Annual Financial Statements for the year ended 30 June 2010

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP).

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2011 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. 6.

The annual financial statements set out on pages 6 to 27, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2010 and were signed by:

Annual Financial Statements for the year ended 30 June 2010

Accounting Officer's Report

Operating capital ratio 1.97:1 (1,34:1)

There is an improvement in nett current assets compared to prior year, we have enough short term assets to finance short term liabilities.

Solvability ratio 2.56:1 (2,54:1)

Assets are almost 2.5 times the liabilities, the Municipality will be able to meet all its short and long term obligations.

Cash to interest cover ration 19.36:1 (25.03:1)

The cash flow is sufficiant enough to finance interest from long term liabilities.

Debt to cash ratio 77% (39%)

Indicates the remaining pay back period.

1. Going concern

We draw attention to the fact that at 30 June 2010, the municipality had accumulated a surplus of R 218 709 219.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP) and the Standards of Generally Accepted Municipal Accounting Practices (GAMAP) prescribed by the Minister of Finance in terms of General Notice 991 and 992 of 2005.

The standards are summarised as follows:

Standard of GRAP	
GRAP 1	Presentation of financial statements
GRAP 2	Cash flow statements
GRAP 3	Accounting policies, changes in accounting estimates and
	errors
GRAP 4	The Effects of Changes in Foreign Exchange Rates
GRAP 5	Borrowing Costs
GRAP 6	Consolidated & Separate Financial Statements
GRAP 7	Investments in Associates
GRAP 8	Interests in Joint Ventures
GRAP 9	Revenue from Exchange Transactions
GRAP 10	Financial Reporting in Hyperinflationary Economies
GRAP 11	Construction Contracts
GRAP 12	Inventories
GRAP 13	Leases
GRAP 16	Investment Property
GRAP 17	Property, Plant and Equipment
GRAP 18	segment Reporting
GRAP 19	Provisions, Contigent Liabities & Contingent Assets
GRAP 23	Revenue from Non-Exchange Transactions
GRAP 24	Presentation of Budget Information in Financial Statements
GRAP 100	Non Current Assets Held for
GRAP 101	Agriculture
GRAP102	Intangible Assets

GAMAP 6, 7 and 8 have been complied with to the extent that the requirements in these standards relate to the municipality's separate financial statements.

Accounting policies for material transactions, events or conditions not covered by the above GRAP and GAMAP Standards have been developed in accordance with paragraphs 7, 11 and 12 of GRAP 3. These accounting policies and the applicable disclosures have been based on the South African Statements of Generally Accepted Accounting Practices (SA GAAP) including any interpretations of such Statements issued by the Accounting Practices Board.

A summary of the significant accounting policies, which have been consistently applied, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.

Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.1 Property, plant and equipment (continued)

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognied.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Averes useful life

The useful lives of items of property, plant and equipment have been assessed as follows:

item	Average usetui lite
Buildings	20 Years
Furniture and fixtures	5 Years
Motor vehicles	4 Years
Office equipment	5 Years
IT equipment	3 Years
Computer software	2 Years
Infrastructure	
 Roads and paving 	6 Years
• Water	6 Years
Sewerage	6 Years
Capital work in progress	Not depreciated (Until Completed)

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is

Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.1 Property, plant and equipment (continued)

depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

1.2 Financial instruments

Trade and other receivables

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 120 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Trade and other receivables are classified as loans and receivables. We have used the method of recovery in the current year and non recovery was then used to create a doubtful debt provision hence we did not discount the debtors because of the materiality of the provision. The provision for doubtful debt was based on information provided by an approved accredited bureau on individual debtors by profiling each debtor in terms of risk. The customers that could not be profiled by the approved accredited bureau have been provided. No provision has been made for amounts outstanding by government departments as these balances are recoverable.

Trade and other payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

Bank overdraft and borrowings

Bank overdrafts and borrowings are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the municipality's accounting policy for borrowing costs.

1.3 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.4 Impairment of Assets

The municipality assesses at each statement of financial position date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also:

tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairments annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period. If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual assets. If it is not possible to estimate the recoverable amount, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair values less cost to sell and its value in

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

1.5 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

1.6 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

1.7 Revenue

Revenue comprises of sales to customers and service rendered to customers. Turnover is stated at the invoice amount and is exclusive of value added taxation.

1.8 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.9 Borrowing costs

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

Annual Financial Statements for the year ended 30 June 2010

Accounting Policies

1.10 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

When the presentation or classification of items in the annual financial statements is ammended, prior period comparative amounts are reclassified.

1.11 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote:
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.12 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.13 Internal Reserves

Government grant reserve

When items of property, plant and equipment are financed from government grants, a transfer is made from the accumulated surplus/deficit to the Government Grants Reserve equal to the Government Grant recorded as revenue in the Statement of Financial Performance in accordance with a directive issued by National Treasury. When such items of property, plant and equipment are depreciated, a transfer is made from the Government Grant Reserve to the accumulated surplus/deficit.

The purpose of this policy is to promote community equity by ensuring that the future depreciation expenses that will be incurred over the useful lives of government grant funded items of property, plant and equipment are offset by transfers from this reserve to the accumulated surplus.

When an item of property, plant and equipment financed from government grants is disposed, the balance in the Government Grant Reserve relating to such item is transferred to the accumulated surplus/deficit.

1.14 Conditional Grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

	`	-

The Debtors are initially recorded at the Fair value being the invoice value, these are subsequently amortised at an effective rate determined as current average interest on FNB's call accounts. We calculated the estimated effect of discounting resulting in an amount of R5 408 574. We assumed that debtors will be paid in six months time. The interest rate used in discounting was 6.3% per annum. Debtors and revenue has been disclosed net of discounting.

Post employment benefits

The Municipality's staff are members of the following Benefit Schemes

Natal Joint Municipal Pension Fund (Retirement Registration Number 12/8/6676/2 - a State and Multi Employer Defined Benefit Plan

Natal Joint Municipal Pension Fund (a State and Multi Employer Defined Benefit Plan)

Kwazulu Natal Provident Fund (a State and Multi Employer Defined Contribution Plan)

Along with other Municipalities in the province of Kwazulu Natal, Umgungundlovu participates in a multi employer defined plan. Because the plan exposes the participating entities to acturial risks associated with the current and former employees of other municipalities participating in the plan there is no consistant and reliable basis for allocating the obligation, plan assets and cost to individual municipalities participating in the plan. Umgungundlovu therefore accounts for the plan as if it were defined contribution plan. A funding valuation which is not drawn up on the basis of assumptions compatible with GRAP Exposure Draft # 49 - Employee benefite as at 31 March 2010 reflected an overall plan deficit of R17.8 million.

The shortfall will be funded through a surcharge of 17% of salaries, this surcharge is spread across supernaution members. The fund could not produce Audited Financial Statements on time hence we are unable to report on the performance of 2010.
