Approval of annual financial statements

I am responsible for the preparation of these annual financial statements, which are set out on pages 5 to 54, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in note 24 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

ILEMBE DISTRICT MUNICIPALITY SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES As at 30 June 2013

1 BASIS OF PREPARATION

1.1 STATEMENT OF COMPLIANCE

These annual financial statements have been prepared in accordance with the effective Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

1.2 BASIS OF MEASUREMENT

The annual financial statements have been prepared on the historical cost basis except for the following material item in the statement of financial position:

the defined benefit liability is recognised as the net total of the plan assets, plus unrecognised past service cost and unrecognised actuarial losses, less unrecognised actuarial gains and the present value of the defined benefit obligation.

Accounting policies for material transactions, events or conditions not covered by the Standards of GRAP have been developed in accordance with paragraphs 7,11 and 12 of GRAP 3 *Accounting policies, changes in accounting estimates and errors*. These accounting policies and the applicable disclosures have been based on International Public Sector Accounting Standards (IPSAS) and the South African Statements of Generally Accepted Accounting Practice (SA GAAP), including any interpretations of such statements issued by the Accounting Practices Board.

1.3 FUNCTIONAL AND PRESENTATION CURRENCY

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality. All financial information has been rounded to the nearest Rand.

1.4 OFFSETTING

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the municipality has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Revenue and expenses have not been offset except when offsetting is required or permitted by a standard of GRAP.

1.5 GOING CONCERN ASSUMPTION

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.6 USE OF ESTIMATES AND JUDGEMENTS

The preparation of financial statements in conformity with GRAP requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future.

1.7 COMPARATIVE INFORMATION

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. The municipality shall present a comparison of budget and actual amounts as additional budget columns in the primary financial statements only where the financial statements and the budget are prepared on a comparable basis. All comparisons of budget and actual amounts shall be presented on a comparable basis to the budget. The municipality shall explain in notes to the financial statements the budgetary basis and classification basis adopted in the approved budget (refer note 1.10).

1.8 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the municipality. Application of all of the GRAP standards noted below will be effective from a date to be announced by the Minister of Finance. The effective dates are currently unknown.

GRAP 18 Segment Reporting - issued February 2011

GRAP 20 Related Party Disclosures - issued June 2011

GRAP 25 Employee Benefits - issued November 2009

GRAP 105 Transfer of Functions Between Entities Under Common Control - issued November 2010

GRAP 106 Transfer of Functions Between Entities Not Under Common Control - issued November 2010

GRAP 107 Mergers - issued November 2010

1.9 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED AND EFFECTIVE

The following GRAP standards have been issued and are effective and have been adopted by the municipality.

GRAP 21 Impairment of Non-cash-generating Assets - effective 01 April 2012

GRAP 23 Revenue from Non-exchange Transactions (Taxes and Transfers) - effective 01 April 2012

GRAP 24 Presentation of Budget Information in the Financial Statements - effective 01 April 2012

GRAP 26 Impairment of Cash-generating Assets - effective 01 April 2012

GRAP 103 Heritage Assets - effective 01 April 2012

GRAP 104 Financial Instruments - effective 01 April 2012

The nature of changes in the accounting policy arising from the implementation of the standards is as follows:

GRAP 21 - Non-cash-generating assets are assets other than cash-generating assets. When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired. The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, an entity estimates the recoverable service amount of the asset. The present value of the remaining service potential of a non-cash-generating asset is determined using one of the following approaches:

- · Depreciated replacement cost approach
- · Restoration cost approach
- · Service units approach

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

GRAP 23 - Revenue from non-exchange transactions arises when an entity receives value from another entity without directly giving approximately equal value in exchange. An asset acquired through a non-exchange transaction shall initially be measured at its fair value as at the date of acquisition.

This revenue will be measured at the amount of increase in net assets recognised by the municipality.

An inflow of resources from a non-exchange transaction recognised as an asset shall be recognised as revenue, except to the extent that a liability is recognised for the same inflow.

As an entity satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it will reduce the carrying amount of the liability recognised and recognise an amount equal to that reduction as revenue.

GRAP 24 - The municipality is required to present a comparison of the budget amounts for which it is held publicly accountable and actual amounts either as a separate additional financial statement or as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP. The comparison of budget and actual amounts is required to be presented separately for each level of legislative oversight:

- the approved and final budget amounts;
- the actual amounts on a comparable basis; and
- by way of note disclosure, an explanation of material differences between the budget for which the municipality is held publicly accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Where the municipality prepares its budget and annual financial statements on a comparable basis, it is required to include the comparison as an additional column in the primary annual financial statements.

Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the 'Statement of Comparison of Budget and Actual Amounts'. This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

GRAP 26 - Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

An entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset. When estimating the value in use of an asset, a municipality should estimate the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and a municipality should apply the appropriate discount rate to those future cash flows.

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

GRAP 103 - Heritage assets are assets which have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Certain heritage assets are described as inalienable items thus assets which are retained indefinitely and cannot be disposed of without consent as required by law or otherwise.

A heritage asset is recognised as an asset only if:

- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Heritage assets are recognised at cost unless it is acquired through a non-exchange transaction, in which case it is recognised at its fair value as at the date of acquisition.

The municipality has a choice between the cost and revaluation model as accounting policy for subsequent measurement and is required to apply the chosen policy to an entire class of heritage assets.

Heritage assets are subsequently carried at its cost or revalued amount less accumulated impairment. These assets are not depreciated.

GRAP 104 - The standard prescribes recognition, measurement, presentation and disclosure requirements for financial instruments. Financial instruments are defined as those contracts that results in a financial asset in one entity and a financial liability or residual interest in another entity. A key distinguishing factor between financial assets and financial liabilities and other assets and liabilities, is that they are settled in cash or by exchanging financial instruments rather than through the provision of goods or services.

One of the key considerations in initially recognising financial instruments is the distinction, by the issuers of those instruments, between financial assets, financial liabilities and residual interests.

Financial assets and financial liabilities are distinguished from residual interests because they involve a contractual right or obligation to receive or pay cash or another financial instrument.

Residual interests entitle an entity to a portion of another entity's net assets in the event of liquidation and, to dividends or similar distributions paid at management's discretion.

The standard contains further detailed guidance on the initial recognition, measurement and subsequent measurement of financial instruments and mainly distinguished between those financial instruments carried at fair value and those at amortised cost.

The impact of the application of these standards on the municipality's annual financial statements is as follows:

GRAP 21 - No material impact. The requirements of GRAP 21 are similar to the requirements of IAS 36 Impairment of assets and IPSAS 21 Impairment of non cash-generating assets.

GRAP 23 - GRAP 23 contains additional guidance on conditions, restrictions and stipulations which result in revenue being recognised at a different stage as under GAMAP 9.

For conditional grants, a liability will only be recognised if restrictions exist on the use of the resources received and it is required to repay any funds not utilised in accordance with those restrictions, while under GAMAP 9 a liability would be recognised if restrictions existed regardless of the requirement to repay the funds if it is not utilised.

GRAP 24 - Although the municipality currently presents budget information in terms of legislation, additional disclosure is required in terms of GRAP 24

The standard will however not impact the measurement of figures presented in the annual financial statements and will only result in additional detail being disclosed in relation to the budget.

GRAP 26 - No material impact. The requirements of GRAP 26 are similar to the requirements of IAS 36 Impairment of assets and IPSAS 21 Impairment of non cash-generating assets.

GRAP 103 - The municipality does not own significant heritage assets and the standard is therefore not expected to have a significant impacting

GRAP 104 - The categorisation of financial instruments has been simplified. Certain financial instruments may be reclassified from the IAS 39 categories and measured at amortised cost rather than fair value or vice versa.

No material impact is expected on the measurement of financial instruments as the measurement basis of the municipality's financial instruments is expected to remain unchanged (i.e., at amortised cost and at fair value).

1.10 PRESENTATION OF BUDGET INFORMATION IN THE FINANCIAL STATEMENTS

The budget is mainly approved on a cash basis by functional classification. The approved budget covers the period from 1 July 2012 to 30 June 2013. The budget and accounting bases for some votes differ. The financial statements are prepared on the accrual basis using a classification on the nature of expenses in the statement of financial performance. The financial statements differ from the budget, which is approved on the cash basis. The amounts in the financial statements were recast from the accrual basis to the cash basis and reclassified by functional classification to be on the same basis as the final approved budget. The amounts of these adjustments are identified in note 41. A reconciliation between the actual amounts on a comparable basis as presented in the statement of comparison of budget and actual amounts and the actual amounts in the cash flow statement for the period ended 30 June 2013 is presented in note 41. The financial statements and budget documents are prepared for the same period. There is a basis difference: the budget is mainly prepared on a cash basis and the financial statements on the accrual basis. The reconciliation as required by GRAP 24 is also shown in note 41. The statement of comparison of budget and actual amounts is disclosed as a statement in the annual financial statements.

Differences between budget and actual amounts are regarded as material when a more than 10% variance exists.

All material differences are explained in the notes to the annual financial statements.

2 SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies had been applied consistently during the current and previous reporting period, as set out in note 1.2

2.1 PROPERTY, PLANT AND EQUIPMENT

2.1.1 INITIAL RECOGNITION

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

2.1.2 SUBEQUENT MEASUREMENT - COST MODEL

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

2.1.3 DEPRECIATION AND IMPAIRMENT

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately.

Depreciation commences when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with GRAP 100 Non-current assets held for sale and discontinued operations. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

Infrastructure	Years	Other	Years
Water	10 - 60	Machinery and equipment	3 - 20
Sewerage	10 - 60	Furniture and equipment	3 - 50
Other	10 - 50	Motor vehicles	4 - 20

The residual value, the useful life of an asset and the depreciation method is reviewed annually and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

The municipality tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance - refer to note 19 for further information on impairment of assets.

2.1.4 DERECOGNITION

Items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

2.1.5 LEASED ASSETS

Leases in terms of which the municipality assumes substantially all the risks and rewards of ownership are classified as finance leases. Other leases are classified as operating leases. Upon initial recognition of assets leased under finance leases, the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

3 INTANGIBLE ASSETS

3.1 INITIAL RECOGNITION

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licences, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

3.2 SUBEQUENT MEASUREMENT - COST MODEL

Intangible assets are subsequently carried at cost less accumulated amortisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

3.3 AMORTISATION AND IMPAIRMENT

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method. The annual amortisation rates are based on the following estimated average asset lives:

Computer software and websites 2 - 5 Years

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date - refer to note 19 for further information on impairment of assets. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

3.4 DERECOGNITION

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

4 HERITAGE ASSETS

4.1 INITIAL RECOGNITION AND MEASUREMENT

Heritage assets are assets that are normally held indefinitely for their unique cultural, environmental, historical, natural, scientific, technological or artistic significance for the benefit of future generations.

Certain heritage assets are described as inalienable items thus assets which are retained indefinitely and cannot be disposed of without consent as required by law or otherwise.

4.2 SUBSEQUENT MEASUREMENT - COST MODEL

After recognition as an asset, a class of heritage assets are carried at its cost less any accumulated impairment losses.

4.3 DEPRECIATION & IMPAIREMENT

Heritage assets are not depreciated. The municipality assesses at each reporting date whether there is any indication that a heritage asset may be impaired - refer to note 18 for further information on impairment of assets.

In assessing whether there is an indication that an asset may be impaired, the municipality considers, as a minimum, the following indications:

4.3.1 External sources of information

- (a) During the period, a heritage asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
- (b) The absence of an active market for a revalued heritage asset.

4.3.2 Internal sources of information

- (a) Evidence is available of physical damage or deterioration of a heritage asset.
- (b) A decision to halt the construction of the heritage asset before it is complete or in a usable form.

4.4 DERECOGNITION

The carrying amount of a heritage asset is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from derecognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amounts of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

5 INVENTORIES

5.1 INITIAL RECOGNITION

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

5.2 SUBSEQUENT MEASUREMENT

Inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down in this way. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

The basis of allocating cost to inventory items is the weighted average method.

5.3 WATER INVENTORY

Water inventory represents water housed in reservoirs within the municipal area and is measured at the lower of cost, which is deemed to be fair value, and net realisable value. In the absence of a market that trades in water outside of local government, the fair value utilised to quantify water inventory is based on the unit reference value. The unit reference value is a determined by a formula that is utilised in the engineering department to calculate the development cost of new water resources.

6 INVESTMENTS IN CONTROLLED ENTITIES

In the municipality's separate annual financial statements, investments in controlled entities are measured at cost.

7 FINANCIAL INSTRUMENTS

7.1 INITIAL RECOGNITION

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or residual interest of another entity. A financial asset is:

A financial liability is any liability that is a contractual obligation to:

deliver cash or another financial asset to another entity: or exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity.

Financial instruments are initially recognised when the municipality becomes a party to the contractual provisions. Financial assets are recognised using trade date accounting

7.2 INITIAL MEASUREMENT

Financial instruments are initially measured at fair value and plus transaction costs for financial instruments at amortised cost or cost. Fair value is usually the transaction cost at the date of recognition. For financial instruments at amortised cost, if the transaction cost is not market related i.e. no interest is charged for deferred payments or when the account is overdue, or interest charged is at below- market related rate: the municipality determines the fair value. The fair value is the present value of the expected future cash flows, without taking into account any future losses or the possibility of default, discounted using a market related interest rate, adjusted for credit risk over the expected life of the financial instrument. For financial instruments at fair value, the fair value is determined based on quoted prices in an active market. If there is no active market, it is determined using valuation techniques. For financial instruments at cost, the financial instrument is only measured at cost if the fair value can not be measured reliably. Where a financial instrument contains both a liability and a residual interest component, the municipality allocates the instrument into its component parts. The municipality recognises the liability at its fair value and recognises the residual interest as the difference between the carrying amount of the instrument and the fair value of the liability component. No gain or loss is recognised by separating the instrument into its components.

7.3 SUBSEQUENT MEASUREMENT

Financial assets and liabilities are subsequently measured either at fair value, or amortised cost or cost using the following categories:

- (a) Financial instruments at fair value
- (b) Financial instruments at amortised cost
- (c) Financial instruments at cost

7.3.1 FINANCIAL INSTRUMENTS AT FAIR VALUE

Financial instruments at fair value comprise financial assets or financial liabilities that are derivatives, combined instruments that are designated at fair value, instruments held for trading, financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost and non derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition. Financial instrument at fair value are subsequently measured at fair value with changes in fair value recognised in surplus or deficit.

7.3.2 FINANCIAL INSTRUMENTS AT AMORTISED COST

Financial instruments at amortised cost, are non-derivative financial assets or financial liabilities that have fixed or determinable payments, excluding those the municipality designates at fair value at initial recognition or are held for trading. Financial instruments at amortised cost are subsequently measured at amortised cost using effective interest rate method. The effective interest rate is the rate that exactly discounts the estimated cash flows associated with the financial instrument through the expected life of the instrument (or in some cases a shorter period) to the net carrying amount at initial recognition. Financial assets are subject to annual impairment review. Refer to note 7.6 for details on impairment and uncollectability of financial assets.

7.3.3 FINANCIAL INSTRUMENTS AT COST

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured. Financial instruments at cost are subsequently measured at cost if the fair value cannot be reliably determined. Financial assets are subject to annual impairment review. Refer to note 7.6 for details on impairment and uncollectability of financial assets.

7.4 RECLASSIFICATIONS

The municipality does not reclassify a financial instrument when it is issued or held, except for a combined instrument that is required to be measured at fair value or an investment in residual interest subject to certain requirements.

7.5 GAINS AND LOSSES

Gains and losses on fair value measurements ,reclassifications , impairment , derecognition are recognised in surplus or deficit.

7.6 IMPAIRMENT AND UNCOLLECTABILITY OF FINANCIAL ASSETS

Financial assets are subject to annual impairment review as follows:

7.6.1 FINANCIAL ASSETS AT AMORTISED COST

For financial assets at amortised cost; the municipality assesses whether there is any objective evidence that a financial asset or group of financial assets is impaired. If there is objective evidence that an impairment loss on a financial asset has been incurred, the loss is recognised in surplus or deficit. The municipality assesses financial assets individually, when assets are individually significant, and individually or collectively for financial assets that are not individually significant. Where no objective evidence of impairment exists for an individually assessed asset, (whether individually significant or not), an entity includes the assets in a group of financial assets with similar credit risk characteristics and collectively assess them for impairment. The impairment loss is the difference between the carrying amount and the present value of estimated future cash flows discounted at the original effective interest rate. The impairment loss is recognised in surplus or deficit by reducing the carrying amount either directly or through the use of an allowance account. If, in a period after an impairment loss has been recognised, events occur or circumstances change that indicate that the impairment loss recognised in a previous period should be reversed, the municipality reverses the impairment loss previously recognised either directly or by adjusting an allowance account.

7.6.2 FINANCIAL ASSETS AT COST

For financial assets at cost; the municipality assesses whether there is any objective evidence that a financial asset is impaired. If there is objective evidence that an impairment loss on a financial asset has been incurred, the loss is recognised in surplus or deficit. The impairment loss is the difference between the carrying amount and the present value of estimated future cash flow discounted at the current market rate of return for similar financial assets. The impairment loss is recognised in surplus or deficit by reducing the carrying amount directly. The impairment loss is never reversed in subsequent periods.

7.7 DERECOGNITION

7.7.1 FINANCIAL ASSETS

The municipality derecognises financial assets using trade date accounting. The municipality derecognises a financial asset only when:

- (a) the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- (b) the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- (c) the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality shall:
- (i) derecognise the asset; and
- (ii) recognise separately any rights and obligations created or retained in the transfer.

7.7.2 FINANCIAL LIABILITIES

The municipality removes a financial liability from its statement of financial position when , and only, it is extinguished . A financial liability is extinguished when the debtor either:

- (a) Discharges the liability by paying the creditor, normally with cash, other financial liabilities, goods or services.
- (b) Is legally released from primary responsibility for the liability either by process(expires) of law or by the creditor (cancelled). If the debtor has given a guarantee, this condition may still be met.
- (c) Waives the debt or it is assumed by another municipality by way of a non- exchange transaction.

Interest, dividends or similar distributions, losses and gains relating to a financial instrument or a component that is a financial liability should be recognised as revenue or expense in surplus or deficit. A financial asset and a financial liability should be offset and the net amount presented in the statement of financial position when and when, the municipality:

- (i) Currently has a legally enforceable right to set off the recognised amounts; and
- (ii) Intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously

8 FOREIGN CURRENCY TRANSACTION

Transactions in foreign currencies are translated to the functional currency of the municipality at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the reporting period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at **UNAUTHORISED EXPENDITURE**

Unauthorised expenditure is defined in section 1 of the MFMA as follows:

"unauthorised expenditure", in relation to a municipality, means any expenditure incurred by a municipality otherwise than in accordance with section 15 or 11(3), and includes—

- (a) overspending of the total amount appropriated in the municipality's approved budget;
- (b) overspending of the total amount appropriated for a vote in the approved budget;
- (c) expenditure from a vote unrelated to the department or functional area covered by the vote;
- (d) expenditure of money appropriated for a specific purpose, otherwise than for that specific purpose;
- (e) spending of an allocation referred to in paragraph (b), (c) or (d) of the definition of "allocation" otherwise than in accordance with any conditions of the allocation; or
- (f) a grant by the municipality otherwise than in accordance with this Act.

9.1 IDENTIFICATION AND INTERNAL REPORTING

Unauthorised expenditure is identified through the municipality's financial system application controls. On identification of the unauthorised expenditure due to overspending on specific votes, the relevant Head of department is notified, where funds are available on other votes within the directorate, virements are made within the provisions of the virement policy. If after the provisions of the virement policy are applied, the unauthorised expenditure still remains/exist, it is recorded in the unauthorised expenditure register and reported to the accounting officer, mayor and council in terms of MFMA section 32.

9.2 COUNCIL DECISION AND ACCOUNTING TREATMENT

Unauthorised expenditure that is incurred before the adjustment budget process is finalised is condoned by council through the adjustment budget. Unauthorised expenditure that is incurred after the adjustments budget is referred to the Municipal Public Accounts Committee (MPAC) for investigation and recommendation to council. Where MPAC after investigation, recommends to council to certify the unauthorised expenditure as irrecoverable and write - off, the unauthorised expenditure is disclosed in the notes to the financial statements as condoned by council. Where MPAC determines after investigation, that the unauthorised expenditure must be recovered from the relevant official, the unauthorised expenditure is recognised as an asset (debtor) in the statement of financial position and also disclosed in the unauthorised expenditure note as unauthorised expenditure incurred in the current financial year.

9.3 EXTERNAL REPORTING

The accounting officer of the municipality promptly informs the mayor, the MEC for local government in the province and the Auditor - General, in writing, of:

- (a) Any unauthorised expenditure incurred by the municipality;
- (b) Whether any person is responsible or under investigation for such unauthorised expenditure; and
- (c) The steps that have been taken-
 - (i) To recover or rectify such expenditure; and
 - (ii) To prevent a recurrence of such expenditure

10 IRREGULAR EXPENDITURE

Irregular expenditure is defined in section 1 of the MFMA as follows:

"irregular expenditure", in relation to a municipality or municipal entity, means—

- (a) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of this Act, and which has not been condoned in terms of section 170:
- (b) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the Municipal Systems Act, and which has not been condoned in terms of that Act;
- (c) expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998); or
- (d) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the supply chain management policy of the municipality or entity or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in terms of such policy or by-law,

but excludes expenditure by a municipality which falls within the definition of "unauthorised expenditure".

10.1 IDENTIFICATION AND INTERNAL REPORTING

Every expenditure item is reviewed before payment is made to identify any instances of non-compliance with the relevant Acts and supply chain management policy of the municipality. Where an expenditure item is identified as irregular expenditure, it is recorded in the irregular expenditure register and reported to the accounting officer, mayor and council in terms of MFMA section 32.

10.2 COUNCIL DECISION AND ACCOUNTING TREATMENT

Irregular expenditure reported to council is referred to the Municipal Public Accounts Committee (MPAC) for investigation and recommendation to council. Where MPAC after investigation, recommends to council to certify the irregular expenditure as irrecoverable and write - off, the irregular expenditure is disclosed in the notes to the financial statements as certified and written - off by council as irrecoverable. Where MPAC determines after investigation, that the irregular expenditure must be recovered from the relevant official, the irregular expenditure is recognised as an asset (debtor) in the statement of financial position and also disclosed in the irregular expenditure note as irregular expenditure incurred in the current financial year.

10.3 EXTERNAL REPORTING

The accounting officer of the municipality promptly informs the mayor, the MEC for local government in the province and the Auditor - General, in writing, of:

- (a) Any irregular expenditure incurred by the municipality;
- (b) Whether any person is responsible or under investigation for such irregular expenditure; and
- (c) The steps that have been taken-
 - (i) To recover or rectify such expenditure; and
 - (ii) To prevent a recurrence of such expenditure

11 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is defined in section 1 of the MFMA as follows:

"fruitless and wasteful expenditure" means expenditure that was made in vain and would have been avoided had reasonable care been exercised.

11.1 IDENTIFICATION AND INTERNAL REPORTING

Every expenditure item is reviewed before payment is made to identify whether it meets the definition of fruitless and wasteful expenditure. Where an expenditure item is identified as fruitless and wasteful expenditure, it is recorded in the fruitless and wasteful expenditure register and reported to the accounting officer, mayor and council in terms of MFMA section 32.

11.2 COUNCIL DECISION AND ACCOUNTING TREATMENT

Fruitless and wasteful expenditure reported to council is referred to the Municipal Public Accounts Committee (MPAC) for investigation and recommendation to council. Where MPAC after investigation, recommends to council to certify the fruitless and wasteful expenditure as irrecoverable and write - off, the fruitless and wasteful expenditure is disclosed in the notes to the financial statements as certified and written - off by council as irrecoverable. Where MPAC determines after investigation, that the fruitless and wasteful expenditure must be recovered from the relevant official, the fruitless and wasteful expenditure is recognised as an asset (debtor) in the statement of financial position and also disclosed in the fruitless and wasteful expenditure note as fruitless and wasteful expenditure incurred in the current financial year.

11.3 EXTERNAL REPORTING

The accounting officer of the municipality promptly informs the mayor, the MEC for local government in the province and the Auditor - General, in writing, of:

- (a) Any irregular expenditure incurred by the municipality;
- (b) Whether any person is responsible or under investigation for such fruitless and wasteful expenditure; and
- (c) The steps that have been taken-
 - (i) To recover or rectify such expenditure; and
 - (ii) To prevent a recurrence of such expenditure

12 PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

A provision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision have been met: (a) The municipality has a detailed formal plan for the restructuring identifying at least:

(b) The municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

13 LEASES

13.1 MUNICIPALITY AS LESSEE

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease.

13.2 MUNICIPALITY AS LESSOR

Under a finance lease, the municipality recognises the lease payments to be received in terms of a lease agreement as an asset (receivable). The receivable is calculated as the sum of all the minimum lease payments to be received, plus any unguaranteed residual accruing to the municipality, discounted at the interest rate implicit in the lease. The receivable is reduced by the capital portion of the lease instalments received, with the interest portion being recognised as interest revenue on a time proportionate basis. The accounting policies relating to derecognition and impairment of financial instruments are applied to lease receivables.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

14 REVENUE

14.1 REVENUE FROM EXCHANGE TRANSACTIONS

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. Further adjustments are made to take into account staggered tariffs where applicable. The estimates of consumption between meter readings are based on 6 months average reading history.

Service charges from sewerage and sanitation are based on the value of the property with sewerage connections on each developed property using the tariffs approved by Council and are levied monthly.

Interest revenue is recognised on a time proportion basis.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods is passed to the consumer.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services.

14.2 REVENUE FROM NON - EXCHANGE TRANSACTIONS

Revenue from non-exchange transactions are transactions where the municipality receives revenue and provide no or a nominal consideration directly in return.

A transaction can be a combination of exchange and non-exchange transactions. In these instances the municipality determines what portion of the transaction is an exchange transaction and what portion is a non-exchange transaction and then recognise it separately.

Most non-exchange transactions that the municipality enters into involve stipulations on transferred assets are in terms in laws or regulations, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the municipality. Stipulations can either be in the form of conditions or in the form of restrictions. For both conditions and restrictions the municipality may be required to use the transferred asset for a particular purpose. The municipality uses substance over form to determine whether a stipulation is a condition or restriction.

14.3 RECOGNITION

An inflow of resources from a non-exchange transaction, other than services in-kind, that meets the definition of an asset are recognised as an asset when all of the following criteria have been satisfied:

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow (which is the case when a stipulation is a condition).

Liabilities are recognised for conditions to be met which is attached to the transferred asset. The liability is discharged and revenue recognised as the conditions are satisfied.

The municipality does not recognise service in - kind.

The municipality recognises revenue from vat refunds on cash basis.

14.4 MEASUREMENT

Non-monetary assets such as property, plant and equipment, investment property and inventory, acquired through a non-exchange transaction, are initially measured at its fair value on acquisition date.

Monetary assets arising out of a contractual agreement, such as cash and receivables, are initially measured at fair value on acquisition date. Revenue is measured at the amount equal to the increase in net assets (i.e. the net effect).

The amount recognised as a liability is the best estimate of the amount required to settle the present obligation at the reporting date.

Revenue from vat refunds is measured at gross amounts.

15 BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets are capitalised to the cost of that asset unless it is inappropriate to do so. The municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete. It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established. Borrowing costs incurred other than on qualifying assets are recognised as an expense in surplus or deficit when incurred.

16 EMPLOYEES BENEFITS

16.1 SHORT-TERM EMPLOYEE BENEFITS

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past service or performance and the obligation can be estimated reliably.

Liabilities for short-term employee benefits that are unpaid at year-end are measured at the undiscounted amount that the municipality expects to pay in exchange for that service and had accumulated at the reporting date.

16.2 POST- EMPLOYMENT BENEFITS

16.2.1 DEFINED CONTRIBUTION PLANS

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in surplus or deficit in the period in which the service is rendered by the relevant employees, unless another standard requires or permits the inclusion of the contribution in the cost of an asset. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

The expected cost of bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past service or performance and the obligation can be estimated reliably.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after end of the period in which the employees render the related service, they are discounted using a risk-free rate determined by reference to market yields at the reporting date on government bonds, or by reference to market yields on high quality corporate bonds. The municipality contributes to various national-and provincial-administered defined benefit plans on behalf of its qualifying employees. These funds are multi-employer plans and are accounted for as defined contribution plans as there is no consistent and reliable basis available for allocating the obligation, plan assets and cost to individual municipalities participating in the plan. The contributions to fund obligations for the payment of retirement benefits are expensed in the year it becomes payable. These multi-employer plans are actuarially valued annually on a national-or provincial level using the projected unit credit method. Deficits are recovered through lump sum payments or increased future contributions on a proportional basis from all participating municipalities. Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

16.2.2 DEFINED BENEFITS PLANS

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. It defines an amount of benefit that an employee will receive on retirement. The municipality's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefits that employees have earned in return for their service in the current and prior periods. These benefits are discounted to determine its present value. The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduced by the fair value of plan assets.

The discount rate is the yield at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of the municipality's obligations and that are denominated in the same currency in which the benefits are expected to be paid. The calculation is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a benefit to the municipality, the recognised asset is limited to the total of any unrecognised past service costs and the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements that apply to any plan in the municipality. An economic benefit is available to the municipality if it is realisable during the life of the plan, or on settlement of the plan liabilities.

The expected cost of bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past service or performance and the obligation can be estimated reliably.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. The expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is recognised in surplus or deficit on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognised immediately in surplus or deficit.

The municipality immediately recognises all actuarial gains and losses arising from defined benefit plans directly in net assets.

16.2.3 OTHER LONG - TERM BENEFITS PLANS

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the municipality.

The municipality's net obligation in respect of long service awards is the amount of future benefit that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value and the fair value of any related assets is deducted to determine the net obligation.

The discount rate is the yield at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of the municipality's obligations. The calculation is performed using the projected unit credit method. Any actuarial gains and losses are recognised in surplus or deficit in the period in which they arise.

16.2.4 TERMINATION BENEFITS

Termination benefits are recognised as an expense when the municipality is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognised as an expense if the municipality has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, then they are discounted to their present value.

17 VALUE ADDED TAX (VAT)

The municipality accounts for VAT on the cash basis. The municipality is liable to account VAT at the standard rate (14%) in terms of section 7 (1) (a) of the VAT Act in respect of the supply of goods or services, except where the supplies are specifically zero-rated in terms of section 11, exempted in terms of section 12 of the VAT Act or is out of scope for VAT purposes. The municipality accounts for VAT on a monthly basis.

18 IMPAIRMENT OF ASSETS

Primary objective for cash generating assets is to generate a commercial return and the primary objective for non- cash generating asset is service delivery. The municipality uses the following sets of questions as a criteria to distinguish between cash generating and non-cash generating assets:

- (a) Was the asset acquired to generate a commercial return?
- (b) Does the asset operate independently from other assets?
- (c) Does the asset generate cash flows independently from other assets?

If the answer is yes to all of these questions, then the municipality accounts for the asset as a cash generating asset. If the above criteria is not met, the municipality accounts for the asset as non-cash generating asset.

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a non - cash generating unit is the higher of its fair value less costs to sell and its value in use. The recoverable carrying amount is higher of its fair value less cost to sell and its value in use.

Value in use of a cash generating asset is determined as the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life. Value in use of a non cash generating asset is determined as the present value of the asset's remaining service potential.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

- to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

37 RETIREMENT BENEFIT INFORMATION

37.1 Defined contribution plan

The following are defined contribution plans: Natal Joint Municipal Pension Fund, Government Employee Pension Fund, SALA Pension Fund and Municipal Councillors Pension Fund. These

37.2 Other Long-term benefit plan

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the municipality.

The municipality's net obligation in respect of long service awards is the amount of future benefit that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value and the fair value of any related assets is deducted to determine the net obligation.

The discount rate is the yield at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of the municipality's obligations. The calculation is performed using the projected unit credit method. Any actuarial gains and losses are recognised in surplus or deficit in the period in which they arise.

The independent valuers carry out a statutory valuation on an annual basis.

The independent valuers carry out a statutory valuation on an annual basis.		
The principal actuarial assumptions used were as follows:		
Discount rate per annum	7%	7%
Inflation rate	6%	5%
Net effective discount rate	1%	1%
Benchmark inflation (equal to salary inflation)	7%	6%
Average retirement age	65	63

39 RISK MANAGEMENT

Rental of offices

Other

39.1 Maximum credit risk exposure

Credit risk is the risk that a counter party to a financial instrument will fail to discharge an obligation and cause the municipality to incur a financial loss.

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluates credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of

Financial assets exposed to credit risk at year end were as follows:

Consumer debtors	146 717 363	174 241 442
Other debtors	46 041 693	9 233 349
	192 759 056	183 474 791
Ageing of consumers		
Current (0 – 30 days)	9 431 958	11 972 334
31 - 60 Days	11 574 936	6 752 005
61 - 90 Days	10 221 622	6 825 801
91 - 120 Days	4 424 469	5 632 385
121 - 365 Days	111 064 378	143 058 916
+ 365 Days		-
Total	146 717 363	174 241 441
Less: Provision for bad debts	(75 694 159)	(128 796 807)
Net consumer debtors	71 101 079	45 521 903
Cash and cash equivalents	13 242 232	6 826 837
Current investments	8 753 174	23 276 449
Other investments	20 115 704	18 682 344
	42 111 110	48 785 630

These balances represent the maximum exposure to credit risk.

39.2 Liquidity risk

Liquidity risk is the risk that the municipality will not be able to meet its obligations as they fall due. The municipalities approach to managing liquidity risk is to ensure that sufficient liquidity is available to meet its liabilities when due; without incurring unacceptable losses or risking damage to the Municipalities reputation.

IDM	IDM
2013	2012
R	R

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The Municipalities liability are backed by appropriate assets and it has significant liquid resources.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

2013
Gross finance lease obligations
Borrowings
Trade and other payables
Other

2012
Gross finance lease obligations
Borrowings
Trade and other payables
Other

39.3 Interest rate risk

The Municipality is not exposed to interest rate risk on its financial liabilities. All of the Municipality's interest bearing external loan libailities are fixed interest loans.

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the group to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

The Municipality is exposed to fairvalue interest rate on its external loan liabilities, which are all fixed interest rates.

At year end, financial instruments exposed to interest rate risk were as follows:

Current investments
Other investments
Gross finance lease obligations
Borrowings
Consumer debtors

39.4 Foreign Currency Risk

Municipality has a three year contract for the deployment of Microsoft share point with Microsoft, therefore the Municipality is exposed to change in Foreign currency risk.

The Spot rate at year end was 9.8675. Should the spot rate increase by 1% the foreign liability will be R 1 784 200.76 and the forex loss will increase by R289 127.30. Should the spot rate decrease by 1% the forex liability will be R1 459 800.62 and the forex loss decrease by R236 558.72

42 Contingencies arising from pending litigation on wage curve agreement

On 21 April 2010 SALGA signed the "Categorisation and job evaluation wage curves collective agreement" (wage curve agreement) with IMATU and SAMWU on behalf of municipalities. The agreement established the wage curves and wage scales to be used by municipalities in determining the wages of municipal employees, based on an evaluation of employees' jobs per the TASK job evaluation system.

Subsequent to the signing of the agreement, the unions declared a dispute with the agreement. The dispute was referred to the Labour Court and the court delivered a ruling on 22 June 2012 that employees receive a salary increase backdated with effect from 1 July 2010 instead of 1 July 2011. SALGA, on behalf of municipalities, applied for leave to appeal this ruling and was granted the right to appeal against the judgement on 29 August 2012. To date this Labour Court of Appeal case has not been finalised.

As a result of the uncertainties arising from the dispute declared by the unions and the pending litigation regarding the wage curve agreement, the municipality may have an additional receivable/ payable for employee wages, depending on the outcome of the pending litigation. It is not practicable to reliably estimate the amount of this receivable/ payable prior to the outcome of the pending litigation

Explanation of variances

.

The variance is due the disclosure of free basic services, which is disclosed as expenditure on the budget, whereas on monthly reports it is disclosed as reducing revenue.

The deemed undercollection is not material at this stage, income form this category is largely dependant on grants that are received and are invested when they are not yet spent

All grants have been received, but not all conditions have been met. These will be spent by the end of the financial year.

This includes interest on outstanding debtors, which is largely dependant on how much of the interest charged on debtors is actually received against billing.

The variance is not material

The variance is not material

The provision for bad debts has been calculated based on the debtors impaired, whereas the budget was based on the collection rate, hence the variance. The calculation was based on the asset register, taking into account disposals/write-offs, which was less than the budgeted amount.

The variance is not material

The variance is not material

The variance is not material

Some of the projects/programmes budgeted for have not commenced due to funding not materials for those that are grant funded

The underspending is due to objections received on awards of approximately R60m. These objections have been resolved recently, there is an intervension in place by Technical Serices to try and capture on expenditure programme. This includes amongst other things fast tracking implementation on projects already underway

Spending is on track.

Profit on disposal of assets

The underspending is due to objections received on awards of approximately R60m. These objections have been resolved recently, there is an intervension in place by Technical Serices to try and capture on expenditure programme. This includes amongst other things fast tracking implementation on projects already underway

Spending is on track.

Internally funded projects are dependant on revenue generation, these have had to be delayed due to the decline in collection
