

ANNUAL FINANCIAL STATEMENTS 2012/2013

VISION - A Unified Cape Winelands of Excellence!

MISSION -All structures of the Cape Winelands co-operate together towards effective, efficient and economically sustainable development.

Tel: 086 126 5263

Email: admin@capewinelands.gov.za Website: www.capewinelands.gov.za

Financial Statements for the year ended 30 June 2013

General Information

Nature of business and principal activities

The Municipality is a local authority that -

- a) Ensures comprehensive and equitable Municipal Health Services within the Cape Winelands;
- b)Ensures co-ordination of multi-disciplinary and sectorial disaster risk reduction through integrated institutional capacity for Disaster Risk Management, Disaster Risk Assessment, Response and Recovery;
- c) Provides effective planning and co-ordination of fire fighting services, prevention activities and training services throughout the Cape Winelands;
- d) Facilitates environmentally sustainable economic development & investment attraction as well as retention through the development and management of strategic partnerships;
- e) Facilitates skills development within the Cape Winelands District Municipality by means of knowledge management and social infrastructure investment;
- f) Facilitates the creation of sustainable jobs within the Cape Winelands through the provision and maintenance of economic infrastructure;
- g) Provides support and shared services to local municipalities to facilitate economic development planning within the Cape Winelands;
- h) Increases access to safe and efficient transport;
- i) Develops integrated and sustainable human settlements;
- j) Integrates service delivery for maximum impact;
- k) Creates opportunities for growth and development in rural areas; and
- I) Empowers vulnerable groups, build human capital, invest in social capital and rural development programmes.

MFMA Municipal Finance Management Act, 2003 (Act no. 56 of 2003)

Financial Statements for the year ended 30 June 2013

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act, 2003 (Act No. 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the financial statements and were given unrestricted access to all financial records and related data.

The financial statements have been prepared in accordance with South African Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The financial statements are based on appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges ultimate responsibility for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year until 30 June 2014 and, in the light of this review and the current financial position, is satisfied that the municipality has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is predominately dependent on government grants for the continued funding of operations. The financial statements are prepared on the basis that the municipality is a going concern and that the government has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, the accounting officer is supported by the municipality's internal auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's financial statements. The financial statements have been examined by the municipality's external auditors.

The financial statements set out on pages 5 to 53, which have been prepared on the going concern basis, were approved by the accounting officer on 30 August 2013.

Accounting Officer M Mgajo

Financial Statements for the year ended 30 June 2013

Accounting Policies

1. Basis of preparation

a) Statement of compliance

The annual financial statements are prepared in accordance with theSouth African Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, 2003 (Act 56 of 2003). Accounting policies for material transactions, events or conditions not covered by the above GRAP standards were developed in accordance with the hierarchy set out in paragraph 12 of GRAP 3. The details of any changes in accounting policies are explained in the relevant policy.

Basis of measurement

The annual financial statements are prepared on an accrual basis of accounting and in accordance with historical cost convention unless otherwise stated.

The accounting policies that were consistently applied for the periods under review are summarised in Section 1.2, significant accounting policies.

a) Functional and presentation currency

These annual financial statements are presented in South African Rand (R), which is the municipality's functional currency. All financial information has been rounded to the nearest Rand.

b) Offsetting

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset amounts, and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. Revenue and expenses have not been offset except when offsetting is required or permitted by a standard of GRAP.

c) Comparative information

Comparative figures are re-classified or restated as and when necessary to afford a proper and meaningful comparison of results, as set out in the affected notes to the financial statements.

Accounting estimates and judgements

a) Key sources of estimation for uncertainty

Impairment of trade and other receivables

The impairment of the municipality's trade and other receivables is based on incurred losses in accordance with the requirements of GRAP 104. The historical loss experience of the municipality, based on observable data through the passage of time, is used to estimate the impairment of trade and other receivables. Any changes in the payment status of customers in a specific group or national or local economic conditions that correlate with defaults on the assets in the group will have an impact on the impairment of trade and other receivables.

Allowance for slow moving, damaged and obsolete inventory

Management has made estimates of the selling price less cost to sell off certain inventory items in order to calculate the allowance to write inventory down to the lower of cost or net realisable value.

Fair value estimation

Buildings are stated at revalued amounts based on valuation techniques and market information. The actual value of these items could differ from those estimated. Refer to note 2.

b) Critical judgements in applying accounting policies

Depreciation and the carrying value of items of property, plant and equipment

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated remaining useful lives of items of property, plant and equipment will have an impact on the carrying value of these items.

Financial Statements for the year ended 30 June 2013

Accounting Policies

Determination of the recoverable service amount of non-cash generating assets

Where impairment indicators exist, the determination of the recoverable service amount of non-cash generating asset requires management to make assumptions to determine the fair value less costs to sell and the value in use based on the depreciated replacement cost model. Key assumptions include the current replacement cost of non-cash generating assets and in certain instances an assumption about the commissioning date which determines the depreciated replacement cost of the non-cash generating asset.

Standards not yet effective

The GRAP standards listed below have been issued but are not yet effective. Application of all of these standards, will be effective from a date to be announced by the Minister of Finance. Apart from GRAP 25, Employee Benefits, the effective dates for these standards have not yet been determined. Management anticipates that the adoption of these standards will not have a significant impact on the financial position, financial performance or cash flows of the municipality for the reasons detailed below.

a) GRAP 18: Segment Reporting

The standard will not have an impact on the recognition and measurement of items in the financial statements as it is a disclosure standard.

b) GRAP 20: Related Party Disclosures

This standard prescribes the related party information that should be disclosed in the annual financial statements. The adoption of this standard will therefore not have an impact on the results of the municipality.

c) GRAP 25: Employee Benefits (This standard is effective for the annual period starting on / or after 1 April 2013)

The adoption of this standard will have no impact on the annual financial statements of the municipality as actuarial gains and losses are already recognised in the Statement of Financial Performance in accordance with the provisions of IAS 19 on Employee Benefits.

d) GRAP 105: Transfers of functions between entities under common control

The provisions of the standard are not currently applicable to the municipality.

e) GRAP 106: Transfers of functions between entities not under common control

The impact on the annual financial statements cannot be determined at present. It will depend on the legislative mandate, if any, giving effect to the transfer of functions.

f) GRAP 107: Mergers

The provisions of this standard are not currently applicable to the municipality.

1.1 Going Concern

These annual financial statements are prepared on a going concern basis.

In finalising the financial statements, management must in terms of GRAP 1 disclose any material uncertainties related to events or conditions, which may cast significant doubt upon the organisation's ability to continue as a going concern. The determination whether the going concern assumption is appropriate is primarily relevant for individual entities rather than for government as a whole.

The primary source of revenue for the Cape Winelands District Municipality is transfer payments from National Government.

The aforementioned allocations are sufficient to ensure the sustainability of the District Municipality. An alternative source of revenue should be explored to reduce the dependency of the District Municipality on National Funds.

According to The Division of Revenue Act sufficient funds will be transferred to the municipality to be a going concern for the foreseeable future.

1.2 Significant accounting policies

Internal Reserves

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.2 Significant accounting policies (continued)

Capital replacement reserve (CRR)

In order to finance the provision of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR. The amount transferred to the CRR is based on the Municipality's need to finance future capital projects included in the Integrated Development Plan. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when funds from the CRR are utilised.

- The cash is invested until it is utilised. The cash may only be invested in accordance with the Cash Management and Investments Policy of the municipality.
- Interest earned on the CRR investment is recorded as part of the total interest earned in the Statement of Financial Performance, where after such interest may be transferred from accumulated surplus to CRR.
- The CRR may only be utilised for the purpose of purchasing items of property, plant and equipment for the
 municipality and may not be used for the maintenance of these items.
- If gains or losses are made on the sale of assets, the gains or losses on the sale of assets are reflected in the Statement of Financial Performance.

Government grant reserve

When items of property, plant and equipment are financed from government grants, a transfer is made from the accumulated surplus/(deficit) to the Government Grants Reserve equal to the Government Grant recorded as revenue in the statement of financial performance in accordance with a directive issued (budget circular) by National Treasury. When such items of property, plant and equipment are depreciated, a transfer is made from the Government Grant Reserve to the accumulated surplus/deficit. The purpose of this policy is to promote community equity and facilitate budgetary control by ensuring that sufficient funds are set aside to offset the depreciation charges that will be incurred over the estimated useful life of the item of property, plant and equipment financed from Government Grants.

When an item of property, plant and equipment financed from Government Grants is disposed, the balance in the Government Grant Reserve relating to such item is transferred to the accumulated surplus/(deficit).

Donations and public contributions reserve

When items of property, plant and equipment are financed from public contributions and donations, a transfer is made from the accumulated surplus/(deficit) to the Donations and Public Contributions Reserve equal to the donations and public contributions recorded as revenue in the statement of financial performance in accordance with a directive issued by National Treasury. When such items of property, plant and equipment are depreciated, a transfer is made from the Donations and Public Contributions Reserve to the accumulated surplus/(deficit). The purpose of this policy is to promote community equity and facilitate budgetary control by ensuring that sufficient funds are set aside to offset the future depreciation charges that will be incurred over the estimated useful life of the item of property, plant and equipment financed from donations and public contributions.

When an item of property, plant and equipment financed from donations and public contributions is disposed, the balance in the Donations and Public Contributions Reserve relating to such item is transferred to the accumulated surplus or deficit.

1.3 Revaluation reserve

The revaluation reserve arises from the revaluation of land and buildings in accordance with revaluation model in GRAP 17. The revaluation surplus relating to buildings is realised through use of the building by the District Municipality. The amount of the surplus transferred is the difference between depreciation based on the revalued carrying amount of the buildings and depreciation based on the building's original cost.

The revaluation surplus relating to land is realised upon disposal and subsequently transferred to the accumulated surplus. Transfers from revaluation surplus to accumulated surpluses or deficits are not made through surplus or deficit.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.4 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The District Municipality's Heritage assets are culturally significant resources. However these assets have more than one purpose thus in addition to meeting the definition of a heritage asset, it is also used as office accommodation.

Heritage assets are not recognised as a heritage asset even though the definition of a heritage asset is met, because a significant portion is applied for administrative purposes.

Heritage assets are accounted for in accordance with the Standard of GRAP on Property, Plant and Equipment (GRAP 17).

Measurement

Heritage assets are measured at cost, less accumulated depreciation and accumulated impairment losses.

The District Municipality has the following registered Heritage Assets:

- Building in 46 Alexander Street, was declared as a Provincial Heritage site on 8 September 1967.
- Building in 194 Main Road Paarl

1.5 Property, plant and equipment

Property, plant and equipment are tangible assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period for a period exceeding 12 months.

Initial recognition and measurement

Property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the District Municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary cost of dismantling and removing the asset and restoring the site on which it is located.

Where property, plant and equipment is acquired by grant or donation, the cost is considered to be the fair value of the asset at date of acquisition.

Subsequent measurement

Subsequent to initial recognition, items of property, plant and equipment are measured as follows:

- Plant and equipment at cost less accumulated depreciation and accumulated impairment losses
- Land and buildings at the revalued amount, being the fair value at the date of revaluation, less accumulated depreciation and accumulated impairment losses.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

The last valuation was performed on 30 June 2012. Revaluations were performed by an independent valuer, S.J. Marais Property Valuers which is not a connected person to the municipality.

Land and buildings are re-valued independently every 3 years.

The valuation was performed using the Capitalisation of Income Method, Comparable Sales Method and the Depreciated Replacement Cost Method.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.5 Property, plant and equipment (continued)

Subsequent expenditure relating to property, plant and equipment is capitalised if it is probable that future economic benefits or potential service delivery of the assets are enhanced in excess of the originally assessed standard of performance. If expenditure only restores the original assessed standard of performance, it is regarded as repairs and maintenance and is recognised in surplus or deficit as incurred.

Depreciation

Depreciation is calculated using the straight-line method, over the estimated useful lives of the assets. The depreciation rates are based on the following estimated useful lives for the current and comparative years:

Item	Estimated useful life
Buildings	50 - 60
Infrastructure	50 - 60
Plant and equipment	5 - 20
Vehicles	10 - 20

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

Land is not depreciated as it is deemed to have an indefinite useful life.

Impairment of non-cash generating assets

Where items of property, plant and equipment have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the Statement of Financial Performance in the period that the impairment is identified.

Non-cash generating assets are assets other than cash-generating assets. When the carrying amount of a non-cash generating asset exceeds its recoverable service amount, it is impaired. The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such an indication exists, the municipality estimates the recoverable service amount of the asset. This impairment test is performed at the same time every year.

Derecognition

An item of property, plant and equipment is derecognised on disposal or when no future economic benefits or service potential is expected from its continued use.

The gain or loss arising from the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds if any and the carrying value, and is included in surplus or deficit when such items is derecognised.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.6 Receivables from exchange transactions

Initial and subsequent measurement

Trade and other receivables are initially recognised at fair value, plus transaction costs that are directly attributable to the issue of the trade receivables and are subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Impairment of financial assets

At the end of each reporting period the group assesses financial assets to determine whether there is objective evidence that the financial assets or group of financial assets are impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 30 days overdue) are indicators of possible impairment.

Where the financial assets are impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the Statement of Financial Performance in the period that the impairment is identified. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Where financial assets are impaired through use of an allowance account, the amount of the loss is recognised in surplus or deficit within operating expenses. The assets are written off in the year in which they are identified as irrecoverable, subject to the approval of the necessary dedicated authority. When such assets are written off, the write off is made against the relevant allowance account. Subsequent recoveries of amounts previously written off are accounted for as revenue in the Statement if Financial Performance.

1.7 Payables from exchange transactions

Trade payables are initially measured at fair value, plus transaction costs that are directly attributable to the issue of the trade payables and are subsequently measured at amortised cost, using the effective interest method.

1.8 Cash and cash equivalents

Cash includes cash on hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand deposits held on call with banks and investment in financial instruments, net of bank overdrafts.

Bank overdrafts are recorded based on facility utilised. Finance charges on bank overdrafts are expensed as incurred.

1.9 Bank overdrafts and borrowings

Bank overdrafts and borrowings are initially measured at fair value and are subsequently measured at amortised cost, using the effective interest method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the District Municipality's accounting policy for borrowing costs.

1.10 Revenue

Revenue

Revenue consists of revenue from exchange and non-exchange transactions as described in more detail below and excludes value-added taxation. Revenue is recognised when it is probable that future economic benefits or service potential will flow to the District Municipality and these benefits can be measured reliably.

a) Revenue from exchange transactions

Income from agency services

Administration fees earned in respect of agency services rendered are recognised as revenue as and when the services are rendered.

Interest earned

Financial Statements for the year ended 30 June 2013

Accounting Policies

Interest earned is recognised as and when it accrues using the effective interest method.

Rental of facilities and equipment

Rental income on facilities and equipment is recognised on a straight-line basis over the lease term.

Revenue from the recovery of unauthorised, irregular and fruitless and wasteful expenditure

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act, 2003 (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials are virtually certain.

Service charges

Revenue from services charges is recognised when the service is rendered and it is probable that future economic benefits or service potential will flow to the entity and these benefits can be measured reliably. Subsequent to initial recognition, the District Municipality shall test service chargers for impairment and record such a loss as an expense.

b) Revenue from non-exchange revenue

An inflow of resources from a non-exchange transaction that meets the definition of an asset shall be recognised as an asset when it is probable that the future economic benefits or service potential associated with the asset will flow to the municipality and the fair value of the asset can be measured reliably. The asset shall be recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As an entity satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it shall reduce the carrying amount of the liability recognised and recognise an amount of revenue equal to that reduction

Government grants and subsidies

Government grants and subsidies are recognised as revenue when all the conditions associated with the grants and subsidies have been met. Interest earned on unutilised grants is recognised as a conditional grant liability if the grant conditions indicate that the interest is due to the grantor.

Public contributions and donations

Public contributions and donations are recognised as revenue on a cash receipt basis. Where the public contribution or donation is in the form of property, plant and equipment, the fair value of the property, plant and equipment is determined at the date when the risks and rewards of ownership have transferred to the district municipality.

Tariff charges

Revenue arising from the application of an approved tariff is recognised when the service is rendered by applying the relevant authorised tariff. This includes the issuing of licenses and permits.

1.11 Intangible assets

Initial recognition and measurement

An intangible asset is an identifiable non-monetary asset without physical substance. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Subsequent measurement

Subsequent to initial recognition intangible assets are carried at cost less any accumulated amortisation and impairment losses.

Intangible assets with definite useful lives are amortised on a straight-line basis over their useful lives from the date that they are available for use.

Item Useful life

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.11 Intangible assets (continued)

Computer software

5 years

Derecognition

Intangible assets are derecognised on disposal or when no future economic benefit or service potential is expected from its continued use. The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. The gain or loss is recognised in surplus or deficit when the asset is derecognised.

1.12 Inventories

Inventories consist of unsold properties and consumables.

Initial measurement

Inventories are initially measured at cost on a weighted average basis. Cost of inventories comprises all costs incurred in bringing the inventories to their present location and condition. Where inventories are acquired at no cost or for nominal consideration, the cost is deemed to be the fair value as at the date of acquisition. Direct costs relating to unsold properties are accumulated for each separately identifiable development.

Subsequent measurement

Unsold properties to be sold at market related values and consumables are subsequently valued at the lower of cost and net realisable value. Unsold properties to be distributed at no or nominal consideration are subsequently measured at the lower of cost and current replacement cost.

Derecognition of unsold properties.

The District Municipality derecognises unsold properties contained in inventory when construction of such properties has been completed and occupation of houses taken by the beneficiaries. At date of derecognition, the expense is recognised in the Statement of Financial Performance.

1.13 Financial instruments

Initial recognition and measurement

Financial instruments are recognised when the Municipality becomes a party to the contractual provisions of the instrument. Financial instruments are initially measured at fair value plus, in the case of a financial asset or liability not at fair value through surplus or deficit, transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability.

The subsequent measurement of financial instruments is dealt with as follows:

Financial Assets

A financial asset is any asset that is a cash or contractual right to receive cash.

The municipality classifies financial assets into the following category:

Loans and receivables

Loans and receivables are financial assets that are created by providing money, goods or services directly to a debtor. They are subsequently measured at amortised cost, using the effective interest method. Any adjustment is recorded in the Statement of Financial Performance in the period in which it arises.

Financial Liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity; or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity. There are two main categories of financial liabilities, the classification determining how they are measured. Financial liabilities may be measured at:

- Fair value through surplus or deficit; or
- Other financial liabilities at amortised cost

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.13 Financial instruments (continued)

The municipality measures all financial liabilities including trade and other payables, at amortised cost using the effective interest method. Financial liabilities include other non-current liabilities (excluding provisions) and trade and other payables (excluding provisions). Finance charges are accounted for on an accrual basis.

Derecognition of financial assets and liabilities

The municipality derecognises financial assets only when the contractual rights to the cash flows from the asset expire or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of financial assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred financial asset, the municipality continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

The municipality derecognises financial liabilities only when, the district municipality's obligations are discharged, cancelled or they expire.

1.14 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it is a lease other than a finance lease.

When a lease includes land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Assets subject to finance lease agreements are initially measured at the lower of fair value or the present value of the minimum lease payment, and the corresponding liability is raised at the same amount. The cost of the asset is depreciated at appropriate rates on the straight-line basis over the estimated useful lifes of the asset. Lease payments are allocated between the lease finance cost and the capital repayment, using the effective interest method. Lease finance costs are expensed when incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Operating leases - lessee

Payments made under operating leases are charged to the Statement of Financial Performance on a straight-line basis over the period of the lease.

1.15 Non-current assets held for sale

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification. Non-current assets held for sale (or disposal group) are measured at the lower of its carrying amount and fair value less costs to sell.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.16 Employee Benefits

Short term employee benefits

The cost of all short-term employee benefits, such as leave pay and bonuses, is recognised during the period in which the employee renders the related service. The district municipality recognises the expected cost of performance bonuses only when the municipality has a present legal or constructive obligation to make such payment, and a reliable estimate can be made.

Long-term employee benefits

The district municipality provides long-term incentives to eligible employees or groups of employees as detailed below.

Defined contribution plans

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods. The district municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees. The municipality has no further payment obligations once the contributions have been paid.

Defined benefit plans

Defined benefit plans are post employment benefit plans other than defined contribution plans. The municipality's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value.

The calculation is performed annually by a qualified actuary using the projected unit credit method. When the benefits of a plan are improved, the portion of the increased benefit related to past service by employees is recognised in surplus or deficit on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognised immediately in surplus or deficit.

The district municipality recognises all actuarial gains and losses arising from defined benefit plans immediately in surplus or deficit and all expenses related to defined benefit plans as employee cost in surplus or deficit.

Multi-employer funds

The Municipality contributes towards various National and Provincial administered multi-employer plans on behalf of its qualifying employees. A multi-employer plan is classified as either a defined benefit plan or a defined contribution plan.

If the plan is a defined benefit plan, an actuarial valuation should be obtained. Normal defined benefit accounting would be applied to the proportionate share of the obligation and assets relating to the municipality. If actuaries are unable to provide the district municipality with an actuarial valuation of the district municipality's proportionate share, the municipality accounts for the plan as if it was a defined contribution plan.

Where a plan is a defined contribution plan, the district municipality accounts for it in the same way as for any other defined contribution plan.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.17 Changes in accounting policies, estimates and errors

Changes in accounting policies that are effected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the district municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable. Refer to applicable note of the Annual Financial Statements for details of changes in accounting policies.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the Annual Financial Statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the district municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable. Refer to applicable note to the Annual Financial Statements for details of corrections of errors recorded during the period under review.

1.18 Provisions

A provision is recognised when the municipality has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount of the provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market assessments of the time value of money. The impact of the periodic unwinding of the discount is recognised in the Statement of Financial Performance as a finance cost.

1.19 Translation of foreign currencies

Foreign currency transactions

Transactions in foreign currencies are initially accounted for at the rate of exchange ruling on the date of the transaction. Trade creditors denominated in foreign currency are reported at reporting date by applying the exchange rate at that date. Exchange differences arising from the settlement of creditors, or on reporting of creditors at rates different from those at which they were initially recorded during the period, are recognised in surplus or deficit in the period in which they arise. The district municipality considers the necessity to take out forward cover before entering into foreign exchange transactions in order to avoid possible losses due to fluctuation in exchange rates.

1.20 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state, and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act, 2003 (Act No. 56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance, and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.21 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain, and could have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance, and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.22 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act, 2003 (Act No.56 of 2003), the Municipal Systems Act, 2000 (Act No.32 of 2000), and the Public Office Bearers Act, 1998 (Act No. 20 of 1998) or is in contravention of the district municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.23 Grants in Aid

The municipality annually awards grants to organisations in terms of Section 67 of the Municipal Finance Management Act, 2003 (Act No. 56 of 2003). When making these transfers, Council does not:

- Receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- Expect to be repaid in future; or
- Expect a financial return, as would be expected from an investment.

These transfers are accounted for as expenses in the Statement of Financial Performance in the period that the events giving rise to the transfer occurred.

1.24 Events after reporting date

Events after the reporting date that are classified as adjusting events have been accounted for in the Annual Financial Statements. The events after the reporting date that are classified as non-adjusting events after the reporting date have been disclosed in the notes to the Annual Financial Statements.

1.25 Budget information

The Municipality is subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the annual financial statements as prescribed in GRAP 24.

A comparison of actual vs. budgeted revenue and expenditure is disclosed in the Statement of Comparison of Budget and Actual and the concomitant Appendix E1 and E2 are detailing reasons for variances in excess of 10% and R10 000.

1.26 Related parties

Key management and councillors as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Key management personnel is defined as the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

1.27 Value - Added Tax

The Municipality accounts for value-added tax on the invoice basis.

1.28 Borrowing costs

Borrowing costs are capitalised against qualifying assets as part of property, plant and equipment.

Such borrowing costs are capitalised over the period during which the asset is being acquired or constructed, and borrowings have been incurred. Capitalisation ceases when construction of the asset is complete. Further borrowing costs are charged to the Statement of Financial Performance.

1.29 Contingent assets and contingent liabilities

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the annual financial statements.

11. Finance lease obligation

Finance lease liabilities relate to cellphones with lease terms of 24 months (2012: 24 months). Amounts are paid monthly in arrears and the interest rates are linked to the prime overdraft rate, currently 8.5% (2012: 9%), during the period of the lease term.

The municipality has options to acquire the cell phones at no cost or for a nominal amount at the conclusion of the lease agreement. The municipality's obligation under the finance leases are secured by the lessor's title to the leased assets.

a) Multi - employer

The scheme was established to provide benefits to employees. All existing members were given the option to transfer to Cape Joint Venture Fund before December 1990. The fund was last actuarially valued at 30 June 2012 and the funding level was certified at 99.4% (2011: 98.1%).

This defined benefit plan is accounted for as a defined contribution plan as the municipality's liability in the proportionate share of actuarial gains and losses cannot readily be determined.

b) Cape Joint Retirement and Pension Fund for Local Government

This multi-employer fund was established with effect from 1 May 1996 to provide insured death, disability and pension benefits to its members.

The contribution rate for members is 7.5% of basic salary, whilst the respective Local Authorities are contributing 19.5%.

This defined benefit plan is accounted for as a defined contribution plan as the municipality's liability in the proportionate share of actuarial gains and losses cannot readily be determined.

As at 30 June 2012 the funding level of the share account was 99.9% and the pension account was 108%. At the valuation date the municipality had 497 members (Fund: 33 979 members) and nil pensioners (Fund: 780 pensioners) belonging to the fund.

The expected contribution by the municipality to the scheme in the next financial year is R13,500,000.

c) SAMWU National Provident Fund

SAMWU National Provident Fund, which is a privately-administered fund and is subject to actuarial valuation. According to the actuarial valuation the value of total assets of the SAMWU National Provident Fund was R 2 007 million on 30 June 2006. 6.49 % of Council's employees are members of this fund. The funding level of the fund was 110.3% on 30 June 2006. Financial Statements for the 2009/2010 financial year are not available yet.

d) The Municipal councillors Pension Fund

Financial Statements for the year ended 30 June 2013

Notes to the Financial Statements

Figures in Rand	2013	2012

13. Employee benefits (continued)

This multi-employer fund was established to provide withdrawal, death and retirement benefits to Councillors. The contribution rate for Councillors is 13.75% of pensionable salary, whilst the respective Local Authorities are contributing 15%. The fund was last actuarially valued at 30 June 2009. The next actuarial valuation will be performed for the period ended 30 June 2012. It is currently not known when the latest actuarial valuation will be made available. This defined benefit plan is accounted for as a defined contribution plan as the municipality's liability in the proportionate share of actuarial gains and losses cannot readily be determined.

Contingent liabilities

(i) Application for an interdictory and declaratory relief against Cape Winelands District Municipality together with Stellenbosch Municipality for alleged non-compliance with statutory and constitutional obligations in respect of its duty to progressively realise the rights of access to adequate housing, particular to persons that are evicted and left without any alternative accommodation. During 2012/2013 the parties were in the process of exchanging pleadings and the matter was set down for 26 November 2012. If unsuccessful in opposing the application the cost will approximately be R 250 000 and if successful it is unlikely that the costs will be recovered from the plaintiff.

During 2012/2013 the matter was postponed sine die pending settlement negotiations which were ongoing. If settlement negotiations fail and the Municipality is unsuccessful in opposing the application the cost will approximately amount to R 250 000 and if successful, it is unlikely that the costs will be recovered from the applicant.

(ii) Delictual claim for damages in the amount of R 451 000. At a pre-trial conference it was decided that the matter is to be transferred from the High Court to the Magistrate Court. This has the effect that the potential liability of the Municipality is reduced to approximately R 100 000. If unsuccessful the cost might amount to R 250 000 and if successful, it is unlikely that the cost will be recovered from the plaintiff.

Please note that the amount disclosed is based on a best estimate of the possible financial implication in terms of total cost to company.

(iii) Litigating matter in respect of two eviction cases in Hermon.One matter has been settled and the other is still pending. Respondent in process of applying for pro bono - Approximately R40 000.

An amount of R 19,650.32 relates to matters that were settled by Braaf Attorneys for the 2012/2013 financial year. One matter pertaining to the application for eviction remains pending for the 2012/2013 financial year – Approximately R 8 000.

Contingent assets

(i) R4.8 million for the Municipal Infrastructure Grant was incorrectly regarded as unspent by National Treasury, deducted from the the Municipality's Equitable Share allocation and it reverted back to the National Revenue Fund. National Treasury indicated that it will consider exploring possible options that would compensate the municipality with the R4.8 million as part of the next National Adjustments Budget process or alternatively increasing allocations in the outer years of the Medium-term Expenditure Framework. However, this cannot be guaranteed and it would be mainly informed by the outcome of the National budget process.

31. Risk management

Financial risk management

Liquidity risk

It is defined as the risk that the municipality will not be able to meet its financial obligations as it falls due. The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Credit risk

Credit Risk primarily relates to cash investments. Council deposits cash surpluses with financial institutions of high quality and standing. Investments are made in terms of the Municipality's approved Cash Management and Investments Policy.

Interest rate risk

As the municipality has no significant interest- bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

The Council has no outstanding loans as at 30 June 2013. The increases in interest rates will therefore have no effect on the liquidity of Council. The average interest rate on investments was 4.44%.

At year end, financial instruments exposed to interest rate risk were as follows:

- Call deposits

Reliance on national government for funds

With the abolishment of the Regional Services Council Levies on 30 June 2006 the Cape Winelands District Municipality will be dependant on Government Grants, including the Equitable Share, for approximately 65% of the Municipality's revenue. In addition, Provincial Allocations, including the rendering of Agency Services & Public Contributions account for a further 26.4%.

Foreign currency risk

Financial Statements for the year ended 30 June 2013

Notes to the Financial Statements

Figures in Rand	2013	
i igaroo iii itaria	2010	2012

31. Risk management (continued)

Foreign currency risk is deemed to be minimal as very few international transactions are conducted.

32. Loss on foreign currency

Unrealised loss on foreign currency transaction

Microsoft lisences, software and training benefits

24,853

The municipality did not take out foreign exchange forward cover on this transaction.

33. Unauthorised expenditure

Long service bonusses

2,531,710

Unauthorised expenditure arose as a result of an actuarial valuation done respect of long service bonusses. The said expenditure will be authorised in an adjustments budget contemplated in section 28(2)(g) of the MFMA as anticipated by section 32(2)(a)(i) of the MFMA to be dealt with the Municipal Budget and Reporting Regulations, 2008 as a special adjustments budget tabled in council when the mayor tables the annual report in terms of section 127 (2) of the MFMA that deals with unauthorised expenditure from the previous year.

38. Fair Value

Financial instruments which includes short-term trade receivables and payables are stated at cost excluding debt premiums and discounts which is also equal to their fair value.

The municipality's surplus funds are not managed by external asset management service providers.

39. Capital Commitments

Commitments in respect of capital expenditure

Approved and contracted for-Infrastructure Buildings

640,299 - 414,000 640,299 414,000

The above expenditure will be funded from the accumulated surplus. Capital commitments relate to specific capital projects as per an approved tender and appropriated in terms of an approved budget, but is still in progress at 30 June 2013. See Appendix I.

40. Correction of prior period error

- (i) Liabilites relating to conditional grant was understated with an amount of R 13 597 in 2011/ 2012. The grant is received from provincial government and during the 2011/ 2012 financial year the expenditure was higher than the grant. The transaction will have the following effect.
- DT. Other Debtors:Community Development Workers Additional R13 597.
- CT. Liabilities relating to conditional grant: Community Development Workers R 13 597.
- (ii) The following restatements was made to various items and categories in the Annual Financial Statements.

The Municipality corrected the following prior period errors retrospectively and restated comparative amounts where necessary.

Management reviewed the useful lives and residual values of items of property, plant and equipment. The effect is that the opening balance of the 2012 accumulated surplus is R46 852 501 more than previously reported.

Certain housing schemes and work-in-progress items previously recognised as property, plant and equipment have been reclassified as inventory and/ or expensed. The housing schemes, classified as inventory, are subsequently measured at the lower of cost and current replacement cost. The effect of the change in valuation of housing schemes reclassified as inventory is that the opening balance of the 2012 accumulated surplus is R353 889 less than previously reported, whilst the opening balance of the 2012 accumulated surplus is R29 806 087 less than previously reported due to housing schemes and work-in-progress expensed.

Long service leave benefits were actuarial valued during the current financial year. The effect of the correction is that the opening balance of the 2012 accumulated surplus is R5 524 693 less than previously reported, whilst the expense in the current financial year is R45 682 more than previously reported.

The wage curve adjustment was previously recognised as a contingent liability has now been included in the employee benefits liability. The effect of the correction is that the opening balance of the 2012 accumulated surplus is R2 776 165 less than previously reported, whilst the expense in the current financial year is R3 206 511 more than previously reported.

Revenue relating to fire fighting services is now recognised qwhen the service is rendered and not only when the cash is received. The effect of the correction is that the opening balance of the 2012 accumulated surplus is R290 529 more than previously reported, whilst the revenue in the current financial year is R448 365 more than previously reported.

The effect of these corrections of error on accumulated surplus and surplus is summarised below:

Effect on accumulated surplus

APPENDIX H: Summary i.t.o. Procurement Exceptions and Deviations

Summary Report i.t.o. Procurement Exceptions & Deviations - Acquisitions made JULY 2012 to June 2013

SUMMARY OF EXCEPTIONS / DEVIATIONS:

PPPFA SEC.2(1)(f)	28 249.20 Preferential Procurement Policy Framework Act, 2000. Sec 2. Framework for implementation of preferential procurement policy.—
	(1) An organ of state must determine its preferential procurement policy and implement it within the following framework:
	(f) the contract must be awarded to the tenderer who scores the highest points, unless objective criteria in addition to those
	contemplated in paragraphs (d) and (e) justify the award to another tenderer;
REG.16(c) WQ -	1 447 908.71 SCM Reg.16. Written or verbal quotations.— A supply chain management policy must stipulate the conditions for the procurement of goods or services through written or verbal quotations, which must include conditions stating—
	(c) that if it is not possible to obtain at least three quotations, the reasons must be recorded and reported quarterly to the accounting officer or another official designated by the accounting officer; (Delegated to the Chief Financial
	Officer)
REG.17(1)(c) FWPQ -	4 361 743.42 SCM Reg.17. Formal written price quotations.—
	(1) A supply chain management policy must stipulate the conditions for the procurement of goods or services through formal written price quotations, which must include conditions stating—
	(c) that if it is not possible to obtain at least three quotations, the reasons must be recorded and approved by the chief financial officer or an official designated by the chief financial officer;
	(Delegated to the Deputy Director: Finance - To report to the CFO by the 3rd working day of the next month)
	SCM Reg.36. Deviation from, and ratification of minor breaches of, procurement processes.—
	(1) A supply chain management policy may allow the accounting officer—
	(a) to dispense with the official procurement processes established by the policy and to procure any required goods or services
	through any convenient process, which may include direct negotiations, but only—
DEV-REG.36(1)(a)(i)	27 727.60 (i) in an emergency;
DEV-REG.36(1)(a)(ii)	2 347 384.38 (ii) if such goods or services are produced or available from a single provider only;
DEV-REG.36(1)(a)(v)	2 692 715.00 (v) in any other exceptional case where it is impractical or impossible to follow the official procurement processes; and
EXPENDITURE TO BE APPROVED	46 250.00 Expenditure incurred where the prescribed legislation were not complied to in all aspects

OTAL: 10 951 978.31

Procurement Exceptions & Deviations =

4.60%

of expenditure excluding salaries.

SUMMARY BREAKDOWN OF PROCUREMENT PER CATEGORY:

No.	
Trans.	
7 522 <r2000-no procurement:<="" td=""><td>5 809 476.90 Acquisitions less than R2,000 - no procurement process is followed for small purchases</td></r2000-no>	5 809 476.90 Acquisitions less than R2,000 - no procurement process is followed for small purchases
1 909 3rd PARTY PAYMENT:	53 274 435.01 Transactions where procurement plays no role - contribution payments / S&Ts / etc.
355 COUNCIL POLICY:	4 254 321.92 Study Bursaries / Sponsorships / Donations / etc.
1 DEV-PPPFA SEC.2(1)(f)	28 249.20 The supplier selected for the contract/tenderer did not score the highest points
636 DEV-REG.36(1)(a)	5 067 826.98 Transactions where no procurement process were followed (Emergencies/Sole Providers/etc.)
129 DWAF: PRE-PROCURED	2 730 208.70 DWAF Contracts where the CWDM did not do the procurement.
63 PAWC: PRE-PROCURED	1 466 208.77 PAWC Contracts where the CWDM did not do the procurement.
174 PETTY CASH:	8 739.02 Mainly small out of pocket refunds
1 714 QUOTATION PROCESS:	19 149 282.93 Acquisitions made in terms of a full quotation process up to R200,000 - minimum three quotes
301 REG.16(c) < 3 WQ	1 447 908.71 Acquisitions where it was not possible to obtain at least three quotations up to R10,000
198 REG.17(1)(c) < 3 FWPQ	4 361 743.42 Acquisitions where it was not possible to obtain at least three quotations between R10,000-R200,000
1 243 SERVICE ACCOUNTS:	8 635 868.44 Contracts with service providers - Telkom / Vodacom / municipal services / copy machines / etc.
10 100 SERVICE PROVIDERS:	12 031 192.27 Payments made in terms of contracts/agreements with long-term service providers
244 STATUTORY PAYMENTS:	21 160 107.86 Prescriptive payments made in terms of legislation - licensing / taxes / membership fees / etc.
68 SUBSCRIPTIONS:	1 511 146.21 Service provider is selected for the specific service and cannot be procured - sole providers
3 890 TENDER PROCESS:	96 943 220.58 Acquisitions made in terms of a full tender process on amounts above R200,000
