

ANNUAL FINANCIAL STATEMENTS

for the year ended

30 June 2006

I am responsible for the preparation of these financial statements, which are set out on pages 1 to 39, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the municipality.

I certify that the salaries, allowances and benefits of Councillors as disclosed in note 21 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Office Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

1 BASIS OF PRESENTATION

These annual financial statements have been prepared in accordance with Generally Accepted Municipal Accounting Practices (GAMAP) and Generally Recognised Accounting Practice (GRAP) issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act 56 of 2003). These accounting policies are consistent with those of the previous financial year.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GAMAP of GRAP.

The financial statements are presented in South African Rand and have been prepared on a going concern basis.

2 PROPERTY, PLANT AND EQUIPMENT (PPE)

- 2.1 PPE is stated:
 - At cost less accumulated depreciation, or
 - At fair value at date of acquisition less accumulated depreciation where assets have been acquired by grant or donation.
- 2.2 Subsequent expenditure relating to property, plant and equipment is capitalised if it is probable that future economic benefits or potential service delivery of the asset are enhanced in excess of the originally assessed standard of performance. If expenditure only restores the originally assessed standard of performance, then it is regarded as repairs and maintenance and is expensed.

- 2.3 Depreciation and impairment losses:
- 2.3.1 Depreciation is calculated on cost, using the straight line method, over the estimated useful lives of the assets. The depreciation rates are based on the following estimated useful lives:

	<u>Years</u>		Years
Infrastructure		<u>Other</u>	
Roads and Paving	30	Buildings	30
Pedestrian Malls	30	Specialist vehicles	10
Electricity	20-30	Other vehicles	5
Water	15-20	Office equipment	3-7
Sewerage	15-20	Furniture and fittings	7-10
Housing	30	Watercraft	15
		Bins and containers	5
<u>Community</u>		Specialised plant and	10-15
Improvements	30	Other plant and equipment	2-5
Recreational Facilities	20-30		
Security	5		
Investment Properties	30		

- 2.3.2 Incomplete construction work is stated at historic cost. Depreciation only commences when the asset is commissioned into use.
- 2.3.3 The carrying amount of an item or a group of identical items of PPE is reviewed periodically in order to assess whether or not the recoverable amount has declined below the carrying amount. When such a decline has occurred, the carrying amount is reduced to the recoverable amount. The amount of the reduction is recognised as an expense immediately, unless it reverses a previous revaluation, in which case it is charged to the revaluation non distributable reserve.
 - 2.4 Disposal and retirement of assets:
 - Assets are eliminated from the Statement of Financial Position on disposal or retirement.
 - The difference between the net book value of assets (cost less accumulated depreciation) and the sales proceeds is reflected as a profit or loss in the statement of financial performance.

3 FUNDS AND RESERVES

The Municipality creates and maintains Funds and Reserves in terms of specific requirements.

3.1 Capital Replacement Reserve (CRR)

In order to finance the purchase of items of property, plant and equipment amounts are transferred out of the net surplus for a period (when needed) into the Capital Replacement Reserve (CRR). These transfers from the net surplus may only be made if they are backed by cash. The following provisions are set for the creation and utilisation of the CRR:

• The cash backing up the CRR is invested, in accordance with the investment policy of the Council, until it is utilised.

• Interest earned on the CRR investment is recorded as interest earned in the Statement of Financial Performance and may be appropriated to the CRR in accordance with council policy.

• The CRR may only be utilised for the purpose of purchasing items or construction of property, plant and equipment for the Council and may not be used for the maintenance of these items. If Council want to utilise the CRR for expensing something else than PPE an amount equal to the expense must be transferred to net surplus.

• Whenever an asset is purchased out of the CRR an amount equal to the cost price of the asset purchased is transferred from the CRR to the Accumulated surplus account through the Statement of Changes in Net Assets. This transfer is used to offset depreciation charged on assets purchased out of the AFR and is released to the Statement of Changes in Net Assets at purchase of the asset to avoid double taxation of the consumers.

• If a profit is made on the sale of PPE other than land the profit on these assets sold is reflected in the Statement of Financial Performance and is then transferred via the statement of changes in net assets to the CRR provided that it is backed by cash. Profit on the sale of land is not transferred to the CRR as it is regarded as revenue.

3.2 Government Grant Reserve

When items of Property, plant and equipment are financed from government grants, a transfer is made from the accumulated surplus to the Government Grant Reserve equal to the Government Grant recorded as revenue in the Statement of Financial Performance in accordance with a directive issued by National Treasury. When such items of property, plant and equipment are depreciated, a transfer is made from the Government Reserve to the accumulated surplus. The purpose of this policy is to promote community equity by ensuring that the future depreciation expenses that will be incurred over the useful lives of government grant funded items of property, plant and equipment are equipment are to the accumulated surplus. When an item of property, plant an equipment is disposed of, the balance in the Government Grant Reserve relating to such item is transferred to the accumulated surplus.

4 PROVISIONS

A provision is recognised when the Council has a present obligation (legal or constructive) as a result of a past event and it is probable (i.e. more likely than not) that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each statement of financial position date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

4.1 Employee Benefits

4.1.1 Retirement Funds

The Council and its employees contribute to various Pension Funds and its councillors contribute to the Pension Fund for Municipal Councillors. These funds provide retirement benefits to such employees and councillors.

The retirement benefits are calculated in accordance with the rules of the funds. Full actuarial valuations are performed on a regular basis unless exemption to do so has been obtained from the Registrar of Pension Funds.

Current contributions are charged against the operating account of the Council at a percentage of the basic salary paid to employees, or allowances in the case of councillors.

4.1.2 Medical Aid: Continued Members

The Council provides certain post retirement medical benefits by funding the medical aid contributions of certain retired members of the municipality. According to the rules of the medical aid funds, with which the municipality is associated, a member (who is on the current condition of service), on retirement, is entitled to remain a continued member of such medical aid fund, in which case the member is liable for 30% of the medical aid membership fee, and the Council for the remaining 70%.

These contributions are charged to the operating account when paid.

4.1.3 Accrued Leave Pay

Liabilities for annual leave are recognised as they accrue to employees. Provision is based on the total accrued leave owing to employees and on their total salary packages.

4.1.4 Provision for bonuses

Bonuses were paid out of operating expenses

4.1.5 Provision for constructive obligations

Provision is made for any constructive obligations of CHDM. A constructive obligation arises through an established pattern of past practice, published policies or a sufficiently specific current standard, whereby CHDM has indicated to other parties that it will accept certain responsibilities and as a result, the CHDM has created a valid expectation on the part of those other parties that it will discharge those responsibilities

4.1.6 Provision for onerous contracts

When the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision. An onerous contract is a contract for the exchange of assets or services in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits or service potential expected to be received under it.

5 <u>LEASES</u>

LESSEE ACCOUNTING

- 5.1 Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the Council.
- 5.2 Operating leases are those leases which do not fall within the scope of the above definition. Operating lease rentals are recognised on a straight-line basis over the lease term or any other basis which is representative of the time pattern of the lessees benefit.
- 5.3 Assets subject to finance lease agreements are capitalised at their cash cost equivalent and the corresponding liabilities are raised. The cost of the assets is depreciated at appropriate rates on the straight line basis over the estimated useful lives of the assets. Lease payments are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred.

LESSOR ACCOUNTING

- 5.4 Amounts due from lessees under finance leases are recorded as receivables at the amount of the Council's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return to the Council's net investment outstanding in respect of the leases.
- 5.5 Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

6 INVESTMENTS

The Council may have the following types of investments:

- Held to maturity (HTM) investments are financial assets with fixed or determinable payments and fixed maturity where the Council has the positive intent and ability to hold the investment to maturity.
- **Loans and receivables originated by the enterprise** are financial assets that are created by providing money, goods or services directly to a loan debtor.

INITIAL MEASUREMENT of financial instruments is **at cost, which is the fair value** of the consideration given. The fair value is usually the transaction price or market price. **Transaction costs** are included in the initial measurement of financial assets. Transaction costs include fees and commissions paid to agents, advisors, brokers and dealers, levies by regulatory agencies and securities exchanges; and transfer taxes and duties. Transaction costs do not include debt premium or discount, financing costs or allocations of internal administrative or holding costs.

SUBSEQUENT MEASUREMENT of financial assets.

HTM investments and loans and receivables originated by the Council and not held for trading is subsequently recognised at amortised cost using the effective interest rate method. Amortised cost is defined as the amount at which the financial asset was measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation of any difference between that initial amount and the maturity amount, and minus any write-down for impairment or uncollectability.

7 FOREIGN CURRENCY TRANSACTIONS

Transactions in foreign currencies are initially accounted for at the rate of exchange ruling on the date of the transaction. Trade creditors denominated in foreign currency are reported at statement of financial position date by using the exchange rate at that date. Exchange differences arising on the settlement of creditors or on reporting of creditors at rates different from those at which they were initially recorded during the period are recognised as revenue or as expenses in the period in which they arise. Where the transaction is covered by a forward exchange contract, the rate specified in the contract is used.

8 REVENUE RECOGNITION

- 8.1 Revenue is derived from a variety of sources which include Regional Council levies, grants from other tiers of government and revenue from other services provided. Revenue is recognised when it is probable that future economic benefits or service potential will flow to the Council and these benefits can be measured reliably.
- 8.2 Revenue from levies is recognized when the legal entitlement to this revenue arises. Collection charges are recognized when such amounts are legally enforceable. Interest on unpaid levies is recognized on a time proportionate basis.

- 8.3 Some services are provided on a prepayment basis in which case no formal billing takes place and income is accrued when received.
- 8.4 Interest earned on investments is recognised in the statement of financial performance on a time proportionate basis that takes into account the effective yield on the investment. Interest may be transferred from the unappropriated surplus to the AFR. Interest earned on unutilised conditional grants is allocated directly to the creditor: unutilised conditional grants if the grant conditions indicate that interest is payable to the funder.
- 8.5 Revenue from the sale of goods is recognised when **all** the following conditions have been satisfied:
 - The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
 - The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
 - The amount of revenue can be measured reliably.
 - It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
 - The costs incurred or to be incurred in respect of the transaction can be measured reliably.
- 8.6 Interest on outstanding debtors is recognized on a time proportionate basis and is charged on all outstanding debtors older than 30 days.
- 8.7 When the outcome of a transaction involving the rendering of services can be **estimated reliably**, revenue associated with the transaction should be recognised by reference to the stage of completion of the transaction at the statement of financial position date. The outcome of a transaction can be **estimated reliably** when **all** the following conditions are satisfied:
 - The amount of revenue can be measured reliably.
 - It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
 - The stage of completion of the transaction at the statement of financial position date can be measured reliably.
 - The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

8.8 Government Grants are recognised as revenue when all conditions associated with the grant have been met. Where grants have been received but the Council has not met the condition, a liability is raised.

9 VALUE ADDED TAX

The Council accounts for Value Added Tax on the payment basis.

10 SEGMENTAL INFORMATION

The principal segments have been identified on a primary basis by service operation and on a secondary basis by the classification of revenue and expenditure. The primary basis is representative of the internal structure for both budgeting and management purposes. The secondary basis classifies all operations based on the classification of revenue and expenditure.

11 GRANTS-IN-AID

The Council transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the Council does not:

- Receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- Expect to be repaid in future; or
- Expect a financial return, as would be expected from an investment.

These transfers are recognised in the financial statements as expenses in the period that the events giving rise to the transfer occurred. If these contracts are onerous and extend over more than one financial year after year end they are treated in accordance with the accounting policy on onerous contracts outlined under 4.1.6 above.

12 UNUTILISED CONDITIONAL GRANTS.

Unutilised conditional grants are reflected on the Statement of financial position as a creditor – unutilised conditional grants. They represent unspent government grants, subsidies and contributions from the public. These creditors always have to be cash backed. The following provisions are set for the creation and utilisation of these creditors:

• The cash which backs up the creditor is invested until it is utilised.

• Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor. If it is the Council's interest it is recognised as interest earned in the statement of financial performance.

• Whenever an asset is purchased and funded from the unutilised conditional grant an amount equal to the cost price of the asset purchased is transferred from the Unutilised Capital Receipts into the statement of financial performance as revenue. Thereafter an equal amount is transferred on the statement of changes in net assets to a reserve called a future depreciation reserve (FDR). This reserve is equal to the remaining depreciable value (book value) of assets purchased out of the Unutilised Capital Receipts. The FDR is used to offset depreciation charged on assets purchased out of the Unutilised Capital Receipts to avoid double taxation of the consumers.

13 INTANGIBLE ASSETS

Intangible assets are treated in accordance with the provisions of IAS 38. In accordance with these provisions intangible assets are initially recorded at their cost price and are subsequently amortised over their expected useful lives. An intangible asset is defined as an identifiable non – monetary asset without physical substance held for use in the production or supply of goods or services, for rental to others, or for administrative purposes. The intangible assets under the control of the Council are amortised according to the straight line method.

14 ACCOUNTS RECEIVABLE

Accounts receivable are carried at anticipated realisable value. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year end. Bad debts are written of during the year in which they are identified.

15 CASH AND CASH EQUIVALENTS

Cash includes cash on hand and cash with banks. Cash equivalents are short – term, liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in financial instruments, net of bank overdrafts.

16 COMPARATIVE INFORMATION

16.1 CURRENT YEAR COMPARATIVES Budgeted amounts have been included in the annual financial statements for both financial years.

16.2 PRIOR YEAR COMPARATIVES

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are reclassified. The nature and reason for the reclassification is disclosed.
