Introduction

The development, implementation and monitoring of a Service Delivery and Budget Implementation Plan (SDBIP) is required by the Municipal Finance Management Act (MFMA).

In terms of Circular 13 of National Treasury, "the SDBIP gives effect to the Integrated Development Plan (IDP) and budget of the municipality and will be possible if the IDP and budget are fully aligned with each other, as required by the MFMA."

As the budget gives effect to the strategic priorities of the municipality it is important to supplement the budget and the IDP with a management and implementation plan.

The SDBIP serves as the commitment by the Municipality, which includes the administration, council and community, whereby the intended objectives and projected achievements are expressed in order to ensure that desired outcomes over the long term are achieved and these are implemented by the administration over the next twelve months.

The SDBIP provides the basis for measuring performance in service delivery against quarterly targets and implementing the budget based on monthly projections.

Circular 13 further suggests that "the SDBIP provides the vital link between the mayor, council (executive) and the administration, and facilitates the process for holding management accountable for its performance. The SDBIP is a management, implementation and monitoring tool that will assist the mayor, councillors, municipal manager, senior managers and community."

The purpose of the SDBIP is to monitor the execution of the budget, performance of senior management and achievement of the strategic objectives set by council. It enables the municipal manager to monitor In the interests of good governance and better accountability, the SDBIP should therefore determine and be aligned with the performance agreements of the municipal manager and senior managers.

The development, implementation and monitoring of a Service Delivery and Budget Implementation Plan (SDBIP) is required by the Municipal Finance Management Act (MFMA).

In terms of Circular 13 of National Treasury, "the SDBIP gives effect to the Integrated Development Plan (IDP) and budget of the municipality and will be possible if the IDP and budget are fully aligned with each other, as required by the MFMA."

Legislation

According to the Municipal Finance Act (MFMA) the definition of a SDBIP is:

'service delivery and budget implementation plan' means a detailed plan approved by the mayor of a municipality in terms of section 53 (1) (c) (ii) for implementing the municipality's delivery of municipal services and its annual budget, and which must indicate-

- (a) projections for each month of-
- (i) revenue to be collected, by source; and
- (ii) operational and capital expenditure, by vote;
- (b) service delivery targets and performance indicators for each quarter;

Section 53 of the MFMA stipulates that the Mayor should approve the SDBIP within 28 days after the approval of the budget. The Mayor must also ensure that the revenue and expenditure projections for each month and the service delivery targets and performance indicators as set out in the SDBIP are The following National Treasury prescriptions as minimum requirements that must form part of the SDBIP are applicable to the District Municipality:

- (1) Monthly projections of revenue to be collected by source
- (2) Monthly projections of expenditure (operating and capital) and revenue for each vote *
- (3) Quarterly projections of service delivery targets and performance indicators for each vote
- * Section 1 of the MFMA defines a "vote" as:
- a) one of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or functional areas of the municipality; and
- b) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned

Content

Methodology and National Treasury directives are clear on the contents and methodology to derive at the SDBIP As a first step, the IDP objectives need to be quantified and related into key performance indicators. The budget is aligned to the objectives, projects and activities to enable the SDBIP to serve as monitoring tool for service delivery.

> The SDBIP is describes as a layered plan. The top layer deals with consolidated service delivery targets and time frames. Top Management is held accountable for the implementation of the consolidated projects and Key Performance Indicators. From the consolidated information, top management is expected to develop the next level of detail by breaking up outputs into smaller outputs and then linking and assigning responsibility to middle-level and junior managers.

Circular 13 highlights the following components applicable to a District Municipality, to be presented in the SDBIP:

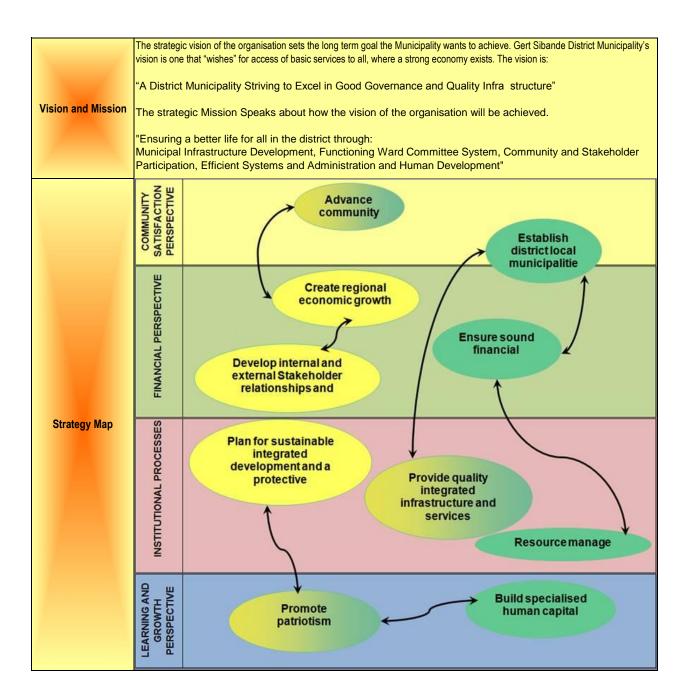

- 1. Monthly projections of revenue to be collected for each source
- 2. Monthly projections of expenditure (operating and capital) and revenue for each vote
- 3. Quarterly projections of service delivery targets and performance indicators for each vote
- 4. Detailed capital works plan over three years.

The Gert Sibande District Municipality has incorporated these components into their SDBIP.

The SDBIP of the Gert Sibande District Municipality consists of Strategic Objectives derived from the Strategic Scorecard. The IDP are objectives are mapped and thus aligned with the strategic intent of the organisation. Strategic indicators with targets are set to measure the objectives. The S57 Managers takes responsibility for the Strategic Indicators and Objectives which may form part of their Performance Agreement and Plan. Projects and activities are aligned to the indicators with quarterly targets, time-frame and budget assigned to each.

The Strategic Indicators give rise to the Institutional Indicators for which the Executive Directors will take responsibility. These indicators will form part of the Performance Agreements and Plans of Senior Managers (Execurive Directors). Indicators are assigned quarterly targets and responsibilities to monitor performance.

Derived from this, the next layer is developed, whereby the details with responsibilities for the next level of management is outlined and forms part of the Lower SDBIP. This lower SDBIP is a management tool for the S57 Managers and need not be made public and is a separate document for each internal department.

Project Expenditure
