR Tambo precinct in Wattville. It installed generators to generate 1 megawatt of energy from methane gas at the Simmer and Jack Landfill site in Germiston. Solar panels were installed on the rooftops of the Boksburg and Kempton Park Civic Centre's while a total of 38 496 photovoltaic lighting units were installed in informal settlements. The City plans to collaborate with five MVA in the production of 300 Megawatts of renewable energy.

The City experienced a myriad of challenges in the provision of electricity services that affected negatively on the achievement of all targeted deliverables. Some of the results achieved, included; the electrification of a total of 6110 households, installation of 20 826 PV solar light units in the informal settlements, installed 1293 street lights and installed a total capacity of 2.55MW of alternative or renewable power. The City also installed 20826 portable solar lighting units in 21 informal settlements in the current financial year. These units provide access to energy while the affected households wait for the electrification project to be completed. These units can power four (4) globes and a cell phone charger.

The City made significant strides in keeping a downtime network availability at 0.58%. Reducing unaccounted for electricity proved difficult given the illegal connections and other infrastructure challenges. Despite these challenges, the City kept the unaccounted for electricity at 12.38%.

Other notable achievements included the completion of the upgrading of the power supply network in the area of Germiston as well as stabilizing the electricity infrastructure in various parts of Ekurhuleni including Langaville, Geluksdal, Rynfield, Clverdene and Crystal Park etc.

The electrification of informal settlements in Winnie Mandela and many more has begun and has contributed to the pro poor focus of the current term of Council. Furthermore, the City replaced approximately 40 kilometers of medium voltage underground cables in the Boksburg, Germiston and Kempton Park areas. The City continues to analyse performance of the electrical distribution network to identify potential weak spots and frequently failing distribution equipment. We continue to reliably provide of free basic electricity of 100kwh per month to indigent households.

### 2.6.3 Waste Management

### **Waste Generation**

Waste generation is driven by socio-economic factors such as the growing population and increasing demands for goods. Ekurhuleni is characterized by increasing consumerism, industrialisation and urbanisation, which correlate positively with waste generation. This growing trend exert a significant pressure on available resources to process waste material.

#### **Waste Volumes**

Population growth, commercialisation and urbanisation and migration of the population to urban nodes all place increasing pressure on the City to improve on waste management services. Solid waste generated in the Ekurhuleni in 2017 amounted to 1 285 319 tons per annum. In comparison, the 2016 figure was 1 274 225 tons per annum while 1 292 168 tons was recorded in 2015.

### **Waste Characterisation**

The understanding of what the general waste stream consists of is a key requirement for successful waste management planning. In this regard, the City conducted a waste stream analysis for the purposes of compiling the Integrated Waste Management Plan. The main observations from the characterisation study is that the largest portion of the waste collected by the City is garden waste with no statistically significant difference detected between the seasons. There is scope for waste diversion from landfill. Garden waste, which constituted more than 60% of the waste collected by the municipality, presents a window of opportunity for composting. There are also high proportions of recyclable waste present in the collected waste indicating that waste separation at source, could unlock these resources for recycling and save landfill airspace.

Waste removal services contribute significantly towards the management of domestic waste. The City offers a comprehensive waste management services that include curbside refuse collection, litter picking and removal of illegal dumps to prevent environmental pollution while ensuring that social conditions are maintained at an acceptable level and limit the spread of disease. The City employs various models in the provision of waste management services including outsourcing of certain areas to private contractors and community based cooperatives. Waste collection services undertaken by private contractors, particularly for the residential, industrial and commercial customers also play critical role in creating other socio-economic spin-offs.

It is estimated that the split in service points between municipal waste collection and private contractors is 45:55 respectively. The outsourced areas are modelled around the Development Contractor Approach. The City appointed six Development Contractors to create 54 entrepreneurial opportunities for community based contractors (34) and cooperatives (14). A total of 68 rear-end-loader (RELs) compactor trucks were procured for the 34 community based contractors, who will own the RELs after five years of the incubation programme. Similarly, 14 cooperatives were supplied with tipper trucks and TLBs to eradicate illegal dumping. There is still room for improvement as it continues to build on the City's waste management approach. The City recognises that service levels may differ between areas depending on the practicality and cost efficiency of delivering the service. Street sweeping is done mainly within Central Business Districts of the Metro.

### 2.6.4 Human Settlements

Although a total of 14 781 houses were delivered by the City between 2011-2016, demand for housing remains high. Increasing demand for housing as resulting from rapid growth in the City's population has resulted in the adoption of creative and diversified approaches to housing delivery. Ekurhuleni is working together with private and public housing delivery partners to accelerate delivery and encouraging inclusionary housing within private sector driven developments. The City with its partners have packaged the releasing of private sector development opportunities within IRDP and flagship projects on municipal land. This has required strengthened function in interdepartmental coordination as well as the capacitation and support of CoE social housing institutions to attract additional investment in the delivery of affordable rental.

The demand environment has also necessitated the city to take on stringent measures to enforce spatial governance while working towards creating solutions that will address both demand and spatial justice in the City. Land management has become a central component to planning as measures to control land invasions, mushrooming of new informal structures are put in place. Concerted efforts have been made to improving service delivery within informal settlements and promoting effective management of municipal owned rental properties.

The City recorded the total number of residential and non-residential developments completed in Ekurhuleni for the period 01 July 2016 to 30 June 2017 as amounting to 4482. Tembisa 2 had the highest number of building projects completed at 884 completed, followed by Benoni with 626, Boksburg with 500, Etwatwa with 480, Vosloorus with 398 and Nigel with 379. The total rand value contribution of both residential and non-residential developments completed between 01 July 2016 to 30 June 2017 amount to R7 369 592 723.82. Completed developments in Edenvale accounted for 30% to the total rand value, followed by Kempton Park with15% Tembisa 2 with 13%, Boksburg with 11%, Benoni with 9%, Springs with 8%, Alberton 5%, Germiston (3%), Nigel and Vosloorus (2%), Etwatwa, Duduza and Brakpan (1%).

### 2.6.5 Transport

Ekurhuleni is home to the largest airport in South Africa and houses the largest railway hub in the country. The PRASA Gibela Rail Manufacturing Plant also sets the City apart from its Gauteng counterparts. The plant will produce 600 trains and 3500 train carriages between the years 2015 up to 2025 and would be a key supplier of the rail networks in and around Gauteng.

The City's towns and townships lie along the east-west mining belt and are at the heart of the country's highest density of passenger, freight and rail networks. The City's township population makes has the highest demand for public transport. This need for transport emanates from a need for appropriate, safe and affordable transport modalities. These needs are exacerbated by various historical and socio-economic factors that result in the structural disadvantage and exclusion of these communities. The supply of public transport is relatively poor and dominated by road transportation that are at times may be unsafe. The City's rail passengers make up 39% of total estimated daily commuters, while bus passengers only make up 2% of that number. Minibus taxi passengers make up 59%; in addition, there is a large flow of passengers across municipal boundaries to and from City of Johannesburg and City of Tshwane.

The pre-existing municipal bus service did not serve the entire Ekurhuleni community. Following a comprehensive household travel survey completed in 2013, the City drafted a Comprehensive Integrated Transport Plan (CITP). In line with the CITP, the City has begun work on an Integrated Rapid Public Transport Network in a bid to reduce the strain of road public transport by addressing factors such as cost, suitability and safety. Phase 1 has been completed. The Visloorus, Boksburg route is currently in operation and the first Thembisa route became operational in October 2017.

### 2.7 Health Analysis

Estimates for life expectancy in the City is 61.2 years for males and at 66.7 years for females (StatsSA, 2017). Infant mortality rate is estimated at 32.8 per 1000 live births. The overall HIV prevalence for South Africa is estimated at 12.7%. Life expectancy in the City has increased in line with national numbers. According to the mortality rates and causes of death report, released in February 2017, South Africa is experiencing fewer deaths. This has had a positive impact on the population as life expectancy is on the rise. Mid-Year Population Estimates for 2016 estimated overall HIV prevalence at 12,7% which translates into approximately 7,03 million infections. Of the total population of adults aged 15–49 years, an estimated 18,9% of the population is HIV positive.

Access to primary healthcare is high. In 2016, 96% of delivery of babies was in a clinic compared to 83% in 1998. Of these 97% were with a skilled health provider compared to 84% in 1998. There are less tears on the faces of mothers as more of those born live to witness their first birthday. The provision of primary healthcare has increased children's chances of survival during child birth, however there are factors outside the direct influence of the primary healthcare system that continue to negatively impact the development of children. Stunting has been identified as an area of concern as children under the age of five fail to grow at the corresponding pace to their age. Amongst boys almost one in three is stunted and amongst girls one in four is stunted. On the other end of the age spectrum, lifestyle choices and lacking nutrition are affecting the health of adults as South Africans remain obese. 20% of the black population is obese while Coloured women are the highest affected demographic with 26% being obese. (StatsSA 2016: SADHS)

The District Health Barometer Report released by StatsSA in October 2016 revealed that Primary health care expenditure per capita was spread relatively equally across Gauteng districts. In Ekurhuleni 49.1% of Primary Health Care expenditure was from local government. Provincial expenditure on clinics and Community Health Centers was relatively low. The same trend was noted for City of Johannesburg, though to a lesser extent. Thus, the burden for primary healthcare is increasingly being transferred to municipalities. High expenditure per capita is a result of very high costs per visit, thus provincial funding falls short as escalation in Primary Health Care expenditure per headcount is recorded each year. The municipality's responsibilities in providing health care will need to be formerly reviewed and budgeted for in light of further challenges envisaged as a result of the deteriorating financial and administrative position of the Gauteng Provincial Department of Health.

Despite challenges in financing primary health, the City has made great strides in making healthcare an accessible imperative for many communities. The City is running 11, 24-hour clinics. These offer the same essential services provided in hospitals. This is a step in the right direction to reducing the cost of traveling in emergencies and the strain of relying on overloaded EMS services linked to the few hospitals in the City. In addition to that, 21 chronic medication pick-up points were within communities. This is viewed within the strategic context of bring medication to the doorstep of those who need it the most and reducing queues at the clinics as part of the City's commitment to effective health care provision. We have also opened the Khumalo, Tsietsi and Dukathole clinics, which served not less than 300 000 people and constructed a total of six health facilities by June 2017.

### **CHAPTER 3: STRATEGIC CONTEXT**

### 3.1 Introduction

This chapter highlights the strategic pillars that guide the development plans for the 2016/17 – 2020/21 term of office. Amongst these is an introduction of a shift in an approach to strategic planning; the City's commitment to align with national and provincial planning and policy directives as they relate to local government; and the institutionalisation and implementation of Ekurhuleni Growth and Development Strategy 2055 and its Thematic Areas (GDS Themes).

### 3.2 Outcome Based Planning

There was a need identified to evaluate and account for institutional, departmental and personal resource allocation, performance and delivery of results with regards to the strategies and programmes contained in the integrated planning framework. This led to the development (nationally) of a Performance Management Framework that seeks to integrate monitoring and evaluation of impacts, outcomes, outputs and inputs and create a framework for institutional learning, iterative refinement of implementation effectiveness and accountability for public finance and resources.

Ekurhuleni like other municipalities in the country adopted an Outcome-Based Approach to Performance Management as required by the Presidency (2010) to ensure that all of government/municipalities apply a similar approach to ensure focus on achieving service delivery outcomes.

The Outcomes Based Performance Management Framework adapts to the *logic model* of linking inputs, activities, outputs, outcomes and impacts (Presidency, 2010), as illustrated in the figure below.

New focus Previous focus Activities Outcomes Outputs Inputs *Impacts* What we use to What we do What is What we wish What we aim produced or do the work to achieve to achieve delivered The resources that The processes or The final products. The medium-term The contribute to the actions that use a results for specific developmental or goods and production and range of inputs to beneficiaries that results of services produced delivery of outputs produce the desired achieving specific are the for delivery consequences of outputs and outcomes intimately outcomes achieving specific

FIGURE 22: CHANGE IN STRATEGIC FOCUS FOR THE IDP

The following four components underpin the outcomes-based model (The Presidency, 2010):

- **Problem analysis**: Ensuring that we understand the problem clearly in order to address root causes. The problem should be understood from the perspective of the intended beneficiaries.
- **Theory of change**: The institution must understand clearly the assumptions behind choices about what the key levers of change are;
- Intervention logic: The institution must be clear about what results must be achieved in order to achieve the outcomes, and clear about what resources are necessary. Any flaw in this approach will result in incorrect planning and immeasurable results.
- **Clear indicators**, baselines and targets: There should be indicators for each level of the triangle showed in the figures above. This allows progress to be checked at each stage of delivery. Clear and correct baselines are required.

These components are discussed in detail below:

During the term 2011 – 2016 the City has been largely focused on outputs, inputs and activities in performance planning, monitoring and evaluation. The emphasis for this term is to bring about a shift in the strategic planning processes of the City whereby emphasis will be on the **outcomes** and **desired impact** as opposed to **outputs and activities**. The desired impact, as identified in this document, needs to be supported by understanding the context and developing implementation strategies, proposed programmes and actions upfront.

This new approach/focus requires the establishment of a shared theory of change which clearly outlines logical steps within the operational planning cycle as indicated below:

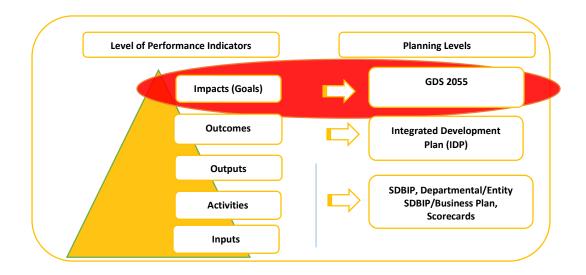

- The desired long-term **impacts** the City hopes to achieve **(Step 1)**
- Appropriate outcomes aligned to the identified impacts i.e. those outcomes that will support
  achievement of the impacts (Step 2)
- Outputs identified as necessary to deliver on the desired outcomes (Step 3)
- Those activities that will lead to the defined outputs (Step 4)
- The various **inputs** required, for delivery on the defined activities (Step 5)

Steps 1 and 2 generally relate to strategic planning (as reflected within the GDS and the IDP through which this is operationalized), while **steps 3**, 4 and 5 tend to align more with the City's 'business planning' and annual planning processes (SDBIP). This is elaborated further underneath.

### Step 1: Identify the envisaged long-term impact ['what we aim to change']

Step 1 – identification of the envisaged long-term impacts – falls within the domain of **organisational delivery**. This is the starting point of all organisational planning, including – ultimately – the planning for M&E activities. As illustrated alongside, 'impacts' link strongly with planning at the level of the GDS 2055 – with its achievement only likely in the **long term**.

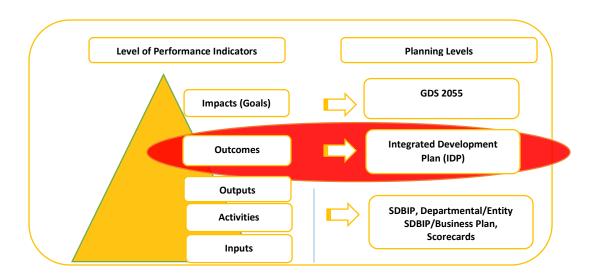

FIGURE 23: IDENTIFY THE ENVISAGED LONG-TERM IMPACT

Step 2: Identify outcomes for desired impacts ['what we wish to achieve']

Step 2 of the planning process relates to the identification of those outcomes that will contribute to the achievement of the goals or desired impacts identified in Step 1.

FIGURE 24: IDENTIFY OUTCOMES FOR DESIRED IMPACTS

While goals or 'impacts' tend to be long-term in nature, 'outcomes' are often focused on the long to medium-term period, aligning with the planning period associated with the City's five-year IDP (revised annually). The choice of indicators in the 5 year IDP scorecard must be community or beneficiary focused and emphasis must also be placed on outcome indicators that brings the City closer to the impact is seeking to achieve in line with the GDS.

### Step 3: Identify outputs linked to outcomes ['what we produce or deliver']

This step involves the identification of those outputs (final product or goods and services produced for delivery) that will contribute to the achievement of the defined outcomes.

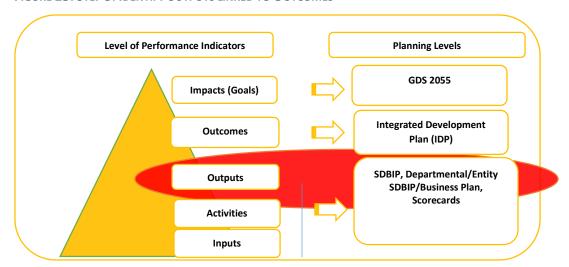

FIGURE 25: STEP 3: IDENTIFY OUTPUTS LINKED TO OUTCOMES

As reflected in the above figure, outputs tend to be framed within the context of short to medium-term delivery – reflected in planning mechanisms such as the one-year SDBIP, departmental SDBIPs/business plans, or within individual scorecards. The corporate wide SDBIP attempts to focus the municipality on the most important results it seeks to achieve in line with the objects of a municipality (to promote democratic and accountable government, sustainable provision of basic services to communities, promote social and economic development, promote safe and safe and healthy environment; and encourage involvement of communities in the matters of local government). Whilst there are certain departmental activities that are important, the corporate SDBIP, emphasis must be on high order **outputs** that brings the municipality closer to the outcomes and impact it seeks to achieve in line with the IDP and the GDS 2055. Processes, input and activity indicators are therefore not recommended for the corporate SDBIP scorecard but rather departmental and Entities' business plans.

## Step 4: Identify activities linked to outputs ['what we do'] and Step 5: Identify inputs required ['what we use to do the work']

Activities are "a collection of functions (actions, jobs, tasks) that consume inputs and deliver benefits and impacts"

Scorecards

FIGURE 26: STEPS 4 AND 5: IDENTIFY ACTIVITIES LINKED TO OUTPUTS AND INPUTS REQUIRED

While some individual scorecards and annual business plans may focus on outputs (and potentially outcomes), many will only cater for activities in the context of a year-long planning period. In these cases, outputs may require more than a year of action, before they can be achieved.

Step 5 on the other hand, involves the identification of those resources required to carry out a particular activity to the defined level. Inputs are generally considered in the context of a short to medium-term planning period – e.g. within the annual planning cycle. It should however be noted that they may also need to be planned in the context of multi-year projects, with learnings in one cycle in respect of outcomes, outputs, activities or inputs applied back to forecasts relating to inputs. Inputs may vary significantly from one activity to the next – and may include a wide variety of elements such as funding, people, information technology, materials, infrastructure or tools etc.

The above approach to strategic planning will be adopted for the current planning cycle. Once the City is clear about the above, what follow will be to identify those planning and policy directives that relate to local government and that the City must align with as it develops its strategies, plans, programmes and projects. The next section will outline and discuss the planning frameworks and directives which affects the work of the City.

### 3.3 Planning frameworks and directives

### 3.3.1 National Planning and Policy Directives

### **Sustainable Development Goals**

When discussing the National planning and policy directives that influence the work of local government, it is equally imperative to briefly reflect on the relevant international planning framework. In September 2015 the Sustainable Development Goals (SDG's) were adopted. These brought about an end to the Millennium Development Goals (MDG's) which were monitored since the 2000's. There are 17 Sustainable Development Goals and these outcomes are a universal, and holistic way to fund sustainable development through addressing the three dimensions of economic development, social inclusion and environmental sustainability. The diagram below depicts these 17 SDG's.

FIGURE 27: SUSTAINABLE DEVELOPMENT GOALS

A detailed account of how the City will practically align and contribute to the SDG's will be outlined in the discussions on the GDS Thematic Areas and later in the City's scorecard.

### African Union Agenda 2063

Similar to the SDGs discussed above the African Union Agenda 2063 Aspirations as reflected in the figure below must form part of the imperatives that inform planning in Ekurhuleni. The aspirations as described in the Agenda 2063 framework document reflect the desire for a different, better and dynamic Africa than in 2013. The various plans of the City seek to ensure that Ekurhuleni contributes towards achieving the Aspirations.

FIGURE 28: A SCHEMATIC PRESENTATION OF THE FOUNDATION OF AGENDA 2063

Source: Agenda 2063 Framework Document, September 2015

### **National Development Plan 2030**

The NDP was developed to serve as government blue print plan wherein all of government must collectively work to realise its objectives by 2030. The NDP seeks to align with the SDGs and the Africa 2063 Aspiration, and defines the destination the country wants to be at in 2030 and also identifies the roles that the different sectors of society need to play in reaching that goal. The Plan aims to ensure that all South Africans attain a decent standard of living through the elimination of poverty and reduction of inequality. The core elements of a decent standard of living identified in the Plan are:

- · Housing, water, electricity and sanitation;
- Safe and reliable public transport;
- Quality education and skills development;
- Safety and security;

- Quality health care;
- Social protection;
- · Employment;
- · Recreation and leisure;
- · Clean environment; and
- Adequate nutrition.

Ekurhuleni like all municipalities is at the coal face of service delivery and therefore assumes responsibility for the majority of the above deliverables. Consequently, its strategies, programmes and plans should be aligned with the aspiration of the NDP. A detailed account of how the City will practically align and contribute to the NDP will be outlined in the discussions on the GDS Thematic Areas and later in the City's scorecard.

### The Integrated Urban Development Framework

The Integrated Urban Development Framework (IUDF) is government's policy position to guide the future growth and management of urban areas. The IUDF sets out the policy framework for transforming and restructuring South Africa's urban spaces, guided by the vision of creating 'liveable, safe, resource efficient cities and towns that are socially integrated, economically inclusive and globally competitive, where residents actively participate in urban life'.

The IUDF responds to the post-2015 Sustainable Development Goals (SDGs), in particular to Goal 11: Making cities and human settlements inclusive, safe, resilient and sustainable. It also builds on various chapters of the National Development Plan (NDP) and extends Chapter 8 'Transforming human settlements and the national space economy' and its vision for urban South Africa:

By 2030 South Africa should observe meaningful and measurable progress in reviving rural areas and in creating more functionally integrated, balanced and vibrant urban settlements. For this to happen the country must:

- Clarify and relentlessly pursue a national vision for spatial development:
- · Sharpen the instruments for achieving this vision; and
- Build the required capabilities in the state and among citizens.

The IUDF's overall outcome – spatial transformation – marks a New Deal for South African cities and towns, by steering urban growth towards a sustainable **growth model of compact**, **connected** and **coordinated** cities and towns. Informed by this outcome and the NDP's vision for urban South Africa, the IUDF aims to guide the development of inclusive, resilient and liveable urban settlements, while directly addressing the unique conditions and challenges facing South Africa's cities and towns. Importantly, this vision for South Africa's urban areas recognises that the country has different types of cities and towns, each with different roles and requirements. As such, the vision has to be interpreted and pursued in differentiated and locally relevant ways. To achieve this transformative vision, four overall strategic goals are introduced:

**Spatial integration:** To forge new spatial forms in settlement, transport, social and economic areas.

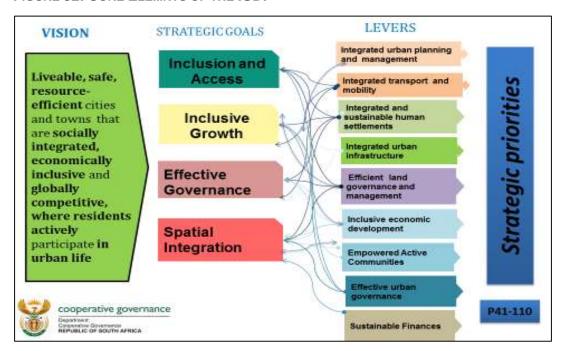

**Inclusion and access:** To ensure people have access to social and economic services, opportunities and choices.

**Growth:** To harness urban dynamism for inclusive, sustainable economic growth and Development.

**Governance:** To enhance the capacity of the state and its citizens to work together to achieve spatial and social integration.

These strategic goals inform the priority objectives of the nine policy levers, which are premised on the understanding that (1) integrated urban planning forms the basis for achieving integrated urban development, which follows a specific sequence of urban policy actions: (2) integrated transport that informs (3) targeted investments into integrated human settlements, underpinned by (4) integrated infrastructure network systems and (5) efficient land governance, which all together can trigger (6) economic diversification and inclusion, and (7) empowered communities; all of the above will demand effective (8) governance and (9) financial reform to enable and sustain these policy actions. The levers thus seek to address in combination the structural drivers that maintain the status quo.

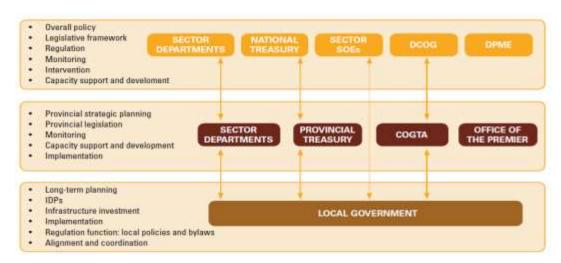

FIGURE 32: CORE ELEMNTS OF THE IUDF

### Role of the City in Implementing the IUDF

The City is required to consolidate existing and/or develop viable long-term growth and development plans, ensuring that each lever is addressed within the municipal area. The City also acts in many instances as the primary implementer for services critical for the success of the IUDF. Local spaces are where the developmental objectives are realised, and so the city needs to align its plans, programmes and budgets to the objectives and priorities of the IUDF, and to coordinate and monitor the progress of any other implementing organisations within their jurisdiction.

FIGURE 33: LEVER IMPLMENTATION: ROLES AND RESPONSIBILITIES

### STRATEGIC FRAMEWORK ALIGNMENT (IUDF)

MTSF Choices	IUDF Strategic Objectives	Provincial 10 pillar programme	Ekurhuleni GDS Thematic area	IDP Strategic Objectives	Mayoral Priorities	City Catalytic Programmes
An efficient competitive and responsive economic infrastructure network	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development.  Governance to enhance the capacity of the state and its citizens to work together to achieve spatial and social integration.	Pillar 2: Decisive spatial transformation	Re-industrialise in order to achieve job creating economic growth	To create an enabling environment for inclusive growth and job creation	Implementation of the economic 10 Point Plan which include the following:  Review Ekurhuleni Business Council Establishment of Ekurhuleni Development Agency Upgrading and renaming of the Springs Fresh Produce Market; Increase investment attraction; Implementation of the City of Ekurhuleni Tourism Strategy – including tourism infrastructure development.	Aerotropolis Programme Township revitalisation programme.
Decent employment through inclusive growth	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development.	Pillar 1: Radical economic transformation  Pillar 6: Modernisation of the economy  Pillar 9: Re- industrialise Gauteng province  Pillar 10: Take a lead in Africa's new industrial revolution	Re-industrialise in order to achieve job creating economic growth;	To create an enabling environment for inclusive growth and job creation	Implementation of the Vukuphile Programme.  Implementation of the Mintirho Community Empowerment Programme.	Spinoffs from City wide programmes and projects.
Sustainable human settlements and improved quality of household life	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive,	Pillar 2: Decisive spatial transformation  Pillar 7: Modernization of human settlements  Pillar 8:	Re-urbanise in order to achieve sustainable urban integration	To promote integrated human settlements through massive infrastructure and services rollout	Electrification of all informal settlement  Construction of 100 000 housing units  Provision of 59 000 serviced stands	Digital City. Urban Renewal

All people in South Africa are and feel safe	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development.	Pillar 3: Accelerating social transformation	Re-mobilise in order to achieve social empowerment; and	To Promote Safer, Healthy and Socially Empowered Communities	By-law enforcement and crime reduction programmes; Increase emergency services in Ekurhuleni;	N/A
A comprehensive ,responsive and sustainable social protection system	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development.  Governance to enhance the capacity of the state and its citizens to work together to achieve spatial and social integration	Pillar 3: Accelerating social transformation	Re-mobilise in order to achieve social empowerment; and	To Promote Safer, Healthy and Socially Empowered Communities	By-law enforcement and crime reduction programmes Increase emergency services in Ekurhuleni	N/A
A diverse, socially cohesive society with a common national identity	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Governance to enhance the capacity of the state and its citizens to work together to achieve spatial and social integration	Pillar 3: Accelerating social transformation	Re-mobilise in order to achieve social empowerment; and	To Promote Safer, Healthy and Socially Empowered Communities	Create a signature mega arts and culture event for the City; Developmental Arts, culture and sports programme targeting youth, promoting social cohesion	N/A

MTSF Choices	IUDF Strategic Objectives	Provincial 10 pillar programme	Ekurhuleni GDS Thematic area	IDP Strategic Objectives	Mayoral Priorities	City Catalytic Programmes
Quality basic education	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development	Pillar 3: Accelerating social transformation	Re-mobilise in order to achieve social empowerment; and	To Promote Safer, Healthy and Socially Empowered Communities	Strongly pursue the establishment of an Ekurhuleni University	N/A
Create a better South Africa and contribute to a better Africa and a better word	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development.  Governance to enhance the capacity of the state and its citizens to work together to achieve spatial and social integration.	Pillar 3: Accelerating social transformation	Re-mobilise in order to achieve social empowerment; and	To Promote Safer, Healthy and Socially Empowered Communities	Roll out Pro-poor social package -free water and electricity as per commitment  Amend the indigent policy  Strongly pursue the establishment of an Ekurhuleni University	N/A
Vibrant equitable, sustainable rural communities towards food security for all	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development  Spatial integration to forge new spatial forms in settlement, transport, social and economic areas.	Pillar 3: Accelerating social transformation	Re-mobilise in order to achieve social empowerment	To Promote Safer, Healthy and Socially Empowered Communities	Urban management, Renewable/Alternative energy	N/A

MTSF Choices	IUDF Strategic Objectives	Provincial 10 pillar programme	Ekurhuleni GDS Thematic area	IDP Strategic Objectives	Mayoral Priorities	City Catalytic Programmes
Protect our environmental assets and natural resources	Inclusion and access to ensure people have access to social and economic services, opportunities and choices.  Growth to harness urban dynamism for inclusive, sustainable economic growth and Development  Spatial integration to forge new spatial forms in settlement, transport, social and economic areas.	Pillar 2: Decisive spatial transformation;	Re-generate in order to achieve environmental well- being;	To protect the natural environment and promote resource sustainability	Renewable/Alternative energy  Waste minimization  Urban management; and  Upgrading of ideal standardized community parks using model of Spruitview Park.	Beautification of lakes and dams improve the image of the city and make it more aesthetically pleasing. This has the potential to increase investor interest in the city, while the beautification of the lakes and dams will contribute to an increase in tourism

### 3.3.2 Provincial Planning and Policy Directives

### **City-region integration imperatives**

Gauteng provincial government's policy priorities and its medium to long term programme of radical socio-economic transformation emphasize the three themes of transformation, modernisation and re-industrialization (TMR). This is the provinces long term vision of building the Gauteng City Region (GCR) of a Metropolitan System of Governance.

The Development of the GCR is anchored on the TMR and its Ten Pillar programme:

- Radical economic transformation;
- Decisive spatial transformation;
- Accelerating social transformation;
- Transformation of the state and governance;
- Modernisation of the public service;
- Modernisation of the economy;
- Modernization of human settlements;
- Modernisation of public transport;
- Re-industrialise Gauteng and south Africa; and
- Take a lead in Africa's new industrial revolution

### Alignment of NDP, TMR 10 PILLAR programmes with Ekurhuleni's GDS 2055

There are notable synergies between Ekurhuleni programmes and the ten TMR pillars, details of which will be outlined in the discussions on the GDS Thematic Areas and later in the City's scorecard. The table below summarises the alignment:

TABLE 1: ALIGNMENT OF EKURHULENI'S GDS 2055 WITH NATIONAL AND PROVINCIAL IMPERATIVES

National Outcomes	Provincial 10 Pillar Programme	GDS Themes
<ul> <li>An efficient competitive and responsive economic infrastructure network</li> <li>Sustainable human settlements and improved quality of household life</li> </ul>	<ul> <li>Pillar 2: Decisive spatial transformation;</li> <li>Pillar 7: Modernization of human settlements</li> <li>Pillar 8: Modernisation of public transport</li> </ul>	Re-urbanise
Decent employment through inclusive growth	<ul> <li>Pillar 1: Radical economic transformation</li> <li>Pillar 6: Modernisation of the economy;</li> <li>Pillar 9: Re-industrialise Gauteng province</li> <li>Pillar 10: Take a lead in Africa's new industrial revolution</li> </ul>	Re-industrialise
<ul> <li>A Skilled and capable workforce to support an inclusive growth path;</li> <li>Responsive, accountable, effective and efficient local government</li> <li>An efficient, effective and development oriented public service</li> </ul>	<ul> <li>Pillar 4: Transformation of the state and governance</li> <li>Pillar 5: Modernisation of the public service</li> </ul>	Re-govern
<ul> <li>A long and healthy life for all South Africans</li> <li>All people in South Africa are and feel safe</li> <li>A comprehensive, responsive and sustainable social protection system;</li> <li>A diverse, socially cohesive society with a common national identity,</li> <li>Quality basic education;</li> <li>Create a better South Africa and contribute to a better Africa and a better word</li> <li>Vibrant equitable, sustainable rural communities towards food security for all</li> </ul>	Pillar 3: Accelerating social transformation	Re-mobilise
Protect our environmental assets and natural resources		Re-generate

### 3.4 Ekurhuleni Strategic Framework

### 3.4.1 Ekurhuleni Growth and Development Strategy – GDS 2055

The City has a long term development strategy referred to as the Ekurhuleni Growth and Development Strategy 2055 (GDS 2055). The strategy systematically analyses Ekurhuleni's history and its development challenges, wherein it therefore outlines the desired growth and development trajectory. It seeks to ensure that Ekurhuleni transitions from being a fragmented City to being a Delivering City from 2012 to 2020, a Capable City from 2020 – 2030 and lastly a Sustainable City from 2030 to 2055.

FIGURE 29: GROWTH AND DEVELOPMENT TRAJECTORY: 2012 - 2055

The GDS has identified five strategic themes to incrementally measure the success of the City with respect to the above. These are long-term outcomes that have been designed to incrementally measure the success of the City in achieving the objectives of the GDS 2055.

- Re-urbanise in order to achieve sustainable urban integration;
- Re-industrialise in order to achieve job creating economic growth;
- Re-generate in order to achieve environmental well-being;
- Re-mobilise in order to achieve social empowerment; and
- Re-govern in order to achieve effective cooperative governance.

These five strategic themes influence one another in order to achieve the desired trajectory. To implement these GDS themes during the current term of Council, the following **Strategic Objectives** (listed below) are proposed to be used as building blocks for the institutionalisation of the GDS and the development of the IDP for the term and Service Delivery and Budget Implementation Plan (SDBIP):

- 1. To promote integrated human settlements through massive infrastructure and services rollout;
- 2. To build a Clean, Capable and Modernised Local State;
- 3. To promote Safer, Healthy and Socially Empowered Communities;
- 4. To protect the natural environment and promote resource sustainability; and
- 5. To create an enabling environment for inclusive growth and job creation.

The figure summarizes the alignment of the GDS 2055 Themes, Strategic Objectives and the Key Focus Areas and/ interventions for the term.

Figure 30: Alignment of GDS 2055 Thematic Areas, Strategic Objectives and Key Focus Areas

#### **GDS THEMATIC** STRATEGIC OBJECTIVE **KEY FOCUS AREAS/INTERVENTIONS AREA** Electrification of all informal settlements; Construction of 100 000 housing units: Provision of 59 000 serviced stands; Up-scaling of services at qualifying informal settlements to make them more To promote Re Urbanize: habitable; integrated human Promote preservation of water usage and continue investing in water settlements through infrastructure to ensure security of supply; To achieve urban Making land available for development; massive integration Ekurhuleni Power Station to broaden accessibility and ensure security of infrastructure and supply; services rollout Implementation of the IRPTN; Infrastructure investment; and Accelerate Wi-Fi rollout. Good governance and clean administration (sustain clean audit), Vetting of all Senior managers and Supply Chain Management staff, Introduce public tendering process; To Build a Clean. Re Govern Building capacity to minimise outsourcing of key Municipal Services; Capable and Establish a commission to fight Fraud and Corruption; Improved Organizational culture, relations between the staff and employer; To achieve Modernised Local Revenue enhancement; effective State Improve service delivery through visible and impactful programmes supported cooperative by Capex spending; and Creation of a single city identity. Implement the Siyaqhuba Programme. Increase the number of local clinics piloting the 24-hour health care programme: Amend the indigent policy; To Promote Safer. Create a signature mega arts and culture event for the City; Re Mobilize Roll out Pro-poor social package -free water and electricity as per Healthy and Socially Developmental Arts, culture and sports programme targeting youth, To achieve social Empowered promoting social cohesion; empowerment By-law enforcement and crime reduction programmes; Communities Increase emergency services in Ekurhuleni; Strongly pursue the establishment of an Ekurhuleni University; and Establish a functional land invasion unit. Renewable/Alternative energy; To protect the Waste minimization; Re Generate natural Urban management; and Upgrading of ideal standardized community parks using model of Spruitview environment and To achieve promote resource environmental wellsustainability being Implementation of the economic 10 Point Plan which include the following: **Review Ekurhuleni Business Council** To create an **Establishment of Ekurhuleni Development Agency** enabling Re Industrialize Upgrading and renaming of the Springs Fresh Produce Market: environment for Implementation of the Vukuphile Programme; To achieve job inclusive growth Implementation of the Mintirho Community **Empowerment** creating economic and job creation Programme: growth Increase investment attraction;

Implementation of the City of Ekurhuleni Tourism Strategy -

including tourism infrastructure development.

These IDP Strategic Objectives are aligned to the GDS themes and together they are recognised as anchors that will keep the GDS alive throughout the term. The details of this alignment is discussed below in relation to the outcomes approach to performance management. The discussion demonstrates the alignment of each GDS theme to a corresponding Strategic Objective, specific national and provincial planning and policy directive for each theme, the proposed programme for the theme, the strategic focus areas for the term and the success measures, amongst others. It should be noted that the actual/specific plan for these strategies is presented separately as the IDP score card for the term in a later chapter.

### **RE-URBANISE – TO ACHIEVE SUSTAINABLE URBAN INTEGRATION**

The strategic intent of the theme is to enable a process of re-urbanization of well-connected cities and networked spaces to ensure a compact and sustainable city, rejuvenate blighted and neglected areas, manage and channel growth, facilitate upward mobility in the formal and informal housing markets, cater for the needs of households requiring affordable accommodation in well located areas and provide efficient and affordable accessibility to places of work, shopping nodes and facilities within the City and the City Region. The theme also calls for an integrated Aerotropolis, with a seamlessly connected and efficient regional air, rail and roads logistics network.

### I. PROBLEM STATEMENT

The Re-Urbanization challenge is two pronged (1) the municipality is a major growth zone and logistics hub for the Gauteng City Region (GCR) and (2) it has to undergo an urban transition from splintered urbanism (fragmented, dispersed motor car biased apartheid urban structure with low standards and quality of urban places, fast decaying inner cities and blighted townships with stagnant property markets) to Inclusive urbanism (cohesive, compact, public transport biased urban structure with a rich sense of place).

### II. GDS IMPERATIVES - DESIRED FUTURE TRAJECTORY

The GDS proposes that in order to redress the development planning injustices of the past; there must be a scalable and demand sensitive mix of service delivery packages that facilitate and enable re-urbanization that fosters sustainable settlements, that reduce carbon emission, and the consumption of natural resources, realize an integrated urban form and decrease the level of dependency on private transport. The urban structure also needs to be compacted and articulated in a manner which is regionally connected and integrated. This would also entail a distinct urban identity and the articulation and resuscitation of an urban core for Ekurhuleni that cohesively integrates high order urban functions and development potential.

The GDS requires further that the transport inequalities bequeathed to the City by its exclusive and inefficient road and car based legacy be redressed. This will require the development of an

urban structure and regional transportation network which is adaptable to, and sustainable from, a mass public transport cost and capacity perspective.

### III. STRATEGIC FOCUS FOR 2016/17 - 2020/21

The City has adopted and committed to a Pro-Poor Agenda with a focus on short and medium term priorities meant to support improved and impactful service delivery, accelerating and broadening access to a constant and predictable provision of quality services to the poor while maintaining good quality service levels in affluent areas. This agenda is meant to be pursued for the next five years. The key focus areas for the term, for the Re-Urbanize theme are discussed below:

### STRATEGIC OBJECTIVE:

"To promote integrated human settlements through massive infrastructure and services rollout"

This Strategic Objective seeks to promote sustainable integrated human settlements (formal and informal) by ensuring universal access to quality basic services; it also consolidate the work that facilitate well-connected cities and networked spaces to ensure a compact and sustainable City, rejuvenate blighted and neglected areas.

### STRATEGIC INTERVENTIONS/ FOCUS AREAS FOR THE TERM

Key initiatives or interventions that will be rolled out during this term includes:

- Electrification of all informal settlements;
- Construction of 100 000 housing units;
- Provision of 59 000 serviced stands;
- Up-scaling of services in informal settlements to make them more habitable;
- Promote preservation of water usage and continue investing in water infrastructure to ensure security of supply;
- Making land available for development;
- Implementation of the Ekurhuleni Power Station to broaden accessibility and ensure security of supply;
- Building capacity in the area of Infrastructure development;

- Provision of roads and storm water infrastructure;
- Implementation the IRPTN; and
- Accelerate Wi-Fi rollout.

# RE-INDUSTRIALISE - TO ACHIEVE JOB CREATING ECONOMIC GROWTH

The Re- Industrialize theme of the GDS deals with economic development, job creation and economic empowerment through industrial competiveness, systems and infrastructure development, market and product development, new value chains and skills development.

### I. PROBLEM STATEMENT

Ekurhuleni has experienced progressive de-industrialization over the past decades notwithstanding its excellent location, established infrastructures and blue collar labour pool. The City has the lowest economic growth rate and highest unemployment of all Gauteng Metro Municipalities, low investment in skills development, an economy highly circumscribed by the power of imports to undermine the industrial economy on the other hand and by the relative strength of the service economy in the parts of Gauteng City Region on the other hand.

Ekurhuleni has not benefited as much as Joburg and Tshwane from the growth in the service economy due to the need for desirable urban investment locations and the limited knowledge economy and innovation infrastructure. The City's manufacturing and logistics economy is gradually re-orientating around new mega projects and freight logistics investments. This process needs to be supported and accelerated.

Notwithstanding the above, there is cause to believe that a scenario of strong capital intensive manufacturing investment is emerging in Ekurhuleni in the context of the Albertina Sisulu Corridor and the emergence of Ekurhuleni as the freight logistics "apron" of the City Region with the Aerotropolis suite of mega projects. The Ekurhuleni Aerotropolis is the City's economic growth path aimed at repositioning the economy of the entire Gauteng City region, as well as to balance the distribution of economic activities around Ekurhuleni to create over half a million new formal jobs over time. The Aerotropolis Master Plan embodies hubs of economic activities and community focal points, emphasizing a mixture of public and private investment. Each hub features and economically supports the most complex key catalytic projects.

### II. GDS IMPERATIVES - DESIRED FUTURE TRAJECTORY

Looking to the future, an increasing trend toward consumer consciousness and preference for "green" products is an important driver, and this is markedly more so amongst younger consumers. The GDS report proposes the following three programmes going forward:

- Strengthen industry competitiveness;
- New value chains development;
- Market and product development; and
- Strengthen industry competitiveness.

### III. STRATEGIC FOCUS FOR 2016/17 - 2020/21

### STRATEGIC OBJECTIVE:

"To create an enabling environment for inclusive growth and job creation"

This Strategic Objective seeks to drive a functional and inclusive economy with full scale implementation of the Aerotropolis and projects meaningfully linked to skills development, job creation and an innovation infrastructure by 2021. The implementation of the 10-point economic plan, the Aerotropolis Master Plan, as well as the revitalization of agricultural and township economies will enable the City to create an enabling environment for sustainable economic growth and job creation.

### STRATEGIC INTERVENTIONS FOR THE TERM

Key initiatives or interventions that will be rolled out during this term includes:

- Implementation of the economic 10 Point Plan which include the following:
  - A clear roadmap for the effective implementation of the Aerotropolis Master Plan;
  - Revitalisation of the manufacturing sector;
  - Enabling Public Transport System;
  - Acceleration of IDZ / SEZ programme;
  - Land availability for strategic development;
  - Implementation of Township Economy Strategy;
  - Empowerment and support of SMMEs through public procurement:
  - Massive infrastructure investment;
  - Promote support of local products (Buy Local); and

- Skills and capacity development;
- Increase investment attraction;
- Review Ekurhuleni Business Council;
- Implementation of the Vukuphile and Mintirho community empowerment programmes; and
- Establishment of Ekurhuleni Development Agency.

### **RE-GENERATE – TO ACHIEVE ENVIRONMENTAL WELL BEING**

#### I. PROBLEM STATEMENT

Ekurhuleni's Growth and Development Strategy identifies the need to achieve environmental well-being as key goal to be achieved leading to 2055. The ongoing degradation of the environment involves on-going systemic effects of mining on land, air and water, industrial pollution and human incursion into hazardous mining wastelands and dolomitic area. This situation will be aggravated by climate change which will increase the intensity and frequency of storm events and put pressure on food supply chains, A second set of environmental challenges relates to the unsustainable consumption resources (water, soil, energy and waste) by urban and industrial production systems and the degradation of biodiversity and ecosystems.

### **II. GDS 2055 IMPERATIVES**

The Growth and Development Strategy 2055 traces Ekurhuleni's development through three historical phases and using this historical analytical framework, it argues that the discovery of gold and coal in the first phase of development, and the twinning of the mining and manufacturing industries, translated into natural resource use that was not sustainable for the environment and the residents of the City. The third phase of development which ensured access of the majority of the City's residents which were excluded in the past to land resources which at most was also extractive in character in line with the two phases of development. Essentially, the three phases of Ekurhuleni's development have resulted in certain undesirable environmental development outcomes.

#### These are:

- High carbon emissions from electricity generation;
- Unsustainable natural resource usage; and
- Uncontrolled pollution

### III. STRATEGIC FOCUS FOR 2016/17 - 2020/21

### STRATEGIC OBJECTIVE:

"To protect the natural environment and promote resource sustainability"

### STRATEGIC INTERVENTIONS FOR THE TERM

Key initiatives or interventions that will be rolled out during this term includes:

- Development of parks;
- Renewable/Alternative energy;
- Implement recycling programme;
- Waste minimization;
- Keep Ekurhuleni Clean programme;
- Protection of natural resources;
- · Pollution control; and
- Urban management.

### RE-GOVERN - TO ACHIEVE EFFECTIVE COOPERATIVE GOVERNANCE

### I. INTRODUCTION

The governance of the City embraces (1) the constitutional, legislative, political and participatory mandate of the municipality as expressed in its legislative, executive and judicial structures and organs (2) the planning and fiscal and asset management systems and processes in its administration (3) the participatory interface with its social partners and (4) the management of its operations.

#### II. PROBLEM STATEMENT

The governance of the City is in a state of transition from a Fragmented City which is procedure and compliance driven, inefficient, wasteful, re-active, slow and unresponsive to a modern Delivering City which is results-driven, lean, pro-active, fast and responsive. This also requires a transition from being inward-looking to embracing the Gauteng City Region, its social partners and its stakeholders.

In the Fragmented City to Delivering City 2012 -2021 Re-Govern transition, the GDS refers to the tough choices needed to stabilise Ekurhuleni and arrest a downward spiral with a back-to-basics approach that involves two leading elements:

- Reform or reformation of Ekurhuleni as an institution to be coherent, tightly managed, enabled
  and resourced in order to rise to the challenge of delivering services that are competitive with
  other industrial and business locations in South Africa and the emerging world.
- Consolidation of service delivery to a consistent and predictable level of service throughout the City with infrastructures that are financially sustainable, efficient and modern.

### **III. GDS 2055 IMPERATIVES**

The desired 2055 trajectory is that Ekurhuleni establishes and asserts leadership within and around the City and with a partnership approach. The City of Ekurhuleni will consolidate its internal capacity and coherence so that it is able to function as a credible, innovative partner and engage in effective cooperative governance in the City Region and with other spheres of government. This will provide a basis for doing more with less, ameliorating resource constraints and attracting confidence, investment and broadening of the income base. This GDS report proposes the following specific governance programmes:

- Build a capable local state;
- Strengthen developmental governance;
- · Establish long-term fiscal strength; and
- Strategically acquire and manage assets and operations.

### **STRATEGIC FOCUS FOR 2016/17 - 2020/21**

### STRATEGIC OBJECTIVE:

"To build a Clean, Capable and Modernised Local State"

### STRATEGIC INTERVENTIONS FOR THE TERM

Key initiatives or interventions that will be rolled out during this term includes:

- Good governance and clean administration (sustain clean audit),
- Vetting of all Senior managers and Supply Chain Management staff,

- Introduce public tendering process;
- Building capacity to minimise outsourcing of key Municipal Services;
- Establish a commission to fight Fraud and Corruption;
- Improved Organizational culture, relations between the staff and employer;
- Revenue enhancement;
- Improve service delivery through visible and impactful programmes supported by Capex spending;
- Develop the Germiston Precint;
- Implement the Siyaqhuba rapid service delivery programme; and
- Creation of a single city identity for the City of Ekurhuleni.

# **RE-MOBILISE – TO ACHIEVE SOCIAL EMPOWERMENT**

#### I. INTRODUCTION

The re-mobilize theme of the GDS deals with the capacity and capability of social capital, including social cohesion and mobilization as well as partnerships. It includes access to healthcare, Early Childhood Development (ECD), ensuring that communities are safer and secure while embracing the needs of vulnerable groups and social development.

The strategic intent of the theme is to build healthy, active and engaged citizenry which is capable of working in partnership to develop the inter-generational capacity needed to take full advantage of the opportunities that knowledge based future presents.

#### II. PROBLEM STATEMENT

Ekurhuleni's people continue to experience poverty and inequality at high levels, Young people find themselves marginalised from the economy, hunger and malnutrition are a reality and social cohesion is low. A culture of dependency on social grants and government schemes prevails. Because the education system is failing to provide the skills or competence or qualifications which are required for the economy, an endemic skills-gap exists. Only a small percentage of pre-school children have access to quality early childhood development (ECD). An HIV/Aids pandemic is intensified by TB, and lifestyle diseases are on the increase. Health facilities are overstretched, responsibilities are overlapping and a "whole of government" approach to health and social development is missing as supply driven approaches to poverty alleviation and social development are led by silo institutions.

Crime in South Africa has occupied centre stage on the public agenda. Unacceptably high levels of crime, especially serious and violent crime, result in people in South Africa, especially

vulnerable groups such as women, children, older persons and people with disabilities, living in fear and feeling unsafe.

The high levels of serious and violent crimes in Ekurhuleni creates fear and vulnerability to the Ekurhuleni community. Political and/or domestic instability is a serious challenge that if left unabated will undermine our democracy, rule of law and development trajectory. Issues that contribute to this instability are violent industrial and service delivery-related protest actions, as well as disrespect for authority and for one another. It is therefore imperative to prevent and combat the violent crime that accompanies what is otherwise legitimate industrial and protest action.

#### III. GDS 2055 IMPERATIVES

Going forward it will be essential to support multiple livelihood strategies and the upgrading of human capability in the broadest sense. Looking to the future it will also be essential to intensify and focus Ekurhuleni's role in early childhood development and youth development in general. The young people of Ekurhuleni are the future and there can be no prospect of a competitive future unless concerted effort is made to bridge the gaps which previous approaches have created.

#### IV. STRATEGIC FORCUS FOR 2016/17 - 2020/21

#### STRATEGIC OBJECTIVE:

The following Strategic Objective has been identified as the building block toward implementing the Re-Mobilise Theme:

"To promote Safer, Healthy and Socially Empowered Communities"

#### STRATEGIC INTERVENTIONS FOR THE TERM

Key initiatives or interventions that will be rolled out during this term includes:

- Increase the number of local clinics piloting the 24-hour health care programme;
- Amend the indigent policy to include child-headed families that are constrained by the property transfer process; while also revisiting the burial policy for indigent persons;
- Create a signature mega arts and culture event for the City;
- Roll out Pro-poor social package -free water and electricity as per commitment;
- Developmental Arts, culture and sports programme targeting youth, promoting social cohesion;
- Strongly pursue the establishment of an Ekurhuleni University;

- Improve access to emergency management services;
- By-law enforcement and interventions/programmes to reduce crime; and
- Establish a functional land invasion unit.

# 3.4.2 City Wide Flagship Projects

## **AEROTROPOLIS**

**TABLE 2: AEROTROPOLIS PROJECT** 

	AEROTROPOLIS PROJECT
DESCRIPTION OF THE PROJECT	The Ekurhuleni Aerotropolis Project seeks to explore interventions that leverage the economic benefits of having the busiest airport on the African continent, the OR Tambo International Airport, located within Ekurhuleni's boundaries. Given that the OR Tambo International Airport resides within its municipal jurisdiction, the City of Ekurhuleni and the GPG need to plan accordingly for any development related to this asset, to unlock its value proposition and position the region as a globally competitive one.
PROGRESS TO DATE	Detailed research regarding the trade environment and current economic realities has been completed. During this process initial work on the land use strategy, land demand modelling, and impact modelling has come a long way to creating a picture of what the future Ekurhuleni Aerotropolis might look like.
	A range of catalyst projects have also been identified. These projects have been selected from an initial list of 141 projects. Using a multi criteria analysis and incorporating the research that has been done a shortened list of 21key projects have emerged. A detailed trade analysis, including an overview of global trade patterns and trends where under taken.
	An accurate employment projection to 2040 has also been completed.
	The first wave of catalytic projects has already been induced in the Catchment Area of the Aerotropolis for example, A R300 million PRASA Nerve Centre building next Kaalfontein station in Kempton Park as part of the R4 billion tender station upgrade programme by PRASA etc.
	In the main, the Ekurhuleni Aerotropolis 25 Year Master Plan has reached an important milestone where the critical development opportunities related to envisioned Aerotropolis activities have been preliminarily defined, scaled, and located. The 25 Year Master Plan has been approved by Council.
DELIVERABLES FOR 18/19 AND BEYOND	Implementation of the 25 Year Master Plan and its projects.

## **REVITALISATION OF THE MANUFACTURING SECTOR**

TABLE 3: REVITALISATION OF THE MANUFACTURING SECTOR

RE	EVITALISATION OF THE MANUFACTURING SECTOR		
DESCRIPTION OF THE PROJECT	Revitalisation of the manufacturing sector is a programme aimed at leveraging on the existing industrial capabilities to stimulate industrial activities, efficiencies and competitiveness.		
	Thirteen pillar programmes have been identified to implement this flagship:		
	Pillar 1: Industrial Situational Analysis and Competitiveness Index Pillar 2: Industrial Planning and Strategy		
	Pillar 3: Industrial Sector Clustering and Development		
	Pillar 4: Investment and Development Facilitation		
	Pillar 5: Productivity Improvements and Industrial Upgrade Pillar 6: Green Economy Sector Development through Cleaner Production, Resource		
	Efficiency & Waste Beneficiation		
	Pillar 7: Technical Skills Development and Industrial Incubation Pillar 8: Economic Infrastructure Development & Logistics Networks		
	Pillar 9: Leverage Strategic Procurement for Industrial Development and Inward Investment		
	Pillar 10: Research and Development to encourage Innovation		
	Pillar 11: Database Development and Stakeholder Mobilisation Pillar 12: Strategic Industrial Financing		
	Pillar 13: Support for Local Companies		
PROGRESS TO	Industrial development strategy and programme developed.		
DATE	Annual average of R7billion worth of domestic and foreign direct investment facilitated		
	since 2013/14 financial year.  • Programme to revitalise industrial areas underway with Wadeville extension 4 & 6		
	<ul> <li>Programme to revitalise industrial areas underway with Wadeville extension 4 &amp; 6 industrial improvement underway in collaboration with industry.</li> </ul>		
	Revitalisation of the Labore industrial are also underway with road infrastructure		
	improvement started in the current financial year.		
	Ekurhuleni Business Council launched in 2016 to improve interaction between the City		
	and Private sector and to encourage Public-Private-Partnerships in developing the City's		
	<ul> <li>economy.</li> <li>Gibela stakeholder engagement forum established to facilitate access to the jobs and</li> </ul>		
	entrepreneurship opportunities presented by the PRASA's new rolling stock programme		
	worth R51 billion in investment over the next 10 years.		
	Collaboration with Gauteng IDZ to develop industrial and special economic zone clusters		
	in Aerospace and Platinum Group Metals beneficiation industries.		
	Collaboration with Plastics SA to develop the plastics industry in the City.  Party and his with Para death its SA to develop the plastics industry in the City.		
	<ul> <li>Partnership with Productivity SA to develop the Industrial Upgrade, Productivity</li> <li>Improvement &amp; Competitiveness programme. Productivity Benchmarking underway with</li> </ul>		
	20 local companies participating. In addition, over the past 3 years more than 300 local		
	businesses have undergone productivity improvement programmes.		
	Collaboration with the National Cleaner Production Centre SA to implement the		
	resources efficiency programme and since 2013, over 50 local companies have		
	<ul> <li>committed to this programme.</li> <li>Hosted the annual manufacturing indaba between 2014 and 2016.</li> </ul>		
DELIVERABLES	Revitalization of the manufacturing sector strategy developed.		
FOR 18/19 AND	10-year Industrial Upgrade, Productivity Improvement and Competitiveness Programme		
BEYOND	developed and implemented.		
	R7 billion worth of domestic and foreign direct investment.		
	Facilitate development of industrial sector cluster programmes in Plastics, Aerospace     Find Calls		
	<ul> <li>and Fuel Cells.</li> <li>Revitalization of the industrial areas – Labore industrial development.</li> </ul>		
	Revitalization of the industrial areas – Labore industrial development.     50 local companies participating in the Productivity Improvement Programme.		

#### **INTEGRATED RAPID PUBLIC TRANSPORT NETWORK (IRPTN)**

TABLE 4: INTEGRATED RAPID PUBLIC TRANSPORT NETWORK

## INTEGRATED RAPID PUBLIC TRANSPORT NETWORK (IRPTN)

# DESCRIPTION OF THE FLAGSHIP

IRPTN refers to the City of Ekurhuleni (CoE's) transformation of the public transport system that aims to provide "a high-quality and affordable public transport system in line with national policy". The main objective of the IRPTN is to provide a new and attractive integrated public transport network that includes road and rail public transport services that serve the people of Ekurhuleni as a whole.

The IRPTN is a catalyst for sustainable development as it is based on forming a network linking nodes of social, economic and industrial development and not simply satisfying current demand. In Ekurhuleni the system will begin to integrate some parts of the currently disconnected nine towns. The IRPTN in the CoE also cuts across all nine of the CoE's flagship projects and ties into the development plans of private stakeholders.

The project is aimed at improving commuter movement and connectivity through mobility within the CoE, extending into adjacent metros and a well-structured, safe and reliable public transport option that complements other modes. The project has made some progress towards making this objective a reality, having some of the infrastructure completed and the Automatic Fare Collection System (AFC) under implementation. The process of negotiations for the interim compensation has been concluded and an agreement reached between the CoE and the ETI.

The IRPTN is being implemented incrementally along priority corridors, in accordance with the CoE's strategic priorities and available budget and the operational viability of the system. The first phase is to implement the BRT along the corridor from Tembisa to Vosloorus. Although fraught with many challenges that impeded the timely delivery of the intended results in certain performance areas, commendable progress in the broad areas of delivery has been observed.

# PROGRESS TO DATE

The IRPTN, CoE's anchor intervention for improving public transport system within Ekurhuleni became one of the flagship projects for the municipality. Following the selection of Ekurhuleni as one of the participant municipalities in the implementation of the IRPTN, CoE identified the IRPTN as a central feeder point for the regeneration of the inner-cities and the renewal of the townships within Ekurhuleni.

The implementation of the BRT project started in earnest in 2012. Since then, 10 kilometres of dedicated bus ways, 41 kilometres of cyclist and NMT pathways, 51 laybys and a Transport Management Centre have been constructed. The other infrastructure projects including pedestrian bridges, stream crossings, lighting and complementary routes are currently underway, and are scheduled for completion by the end of 2018 or 2019 bar the current challenges experienced with contractors. The BRT stations construction contracts were previously terminated, due to poor performance by the then contractors. Replacement contractors have since been appointed for 5 of the 9 stations.

The Automated Fare Collection (AFC) system is now in place; a service provider was appointed for a period of 12 years. The remaining ITS solution, the Automated Public Transport Management System (APTMS) is yet to be procured.

The Department operated a systems and service test, from February –September 2017, together with KTVR Bus Service (Pty) Ltd, the interim Vehicle Operating Company, that is the Special Purpose Vehicle (SPV) that was established, through the signing of a Section 67 (MFMA) Agreement in 2016. This operation was enabled by the CoE leasing a total of 8 buses that are fully compliant with the BRT specifications to KTVR, with the long term intention of selling the buses to KTVR, to enable operations. KTVR has also ordered an additional 32 BRT compliant

# **INTEGRATED RAPID PUBLIC TRANSPORT NETWORK (IRPTN)**

buses which are ready for delivery once the Development Bank of Southern Africa (DBSA) allows the drawdown on the loan advanced.

A limited starter service was finally launched in, with the 8 buses, running in mixed traffic, to allow for construction activities to continue in the trunk route. The service runs from Tembisa to Isando, along the identified trunk route corridor. There are plans underway to possibly expand the service to Kempton Park as well.

Some of the critical milestones and results achieved include the following:

- Operationalization of the Harambee BRT service, which runs from Tembisa Civic Centre to Isando and vice versa;
- o The agreements reached with the Taxi Industry on:
  - Conclusion of Pre-negotiations phase and Interim Compensation for the Starter Service:
  - o Approval of the Criteria for Affectedness for taxi operators;
  - Approval of the Market Survey Methodology (the Market Survey to determine market share and business value is currently under way).
- o Transport Management Centre in Kempton Park The Traffic Management Centre (TMC) has been completed and was launched on 23 March 2016. The TMC hosts specifically the IRPTN identified core functions. This includes interface and integration with existing ITS components such as Traffic Signals, CCTV surveillance cameras and integration with the centralised Ekurhuleni's Public Call Centre. TMC monitors the fleet and network infrastructure, provide a Call Centre for travel information and process the Automatic Fare Collection system information. The TMC also deals effectively with IRPTN related incidents to ensure a safe and secure environment for its commuters and operators. In the operations plan, a Central Management System (CMS) was identified as being integral to the functioning of the TMC. The CMS facilitates the integration of the all sub systems through a variety of interfaces and protocols and allow the management of such systems under a single, common, visual interface.

As a flagship project of the City, the IRPTN is a high priority for the municipality and is regarded as key and core in the process of bringing about radical transformation within the public transport arena in Ekurhuleni. Through the IRPTN, future trajectory of transport points towards multi-modal transport nodes linking communities to employment opportunities and resulting in increased economic growth. The project is the vehicle through which a game changing model of travelling patterns and transportation of people within, around and intersecting with other Cities within the Gauteng City Region.

#### DELIVERABLES FOR 18/19 AND BEYOND

#### **Extension of Harambee services**

- The City is in discussion with the operating company to extend the Harambee services to OR Tambo International Airport and Emperor's Palace.
- 40 more busses will be added to the system

#### **IRPTN** Infrastructure

- The City will complete the construction of BRT Stations
- Complete the construction of pedestrian bridges

# INTEGRATED RAPID PUBLIC TRANSPORT NETWORK (IRPTN)

#### **Vehicle Operating Company**

Negotiations for final compensation and formation of the Vehicle Operating Company that will run the service for a 12 year period.

## **REVITALISATION OF THE TOWNSHIP ECONOMIES**

TABLE 5: REVITALISATION OF TOWNSHIP ECONOMIES

	REVITALISATION OF TOWNSHIP ECONOMIES
DESCRIPTION OF THE PROJECT	The township regeneration programme entails the transformation of five Ekurhuleni township complexes into prosperous, compact, sustainable and better managed urban centres with vibrant economies, better transport linkages, well managed public spaces and infrastructure. The goal is to redevelop Ekurhuleni's townships into great places to live, work and play.  The focus of the economic sector is to develop and grow a diversified economy that goes beyond the prominent retail developments and seeks to attract investment in other sectors such as light industrial, manufacturing, agriculture and tourism. A combination of attracting
	External investment and supporting local entrepreneurs, particularly in the SMME and co- operatives sector, is at the centre of the economic strategy.
PROGRESS TO DATE	Progress achieved includes the following:
	TOWNSHIP ENTERPRISE HUB
	<ul> <li>The <u>Duduza Resource Centre</u> next to the new CCA and police station is currently being refurbished for conversion into a hub. The centre is currently being utilised mainly for social and recreation in its current form. The department is refurbishing this facility to give it a modern look, to re-arrange the parking facility and to plug in economic activity and business support.</li> <li>The Etwatwa; <u>Barcelona Traders Market</u> in the last financial year. It is a trading facility intended for Small retailers.</li> <li><u>Etwatwa Enterprise Hub</u>: Design work done completed project team currently finalizing the Fencing and guard house. The project was not done in the financial year envisage to be delivered. There for require motivation for additional funding. Once consensus is reached on this process CED is willing to implement this project through Real Estate.</li> <li><u>Kwa-Thema Enterprise Hub</u>: Design work done completed project team currently finalizing the Fencing and guard house. The project was not done in the financial year envisage to be delivered. There for require motivation for additional funding. Once consensus is reached on this process CED is willing to implement this project through Real Estate.</li> </ul>
	INCUBATION PROGRAMME  The Incubation is an intense SME training programme involving the industry and expertise in a respective field. The programme includes close monitoring of knowledge, growth and general progression of the enterprise. The City of Ekurhuleni has established three incubation centres and is in the process to set-up two more in this financial: -
	Chemical Incubation has been set up in Tembisa Business Park and Thokoza(Project in Pipeline)     Chemin submitted a proposal to Ekurhuleni Metropolitan Municipality for the establishment of a Chemical Incubation Programme. The incubation programme will entail the establishment of two manufacturing hubs to be located at the Thokoza Fabrication Laboratory and Sedibeng Industrial Hive Centre located in Tembisa. The

main activity at these hubs will be the manufacturing of chemical detergents,

#### REVITALISATION OF TOWNSHIP ECONOMIES

cosmetics, hair care products and perfumes. The manufacturing of coatings will be established if and when incubates are identified.

#### MactSteal/SEFA/Ekurhuleni Steal Traders Incubation

The Tri-party partnership between Ekurhuleni/SEFA and MacSteel to incubate 25 SMME and build competency on steel manufacturing and participation in steel and steel products market. The parties shared responsibility according to their capabilities. The City sponsors the soft skilling on this project, while SEFA provide credit guarantees and McSteel provide technical skill and the market.

#### **ENTERPRISE DEVELOPMENT**

**Mentorship Programme** 

#### **UNISA SMME Short Course**

30 SMME taken through the UNISA SMME short course. They are now competent in business plan development, business management, and marketing.

#### **Protective Clothing**

25 SMME are mentored on Protective Clothing sewing and manufacturing in 2016/17 this programme interlinks with Social development project called MACE which will link PPE Coops with market.

#### **Furniture Making**

25 SMME are mentored on Furniture Making in 2016/17 this programme is intended to prepare SMME for the furniture market.

#### **General Entrepreneurship mentoring**

Eighty (80) of the SMEs in Ekurhuleni are included in the Entrepreneurship mentorship programme to assist with simple aspect of "how to run your business" (Business Finance Management). Issues such as cash flow management, personnel management, payroll market and promotion and day to day running of business are being taught to the SMME's.

The programme has an intake of 40 SMEs per year.

#### **COOPERATIVE DEVELOPMENT AND SUPPORT**

#### **NYDA Youth Ward Project**

The City has partnered with the NYDA to implement the Buddibox Trade Project Proposal to upscale on the existing training on Entrepreneurship Development Programme and to enhance development of youth in retail and related services by creating entities that young people will have full control of, such as Cooperatives. This project will involve at least 20 Youth community members in a Primary Cooperatives for each ward and will establishment of 2024 youth retail coops.

#### **Quality Assurance: Productivity SA Programme**

The department has partnered with Productivity SA to develop Cooperatives on cooperative business management principles. At least 37 cooperatives participated on this programme.

#### **FABRICATION LABORATORY**

The goal of the Fab-Labs in Ekurhuleni is to provide previously disadvantaged communities with access to modern digital manufacturing facilities with a rapid prototyping capability as a means of crossing the digital divide while encouraging high level research and development and impacting on creativity, innovation and 21st Century Skills development. The Economic Development department established three Fabrication Laboratories in Thokoza, Tembisa, Tsakane and Duduza and will be completing the establishment of the fifth one in Vooslorus Skills Centre in June 2016.

#### DELIVERABLES FOR 17/18 FY AND BEYOND

#### **Township Automotive City**

In the townships, automotive activity is focussed on the aftermarket services. Given the challenges facing these businesses such as (market access, skills, infrastructure and finance), the primary support opportunity is to assist with strengthening the existing township SME market position while working to compete for formal sector market linkage opportunities.

REVITALISATION OF TOWNSHIP ECONOMIES		
	Ekurhuleni Innovation Hub The department is currently planning a state of the Art Innovation Hub. The design and planning is about to be completed and the construction work will commence in the next financial year.	

# 1. BEAUTIFICATION OF LAKES AND DAMS

TABLE 6: BEAUTIFICATION OF LAKES AND DAMS

BEAUTIFICATION OF LAKES AND DAMS				
DESCRIPTION OF THE PROJECT	A project initiated to improve the image of the City and make it more aesthetically pleasing. This has the potential to increase investor interest in the City, while the beautification of the lakes and dams will contribute to an increase in tourism			
PROGRESS TO DATE	Cleaning of water bodies by utilizing the Water Master Machine in terms of removing the floating water grass, the water lilies, water hyacinth and deepening on the in-let and reeds encroachment. Some of the water bodies were this intervention were done includes, Germiston / Victoria Lake, Middle Lake Benoni, Homestead Dam Benoni, Kleinfontein Dam Benoni, Civic lake Benoni and Alexandra Dam Springs.  Rehabilitation of watercourse in terms of river bank stabilization in terms of addressing erosion. The following rehabilitation have been done at Kaalspruit, Rietfontein, Tshongweni, Tembisa, Illiondale, Thembelisha and Natalspruit by installing gabions in			
	order to control erosion.  Rehabilitation of Boksburg Lake was initiated and concluded actions include the following:			
	<ul> <li>Preliminary studies to ascertain the level of pollution;</li> <li>Regular litter and debris clean ups; and</li> <li>Consultant is appointed to do a specialized rehabilitation plan for the lake</li> <li>The department has established the Beautification of Lakes and Dams Task Team (BLDTT) it is based on the fact that in the past it was realised that although there were a number of efforts by different role players working on addressing the improvement of water bodies, each one tended to work in isolation without sufficient co-ordination. ERM realised that there was a need to establish a BLDTT that will operate in a more structured, integrated and focused manner in escalating, addressing and finding solutions to water bodies challenges. The response to management of lakes and dams therefore requires a multi-disciplinary approach involving all sectors, and encompassing not only improved operation and maintenance, and infrastructural investment, but also significantly expanded education, awareness and enforcement of permits, standards, town planning conditions, and a range of by-laws, as well as developmental interventions</li> <li>Reclamation, Rehabilitation, Landscaping and Enhancement Feasibility Master Plan of Ekurhuleni's Water Bodies has been developed.</li> <li>Finalize the rehabilitation studies of Boksburg Lake.</li> <li>Beautification of lakes and dams has been done in the following water bodies:</li> <li>President dam: Beautifying Murray Park;</li> <li>Rietspruit: Beautifying Nyoni Park;</li> <li>Boksburg Lake: Beautifying the open space around the lake; and</li> <li>Blesbokspruit: Beautifying Bunny Park.</li> </ul>			

# BEAUTIFICATION OF LAKES AND DAMS The department is in the process of finalizing the consultants to undertake the studies. The project is expected to be completed by the 30 September 2018. **DELIVERABLES FOR** The following deliverables are planned for the 18/19 FY: 18/19 FY AND BEYOND Implementation of Reclamation, Rehabilitation, Landscaping and Enhancement Feasibility Master Plan of Ekurhuleni's Water Bodies Implement Rehabilitation at the following water bodies: Natalspruit and Rietspruit Undertake environmental studies in the following water bodies for the rehabilitation: Blesbokspruit, Kaalspruit, Natalspruit, Rietspruit, and Elsburgspruit Continue cleaning of water bodies by utilizing the Water Master Machine in terms of removing the floating water grass, the water lilies, water hyacinth and deepening on the in-let and reeds encroachment. Explore Investment opportunities at some of the water bodies as mentioned in the Feasibility Master Plan of Ekurhuleni's Water Bodies. Undertake River Health assessment of Natalspruit, Jukskei, Kaalspruit, Rietspruit, Blesbokspruit, Elsburgspruit and Rietvlei Catchments. The proposed study is aimed at designing a River Health Programme (RHP) for all seven catchments, to monitor, assess and report on the ecological state of river ecosystems based on their biological condition in relation to all the collective human induced disturbances affecting them. The River Health Programme is designed to develop the capacity and information base that would enable the City to report on the ecological state of our river systems in a scientifically sound manner and assists in identifying areas of sustainable utilization and unacceptable ecological deterioration. Continue with Beautification of open spaces around prioritized lakes and President dam: Completion of Beautifying Murry Park Rietspruit: Completion of Beautifying Nyoni Park Boksburg Lake: Completion of Beautifying the open space around the lake Blesbokspruit: Completion of Beautifying Bunny Park

#### 2. DIGITAL CITY

#### **TABLE 7: DIGITAL CITY**

#### DIGITAL CITY

# DESCRIPTION THE PROJECT

Digital City is the innovative use of technology to create a smart City. The Digital City is divided into four streams of work which are:

- · Broadband infrastructure;
- Setting up CoE as an Internet service provider;
- Enterprise Operation Centre/Unified Command Centre (UCC)
- Digital City services and products.

Implementation of Phase 1 of the project which includes setting up of the Digital City unit to provide effective broadband infrastructure that supports the business services, commercialisation of the fibre and connectivity to Ekurhuleni community.

#### **Project Components**

Stream 1: Broadband (fibre connectivity):

- Rollout fibre broadband throughout Ekurhuleni. All municipality buildings to be connected (estimated 686 buildings) over a period of 4 years.
- Existing connectivity: 157, remainder: 530.
- Create redundancy for 95% of fibre links for increased network stability
- 602KM of fibre confirmed active ad working. Extra 700 deployed and currently being activated. Expansion to other sites in process

#### Stream 2: Broadband wireless connectivity:

- Provision of broadband wireless overlay (Wi-Fi-based) 2 hotspots for internal use and between 2 and 4 hotspots for public Wi-Fi in each of the 686 buildings.
- 34 buildings have Wi-Fi from internal hotspots currently and 300 Wi-Fi sites to the public exists.

#### Stream 3: Unified Command Centre:

- The Conceptual Phase of the UCC was completed, developing the UCC strategy and Operating Model, high level business processes as well as a costing model provided a projection of costs.
- Two parallel processes to follow now are:
  - (a) Building architecture drawings and construction of the building
    - Budget for this still needs to be allocated.
  - (b) Obtaining and implementing the UCC IT solutions
    - Specification of procurement completed. Tender process to start soon.

#### Stream 4: CITY OF EKURHULENI E-Citizen Services:

 City planning operations: Analysis and automation of current processes. In addition, defining a data and process architecture. 4 Processes automated and extra 6 to be automated  External: function of potential datasets which can be made available to outside world, as well as potential in -city Business Process Owner components which city has appetite to provide.

Alignment with the GDS 2055:

Goal: increased broadband coverage.

This strategy is supported by:

- Creating a fibre and wireless network throughout Ekurhuleni to create a connected city.
- Create internet zones to the public to encourage economic development, especially in historically disadvantaged areas.
- Connect all the CITY OF EKURHULENI buildings and as such increase efficiency.
- Install video conferencing in boardrooms and meeting rooms to increase efficiency and reduce travelling time.
- Install application functionality to have an increased engagement with the citizens by means of easy-to-use and advanced technology. These include SMS, smart phone, website and other electronic communication.

# PROGRESS TO DATE

#### Infrastructure:

- Fibre activation through deployment of switches in progress
- 200 Wi-Fi units rolled out for internal use.
- Rollout of public Wi-Fi in all libraries in progress and should be completed by the end of the 2018/19 FY.
- VNX Infrastructure to be expanded to cater for new systems and capacity requirements.
- Converged infrastructure expansion in progress.
- Video Conferencing installed for 20 boardrooms, Tender for extra 12 boardrooms to be installed.

#### **Business Process Mapping:**

Business processes mapping for the 20 key departments targeted for the UCC is completed. UCC implementation starting with the Safe City has been initiated

#### **Applications:**

- · City process model, BPM Framework, APM and RMP have been created.
- · Master systems plan in place and has been approved.
- Implementation of the Master Systems Plan in progress

#### **Unified Command Centre:**

- DEMS strategic and tactical command centre establishment in Bedfordview in architect design stage.
- Long-term UCC:
  - Conceptual Design Phase nearly completed. Strategy and value proposition was defined, high level processes were defined, and Business functionality as well as IT requirements and UCC costing model were defined.
  - Tender for architect consulting team for UCC buildings in progress.
  - Tender process for the implementation of the UCC dub-component (Safe City) in progress. Specifications finalise and ready to go out on tender.

#### DELIVERABLES FOR 18/19 FY AND BEYOND

#### Infrastructure:

- Fibre expansion 85KM and building 82KM fibre network completed
- New Fibre tender to activate the currently deployed fibre in advanced stage.
- Create redundancy for 225 sites by purchasing 130KM fibre awaiting tender.
- Stabilised the Wi-Fi network and continue with the expansion
  - o Install internal Wi-Fi in 235 buildings (2 units per building).
  - Install public Wi-Fi in 235 buildings (between 2 and 4 units per building).
  - Connect four CITY OF EKURHULENI Computer centres.
  - o Continue with upgrade of security.

#### **URBAN RENEWAL**

**TABLE 8: URBAN RENEWAL** 

# DESCRIPTION OF THE PROJECT

#### **URBAN RENEWAL**

The urban renewal programme entails, in the first instance, transformation of two out of the nine existing Ekurhuleni towns into prosperous, compact, sustainable and better managed urban centres with better transport links that are great places to live, work and play.

Ekurhuleni made a choice to focus its interventions in the short-to medium-term on Kempton Park and Germiston Central Activity/Living Areas. These primary urban renewal areas give Ekurhuleni its identity and urban structure as a City with dual City centres that complement each other; where Kempton Park's role is seen as a cultural and economic hub of the metro anchored by the Aerotropolis and Germiston as the administrative headquarters of Ekurhuleni.

The long-term vision of the programme is to redevelop all Ekurhuleni towns into Central Living Districts (CLDs), where there is an intensification of residential land uses to complement the economic uses that prevail currently and to ensure that all the towns are green, clean and safe.

#### **URBAN RENEWAL**

# PROGRESS TO DATE

Progress achieved with this programme is as follows:

#### **Tembisa HUB**

- Link roads upgrade completed.
- Implementation of IRPTN network and stations is complete.
- Ekurhuleni in partnership with PRASA/Intersite are implementing rail underpasses for safe passage of communities wishing to access the Tembisa civic center facilities.

#### (4) HUBs - KwaTsaDuza; Actonville-Wattville; Daveyton/Etwatwa; Katorus

- · Urban renewal strategies for the five township complexes completed
- Additional precinct plans for the Leralla Node in Tembisa, Daveyton Node and Vosloorus Node are completed

#### Germiston

- Development of 112 social housing units in Delville were completed in June 2017 and handed over to the Ekurhuleni Housing Company who has already tenanted the units.
- Development of 144 social housing units in the Old Fire Station Site were completed in March 2017 and handed over to the Ekurhuleni Housing Company who has already tenanted the units. Phase 2 of the project will yield 200 units and it is scheduled for completion in March, 2018.
- Dukathole: feasibility, socio-economic study, and urban design completed.
- Detailed designs for high density housing units for Good Hope and portion of Makause informal settlements are scheduled for completion in June 2018
- Cultural Precinct: The theatre construction is complete and it is in the processes of operationalization.

#### **Kempton Park**

- The Kempton park plan prioritizes improvements of Linkages to Airport, Gautrain, Rhodesfield and Kempton Park.
- The Department of Transport Planning & Provision developed a precinct plan in 2017 and City planning are responsible for the implementation of projects

#### DELIVERABLES FOR 17/18 FY AND BEYOND

#### Tembisa

- Construction of two pedestrian bridges in Ibazelo (golden gate) and Tami Mnyele to improve pedestrian safety across the railway line and to improve access to the civic node is underway and scheduled for completion in June 2018
- Beautification overlay (street furniture and landscaping) and ibazelo park detailed designs are completed and scheduled for implementation in the current year
- Packaging and release of development packages for private investment at the civic node is also planned for the current year

#### Wattville

- Commence with the implementation of 264 four storey walk up units in erf 3130, close to the OR Tambo memorial.
- Proceed with public space upgrade work to improve beautification and pedestrian safety.

#### **Vosloorus**

- Finalise detailed designs and commence with construction of 770 ten storey rental housing units and 550 four storey walk up units with landscaped gardens and parks along the N3 in the vicinity of the Vosloorus civic centre.
- Approval of precinct plans for the new town center for Vosloorus by Neighbourhood Development Programme at National Treasury.

# **URBAN RENEWAL**

#### Germiston

- Implement phase 2 of the Germiston public space upgrade, promoting the pedestrian safety and beatification of Germiston streets linked to key development nodes.
- Proceed with Construction and completion of Germiston South Phase 2 social housing.
- Operationalisation of the Germiston Theatre.
- Operationalisation of the Germiston Fire station.
- Finalisation of design work and procurement for the Germiston station intermodal facility.
- Proceed with the acquisition of existing buildings as part of brownfields acquisition programme for social housing.

## **REVENUE ENHANCEMENT**

## TABLE 9: REVENUE ENHANCEMENT

	REVENUE ENHANCEMENT
DESCRIPTION OF THE FLAGSHIP	The programme has identified the following key business themes which serve as strategic objectives that should drive and support the revenue management and enhancement programme.
	Reduction of consumer debt through appropriate credit control and debt collection to improve revenue;
	<ul> <li>Improved, consistent and accurate/integrative property value chain;</li> <li>Improved customer services;</li> </ul>
	<ul> <li>Monitoring and evaluation of consumption processes and efficiencies; and</li> <li>Revenue collection.</li> </ul>
	The flagship has several projects under it and these are:  1. Key accounts;
	Siyakhokha Siyathuthuka - e-Siyakhokha;
	Indigent management programme;
	Restructuring of the debtor's book; and
	5. Debt collection.
PROGRESS TO DATE	The following progress has been achieved:
	e-siyakhokha-siyathuthuka
	Two payment kiosks have been installed at two sites, Carnival City and Benoni Lakeside Malls.
	130 000 users registered compared to 50 029 in the previous year.
	R352m payment per month on e-siyakhokha website.
	MMS services roll-out in addition to the SMS.
	<ul> <li>Branding and communication: Radio and billboard advertisements as part of the communication was done during December and January.</li> </ul>
	Debtors collection
	<ul> <li>Collection for the period ended 31 March 2017 is 93.0%, which meets the target of 93%.</li> </ul>
	<ul> <li>Interest waiver as an incentive for outstanding debtors balance is starting to yield positive results although not yet significant.</li> </ul>
	Engagement with major customers on interest waiver is underway.
	Aggressive marketing on it, is part of the plan going forward.
	Indigent management programme
	<ul> <li>The indigent management policy has been reviewed and will be work shopped with various key stakeholders.</li> </ul>
	40 458 approved indigents compared to the 35,586 in 2013/2014.
	In addition 61 098 deemed indigents at the end of February 2015.
	Social Development working with Finance obtain stats from South African Social
	Security Agency on pensioners residing in Ekurhuleni.
	The data is being analysed to assess if they cannot be classified as indigents if not already
DELIVERABLES	regarded as such.
DELIVERABLES FOR 17/18 FY AND	<ul> <li>Monthly Finance Open Days</li> <li>Finance Open days are held at the end of every month on the Friday and Saturday.</li> </ul>
BEYOND	So far 5 Open Days were held ((2 in Tembisa, 2 in Tsakane and 1 in Springs).

#### REVENUE ENHANCEMENT

 The purpose of these Open Days is to educate communities on the variety of services offered by Finance, including indigent registrations, making payment arrangements, addressing water leaks, registration on Siyakhokha.

#### E-Siyakhokha Siyathuthuka

Installation of payment kiosks is in process at eight sites, namely OR Tambo International Airport, Alberton City (Growth Point), Festival Mall (Growth Point), Palm Springs Shopping Centre (Growth Point), Greenstone Mall, Valu Mall Eastrand (Growth Point), Sunward Park Mall (Growth Point) and Emperors Palace.

#### **Debt Collection**

Investigating the possibility of establishing an Internal Debt Collection Centre within the municipality to reduce the usage of external debt collectors.

#### 3.4.3 Ekurhuleni's Strategic Urban Developments

SUDs are large scale urban developments that are of a metropolitan wide strategic nature and is of critical importance in building the City of Ekurhuleni as envisaged in the GDS, IDP, MSDF and CIF. An SUD is typically initiated and led by the private sector or a State Owned Enterprise and typically straddles two or more townships.

There are currently eleven SUDs, namely:

- 1. M&T (Route 21);
- 2. Riverfields;
- 3. Prasa-Gibela:
- 4. Tambo Springs;
- 5. Carnival Junction;
- 6. Glen Gory;
- 7. Leeuwpoort;
- 8. GreenReef;
- 9. O.R. Tambo International Airport Precinct;
- 10. S&J Industrial; and
- 11. Lordsview

The City of Ekurhuleni plays host to a number of projects as highlighted through the National Development Plan and its respective SIP projects, these include PRASAs modernisation program to our very own Aerotropolis programme which forms part of SIP2. These particular projects and other high value developments should by no means be left to generic land-use approval processes which take tedious amounts of time for approvals due to the institutional structure and nature of legal processes. It was hence decided that a special division within the City Planning department will take the lead to drive and facilitate these particular projects to completion in order to ensure that these game changing developments remain within the City of Ekurhuleni

The table below provides a summary of the SUD's.

TABLE 10: EKURHULENI'S STRATEGIC URBAN DEVELOPMENTS

STRATEGIC	DETAIL			
URBAN	<b></b>			
DEVELOPMENT				
M&T DEVELOPMENT	M & T development is regarded as a fully-fledged mixed use development providing for industrial, business, retail and residential opportunities The planning of the Twenty-One Development stretched over a period of more than 8 years and the initial phases of the development has already been implemented.			
	The Twenty-One Development will in unison represent a major new development node within Ekurhuleni. The areas to the east of the R21 is currently in the planning process with Environmental Authorization already having been obtained for this area.			
	The development will act as a catalyst for economic development and job creation within a strategically located position adjacent to the Albertina Sisulu freeway.			
	Progress to date and Future Projects			
	<ul> <li>During this financial year, the following progress has been made:</li> <li>Erf 145 Sterkfontein Ext 6 commenced with construction (Warehouse 2)</li> <li>Witfontein Ext 83-86 is currently been finalised for proclamation; and</li> <li>Future extensions of the development are market dependent and include further logistic and industrial warehouses.</li> </ul>			
RIVER-FIELDS	The Riverfields development is approximately 1900ha in extent and lies at the core of the Albertina Sisulu Corridor. With already R2 billion already invested in close proximity to O.R. Tambo International Airport, the Riverfields node will become a premium destination choice for shopping, residential and logistical land-uses.			
	The current development comprises of the Plumbago Office and Logistics Park which fronts the R21 Albertina Sisulu corridor. Other developments include Gleneagle Residential Estate as well as the upcoming Harvest Square.			
	Progress to date and Future Projects			
	<ul> <li>During this financial year, the following progress has been made:</li> <li>Glenerasmia X29 has been approved which consists of a regional shopping centre.</li> <li>Various townships have been proclaimed which would support the established of Harvest Square located in the development.</li> <li>Plumbago Business and Logistics Park have acquired various multi-national tenants.</li> <li>Future developments include the development of the residential component.</li> </ul>			
PRASA-GIBELA	The Passenger Rail Agency of South Africa (Prasa), in joint venture with Gibela Rail Transport Consortium (Pty) Ltd, has embarked on a refurbishment and replacement campaign in order to transform and modernize all of its current rolling stock. Gibela (61% Alstom owned) has been awarded the contract by PRASA to build and deliver 600 trains to South Africa's Metro Rail network between 2015 and 2025. Prasa-Gibela intends to establish a manufacturing plant for the manufacturing of approximately 3500 train carriages.			
	The project will improve the current state of trains in South Africa and will allow Prasa to provide an excellent service that is safe and secure. Prasa will replace all or part of the current fleet over the next 10 to 15 years.			
	Progress to date and future projects			
TAMPO CODINOC	Construction has commenced at the project site			
TAMBO SPRINGS	The Tambo Springs Inland Port was identified and proposed as the 'Gauteng to Durban' most important inland port. The site in turn forms part of the Gauteng /KZN 2050 programme and has other strategic and beneficial linkages. The project has the support of Transnet who has signed a Memorandum of Understanding (MOU) with the City of Ekurhuleni and the Gauteng Provincial Government.			
	-			

STRATEGIC	DETAIL		
URBAN			
DEVELOPMENT			
	The MOU allows for collaboration and co-operation of all the parties towards the envisaged inland port. The site will be developed as an Intermodal Terminal and associated logistics hub. This will also support the goal of industrial development in Ekurhuleni.		
	Phase 1 consist of 119ha and includes the terminal, warehousing and distribution.		
	Progress to date and future projects		
	<ul> <li>The developer has allocated land (Green Field) next to Thokoza for the relocation of the Thulasizwe Informal Settlement.</li> <li>The draft servitude agreement has been finalised.</li> <li>Specialist environmental studies have commenced on site.</li> </ul>		
CARNIVAL	Carnival Junction is an extensive, large scale mixed use development that is anticipated		
JUNCTION	to develop in phases over the development horizon of 15 to 20 years.  The development forms part of the Greater Carnival Node and comprises of mixed land uses varying from Big Box Retail; Themed Retail; Automotive; Offices; Private Hospital		
	The first phase of this development, Dalpark Ext 19, contains a number of planned commercial uses such as a Makro, a Build-It and Hyundai Dealership that will trigger the installation of services and development of the entire mixed use development.		
	Progress to date and future projects		
	<ul> <li>Makro has been constructed and opened during the 2016/17 financial year</li> <li>Build-It has completed construction.</li> <li>Various other developments are strategically coming online.</li> </ul>		
GLEN GORY	The development will be referred to as the world class node in which it will be incorporating of a regional mall, a lifestyle mall, a value mart centre, big box retailers such as Builders Warehouse and Makro. The mall will also incorporate a Piazza for showcasing of events, concerts and other community festivities as well as an office node consisting of medical suites and offices.		
	The current issues around bulk infrastructure are currently been addressed.		
	Progress to date and future projects The bulk services addendum has served at Council thus resolving the costs of bulk services		
LEEUWPOORT	Ekurhuleni earmarked the land for the development of various densities and level of affordability mixed used and mixed income development in line with the principle of Breaking New Grounds.		
	The development of a mixed residential housing/human settlements development comprising of approximately 16 887 housing opportunities. Planned for implementation over a seven-year period.		
	Progress to date and future projects		
	The Leewupoort Development Project is currently under construction, having commenced with The construction has commenced for bulk electrical infrastructure upgrading of Substation 117 to Reiger Park X 19. The radiation clean-up commenced on the 25th of January 2018.		
	The Gauteng Department of Agriculture and Rural Development (GDARD) granted EIA Authorisation on the 30 November 2017, for both Reiger Park X 19 and Parkdene X 7.		

STRATEGIC	DETAIL		
URBAN DEVELOPMENT			
DEVELOPMENT	Construction of the bulk & link civil infrastructure will commence in March 2018, for Reiger		
	Park X 19. The procurement process of the civil contractors is scheduled to commence in February 2018.		
	Risks • An appeal has been lodged with GDARD against the Authorisation granted for Parkdene X 7. This has delayed the commencement of the construction works in the Parkdene area.		
	<ul> <li>DRD Gold objected to the proposed Sunward Park Xs 24-29 on the basis that they intend to continue with mining activities. The EIA application review has been placed on hold until the mineral rights issues has been solved.</li> </ul>		
	<ul> <li>Objections were received on the proposed Sunward Park Xs 24-29 township applications. The CoE Planning Tribunal has to provide a date for a meeting when these objections will be heard.</li> </ul>		
	Subject to the above appeals and objections be resolved in the next 4 months construction is planned as follows;		
	<ul> <li>Parkdene area: construction with bulk and link services to commence in October 2018</li> </ul>		
	<ul> <li>Reiger Park X 19 is not affected and construction of the top sstructures will commence in August 2018.</li> </ul>		
GREENREEF	GreenReef is an economically inclusive and socially integrated mixed-use/mixed income Innovation District. It is set to transform Ekurhuleni through the development and fusion of a new CBD hub, high-density residential precincts, innovative, knowledge-based, technology and manufacturing industries and state-of the art basic, vocational and tertiary education facilities.		
	GreenReef is centrally located in the centre of Ekurhuleni on the mining belt.		
	Progress to date and future projects		
	<ul> <li>Land has been demarcated for the existing informal settlements located on the development site</li> </ul>		
O.R. TAMBO INTERNATIONAL AIRPORT PRECINCT	The O.R. Tambo International Airport precinct consists of various current and future projects being developed by ACSA as well as other role players such as the Gauteng Growth & Development Agency.		
	The projects mostly comprise of enhancing capacity as well as developing O.R. Tambo International Airport into a more efficient transport hub for southern Africa in line with the Aerotropolis Master Plan. The project site is roughly 1500ha in extent. Future and current projects include the Western Precinct, the Mid-field Passenger and Cargo Terminal, The Gauteng IDZ,		
	Progress to date and future projects		
	<ul> <li>ACSA has embarked on the Airport Master Plan update which is currently going through the relevant approval processes.</li> <li>The airport is currently been phased in order to ascertain the correct sequence for proclamation of the various developments located on the airport especially with regards to the proposed mid field terminals.</li> </ul>		
S&J INDUSTRIAL	The S&J Industrial development consists of old mining land that is currently been rehabilitated into industrial logistical opportunities for the City. Located along the N3 highway in Germiston, the development poses significant developmental opportunities due to the great exposure as well as access to and from key markets and industries in Gauteng.		

STRATEGIC	DETAIL			
URBAN DEVELOPMENT				
DEVELOPMENT				
	The development is currently approved and is in the process of been proclaimed based on market demand.			
	Progress to date and future projects			
	The approved Jupiter X9 is currently being phased.			
LORDSVIEW	Lords View has been planned as an environmentally friendly and eco-sensitive industrial and logistics park and makes use of the latest developments in cleaner greener township development. Lord Trust has taken the decision to service Phases 4, 5 and 8 of the industrial park.			
	This demand is driven by a 22 000sqm distribution center to be developed for the Foschini Group in Phase 8. This development will be owned in a joint venture between the Lord Trust and Equities Property Fund. Provision has also been made for future expansion of 18 000sqm.			
	Progress to date and future projects			
	Various erven are been prepared for the multi-tenanted industrial park.			

# 3.4.4 Siyaqhuba Mayoral Outreach Programme

The Siyaqhuba Mayoral Outreach Programme is part of a drive towards ensuring that service delivery issues are rapidly responded to and more importantly that the people of the City are in close proximity with public representatives. The table below provides a summary of what the Siyaqhuba programme entails.

TABLE 11: SUMMARY OF SIYAQHUBA MAYORAL OUTREACH PROGRAMME

THE PROGRAMME	FOCUS AREAS /AREAS OF INTERVENTION	FREQUENCY	PARTICIPANTS
This is the Executive Mayoral Outreach programme which was introduced at the beginning of the term.  The programme serves as a cohesive, integrated and collaborative network of service response system across the City – a radical approach of improving the quality of life of the residents at a faster pace	directed at:  - Addressing urban management related challenges including roads, water and electricity issues etc.,  - Facilitating the implementation of the identified quick-win projects; and	Every Friday	The Executive Mayor, all MMCs accompanied by the City Manager, Heads of Departments, Divisional Heads as well as Strategic Service Delivery Officials.

# CHAPTER 4: GOVERNANCE AND INSTITUTIONAL ARRANGEMENTS

#### 4.1 Introduction

Local government in South Africa is a key instrument to drive the agenda of the developmental state. The Constitution of the Republic of South Africa, 1996 (hereafter referred to as "the Constitution") is the supreme law of the country and it outlines the objects of local government in Section 152 as follows:

- To provide democratic and accountable government for local communities;
- To ensure the provision of services to communities in a sustainable manner;
- To promote social and economic development;
- To promote a safe and healthy environment; and
- To encourage the involvement of communities and community organizations in the matters of local government.

In order to drive the agenda of the developmental state and to enable the effective achievement of its constitutional mandate; the City of Ekurhuleni adopted the separation of powers governance framework in August 2011. The development and adoption of the governance framework was also as a response to The State of Local Government Overview Report (COGTA, 2009) which identified inadequacies in accountability and poor governance as being one of the challenges facing local government.

The purpose of the governance framework for Ekurhuleni was, in the main, to create independent oversight and accountability mechanism for the effective achievement of the constitutional mandate.

This chapter reflects on Ekurhuleni's governance model with details on the roles and responsibilities of the various role players in the model. The administrative structure or arrangements of the City in terms of the departments and entities is also briefly discussed.

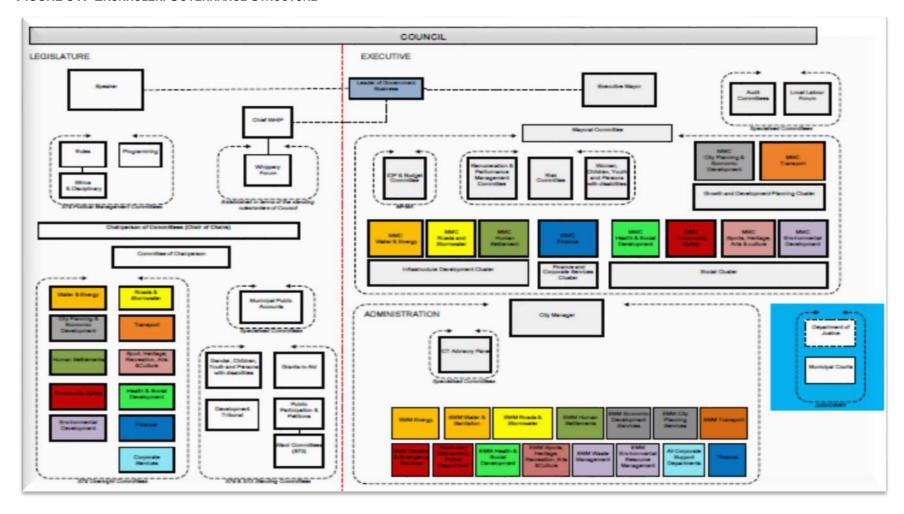

# 4.2 City of Ekurhuleni governance model

In April 2011 the City of Ekurhuleni's Council approved and resolved to implement the separation of powers between its executive and legislative arms of government. This separation of powers was meant to allow for checks and balances to be created in the process of delivering services to the Ekurhuleni community as well as to enable Council to derive the benefits outlined below:

- Increased achievement of the statutory objective of Section 38 of the Municipal Structures Act which provides that a municipality must:
  - "promote a culture of performance management among its political structures, political office bearers and councillors in its administration: and
  - "administer its affairs in an economical, effective, efficient and accountable manner."
- Strengthened role of Council as a legislature and policy maker, enhanced oversight role and improved community participation in local government affairs;
- Improved and meaningful debate on matters that affect the municipality and are reserved for consideration by the Council;
- Strong independent oversight for the effective achievement of the municipal mandate.
- Clear accountability levels, representation and participation through;
  - Clear delineation of powers and functions among the legislature and executive arms,
  - Executive accountability for service delivery and development,
  - Independent and representative oversight by the legislature.

The Separation of powers in Ekurhuleni is implemented by means of a governance framework defining appropriate roles, responsibilities and accountabilities, for political structures and political office bearers as well as for the City Manager and the Municipal Administration. The diagram below illustrates the separation of legislative and executive authority as well as the committee structures and role players.

FIGURE 31: EKURHULENI GOVERNANCE STRUCTURE

The different roles and responsibilities in the governance framework are summarized below:

# 4.3 The Legislature

The legislature is responsible for law making, oversight and public participation. These responsibilities include amongst others:

- developing and adopting policies, plans and strategies; consideration of matters reserved for Council and approval of By-Laws;
- monitoring and reviewing the actions of the executive; proactive interaction with the executive
  and the administration, as well as monitoring of compliance with the constitutional obligations
  by the executive and the administration;
- ensuring participatory governance by building relationships with communities, involving and empowering communities to enable meaningful participation.

The legislature comprises of Council, the Speaker of Council, The Chief Whip of Council, and two sets of Council Committees, namely Section 79 Portfolio Committees and Standing Committees.

Roles and responsibilities of each are discussed below:

#### Council

Council must strive to achieve the objects of local government as depicted in section 152 of the constitution. Council is responsible for the approval of municipal by-laws, the IDP, budget and tariffs. Further, Council, through its various committees, monitors and scrutinizes delivery and outputs as carried out by the Executive. In relation to public participation, Council is tasked with the responsibility of facilitating stakeholder and community participation in the affairs of the municipality through the ward committee system.

Ekurhuleni comprised of 101 wards which have now increased to 112 after the August 2016 Local Government elections. The municipality comprises 202 councillors, consisting of the 112 directly elected ward councillors and 101 proportional representatives elected through political party lists. Each of the 112 ward councillors chairs a ward committee as part of the Ward Participatory System that brings participation to community levels.

Ward councillors play a central role in the communication process between the communities they represent and the municipality, reporting back regularly through ward meetings and assisting the community in identifying needs and priority areas for development which feed into the municipality's planning processes.

#### **Speaker of Council**

The Municipal Structures Act, 117 of 1998 Section 36 (1) requires that each municipal Council elect a Speaker of Council at the first sitting of Council after the local government elections.

Councillor Patricia Kumalo has been re-elected Speaker of Council in Ekurhuleni after the August 2016 Local Government Elections. The Speaker is the head of the Legislative arm of Council and

presides at Council meetings ensuring compliance with the councillor's code of conduct and the Council's rules and orders. Other responsibilities of the Speaker in the City of Ekurhuleni include amongst others; playing a coordination and management role in respect of the oversight and standing committees, evaluating the performance of the committees, and chairing the programming committee; and ensuring functionality of Ward Committees, and effective participatory democracy in the work of Council and its structures.

#### **Chief Whip of Council**

Councilor Jongizizwe Dlabathi was elected Chief Whip of Council after the August 2016 Local Government Elections. The Chief Whip is responsible for, amongst others, maintaining cohesiveness amongst all political parties represented in Council, facilitating the resolution of disputes between political parties and allocating councillors to Legislature Committees in consultation with the whips of other political parties. Other roles of the Chief Whip include working together with the Leader of Government Business and sitting in the programming Committee to make allowance for the presentation of political views at Council.

#### **Chairperson of Committees ("Chair of Chairs")**

The "Chair and Chairs" role is to assist the Speaker by overseeing and coordinating the work of all Council standing and oversight committees, other than those chaired by the Speaker. The functions of the chairperson of committees include amongst others; providing advice to the Chairpersons of Standing Committees and Oversight Committees in performing their independent oversight function, the rules as well as procedures. The "chair of chairs" is also responsible for ensuring that the committee activities are running properly and assisting the Speaker in the evaluation of the Committees. Councillor Nozipho Mabuza is the Chair of Chairs in Ekurhuleni.

#### **Chairpersons of Section 79 and Standing Committees**

The objectives of the oversights and standing committees is to strengthen the role of Council in overseeing the Executive function. The Oversight Committees of Council, established in terms of Section 79 of the Municipal Structures Act, are engines through which Council scrutinizes reports and proposed policies & by-laws from departments; and then report back to Council with recommendations.

The Oversight Committees have an oversight role and will monitor (oversee) the output and performance of the Executive. They also have the power to request departments and MMCs to account on the outputs and performance of their functions. This arrangement supports the separation of legislative and executive powers within the Council. Chairpersons have been appointed to lead and co-ordinate the work of Section 79 Committees. Ekurhuleni had 10 Section 79 Committees; which have been increased to 12 after the August 2016 Local Government Elections.

The Standing Committees of Council are established in terms of sections 73 and 79 of the Municipal Structures Act, or in terms of an enabling power under the Municipal Finance Management Act. In performing their oversight duties over the MMCs and the Heads of

Departments, the Standing and Oversight Committees of Council may require evidence to be submitted in regard to matters within a committees Terms of Reference. The table below outlines Ekurhuleni's Oversight and Standing Committees of Council as well as the chairpersons of the committees as established after the August 2016 Local Government Elections.

## **Programming Committee**

The objective of the programming committee is to assist the Speaker of Council in setting the agenda and programme for Council by considering all inputs and ensuring that it is ready for Council discussion and debate. The programming committee is chaired by the Speaker and consists of the Chief Whip, Chairperson of Committees, other Whips and the Leader of Government Business as its other members.

#### **Political Party Whips**

Party Whips are representatives of all the recognized political parties represented in Council and collectively are called the Multi-party Whippery. The whips are the political managers of their individual parties but also have the responsibility to ensure cross-party co-ordination of the political work of Council. The table below illustrates the political party whips.

**TABLE 14: MULTI-PARTY WHIPPERY** 

Political Party	Whips
African National Congress	Cllr. Jongizizwe Dlabathi Cllr Connie Mashigo Cllr Mbulahehi Makhadi Cllr Godfrey Ngubeni Cllr Ebrahim Motara
Democratic Alliance	Cllr Shaune le Roux Cllr Jackey Reilly

African Independent Congress	Cllr Xokiyana Bulela
Economic Freedom Fighters	Cllr Solly Mkhize
Freedom Front Plus	Cllr Wiebe Schultz
Inkatha Freedom Party	Cllr Alco Ngobese
Independent Ratepayers Association of South Africa	Cllr Izak Berg

#### 4.4 The Executive

The role of the Executive is to execute Council's Mandate by implementing By-Laws, policies, strategies and Council's decisions as well as ensuring that the City operates effectively. Cllr Mzwandile Masina was elected the Executive Mayor of the City of Ekurhuleni after the August 2016 Local Government Elections, and he is responsible for exercising the powers, functions and responsibilities delegated to him by the Council in conjunction with the Mayoral Committee.

The Executive Mayor is at the centre of the system of governance since executive powers are vested in him by the Council to manage the daily affairs of the City. This means that he has overarching strategic and political responsibility. The Legislative arm of Council has oversight over the business of the Executive. The Executive Mayor has the responsibility to appoint a Leader of Government Business and to sub-delegate powers and responsibilities to the Members of the Mayoral Committee (MMCs) who are responsible for monitoring and evaluating the

performance of the Heads of Departments for which they are responsible. Over and above these responsibilities the Executive Mayor also establishes Mayoral Committee Clusters.

#### **Leader of Government Business**

The Leader of Government provides a strategic link between the executive and the legislature. Councillor D Xhakaza Member of the Mayoral Committee responsible for Finance and Economic Development is the leader of government business.

The responsibilities of the leader of government business are:

- Being a communication link between the Executive and the Legislative arm which also includes interaction with the Speaker and Chief Whip
- Acting as a central point of coordination between the Executive and the Legislature
- Responsible to ensure that Executive business is included in the agenda of Council through the Programming Committee
- Liaises with the Speaker when the Speaker intends to call a special meeting of Council outside the normal program for Council
- Liaises with the Speaker for purposes of allocating time for discussion of matters of public importance in the Council agenda, either directly or in the Programming Committee
- Ensures that matters which have to be submitted to the Section 79 Committees and to Council
  are duly processed.

#### **Members of the Mayoral Committee and Mayoral Committee Clusters**

Members of the Mayoral Committee are responsible for ensuring that policy and strategy relating to their functional areas of responsibility are implemented and for monitoring and evaluating the performance of the Heads of Departments for which they are responsible in terms of the powers sub delegated to them by the Executive Mayor.

Mayoral Committee clusters are working groups established by the Executive Mayor to ensure integrated and cooperative response to matter that affect all departments that fall within a particular cluster. The tables below outline the MMCs as well as the Mayoral Clusters.

# OTHER COMMITTEES THAT ASSIST THE EXECUTIVE MAYOR AND THE MAYORAL COMMITTEE

#### **Performance Audit Committee**

The Audit committee serves as an independent governance structure whose function is to play an oversight role regarding the systems of internal control, compliance with legislation, risk management and governance. In executing its duties, the audit committee assists the accounting officer in the effective execution of his/her responsibilities, with the ultimate aim of achieving the organization's objectives. The audit committee must ensure that there is appropriate focus on financial reporting, service delivery reporting and compliance to promote the attainment of desired audit outcomes.

#### **Risk Committee**

The risk committee exists to ensure that the municipality establishes and maintains effective, efficient and transparent systems of financial and risk management, internal control and compliance management; as well as to consider how risk is identified, evaluated and monitored.

## **Budget Steering Committee**

Members of the Budget Steering Committee include the Members of the Mayoral Committee for Finance and Economic Development, Infrastructure Services, Human Settlements, Water Sanitation and Energy, Community Services and Corporate and Shared Services. The Budget Steering Committee is responsible for scrutinizing the annual budget as well as the adjusted budget and making recommendations to the Mayoral Committee.

#### 4.5 Administrative Structure

Day-to-day management and administration of the municipality is carried out by the City Manager and her staff of more than 17 000 employees led by Heads of Department, Divisional Heads, Customer Care Area Managers and operational levels of management.

The City Manager of the City of Ekurhuleni is Dr. Imogen Mashazi, who is the Accounting Officer and head of the municipal administration in terms of the Municipal Systems Act, 32 of 2000. The City Manager is responsible for the efficient and effective management of the affairs of the municipality as outlined in the Municipal Systems Act and the Municipal Finance Management Act. The City Manager, in discharging her duties and in line with the principles of good governance and legislative requirements, has established administrative committees which are as follows:

# Technical Clusters (City Manager Agenda Work Group) and Strategic Management Committee

Strategic Management Committee - (SMT/EXCO) is constituted as the executive management committees of Ekurhuleni. The duties and responsibilities of the members are in addition to those as HODs. The deliberations of the SMT committee do not reduce the individual and collective responsibilities of the City Manager and HODs with regard to their fiduciary or administrative duties and responsibilities, and they must continue to exercise due diligence and good judgment in accordance with their statutory and contractual obligations. In addition to the monthly meetings of the SMT/EXCO, a Joint Operations Committee (JOC) meetings are currently being held on a weekly basis to deal with pressing service delivery issues. The Technical Cluster have been established to consider and provide direction on matters related to; infrastructure services, Social Services and Governance and Economic Development. The table below outlines the chairpersons and members of the technical clusters. The City is in the process of rationalizing its Macro and Top organizational structures and this will have an impact of the technical clusters. Any changes on the technical clusters will be provided in the review of the IDP.

**TABLE 17: EKURHULENI TECHNICAL CLUSTERS** 

COMMITTEE	CHAIRPERSON	MEMBERS
Technical Cluster: Social Services	Vincent Campbell	HOD: Disaster and Emergency Management Services HOD: Health and Social Development HOD: Sports, Recreation, Arts and Culture HOD: Environmental Resource and Waste Management Chief of Police
Technical Cluster: Infrastructure Services	Mark Wilson	HOD: Roads and Storm Water HOD: Energy HOD: Water and Sanitation HOD: Real Estate HOD: Enterprise Project Management Office HOD: City Planning HOD: Human Settlements East Rand Water Care Association Ekurhuleni Housing Company
Technical Cluster: Governance and Economic Development	Gugu Malaza	Group Chief Financial Officer Chief Information Officer Chief Risk Officer HOD: Economic Development HOD: Corporate Legal Services HOD: Human Resource Management and Development HOD: Strategy and Corporate Planning HOD: Internal Audit HOD: Communications and Brand Management HOD: Executive Support HOD: Transport and Fleet Management Brakpan Bus Company

The City's administration is comprised as follows:

#### **City Administration**

The City Manager in Ekurhuleni is responsible for ensuring that the municipality is managed in an effective and efficient manner towards the delivery of services to the Ekurhuleni community. Heads of Departments are responsible for managing the departments that they are responsible for in line with the policies and strategies of the municipality. The table below lists the departments that exist in Ekurhuleni as well as the people responsible for the departments. The municipality has finalized reviewing and rationalizing its Macro and Top organizational structures in order to address the deficiencies in the structures that are have a negative impact on service delivery in Ekurhuleni as outlined below:

- Unclear roles and responsibilities which creates duplication of effort across the City;
- The large number of departments that exists in the approved organizational structure, create silos and hampers coordinated planning and delivery between departments;
- Unclear delegations of authorities/powers which results in a lack of decision making and accountability;
- A high attrition rate and inflexible hiring practices; and
- Long and tedious turnaround times.

It is envisaged that the reviewed and rationalized Macro and Top organizational structures will enable the City to achieve the following:

- Focus on service delivery (and Citizens' needs);
- Focus on strategic priorities (Strategy Enablement);
- Promote accountability;
- Eliminating duplication of functions;
- Implementation of a Shared Services/ Strategic Business Partnering Model;
- · Better and optimal coordination and implementation of dependent processes; and
- Optimal span of control.

Currently, the City has the following top management positions in the Organisational Structure:

**TABLE 18: HEAD OF DEPARTMENTS**

# 4.6 Municipal Entities

Municipal entities are separate legal entities headed by boards of directors, utilized by the municipality to deliver services to its community and are accountable to the municipality. Ekurhuleni has three municipal entities which perform its functions according service delivery agreements. These entities are:

- I. Brakpan Bus Company (BBC);
- II. East Rand Water Care Association (ERWAT); and
- III. Ekurhuleni Housing Company (EHC).

**TABLE 19: EKURHULENI ENTITIES** 

ENTITY	CEO
Brakpan Bus Services (BBC)	Acting: Hamilton Ledwaba
Ekurhuleni Housing Company (EHC)	Morgan Pillay
East Rand Water Care Association (ERWAT)	Tumelo Gopane

The Departments of Transport Planning and Provisioning, Water and Sanitation and Human Settlements respectively have an oversight responsibility over these entities on behalf of the shareholder.

## **CHAPTER 5: INTERGOVERNMENTAL ALIGNMENT**

#### 5.1 Introduction

This chapter focuses on the City of Ekurhuleni's participation and enhancement of relations with other spheres of government in pursuit of integrated planning and sound intergovernmental relations. It reflects on the state of the nation and of the province addresses and articulates Ekurhuleni's alignment with these as reflected on the work of the metro and also enunciated in the State of the City Address. The comments provided by the MEC of Local Government on the IDP 15/16 and Ekurhuleni's response to these is also reflected herein. The City of Ekurhuleni's response is not an attempt to respond to every issue raised by the MEC but rather a high level response to selected key issues. The thrust of the MEC's comments is taken into account in the overall IDP review process. Projects to be implemented by Gauteng Provincial Government departments in the City of Ekurhuleni are part of this Chapter but they are included in the Annexure section of this document.

# 5.2 Intergovernmental relations

Intergovernmental Relations (IGR) refers to complex and interdependent relations amongst the national, provincial and local spheres of government as well the coordination of public policies amongst the three spheres. This essentially means that governance, administrative and fiscal arrangements operating at interface between national, provincial and local governments must be managed to promote the effective delivery of services. These relations between the various spheres of government are guided by the principle of co-operative government as set out in the Constitution and the relevant Act. This is further emphasised in the Municipal Systems Act that states that planning of local government must at all times be integrated and aligned to the planning and strategies of the national and provincial spheres of government.

#### **5.3** National Government outcomes

The national outcomes are discussed extensively in the Chapter 5 of this document and therefore the emphasis here is demonstrating alignment of Ekurhuleni's programmes to the outcomes. The national outcomes were originally approved in 2010 and address the national strategic priorities.

In terms of the national outcomes, municipalities directly contribute to outcomeich speaks to a responsive, accountable, effective and efficient local government system. The National Development Plan (NDP) envisages that by 2030 South Africa will be a state that is capable of playing a developmental and transformative role. In broad terms such a state intervenes to support and guide development in such a way that benefits accrue across society, with particular emphasis on the poor. Drawing from the NDP chapter on a Capable and Developmental State, by 2030 we will have a developmental state that is accountable, focused on citizen's priorities, and capable of delivering high-quality services consistently and sustainably through cooperative governance and participatory democracy.

The alignment of municipal programmes, projects and performance measures to the national outcomes is reflected in Chapter 5, Strategic Context.

### 5.4 State of the Nation Address, 2018

President Cyril Ramaphosa delivered his first State of the Nation (SONA) address to Parliament on Thursday the 15<sup>th</sup> of February 2018. Below are nine key takeouts from SONA, in which he addressed jobs, the economy in general and the questions of land expropriation and free education.

#### A new dawn

The president began by invoking the legacies of Nelson Mandela and Albertina Sisulu to call the nation together under a unified vision.

### Key Highlights

'We should put behind us the era of diminishing trust in public institutions and weakened confidence in leaders. We should put all the negativity that has dogged our country behind us because a new dawn is upon us.'

'We are determined to build a society defined by decency and integrity that does not tolerate the plunder of public resources, nor the theft by corporate criminals of the hard-earned savings of ordinary people.'

### **High levels of inequalities persist**

The president did not ignore the severity of the situation facing the country, and acknowledged that it's both a legacy of apartheid and a failure of the present government.

### **Key Highlights**

'We know that there is still a lot that divides us. We remain a highly unequal society, in which poverty and prosperity are still defined by race and gender. We have been given the responsibility to build a new nation, to confront the injustices of the past and the inequalities of the present. We are called upon to do so under difficult conditions.'

### Strides were made but there is still a lot to be done in key areas

The president briefly overviewed successes of the ANC government in providing social support, public employment programmes and free basic services, but emphasised that there's a lot to do, starting now. He hinted at a tough year ahead as strong action is needed to prevent an economic downgrade and sort out national debt.

### Key Highlights

'Our task, as South Africans, is to seize this moment of hope and renewal, and to work together to ensure that it makes a meaningful difference in the lives of our people.

This year, we will be initiating measures to set the country on a new path of growth, employment and transformation.'

### Jobs are a major focus, so here's the plan of action

The president indicated that jobs for young people are at the centre of the picture, and promised a number of initiatives by government.

### Key Highlights

A 'jobs summit' that will bring together stakeholders from all sectors, that will come up with implementable solutions

Growth to create jobs will be achieved by encouraging investment, starting with an 'investment conference' to attract domestic and international money

The decline of manufacturing (and accompanying job losses) will be halted by localisation of production of various products, and an aim to re-industrialise at scale

A youth employment service will be established to 'place unemployed youth in paid internships across the economy'

A youth working group to engage young people and draw them into conversation with national leadership on how to include them.

### Transformation of the economy

Stimulating the economy will, according to the president, be accompanied by a continued focus on growing black business, particularly woman-owned.

### Key Highlights

'Through measures like preferential procurement and the black industrialists programme, we are developing a new generation of black and women producer.

'We will improve our capacity to support black professionals, deal decisively with companies that resist transformation, use competition policy to open markets up to new black entrants, and invest in the development of businesses in townships and rural areas. Radical economic transformation requires that we fundamentally improve the position of black women and communities in the economy, ensuring that they are owners, managers, producers and financiers.'

### Land expropriation

The subject of land is a critical policy issue and the president highlighted that land expropriation will happen and provided a way forward.

### Key Highlights

'We will accelerate our land redistribution programme, not only to redress a grave historical injustice, but also to bring more producers into the agricultural sector and to make more land available for cultivation. We will pursue a comprehensive approach... that will include the expropriation of land without compensation.'

How it will work is still going to be determined, but the President highlighted that the financial sector will need to come on board to finance investment in agriculture and land redistribution.

### Free higher education (for the poor)

The president responded to former President Zuma's announcement of free higher education, and indicated that implementation will start this year.

### **Key Highlights**

'Starting this year, free higher education and training will be available to first year students from households with a gross combined annual income of up to R350 000.'

### There will be some changes in government

The President indicated that there will be changes to the size and shape of the government, that state-owned enterprises (like ESKOM and SAA) will undergo a clean-up, and that key institutions like the NPA and SARS will be strengthened.

### Key highlights

The government: 'It is critical that the structure and size of the state is optimally suited to meet the needs of the people and ensure the most efficient allocation of public resources. We will therefore initiate a process to review the configuration, number and size of national government departments.'

SOEs: There will be an intervention, and a clean-up (he specifically referred to improved auditing), and board members will not be involved in procuring.

A general clean-up: 'This is the year in which we will turn the tide of corruption in our public institutions.'

### Private-sector corruption will also be addressed

In the wake of the McKinsey and Steinhoff scandals, he made sure to address corruption in all areas (not only the government).

### **Key Highlights**

'We must fight corruption, fraud and collusion in the private sector with the same purpose and intensity...We will make sure that we deal with both in an effective manner.'

### 5.5 State of the Province Address, 2018

The State of the Province Address was delivered by Premier David Makhura on Monday the 26th of February 2018 to the set the tone for the province's programme of action.

The following are the top ten highlights of the speech:

- More than R10bn in public and private investments is to go towards the rejuvenation of the Johannesburg CBD.
- The old townships of Klipspruit and Alexandra are to be revitalised.
- 140 000 housing units will be built in Lion Park, Diepsloot East, Fleurhof, Cosmo City, Malibongwe Ridge and Goud Rand.
- R71bn will go towards the construction of Waterfall City, the largest city to be built in post-apartheid South Africa. The project is expected to create 100 000 jobs.
- The Rea Vaya Bus Rapid Transit system will be expanded to other areas at a cost of R2bn.
- Lanseria Airport is to receive a R500m facelift, funded by the private sector.

- The Africa Gateway to be constructed in the heart of Centurion will comprise a convention centre, a hotel, commercial office space. The new UN offices will be based there.
- The City of Tshwane is to invest R525m in a business process outsourcing park in Hammanskraal to offer training and technical support to small businesses.
- Some government vehicles will be repaired by township-based enterprises at selected repair hubs.
- Rooftop solar panels will be installed on all government buildings. With 8 million square metres of rooftop space available, it's estimated this will generate 300 to 500 megawatts of power.

### 5.6 National Budget Speech 2018

The National Budget Speech was tabled on Wednesday 21 February 2018 by the Finance Minister Malusi Gigaba. Minister Gigaba in his speech indicated that this would be a tough but hopeful budget focused on rebuilding and restoration. He also added that the economic indicators have improved since his mini-budget speech in October last year. One of the biggest changes in this year's budget is the 1% Value Added Tax (VAT) increase. This rate has been the same since 1993 and Gigaba indicated that it is still a low rate compared to some of South Africa's peers. An additional R36bn of tax will be generated this year with a 3% increase in income tax. The price of fuel will also increase by 52c/litre and social grants received a 7% average increase. The highlights of the speech can be summarised as follows:

- Following a difficult year for the economy and fiscus, a renewed sense of optimism has taken hold. The 2018 Budget outlines a series of measures to rebuild economic confidence and return the public finances to a sustainable path.
- The budget responds to revenue shortfalls presented in the 2017 Medium Term Budget Policy Statement (MTBPS), and the announcement of fee-free higher education and training. Budget 2018 also accelerates government's efforts to narrow the budget deficit and stabilise debt
- New tax measures raise an additional R36 billion in 2018/19, mainly through a higher VAT rate and below-inflation adjustments to personal income tax brackets.
- The expenditure ceiling is revised down marginally over the next three years compared to the MTBPS. Underlying this change are major reductions and reallocations including: spending cuts amounting to R85 billion, an allocation of R57 billion for fee-free higher education, and additions to the contingency reserve of R10 billion.
- Together with an improved growth outlook, the revenue and spending measures reduce the consolidated deficit from 4.3 per cent of GDP in the current year, to 3.5 per cent by 2020/21.
   The main budget primary deficit closes, helping to stabilise debt at 56.2 per cent of GDP in 2022/23.
- Risks to the public finances include an uncertain growth outlook, wage pressures, and the weak finances of state-owned companies

# 2018 BUDGET HIGHLIGHTS

#### **BUDGET FRAMEWORK**

- The budget defact is projected to narrow from 4.3 per cent of 6DP in 2017/18 to 3.5 per cent in 2620/21.
- Main budget non-interest expenditure is projected to remain stable at 26.6 per cent of GDP between 2017/18 and 2020/21.
- . Not debt is expected to stabilise at 53.2 per cent of GDP in 2023/24.
- Proposed tax measures will raise an additional \$36 billion in 2018/19.
- The fiscal framework reflects two major changes that followed the 2017 MTBPS; mediumterm expendituse cuts identified by a Cabinet subcommittee amounting to RBS billion, and an additional allocation of RS7 billion for free-free-higher education and training.
- Contingency reserves have been revised upwards to R26 billion over the next three years.
- Real growth in non-interest expenditure will average 1.8 per cent over the next three years. Post-school education and training is the fastest-growing category.

#### MACROECONOMIC OUTLOOK - SUMMARY

	2017	2018	2019	2020
Percentage change	Estimate	Forecast		
Household consumption	13	1.7	1.9	2.3
Gross fixed - capital formation	0.3	1.9	3.3	3.7
Exports	15	3.8	3.4	3.5
Imports	2.7	4.4	4.6	4.5

CPI inflation	5.3	53	5.4	5,5
Current account balance (% of GDP)	-22	-23	-2.7	-3.2

#### **SPENDING PROGRAMMES**

#### Over the next three years, government will spend:

- . RS28.4 billion on social grants.
- In total, R324 billion is provided for higher education and training, including R57 billion of new allocations for fee-free higher education and training.
- R792 billion on basic education, including R35 billion for infrastructure, and R15.3 billion for learner and treacher support materials, including KT.
- R667.8 hillion on health, with R66.4 billion on the HIV, AIDS and TB conditional grant.
- · R123.3 billion on subsidised public housing.
- RT25.8 billion on water infrastructure and services.
- R207.4 billion on transfers of the local government equitable share to provide basic services to poor households.
- R129.2 billion to support affordable public transport.

#### CONSOLIDATED GOVERNMENT FISCAL FRAMEWORK

	2017/18	201A/19	2019/20	2020/21
Il billion/percentage of GDP	Revised estimate	Mediur	n-term estim	ates
Revenue	1 353.6	1 490.7	1 609.7	1 736.9
Percentage of GDP	28.8%	29.7%	29.9%	29.9%
Expenditure	1 558.0	1 671.2	1.803,0	1 941.9
Percentage of GDP	33.2%	33.3%	32.4%	33,4%
Budget balance	-204.3	-180.5	-193.3	-205.0
Percentage of GDP	4.3%	-3.6%	3.6%	-3.5%
Gross domestic product	4699.4	5.025.4	5.390.7	5.808.3

### **TAX PROPOSALS**

#### In 2018/19:

- . The VAT rate will increase from 14 to 15 per cent from 1 April 2018.
- R6.8 billion will be raised from partial relief for bracket creep.
- Increases in the general fuel levy and alcohol and tobocco excise duties will together raise revenue of R2.6 billion. Ad valorem excise duties for hunary goods, such as motor vehicles, will be increased.
- . Estates above R30 million will now be taxed at a rate of 25 per cent.
- The plastic bag lesy, motor relicit emissions tar and the lesy on incandescent light boths will be raised to promote eco-friendly choices. A health promotion levy, which taxes sugary beverages, will be implemented from 1 April 2018.

#### CONSOLIDATED GOVERNMENT EXPENDITURE BY FUNCTION, 2017/18 - 2020/21

### 5.7 Comments received from the MEC

Comments received from the MEC for the Department of Cooperative Governance and Traditional Affairs on the City of Ekurhuleni's 2017/18 reviewed Integrated Development Plan.

The Municipal Systems Act compels the MEC responsible for Local Government to evaluate the municipal IDPs on an annual basis and provide comments thereon to enhance intergovernmental relations and alignment to improve service delivery. MEC Paul Mashatile commended the municipality for taking various initiatives aimed at promoting the linkages between IDPs and strategic pathways of the other two Spheres. The rest of the MEC comments are captured in the table below accompanied by the City's responses.

**TABLE 20: MEC COMMENTS** 

MEC COMMENTS		COE comments
SPATIAL DEVELOPMENT PLANNING	Policy Alignment and integration: it is important that the Integrated Development Plan and Spatial Development Framework sections of the document should appropriately respond to the following key policies and plans; Gauteng Spatial Development Framework 2030 approved in 2016, Gauteng Provincial Environment Management Framework, 2014; 25-Year Gauteng Integrated Transport Master Plan (25-GITMP); Gauteng City Region Integrated Infrastructure Master plan (GCR IIMP); and Gauteng Economic Development Plan, 2017. Moreover, an alignment to integrated Urban Development Framework to be clearly articulated in IDP.	The City will through the recviewing of the MSDF ensure that the SDF responds and alighns to the plans and policies gughlighted in the finding. The IDP has been reviewed to ensure that it reflects an alignment of City wide plans to the IUDF.
SPATIAL DEVELOPMENT PLANNING	There is a clear link between spatial prioritization and budgeting which is also echoed in the respective draft BEPP, this is commended. Ongoing support should be provided to the municipality as part of the implementation of the Gauteng Spatial Development Framework 2030em by the Gauteng Planning Division (GDP) to align with Provincial spatial planning as per the prescripts of the Spatial Planning and Land Use Management (COE) should also embark on cooperative effort to map provincial capital spending into the CP3 capital prioritization platform utilized by COE.	The City notes the finding.
SPATIAL DEVELOPMENT PLANNING	Capitalizing on Proximity: the SDF demonstrate commitment to move from a low destiny private, transport dominated and dispersed urban structure to a public transport oriented higher density compact urban structure where freedom of choice exist as related to transport modes, housing typologies and proximity to job and recreation opportunities. It is recommended that City's SDF be expanded on the development of	The City notes the finding.

MEC COMMENTS		COE comments
	Regional Spatial Development Frameworks (RSDFs) that provide an interpretation of integration opportunities for public transport routes with neighboring municipalities.	
SPATIAL DEVELOPMENT PLANNING	The strategic movement links with City of Tshwane and City of Joburg have been identified and prioritized. Public transport traversing municipal boundaries is acknowledged as far as it is relating to rail. The integration of Bus Rapid (BRT) routes as part of expansions across municipal boundaries is however not clear. BRT integration should be reflected across municipal boundaries. The municipal can consider addressing the abovesaid in RSDFs in terms of COEs Integrated Rapid Public Transport Network (IRPTN)	The City notes the finding. The City intends on engaging in discussions through various planning platfroms to ensure the integration of efforts with neighbouring City's in order to ensure that the vision of the GCR is achieved through collaboration.
SPATIAL DEVELOPMENT PLANNING	Creating a Viable and Productive Hinterland: Linkages with peripheral tourism opportunities are not identified. Some of the lower order nodes have however been identified to hold cultural and eco-tourism opportunity, albeit the required linkages to these have not been identified or prioritized. The location of the OR Tambo International Airport may have particular integrative tourism opportunities in the GCR context, therefore it is important to identify tourism opportunities and support these with appropriate linkage.	The Aerotropolis Master Plan was approved by Council on the 26th of October 2017 and is ready for implementation. The purpose of the master plan is to explore interventions that leverage the economic benefits of having the busiest airport on the African continent, the OR Tambo International Airport, located within Ekurhuleni's boundaries. Given that the OR Tambo International Airport resides within its municipal jurisdiction, the City of Ekurhuleni and the GPG need to plan accordingly for any development related to this asset, to unlock its value proposition and position the region as a globally competitive one. This would also ensure that tourism spin offs are realised as a result of economic outputs.
FINANCIAL VIABILITY	The COE has no cash shortages as it has opened the 2016/17 with a positive balance of 7.9 Billion, this is commended. The municipality is encouraged to increase its revenue collection to boost the cash at hand at the end of the year.	The City notes the finding.
FINANCIAL VIABILITY	The total outstanding debt of the COE as at 31 May 2017 is at R13 Billion which the real concern is considering the stage of the financial year at which the municipality is at. Out of the total debt, households and commercial owes the municipality R9.7 Billion and R3, 1 Billion respectively. The other debtors are at R166 Million and government institution owes the municipality R163 Million. Both National Treasury and the COE has the responsibility to make ensure collection on debtors of the municipality. The COE has budgeted for borrowing to subsidize capital funding. The Municipality in the 2016/17 budgeted for R1.8 Billion and the 2017/18 budget year indicates a borrowing budget of R3, 2 Billion.	The City notes the finding.

MEC COMMENTS		COE comments
FINANCIAL VIABILITY	It is however noted that the COE in the 2015/16 closed with the cash at hand of R7. 9 Billion. But still indicates a borrowing of R1.8 Billion and internally generated revenue of R1.4 Billion. The internally generated revenue budget should be increased considering the cash at hand that the municipality has at the end of the financial year. The municipality should also reduce its borrowing as they are on continuous increase and instead used the cash at hand to increase the funding capital objects.	The City notes the finding.
FINANCIAL VIABILITY	The municipality has over budgeted for electricity tariffs which is at 7 percent increase against NERSA stipulation that municipality should increase with 1.88 percent. The municipality might struggle to collect as the increase is above inflation rate. The municipality has also under budgeted for water services, Rand Water indicates that municipalities should increase by 10, 2 percent and the municipalities has increased by 9%. This might result in low collection. The municipality must budget in line with the stipulations of institutions responsible for electricity and water services.	The City notes the finding. Electricity tariff increases are subject to the final increases from Eskom. The City has proposed a hike of about *% for the 2018/2019 financial year.  The City has proposed a 12.96% increase for water sales. The factors considered for the proposed tariff increase include the following:  DWS Raw water abstraction costs – this includes the pumping of untreated water from the Sterkfontein Dam (source) to the Vaal River System and the treatment of AMD (acid mine drainage)  TCTA raw water charge – this talks to the Augmentation Scheme – Lesotho Highlands Water Project (Phase 2) Chemical costs – water treatment and purification to drinking water standards as per SANS 241  Energy Costs – pumping purified water from the Rand Water Plants into the municipal reservoirs/towers  Labour costs  Inflation  Other expenses (Asset Replacement Value, Operations and Maintenance costs)
SERVICE DELIVERY AND INFUSTRUCTURE	Allocation for infrastructure repairs and maintenance: The City's budget allocation to repairs and maintenance is below the standard norm as indicated in National Treasury Circular 71. The projection is however on an upward slope for the past audited years to the current budget year and over the MTREF. The 2016/17 budget is 6.1% and projected at 6.7% over the MRREF. Thus, for the City to safeguards its assets, it should project for	In terms of National Treasury's Circular, no 71, Council needs to ensure that budget provision for repairs and maintenance amounts to 8% of the total value of the Property, Plant and Equipment (Assets).  As per mSCOA classification the internal repairs and maintenance should be excluded from the percentage calculation as they are regarded as secondary costs.

MEC COMMENTS	COE comments
repairs and maintenance at 8% as indicated by the National Treasury circulars.  It has been observed that the COE has the following key positions occupied Mayor, City Manager, Chief Financial Officer, Chief Audit Executive and Chief Risk Officer. However, the Chief Operations Officer position is vacant and not indicated when it will be filled. Since this is the key position with direct implications to serve delivery, it is important that the municipality expedite the process of filling the fore-said vacant position.	It was not possible to increase the R&M budget to the standard of 8% of PPE unless substantial tariff increases were proposed.  However, R&M will always remain a priority to be addressed in the annual budget.  The position of Chief Operaions Officer has been filled.

Projects to be implemented in Ekurhuleni by the provincial government departments are reflected in the Annexure section of this document.

## CHAPTER 6: COMMUNITY AND STAKEHOLDER PARTICIPATION

### 6.1 IDP planning process for 2017/18: ward consultations

### 6.1.1 Introduction

This chapter provides an outline of the legislative framework guiding community and stakeholder involvement in the IDP planning process. It also discusses processes followed especially the outreach activities that were part of reviewing the draft 2017/18 IDP. Lastly it provides, in listed fashion, the ward priorities as gathered from the different consultation meetings in the Annexure section of the document.

### 6.1.2 Legislative framework

Legislatively, it is the South African Constitution of 1996, the Municipal Structures Act of 1998 and the Municipal Systems Act of 2000 that provide guidance on processes to be followed by municipalities in the development of the IDP. In particular, the Municipal Systems Act takes its cue from the principles contained in the Constitution on participatory democracy. The Constitution enjoins municipalities to encourage participation by communities and community organizations in local government. Among the basic values and principles, the Constitution espouses for public administration governance is responsiveness to community needs and public participation in policy making. Section 34 of the Municipal System Act prescribes annual review and amendment of the IDP in accordance with certain processes. Section 29 (1) (b) of Chapter 5 of the Municipal Systems Act of 2000 states that municipalities, through appropriate mechanisms, processes and procedures established in terms of public participation; allow for communities to be consulted on their development needs and priorities; and the local community should participate in the drafting of the IDP.

### 6.1.3 Ekurhuleni's public participation framework and approach

To give effect to the Constitution and legislation, Ekurhuleni formulated its own Public Participation Policy and Engagement Framework. In the policy the municipality commits itself to co-implementing formal representative government with a system of participatory governance. It recognizes the municipalities' obligation to establish mechanisms, processes and procedures for participation of the local community in its affairs. Further to this it outlines the mechanisms by which the public may participate in the municipalities' affairs.

The policy notes the active public participation of citizens at four levels as voters, citizens, consumers and organized partners. Drawing from legislation, it spells out the roles of different actors in promoting public participation. These actors include the Speaker, the Executive Mayor, the Ward Councillor, and Ward Committees, the Municipal Manager, the Community and the individual. In terms of mechanisms, the policy recognizes the different levels of public participation such as informing, consulting, collaborating and empowering. Meetings of the municipality on the

IDP are mentioned in the policy as an example of participating at the level of consultation. The policy spells out the manner in which communities ought to be informed of municipal affairs such as letting it know timeously of public participation events and doing this in a language the communities can understand including providing them with a channel for written responses where necessary. Lastly the policy mentions the different tools of public participation applicable to different stakeholder forums. Ekurhuleni Metropolitan Municipality has adopted the Ward Committees system which have been designed to assist Ward Councilors with the facilitation and coordination of engagements between the City and its communities.

As it is currently the case, the term of office of the ward committees lapsed with the previous term of Council and the ward committees for the current term have not yet been elected; thus placing total reliance on Ward Councilors to facilitate engagements with communities until such time that all ward committees have being established and are functional. Working sessions with all Ward Councilors were scheduled to take place after consultations with their respective wards and these sessions were held per CCA and they focused on the following:

- A presentation of Ekurhuleni's Public Consultation Process for the IDP and Budget;
- Basic feedback on the past IDP / Budget Process comments and process;
- Discussion of 5 ward Priorities of the old ward and align them to the new ward; and
- Signing off and submission of community needs per ward.

### 6.2 Ward Priorities

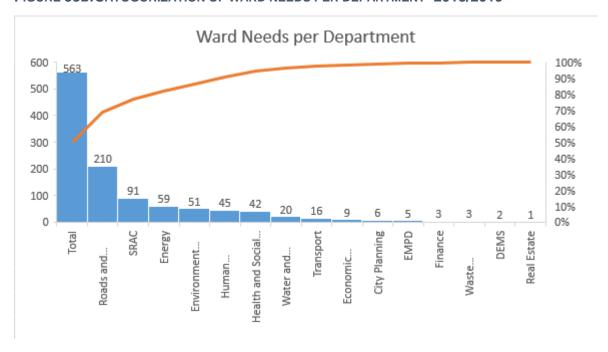

Consultation meetings were held in 17 Customer Care Areas (CCAs) between the 05 and the 14<sup>th</sup> of September 2017 where all the Ward Councilors and ward committee members of the one hundred and twelve (112) wards comprising the Ekurhuleni Metropolitan Council were engaged in order to reprioritize and/or confirm ward priority needs identified during 2016/2017. The meetings were held as follows:

FIGURE 35A: SCHEDULE OF MEETINGS

Date	CCA	Proposed Venues	Ward Numbers	Time
5 September 2017	Tsakane	Faranani Multipurpose Hall	81,82,83,84,85,99,112	17:00
5 September 2017	Germiston	Dinwiddie Hall	21, 35,36, 39, 41, 42 92, 93	17:00
5 September 2017	Edenvale	Sam Hlalele Hall	10,11,12,18,19,20, 92	17:00
6 September 2017	Etwatwa	Etwatwa CCC Boardroom	26,65,66,67, 109	17:00
6 September 2017	Alberton	Conference Room, Alberton Civic Centre Groud floor	37,38,53,58,94,106	17:00
6 September 2017	Springs	Supper Hall	72.74.75.76	17:00
7 September 2017	Boksburg	Boksburg Civic Hall	22, 23, 32, 33, 34, 43	17:00
7 September 2017	Kempton Park	Kempton Park Council Chamber	13,15,16,17,25,91,104	17:00
7 September 2017	Nigel/Duduza	Duduza Multi-purpose centre	88,111, 86, 87 ,98	17:00
12 September 2017	Vosloorus	Civic Hall Vosloorus	44; 45; 46; 47; 64; 95, 107	17:00
12 September 2017	Kwathema	Kwathema CCC Boardroom	74,77,78,79,80,81	17:00
12 September 2017	Benoni	Benoni Council Chamber	24,27,28,29,30,73 ,110	17:00
13 September 2017	Daveyton	Marivate Hall	68, 69, 70, 71, 96	17:00
13 September 2017	Thokoza	Thokoza Youth Centre	52,54,56 & 57	17:00
13 September 2017	Brakpan	Brakpan 3rd Hall, Brakpan Civic Centre	31, 97, 105	17:00
14 September 2017	Tembisa 1 & 2	Rabasotho Hall	1,2,3,7,89,100,102, 4,5,6,8,9,14 ,90	17:00
14 September 2017	Katlehong 1& 2	Tsholo Hall	40,48,49, 50, 51, 55, 107,59, 60, 61, 62, 63, 101, 103 108	17:00

During these meetings all the wards submitted five (5) developmental priorities per ward which resulted to a total of 560 ward priorities within local government competence which was collected for the 2018/ 2019 Financial Year are attached hereto as Annexure 1.

FIGURE 33B: CATOGORIZATION OF WARD NEEDS PER DEPARTMENT -2018/2019

The figure below presents ward priorities in the 2017/ 2018 Financial Year with an intention of enabling analytic comparison between the 2017/ 18 and 2018/19 ward priority issues.

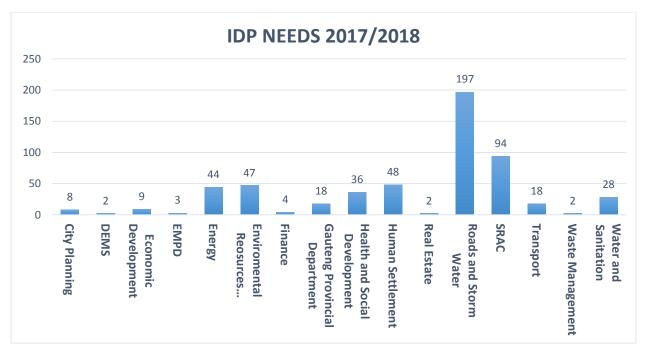

FIGURE 34: CATOGORIZATION OF WARD NEEDS PER DEPARTMENT -2017/2018

The ward priorities per department for the 17/18 financial year are very consistent to the ward priorities of the 2018/2019 financial year with issues related to the Roads and Storm water; Sports, Recreation, Arts and Culture (SRAC); Human Settlements; Energy; Parks and Cemeteries taking priority in most wards.

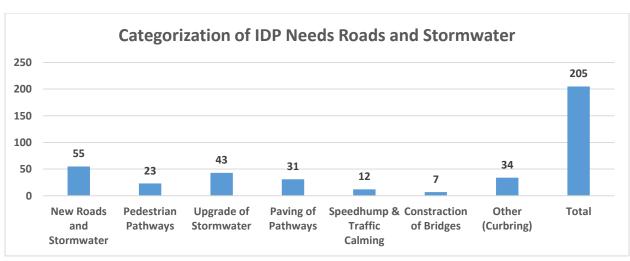

FIGURE 35: FURTHER CLASSIFICATION OF NEEDS 2018/2019

Two hundred and five (205) of the five hundred and sixty (560) priority issues, approximately 37%, were addressed to the Roads and Storm Water Department. The construction of new roads and storm water drainage, upgrade of storm water drainage, construction of pedestrian pathways, paving of pathways as well as the construction of speed humps were the major issues that dominated ward needs with respect to Roads and Storm water.

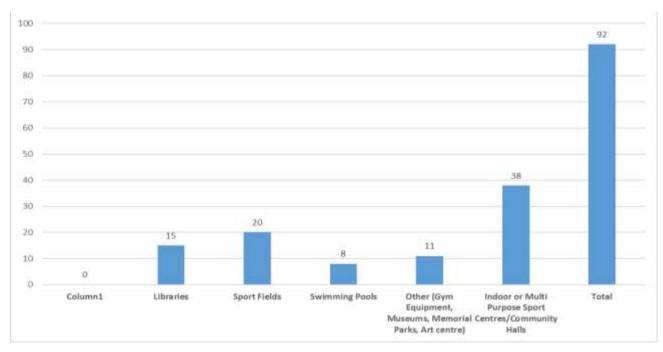

FIGURE 36: CATEGORIZATION OF SRAC NEEDS

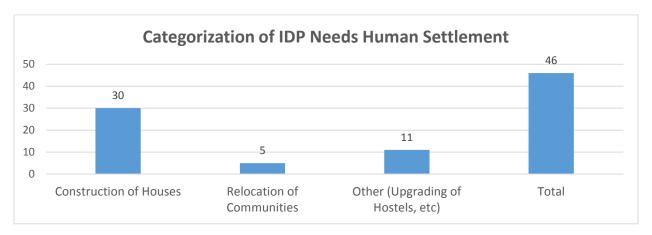

FIGURE 38: CATEGORIZATION OF HEALTH AND SOCIAL DEVELOPMENT NEEDS

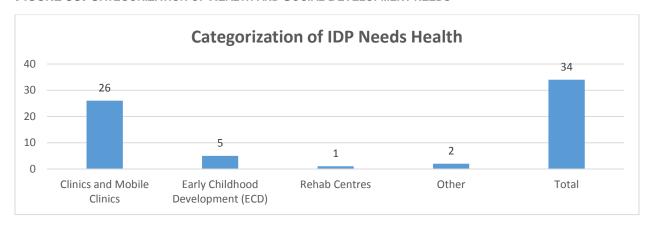

FIGURE 39: CATEGORIZATION OF ENERGY NEEDS

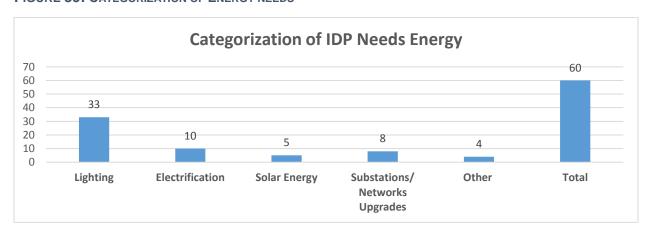

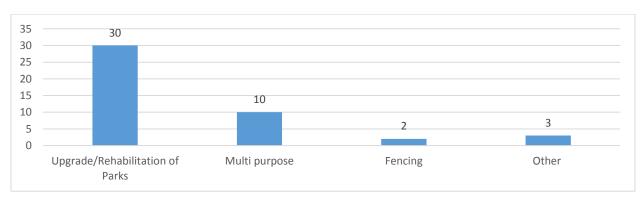

FIGURE 42: CATEGORIZATION OF PARKS AND CEMETERIES NEEDS

### **Ward Needs referred to the Gauteng Provincial Government**

COE consciously decided prior to the latest review that the 5 priorities per ward should all be local government competences. A column was created in the review documentation to enable ward Councilors and their ward committees to separately indicate ward needs outside local government competence and had to be attended by the Provincial or National government.

One hundred and forty-four (144) needs from 112 wards were directed to the Gauteng Provincial Government.

The needs are as listed below:

TABLE 21: COMMUNITY NEEDS FORWARDED TO PROVINCE

Ward	Customor	Driggity Mood
Number	Customer Care Area	Priority Need
1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	Tembisa 2	Request for a Primary school at Clayville Ext 26
1	Tembisa 2	Request for traffic lights at K111 road (Provincial road)
1	Tembisa 2	Request for traffic signs and speed humps at K111 (Provincial road) outside
		Tswelopele Ext 8

### 6.3 Budget's Response to Wards Priorities

### 6.3.1 Summary of response to IDP ward priorities

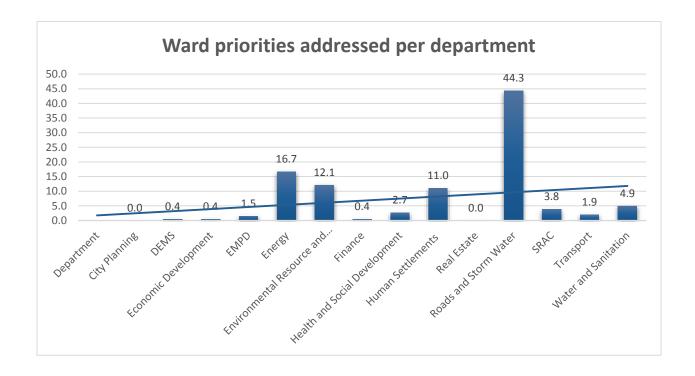

As reflected above a total of 560 IDP ward priorities were received from the Ekurhuleni community in September 2017 as part of the 2018/2019 IDP review process. The 560 priorities represent the 5 priorities per ward for the 112 wards in Ekurhuleni. The table below indicates the number of priorities that will be addressed in the MTREF (2018/2019 to 2020/2021).

**TABLE 22: RESPONSE TO IDP WARD PRIORITIES** 

NUMBER OF PRIORITIES RECEIVED	560
Number of priorities to be addressed in 2018-2021 (MTREF)	266
Number of priorities not addressed in 2018-2021 (MTREF)	294

A total of 266 (48% of the 560 needs) IDP ward needs will be addressed in the MTREF (2018/2021)) and 294 (52% of the 560 needs) are non-committal from departments in terms of their implementation in the MTREF. 265 IDP ward priorities will be addressed in the 2018-2021 MTREF. The graph below provides an indication of ward needs addressed per department.

On a nigh level, the Energy Department will address a total of 16.7% of the needs The priorities to be addressed by the Energy Department include the electrification of informal settlements, street lights and high mast lights; network enhancements and protective structures for boxes amongst others.

The Roads and Storm Water Department will address 44,3% of the needs through the upgrading the construction of roads and storm water systems, paving of sidewalks, and construction of speed humps, pedestrian bridges as well as bicycle lanes.

4,9 % of the needs will be addressed by the Water and Sanitation Department with projects such as the upgrading the development of sewer and water networks and the provision of basic services to informal settlements.

12,1% priorities will be addressed by Environmental Resource Management and includes the development and upgrading of the various categories of parks as well as wetlands. Human settlements will address 11% of the priorities which include amongst others; housing development, land for human settlements, title deeds, basic services for informal settlements, formalization of informal settlements and relocations.

The Sports Recreation Arts and Culture Department will develop and upgrade sports grounds and stadia, swimming pools, libraries, tennis courts, auditoriums and a youth centre and this will contribute to addressing 3,8% of the priorities

## CHAPTER 7: MUNICIPAL SPATIAL DEVELOPMENT FRAMEWORK

### 7.1 Executive Summary

#### 7.1.1 Introduction

South African cities are all searching for a more just spatial development model whereby the imbalances of the past can be eradicated and the demand of modern sustainable city building can be met. In this process of urban transformation one has to move from a low density, private transport dominated and dispersed urban structure that has been developed over many years to a public transport oriented higher density compact urban structure where high levels of safety and freedom of choice exist as related to transport modes, housing typologies and proximity to job and recreation opportunities. This Metropolitan Spatial Development Framework (MSDF) must be viewed as first step towards guiding future spatial development in Ekurhuleni to achieve a more sustainable metropolitan city structure, which can lead economic and social development in Gauteng.

### 7.1.2 Background

The review of the Ekurhuleni Metropolitan Spatial Development Framework (EMSDF) was done against the legislative backdrop of the local government Municipal Systems Act (MSA), 32 of 2000 and the Spatial Planning and Land Use Management Act (SPLUMA) 16 of 2013. Policies that guided this planning process indicate inter alia the National Development Plan (NDP), the Gauteng Employment, Growth and Development Strategy, the Ten Pillar Programme, the Gauteng Spatial Development Strategy and the Ekurhuleni Growth and Development Strategy. The normative principles as described in the NDP encompass the spirit within which this plan was prepared and in this vein can be described as the guiding principles for the compilation of the EMSDF. These principles are:

- Spatial Justice.
- Spatial Sustainability.
- Spatial Resilience.
- Spatial Quality.
- Spatial Efficiency.

### 7.2 Contents and process

### 7.2.1 Contents of the MSDF

The MSDF contains the following sections:

- Section A, which includes the contextual perspective of the legislative framework within which the EMSDF was done.
- Section B is a comprehensive status quo analysis of the physical, social, economic and institutional sectors.
- Section C comprises the spatial development framework, which also includes development guidelines and implementation strategy with catalytic interventions.

### 7.2.2 Process for developing the MSDF

The process followed was ongoing throughout the planning period and is summarized in the following diagram.

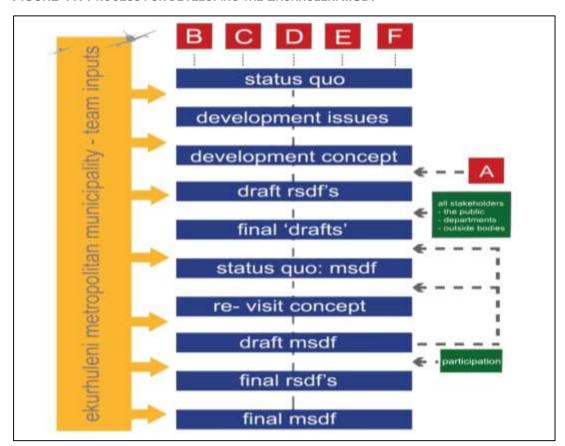

FIGURE 41: PROCESS FOR DEVELOPING THE EKURHULENI MSDF

### 7.2.3 Status Quo findings (spatial)

The main findings from the status quo analysis include the following:

- Ekurhuleni is well placed to accommodate future regional growth in view of the growth patterns in Gauteng and the role of the future growth of the Aerotropolis.
- The urban footprint is dispersed with the related pressures on service delivery and transport systems.
- The traditional core areas (CBDs) are unable to provide the needs of the growing residential areas of the south, south-west and east.
- The agricultural areas of the metro appear to have significant development potential in support of the Aerotropolis and should as such be protected and developed.
- The well-established transport routes, being rail, road and air.
- The transport system including rail, road and air, is well developed and remains a strong resource to attract and accommodate future development.
- The extensive open space system within the metropolitan area should be protected and developed to support the future densified urban structure.
- Water, sewer and electrical services all need expansion, specifically in the north-eastern and southern sectors of the metro.

In addition to the above, the main influencing factors, which were taken from the Status Quo Analysis, are indicated in the following table.

FIGURE 42: INFLUENCING FACTORS FROM THE STATUS QUO

INFLUENCING FACTORS				
GROWTH AND DEVELOPMENT STRATEGY	HUMAN SETTLEMENTS			
Re-urbanize	Mega housing projects			
Re-industrialize	Informal settlements			
Re-generate	Backyard shacks			
Re-mobilize	Housing backlog			
Re-govern				
PLANNING PROCESS	AEROTROPOLIS			
Fragmented urban structure	Multi-core districts			
Metropolitan identity	Areas of influence			
Peripheral urban development	Research and manufacturing			
Nodal transition	Creative cluster			
Large open spaces and agriculture	Agri-business			
Regional opportunities	Logistics			
National focus – air, rail	Mixed use infill			
Strategic land parcels				
ENVIRONMENT	TRANSPORT			

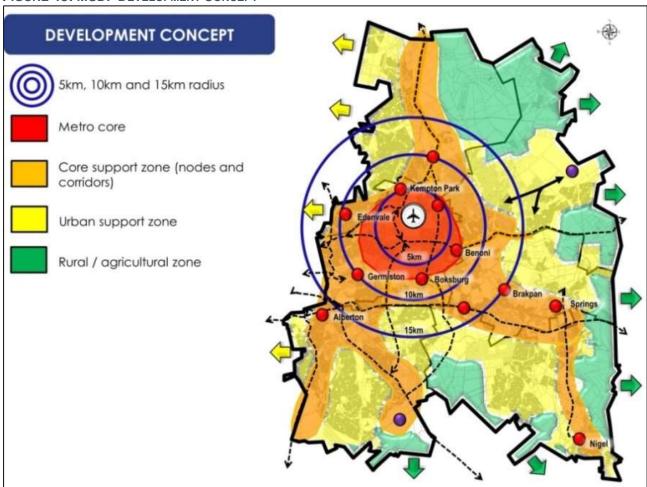

- Gauteng Environmental Framework
- Gauteng Department of Agriculture and Rural Development
- Ekurhuleni Bio-Regional Plan
- Ekurhuleni Environmental Management Framework
- Ekurhuleni Biodiversity and Open Space Strategy (EBOSS)
- Agricultural potential

- Good rail network
- Road based development
- Dedicated freight routes
- Freight hubs
- Functional public transport
- Gautrain
- Aerotropolis
- Regional airports
- Pedestrianisation
- Transit oriented development

### 7.2.4 Metropolitan Spatial Development Concepts (MSDC)

The MSDC that now guides the MSDF builds on the existing concept in that it suggests a strengthening and expansion of the core triangle between Kempton Park, Germiston and Benoni, to include the proposed new airport node in the east. It further proposes the inward growth of the peripheral residential areas i.e. Etwatwa and the development of clearly defined corridors, while the agricultural land needs to be protected (see diagram below).

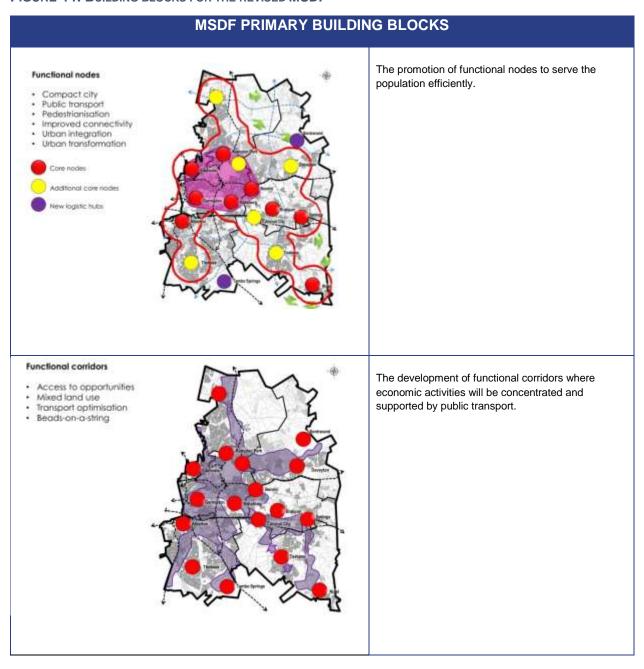

FIGURE 43: MSDF DEVELOPMENT CONCEPT

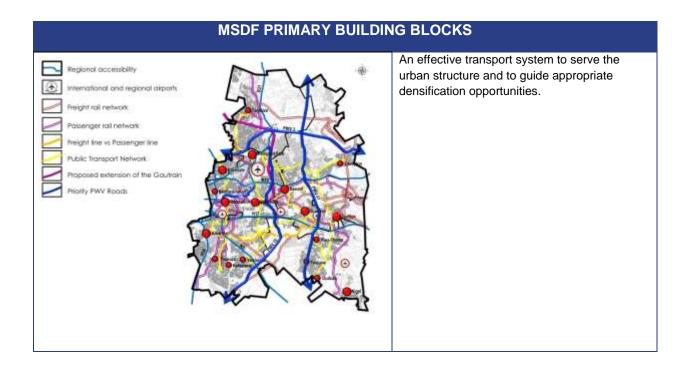

### 7.2.5 Revised Municipal Spatial Development Framework

The revised MSDF includes the following **primary building blocks**:

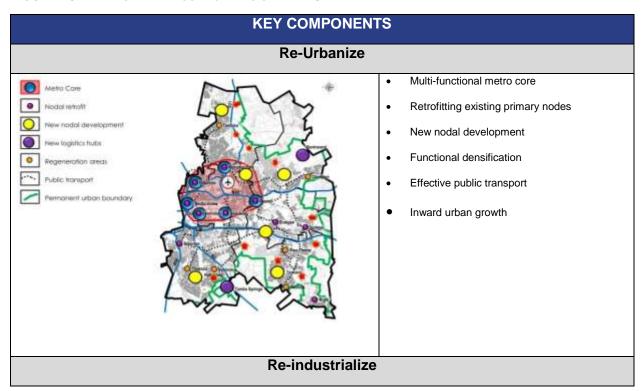

FIGURE 44: BUILDING BLOCKS FOR THE REVISED MSDF

In addition to the above the **key components** of the MSDF are the following:

FIGURE 45: ADDITIONAL KEY COMPONENTS OF THE MSDF

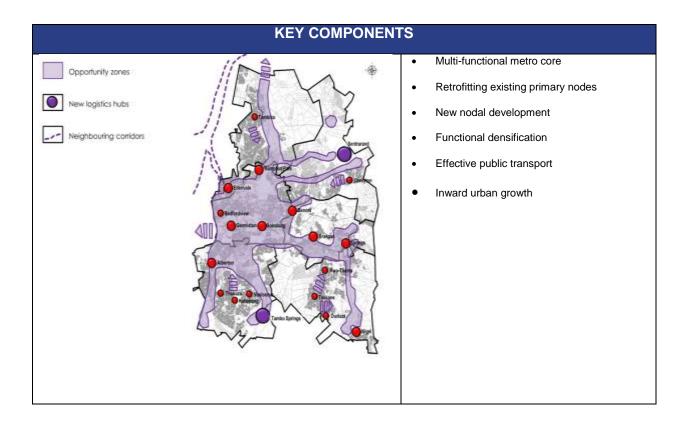

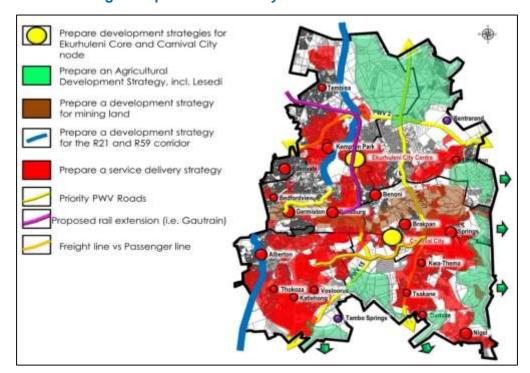

FIGURE 46: COMPONENTS OF THE MSDF

KEY COMPONENTS				
Re-Govern	Re-Mobilize			
<ul> <li>Permanent urban development boundary (UDB)</li> <li>Functional planning / management regions</li> <li>Planning to lead decision making</li> <li>Lesedi</li> <li>Growth management strategy</li> <li>Land acquisition (inter-governmental land)</li> </ul>	<ul> <li>Development of under developed social services land</li> <li>Shared facilities</li> <li>Multi-functional facilities</li> <li>Public transport</li> <li>Functional participation (refuse removal)</li> </ul>			
Re-Generate				
Re-cycled grey water for agriculture	]			
Rail transport				
Storm water management				
Alternative land use / building uses				
Multi-functional land / facilities				
"Green" buildings and services				

### 7.2.6 Strategic Proposals and Catalytic Recommendations

The following strategic proposals are encompassed in the MSDF:

- Establish a permanent urban boundary as per this MSDF;
- Develop the core node as a metropolitan hub around the airport;
- Existing nodes need to be retrofitted to serve the current needs of the metro and new nodes need to be developed to improve connectivity and serviceability in the metro;
- Corridors need to be developed applying the "beads on a string" principle;
- Agriculture should be developed (in conjunction with Lesedi) to become a meaningful contributor to the Ekurhuleni economy;
- Densification needs to support public transport and needs to be supported by sufficient municipal services;
- Transit-orientated development needs to be promoted throughout the metropolitan area;
- Improved regional connectivity needs to be achieved via the development of PWV 3, PWV 5 and PWV 17 routes;
- Rail services need to be improved to augment the road-based public transport services and to develop the inland freight ports of Tambo Springs and Sentrarand; and
- Gautrain extensions need to be pursued to service the eastern side of the airport.
- As regards the catalytic recommendations, the following should be implemented with urgency.

### 7.3 Conclusion

The review of the EMSDF 2011 was necessary to align the Ekurhuleni spatial development with new legislation and with large-scale new developments in the region. As such, this plan should ensure that the future spatial development of the metropolitan area will be sustainable and that it will contribute to the wellbeing of all its citizens.

Ekurhuleni is well placed to become a leader in the future of Gauteng.

## CHAPTER 8: BUILT ENVIRONMENT PERFORMANCE PLAN AND CAPITAL INVESTMENT FRAMEWORK

### 8.1 Introduction

The Built Environment Performance Plan coordinates implementation of objectives of the existing statutory plans such as Integrated Development Plan and Municipal Spatial Development Framework (MSDF). Hence, BEPP principle of ensuring alignment between BEPP, IDP, MSDF and other national plans and frameworks such as Integrated Urban Development Framework (IUDF), Spatial Land Use Management Act (SPLUMA) and National Development Plan (NDP) as reflected on **Figure 1** below.

The Built Environment Performance Plan is a lever available for the City of Ekurhuleni (CoE) to progress towards spatial transformation and to achieve built environment outcomes of productive, inclusive, sustainable and well-governed city. Reconfiguration of fiscal instrument in the form of grants and coordination of various stakeholders within the context and parameters of BEPP enables the city to progress on strategic themes of Re-Urbanise, Re-industrialise, Re-generate, Re-mobilise and Re-Govern.

The City of Ekurhuleni Built Environment Performance Plan is a brief, strategic overview of the built environment aimed at improving the performance of the city's built environment. It is compiled from a range of current Ekurhuleni planning and strategic documents and takes into consideration provincial and national planning and strategic documents. The CoE documents are listed below.

- The Metropolitan Spatial Development Framework, 2015 (MSDF)
- The Capital Investment Framework (CIF)
- The Comprehensive Municipal Infrastructure Plan, 2009-2015 (CMIP)
- The Comprehensive Integrated Transport Plan (CITP), 2013-2018;
- Long Term Financial Plan, 2010;
- Ekurhuleni Growth and Development Strategy (GDS 2005);
- Ekurhuleni Municipal Housing Development Plan (MHDP), October 2011;
- Ekurhuleni IDP 2011/12-2016/17
- Ekurhuleni Biodiversity and Open Space Strategy (2009)
- Ekurhuleni Water Service Development Plan, 2014/14
- Ekurhuleni Integrated Waste Management Plan, 2015 Draft
- Ekurhuleni Energy Master plan
- ERWAT Strategy, 2032
- Comprehensive Municipal Infrastructure Plan

The BEPP indicates how a metro will apply its capital financing, including grant resources and all other sources of finance, fiscal and regulatory instruments and incentives and what it intends to achieve with these resources and instruments in respect of the local, provincial and national priorities. The aim is to improve the performance of built environment and transforming the spatial urban form, strongly supporting the TOD development concept. In essence, BEPP integrates planning strategic documents with funding instruments ensuring coordinated effort to achieve built

environment outcomes. CoE BEPP constitutes projects which are collaboratively funded by the city, the provincial, national government and private sector driven projects based on the recognition that CoE developmental agenda requires collaborative effort across various stakeholders. This chapter reflects programmes and projects in CoE BEPP over the Medium Term Revenue and Expenditure Framework (MTREF). The budget allocation of the projects is highly influenced by Capital Investment Framework (CIF) through Capital Prioritisation Model (CPM). CIF is a component of the Built Environment Performance Plan which jointly with the budget is approved by Council.

FIGURE 1: BEPP RELATIONSHIP TO OTHER STRATEGIC PLANS AND INSTRUMENTS

### 8.2 Status Quo

The understanding of the city's demographics enables appropriate strategic planning and budgeting which respond to the needs of the people and the vision of the city. The premise of realizing Growth and Development Strategy 2055 is based on understanding the status quo of CoE in order to appropriately apply the city's strategic framework which is encompassed on the following five themes:

FIGURE 2: COE STRATEGIC FRAMEWORK

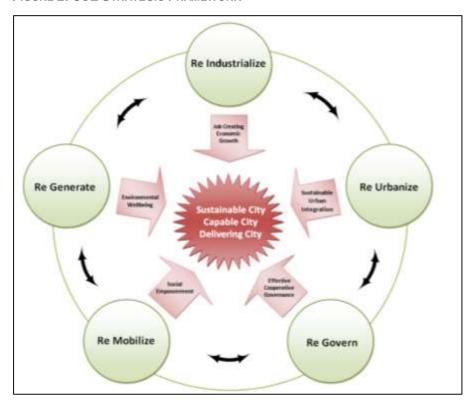

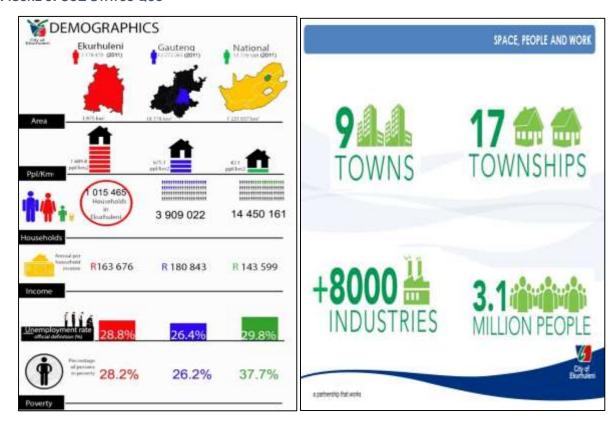

FIGURE 3: COE STATUS QUO

The developmental agenda of the city which takes into consideration the above status quo is encompassed on three stages are: -

- Stage 1: The Delivering City (2012-2020)
- Stage 2: The Capable City (2020-2030)
- Stage 2: The Sustainable City (2020-2030)

### 8.3 Background

The Built Environment Performance Plan (BEPP) is a response to the challenges CoE face regarding urban spatial restructuring. The BEPP is a sharpening of existing planning tools to assist the city to achieve built environment outcomes of more productive, sustainable, inclusive and well governed cities, thereby contributing to the impact of reducing poverty and inequality and enabling faster more inclusive urban economic growth.

Built Environment Performance Plan was introduced in 2011/12 financial year as eligibility criteria for accessing Urban Settlement Development Grant (USDG). It is outcome based performance plan which serves as a tool to integrate planning, budgeting and implementation of the existing municipal statutory planning and budgeting frameworks. The structure of BEPP document is influenced by National Treasury's annually produced BEPP Guidelines which evolve based on the focus element of the reforms. The focus progressed from spatial planning, identification of

Integration Zones and catalytic projects, aligning BEPP with budgeting process and urban management over the last three years. The emphasis on the 2017/18 BEPP Guidelines is adoption and measurement of the built environment outcomes, prioritisation of economic development and institutionalization of BEPP into MSDF and IDP. The application of these is imbedded within the Built Environment Value Chain (BEVC) framework. While 2018/19 BEPP focusses on progression and implementation of BEVC, it also recognises different levels at which the city is at in completion of BEVC.

The aim of BEPP is to support the metropolitan municipalities to achieve the impact of urban economic growth and reduction of inequality and poverty by becoming compact cities and transformed urban spaces. Therefore, the primary focus is to ensure that the identified projects and programmes within the IDP and the spatial rationale of the municipality are planned, budgeted and implemented in an integrated and coordinated manner including fiscal instruments in the form of grants supporting the municipal strategies. It is a requirement of the annual Division of Revenue Act (DoRA) and an instrument for compliance and submission purposes for the following built environment grants:

TABLE 1: INFRASTRUCTURE GRANTS RELATED TO BUILT ENVIRONMENT

NAME OF GRANT	PURPOSE OF GRANT
Urban Settlement	Supplements the capital revenues of metropolitan
Development Grant	municipalities in order to support the national human
(USDG)	settlements development Programme focussing on poor
	households
Human Settlements	To provide for the creation of sustainable human settlements
Development Grant	
(HSDG)	
Public Transport	To provide for accelerated planning, construction and
Infrastructure Grant (PTIG)	improvement of public and non-motorised transport
	infrastructure
Neighbourhood	To support and facilitate the planning and development of
Development Partnership	neighbourhood development programmes and projects that
Grant (NDPG)	provide catalytic infrastructure to leverage third party public
	and private sector development towards improving the
	quality of life of residents in targeted under-served
	neighbourhoods (generally townships)
Integrated National	To implement the Integrated National Electrification
Electrification Grant	Programme by providing capital subsidies to municipalities
(INEG)	to address the electrification backlog of occupied residential
	dwellings, and the installation of bulk infrastructure and
	rehabilitation and refurbishment of electricity infrastructure in
	order to improve quality of supply.

# 8.4 CoE Spatial Rationale and Transformation Agenda

The CoE spatial rationale is primarily informed by the CoE MSDF which guides future development of the CoE with the intension to achieve sustainable spatial development and to thus overcome the spatial imbalances of the past. The spatial development concept is based on development principles with the outcome of compact city, integrated transport network, sustainable human settlements and thriving economic growth. The principles of MSDF are in line with the Spatial Planning Land Use Management Act (SPLUMA) principles which on the CoE BEPP come out as the city's spatial development strategy and spatial transformation agenda that relates to nodal development or revatalisation, residential infill and densification, integrated movement.

# 8.5 Urban Network Strategy (UNS)

# 8.5.1 Spatial Targeting

The concept of the Urban Network Strategy was introduced by the National Treasury. UNS comprises of the following three elements:

- the consolidation of the urban fabric and promotion of economic activity around the urban hubs in the marginalised areas on the urban periphery;
- the revitalisation of the main activity area in the city (the CBD); and
- effectively linking the Hubs to the CBDs by way of public transport infrastructure and services and promoting medium and higher density mixed use development along these public transport corridors.

The Spatial Targeting of the Built Environment Performance Plan (BEPP) is primarily founded on the Long Term Vision of the CoE as set out in the Ekurhuleni Growth and Development Strategy 2055, the Spatial Development Framework of the municipality and the CoE Capital Investment Framework reflecting the CIF identified Geographic Priority Areas. The aforementioned, in line with the Urban Network strategy, informed the identification of five Integration Zones of CoE for focused development. Each integration Zone includes a marginalised area, area of growth (commercial and / or industrial) and a network linkage. The Spatial Targeting planning is one of the mechanisms to achieve inclusivity, productiveness and sustainability of the city.

| Network | Primary | Secondary | Intervention | Regeneration and management | Primary | Transport Link | Primary |

FIGURE 4: URBAN NETWORK STRATEGY

# 8.5.2 Integration Zones

National Treasury through BEPP introduced the concept of Integration Zone (IZ) within Urban Network Strategy. The strategy amplified CoE GDS which already articulated similar concept and therefore was not represented as a new concept. CoE GDS also guides planning to prioritise areas of influence through identification of Geographic Priority Areas (GPAs). Integration Zones and Geographic Priority Areas complement each other but GPAs have wider spectrum than IZs. The City of Ekurhuleni utilised its Capital Investment Framework (CIF) footprint as the basis for the identification and demarcation of its Integration Zones. The rationale behind this lies in the core principles of the CIF which seeks to promote sustainability, urban restructuring, densification as well as spatial and sectoral integration and prioritization.

The CoE identified five Integration Zones with the guidance of UNS strategy with BEPP guidelines and these are: -

Integration Zone 1: Tembisa-Kempton Park

Integration Zone 2: Vosloorus-Boksburg-Bartlett

Integration Zone 3: Katlehong-Tokoza-Alberton-Germiston

Integration Zone 4: Etwatwa-Daveyton-Benoni

Integration Zone 5: Duduza-Tsakane-KwaThema-Boksburg

The key structuring element with regards to this Urban Network is the proposed CoE Integrated Rapid Public Transport Network (IRPTN). Utilising the network as a footprint enabled the city to

identify corridors that should be earmarked for densification and to accommodate movement of people to and from places of employment within the CoE.

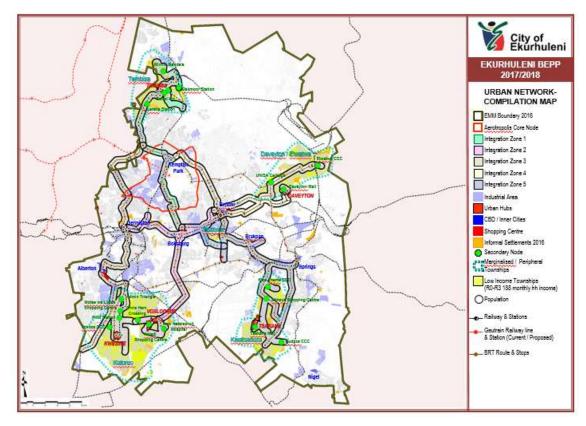

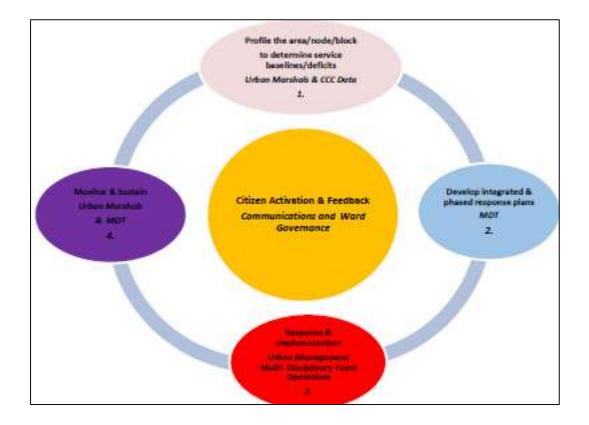

FIGURE 5: THE COE FIVE INTEGRATION ZONES

# 8.5.3 Urban Management

Urban management forms a significant part of built environment value chain. It is done to guard against dilapidated areas and infrastructure, deliver a service to the citizens and to ensure law enforcement to keep the areas attractive and competent for potential economic investment. It requires partnership between public and private sector in order to mobilise strategies and resources to tackle urban management challenges while achieving integrated and sustainable basic service delivery goals.

The CoE's approach to urban management is area based focused and is informed by four activities as indicated in the figure below.

# 8.6 Capital Investment Framework (CIF)

The Capital Investment Framework (CIF) is a key component of the Metropolitan Spatial Development Framework (MSDF) as required in terms of Section 21(n) of the Spatial Planning and Land Use Management Act, 2013, and Section 4(e) of the Municipal Planning and Performance Management Regulations, 2001 as promulgated in terms of the Municipal Systems Act. The CIF also strives to meet Section 153(a) of the Constitution, in which the developmental duties of a municipality is outlined to "structure and manage its administration and budgeting and planning processes to give priority to the basic needs of the community, and to promote the social and economic development of the community".

The CIF in its function takes cognizance of overarching national policies such as the National Development Plan 2030 and the National Spatial Development Perspective, 2006, that have outlined the need for metros to target investment into strategically identified spatial areas with the spin off effect of transforming past spatial, social and economic inequalities.

The principles set out in the NDP and the NSDP therefore need to be taken into consideration when developing and implementing the CIF as part of strengthening the MSDF. The principles in summary speak to achieving rapid economic growth, the provision of basic services to the community, focusing fixed investment into economic growth points, and promoting infrastructure investment into these economic nodes and potential economic growth points. \

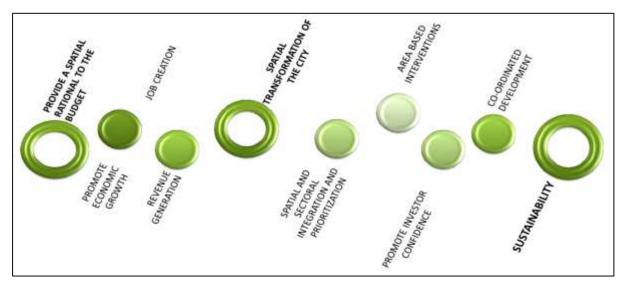

Imperative to the CIF is ensuring that planning for programmes and investment is not dispersed but focused. The NSDP therefore argues that dispersed programmes and funding has not managed to achieve successful holistic and comprehensive spatial transformation and economic growth, but rather enabled spatial inequalities and a lagging economy.

The CIF in its implementation aims to bridge the gap between the Integrated Development Plan (IDP), Budget, GDS and the MSDF to achieve and align the COE's overarching objectives, promote economic growth, and meet basic infrastructure needs as linked to achieving a desired strategic spatial directive for the Metro, which must take cognizance of the previously disadvantaged areas. In summary, the function of the CIF is to spatially and strategically influence, guide and prioritize the allocation of the municipal budget in a coordinated manner across all sectors in order to achieve targeted spatial transformation of the urban environment and realize the overarching strategic objectives if the COE.

#### The functions of the CIF are defined as follows:

- To spatially and strategically influence and guide municipal capital prioritization and allocation;
- To Spatially and strategically coordinate and integrate capital expenditure across all sectors;
- To show where the municipality must and will be spending its capital budget; and
- To reflect where the municipality will be investing. This is achieved by means of mapping capital projects reflected on the multi-year capital budget.

FIGURE 7 - CIF PRINCIPLES:

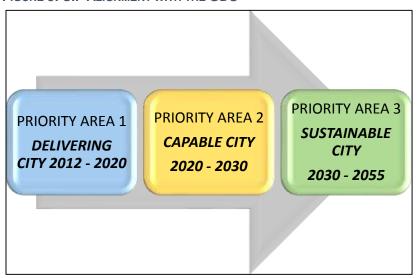

The Capital Investment Framework as a component of the MSDF has been incorporated into the BEPP as a mechanism to achieve medium to long term outcomes with regard to spatial transformation through guiding and focusing investment into strategic spatial areas through the Geographic Priority Areas (GPA's). The GPA's (Map 2) have been derived from the spatial structuring elements (Map 3) of the MSDF and were utilized to derive the BEPP integration zones as part of the Urban Network Strategy as a requirement from National Treasury.

The Capital Prioritization Model and Geographic priority areas are the implementation tools of the CIF and are utilized during the annual draft multi-year capital budget evaluation process with the objective to prioritize the draft multi-year capital budget in accordance with the priority areas for targeted and coordinated infrastructure investment.

#### 8.6.1 Geographic Priority Areas

The COE Capital Investment Framework is geared towards focusing the capital budget of the metropolitan into three strategic geographic priority areas in accordance with the MSDF. The main objective is to achieve the spatial strategy outlined within the MSDF and to align with the development trajectory defined within the GDS in terms of promoting the Metro as a 'Delivering City' with a 10-year implementation horizon, a 'Capable City' within 20 years, and a 'Sustainable City' within a 20 year and beyond implementation horizon.

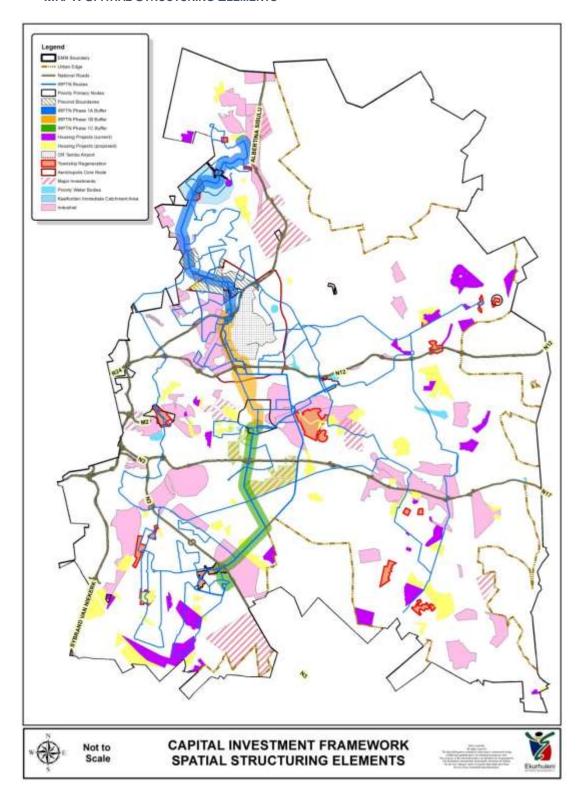

FIGURE 8: CIF ALIGNMENT WITH THE GDS

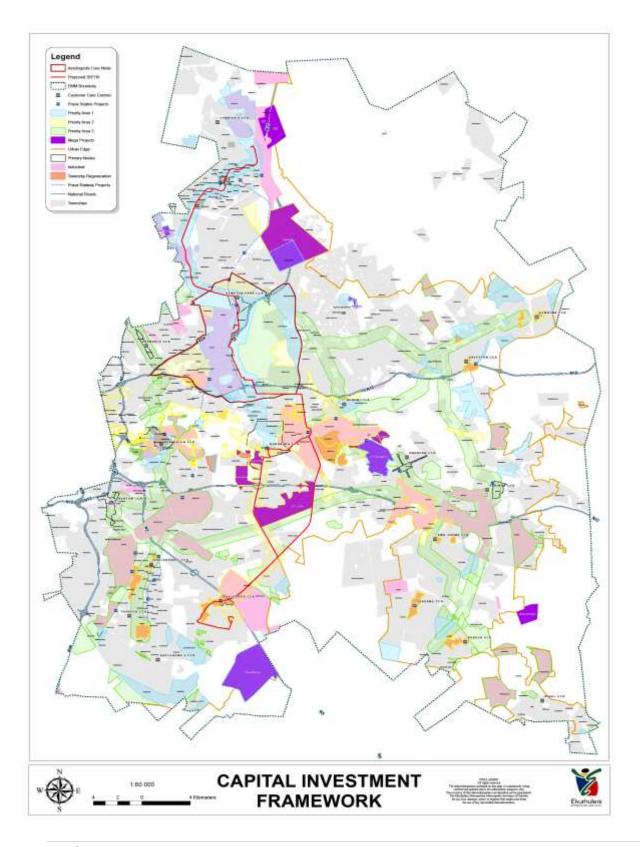

The CIF geographic priority areas are comprised out of the following structuring elements from the MSDF and strategic programmes of the COE:

- Integrated Public Transport Network
- Aerotropolis Core Node
- Primary Nodes
- Housing Projects
- Township Regeneration Areas
- Industrial Areas
- Strategic Urban Developments
- Beautification of lakes and dams projects
- Poverty Eradication Areas
- Expansion and densification areas

# **Map1: Spatial Structuring Elements**

MAP 2: CIF GEOGRAPHIC PRIORITY AREAS

# 8.6.2 Capital Prioritization Model

The capital prioritization model is an instrument utilized in the implementation of the CIF in alignment with the annual budget and IDP process set out by the CoE Finance Department and Strategy and Corporate Planning Department in order to strategically prioritize the multi-year capital budget. The CPM as illustrated in the below **figure 9** strives to align and incorporate the Capital, project management, IDP ward needs, Mayoral priorities, spatial priorities and the SDBIP into the capital budget project prioritization process. The CPM as part of the prioritization process incorporates the geographic priority areas that inform the BEPP integration zones in providing for a spatial rationalization of the budget. The CPM therefore, establishes a set process for implementation as aligned to the budget and IDP process, and provides guidance to departments on the capital project prioritization process and requirements. **The key outcome of the CPM is to prioritize the CoEs capital infrastructure projects in alignment with the Metros spatial and strategic objectives and priorities**.

The CPM process has been revised to more cohesively include the IDP ward priority process and incorporate new functionality to the prioritization of the capital budget as provided through the CP3 automated system.

The CPM strives to align and co-ordinate the following into the capital budget project prioritization process:

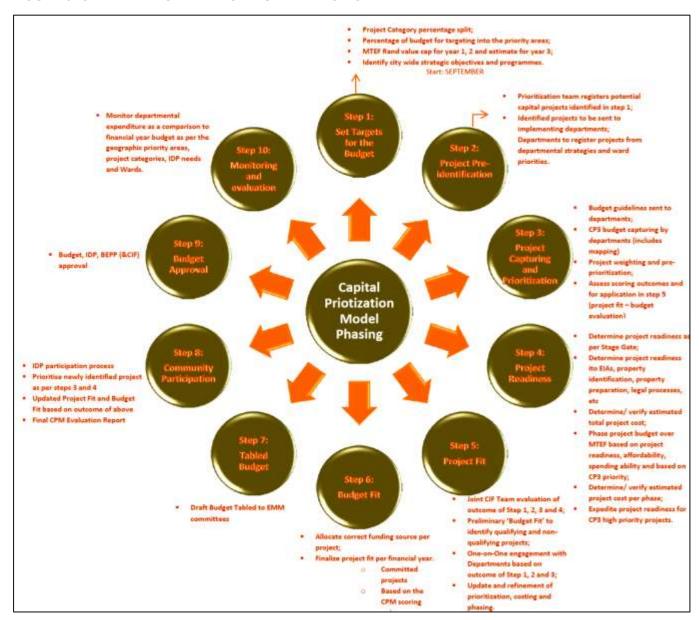

- Project Management (project readiness),
- Analysis of community IDP development priorities;
- Spatial Strategy; and
- IDP and SDBIP

# The CPM fulfils the following important functions as part of the Capital Programme Management process:

- Facilitates and guides the prioritisation of the multi-year capital budget;
- Establishes a uniform process to be followed during the budget process in the allocation and prioritisation of the budget both strategically and spatially;
- Guides the budget allocation split between the project categories (fair allocation of urban restructuring, upgrading and renewal and economic development projects);
- Promote, guide and coordinate spatially targeted investment;
- Requires collective action and collaboration between essential departments with an
  identified strategic involvement in the budget process (i.e. Finance, Strategy and Corporate
  Planning (IDP), EPMO, Human Settlements, Economic Development, Environment, Real
  Estate and City Planning);
- Promotes alignment of departmental functions, strategic policies and sector plans;

- Outlines actions to be pursued during the budget prioritisation process;
- Provides a quick and easy, yet consistent, method for evaluating options;
- Facilitates reaching agreement on priorities and key issues;
- Guide, co-ordinate and align the municipal budget;
- Provides for a transparent and rationalised budget process;
- Quantifies the decision with numeric rankings; and
- Makes provision for monitoring and evaluation to assess the impact of the CIF on the multiyear capital budget after allocation of the budget;

FIGURE 9: CAPITAL PRIORITIZATION MODEL PHASING

The capital prioritization model 10 step phasing (Figure 9) is more explicitly detailed as follows:

# Step 1: Set Targets for the Budget (September)

- Project Category percentage split
  - Urban Restructuring (30%)-Social and physical infrastructure geared towards eradicating historical backlogs.
  - Upgrading and Renewal (40%) Upgrading refers to the extension of existing bulk capacity, whilst renewal refers to the maintaining of existing bulk infrastructure.
  - Economic Development (30%) projects that are focused towards extending bulk infrastructure for the purpose of stimulating growth, and are therefore purely income generating projects.
- Percentage of budget for targeting into the priority areas;
  - The percentage of total capital budget within the priorities areas is targeted at 70%.
- MTREF Rand value cap for year 1, 2 and estimate for year 3 (the MTREF rand value cap is required during the budget fit exercise for prioritization as part of step 6);
- Identify city wide strategic objectives and programmes.
- This includes the Ward and Mayoral Priorities.

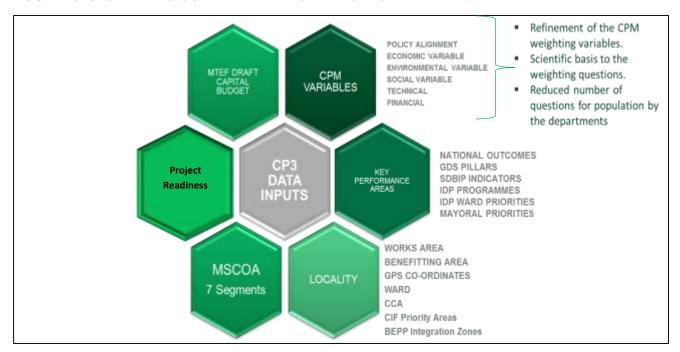

### Step 2: Project Pre-identification (September)

- Prioritization team registers potential capital projects identified in step 1;
- Identified projects to be sent to implementing departments;
- Departments to register projects from departmental strategies, Ward and Mayoral priorities.

#### Step 3: Project Capturing and Prioritization (October)

- Budget guidelines sent to departments by the CoE Finance Department;
- CP3 budget capturing by departments (includes mapping projects locality, mSCOA segments, key performance areas and CPM weighting variables as illustrated in figure 10): Training on the CP3 system and capturing into the system took place from 4 to 27 October 2017.

FIGURE 10: CP3 DATA INPUTS UTILIZED IN THE PRIORITIZATION MODEL

- Project weighting and pre-prioritization;
- Assess scoring outcomes and for application in step 5 (project fit budget evaluation)

# Economic Alignment

- Focus on Economy
- ▶ Focus on Area
  - ▶ Economic Nodes
- ► Focus on mSCOA
  - Digital City
- ▶ Financial Alignment
  - Austerity
  - ▶ Co-Funding
  - Credibility
  - ▶ Increase in Rates Base
  - Lifespan of Asset

# Social Alignment

- Basic Service Delivery
  - ▶ Targeted Services
  - Deprivation Index
  - Access To Amenities
  - Number of Beneficiaries
  - Access to Municipal Services
- Social Impact Module
  - ▶ Living Condition Profile Index
  - ➤ Travel Condition Profile Index

  - Employment Creation
  - ▶ Employment Rate

# Environmental Alignment

- Focus on Conservation
  - Heritage Asset
- Focus on Environment
  - Impact on Carbon Emissions
  - Impact on River Health System
  - Impact on Sanitation Network Capacity
  - Impact on Open Space
  - Impact on Electricity Network Capacity
- Focus on Environmental Priority Areas
  - Environmental Priority Areas

FIGURE 11: CAPITAL PRIORITIZATION MODEL - PROJECT CATEGORY WEIGHTING PER VARIABLE

# ▶ Policy Alignment ▶ National and Provincial Outcomes ▶ Mayoral Priorities ▶ SDBIP ▶ Ward Priorities ▶ IDP Programmes ▶ Technical Alignment ▶ Readiness ▶ Departmental Score ▶ Sector Maps (Priority areas, Integration Zones, and MSDF Spatial Structuring Elements) ▶ Negative Risk

# **Step 4: Project Readiness**

- Determine project readiness as per Stage Gate and City Infrastructure Delivery and Management System (CIDMS); Departments were requested to populate project readiness in terms of the CIDMS from National Treasury during the October 2017 budget capturing period.
- CIDMS Project Phasing:
  - Planning
  - Design
  - Works
  - Close out
  - Project Completion
- o Stage Gate Phases:
  - Feasibility
  - Procurement
  - Implementation
  - Construction
  - Completed
- Determine project readiness ito EIAs, property identification, property preparation, legal processes, etc. (phase in for 2019/20)
- Determine/ verify estimated total project cost (part of the budget evaluation departmental one on one engagements with the CIF Operational Task Team);
- Phase project budget over MTREF based on project readiness, affordability, spending ability and based on CP3 priority (phase in for 2019/20);
- Determine/ verify estimated project cost per phase (phase in for 2019/20);
- Expedite project readiness for CP3 high priority projects (phase in for 2019/20).

### Step 5: Project Fit

- Joint CIF Team evaluation of outcome of Step 1, 2, 3 and 4: Operational Task team prebudget evaluation took place 3 November 2017;
- Preliminary 'Budget Fit' to identify qualifying and non-qualifying projects (phase in for 2019/20);
- One-on-One engagement with Departments based on outcome of Step 1, 2 and 3: The departmental one on one engagements took place from 6 to 17 November 2017;
- Update and refinement of prioritization, costing and phasing (Departments during the one on one departmental engagements are afforded the opportunity to provide clarity and make

amendments to the capital budget projects submission as advised by the Operational Task Team).

# Step 6: Budget Fit

- Allocate correct funding source per project;
- Finalize project fit per financial year.
  - Committed projects 2017/18
  - Based on the CPM scoring as fit per project category percentage of total budget.
  - IDP and Mayoral Priorities are considered as part of the budget fit functionality of force in and out is applied in order to achieve a minimum of 2 priorities per ward. It must be noted that the successful application of the force in and force out functionality is subject to the accuracy of information populated by the departments on a projects address of a mayoral and or ward priority.
  - Based on budget cap per financial year.

# Step 7: Tabled Budget

Draft Budget Tabled to CoE committees

# **Step 8: Community Participation**

- IDP participation process
- o Prioritise newly identified project as per steps 3 and 4
- Updated Project Fit and Budget Fit based on outcome of above
- o Final CPM Evaluation Report

#### Step 9: Budget Approval

Budget, IDP, BEPP (&CIF) approval

# Step 10: Monitoring and evaluation

 Monitor departmental expenditure as a comparison to financial year budget as per the geographic priority areas, project categories, IDP needs and Wards.

# 8.6.3 Capital Budget

This section aims to demonstrate the budget that supports the capital works plan of the municipality. The budget process is done as legislated and the municipality further examines it during CIF budget evaluation process conducted by the CIF Operations Task Team. The process leads to prioritization of the capital budget based on the Capital Prioritization Model (CPM) illustrated in figure 9, which distributes the budget across sectors in order of priority that is informed by criteria to influence preference for Geographical Priority Areas and Integration Zones.

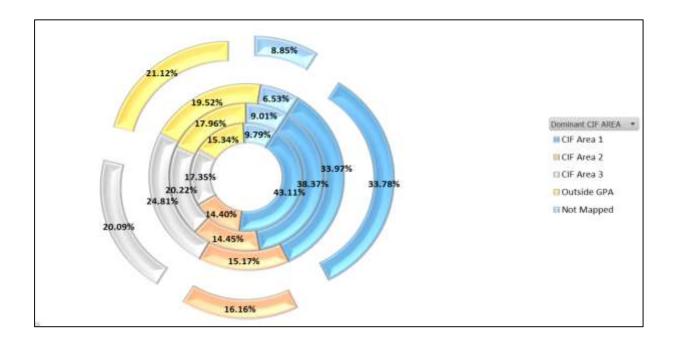

Analysis if the CIF impact on the capital budget is gauged by the percentage of investment into the geographic priority areas and the Capital Prioritization Model project categories. The analysis sets out to determine the percentage of budget investment allocated to the priority areas (see Figure 12) in achieving positive spatial transformation and ensuring budget allocation between economic development, upgrading and renewal, and urban restructuring projects on the capital budget (see Figure 13).

FIGURE 12: PERCENTAGE OF CAPITAL BUDGET ALLOCATED TO THE GEOGRAPHIC PRIORITY AREAS ACROSS THE MTREF

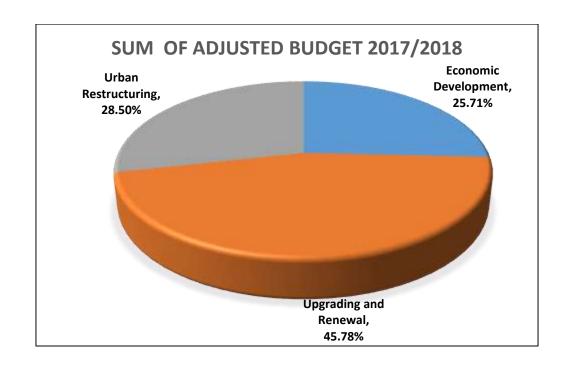

Row Labels Sum of Bud	get Request 2017/2018_MTR Sum of 2	018/2019 Budget After Sum o	f 2019/2020 Budget Sum of 2	2020/2021 Budget After N
CIF Area 1	43.11%	38.37%	33.97%	33.78%
CIF Area 2	14.40%	14.45%	15.17%	16.16%
CIF Area 3	17.35%	20.22%	24.81%	20.09%
Outside GPA	15.34%	17.96%	19.52%	21.12%
Not Mapped	9.79%	9.01%	6.53%	8.85%
Grand Total	100.00%	100.00%	100.00%	100.00%

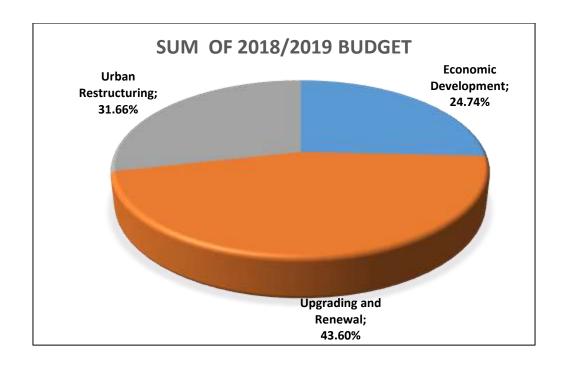

Figure 12 reflects the percentage of budget allocation per priority area over the MTREF period 2017/18 to 2020/21. Priority area 1 reflects a steady decline in budget allocation towards the outer financial years with a 9% decrease in budget allocation from 43% in 2017/18 to 34% in 2020/21. Priority areas 2 and 3 in contrast to GPA 1 are starting to show an increase in budget allocation from the present to 2017/18 financial towards the outer years. Worth noting is that the annual budget allocation across the MTREF for GPA 3 remains marginally higher than the proportion of budget to GPA 2, which can be attributed to smaller spatial footprint of GPA 2 as compared to the larger spatial extent of the GPA 3. Despite the steady decline in the percentage of budget allocation to GPA 1 it still retains the dominant proportion of budget across the MTREF period. Budget allocation to projects outside any of the priority areas reveals an increase in the percentage of budget to these areas towards the outer years. In terms of the CIF 70% target for investment collectively within the priority areas the budget allocations for projects outside of a GPA is acceptable. The percentage of investment to not mapped projects fluctuates between 9% to 6% of budget not mapped and as assessed across the MTREF. Focus is to continue reducing the number of unmapped projects on the capital budget in order to achieve 100% mapped projects. For the 2018/19 financial year a total percentage of 73% of the capital budget has been demarcated for the priority areas, which is on par with the targeted 70% of investment into the priority areas.

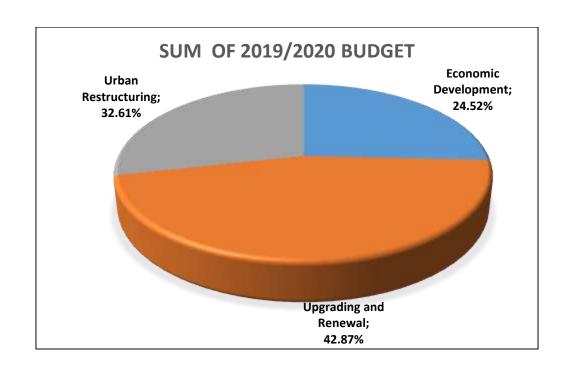

The percentage of budget allocated per the project categories remains relatively consistent over the MTREF period 2017/18, 2018/19, 2019/20 and 2020/21 with subtle increases and decreases reflected for upgrading and renewal, urban restructuring and Economic Development. The purpose behind assessing the MTREF CIF project category split is premised on the role that the categories play in the capital budget prioritization process in terms providing the overarching budget fit targets for the budget based on the predefined set percentage targets per project category. Upgrading and renewal has a 40% budget allocation target as determined by National Treasury. The table and figures below illustrate the budget split across the project categories per financial year.

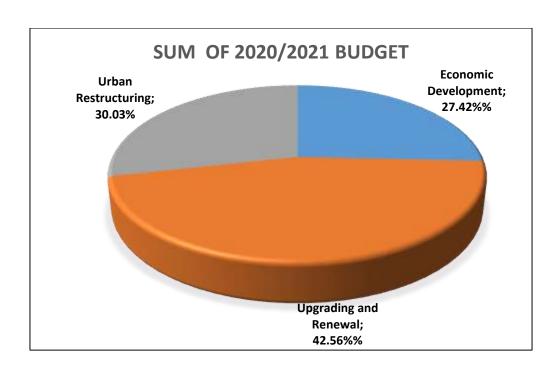

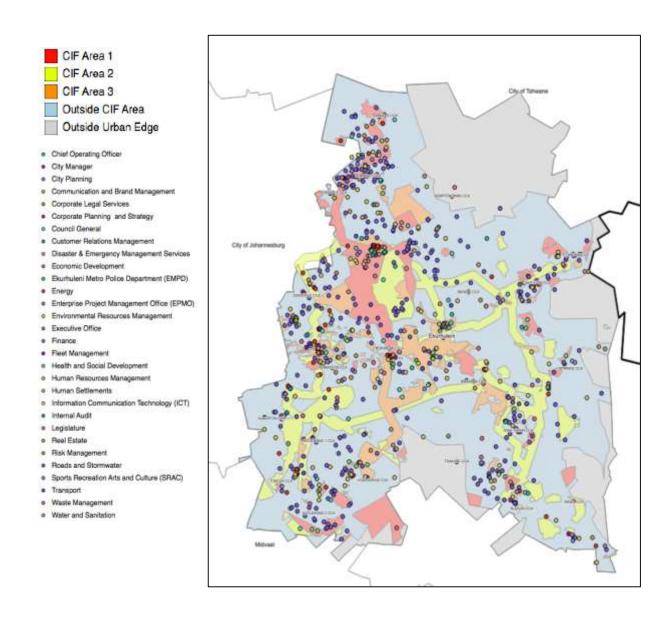

Figure 14 indicates the estimated budget allocation to the BEPP integration zones and category areas.

Map 3 demonstrates that the 2018/19 draft capital budget has been mapped per department. The spatial link to the budget therefore creates an essential data set utilised in the prioritization process of the budget thereby providing a spatial measure for targeted investment into priority spatial areas. This information is further extended to the BEPP Integration Zones.

Map 3 illustrates the locality of capital projects per department as per the 2018/19 capital budget.

# CHAPTER 9: ORGANISATIONAL PERFORMANCE MANAGEMENT

# 9.1 Overview of the System

The performance management system adopted by the by the City of Ekurhuleni supports the statutory requirements set out in various applicable legislation and as set out in the National Treasury directives and standards. The system is also adapted and customised to support the national government and the local government planning cycle in order to promote compliance with relevant legislation. Furthermore, a process of entrenching customised controls and protocols throughout the system is conducted continuously to advance the implementation of the desired management practices in order to influence the desired results.

In the main, the organisational performance management system implemented guides the following key functional areas:

# 9.1.1 Strategic Planning

This component of the performance management systems deals with the core of planning within the context of the relevant legislative framework. The focus is on the development of the planning instruments, popularising planning procedures and the end to end coordination of the planning process in line with the local government planning cycle dictated by the applicable legislation.

In the main, the operations cover the following:

- The development and continues alignment of other local government planning instatements with the Growth and Development Strategy (GDS);
- Undertaking research projects to develop intelligent capabilities for the City;
- Coordination of the development of the Intergraded Development Plans (IDP), and the Service Delivery and Budget Implementation Plans (SDBIP);
- Alignment of the national and provincial priorities and planning instruments with the City's plans (IDP/SDBIP); and
- Programme and content development for both the Mayoral and Senior Management Team (SMT) Lekgolta.

# 9.1.2 Intra-Organisational Performance Management

Serves to ensure that there are appropriate internal procedures to monitor the extent to which the municipality and its entities are achieving the development objectives and service delivery targets set out in the Growth and Development Strategy, Intergraded Development Plans, Service Delivery and Budget Implementation Plans and other strategies of national and provincial government. In this regard, this ongoing monitoring of progress or lack thereof on the implementation of programmes and projects through the onsite monitoring visits or frontline service delivery monitoring as well as the statutory organisational performance reporting create early warnings and inform the implementation of corrective improvement plans.

A rigorous system of data collection, analysis and validation supporting the evidence based reporting reform is implemented. Despite a myriad of challenges experienced, it continues to impact positively on improving the credibility, usefulness and reliability of the City's reported performance information.

The main operations supporting this segment of the performance management system include:

- Onsite monitoring activities (coalface service delivery monitoring);
- In-year performance reporting (compliance or statutory reporting);
- Verification and validation of the audit trail supporting the reported results at output level (evidence based reporting); and
- Other municipal monitoring and oversight functions like Operations Rapid Intervention Team (ORIT), CAPEX War Room, Operations Clean Audit (OPCA).

### 9.1.3 External Organisational Performance Accountability

Serves as a mechanism to ensure that the City adheres to the statutory and compliance requirements that promote corporate governance. In this regard, the City engages on the compliance reporting process by following the in-year reporting process in line with the legislative framework. Key to this process is the compliance with the regulated timelines and observing the performance information standards and requirements.

In the main, this component of the performance management system responds to and expresses the accountability and transparency obligations of the City to all its stakeholders which amongst others include the general public, provincial and national government and external oversight bodies (Office of the Auditor General, National Treasury etc.).

The main operations in this regard include:

- Continuous implementation of clear guidelines and standards, customised controls and protocols for managing performance information;
- Implementation of change management activities in the form of sensitisation workshops or information sessions and tailored training interventions to influence the right discipline and culture as key success factors for the maturity of the performance management system; and
- Report writing and distribution.

# 9.2 Principles for Managing Organisational Performance and Information

The principles that underpin the management of organisational performance and information include:

### **Evidence-based**

Organisational performance and information reporting in the City of Ekurhuleni is evidence-based. This requires that all results (outputs and outcomes) or deliverables (milestones, progress etc.) reported against predetermined objectives are supported by adequate, accurate, valid and credible audit evidence or portfolio of evidence. By taking this approach, the municipality influences the strengthening of accountability and transparency.

The development of the plans (IDP, SDBIP) is informed to a larger extent by the evidence of needs prioritised by communities against available resources (budget and municipal capabilities). Community priorities are gathered through community consultation processes.

#### **Timeliness**

The collection, collation and reporting of performance information is done within the regulated timelines. Any contravention of reporting timelines constitutes non-compliance to the management practices and compromise accountability. Performance information reported must be for the period or cycle under review (month, quarter, and financial year) and aligned to the IDP, SDBIP and departmental business plans.

Failure of any line function department or entity to adhere to the defined timelines, demands the activation of the consequence management directives.

# Understandability

Information in the plans or reported performance must be presented in a manner that is easy to understand, interpret and must be tailored to suit all the intended audiences and stakeholders. It must be of the appropriate content, objective, relevant to the services tracked by the indicators under consideration for it to be understood by all audiences and stakeholders. It shall be sound, free of error(s), concise and shall be a consistent representation of the phenomenon or service under consideration. Planning and reporting information shall be complete, timely and it shall be in line with the corresponding service under consideration and/or indicator or target set.

# **Accountability**

A primary purpose for reporting performance information is to provide substantive accountability for the resources allocated and expended. It also serves to demonstrate responsiveness to all stakeholders of the municipality. Results based management requires that the organization assesses its performance against its predetermined objectives using a core set of indicators and targets. This makes accountability a core principle that drives organisational performance and information management in this era of results-based management.

# **Transparency**

Performance information must be made available to all stakeholders in a transparent manner. There must be open access to performance information to allow engagement by a broad range of stakeholders to influence and increase public awareness about the City's services. Openness facilitates public oversight and public confidence.

# Integration

The management of performance and information must be integrated and streamlined with other related Ekurhuleni processes and management practices. Integration must promote strategic alignment and support compliance.

### **Continuous Improvement**

This policy is aimed at continuously improving processes, procedures, practices and quality control measures in support of efficiencies in managing performance and information within the City. It must influence the culture of performance reporting through the development of performance improvement plans, the uptake of monitoring information and evaluation findings in decision making in order to foster effective and efficient service delivery improvement.

# Learning

Institutional learning from the management of organisational performance and information is a key principle upon which organisational performance reporting activities are based. The learning principle involves:

- identification and timely dissemination of lessons learnt from programme and project implementation;
- sponsoring implementable and relevant recommendations based on organisational performance reports to improve operational performance;
- promoting the uptake of the findings and lessons learnt into future design, implementation and management of programmes and daily activities.

# **Protection of Privacy and Confidentiality**

The sources of data and the data collection, collation, analysis and reporting often requires to reveal aspects of the data about clients, patients and service beneficiaries that are private, sensitive and confidential i.e. beneficiaries of treatment programmes or beneficiaries of indigent package of services. In order to protect confidentiality of data or information, on data or information areas where confidentiality of details is a concern, secondary data shall be used i.e. on the identification of beneficiaries of TB treatment as an example, names and surnames of beneficiaries or patients must be substituted by client file numbers when identifying these patients on the data sheets.

# 9.3 Operationalisation of the Organisational Performance Management System

Strategically, the organisational performance management system used by the City focuses on supporting the realisation of the City's development objectives, the achievement of predetermined results and promoting compliance with the statutory requirements. This is guided by the GDS, IDP, other relevant planning instruments as well as the applicable legislative framework. Such a strategic intent is pursued through rigorous planning focusing on effective alignment of resources (budget) to the intended deliverables (targets). Emphasis is placed on promoting simplified plans that are technically sound and responsive to the development and service delivery needs of the communities. Operationally, the functioning of the organisational performance management system is informed by the policy on organisational performance and information management. In this regard, the performance management system prioritises the following and these are undertaken within the cycle of organisational performance management (as per the municipal planning cycle):

# **Technical Planning Support**

Providing technical rigour in the planning processes with the aim of ensuring that the plans (content, indicators and targets) are adequately responsive, SMART and sound is the main objective of the planning component of the performance management system. Operationally, the following are engaged on:

# **Content Development:**

Focussed and consultative participatory community engagements used to gather community needs and priorities for inclusion in the service delivery plans assist in refining the planning contents and ensuring that the content in the plans is responsive to the needs and priorities of the various communities served by the municipality. Administratively, this entails implementing tailored approach and effective measures of gathering community needs, priority setting and aligning priorities with available budget. While this is a technical planning issue, it also serves as a way of expressing responsiveness to the needs of the community and serves as an indication of the municipality's commitment in adopting people-centred development planning and execution.

# **Selecting and Developing SMART Performance Indicators and Targets:**

This entails using conceptual, logical and practical techniques to influence the quality of indicators developed and targets set against specific development objectives and service delivery commitments. This process also considers the programme content to select what must be measured in line with the priorities and needs gathered in relation to the desired results (outputs and outcomes). A process of rigorous consultation with programme managers or line function departments and entities is followed as part of the technical refinement of both content (service focus and baseline), performance indicators and targets. Appropriate and accurate use of baseline information in setting and quantifying targets is always influenced.

# **Ongoing Service Delivery Monitoring**

The monitoring component of the performance management system focuses on tracking the implementation of commitments, progress made and observations on what is not going according to plan for early warning signals. In the main this functional area focuses on:

- Strengthening of the frontline service delivery monitoring and institutionalisation of onsite monitoring visits to identify service delivery bottle necks for early warnings and implementation of tailored interventions as corrective measures where necessary:
- Institutionalisation of and building of effective project management functions and capabilities to support the completion of capital projects and achievement of the intended project results;
- Strengthening of oversight reporting as a monitoring mechanism to improve accountability and transparency; and
- Tracking whether the commitments emanating from participatory community engagements and community priority setting are carried through as intended in order to express responsiveness.

### **Improvement of Performance Reporting**

The performance reporting component of the performance management system provides for learnings and facilitates early warning and improvements. It also serves as a mechanism to express accountability and transparency. In pursuit of achieving these objectives, the performance reporting component of the system focuses on:

- Developing customised organisational performance reporting protocols supported by detailed clarification of reporting requirements and standards;
- Supporting business units to account adequately for performance in their respective functional areas in order to improve the usefulness and reliability of performance reported to Council, communities and other external oversight bodies;
- Formalization of the process for collecting, collating, verification, transcription, analysis and auditing of performance data. This includes defining the processes, developing monitoring standards for data quality, defining the reporting protocols, clarification of roles and responsibilities throughout the performance management value chain;
- Ensuring that the reporting timelines and quality reporting requirements for compliance reports are met consistently;
- Ensuring that the information reported is useful and reliable at all times; and
- Providing evidence-based information in order to support the decision making processes of the municipality.

The strengthening of reporting mechanisms contributes significantly in promoting participatory development. This is expressed through transparent reporting to communities and other interest groups including other external oversight bodies thus promoting accountability.

As a service delivery organisation, the municipality commits to making evidence not just useful but usable and also commits to increasing the uptake of evidence in both practice and strategic decision making processes. Therefore, the institutionalisation of programme evaluations as part of the performance management system has become a preoccupation of the municipality. Evaluations promote critical reflection and review of policy and programmes through a rigours process of determining the worth and significance of programmes or interventions. As the City improves its integrated development planning, budgeting, implementation and reporting, evaluations are also made an integral part of its efforts that support its performance management system. A phased approach in the institutionalisation of evaluations has been adopted.

The approach to the incremental implementation of an evaluation programme is currently prioritising small scale process evaluations through insourcing and limited outsourcing to cater for the capacity challenges. As this matures, large scale evaluations i.e. infrastructure impact evaluations will be considered.

### 9.4 Linking Organisational Performance to Individual Performance

The link between organizational performance and individual performance is expressed as follows:

- a) Organisational performance is planned and driven by the individual;
- b) The work of the individual impacts on the organisational performance;
- c) A mutual relationship between the individual and organisational performance exists and is harnessed through clearly defined systems and processes;
- d) Clear roles and responsibilities of the individual are customised to impact on organisational performance;
- e) When an individual (provided with adequate enablers or resources) adheres to the logically defined roles and responsibilities or do more, organisational performance benefits;
- f) Performance contracts and agreements at an individual level and targeted service delivery at an organisational level serve as the expression of the relationship between individual performance and organisational performance; and
- g) Good organisational performance may link the individuals (from whom the good organisational performance is traced) to rewards.

# Principles Supporting an Established Relationship between Individual and Organizational Performance Management

- a) The performance contract and or agreement of the individual is developed in such a way that it deliberately influences organisational performance on related functional areas;
- b) There are clear linkages between intended deliverables in the individual performance contract or agreement and the overall organisational results on related functions;
- c) The roles and responsibilities of the individual are aligned reasonably and logically with the organisational performance results related to the individual's functional area:
- d) The individual's performance rating or assessment can be positive while the related organisational performance is rated negatively. However, this depends on the manner in which the expectations on performance on both sides (individual and organisational) are crafted and agreed on; and
- e) Efforts of individuals are apprised through the individual performance management system.

# 9.5 Legislative Instruments Governing Organisational Performance Management

Performance management in local government is governed by a series of legislation and policy guidelines. The most important of these include:

- Municipal Structures Act, 117 of 1998.
- Municipal Systems Act, 32 of 2000.
- Municipal Finance Management Act, 56 of 2003.
- Municipal Planning and Performance Regulations, 2001.
- Framework for the management of Performance Information, 2007.

### **TABLE 23: MUNICIPAL STRUCTURES ACT**

### DESCRIPTION

The Local Government Municipal Structures Act, 117 of 1998 provides for the establishment of municipalities in accordance with the requirements relating to categories and types of municipalities. It also provides for an appropriate division of functions and powers between categories of municipalities as well as the regulation of the internal systems, structures and office-bearers of municipalities.

### **APPLICATION**

Not only does the Structures Act place an obligation on municipalities to achieve the objects set in section 152 of the Constitution, but it unequivocally sets the responsibility for establishing Key Performance Indicators (KPIs) and attaining the standards set by them, at the highest level in municipalities.

That is why the executive mayor is tasked with the duty to identify and develop criteria for KPI's. It is also his/her duty to evaluate and review progress on an ongoing basis. (See section 56(3).)

TABLE 24: MUNICIPAL FINANCE MANAGEMENT ACT (MFMA)

### **DESCRIPTION**

The Municipal Finance Management Act (MFMA) establishes a very clear and strict framework to secure sound and sustainable management of the financial affairs of municipalities and other institutions in the local sphere of government. It establishes sound treasury norms and standards for performance measurement and reporting and provides for action against responsible persons for non-compliance.

The MFMA reinforces the provisions on municipal performance management as set out in the Systems Act by introducing a performance element

### **APPLICATION**

It is important to note that the Systems Act focuses on establishing processes and procedures for strategic planning and performance management in municipalities. This is complemented by MFMA provisions relating to the broader framework for integrating strategic planning, budgeting and performance management within a municipality.

The MFMA's requirements in terms of performance management starts with the budgeting process as the annual budget is one of the most important management tools of any municipality.

DESCRIPTION	APPLICATION
into budgeting and financial reporting within the	Section 17(3) of the MFMA starts off the whole process by
local government sphere	requiring the setting of measurable performance
	objectives in the early stages of the budgeting process.
	While other legislation prescribes the procedures and requirements for a performance management system, the MFMA focuses heavily on reporting on financial issues and performance with very clear instructions and guidelines with regard to roles and responsibilities of the mayor, chief financial officer and the accounting officer

TABLE 25: MUNICIPAL SYSTEMS ACT

#### DESCRIPTION

The Act provides for the core principles, mechanisms and processes that are necessary to enable municipalities to move progressively towards the social and economic upliftment of local communities, and ensure universal access to essential services that are affordable to all. It is important to note that it establishes a simple and enabling framework for the core processes of planning, performance management, resource mobilisation and organisational change which underpin the notion of developmental local government.

The Act also gives very specific attention to performance management as a whole chapter is devoted to it, indicating the concern of parliament with the question of local government accountability for service delivery.

In addition, the Act makes provision for the additional assignment of functions and powers to municipalities and prescribes the submission of annual performance reports by municipalities.

### **APPLICATION**

The Act requires the development of a performance management system. It in fact places a legal obligation on all municipalities to:

Establish a performance management system;

Set targets, monitor and review performance based on indicators linked to their IDP; Publish an annual report on performance for the Council, staff, the public and other spheres of government; Incorporate and report on a set of general indicators prescribed nationally by the minister for Local Government.

Have their annual performance report audited by the Auditor-General; and Involve the community in setting indicators and targets and reviewing municipal performance.

It is important to note that performance management in the context of this Act does not refer to performance of employee's others than Section 56 employees9. While the two are related and the Act requires that senior officials are appointed on performance contract, there is no legal requirement that a municipality should have a performance management system for its employees. Performance Management in Chapter 6 of the Act refers to management of the *municipality as an organisation*.

Sec 46 of the Act states that a municipality must, for each financial year, prepare a performance report that reflects:

DESCRIPTION	APPLICATION
	The performance of the municipality and of each service
	provider during that financial year;
	A comparison of the performance in relation to targets set in the previous financial year;
	The development of service delivery priorities and the performance targets set by the municipality for the next financial year; and Measures taken to improve performance.

### **CHAPTER 10: IDP CORPORATE SCORECARD**

### **10.1** Key Focus Areas for the term (2017/2021)

The alignment of the City of Ekurhuleni's Growth and Development Strategy 2055 to the National Development Plan 2030 and the Gauteng Vision 2055 was discussed in detail in the previous chapter (Chapter 3). Included in the previous chapter's discussion was an illustration of how the Strategic Objectives align to the GDS 2055 imperatives. The aim of this chapter is to outline the 5-year plan for the implementation of the City's GDS 2055 imperatives and the key priorities for the term as pronounced by the new political leadership. It is critical to indicate that although the 5-year plan is the City's plan; the City has begun to establish long term partnerships for service delivery, integrated development and inclusive economic growth with other stakeholders. The key priorities that will be implemented to create a liveable; Delivering City by 2021 are summarized in the table below.

TABLE 27: KEY FOCUS AREAS FOR THE 2017/2021 TERM

GDS 2055 Imperative	Strategic Objective	Key focus areas/Interventions for 2017/21	
Re Urbanize: To achieve urban integration	To Promote Integrated Human Settlements through massive Infrastructure and	<ul> <li>Making land available for development;</li> <li>Building capacity in the area of infrastructure services;</li> <li>Develop and implement an integrated infrastructure Master Plan for effective and efficient bulk infrastructure development;</li> </ul>	
Services rollout	Intensify the construction, reconstruction and maintenance of roads and storm water infrastructure to integrate Ekurhuleni;		
		Construction and maintenance of pedestrian walkways/sidewalks;	
		Implementation of the IRPTN as part of creating a dynamic transportation system;	
		Build a reliable transport and Logistics infrastructure;	
			Electrification of all informal settlements;
		Increased provision of public lighting (street lights and high mast lights);	
		Implementation of the Ekurhuleni Power Station to broaden accessibility and ensure security of supply;	
		Implementation of 6 Mega housing projects to increase access to different housing typologies;	
		Provision of serviced stands;	
		Up-scaling of services in informal settlements to make them more habitable;	

GDS 2055	Strategic Objective	Key focus areas/Interventions for 2017/21								
Imperative		Fast tracking the proclamation of townships;								
		Re-blocking of informal settlements;								
		Continued investment in water infrastructure to ensure security of supply;								
		Digital City Programme - Accelerate Wi-Fi rollout in Libraries, Clinics, Customer Care Centres and FET's;								
		<ul> <li>Urban and township renewal and implementing a programme on bad properties in the CBDs;</li> </ul>								
		Continuous waste removal services; and								
		Roll out of 240l bins.								
Re Govern To achieve effective cooperative governance	To Build a Clean, Capable and Modernised Local State	<ul> <li>Improved relations between the staff and employer;</li> <li>Organizational culture;</li> <li>Improved service delivery through visible and impactful programmes supported by Capital Expenditure in line with the service delivery backlogs;</li> <li>Establish a commission to fight Fraud and Corruption;</li> </ul>								
		Implement an Anti-Fraud campaign in Ekurhuleni;								
		Improve community participation in service delivery through the Siyaqhuba service delivery programme;								
		Create a Single Brand Identity for the City of Ekurhuleni;								
		Establishment of the Ekurhuleni Development Agency (EDA);								
		Rationalization of the Macro and Top structure of the City;								
		Launch of a service delivery Application (APP) for communities to report service delivery challenges;								
		Sustain a clean audit administration;								
		E-procurement processes implementation;								
		Development of the Germiston Precinct;								
		Development and implementation of a Growth Management strategy;								
		Revenue protection and enhancement								
		- Implement measures to minimize billing inaccuracies;								
		Roll out of more pay points and continue to market the e-Siyakhokha Platform to increase revenue collection;								
		Develop a by-law on outdoor advertising and improve collections on outdoor advertising;								
		- Implement a strategy to curb illegal electricity connections and cable theft;								

GDS 2055 Imperative	Strategic Objective	Key focus areas/Interventions for 2017/21
-		- Strengthen the War on Leaks programme;
		- Improve on line system of checking accounts;
		- Roll out of Kiosks at malls;
		- Implement monthly finance open days;
		<ul> <li>Intensify traffic fine collection procedures;</li> <li>Implement the parking meter programme;</li> <li>Roll out meters at unmetered properties,</li> <li>Eliminate interim meter reading;</li> <li>Improve expenditure management;</li> </ul>
		<ul> <li>Improve risk maturity;</li> <li>Improve project management capacity and maturity;</li> <li>Human capital development;</li> <li>Improve customer relations management.</li> </ul>
Re Mobilize To achieve	To Promote Safer, Healthy and Socially	Improve access to Primary Health Care (PHC) by constructing additional PHC facilities;
social empowerment	Empowered Communities	Extension of service hours for some of the PHC facilities together with the Gauteng Department of Health;
		Improve access to health care for pregnant people to decrease mother-to-child transmission in the case of HIV positive mothers;
		Construction of substance abuse centres;
		Drug and alcohol abuse programmes;
		Strongly pursue the issue of an Ekurhuleni University;
		Extension of bursaries to academically qualifying students to study at Universities and TVET colleges;
		Increase sector partnerships to increase bursaries;
		Implementation of the unemployed graduates and youth work readiness programme - placement of unemployment youth with external companies and within the municipal departments to gain work experience;
		Building capacity to minimize outsourcing of key municipal services;
		Create a signature mega arts and culture festival for the City;
		Promote arts culture and heritage through the commemoration of the legacy of eminent leaders such as Chris Hani and OR Tambo;
		Constructions of heritage museums;
		Implementation of arts, culture and theatre programmes;

GDS 2055	Strategic Objective	Key focus areas/Interventions for 2017/21
Imperative		Indigent support and the provision of free basic services to indigents;
		Developing and implementing job creation strategies for indigents to exit the indigent register;
		Implement health and social care programmes;
		Construct additional sports and recreational facilities;
		Implementation of sports and recreation programmes;
		Implement school and youth programmes;
		Establishment of Youth empowerment centres across Ekurhuleni together with the National Youth Development Agency (NYDA);
		Construction of Early Childhood Development Centres (ECD) and implementation of ECD programmes;
		Construction of Library facilities and implementation of programmes;
		Improve Environmental Health Services;
		Implement the renaming programme;
		Provide access to cemeteries and acquiring additional land for cemeteries;
		Provision of land for churches/religious purposes.
		Construction of additional fire stations;
		Recruitment of additional fire fighters;
		<ul> <li>Provision of Specialized vehicles to improve access to emergency services and to meet emergency response times (fire, ambulances, disaster);</li> </ul>
		Implement programmes to improve response times to disasters;
		Establishment of a land invasion unit to prevent and address illegal land invasions;
		Increase the number of metropolitan police officers to render an effective and efficient policing service within Ekurhuleni;
		Implement a multi-disciplinary approach to by-law enforcement through a by-law enforcement centre;
		Introduction of a parking meter initiative;
		Implement programmes/interventions to strengthen community policing, community cooperation and

GDS 2055 Imperative	Strategic Objective	Key focus areas/Interventions for 2017/21								
•		responsible citizenry to reduce crime and related incidents;								
		<ul> <li>Increase police visibility to increase the safety of vulnerable woman and children;</li> </ul>								
		Construction of additional Metropolitan Police Offices;								
		Appointment of traffic wardens to improve traffic law enforcement;								
		Education and awareness programmes on safety; and								
		Strategies to reduce gander based violence.								
Re Generate To achieve environmental well being	To Protect the Natural Environment and Promote Resource Sustainability	<ul> <li>Promote sustainable water use - waste water reclamation and reuse and rain water harvesting policy;</li> <li>Development and upgrading of different levels of parks (e.g. Regional Parks, Community parks etc.);</li> <li>Revitalization of legacy projects (beautification of town entrances);</li> <li>Air space development in the Northern Region (Waste Management);</li> <li>Provision of additional disposal facilities, buy back centres and recycling facilities in townships;</li> <li>Provision of bulk walk in containers for waste minimization in informal settlements;</li> <li>Implement/pilot recycling programme;</li> <li>Provide support to waste cooperatives and SMME's</li> <li>Launch of the urban management drive;</li> <li>Implement the "Keep Ekurhuleni Clean" project;</li> <li>Implement the alternative and renewable energy strategy to limit dependence on the national grid;</li> <li>Protection of national resources;</li> <li>Strengthen pollution control;</li> <li>Biodiversity protection and conservation;</li> <li>Climate change adaptation and mitigation; and</li> <li>Environmental education and awareness programmes.</li> </ul>								
Re Industrialize To achieve job creating economic	To create an enabling environment for inclusive growth and	<ul> <li>Environmental education and awareness programmes.</li> <li>Implementation of the 10-point economic revival plan towards building an inclusive economy:         <ul> <li>Aerotropolis Master Plan Implementation;</li> </ul> </li> <li>Manufacturing revitalization;</li> </ul>								
growth	job creation	- Enabling public transport system;								
		Acceleration of the Spatial Economic Zones (SEZ) and Industrial Development Zones(IDZ) programme;								
		- Land availability for strategic development;								
		- Implementation of township economies strategy;								
		- Support of SMMEs through public procurement;								
		- Massive infrastructure investment;								

GDS 2055 Imperative	Strategic Objective	Key focus areas/Interventions for 2017/21										
		- Promote localization and production; and										
		<ul> <li>Skills and capability development and institutional stabilization.</li> </ul>										
		Upgrading and renaming of the Springs Fresh Produce Market;										
		Implementation of the Vukuphile Programme;										
		Implementation of the Mintirho Community Empowerment Programme;										
		Improve Local Economic Development through Seed Funding (Grant in Aid);										
		Implement the Agricultural Development programme;										
		Increase investment attraction;										
		Implementation of the City of Ekurhuleni Tourism Strategy – including tourism infrastructure development.										

### 10.2 Strategic Objectives

The indicators and targets for the current term (2017/2021) are aligned to the GDS imperatives and are structured around the five strategic objectives that the City of Ekurhuleni strives to achieve in the current term. The next part of the chapter discusses the 5 Strategic Objectives and what they seek to deliver to achieve the strategic intent and priorities of the City.

### 10.2.1 Strategic Objective 1:

## To promote integrated human settlements through massive infrastructure and services roll out

This Strategic Objective seeks to promote integrated human settlements by ensuring universal access to basic services. National Government categorizes water, sanitation, waste removal and electricity as basic services. The biggest priority in the provision of basic services is improving the lives of people living in informal settlements. In this regard Ekurhuleni will in the current term accelerate the formalization and regularization of informal settlements. The regularization of informal settlements will make the settlements accessible and therefore enable the municipality to provide the required basic services. The formalization of townships to increase security of tenure is also high in the agenda of improving the lives of the people of Ekurhuleni.

To reduce the current housing backlog consisting of informal settlements, backyards dwellings, waiting list and hostels; the City seeks to accelerate the provision of various housing typologies through the human settlements mega projects. The mega projects are key to the provision of sustainable and integrated human settlements and will have a catalytic impact on growth and

radical transformation of human settlements and spatial planning in Ekurhuleni. These mega projects will provide opportunities for densification, mixed-use and transit-oriented development, linking economic opportunities to places of residence; and are planned according to Gauteng's Transformation, Modernization and Reindustrialization programme.

Through the mega projects Ekurhuleni will accelerate:

- the roll out of housing units constructed in precincts in support of integrated human settlement and transport orientated development;
- the procurement of well-located land in support of integrated human settlements and transport orientated development;
- the provision of alternative tenure options in respect of the identified need; and
- servicing of stands for subsidized human settlements

The human settlements mega projects will yield a total of 59 000 serviced stands as well as 100 000 housing opportunities comprising of subsidized units; social housing units and fully subsidized walk-up units in the current term. Parallel to the mega projects the provision of interim basic services meeting the required standards for households living in informal settlements will be intensified. With regards to water and sanitation, the Ekurhuleni will accelerate the provision of bulk water and sanitation infrastructure to support new developments, the informal settlements re-blocking programme as well as the formalization of informal settlements. Water and sanitation programmes will be aligned with the human settlements mega projects of providing serviced stands and housing unit to the community of Ekurhuleni. Additional reservoirs will be constructed to create additional capacity and to ensure security of supply. Access to water and sanitation will be increased in informal settlement. A water demand management programme will be implemented to reduce water losses.

Electrification of informal settlements is central to the pro-poor agenda for the term. A programme to electrify all informal settlements between 2016 and 2021 will be implemented to ensure universal access to electricity. The electrification programme will be accelerated in support of formalization and the human settlements mega projects. The provision of street lights and high mast lights is planned for, and more pre-paid electricity meters will be provided. The City of Ekurhuleni will continue rolling out 240l bins to the Ekurhuleni community and informal settlement will be provided with bulk walk in containers parallel to the normal waste management services provided.

Roads and storm water services are not part of basic services but are essential for township establishment, improving mobility and accessibility as well as integrating Ekurhuleni. The municipality will continue to construct and maintain roads and storm water infrastructure within Ekurhuleni. Roads and storm water projects are also critical to the informal settlements reblocking and formalization programme. The completion of the IRPTN project is central to ensuring that the people of Ekurhuleni have access to a dynamic public transport system. The City will also continue to deliver WIFI to public facilities to promote connectivity within Ekurhuleni.

### 10.2.2 Strategic Objective 2:

### To Build a Clean, Capable and Modernised Local State

The governance of the City embraces (1) the constitutional, legislative, political and participatory mandate of the municipality as expressed in its legislative, executive and judicial structures and organs (2) the planning, fiscal and asset management systems and processes in its administration (3) the participatory interface with its social partners and (4) the management of its operations.

The City of Ekurhuleni intends to continue running a clean administration and sustaining the clean audit. Financial sustainability is also central to good governance; as a result, the issues of revenue generation, accurate billing, and supply chain management must be streamlined. The implementation of a public tendering process will ensure transparency of Ekurhuleni's supply chain management processes and the vetting of all relevant staff will be implemented to prevent corruption. Revenue enhancement is central to good governance and ensuring that the City has sufficient funds to deliver on the promised services to the community. In this regard more payment points will be rolled out and the **e-Siyakhokha** platform will be marketed to support the targeted 95% collection rate. The City intends to continue implementing programmes to reduce Non-Revenue Water and Unaccounted for Electricity.

The Pro Poor Agenda coupled with accelerated service delivery has implications on the quality of services delivered as well as the expenditure on the approved capital budget. As a result, improved performance on capital expenditure against the budget for capital projects; and improved project management capabilities are critical to achieving 95% capital expenditure.

The establishment of a commission to fight Fraud and Corruption and the introduction of quarterly reporting on fraud and corruption in Ekurhuleni is one of the many projects to be implemented in the current term towards good governance.

The City continues to involve the community in the planning and budgeting process of the municipality through the IDP and budget consultation processes as well as the **Siyaqhuba** rapid service delivery programme led by Executive Mayor and the **Lungile Mtshali** community based development programme amongst others. The Siyaqhuba campaign is part of a drive towards ensuring that service delivery issues are rapidly responded to and more importantly that the people of the City are in close proximity with public representatives.

Ekurhuleni will continue to promote more active participation of the community in the affairs of local government and to forge good relations with stakeholders. Central to this is the empowerment of ward councilors and ward committees to perform their functions effectively, as well as mechanism to empower the community to participate in the affairs of the City.

The objectives of the municipality are; to be driven by service excellence to deliver quality and sustainable services in an effective and economic manner, and to improve the lives of the Ekurhuleni community. As a result, Ekurhuleni is under pressure to improve service delivery through the maximization of administrative and operational efficiencies. The effective use of information technology (IT) is a key success factor to enabling municipal agility and the ability to respond speedily to citizens' demand for services.

The implementation of the Mobile Application (MobbiApp) which enables residents to log in queries and complaints for any department will ensure the City provides a professional, automated and responsive CRM supported by a functional APP for communities to report service delivery challenges. The City will continue to strive to achieve the 24-hour turnaround time to service delivery interruptions such as water leaks, street-lighting, malfunctioning traffic lights and many similar disruptions.

Batho Pele is central to good public service and is an integral part of the business of the municipality. Through the Customer Relations Management Department, the City will ensure that it provides seamless, automated, uniform and reliable customer service in a clean, safe and functional urban environment.

Performance Management processes have been strengthened and business processes improved to ensure effective service delivery and rapid results, especially in the project delivery area. Risk Management and risk based internal audit continue to form an integral part of the municipality's governance processes. The City will continue to ensure that internal audit and risk planning is informed by the municipality's five-year Integrated Development Plan (IDP) and annual Service Delivery and Budget Implementation Plan (SDBIP).

To further transform and improve planning and budgeting processes and contribute to greater transparency and consistency of the City's finances, the Municipal Standard Chart of Accounts (mSCOA) will be implemented from 1 July 2017, in complying with National Treasury requirements. The separation of powers model will continue to be implemented to strengthen good governance through the strengthening of the oversight role of the Legislature. The City's Human Capital remains one of its assets. Skills development and the filling of critical vacancies will also be strengthened in the term of office.

### 10.2.3 Strategic Objective 3:

### To Promote Safer, Healthy and Socially Empowered Communities

The GDS 2055 requires that the capacity and capability of social capital, including social cohesion and mobilization and partnerships be strengthened. This strategic objective addresses issues related to access to healthcare, Early Childhood Development (ECD) embracing the needs of vulnerable groups and social development amongst others.

Access to Primary Health Care (PHC) will be improved by constructing and operationalizing PHC facilities, and intensifying health awareness campaigns. Efforts will be made to ensure that children and the elderly have access to health care to maintain good health; and to make sure that economically active people are tested and treated for HIV and TB. The City plans to increase access to health care by extending the operating hours of some of the primary health care clinics to 24hours together with the Gauteng Department of Health.

In the quest to reduce the rate of drug addiction in the City, awareness programmes will be implemented coupled with the provision of drug rehabilitation centres.

Environmental health programmes such as the interventions to reduce rodents in formal and informal settlements will be implemented to reduce the risk of diseases and to contribute to a healthy life for all.

The provision of social services and amenities is critical to ensuring sustainable communities and to restore people's dignity. Concerted effort will be made to provide sports recreation arts and culture facilities in the current term. Access to basic education and a skilled community is central to economic growth; as a result, Ekurhuleni will continue to provide libraries and Early Childhood Development Centre's (EDCs). ECD training as well as SRAC programmes and campaigns will also be intensified.

Programmes that empower the youth, elderly, woman, disabled and children will be implemented together with the mainstreaming of issues of gender, the youth and the disabled. To increase access to education and to contribute to a skilled Ekurhuleni workforce; plans are in place to pursue the issue of an Ekurhuleni University and broaden the bursary programme to the youth.

Registered indigents will continue to receive free basic services and the City will continue to ensure that poor households who qualify, register as indigents. Plans are in place to review the indigent policy to ensure that vulnerable groups are afforded an opportunity to register. The City will intensify the food bank project to improve food security which is central to reducing poverty.

Availability of land for burial purposes will be central to the agenda for the term. Land will be identified and reserved for the development of cemeteries. The City will also continue to intensify the awareness campaign on alternative burial methods.

Crime fighting initiatives will continue in partnership with agencies such as the South African Police Services (SAPS) amongst others. By-law enforcement will be intensified to ensure a safe and vibrant City. Community safety programmes will be implemented and traffic wardens will be deployed to ensure that the people of Ekurhuleni are safe. The City will continue to provide disaster and emergency management services and facilities to ensure the reduction of loss of life and property as a result of fires and related dangers, and natural or other forms of disasters. Disaster risk management will be strengthened by promoting and implementing public education and awareness strategies and campaigns at civic, institutional and business sector levels; including primary and secondary schools.

### 10.2.4 Strategic Objective 4:

### To Protect the Natural Environment and Promote Resource Sustainability

The GDS 2055 stresses the importance of mainstreaming biodiversity and ecosystem goods and services in the economy so that their full value is recognized, and that their sustainable use is rewarded. The City will continue to protect the natural environment and promote resource sustainability. Alternative sources of energy will be investigated and implemented. The Ekurhuleni waste minimization strategy will be implemented to reduce waste in the landfill sites and to improve the cleanliness of the City; this will also include intensifying the recycling project. Air quality monitoring, rehabilitation of water bodies, compliance with standards for drinking water will be at the center of the efforts to protect the natural environment. The City will continue to provide and upgrade the different levels of parks to enable communities to have access to well-developed open spaces. Water conservation, demand management and pollution prevention to protect the existing water resource capacity will be central to the agenda during the term.

Urban management is central to the "Keep Ekurhuleni Clean" project as a result it will be intensified through the Siyaqhuba service delivery drive.

### 10.2.5 Strategic Objective 5:

### To create an enabling environment for inclusive growth and job creation.

The success of the social and economic transformation agenda depends on the continuous renewal of social and technical infrastructure, which in turn requires that investment be attracted and retained. An enabling climate for investment is critical for economic growth and social development. For this reason, the City will implement the 10-point economic plan, as part of the Gauteng Province Radical Economic Transformation Agenda; which will enable the City to create an enabling environment for sustainable economic growth and job creation. To be implemented as part of the 10-point economic plan are the following projects:

- Aerotropolis Master Plan Implementation;
- · Manufacturing revitalization;
- · Enabling public transport system;
- Acceleration of the Spatial Economic Zones (SEZ) and Industrial Development Zones(IDZ) programme;
- Land availability for strategic development;
- Implementation of township economies strategy;
- · Support of SMMEs through public procurement;
- · Massive infrastructure investment;
- Promote localization and production; and
- Skills and capability development and institutional stabilization.

It is important to facilitate the growth of SMMEs and Cooperatives. Skills development and incubation of small businesses and dedicated structural support to the informal sector are key areas of focus. Priority will also be given to strengthening the agricultural sector. The youth, women, disabled and households in the indigent register will be prioritized to benefit from job creation initiatives. Strategic partnerships with industries is critical to the success of Ekurhuleni's job creation strategies. Procurement processes will allow for the involvement of SMMEs, Cooperatives etc.

The EPWP programme, Vukiphile as well as Mintirho will be intensified in the quest to create jobs for the unemployed. The provision of stable energy supply and economic infrastructure will be at the fore front of promoting economic growth.

The provision of bursaries to students will contribute to the skilling of the youth in Ekurhuleni. Skills development in the form of learnerships, apprenticeships, on the job training, placement programmes with sector education and training authorities will be investigated and implemented.

### 10.3 2017/2021 City Scorecard

The City's IDP performance scorecard will serve as a performance contract between the municipality and Ekurhuleni residents during the current term of Council 2017 /2021. A set of community facing performance indicators have been carefully selected to demonstrate the City's commitment toward the Pro-poor agenda; these indicators must be read together with the annual Service Delivery and Budget Implementation Plan (SDBIP) which provides detailed annual outputs to be measured toward the realization of the IDP objectives.

TABLE 28: IDP SCORECARD

												The number of reported road traffic fatalities will be reduced by 10% over the period from 204 in 2017/2018 to 200 in 2018/2019, 196 in 2019/2020 to 192 in 2020/2021. The population figure used for the calculation is 3379104 based on the 2016 Ekurhuleni Community survey by Stats SA.
			TR7. 2	Average number of fatalities per fatal crash	18	1	1	1	1	1	1	The indicator measures the number of road traffic deaths divided by the number of fatal crashes per year as reported within the municipal boundaries.  The formula for the indicator is as follows: (1) Number of road traffic deaths / (2) The number of fatal crashes as reported per year within the municipal boundary.  The unit of measure is the average number of fatalities.
GDS Thematic Areas: Re-Urbanise to achieve sustainable urban integration	Energy	EE1. Improved access to electricity	EE1. 1.	Percentage of households with access to electricity	85.6% <sup>9</sup>	<sup>10</sup> 88.56 %	86.2%	86.79%	87.38%	87.97%	88.56%	Percentage of households that have access to electricity services within the municipal area.

Number road traffic deaths (389) divided by number of fatal crashes (336) in 2016/2017
 Currently 85.6% of 1,015,465 households – including informal settlements i.e. 869 248 are already connected.
 88.56% translates to 30 000 households to be connected for the term (this means that 6000 connections will be done per year) to increase connectivity from 85.6% to 88.56%.

National Prescribed In	ndicators	I	1			ı						
												The formula for the indicator is: (1) Tonnes of waste disposed of in a licensed landfill / (2) total population derived from StatsSA's 2016 Community Survey equals 3 379 104. The baseline is calculated as tonnages disposed in 2016/17 @1 164 104 tonnes divide by population 3379104. Estimated waste tonnages are programmed as follows: Yr 1=1 224 753, Yr 2 =1 288 594, Yr 3=1 355 729 & Yr 4=1 426 363  Ideally in terms of the waste hierarchy waste tonnage would decrease over time. In reality there are certain assumptions that underplay- KPI targets such as population growth and declining economic local economic activities, solid waste generated outside CoE boundaries disposed in CoE landfill sites. Waste generated by tourists and visitors of CoE may distort per capita determination. The key assumption of this KPI and its target is that tonnages of solid waste will grow by an average of 5.21% from current
			ENV2	Tonnes of	232 821	0.10	0	0.068	0.072	0.10	0.10	baseline. The indicator measures the

GDS Thematic Areas: Re-Urbanise to achieve sustainable urban integration  IDP Strategic Objective 1: To promote integrated human settlements through massive infrastructure and services rollout	City Planning	Improved security of tenure		% reduction in the backlog of townships to be regularized	27 <sup>20</sup> (of 145 done)	100% (118 townsh ips)	33%	33%	34%	0	0	The indicator measures the total count of existing and unproclaim residential areas whose township planning or establishment process has been completed. The process entails understanding of the current legal status of existing townships (predominantly existing black community townships) and completing the town planning processes thereof (i.e. analyzing status quo of the township in terms of land use and encroachments, ensuring that there is an endorsed general plan, proclamation of township if necessary, opening of a township register and upgrading of ownership).  The regularization of the townships will improve the security of tenure; and that enables the beneficiaries who had been allocated the houses through leasehold agreements to obtain Title Deeds as a proof of land ownership.
IDP Strategic Objective 3 To Promote Safer, Healthy and Socially Empowered Communities	Ekurhuleni Metropolitan Police Department (EMPD)	Improved community safety		% increase in interventions to reduce crime and related incidents	10% (217)	50%	10%	10%	10%	10%	10%	The indicator measures the total count of interventions implemented to reduce crime and related incidents.  Results obtained from tracking the interventions implemented to reduce crime and related incidents serve as a measure of EMPD's role in ensuring a safer city. An intervention includes Operational Plans of the Department; Joint Operational Plans and social crime awareness campaigns run by the Department.

NB: From the beginning of the Township Regularization Programme, there was a backlog of one hundred and forty five (145) townships that were not proclaimed and the City Planning Department has already regularised twenty seven (27) townships from the previous financial years (2011-2016). At present, there is a backlog of one hundred and eighteen (118) townships pending regularization. The Department is therefore targeting to complete the remaining townships over a period of three years (3) in order to align with the National Department of Human Settlement Title Deeds Restoration Programme intending to hand over Title Deeds to all relevant beneficiaries before the end of 2019 countrywide. As a result, the enumerator is the three (3) year target and the denominator is the backlog of one hundred and eighteen (118) townships. The 5 year is target that makes up the 100% = 2016/17 (39/118X100=33% townships per year); 2017/18 (39/118X100 townships=33%); 2018/19 (40/118X100=34% townships completed).

IDP Strategic Objective 2 To Build a Clean, Capable and Modernised Local State	Finance	Financial Viability		% increase in revenue collection	94%	94%	94%	94%	94%	94%	94%	The indicator tracks the cash collected for amounts billed during a period.
GDS Thematic Area: Re-mobilise to achieve social empowerment  IDP Strategic Objective 3  To Promote Safer, Healthy and Socially Empowered Communities	Health and social Development	Increased access to primary health care services		% increase in health facilities constructed	8121	19% 22	4%	023	0	0	9%	The indicator measures the output of capital investment on infrastructural development programme by tracking the percentage increase in newly constructed facilities to render Primary Health Care services. A total of sixteen (16) health facilities will be constructed in the current term. Of the sixteen; ten (10) are new for areas where clinics never existed and six (6) are newly built clinics to replace the smaller and aged clinics and are therefore not adding to the total increase only the 10 is adding to the increase in number of PHC. The 6 replacement clinics are equally important because they improve access to and quality of the health facilities The list of clinics to be build are, Selope Thema*, Esangweni*, Dukathole**, Crystal Park**, Tsietsi*, Khumalo**, Kempton Park**, Barcelona**, Geluksdal*, Bakerton*, Chief A Luthuli*, Duduza*, Esselen Park Tembisa*, Lindelani X9*, New Tswelopele Winnie Mandela*, Civic Centre Clinic Germiston**

<sup>21</sup> The number of clinics in Ekurhuleni in the previous term was 81. In 2016/2017 a total 6 facilities were completed (3 new and 3 replacement facilities).

22 This translates into an increase of 12% in new facilities (10 new facilities) and 7% in replacement facilities (6 replacement facilities). In 2016/2017 4% - a total 6 facilities were completed (3 new and 3 replacement facilities).

23 Pre preparation phase for the construction of the 7 clinics will commence in the 17/18 financial year. This includes site proclamation and feasibility studies.

This also includes Vukuphile emerging contractors.  Sustainable businesses are businesses that have existed for more than two years and are increasing on turn-over, assets and labour

#### **CHAPTER 11: MULTI YEAR FINANCIAL PLAN**

#### 11.1 Background

This chapter outlines the funding and budget approach to the 2018/19 IDP review and the 2018/19 – 2020/21 MTREF.

Section 16(1) of the Municipal Finance Management Act (MFMA), 2003 (Act 56 of 2003) stipulates that the Council of a municipality must approve an annual budget for the municipality for each financial year before the start of that financial year. Section 16(2) stipulates that in order to comply with subsection (1), the mayor of the municipality must table the annual budget at a council meeting at least 90 days before the start of the budget year.

Section 22 of the MFMA also stipulates that immediately after an annual budget is tabled in a municipal council, the accounting officer must make public the annual budget and documents in terms of section 17, invite the local community to submit representations in connection with the budget, and submit the annual budget to the National Treasury and the relevant provincial treasury in printed and electronic formats.

Section 23(2) of the MFMA stipulates further that "after considering all budget submissions, the Council must give the Executive Mayor an opportunity –

to respond to the submissions; and

if necessary, to revise the budget and table amendments for consideration by the council'.

After the tabling of the draft budget and IDP the public consultation meetings will commence (outreach sessions) with various stakeholders to strengthen the principles of people centered governance, transparency and accountability.

Section 24 of the MFMA contains the requirements regarding the approval of annual budgets:

- "(1) The municipal council must at least 30 days before the start of the budget year consider approval of the annual budget.
- (2) An annual budget -
- (a) must be approved before the start of the budget year;
- (b) is approved by the adoption by the council of a resolution referred to in section 17(3)(a)(i); and
- (c) must be approved together with the adoption of resolutions as may be necessary -
  - (i) imposing any municipal tax for the budget year;
  - (ii) setting any municipal tariffs for the budget year;
  - (iii) approving measurable performance objectives for revenue from each source and for each vote in the budget;
  - (iv) approving any changes to the municipality's integrated development plan; and
  - (v) approving any changes to the municipality's budget related policies.

(3) The accounting officer of a municipality must submit the approved annual budget to the National Treasury and the relevant provincial treasury."

# Community consultation process on the Draft 2018/19 MTREF and Integrated Development Plan

In consultation with the Office of the Legislature public participation meetings in the various Customer Care Areas around the City are arranged.

The public meetings will be held in all 20 Customer Care Areas in April 2018. The tabled budget will also be placed on the City's website, as well as be distributed to all community libraries and pay points immediately after tabling to Council, for access by all stakeholders.

The process of distributing the draft documents at the libraries and pay points is referred to as the Budget Tips-campaign. Budget tips/comments will be submitted in a form provided or via a dedicated electronic mail address at budgettips@ekurhuleni.gov.za.

The presentations detailing the Draft 2018/19 IDP, MTREF, Proposed Tariffs and Budget Related Policies will be prepared for the public meetings.

#### 11.2 2018/19 MTREF policy statement and guidelines

The Ekurhuleni GDS 2055 and the IDP together form the primary point of reference for preparation of the MTREF.

According to section 25 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000), each municipal council must, after the start of its elected term, adopt a single, inclusive and strategic plan (Integrated Development Plan) (IDP) for the development of the municipality which links, integrates and coordinates plans and takes into account proposals for the development of the municipality and which aligns the resources and capacity of the municipality with the implementation of the said plan. The IDP forms the policy framework and general basis of the budget. A few are listed concerning the direction in which the MTREF will eventually have to lead.

## 11.3 Alignment with national directives

The 2018 Budget Review emphasised that, although global risk factors remain elevated, the world economy continues to provide a supportive platform for South Africa to expand trade and investment. The world economic growth is at its highest since 2014 and continues to gather pace with Gross Domestic Product (GDP) growth increasing across all major economies.

The GDP growth rate is forecasted at 1.5 percent in 2018, 1.8 percent in 2019 and 2.1 percent in 2020. Statics South Africa's December 2017 economic statistics showed an unexpected improvement in the economic outlook, largely as a result of growth in agriculture and mining.

The main risk to the economic outlook are continued policy uncertainty and deterioration in the finance of state-owned entities.

These economic challenges will continue to pressurize municipal revenue generation and collection hence a conservative approach is advised for projecting revenue. These circumstances make it essential for municipalities to reprioritize expenditure and implement stringent cost-containment measures.

The following matters directly informed the 2018/19 Budget:

#### 11.3.1 Local government conditional grants and additional allocations

Since the 2017 Medium Term Budget Policy Statement (MTBPS) reprioritisation and reductions undertaken have affected planned spending for 2018/19. Local government direct and indirect transfers absorb 18.8 per cent of the reductions. A total of R13.9 billion has been cut from direct local government conditional grant allocations for the Medium-Term Expenditure Framework (MTEF) period ahead since the 2017 MTBPS was tabled. Indirect grants to local government have been reduced by an additional R2.2 billion.

The reductions did not affect all conditional grants, and not all grants were reduced by the same percentage. The infrastructure conditional grants, particularly the larger ones, were mainly affected as this was considered the most practical approach. The overall impact of reducing this funding affects capital programmes, therefore, local government's share of the reductions is higher than their share of the division of revenue, given that municipalities receive a number of infrastructure grants. The average reductions over the medium term are 3.5 per cent of local government allocations.

Allocations to the local government equitable share will continue to grow over the next three years, alongside a significant reduction in conditional grants. The total value of conditional grants directly transferred to local government increases from R43.3 billion in 2018/19 to R44.8 billion in 2019/20 and R47.8 billion in 2020/21. The equitable share and the sharing of the general fuel levy constitute additional unconditional funding, of which the equitable share is designed to fund the provision of free basic services to disadvantaged communities.

The 2018 Budget provides for R382.8 billion to be transferred directly to local government and a further R21.8 billion allocated to indirect grants for the 2018 MTREF. The division of available funds to local government have increased to R118.5 billion or 9 per cent of the national revenue for 2018/19. These funds are expected to increase to R126.9 billion in 2019/20 and to R137.5 billion by 2020/21. Total direct allocations to local government grow at an annual average rate of 7.5 per cent over the MTEF period. The total spending on local government increases to 9.5 per cent of national non-interest expenditure when adding indirect transfers.

#### 11.3.2 Changes to local government allocations

An amount of R3.4 billion is added to the *local government equitable share* over the medium term. This will fully cover the increased municipal costs of providing free basic services to a growing number of households, and takes account of likely above-inflation increases in the costs of bulk water and electricity.

Reductions to the *public transport network grant* are much larger in the outer years of the MTEF period, giving the Department of Transport and the National Treasury time to review the

sustainability of public transport plans, and to assess whether some cities should put projects on hold while they revisit system design.

The 2017 MTBPS announced a new funding mechanism to support recovery plans for municipalities that face a financial crisis, as provided for in section 139(5) of the Constitution. A new *municipal restructuring grant* will be introduced to help municipalities in financial crisis to implement reforms to turn themselves around. The National Treasury will consult with national departments, provinces and South African Local Government Association (SALGA) on the design of the grant and its coordination with other capacity-building programmes during 2018. The grant is intended to be a short-term intervention that will fund the turnaround of struggling municipalities. It will help identified municipalities that are in financial distress, but have demonstrated a commitment to implementing the necessary reforms. If needed, the intervention powers outlined in section 139 of the Constitution may also be used as part of the broader approach to turning around these municipalities.

Smaller cities face some of the same urban development challenges as major metropolitan areas. These cities will be eligible for a new *integrated urban development grant* from 2019/20. Cities will have to meet planning and performance criteria to receive the grant, which will be funded through a shift of funds from the municipal infrastructure grant. The new grant will require cities to plan for a programme of infrastructure investment, funded from grants and own revenues, rather than just standalone projects. This approach will be piloted in uMhlathuze and Polokwane in 2018/19.

National Treasury issued MFMA Circular No. 89 dated 7<sup>th</sup> December 2017 and subsequently issued MFMA Circular No 91 on 7<sup>th</sup> March 2018, to guide the compilation of the 2018/19 MTREF.

The key focus of Circular 91 is the grant allocations per the 2018 Budget Review and the 2018 Division of Revenue Bill.

## 11.4 Local government budget and financial management reforms

Section 215(1) of the Constitution states that: "national, provincial and municipal budgets and budgetary processes must promote transparency, accountability and effective financial management of the economy, debt and the public sector"

Section 216(1) of the Constitution prescribes that national legislation must prescribe measures to ensure transparency and expenditure control in each sphere of government, by introducing –

Generally-recognized accounting practices; Uniform expenditure classifications; and Uniform treasury norms and standards.

In order to give effect to Section 216(1) of the Constitution National Treasury conducted the Budget Reform after the implementation of the MFMA (No 56 of 2003) and on 22 April 2014 issued Gazette No 37577 regarding Municipal Regulations on Standard Chart of Accounts.

In recent years, better coordination, the introduction of targeted incentives and efforts to build municipal financial capacity have improved capital project planning and execution. To build on

this progress, and improve value for money in infrastructure investment, government will introduce a medium-term capital budgeting framework. It will include:

- New appraisal tools for capital projects
- Strengthened procurement regulations
- Measures to lock in resources for operations and maintenance
- More transparency on the full life-cycle costs of large capital projects.

## 11.5 Budget Assumptions

The following assumptions apply to the 2018/19 MTREF:

**TABLE 29: BUDGET ASSUMPTIONS** 

Accumptions	2018/19	2019/20	2020/21
Assumptions	%	%	%
Consumer price index	5.3	5.4	5.5
Growth rate	1	1	1
Debt collection rate	94	94	94
Expected operating expenditure	100	100	100
Salary and wage increase	7	7	7
Expected capital expenditure	95	95	95
Tariffs Increases:			
Assessment rates	10	7.5	7.5
Electricity	Ranges between 5.23 and 8.5	8.5	8.5
Water	12.96	10	10
Sanitation	9	9	9
Refuse removal	7.5	7.5	7.5
Eskom	7.32	10	10
Rand Water	12.96	10	10
ERWAT	10	10	10

## 11.6 Proposed Policy Changes

The City's budgeting process is guided and governed by relevant legislation, frameworks, strategies and related policies.

It is required by legislation that amendments to all budget related policies must form part of the tabled budget. The following budget related policies are included as **Annexure D** of the budget document:

Annexure D1 Medium-term Budget Policy Statement (reviewed)

Annexure D2 Pricing Policy Statement (reviewed)

Annexure D3 Property Rates Policy (remains unchanged)

Annexure D4 Provision of Free Basic Electricity Policy (remains unchanged)

Annexure D5 Waste Management Services Tariff Policy (reviewed)

Annexure D6 Consumer Deposit Policy (reviewed)

Annexure D7 Indigent Policy (reviewed)

Annexure D8 Credit Control & Debt Collection Policy (reviewed)

Annexure D9 Provision for Doubtful Debtors and Debtors Write Off (remains

unchanged)

Annexure D10 Budget Implementation and Monitoring Policy (remains unchanged)

Annexure D11 Municipal Entity Financial Support Policy (reviewed)

Annexure D12 Accounting Policy (remains unchanged)

Annexure D13 Electricity Metering for Residential and business Customer (reviewed)

Annexure D14 Policy for the Vending of Pre-Paid Electricity (reviewed)

Annexure D15 Policy for Correction of Meter Reading and Billing Data (reviewed)

Annexure D16 Electricity Tariff policy (reviewed)

Annexure D17 Virement Policy (reviewed)

Annexure D18 Consumer Agreement Policy (remains unchanged)

Annexure D19 Supply Chain Management Policy (remains unchanged)

Annexure D20 Treasury Policy (remains unchanged)

#### 11.7 2018/2019 MTREF Summary

The MTREF for the 2018/2019 Multi-year budget, with comparative information is as follows:

**TABLE 30: CONSOLIDATED OVERVIEW OF THE MTREF** 

	Amended Budget -	Budget Year	Budget Year +1	Budget Year +2
CONSOLIDATED	Jan'18	2018/19	2019/20	2020/21
Total Operating Revenue	34,918,698,077	37,504,250,473	40,444,384,824	43,864,137,415
Total Operating Expenditure	32,620,982,834	35,226,681,086	38,143,723,552	41,408,910,012
Total Gains and Losses	15,000,000	15,278,401	16,007,321	16,772,687
Surplus/(Deficit) for the year	2,282,715,243	2,262,290,986	2,284,653,951	2,438,454,716
Less Grant Income recognised to				
fund Capital Expenditure	(2,281,549,911)	(2,251,930,944)	(2,281,953,454)	(2,435,970,586)
Surplus/(Deficit) for the year				
after Capital Grants	1,165,332	10,360,042	2,700,497	2,484,130

#### 11.7.1 Operating Budget

#### Revenue framework

The municipality's revenue strategy is built around the following key components:

- National Treasury's guidelines and macroeconomic policy;
- Growth in the city and continued economic development;
- Efficient revenue management, which aims to ensure a 94% annual collection rate for property rates and other key service charges;
- Electricity tariff increases as approved by the National Energy Regulator of South Africa (NERSA);
- Achievement of full cost recovery of specific user charges especially in relation to trading services:
- Determining the tariff escalation rate by establishing/calculating the revenue requirement of each service;
- The municipality's Property Rates Policy approved in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA);
- Increase ability to extend new services and recover costs;
- The municipality's Indigent Policy and rendering of free basic services; and
- Tariff policies of the city.

#### **Expenditure framework**

The city's expenditure framework for the 2018/19 budget and MTREF is informed by the following:

- The asset renewal and the repairs and maintenance requirements as identified in the backlog study.
- Balanced budget constraint (operating expenditure should not exceed operating revenue) unless there are existing, uncommitted, cash-backed reserves to fund any deficit.
- Funding of the budget over the medium-term, as informed by Section 18 and 19 of the MFMA.
- The capital programme is aligned to the asset renewal needs and backlog eradication goals.
- The prioritisation of capital needs was based on the Capital Investment Framework.
- Strict adherence to the principle of no project plans no budget. If there is no business plan no funding allocation can be made.

Expenditure is categorized as being either committed (top-slice) or discretionary based on the level of discretion that the municipality has in amending the cost in the medium term. The greatest portion of the operating budget is committed expenditure which is highly predictable based on contractual commitments. Committed costs can generally only be avoided/amended after the contractual period has expired.

Discretionary budget allocations are only be made based on Results Based Project submissions made by departments.

The following table is a summary of the 2018/19 MTREF Operating Budget.

TABLE 31: MTREF OPERATING BUDGET

Description	2014/15	2015/16	2016/17		Current Y	ear 2017/18			Medium Term Ro enditure Framev

Alignment of the financial structure to SCOA Framework has resulted in the classification changes for some of the categories (the cost of free basic services is netted of against services charges).

Total operating **revenue** (which excludes capital grant income) has grown by 5.87% or **R1.96 billion** for the 2018/19 financial year when compared to the 2017/18 budget. For the two outer years, operational revenue is increasing with 8.24% and 8.55% respectively, equating to a total revenue growth of R8.13 billion over the MTREF when compared to the 2017/18 financial year.

Total operating **expenditure** amounts to **R35.2 billion** in the 2018/19 financial year, which is an **increase of 6%** when compared to the 2017/18 Adjusted Budget. Thus, it translates into a consolidated **budgeted surplus of R59.9 million (including the entities)**. The operating surplus for the two outer years amounts to R52.2 million and R52.2 million respectively.

#### 11.7.2 Capital Budget

The Capital Budget of **R6.7 billion** for 2018/19 is 1.3% more when compared to the 2017/18 Adjusted Budget. Entities **(R128 million)** are also included in the Capital Budget of R6.7 billion. The detailed project list is contained as **Annexure F.** 

The table below shows the capital budget per department.

The Capital Budget is largely driven by projects emanating from the GDS 2055, IDP and projects identified by the community as well as the backlog in services.

Details of the budget is contained in the detail MTREF document (**Annexure B**), which is separate from this document.

#### CHAPTER 12: DISASTER MANAGEMENT PLAN

#### 12.1 Introduction

The Disaster Management Act, Act 57 of 2002 Section 53(1) (c), (hereafter referred to as "the Act"), requires each municipality to prepare a disaster management plan for its area of jurisdiction according to the circumstances prevailing in the area and within the ambit of its municipal disaster management framework. Further, the Act in Section 53(2) (a) dictates that the disaster management plan for a municipality must form an integral part of the municipality's integrated development plan (IDP). In support of the Disaster Management Act, the Local Government: Municipal Systems Act, Act 32 of 2000 in Section 26(g) emphasizes this requirement by listing "applicable disaster management plans" as a core component of an IDP.

The Ekurhuleni Metropolitan Municipal Council Resolution **Item B-PS (10-2005) MC 07/04/2005** gives effect to the City of Ekurhuleni Integrated Disaster Management Framework and Corporate Disaster Management Plan.

The inclusion of the municipal Disaster Management, as a component of IDP, should not be an academic exercise to maliciously comply with the aforementioned Acts. The Disaster Management Plan seeks to achieve the integration of disaster management functions into the strategic and operational planning and project implementation of all line functions and role players within the municipality against assessed disaster risks. Through this coordinative effort, thus promotes the integration of efficient and effective responses to disasters (actual or impending) by all role-players.

The Disaster Management Act, Section 53(1) (a) states that municipality must conduct a disaster management risk assessment before preparing a disaster management plan. Recently in 2016, the Disaster & Emergency Management Services (DEMS) Department, as a custodian of disaster management within the City of Ekurhuleni, conducted the city's Disaster Risk and Vulnerability Assessment Study as required by the Act. In the report of the disaster risk assessment, it is mentioned that there are top sixteen (16) Disaster Risk in the city, which are outlines in the **Table 1** below:

TABLE 1: TOP SIXTEEN HAZARDS (DISASTER RISKS)

NO.	HAZARD	RISK RATING
1.	Air Pollution	High
2.	Civil Unrest	Medium
3.	Dangerous Electrical Connection	High
4.	Electricity Supply Disruption	Medium
5.	Floods	High
6.	Hazmat	Medium
7.	Ground Water Pollution	Extremely High
8.	Strong Ground Motion	Extremely High
9.	Severe Storms	Medium
10.	Sewage and Drainage	Medium
11.	Stormwater Flood	Medium
12.	Structural Fire: Informal Settlement	Medium
13.	Veldfires	Medium
14.	Infrastructure Hazard	Medium
15.	Illegal Uncontrolled Waste Disposal	Medium
16.	Pest Infestation	Medium

The city's disaster management plan, therefore, attempt to specifically focus on addressing above mentioned disaster risks using the already established mechanisms, processes and procedures as outlined in the Chapter 4 and 5 of Local Government: Municipal Systems Act in conjunction with Disaster Management Act.

The City of Ekurhuleni, to address the identified disaster risks, has started embarking on the process of aligning its operational and capital projects as stated in the departmental business plans to reduce the exposure of the communities to disaster hazards. It is further the plan of the city to continue in the next financial year i.e. 2018/2019, with the review of the Integrated Development Plans (IDP) for each ward and Customer Care Area to align more municipal projects and programmes to respond to the know disaster risks.

## 12.2 Key Strategic Focus Areas 2018/19

In view of the magnitude of the work that still has to be achieved for the city's disaster management legislative responsibilities to reflect in every municipal function and processes, the city, in 2018/19 financial year, plans to focus on these key strategic areas:

#### **Strengthening Institutional Capacity**

Objective: to ensure the establishment, maintenance and strengthening of municipal disaster management capacity in accordance with the requirements of the Act. The objective performed through maintaining existing disaster management structures and institutional arrangements. It is also be the city's endeavour to streamline each department's responsibility with their legislative mandate of the Disaster Management Act.

#### **Disaster Risk Reduction Actions**

Objective: To integrate the implementation of municipal disaster reduction strategies by municipal departments as a mechanism for sustainable development through the following actions: The following actions will be undertaken:

- ✓ Through training, shift the approach from disaster response to risk reduction.
- ✓ Integrate risk reduction into development planning.
- ✓ Maintain the legislative requirement for a Municipal Disaster Management Advisory Forum.
- √ Keep accurate information on hazards, vulnerability and capacity assessments.
- ✓ Develop and implement risk assessment and environmental impact assessments and tools.

- ✓ Use effective indicators for forecasting and prediction of disasters.
- ✓ Implement early warning and dissemination strategies.
- ✓ Institute disaster reduction training, education and awareness in schools, the community and other institutions.
- ✓ Increase media involvement in disaster risk reduction. (e.g. disaster risk reduction day)
- ✓ The interface between environmental management and disaster risk reduction on climate change issues.
- ✓ Support urban renewal and local economic sustainable development strategies, i.e. land use planning.
- ✓ Ensure effective preparedness, logistic and response planning.
- ✓ Establish and maintain volunteer units, as and when required.

#### 12.3 Conclusion

The current, Disaster Management Plan for the 2018/2019 financial year brings about a new approach to the disaster management planning and disaster risk reduction as it aligns both the disaster management issues with Integrated Development Plan (IDP) as required by the legislative framework.

# **ANNEXURES**

### **ANNEXURE 1: Gauteng Provincial Projects**

The information on projects to be implemented in the city is reflected in the tables below

WSDP 2017/2018

#### Critical Developments & Associated Factors that impacts our Area for the Immediate Future

#### Urban versus Rural Backlogs (Definition of backlog - refer to informal settlements)

Urban development (township applications) is currently growing rapidly within the so-called 'urban edge'. However, there are numerous relative large township applications which are being received outside the 'urban edge'. The reason for the latter can only be ascribed, to that the land outside the 'urban edge' being relatively cheaper than inside the 'urban edge'. Outside the 'urban edge' usually there is no bulk infrastructure and even inside the 'urban edge' most of the infrastructure is at its full or near capacity. In the past, Informal settlements have been relocated to formalized townships, mostly to the outskirts of the 'urban edge'. A recent study (CMIP) indicated that this is not desirable and the strategy for informal settlements need to be reviewed (i.e. far away from economic activity nodes, deprived access to transport, etc.). Focus will be to consider areas for relocation (formalizing townships) towards 'in-fill' areas. A recent updated Community Survey (Jun 2016) revealed that there is a huge need for sanitation within the Informal Settlement environment. Where EMM provided 'chemical toilets to the ratio of 1:10, this will be improved to 1:5 households. Although this backlog would remain for some time in the EMM area, new formalized townships would eradicate this backlog in the long term. A Migration Plan for the latter is in place with the Sustainable Human Settlement Department, which is followed and budgeted accordingly on an annual/multi-year basis.

#### Reliance on Water Resources available and Bulk Infrastructure

It is a known fact that the Gauteng area has already used-up its available water resource. Hence, the importing of more expensive water from the Lesotho Highlands transfer scheme. Currently EMM's AADD is 953Ml/d (April 2017). DWA embarked on a strategic drive in reducing the total demand from the source with 15% (i.e. Project 15%). The proportionment water saving for EMM is 24 778 153kl (i.e. 6.8%) over the next 5 years (commencement year being 2008/2009). This has not been achieved even with the drought induced reductions. It is crucial that EMM being one of the three major water users within the RW water supply area, that it curtail its water demand radically in order not to exceed its allowable demand. For the past three years good seasonal rains contributed positively towards this saving ensuring that the increase rate in demand was in some way suppressed. Rigorous WDM should now be implemented in order to ensure that development growth can still be sustained, whilst the allowable water demand is 'capped'. Recent reporting to the Vaal River System Steering Committee indicated that the target set by DWA in all probability will not be achieved in 2014. The next augmentation Lesotho Highlands water scheme will only be able to deliver additional water by 2020/2021. Thus there is in all probability a risk to experience a shortage of water supply within the next 2 to 5 years (i.e. water restrictions).

#### Links between Water Supply & Sanitation

The current potable water input (April 2017) into EMM's system is calculated to be 953MI/d

The projected AADD growth rate for the next 5 years is calculated to be 1.877%. This on the other hand, compared with the average annual total waste water received at ERWAT's waste water treatment plants, being 724.987Ml/d translate to 74.77% based on the previous year increased in demand. The flow measurement volume for the waste water treatment plant average includes groundwater / surface water run-off infiltration. Historical figures indicate that there is a definite correlation between the potable water input versus the waste water received at treatment plants. Within EMM this percentage calculates to 80% of the potable water purchased from Rand Water. Considering the associated anticipated infiltration into the sewer system received at the respective waste water treatment plants, an estimated percentage of 20% correlates generally fair to the reality experienced in the field. Due to the fact that EMM pay for the treatment of waste water per volume, it is crucial that such infiltration be curtailed where possible in order to reduce the waste water treatment account of EMM. A rigorous storm water ingress / surface run-off action plan should be developed in order to ensure a more cost efficient and effective sewer conveyance and treatment system. The curtailment of storm water ingress / surface run-off into the sewer conveyance system will imicably reduce capacity constraints currently experienced within the sewer conveyance system and waste water treatment facilities. Consequently it will further contribute to the postponement of expensive infrastructure in the long term (Studies indicates such postponement could be between 5 to 8 years).

#### Limited Implementation & Operating Capacity in Some Municipalities

One of the major constraints towards development within EMM as a whole is the overstressed capacities of the WWTPs. Most of them, except for one or three (i.e. Rynfield WWTP, Herbert Bickley WWTP, Olifantsfontein WWTP, ) is currently exceeding their hydraulic design capacities. Due to the construction nature of WWTPs, huge amount of investment is required up front to extend these capacities and delivery usually is in the order of 5 - 6 years. Thus the challenge is to find/ascertain the 'balancing' point of the investment and treatment type and capacity before embarking on an extension of such treatment plant/s. At the time, one usually find that the delivery of such additional capacity and funding is not always synchronized. This obviously has a major impact towards future developments within the EMM area. The priority WWTPs currently considered by ERWAT is the Welgedacht TP, Waterval TP and Hartebeestfontein TP.

There are other municipal infrastructure, both water and sanitation, which are also operating on their design capacities, hense a Pipe Replacement Priority (PRP) has been developed to ascertain which infrastructure are to be replaced, due to capacity constraints. These, together with the input from the relevant divisions within the Water and Sanitation Department are inserted into the normal budgetary process of Council. To view the infrastructure that is operating on the edge of their respective capacity, a map feature is available.

# **WSDP: Strategic Oversight** IX **EKURHULENI METROPOLITAN MUNICIPALITY** WSDP 2017/2018 Critical Developments & Associated Factors that impacts our Area for the Immediate Future **Available Funding** Funding is available, especially capital funding in the case of bankable programmes / projects. The challenge the Water & Sanitation Department has, is the timeous spending of of these funds. The historic expenditure patterns within the Water and Sanitation Department has relatively been satisfactory, however budgets did not necessarily always reflected the total need. The proposed capital budget (2017/2018) of the Water and Sanitation Department has increased to R599 million versus the previous adjusted allocation (2016/2017) of R334 million (a growth of 79.3%), now including the water and sanitation components of Housing program as well. Increasing the human resource capacity to spend this additional funding, has been highlighted at numerous occasions as a current challenge to this department. Additional funding over and above ERWAT's own funding, has also been made available by EMM towards ERWAT to assist in the increase of treatment capacity of their plants. Affordability of Service Levels (O&M Costs) As opposed to the capital budget, the operational budget wich includes maintenance, has its own limitations against the availability of funding to ensure adequate maintenance on the the entire water and sewer infrastructure. The municipality is prohibited from budgeting for a deficit and thus it means that all sources of revenue, including that of water and sanitation need to be utilised to ensure a balanced budget. Volume of potable water purchased from Rand Water upto April 2017 for the 2016/2017 financial year is 347,766,678kl. In terms of pipelines the Asset Register of EMM the length of water within the EMM area of jurisdiction on 30 June 2016, was 9,005,713m.

#### Growing Backlog in Refurbishment of Existing Infrastructure

The replacement value for the water and sewer infrastructure amounts to approximately R26.065 billion\* (water R11.304 billion & sewer R14.761 billion). The current budget (2016/2017) allocations for capital (R334.6 million).

At this current rate of funding allocation, the replacement backlog on water and sewer infrastructure is anticipated to be over a period of 78 years. In order to maintain a 25-30 year average replacement, in this regard it is required to have the above funding allocation to be

increased to an average of approximately R800 million per annum\*\*\*. One should also be mindful of the fact that the human capcacity to implement and expend this increased funding must be reviewed. The number of consumer units having a level of service (LoS) below the minimum basic level, as per the Census figures 2011 for water and sanitation are 49 872\*\* and 109 399\*\*, respectively. The LoS backlog is dealt with through the Human Sustainable Settlements Department's 'Essential Services' program.

\*\*Census 2011 extract).

\*\*\* W&S Dept.Turn-Around Strategy Plan (2014-2019) - November 2013

#### Major Economic Development

EMM's GDS 2055 & MSDF provide a list of strategic projects / developments, such as Rhodesfield node, Germiston CBD precinct, new Housing migration plan, Aerotropolis development, Industrial development & Freight moving development (Inland Port)\*. However, over and above those strategic projects mentioned other significant developments are currently underway and/or proposed. The Waterval residential (bonded-housing) development to the South of Alberton is currently taking shape and relevant bulk infrastructure is being installed for this development also catering for the Palm Ridge x9 and other extensions. The outfall sewer in this instance is a challenge and requires upgrading as per the sewer master plan. Other major developments are the Glen Gory (Valkhoogte) development to the East of Benoni, Witfontein infill development in the R21 corridor, Sterkfontein developments to the North of Kempton Park and the Leeuwpoort development in the Boksburg area. These developments will significantly impact towards the respective treatment plant capacities of ERWAT, which is currently operating in most cases beyond their hydraulic design capacity. In essence to ensure steady development the Water and Sanitation Department will have to implement rigorously WDM projects and jointly with the Building inspectorate storm water / surface run-off ingress into the sewer conveyance system to release capacity within the ERWAT plants and EMM's sewer infrastructure in order to accommodate the increased demand.

## Associated Population Growth & Water Demand

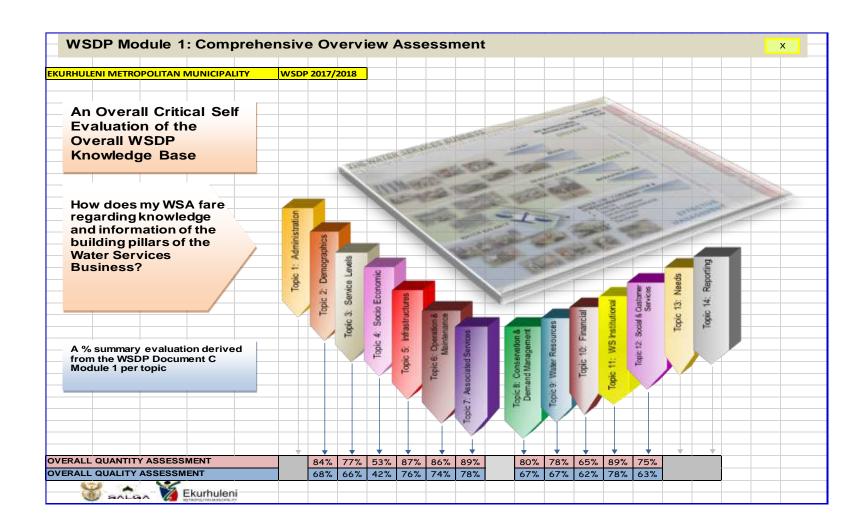

Population growth figures reflected within the previous WSDPs have not been very accurate. However, with further refinement and research by the IDP and Research and Development Department of EMM a more acceptable figure has been achieved for the 2016/2017 WSDP, as reflected under the relevant topic 2 (i.e. Chapter 2).

It is comprehended within the EMM's MSDF that the census data & models to predict future population figures are

complex and not always accurate. Hence, some Census 2011 data will be refined and aligned where more reliable data is available. It is considered within the MSDF that the growth rate in population within the EMM is in the vicinity of 3.2% per annum. Consequently the water demand forecast can then be calculated accordingly. The actual water demand at June 2016 was just 1,000Ml/d versus the projected water demand up to June 2016 of 931.003Ml/d. From this it is clear that water demand management must continously implemented.

The above water demand translates to an increase of 1.95%. The target set by the DWA for EMM in terms of water demand is 339 816 151kl (931.003Ml/d) EMM has struggled to meet that tageet even during the drought period werein water restrictions were imposed.

WDM Business Plan and WDM Action Plan have been developed and subject to funding and human resources will be implementing a 5-6 years water demand activities in order to reduce its Non Revenue Water (NRW) from 35% to 20% and its water losses from 31.8% to 17%. It should be noted that once these reduced targets are met, water demand management be an on-going initiative in order to maintain the ahcieved targets!

## ANNEXURE 3 City of Ekurhuleni 2018/2019 City Wide SDBIP Scorecard

Department	Outcome	Ref No.	Performance Indicator	Baseline (Annual	Annual target	Target for	r 2018/19 SD	BIP per Qu	arter	Resources	Allocated for	or 2018/19 S	DBIP per Qua	rter	Indicator Definition	Portfolio of Evidence
			(Output level only)	Performa nce of 2017/18 estimate d)	for 2018/19	Q1 Planned Target	Q2 Planned Target	Q3 Planned Target	Q4 Planne d Target	Q1 Planned Budget as Table SA 25, 29 and 30	Q2 Planned Budget as Table SA 25, 29 and 30	Q3 Planned Budget as Table SA 25, 29 and 30	Q4 Planned Budget as Table SA 25, 29 and 30	Total Budget allocate d		
				1	2	3	4	5	6	7	8	9	10	11 = (7+8 + 9 + 10)		
			ibed Ind													
			banise to achie o promote integ					ssive infr	astructu	re and ser	vices roll	out				
City planning	HS2. Improved functionality of the property market	HS2. 22	Average number of days taken to process building plan applications												The indicator measures the number of days a building plan application to the metro takes to be processed, from the date of submission of all required information to the date of communication of the initial adjudication results of that application, on average, per application. Excludes time taken to process appeals of the initial decision.	
Energy	EE1. Improved access to electricity	EE1. 11	Number of dwellings provided with connections to mains electricity supply by the municipality	6000	6000	0	1000	2000	3000	-	46 333 334	92 666 667	138 999 999	R278 00 0 000	The indicator tracks the number households" informal/subsidised having access to electricity in a targeted planning cycle. This is done in conjunction with Human Settlements department. In instances where installation may have been completed in one	Completion/hand over certificate

Department	Outcome	Ref No.	Performance Indicator	Baseline (Annual	Annual target	Target for	r 2018/19 SD	BIP per Qu	arter	Resources	Allocated for	or 2018/19 S	DBIP per Qua	rter	Indicator Definition	Portfolio of Evidence
			(Output level only)	Performa nce of 2017/18 estimate d)	for 2018/19	Q1 Planned Target	<b>Q2</b> Planned Target	Q3 Planned Target	Q4 Planne d Target	Q1 Planned Budget as Table SA 25, 29 and 30	Q2 Planned Budget as Table SA 25, 29 and 30	Q3 Planned Budget as Table SA 25, 29 and 30	Q4 Planned Budget as Table SA 25, 29 and 30	Total Budget allocate d		
				1	2	3	4	5	6	7	8	9	10	11 = (7+8 + 9 + 10)		
															reporting period and the installation is switched on in the next reporting period, the achievement is only reported in the period when the installation is switched on.	
	EE3. Improved reliability of electricity service	EE3. 11	Percentage of unplanned outages that are restored to supply within industry standard timeframes	New Indicator	75%	75%	75%	75%	75%	R304 250 000	R304 25 0 000	R304 25 0 000	R304 250 000	R1 217 000 000	The proportion of MTTRs that are within industry standards where MTTR is the average time it takes to restore unplanned outages	Outages are recorded at Benoni Control Centre in the MV Outages Log Book. This is then uploaded onto a spreadsheet and calculated in accordance with the NRS047 directive.
	EE3. Improved reliability of electricity service	EE3. 21	Percentage of Planned Maintenance Performed	New Indicator	90%	90%	90%	90%	90%	R304 250 000	R304 25 0 000	R304 25 0 000	R304 250 000	R1 217 000 000	The proportion of MTTRs that are within industry standards where MTTR is the average time it takes to restore unplanned outages	Maintenance report generated from the Computerised Maintenance Management System (Onkey)
	EE4. Improved energy sustainability	EE4. 12	Installed capacity of approved embedded generators on the municipal distribution network	2MW	1MW	0	0	0	1MW	0	0	R20 000 000	R20 000 000	R40 000 000	Power generated from renewable energy sources. Power generated by the system. Included would be power generated by PV solar light and independent power producers.	Dated and signed monthly reports OR Project documents.

Department	Outcome	Ref No.	Performance Indicator	Baseline (Annual	Annual target	Target fo	r 2018/19 SC	BIP per Qu	arter	Resources	Allocated f	or 2018/19 S	DBIP per Qua	rter	Indicator Definition	Portfolio of Evidence
			(Output level only)	Performa nce of 2017/18 estimate d)	for 2018/19	Q1 Planned Target	Q2 Planned Target	Q3 Planned Target	Q4 Planne d Target	Q1 Planned Budget as Table SA 25, 29 and 30	Q2 Planned Budget as Table SA 25, 29 and 30	Q3 Planned Budget as Table SA 25, 29 and 30	Q4 Planned Budget as Table SA 25, 29 and 30	Total Budget allocate d		
				1	2	3	4	5	6	7	8	9	10	11 = (7+8 + 9 + 10)		
															(The total capacity of the SSEG installations in the municipal distribution network)	
Human Settlements	HS1. Improved access to adequate housing (incl. security of tenure)	HS1. 11	Number of subsidised housing units completed	1428	1925	0	250	650	1025	0	29 750 000	77 350 000	121 975 000	Note: Targets are subject to Gazette d funding approve d by GDHS and NDHS respecti vely. Request ed 229 075 000	The number of all subsidised housing units (in terms of minimum levels of service) completed by the metro in the municipal financial year.  This indictor is delivered through BNG subsidised units completed on RES 1	Dated and signed Happy Letters and/or the Housing Subsidy System Report on houses completed. The source of data is the Completion Certificates for houses built. Tools used to collect the data is the project progress report and the Housing Subsidy System
			% of 464 subsidised housing units completed	0	100% of 464	10% Of 464	40% Of 464	70% 464	100% of 464	0	0	0	0	R 227 915 419.24 (As submitte d for GDHS APP/ Busines s Plan)	The indicator tracks the number of new subsidised housing units (in terms of minimum levels of service) completed by the metro in one FINNCIL YER  This indictor is delivered through BNG on RES 2,3&4 (walk – ups)	Qs 1-3 Progress reports against Project Implementation Plan, Q4: Dated and signed Completion Certificates for BNG units built.

Department	Outcome	Ref No.	Performance Indicator	Baseline (Annual	Annual target	Target fo	r 2018/19 SI	OBIP per Qu	arter	Resources	Allocated for	or 2018/19 S	DBIP per Qua	rter	Indicator Definition	Portfolio of Evidence
			(Output level only)	Performa nce of 2017/18 estimate d)	for 2018/19	Q1 Planned Target	Q2 Planned Target	Q3 Planned Target	Q4 Planne d Target	Q1 Planned Budget as Table SA 25, 29 and 30	Q2 Planned Budget as Table SA 25, 29 and 30	Q3 Planned Budget as Table SA 25, 29 and 30	Q4 Planned Budget as Table SA 25, 29 and 30	Total Budget allocate d		
				1	2	3	4	5	6	7	8	9	10	11 = (7+8 + 9 + 10)		
			% of 359 Social Housing Units completed	100% of 200	100% of 350	10% Of 350	40% Of 350	70% Of 350	100% of 350	0	0	0	0	Targets are subject to Gazette d funding approve d by GDHS and NT (USDG) respecti vely (As submitte d for HSDG APP/ Busines s Plan)	The indicator tracks the number of new social housing units built. A social housing unit complies with the specifications of the Social Housing Programme.	Qs 1-3 Progress Reports against Project Implementation Plan, Q4: Dated and signed Completion Certificates for social housing units completed.
	HS1. Q4 (20%): Signed report on a CoE letterhead, tracking progress made with implementing the system & corrective measures to be implemented.
Legal re- Services co	ncreased egulatory compliance Increased effectiveness of COE system of By-Law enforcement.	Number of the Municipality By- laws reviewed	24	20	5	5	5	5	±R200 000	±R200 000	±R200 000	±R200 000	±R800 000	The indicator is a measure of the total count of municipal Bylaws passed in the days of the historical 9 Ekurhuleni Town Councils that have been reviewed to harmonise them into a body of Bylaws for the City of Ekurhuleni (single Bylaws for CoE). Inclusive in this is the passing of new By-laws to fill the identified gaps. In the context of the indicator, reviewing process entails rationalizing existing Bylaws and passing new ones, activities that are mutually supportive and not two distinct variables thus confusing the indicator for being bivariate.	Primary evidence:  Final Draft of the reviewed By-laws, acknowledge d in writing by Dept. concerned,  An executive summary on areas covered by the review process on each draft By-law.  List of the 20 By-laws to be reviewed included in the Technical KPI Description sheet.

														legislation, and includes the COE itself. Numerator is the number of targeted members of the regulated community upon which regulatory actions were taken to increase compliance with environmental legislation in the reported time period (i.e. the relevant Quarter). Denominator is the targeted members of the regulated community which were selected for regulatory action in the reported time period (i.e. the relevant Quarter). Regulatory action refers to compliance inspections, rendering of advice, issuing of statutory notices, criminal enforcement and litigation.	
Decreased vulnerability to the effects of climate change		Number of adaptation or mitigation initiatives identified, advised on and reported on (as a composite) to increase climate change resilience	4	4	1	1	1	1	R 10000	R 10000	R 10000	R 10000	R 40000	This indicator measures the total count of Climate Change mitigation or adaptation actions that are identified, advised on and reported on (serve as a composite) within the metro to build resilience to climate change. Climate change means a change in the weather patterns (temperature and precipitation) within the Ekurhuleni region.  Adaptation actions include	Dated and signed project reports

														infrastructure redesign, food security, efficient water use, preparations to handle storms, droughts and heat waves or similar to build resilience to climatic effects.  Mitigation actions include includes energy efficiency, engineering to limit carbon emissions, flaring landfill gas, or similar to reduce the amount of GHGs in the atmosphere.  Advised on is defined as giving clear and concise guidance and information on the benefits a particular initiative may have on building the city resilience to climate change.  Reporting on is defined as collecting the combined efforts of all Ekurhuleni departments and compiling a project report to highlight the projects and indicate the benefit the project has in terms of building the cities resilience.	
Raised levels of environmental awareness		Number of beneficiaries that attended an environmental campaign	17500	17500	3750	7500	12500	17500	R206250	R206205	R206205	R206205	R825000	This indicator measure the number of beneficiaries reached through the environmental awareness campaigns. Beneficiaries means people reached through engagements Environmental awareness	Signed and dated attendance registers. Summary sheet of campaigns and programs with attendee totals.
