

MANGAUNG METROPOLITAN MUNICIPALITY

2014-2015

SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN

Foreword by the Executive Mayor

Subsequent to the successful completion of the annual IDP Review, a legislative prescript for the assessment and evaluation of the IDP, it gives me much pleasure that the Service Delivery and Budget Implementation Plan (SDBIP) of Mangaung Metropolitan Municipality has also been prepared, and now ready to give effect to the reviewed IDP 2014/15 financial year and corresponding Medium Term Revenue and Expenditure Framework 2014/15 – 2016/17.

It would be a serious disservice to participatory democracy on the side of the Council if we do not fulfil our obligation of implementing what we have been mandated to do by the local community during the IDP/Budget hearings. Through this SDBIP we are sealing our vow as a democratic and accountable municipality in order to render services to our citizens in an effective and efficient manner.

This SDBIP continues from where we left off – with spending on infrastructure, especially dealing with service delivery backlogs especially in sanitation, roads and storm water at the apex of our priority list. Beyond these it also represents an affirmation of our efforts to integrate our spatial layout with a view to bringing our communities closer to work and other economic opportunities.

Our submission of the SDBIP is not a mere legislative compliance. It serves as an instrument of enhancing accountability since it provides specific details for all oversight institutions, the Council itself and community to track the relevance of what we do against our mandate. We will be doubling on efforts in accelerating up service delivery to make the lives of our citizens better.

Cllr Thabo Manyoni Executive Mayor 04 July 2014

8.	CONCLUSION

1. INTRODUCTION

This report is a Service Delivery and Budget Implementation Plan (SDBIP) for Mangaung Metropolitan Municipality (MMM) for 2014/15 financial year. This plan is informed by MMM's Integrated Development Plan (IDP) and the Medium Term Revenue and Expenditure Framework (MTREF) budget. Both the reviewed IDP for 2014/15 financial year and 2014/15 to 2016/2017 period MTREF budget have been tabled to the Council and noted on the 26th of March 2014 and subsequently approved on the 05 of June 2014

The development of SDBIP is a requirement under Municipal Finance Management Act (MFMA) and gives effect to the municipality's IDP and annual budget. The SDBIP is an expression of the objectives of the municipality in quantifiable outcomes that will be implemented by the administration for the financial period of 1 July 2014 to 30 June 2015. The SDBIP includes the service delivery targets and performance indicators for each quarter that should be linked to the performance agreements of senior managers. These are integral to the implementation and entrenchment of our performance management system. The SDBIP facilitates accountability and transparency of the municipal administration and managers to the Council and monitoring of the budget, the performance of top management and the achievement of the strategic objectives as laid out in the IDP.

The SDBIP enables the Municipal Manager to monitor the performance of senior managers, the mayor to monitor the performance of the municipal manager and for the community to monitor the performance of the municipality as each activity contains outputs, measurable targets and timeframes. The SDBIP is compiled on an annual basis and includes a 3-year capital budget programme. The SDBIP is yet another step forward to realise the principle of democratic and accountable local government as enshrined in Section 152 (a) of the Constitution of the Republic of South Africa (1996).

The SDBIP is in essence the management and implementation tool which sets in-year information such as quarterly service delivery and monthly budget targets and links each service delivery output to the budget of the municipality. It further indicates the responsibilities and outputs for each of the senior managers and the top management team, the resources to be used and the deadlines set for the relevant activities.

The SDBIP is a layered plan, with the top layer dealing with consolidated service delivery targets, and linking such targets to top management. This is high-level and strategic in nature and is required to be tabled in Council for noting by the Executive Mayor

The strategic SDBIP is intended for the use by the general public and Councillors. Only this top layer of the SDBIP is published as the institutional SDBIP. Such high-level information should also include per ward information, particularly for key expenditure items on capital projects and service delivery which will enable each Ward Councillor and Ward Committee members to oversee service delivery in their ward. The top management is then expected to develop the next (lower) layer of detail of the SDBIP, by providing more detail on each output for which they are responsible, and breaking up such outputs into specific activities and linking these to each middle-level and junior manager. Much of this lower layer detail will not be made public or tabled in the Council. Whilst the Municipal Manager has access to such lower layer detail of the SDBIP, it will largely only be the senior manager in charge who will be using such detail to hold middle-level and junior-level managers responsible for various components of the service delivery plan and targets of the Municipality.

2. MFMA legislative requirement

In terms of Section 53 (1) (c) (ii) of the MFMA, the SDBIP is defined as a detailed plan approved by the mayor of a municipality for implementing the municipality's delivery of municipal services and its annual budget, and which must indicate the following: (a) projections for each month of –

(i) revenue to be collected, by source; and

(ii) operational and capital expenditure, by vote

(b) service delivery targets and performance indicators for each quarter, and(c) other matters prescribed being a management and implementation plan (not a policy proposal)

The SDBIP is not required to be approved by the council. According to Section 53 of the MFMA, the Executive Mayor is expected to approve the SDBIP within 28 days after the approval of the budget. This section requires him or her to take all reasonable steps to ensure that the SDBIP is approved within 28 days. In addition, the Executive Mayor must ensure that the revenue and expenditure projections for each month and the service delivery targets and performance indicators as set out in the SDBIP are circulated or made public within 14 days after its approval.

3. Top-Level SDBIP Targets and Indicators

The SDBIPs are required to include targets for the activities that will be undertaken, for physical and measurable progress as well as financial progress. The top level of the SDBIP includes measurable performance objectives in the form of service delivery targets and performance indicators that are provided to the community, that is, what impacts it seeks to achieve. These are drawn from the IDP programmes, services and activities that are relevant to each specific directorate as well as the statutory plans that the Departments are responsible for. The SDBIPs therefore are the key mechanisms for monitoring the different responsibilities and targets that each Department must fulfil in meeting service delivery needs provided to the community. The SDBIP is conceptualised as a layered plan, with consolidated service targets and quarterly to annual deadlines and linking those targets to senior management. The City Manager's scorecard represents the consolidation of all the Municipal's detailed performance indicators and service delivery targets as contained in each Department's SDBIP. The community and stakeholders can review these targets and performance during the IDP process. The SDBIP is therefore living document that must be reviewed on an annual basis and it therefore needs to be publicised so that the public is provided with information on service delivery.

4. Linking the IDP and the Budget

Integrated Development Planning requires many different planning processes to be brought together and co-ordinated. In terms of linking service plans or service delivery and budget implementation plans of the individual department in the Municipality with the other planning processes in the IDP, the departments routinely produce operational plans, capital plans, annual budgets, institutional and staffing plans, etc to take the IDP forward. Clearly it is not feasible to include all of this detail within the IDP document.

The Mangaung Municipality has identified 8-point development agenda (the 8-Point Agenda") arising from the engagement between community, the elected leaders and municipal administration and interested stakeholders.

The 8-point development agenda corresponds perfectly with the goals of the national government's 12 Outcomes, particularly Outcomes 4, 8 and 9; National Development Plan (Vision 2030), and the Draft Free State Government's Growth and Development Strategies and the Draft Mangaung Growth and Development Strategy 2040. All these plans and strategies share the common goals of growing the economy to create jobs; reduce unemployment and half poverty; ensuring integrated sustainable human settlements; commitment to gender equality and empowerment of women, and good governance.

The 8-point development agenda are:

- 1) Poverty eradication, rural and economic development and job creation;
- 2) Financial sustainability (e.g. revenue enhancement, clean audit);
- 3) Spatial development and the built environment;
- Eradication of bucket system and VIP toilets in Botshabelo, Mangaung and Thaba'Nchu, focus on the basics, building solar farming, power plant feasibility study, safety and security;

- 5) Human settlement;
- 6) Public transport;
- 7) Environmental management and climate change;
- 8) Social and community services.

The MTREF budget is allocated against these key performance areas at a municipal level. Corporate objectives with measurable key performance indicators (KPIs) and targets are identified. The municipal planning processes undertaken at departmental and sub-department levels yields objectives with indicators, targets and resource allocation (includes the budgets) at these various levels.

The implementation of the SDBIP is categorised in terms of votes as prescribed by the MFMA. The votes indicate a budget allocation for the Core Administration and Centlec as a municipal entity providing electricity as outlined below:

- 1. City Manager;
- 2. Executive Mayor;
- 3. Corporate Services;
- 4. Finance;
- 5. Social Services;
- 6. Planning;
- 7. Human Settlements and Housing;
- 8. Fresh Produce Market;
- 9. Engineering Services;
- 10. Water Services;
- 11. Miscellaneous Services;
- 12. Regional Operations
- 13. Strategic Projects and Service Delivery;
- 14. Electricity Centlec (SOC) Ltd.

5. Reporting on SDBIP

This section covers reporting on the SDBIP as a way of linking the SDBIP with the oversight and monitoring operations of the Municipal administration.

Various reporting requirements are outlined in the MFMA. Both the mayor and the accounting officer have clear roles to play in preparing and presenting these reports. The SDBIP provides an excellent basis for generating the reports for which MFMA requires. The reports then allow the Mangaung Metropolitan Council (Ward and Proportional Representative Councillors) to monitor the implementation of service delivery programs and initiatives across the Municipality.

5.1 Monthly Reporting

Section 71 of the MFMA stipulates that reporting on actual revenue targets and spending against the budget should occur on a monthly basis. This reporting must be conducted by the accounting officer of a municipality no later than 10 working days, after the end of each month.

Reporting must include the following:

- (i) actual revenue, per source;
- (ii) actual borrowings;
- (iii) actual expenditure, per vote;
- (iv) actual capital expenditure, per vote;
- (iv) the amount of any allocations received

If necessary, explanation of the following must be included in the monthly reports:

- (a) Any material variances from the municipality's projected revenue by source, and from the municipality's expenditure projections per vote
- (b) Any material variances from the service delivery and budget implementation plan and;

(c) Any remedial or corrective steps taken or to be taken to ensure that the projected revenue and expenditure remain within the municipalities approved budget.

5.2 Quarterly Reporting

Section 52 (d) of the MFMA compels the mayor to submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality within 30 days of the end of each quarter. The quarterly performance projections captured in the SDBIP form the basis for the mayor's quarterly report.

5.3 Mid-year Reporting

Section 72(1)(a) of the MFMA outlines the requirements for mid-year reporting. The accounting officer is required by the 25th January of each year to assess the performance of the municipality during the first half of the year taking into account:

- (i) the monthly statements referred to in section 71 of the first half of the year
- (ii) the municipalities service delivery performance during the first half of the financial year, and the service delivery targets and performance indicators set in the service delivery and budget implementation plan;
- (iii) the past year's annual report, and progress on resolving problems identified in the annual report; and
- (iv) the performance of every municipal entity under the sole or shared control of the municipality, taking into account reports in terms of Section 88 from any such entities.

Based on the outcomes of the mid-year budget and performance assessment report, an adjustments budget may be tabled if actual revenue or expenditure amounts are materially different from the projections contained in the budget or the SDBIP. The SDBIP is also a living document and may be modified based on the mid-year performance review. Thus the SDBIP remains a kind of contract that holds the Mangaung Metropolitan Municipality accountable to the community.

5.4 Mangaung Strategic Scorecard

The 8-point development agenda priorities are broken down into core objectives for the Municipality and each is broken down further into departments objectives. The following objectives have been identified:

- To grow Mangaung 's economy by developing a new development in Botshabelo / Thaba'Nchu are, focusing on SMME development and support, rejuvenation of the CBDs within the municipality, enhancing local and international tourism, and promoting rural development;
- To create jobs through the Expanded Public Works Programme, small scale agricultural enterprises, and skills upgrading;
- To ensure financial sustainability through improved billing system, improved revenue collection, identification of additional revenue streams and prudent fiscal management;
- To address housing backlog by providing housing opportunities, upgrading informal settlements, acquiring land to promote sustainable human settlements (public and private), and fast tracking the registration of townships;
- To eradicate water, roads and storm-water backlogs by ensuring that formal domestic customers receiving water services, all households on formal erven will have access to a properly drained all weather streets;
- To eradicate bucket system and VIP toilets and ensuring that formal domestic customers receiving sewerage services and addressing backlog in the provision of basic sanitation services (above RDP standards);
- To accelerate waste removal by providing households with weekly kerb-side waste removal services in formal areas and informal settlement dwellings with access to refuse removal;
- To address electricity backlog providing all formal households with access to basic electricity, providing new households (RDP) with electricity connections, and providing households with access to free basic electricity;

- To improve public transport system and services by developing an Integrated Transport Plan (ITP) and ensuring integration between operators and other spheres of government, developing an Integrated Rapid Public Transport Network (IRPTN), reviving rail network between Bloemfontein and Maseru, completing the operation of Bloemfontein intermodal transport facility, and building of intermodal transport facilities at Botshabelo;
- To improve environmental sustainability by establishing the necessary skills and institutional and capacity, and increasing the environmental literacy level of stakeholders;
- To reduce the major sources of greenhouse gas emissions and catalyzing the large-scale supply of clean energy by managing air quality and lowering electricity consumption

8. Conclusion

The SDBIP is a key management, implementation and monitoring tool, which provides operational content to the end-of-year service delivery targets set in the budget and IDP. It determines the performance agreements for the municipal manager and all top managers, whose performance can then be monitored through Section 71 monthly reports, and evaluated through the annual report process.

The biggest challenge is to develop meaningful nonfinancial service delivery targets and indicators, in addition to the budget indicators however this will remain work in progress for the Municipality.
