APPROVAL OF THE ANNUAL FINANCIAL STATEMENTS

I am responsible for the preparation of these annual financial statements year ended 30 June 2012, which are set out on pages 1 to 72 in terms of Section 126 (1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. The annual financial statements have been prepared in accordance with GRAP.

I acknowledge that I am ultimately responsible for the system of internal financial control and that the system of internal control provides reasonable assurance that the financial records can be relied on.

I have reviewed the Municipality's cash flow forecast for the year to 30 June 2013 and am satisfied that the Municipality can continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the Municipality's financial statements.

I certify that the remuneration of Councillors and in-kind benefits are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1. ACCOUNTING PRINCIPLES AND POLICIES APPLIED IN THE FINANCIAL STATEMENTS

1.1. BASIS OF PREPARATION

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

The annual financial statements have been prepared in accordance with the Municipal Finance Management Act (MFMA) and effective standards of Generally Recognised Accounting Practices (GRAP), including any interpretations and directives issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

Accounting policies for material transactions, events or conditions not covered by the GRAP reporting framework, have been developed in accordance with paragraphs 8,10 and 11 of GRAP 3 (Revised – February 2010) and the hierarchy approved in Directive 5 issued by the Accounting Standards Board.

Standard	Description	Effective Date
GRAP 1 (Revised – Mar 2012)	Presentation of Financial Statements	1 April 2013
GRAP 3 (Revised – Mar 2012)	Accounting Policies, Changes in Accounting Estimates and Errors	1 April 2013
GRAP 9 (Revised – Mar 2012)	Revenue from Exchange Transactions	1 April 2013
GRAP 12 (Revised – Mar 2012)	Inventories	1 April 2013
GRAP 13 (Revised – Mar 2012)	Leases	1 April 2013
GRAP 16 (Revised – Mar 2012)	Investment Property	1 April 2013
GRAP 17 (Revised – Mar 2012)	Property, Plant and Equipment	1 April 2013
GRAP 21 (Original – Mar 2009)	Impairment of non-cash-generating assets	1 April 2012
GRAP 23 (Original – Feb 2008)	Revenue from Non-Exchange Transactions	1 April 2012
GRAP 25 (Original – Nov 2009)	Employee Benefits	1 April 2013
GRAP 26 (Original – Mar 2009)	Impairment of cash-generating assets	1 April 2012
GRAP 27 (Revised – Mar 2012)	Agriculture	1 April 2013
GRAP 31 (Revised – Mar 2012)	Intangible Assets	1 April 2013
GRAP 104 (Original – Oct 2009)	Financial Instruments	1 April 2012
IGRAP 16 (Issued – Mar 2012)	Intangible Assets – Website Costs	1 April 2013

The Municipality resolved to early adopt the following GRAP standards which have been issued but are not effective yet.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

A summary of the significant accounting policies, which have been consistently applied except where an exemption or transitional provision has been granted, are disclosed below.

Assets, liabilities, revenue and expenses have not been offset except when offsetting is permitted or required by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant notes to the Financial Statements.

In terms of Directive 7: "The Application of Deemed Cost on the Adoption of Standards of GRAP" issued by the Accounting Standards Board, the Municipality applied deemed cost to Inventory, Investment Property, Property, Plant and Equipment and Intangible where the acquisition cost of an asset could not be determined.

1.2. PRESENTATION CURRENCY

Amounts reflected in the financial statements are in South African Rand and at actual values. Financial values are rounded to the nearest one Rand. No foreign exchange transactions are included in the statements.

1.3. GOING CONCERN ASSUMPTION

These annual financial statements have been prepared on a going concern basis.

1.4. COMPARATIVE INFORMATION

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated, unless a standard of GRAP does not require the restatements of comparative information. The nature and reason for the reclassification is disclosed. Where material accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.5. MATERIALITY

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decision or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatements judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor. Materiality is determined as 1% of total expenditure.

1.6. PRESENTATION OF BUDGET INFORMATION

As noted, GRAP 24 is not effective yet, however budget information required in terms of GRAP 1 (Revised – March 2012) paragraph 11 to 14 have been disclosed in the financial statements. The presentation of budget information was prepared in accordance with the formats contained in the Municipal Budget Reporting Regulations.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.7. STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the Municipality:

Standard	Description	Effective Date
GRAP 6	Consolidated and Separate Financial	Unknown
(Revised – Nov 2010	Statements	
	The objective of this Standard is to prescribe the circumstances in which consolidated and separate financial statements are to be prepared and the information to be included in those financial statements so that the consolidated financial statements reflect the financial performance, financial position and cash flows of an economic entity as a single entity.	
	No significant impact is expected as the Municipality does not have any entities at this stage to be consolidated.	
GRAP 7	Investments in Associate	1 April 2013
(Revised – Mar 2012)	This Standard prescribes the accounting treatment for investments in joint ventures where the investment in the associate leads to the holding of an ownership interest in the form of a shareholding or other form of interest in the net assets. No significant impact is expected as the Municipality does not participate in such business transactions.	
GRAP 8	Interest in Joint Ventures	Unknown
(Revised – Nov 2010)	The objective of this Standard is to prescribe the accounting treatment of jointly controlled operations, jointly controlled assets and jointly controlled entities and to provide alternatives for the recognition of interests in jointly controlled entities. No significant impact is expected as the Municipality is not involved in any joint ventures.	
GRAP 18	Segment Reporting	Unknown
(Original – Feb 2011)	The objective of this Standard is to establish principles for reporting financial information by segments.	
	of the annual financial statements.	

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

GRAP 24 (Original – Nov 2007)	Presentation of Budget Information in Financial Statements	1 April 2012
(j	This Standard requires a comparison of budget mounts and the actual amounts arising from execution of the budget to be included in the financial statements of entities that are required to, or elect to, make publicly available their approved budget(s) and for which they are, therefore, held publicly accountable. The Standard also requires disclosure of an explanation of the reasons for material differences between the budget and actual amounts.	
	Information to a large extent is already included in the notes to the annual financial statements and the impact is assessed to not be significant.	
GRAP 103	Heritage Assets	1 April 2012
(Original – July 2008)	The objective of this Standard is to prescribe the accounting treatment for heritage assets and related disclosure requirements.	
	No adjustments necessary as the Municipality has no significant heritage assets other than the assets currently accounted for in terms of GRAP 17.	
GRAP 105	Transfer of Functions Between Entities Under	Unknown
(Original Nov 2010)	Common Control	
(Original – Nov 2010)	Common Control The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control.	
(Original – Nov 2010)	The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under	
GRAP 106	The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control. No significant impact is expected as the Municipality does not participate in such business transactions. Transfer of Functions Between Entities Not	Unknown
	The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control. No significant impact is expected as the Municipality does not participate in such business transactions.	Unknown
GRAP 106	The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control. No significant impact is expected as the Municipality does not participate in such business transactions. Transfer of Functions Between Entities Not Under Common Control The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common	Unknown

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

GRAP 107 (Original – Nov 2010)	MergersThe objective of this Standard is to establish accounting principles for the combined entity and combining entities in a merger.No significant impact is expected as the Municipality does not participate in such business 	Unknown
IGRAP 12	Jointly Controlled Entities non-monetary contributionsThe objective of this Interpretation of the Standard is to prescribe the treatment of profit/loss when an asset is sold or contributed by the venturer to a Jointly Controlled Entity (JCE).Nosignificant impact is expected as the Municipality does not have any JCE's at this stage.	Unknown

These standards, amendments and interpretations will not have a significant impact on the Municipality once implemented.

1.8. LEASES

1.8.1 Municipality as Lessee

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the Municipality. Property, plant and equipment or intangible assets (excluding licensing agreements for such items as motion picture films, video recordings, plays, manuscripts, patents and copyrights) subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the Municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant and equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined expenses and actual payments made will give rise to a liability. The Municipality shall recognise the aggregate benefit of incentives as a reduction of rental expense over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern of the lessee's benefit from the use of the leased asset.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.8.2 Municipality as Lessor

Under a finance lease, the Municipality recognises the lease payments to be received in terms of a lease agreement as an asset (receivable). The receivable is calculated as the sum of all the minimum lease payments to be received, plus any unguaranteed residual accruing to the Municipality, discounted at the interest rate implicit in the lease. The receivable is reduced by the capital portion of the lease instalments received, with the interest portion being recognised as interest revenue on a time proportionate basis. The accounting policies relating to de-recognition and impairment of financial instruments are applied to lease receivables.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease revenue is recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined revenue and actual payments received will give rise to an asset or liability. The Municipality shall recognise the aggregate cost of incentives as a reduction of rental revenue over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern over which the benefit of the leased asset is diminished.

1.9. UNSPENT CONDITIONAL GOVERNMENT GRANTS AND RECEIPTS

Conditional government grants are subject to specific conditions. If these specific conditions are not met, the monies received are repayable.

Unspent conditional grants are financial liabilities that are separately reflected on the Statement of Financial Position. They represent unspent government grants, subsidies and contributions from the public.

This liability always has to be cash-backed. The following provisions are set for the creation and utilisation of this creditor:

- Unspent conditional grants are recognised as a liability when the grant is received.
- When grant conditions are met an amount equal to the conditions met are transferred to revenue in the Statement of Financial Performance.
- The cash which backs up the creditor is invested as individual investment or part of the general investments of the Municipality until it is utilised.
- Interest earned on the investment is treated in accordance with grant conditions. If it
 is payable to the funder it is recorded as part of the creditor. If it is the Municipality's
 interest it is recognised as interest earned in the Statement of Financial Performance.

1.10. UNPAID CONDITIONAL GOVERNMENT GRANTS AND RECEIPTS

Unpaid conditional grants are assets in terms of the Framework that are separately reflected on the Statement of Financial Position. The asset is recognised when the Municipality has an enforceable right to receive the grant or if it is virtually certain that it will be received based on that grant conditions have been met. They represent unpaid government grants, subsidies and contributions from the public.

The following provisions are set for the creation and utilisation of the grant is receivables:

• Unpaid conditional grants are recognised as an asset when the grant is receivable.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.11. **PROVISIONS**

Provisions are recognised when the Municipality has a present legal or constructive obligation as a result of past events, it is possible that an outflow of resource embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate of future outflows of resources. Where the effect is material, non-current provisions are discounted to their present value using a discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The Municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is possible.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

A provision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision have been met:

- (a) The Municipality has a detailed formal plan for the restructuring identifying at least:
 - the business or part of a business concerned;
 - the principal locations affected;
 - the location, function and approximate number of employees who will be compensated for terminating their services;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented.
- (b) The Municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

The amount recognised as a provision shall be the best estimate of the expenditure required to settle the present obligation at the reporting date.

If it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, the provision shall be de-recognised.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.12. EMPLOYEE BENEFITS

(a) Post Retirement Medical Obligations

The Municipality provides post-retirement medical benefits by subsidizing the medical aid contributions of certain retired staff according to the rules of the medical aid funds. Council pays 70% as contribution and the remaining 30% is paid by the members. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. The present value of the defined benefit liability is actuarially determined in accordance with GRAP 25 – Employee benefits (using a discount rate applicable to high quality government bonds). The plan is unfunded.

These contributions are charged to the Statement of Financial Performance when employees have rendered the service entitling them to the contribution. The liability was calculated by means of the projected unit credit actuarial valuation method. The liability in respect of current pensioners is regarded as fully accrued, and is therefore not split between a past (or accrued) and future in-service element. The liability is recognised at the fair value of the obligation. Payments made by the Municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically by independent qualified actuaries.

(b) Long Service Awards

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the Municipality. The Municipality's obligation under these plans is valued by independent qualified actuaries periodically and the corresponding liability is raised. Payments are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as employee benefits upon valuation. Defined benefit plans are post-employment plans other than defined contribution plans.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically by independent qualified actuaries.

(c) Provision for Staff Leave

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total amount of leave days due to employees at year end and also on the total remuneration package of the employee.

Accumulating leave is carried forward and can be used in future periods if the current period's entitlement is not used in full. An employee's accumulated leave cannot exceed 48 days. Any days in excess thereof is forfeited. All unused leave will be paid out to the specific employee at the end of that employee's employment term. Accumulated leave is vesting.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

(d) Staff Bonuses Accrued

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year end is based on bonus accrued at year end for each employee.

(e) Provision for Performance Bonuses

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, contract workers and other senior managers, is recognised as it accrue. Municipal entities' performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends. This bonus is not guaranteed.

(f) Pension and retirement fund obligations

The Municipality provides retirement benefits for its employees and councillors. Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable. Defined benefit plans are post-employment benefit plans other than defined contribution plans. The defined benefit funds, which are administered on a provincial basis, are actuarially valued tri-annually on the projected unit credit method basis. Deficits identified are recovered through lump sum payments or increased future contributions on a proportional basis to all participating municipalities. The contributions and lump sum payments are charged against income in the year they become payable. Sufficient information is not available to use defined benefit accounting for a multi-employer plan. As a result, defined benefit plans have been accounted for as if they were defined contribution plans.

(g) Other Short-term Employee Benefits

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.13. PROPERTY, PLANT AND EQUIPMENT

1.13.1 Initial Recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. The cost of an item of property, plant and equipment shall be recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the item will flow to the entity, and the cost or fair value of the item can be measured reliably. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a nonmonetary asset or monetary assets, or a combination of monetary and non-monetary assets, the assets acquired is initially measured at fair value (the cost). It the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

1.13.2 Subsequent Measurement – Cost Model

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the Municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.13.3 Depreciation and Impairment

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis. The annual depreciation rates are based on the following estimated useful lives:

	<u>Years</u>
<u>Land and Buildings</u> Buildings Capitalised Restoration Costs	100 20
Infrastructure Electricity Roads, Pavements, Bridges & Storm Water	6 - 50 5 -120
Leased Assets Office Equipment	5
Other Assets Furniture & Fittings Motor Vehicles Computer Equipment Plant and Machinery	7 5 5 7 - 10

Property, plant and equipment are reviewed at each reporting date for any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. The impairment charged to the Statement of Financial Performance is the excess of the carrying value over the recoverable amount.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of an impairment is recognised in the Statement of Financial Performance.

1.13.4 De-recognition

Items of property, plant and equipment are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.13.5 Land and buildings and Other Assets – application of deemed cost (Directive 7)

The Municipality opted to take advantage of the transitional provisions as contained in Directive 7 of the Accounting Standards Board, issued in December 2009. The Municipality applied deemed cost where the acquisition cost of an asset could not be determined. For Land and Buildings the fair value as determined by a valuator was used in order to determine the deemed cost as on 1 July 2008. For all other assets the depreciation cost method was used to establish the deemed cost as on 1 July 2008.

1.14. INTANGIBLE ASSETS

1.14.1 Initial Recognition

An intangible asset is an identifiable non-monetary asset without physical substance.

An asset meets the identifiability criterion in the definition of an intangible asset when it:

- is separable, i.e. is capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, asset or liability; or
- arises from contractual rights (including rights arising from binding arrangements) or other legal rights (excluding rights granted by statute), regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

The Municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the Municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the Municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the Municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

1.14.2 Subsequent Measurement – Cost Model

Intangible assets are subsequently carried at cost less accumulated amortisation and any accumulated impairments losses. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.14.3 Amortisation and Impairment

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method. Amortisation of an asset begins when it is available for use, i.e. when it is in the condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are amortised separately. The estimated useful lives, residual values and amortisation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis. The annual amortisation rates are based on the following estimated useful lives:

Intangible Assets	Years
Computer Software	5

1.14.4 De-recognition

Intangible assets are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.15. INVESTMENT PROPERTY

1.15.1 Initial Recognition

Investment property shall be recognised as an asset when, and only when:

- it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the entity, and
- the cost or fair value of the investment property can be measured reliably.

Investment property includes property (land or a building, or part of a building, or both land and buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations. Property with a currently undetermined use, is also classified as investment property.

At initial recognition, the Municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition. The cost of self-constructed investment property is measured at cost.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the Municipality accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.15.2 Subsequent Measurement – Cost Model

Subsequent to initial recognition, items of investment property are measured at cost less accumulated depreciation and any accumulated impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

1.15.3 Depreciation and Impairment – Cost Model

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

Investment Property	<u>Years</u>
Buildings	100

1.15.4 De-recognition

Investment property is derecognised when it is disposed or when there are no further economic benefits expected from the use of the investment property. The gain or loss arising on the disposal or retirement of an item of investment property is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.15.5 Application of deemed cost - Directive 7

The Municipality opted to take advantage of the transitional provisions as contained in Directive 7 of the Accounting Standards Board, issued in December 2009. The Municipality applied deemed cost where the acquisition cost of an asset could not be determined. The fair value as determined by a valuator was used in order to determine the deemed cost as on 1 July 2008.

1.16. NON-CURRENT ASSETS HELD FOR SALE

1.16.1 Initial Recognition

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.16.2 Subsequent Measurement

Non-current assets held for sale (or disposal group) are measured at the lower of carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

1.17. IMPAIRMENT OF NON-FINANCIAL ASSETS

1.17.1 Cash-generating assets

Cash-generating assets are assets held with the primary objective of generating a commercial return.

The Municipality assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the municipality estimates the asset's recoverable amount.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. Impairment losses are recognised in the Statement of Financial Performance in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Municipality estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Financial Performance.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.17.2 Non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

The Municipality assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Municipality estimates the asset's recoverable service amount.

An asset's recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use. If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss recorded in the Statement of Financial Performance.

The value in use of a non-cash-generating asset is the present value of the asset's remaining service potential. The present value of the remaining service potential of the asset is determined using any one of the following approaches:

- depreciation replacement cost approach the present value of the remaining service
 potential of an asset is determined as the depreciated replacement cost of the asset.
 The replacement cost of an asset is the cost to replace the asset's gross service
 potential. This cost is depreciated to reflect the asset in its used condition. An asset
 may be replaced either through reproduction (replication) of the existing asset or
 through replacement of its gross service potential. The depreciated replacement cost
 is measured as the reproduction or replacement cost of the asset, whichever is lower,
 less accumulated depreciation calculated on the basis of such cost, to reflect the
 already consumed or expired service potential of the asset.
- restoration cost approach the cost of restoring the service potential of an asset to its
 pre-impaired level. Under this approach, the present value of the remaining service
 potential of the asset is determined by subtracting the estimated restoration cost of
 the asset from the current cost of replacing the remaining service potential of the
 asset before impairment. The latter cost is usually determined as the depreciated
 reproduction or replacement cost of the asset, whichever is lower.
- service unit approach the present value of the remaining service potential of the
 asset is determined by reducing the current cost of the remaining service potential of
 the asset before impairment, to conform with the reduced number of service units
 expected from the asset in its impaired state. As in the restoration cost approach, the
 current cost of replacing the remaining service potential of the asset before
 impairment is usually determined as the depreciated reproduction or replacement
 cost of the asset before impairment, whichever is lower.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

The Municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for an asset may no longer exist or may have decreased. If any such indication exists, the Municipality estimates the recoverable service amount of that asset.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

An impairment loss recognised in prior periods for an asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. If this is the case, the carrying amount of the asset is increased to its recoverable service amount. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods. Such a reversal of an impairment loss is recognised in the Statement of Financial Performance.

1.18. INVENTORIES

1.18.1 Initial Recognition

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories shall be recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the entity, and the cost of the inventories can be measured reliably. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus non-recoverable taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

1.18.2 Subsequent Measurement

Inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

In general, the basis of allocating cost to inventory items is the weighted average method.

Cost of land held for sale is assigned by using specific identification of their individual costs.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.18.3 Application of deemed cost - Directive 7

The Municipality opted to take advantage of the transitional provisions as contained in Directive 7 of the Accounting Standards Board, issued in December 2009. The Municipality applied deemed cost where the acquisition cost of inventory could not be determined. The fair value as determined by a valuator was used in order to determine the deemed cost as on 1 July 2008.

1.19. FINANCIAL INSTRUMENTS

Financial instruments recognised on the Statement of Financial Position include receivables (both from exchange transactions and non-exchange transactions), cash and cash equivalents, annuity loans and payables (both form exchange and non-exchange transactions).

1.19.1 Initial Recognition

Financial instruments are initially recognised when the Municipality becomes a party to the contractual provisions of the instrument at fair value plus, in the case of a financial asset or financial liability not at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability

1.19.2 Subsequent Measurement

Financial Assets are categorised according to their nature as either financial assets at fair value, financial assets at amortised cost or financial assets at cost. Financial Liabilities are categorised as either at fair value, financial liabilities at cost or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and liabilities depends on this categorisation.

1.19.2.1 <u>Receivables</u>

Receivables are classified as financial assets at amortised cost, and are subsequently measured at amortised cost using the effective interest rate method.

For amounts due from debtors carried at amortised cost, the Municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. Objective evidence of impairment includes significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 90 days overdue). If the Municipality determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the Statement of Financial Performance. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the municipality. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is recognised in the Statement of Financial Performance.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate, if material. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

1.19.2.2 Payables and Annuity Loans

Financial liabilities consist of payables and annuity loans. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value and subsequently measured at amortised cost using an effective interest rate, which is the initial carrying amount, less repayments, plus interest.

1.19.2.3 Cash and Cash Equivalents

Cash includes cash on hand (including petty cash) and cash with banks. Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, highly liquid deposits and net of bank overdrafts. The Municipality categorises cash and cash equivalents as financial assets carried at amortised cost.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities are carried at amortised cost.

1.19.3 De-recognition of Financial Instruments

1.19.3.1 <u>Financial Assets</u>

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired; or
- the Municipality has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Municipality has transferred substantially all the risks and rewards of the asset, or (b) the Municipality has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

When the Municipality has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the old asset is derecognised and a new asset is recognised to the extent of the Municipality's continuing involvement in the asset.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Municipality could be required to repay.

When continuing involvement takes the form of a written and/or purchased option (including a cash settled option or similar provision) on the transferred asset, the extent of the Municipality's continuing involvement is the amount of the transferred asset that the Municipality may repurchase, except that in the case of a written put option (including a cash settled option or similar provision) on an asset measured at fair value, the extent of the Municipality's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

1.19.3.2 *Financial Liabilities*

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the Statement of Financial Performance.

1.19.4 Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously

1.20. REVENUE

1.20.1 Revenue from Non-Exchange Transactions

Revenue from non-exchange transactions refers to transactions where the Municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

Revenue from property rates is recognised when the legal entitlement to this revenue arises. At the time of initial recognition the full amount of revenue is recognised. If the Municipality does not enforce its obligation to collect the revenue, is a subsequent event. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis as an exchange transaction.

Fine Revenue constitutes both spot fines and summonses. Revenue from spot fines and summonses is recognised as revenue when the receivables meet the definition of an asset and satisfy the criteria for recognition as an asset.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the Municipality. Where public contributions have been received, but the Municipality has not met the related conditions, it is recognised as an unspent public contribution (liability).

Revenue from third parties i.e. insurance payments for assets impaired, are recognised when it can be measured reliably and is not being offset against the related expenses of repairs or renewals of the impaired assets.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the Municipality.

All unclaimed deposits are initially recognised as a liability until 12 months expires, when all unclaimed deposits into the Municipality's bank account will be treated as revenue as historical patterns have indicated that minimal unidentified deposits are reclaimed after a period of twelve months. This assessment is performed annually at 30 June. Therefore the substance of these transactions indicate that even though the prescription period for unclaimed monies is legally three years, it is reasonable to recognised all unclaimed monies older than twelve months as revenue. Although unclaimed deposits are recognised as revenue after 12 months, the Municipality still keep record of these unclaimed deposits for three years in the event that a party should submit a claim after 12 months.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

Revenue shall be measured at the fair value of the consideration received or receivable.

When, as a result of a non-exchange transaction, a Municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the present obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability will be recognised as revenue.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.20.2 Revenue from Exchange Transactions

Revenue from exchange transactions refers to revenue that accrued to the Municipality directly in return for services rendered/goods sold, the value of which approximates the consideration received or receivable. At the time of initial recognition the full amount of revenue is recognised. If the Municipality does not enforce its obligation to collect the revenue, it is a subsequent event.

Service charges relating to electricity and water are based on consumption and a basic charge as per Council resolution. Meters are read on a monthly basis and are recognised as revenue when invoiced. Where the Municipality was unable to take the actual month's reading of certain consumers, a provisional estimate of consumption for that month will be created. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the recorded number of refuse points per property.

Service charges relating to sanitation (sewerage) are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage. In the case of residential property a fixed monthly tariff is levied and in the case of commercial property a tariff is levied based on the number of sewerage connection on the property. Service charges based on a basic charge as per Council resolution.

Interest revenue is recognised using the effective interest rate method.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff. This includes the issuing of licences and permits.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods are passed to the consumer.

Revenue arising out of situations where the Municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

Revenue shall be measured at the fair value of the consideration received or receivable.

The amount of revenue arising on a transaction is usually determined by agreement between the entity and the purchaser or user of the asset or service. It is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts and volume rebates allowed by the entity.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

In most cases, the consideration is in the form of cash or cash equivalents and the amount of revenue is the amount of cash or cash equivalents received or receivable. However, when the inflow of cash or cash equivalents is deferred, the fair value of the consideration may be less than the nominal amount of cash received or receivable. When the arrangement effectively constitutes a financing transaction, the fair value of the consideration is determined by discounting all future receipts using an imputed rate of interest. The imputed rate of interest is the more clearly determinable of either:

- The prevailing rate for a similar instrument of an issuer with a similar credit rating; or
- A rate of interest that discounts the nominal amount of the instrument to the current cash sales price of the goods or services.

The difference between the fair value and the nominal amount of the consideration is recognised as interest revenue.

When goods or services are exchanged or swapped for goods or services which are of a similar nature and value, the exchange is not regarded as a transaction that generates revenue. When goods are sold or services are rendered in exchange for dissimilar goods or services, the exchange is regarded as a transaction that generates revenue. The revenue is measured at the fair value of the goods or services received, adjusted by the amount of any cash or cash equivalents transferred. When the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services given up, adjusted by the amount of any cash or cash equivalents transferred.

1.21. RELATED PARTIES

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions or if the related party entity and another entity are subject to common control.

Related parties include:

- Entities that directly, or indirectly through one or more intermediaries, control, or are controlled by the reporting entity;
- Individuals owning, directly or indirectly, an interest in the reporting entity that gives them significant influence over the entity, and close members of the family of any such individual;
- Key management personnel, and close members of the family of key management personnel; and
- Entities in which a substantial ownership interest is held, directly or indirectly, by any person described in the 2nd and 3rd bullet, or over which such a person is able to exercise significant influence.

Key management personnel include:

- All directors or members of the governing body of the entity, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee.
- Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting entity being the Municipal Manager, Chief Financial Officer an all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.22. UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in a form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 56 of 2003). Unauthorised expenditure is accounted for as an expense (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.23. IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No. 56 of 2003), the Municipal Systems Act (Act No. 32 of 2000), the Public Office Bearers Act, and (Act. No. 20 of 1998) or is in contravention of the Municipality's Supply Chain Management Policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.24. FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and could have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.25. CONTINGENT LIABILITIES

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent liability could also be a present obligation that arises from past events, but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to the obligation or the amount of the obligation cannot be measures with sufficient reliability.

Management judgement is required when recognising and measuring contingent liabilities.

1.26. PRESENTATION OF BUDGET INFORMATION

The presentation of budget information was prepared in accordance with formats contained in the Municipal Budget Reporting Regulations. The presentation of budget information is in line with the basis of accounting as per the GRAP Framework. GRAP 24: Presentation of Budget Information in Financial Statements is not yet effective. This standard brings new rules in respect of presentation of budget information.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

1.27. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

In the process of applying the Municipality's accounting policy, management has made the following significant accounting judgements, estimates and assumptions, which have the most significant effect on the amounts recognised in the financial statements:

Post-retirement medical obligations and Long service awards

The cost of post-retirement medical obligations and long service awards are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Major assumptions used are disclosed in note 3 of the Annual Financial Statements. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

Impairment of Receivables

The calculation in respect of the impairment of debtors is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This was performed per service-identifiable categories across all classes of debtors.

Property, Plant and Equipment

The useful lives of property, plant and equipment are based on management's estimation. Infrastructure's useful lives are based on technical estimates of the practical useful lives for the different infrastructure types, given engineering technical knowledge of the infrastructure types and service requirements. For other assets and buildings management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and residual values of Property, Plant and Equipment.

- The useful life of movable assets was determined using the age of similar assets available for sale in the active market. Discussions with people within the specific industry were also held to determine useful lives.
- Local Government Industry Guides was used to assist with the deemed cost and useful life of infrastructure assets.
- The Municipality referred to buildings in other municipal areas to determine the useful life of buildings. The Municipality also consulted with engineers to support the useful life of buildings, with specific reference to the structural design of buildings.

For deemed cost applied to other assets as per adoption of Directive 7, management used the depreciation cost method which was based on assumptions about the remaining duration of the assets.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

The cost for depreciated replacement cost was determined by using either one of the following:

- cost of items with a similar nature currently in the Municipality's asset register;
- cost of items with a similar nature in other municipalities' asset registers, given that the other municipality has the same geographical setting as the Municipality and that the other municipality's asset register is considered to be accurate;
- cost as supplied by suppliers.

For deemed cost applied to land and buildings as per adoption of Directive 7, management made use of on independent valuator. The valuator's valuation was based on assumptions about the market's buying and selling trends and the remaining duration of the assets.

Intangible Assets

The useful lives of intangible assets are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate.

Management referred to the following when making assumptions regarding useful lives of intangible assets:

• Reference was made to intangibles used within the Municipality and other municipalities to determine the useful life of the assets.

Investment Property

The useful lives of investment property are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their economic lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and valuation of investment property:

- The Municipality referred to buildings in other municipal areas to determine the useful life of buildings.
- The Municipality also consulted with professional engineers and qualified valuators to support the useful life of buildings.

For deemed cost applied to Investment Property as per adoption of Directive 7, management made use of on independent valuator. The valuator's valuation was based on assumptions about the market's buying and selling trends and the remaining duration of the assets.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

Inventory

For deemed cost applied to Inventory as per adoption of Directive 7, management made use of on independent valuator. The valuator's valuation was based on assumptions about the market's buying and selling trends and the remaining duration of the assets.

Provisions and Contingent Liabilities

Management judgement is required when recognising and measuring provisions and when measuring contingent liabilities. Provisions are discounted where the time value effect is material.

Revenue Recognition

Accounting Policy 1.20.1 on Revenue from Non-Exchange Transactions and Accounting Policy 1.20.2 on Revenue from Exchange Transactions describes the conditions under which revenue will be recognised by management of the Municipality.

In making their judgement, management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and GRAP 23: Revenue from Non-Exchange Transactions.). Specifically, whether the Municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been performed. Revenue from the issuing of spot fines and summonses has been recognised on the cash basis. The management of the Municipality is satisfied that recognition of the revenue in the current year is appropriate.

Provision for Landfill Sites

The provision for rehabilitation of the landfill site is recognised as and when the environmental liability arises. The provision is calculated by a qualified environmental engineer. The provision represents the net present value of the expected future cash flows to rehabilitate the landfill site at year end. To the extent that the obligations relate to an asset, it is capitalised as part of the cost of those assets. Any subsequent changes to an obligation that did not relate to the initial related asset is charged to the Statement of Financial Performance.

Management referred to the following when making assumptions regarding provisions:

- Professional engineers were utilised to determine the cost of rehabilitation of landfill sites as well as the remaining useful life of each specific landfill site.
- Interest rates (investment rate) linked to prime was used to calculate the effect of time value of money.

Provision for Staff leave

Staff leave is accrued to employees according to collective agreements. Provision is made for the full cost of accrued leave at reporting date. This provision will be realised as employees take leave or when employment is terminated.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

Provision for Performance bonuses

The provision for performance bonuses represents the best estimate of the obligation at year end and is based on historic patterns of payment of performance bonuses. Performance bonuses are subject to an evaluation by Council.

Componentisation of Infrastructure assets

All infrastructure assets are unbundled into their significant components in order to depreciate all major components over the expected useful lives. The cost of each component is estimated based on the current market price of each component, depreciated for age and condition and recalculated to cost at the acquisition date if known or to the date of initially adopting the standards of GRAP.

1.28. TAXES – VALUE ADDED TAX

Revenue, expenses and assets are recognised net of the amounts of value added tax. The net amount of Value added tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

1.29. CAPITAL COMMITMENTS

Capital commitments disclosed in the financial statements represents the balance committed to capital projects on reporting date that will be incurred in the period subsequent to the specific reporting date.

1.30. AMENDED DISCLOSURE POLICY

Amendments to accounting policies are reported as and when deemed necessary based on the relevance of any such amendment to the format and presentation of the financial statements. The principal amendments to matters disclosed in the current financial statements include fundamental errors, and the treatment of assets financed by external grants.

3.3 Retirement Funds

The Cape Retirement Fund is a multi-employer plan. This means that there are multiple local authorities that participate in this fund. In terms of GRAP 25, this multi-employer plan is defined as a defined benefit plan. GRAP 25 also state that when sufficient information is not available to use defined benefit accounting for a multi-employer plan, an entity will account for the plan as if it were a defined contribution plan.

The Municipality requested detailed employee and pensioner information as well as information on the Municipality's share of the Retirement Fund' assets from the fund administrator. The fund administrator confirmed that assets of the Retirement Funds are not split per participating employer. Therefore, the Municipality is unable to determine the value of the plan assets as defined in GRAP 25.

As part of the Municipality's process to value the defined benefit liabilities, the Municipality requested pensioner data from the fund administrator. The fund administrator claim that the pensioner data to be confidential and were not willing to share the information with the Municipality. Without detailed pensioner data the Municipality was unable to calculate a reliable estimate of the accrued liability in respect of pensioners who qualify for a defined benefit pension.

Therefore, although the Cape Joint Retirement Fund is defined as a defined benefit plan, it will be accounted for as defined contribution plan

CAPE RETIREMENT FUND

The contribution rate payable is 9% by members and 18% by Council. The last actuarial valuation performed for the year ended 30 June 2011 revealed that the fund is in a sound financial position with a funding level of 100.3% (30 June 2010 - 100.3%).

NON-CURRENT PROVISIONS		
Provision for Rehabilitation of Landfill-site:	6 189 704	5 894 956
Total Non-current Provision	6 189 704	5 894 956
Landfill Sites		
Balance 1 July	5 894 956	5 609 121
Contribution for the year Expenditure for the year	294 748	285 835
Balance 30 June	6 189 704	5 894 956
The calculation for the rehabilitation of the landfill site provision was compiled by an external specialist who was used to perform a valuation of the estimated annual cost of closure and rehabilitation (recurring costs) for the following landfill sites:		
- Mount Fletcher	592 372	564 164
- Maclear	2 781 962	2 649 488

	6 189 704	5 894 956
- Ugie	2 815 369	2 681 304
- Maclear	2 781 962	2 649 488
- Mount Fletcher	592 372	564 164

No landfill sites are scheduled for closure in the year that would require closure by capping. All sites are to remain operational. Allowance has been made for survey, environmental and community issues in providing cover to the existing waste to a suitable standard.

The quantity of waste deposited on the Elundini sites has been given as 785 tonnes per year (i.e. 3 tonnes a day) for Mt Fletcher and 1350 tonnes per year (i.e. 5 tonnes as day) for Maclear. This will classify the two sites as Communal in size. It is assumed the Ugie site has been classified as Communal. No leachate problems have been reported from the Mt Fletcher and Ugie sites, but the classification indicates Maclear has a leachate issue.

In calculating the provision for rehabilitation, the following four items have been included, viz.

- 1 Direct Contract Cost
- 2 Indirect Professional Fees
- 3 Indirect Disbursements
- 4 Escalation

4

There are currently three landfill sites in Elundini which service Mount Fletcher, Maclear and Ugie, hence they are named after the town which they service.

Mt Fletcher Landfill Site:-

- Size of operational landfill area? 1 500 m² (Measured on site)
- Is the site licensed? Yes
- What is the classification of the site? G:C:B-
- Is the site operational? Yes
- If the site is operational, is there an expected closure date? No
- If the site is operational, what is the annual tonnage of waste deposited on site? 785 tons
- If the site is not operational what was the date the site was last operated? N/A
- Is there any hazardous waste on site? Previous occurrences of medical waste took place, EHP
- from District Municipality assist us by monitoring the site
- Are there any existing boreholes for monitoring? No
- Is there a monitoring program in place? N/A
- Are there any physical/geographical features that should be taken into consideration? No
- Status of cover material? N/A. Trench System, cover material available from trenching process.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

The movement in current employee benefits are reconciled as follows:	2012 R	2011 R
Provision for Performance Bonuses		
Balance at beginning of year Contribution for the year Expenditure incurred	1 929 827 1 307 675 (1 124 128)	1 198 260 1 227 573 (496 006)
Balance at end of year	2 113 374	1 929 827

Performance bonuses are being paid to Municipal Manager, Directors, Contract Workers and other Senior Managers after an evaluation of performance.

Bonuses Accrued

Balance at beginning of year	950 851	857 741
Contribution for the year	1 186 589	950 851
Expenditure incurred	(950 851)	(857 741)
Balance at end of year	1 186 589	950 851

Bonuses are being paid to all municipal staff, excluding the Chief Financial Officer who elected not to structure within package. The balance at year end represent to portion of the bonus that have already vested for the current salary cycle.

Provision for Staff Leave

Balance at beginning of year	2 553 198	1 702 253
Contribution for the year	700 513	1 080 652
Expenditure incurred	(225 675)	(229 707)
Balance at end of year	3 028 036	2 553 198

Staff leave accrued to employees according to a collective agreement. Provision is made for the full cost of accrued leave at reporting date. This provision will be realised as employees take leave or when employment is terminated.

Other Provisions

Balance at beginning of year	93 927	311 024
Contribution to current portion - Task Job Evaluation Provisior	1 937 477	-
Expenditure incurred	-	(217 097)
Balance at end of year	2 031 404	93 927
Shortfall in annual earnings of Cape Joint Pension Fund	93 927	93 927
TASK Job Evaluation Provision	1 937 477	-

Other provisions are non-recurring provisions which consists out of the following at year enc

Shortfall in annual earnings of Cape Joint Pension Func

It was reported that the established investment return of the fund for the past financial year was -0.94%. Local authorities, including the Economic Municipality, associated with the fund are under an obligation to contribute pro-rata to the fund such a sum as will make up for any shortfall between the actual earnings and an investment return of 5.5% on all its assets.

TASK Job Evaluation Provision

The Categorisation and Job Evaluation Wage Curves Collective Agreement became effective on 1 July 2010. Hereby all employees (excluding Municipal Manager, Section 57 Managers and contractual employees) are to receive new wage rates as a result of their jobs being evaluated as per the TASK Job Evaluation System and published by SALGBC. Qualifying employees will receive backpay as from 1 October 2009 as per clause 7.2.6 of the Collective Agreement.

Total Net Receivables from Exchange Transactions - Continued Operations	18 487 058	17 391 385

Consumer debtors are payable within 30 days. This credit period granted is considered to be consistent with the terms used in the public sector, through established practices and legislation. Discounting of Receivables from exchange transactions on initial recognition is not deemed necessary.

Reconciliation of Allowance for doubtful debts Balance at beginning of year 40 038 197 34 051 586 9 579 995 Contribution to provision 10 969 973 Debt Impairment written off against provision (20 403 572) (3 593 384) 40 038 197 30 604 598 Balance at end of year 10 029 388 4 682 881 7 468 317 4 965 749 Electricity Water 15 644 067 21 670 080 Refuse Sewerage 599 974 470 241 Other 1 926 491 3 185 607

Concentrations of credit risk with respect to Receivables from exchange transactions are limited due to the Municipality's large number of customers. The Municipality's historical experience in collection of receivables falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the Municipality's receivables.

Rates	10 261 870	11 291 995
Concentrations of credit risk with respect to receivables are limited due to the Municipality's large number of	· / ·	

Concentrations of credit risk with respect to receivables are limited due to the Municipality's large number of customers. The Municipality's historical experience in collection of receivables falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the Municipality's receivables.

Restated Balance

General expenses contains administrative and technical expenses otherwise not provided for in the line-items of the Statement of Financial performance. This include items such as telecommunications, travelling, legal fees, auditing fees and consulting fees

Included in Lease Rentals is an operating lease with Joe Gqabi District Municipality. Effective 1 July 2009 an agreement was entered with Joe Gqabi District Municipality whereby the water and sanitation assets are rented from the District Municipality for a nominal sum of R1 per year. The contract is renewable annually. In terms of the agreement all assets to water and sanitation are capitalised in the records of the water services authority being Joe Gqabi District Municipality. In terms of the trading activity, due to the fact that the Elundini Municipality accrue for all income and expenditure, all accounts receivable will also accrue to the water service provider, being Elundini Municipality. An operating subsidy is also accrued for annually from the District Municipality based on the lease agreement concluded.

		2012	2011
35	DISCONTINUED OPERATIONS	R	R
	The Municipality acted as Water Service Provider (WSP) for the provision of water and sanitation services on behalf of the Water Service Authority, Joe Gqabi District Municipality. The Water Service Authority resolved to resume full accountability for these functions as from 1 July 2012.		
	The effect of Discontinued Operations on the Statement of Financial Position is as follows:

			2011
36	PRIOR PERIOD ADJUSTMENTS IN TERMS OF GRAP 3		R
	Prior period adjustments includes corrections of errors as well as retrospective adjustments due to the Transitional Provisions contained in Directive 4 not being available to the Municipality on 30 June 2012.		
36.01	Conditional Government Grants		
	The following errors were noted and corrected:		
	Grant income not recognised where conditions were met - refer to note 8 and 18		
	National Government Grants Accumulated Surplus - 1 July 2010 note - 36.11		375 609 (375 609)
	Grant income recognised where conditions not were met - refer to note 8 and 18		
	National Government Grants		(323 299)
	Municipal Infrastructure Grant (MIG Accumulated Surplus - 1 July 2010 note - 36.11		313 878 9 421
	Accontaitated Surplus - 1 Sury 2010 11010 - 30.11		9 42 1

36.02	Property Rates and Service Charges	2011 R
	In the current year errors were noted with regards to property rates and service charges. Errors included levies on municipal owned property and churches, water leakages and electricity connection errors. Accordingly, Receivables, Service Charges and Property Rates were overstated.	
	Refer to Receivables from Exchange Transactions - note 14 Refer to Receivables from Non-Exchange transactions - note 14 Refer to Receivables from Non-Exchange transactions - note 15 Accumulated Surplus - 1 July 2010 note - 36.11	(38 091) (32 191) (104 880) (52 526) (16 182) (143 383) 387 254
	The water and sanitation receivables that were transferred on 1 July 2009 from the District Municipality as per service level agreement, were at actual values. The transferred receivables should have been recorded at Rnil value, as no consideration in the form of assets were given to the District Municipality. Refer to Receivables from Exchange Transactions - note 14	8 691 153
	Refer to Receivables from Exchange Transactions - note 14 Refer to Receivables from Exchange Transactions - note 14	(6 462 548) (2 228 605)
36.03	Value Added Tax	
	In the current year outstanding VAT subject to SARS audits were paid. The outstanding VAT related to years prior to 2007. The Municipality elected to write off these VAT in the prior year. Accordingly, both VAT and Accumulated Surplus were understated.	
	Refer to Taxes - note 9 Accumulated Surplus - 1 July 2010 note - 36.11	1 879 959 (1 879 959)
36.04	Payables from Exchange Transactions	
	During the year invoices were received relating to prior year. These invoices were not accrued for on 30 June 2011. Accordingly, Payables from Exchange Transactions and General Expenses were understated, while Accumulated Surplus were overstated.	
	Refer to Payables from Exchange Transactions - note 7 Refer to Repairs and Maintenance (Infrastructure) - note 2§ Refer to Repairs and Maintenance (Other Assets) - note 2§ Refer to General Expenses - note 34 Refer to Discontinued Operations (Repairs and Maintenance) - note 3! 45 FINANCIAL RISK MANAGEMENT

The activities of the Municipality expose it to a variety of financial risks, including market risk (comprising fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Municipality's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Municipality's financial performance.

(a) Foreign Exchange Currency Risk

The Municipality does not engage in foreign currency transactions

(b) Price risk

The Municipality is not exposed to price risk

(c) Interest Rate Risk

As the Municipality has significant interest-bearing liabilities, the Municipality's income and operating cash flows are substantially dependent on changes in market interest rates.

The Municipality analyses its potential exposure to interest rate changes on a continuous basis. Different scenarios are simulated which include refinancing, renewal of current positions, alternative financing and hedging. Based on these scenarios, the Municipality calculates the impact that a change in interest rates will have on the surplus/deficit for the year. These scenarios are only simulated for liabilities which constitute the majority of interest bearing liabilities

The Municipality did not hedge against any interest rate risks during the current year.

The potential impact on the Municipality's surplus/deficit for the year due to changes in interest rates were as follow:

0.5% (2011 - 0.5%) Increase in interest rates	203 438	199 322
0.5% (2011 - 0.5%) Decrease in interest rates	(203 438)	(199 322)

(d) Credit Risk

Credit risk is the risk that a counter party to a financial or non-financial asset will fail to discharge an obligation and cause the Municipality to incur a financial loss. Credit risk consist mainly of cash deposits, cash equivalents, trade and other receivables and unpaid conditional grants and subsidies.

Receivables are disclosed net after provisions are made for impairment and bad debts. Receivables comprise of a large number of ratepayers, dispersed across different sectors and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Credit risk pertaining to trade and other debtors is considered to be moderate due the diversified nature of debtors and immaterial nature of individual balances. In the case of consumer debtors the Municipality effectively has the right to terminate services to customers but in practice this is difficult to apply. In the case of debtors whose accounts become in arrears, Council endeavours to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

All rates and services are payable within 30 days from invoice date. Refer to note 14 for all balances outstanding longer than 30 days. These balances represent all debtors at year end which defaulted on their credit terms. Also refer to note 14 for balances included in receivables that were re-negotiated for the period under review.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

Balances past due not impaired:	2012 %	2012 R	2011 %	2011 R

-	100.00%	30 604 598	100%	40 038 197

The Municipality only deposits cash with major banks with high quality credit standing. No cash and cash equivalents were pledged as security for financial liabilities and no restrictions were placed on the use of any cash and cash equivalents for the period under review. Although te credit risk pertaining to cash and cash equivalents are considered to be low, the maximum exposure are disclosed below.

The banks utilised by the Municipality for current and non-current investments are all listed on the JSE (First National Bank and Standard Bank). The credit quality of these institutions are evaluated based on their required SENS releases as well as other media reports. Based on all public communications, the financial sustainability is evaluated to be of high quality and the credit risk pertaining to these institutions are considered to be low.

The risk pertaining to unpaid conditional grants and subsidies are considered to be very low. Amounts are receivable from national and provincial government and there are no expectation of counter party default.

Receivables are individually evaluated annually at Statement of Financial Position date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable

Financial assets exposed to credit risk at year end are as follows	2012 R	2011 R
Receivables from Exchange Transactions Receivables from Non-Exchange Transactions Cash and Cash Equivalents Unpaid conditional grants and subsidie:	51 191 603 14 886 872 41 020 026 36	57 429 582 12 577 701 27 896 566 231 709

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2012

(e) Liquidity Risk

46

46.1

2012 2011 R

R

Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying business, the treasury maintains flexibility in funding by maintaining availability under credit lines.

The Municipality's risk to liquidity is a result of the funds available to cover future commitments. The Municipality manages liquidity risk through an ongoing review of future commitments and credit facilities

The table below analyses the Municipality's financial liabilities into relevant maturity groupings based on the remaining period at the financial year end to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant

EVENTS AFTER THE REPORTING DATE 47

The Municipality has no events after reporting date during the financial year ended 2011/2012

48 IN-KIND DONATIONS AND ASSISTANCE

The Municipality did not receive any in-kind donations or assistance during the year under review

PRIVATE PUBLIC PARTNERSHIPS 49

Council has not entered into any private public partnerships during the financial year.

50 CONTINGENT LIABILITY

Council do have the following contingent liabilities at the end of the financial year 2011/201:

A claim has been lodged by Mr. S Songca for the amount of R50 000 plus 15.5% interest costs for monies

payable in respect of farm damages resulting from veld fires. The claim is still pending before court.

There has been a claim lodged by Wesbank against the Municipality in relation to the cancelation of a rental agreement for a PABX system. The rental agreement was entered into in 2005, however due to persistent problems with the system, the agreement was cancelled in July 2008 and the assets of the system collected on the 25th February 2009. Currently a claim to the value of R296 224.31 has been lodged against the Municipality by Wesbank. This debt has prescribed in July 2011 and as such Council is dealing with the matter to have the debt set aside. This matter is currently pending before the High Court in Grahamstown

The Municipality obtained an eviction order againts various invaders in Mount Fletcher. The matter is currently pending before the High Court in Mthatha. The estimated legal costs and eviction related costs are estimated at R400 000.

The Municipality is currently assisting Councillors to recover their pension contribution for the last term in office. This matter is still to be referred to attorneys in order to persue. The estimated cost to persue this case is R200 000.

Amadwala Trading 363 CC has applied for a administrative review in relation to the tender awarded for the Dengwane Acces Road project. No court date has been set as to date. The anticipated legal costs are R150 000.

The Waste Group (Pty) Ltd has applied for a administrative review in relation to the tender awarded for the operation and maintenance of waste disposal sites. The anticipated legal costs are R300 000.
