Capricorn District Municipality ANNUAL FINANCIAL STATEMENTS

for the year ended 30 June 2013

Approval of annual financial statements

I am responsible for the preparation of these annual financial statements, which are set out in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. I certify that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in note 21 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

INFORMATION PURPOSES ONLY - DO NOT PRINT

Examples of operating activities

- a) cash receipts from taxes, levies and fines;
- (b) cash receipts from charges for goods and services provided by the entity;
- (c) cash receipts from grants or transfers and other appropriations or other budget authority made by national government or other entities;
- (d) cash receipts from royalties, fees, commissions and other revenue;
- (e) cash payments to other entities to finance their operations (not including loans);
- (f) cash payments to suppliers for goods and services;
- (g) cash payments to and on behalf of employees;
- (h) cash receipts and cash payments of an insurance entity for premiums and claims, annuities and other policy benefits;
- (i) cash payments of local property taxes or income taxes (where appropriate) in relation to operating activities:
- (j) cash receipts and payments from contracts held for dealing or trading purposes:
- (k) cash receipts or payments from discontinuing operations; and
- (I) cash receipts or payments in relation to litigation settlements.

- Examples of Investing Activities (a) cash payments to acquire property, plant and equipment, intangibles and other long-term assets. These payments include those relating to capitalised development costs and self-constructed property, plant and equipment;
- (b) cash receipts from sales of property, plant and equipment, intangibles and other long-term assets;
- (c) cash payments to acquire equity or debt instruments of other entities and interests in joint ventures (other than payments for those instruments considered to be cash equivalents or those held for dealing or trading purposes);
- (d) cash receipts from sales of equity or debt instruments of other entities and interests in joint ventures (other than receipts for those instruments considered to be cash equivalents and those held for dealing or trading purposes);
- (e) cash advances and loans made to other parties (other than advances and loans made by a public financial institution);
- (f) cash receipts from the repayment of advances and loans made to other parties (other than advances and loans of a public financial institution);
- (g) cash payments for futures contracts, forward contracts, option contracts and swap contracts, except when the contracts are held for dealing or trading purposes, or the payments are classified as financing activities; and
- (h) cash receipts from futures contracts, forward contracts, option contracts and swap contracts,

Examples of Financing Activities

- a) cash proceeds from issuing debentures, loans, notes, bonds, mortgages and other short or longterm borrowings;
- (b) cash repayments of amounts borrowed; and
- (c) cash payments by a lessee for the reduction of the outstanding liability relating to a finance lease.

Capricorn District Municipality SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

for the year ending 30 June 2013

1 BASIS OF ACCOUNTING

1.1 BASIS OF PRESENTATION

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

These annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

1.2 PRESENTATION CURRENTY

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.3 GOING CONCERN ASSUMPTION

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.4 COMPARATIVE INFORMATION

Budget information in accordance with GRAP 1 and 24, has been provided in an annexure to these financial statements and forms part of the audited annual financial statements.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.5 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the municipality:

| No. | Title of Standard | Impact on GRAP Reporting |
|----------|--|---|
| GRAP 20 | Related Party Disclosures | No material impact |
| GRAP 25 | Employee Benefits | No material impact |
| GRAP 105 | Transfer of Functions Between Entities | No impact as the municipality is not an |
| GRAP 106 | Transfer of Functions Between Entities | No impact as no transfer of functions |
| | Not Under Common Control | are anticipated in the foreseeable |
| | | future |
| GRAP 107 | Mergers | No impact as no merger is anticipated |
| | | in the foreseeable future |

Except for GRAP 25, which is effective 1 April 2013, an effective date is yet to be determined for the other standards by the Minister

New GRAP standards effective from 1 March 2012

1.5 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET

| No. | Title of |
|----------|--|
| | Standard |
| GRAP 23 | Revenue from Non-exchange Transactions (Taxes and |
| GRAP 24 | Presentation of Budget Information in Financial Statements |
| GRAP 21 | Impairment of Non-Cash generating Assets |
| GRAP 26 | Impairment of Cash-generating Assets |
| GRAP 103 | Heritage Assets |
| GRAP 104 | Financial Instruments |

Except for GRAP 24, the standard have no material impact on the annual financial statements GARP 24 required additional disclosure requirements. Refer to note 41

2 PROPERTY, PLANT AND EQUIPMENT

2.1 INITIAL RECOGNITION

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plan and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

2.2 SUBEQUENT MEASUREMENT - COST MODEL

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

2.3 DEPRECIATION

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

| Infrastructure | | Other | |
|------------------------------------|-------|------------------------|-------|
| Roads and Paving | 15-50 | Buildings | 10-30 |
| Water Maintenance and purification | 15-40 | Specialist vehicles | 10-10 |
| Sewerage | 15-50 | Other vehicles | 5-5 |
| Water Resevoir | 30-50 | Office equipment | 1-10 |
| | | Furniture and fittings | 1-8 |
| Community | | Emergency equipment | 1-5 |
| Buildings | 10-30 | Computer equipment | 3-5 |
| Security | 5 | Machinery | 1-5 |
| | | Telephones | 1-3 |
| Finance lease assets | | Communication | 1-3 |
| Office equipment | 1-10 | Copiers | 2-3 |

The residual value, the useful life of an asset and the depreciation method is reviewed annually and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

2.4 IMPAIRMENTS

CASH GENERATING ASSETS

Cash generating assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recovered in accordance with GRAP 26

An impairment loss is recognised if the recoverable amount of an asset is less than its carrying amount. The impairment loss is recognised as an expense in the statement of financial performance immediately. The recoverable amount of the asset is the higher of the assets fair value less costs of disposal and its value in use. The fair value represents the amount obtainable from the sale in an arm's length transaction between knowledgeable, willing parties.

For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the assets belong. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash flows from other assets or group of assets. An impairment loss is recognised whenever the recoverable amount of a cash-generating unit is less than its carrying amount.

The impairment loss is allocated to reduce the carrying amount of the asset. The carrying amount of individual assets are not reduced below the higher of its value in use, zero or fair value less cost of disposal.

A previously recognised impairment loss related to assets is reversed if there has been a change in the estimates used to determine the recoverable amount, however not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognised in prior periods.

After the recognition of an impairment loss, any depreciation charge for the asset is adjusted for future periods to allocate the assets' revised carrying amount on a systematic basis over its remaining useful life.

2.4 IMPAIRMENTS

NON CASH GENERATING ASSETS

Non-cash generating assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recovered in accordance with GRAP 21

An impairment loss is recognised if the recoverable service amount of an asset is less than its carrying amount. The recoverable service amount of an asset is determined under the restoration cost approach which represents the depreciated replacement cost less the cost to repair the damaged asset. The depreciated replacement cost of an asset is essentially the current cost that will have to be incurred to replace the asset's gross service potential and is then depreciated to reflect the asset's current age or condition.

The impairment loss is recognised as an expense in the statement of financial performance immediately. The recoverable service amount of the asset is the higher of the assets fair value less costs of disposal and its value in use.

The fair value represents the amount obtainable from the sale in an arm's length transaction between knowledgeable, willing parties.

The impairment loss is allocated to reduce the carrying amount of the asset. The carrying amount of individual assets are not reduced below the higher of its value in use, zero or fair value less cost of disposal.

A previously recognised impairment loss related to assets is reversed if there has been a change in the estimates used to determine the recoverable amount, however not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognised in prior periods.

After the recognition of an impairment loss, any depreciation charge for the asset is adjusted for future periods to allocate the assets' revised carrying amount on a systematic basis over its remaining useful life

2.5 DERECOGNITION

Items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of

3 INTANGIBLE ASSETS

3.1 INITIAL RECOGNITION

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licences, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitlised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

3.2 SUBEQUENT MEASUREMENT - COST

Intangible assets are subsequently carried at cost less accumulated amoritisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

3.3 AMORTISATION AND IMPAIRMENT

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method. The annual amortisation rates are based on the following estimated average asset lives:

Computer software

3-10

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in acounting estimate in the Statement of Financial Performance.

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

3.4 DERECOGNITION

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

3.5 WEBSITE COSTS

The municipality has a website designed for internal and external access. The municipality is at the operating stage which comprises maintaining and enhancing applications, infrastructure, graphical design and the content of the file. The municipality incurs internally generated costs on the operation of the website and the costs are therefore expensed.

4 INVENTORIES

4.1 INITIAL RECOGNITION

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Consumable inventory is valued using the weighted average cost whilst water inventory is valued using the First in First Out (FIFO) method.

4.2 SUBSEQUENT MEASUREMENT

Inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down in this way. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

Consumable inventories are valued using the weighted average method.

5 FINANCIAL INSTRUMENTS

Financial instrument is any contract that gives rise to a financial asset of one municipality and a financial liability or a residual interest of another municipality

Financial instruments comprise of financial assets and liabilities in accordance with GRAP 104.

A financial asset is cash; a residual interest of another municipality; or a contractual right to receive cash or another financial asset from another municipality or exchange financial assets or financial liabilities with another municipality under conditions that are potentially favourable to the municipality.

A residual interest is any contract that entitles the holder to an interest in the assets of an municipality after deducting all of its liabilities (i.e. net assets)

A financial liability is any liability that is a contractual obligation to deliver cash or another financial asset to another municipality; or exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the municipality.

5.1 INITIAL RECOGNITION

Financial instruments, depending on its category, are initially measured at fair value, cost or amortised costs in accordance with GRAP 104. Transaction costs are only included in financial instruments that are initially measured at amortised costs.

Financial instruments classified at fair value (fair value measurement considerations)

The best evidence of fair value is a quoted price in an active market.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, broker, dealer, etc., and those prices represent actual and regularly occurring market transactions on an arm selength basis

Where there is no active market, the fair value is determined using a valuation technique such as;

- recent arm"s length market transaction;
- if available, reference to the current fair value of another instrument that is substantially the same;
- discounted cash flow analysis, discounting the future receipts (payments) of a financial instrument over the period of the contract, by using a market interest rate (adjusted for credit risk), to its present value

Short-term receivables and payables with no stated interest rate is be measured at the original invoice amount if the effect of discounting is immaterial.

Financial instruments classified at amortised cost

For financial instruments measured at amortised cost, the interest expense (for financial liabilities) or revenue (for financial assets) is calculated by using the effective interest rate method. The interest rate used is equal to the prevailing rate of return for financial instruments having substantially the same terms and characteristics of the muncipalitys financial instrument which include:

- · the credit quality;
- the remaining term over which the contractual interest rate is fixed;
- the remaining period to repayment of the principal; and
- the currency (if applicable).

Financial instruments classified at cost

If the fair value of a financial instrument cannot be reliably measured, it is measured at cost.

5.2 SUBSEQUENT MEASUREMENT

Financial statements designated at fair value

Financial assets at fair value are subsequently measured by using the **fair value measurement** considerations.

Any gains or losses due to changes in fair market value during the period are reported as gains or losses in the statement of financial performance, because such investments will usually be sold in the near future at their market value.

5.2 SUBSEQUENT MEASUREMENT

Financial instruments designated at amortised costs

This effective interest rate method is used for these financial instruments. The interest rate used is necessary to discount the estimated stream of principal and interest cash flows through the expected life of the financial instrument to equal the amount recognised at initial recognition. The rate is then applied to the carrying amount at each reporting date to determine the interest expense or revenue for the period

Impairment and uncollectability of financial assets

At the end of **each** reporting period, the municipality assesses whether there is any objective evidence that a financial asset or group of financial assets is impaired.

If there is **objective evidence that an impairment loss** on a financial asset has occurred, the loss must be recognised in surplus or deficit. Objective evidence that a financial asset or group of assets is impaired can be as a result of the occurrence of one or more of the following events:

Significant financial difficulty experienced by the borrower/debtor;

- Delays in payments (including interest payments) or failure to pay/defaults;
- For economic or legal reasons, allowing disadvantaged customers who are experiencing financial difficulties to pay as and when they can. The municipality would not otherwise have considered this concession. For example, allowing disadvantaged customers to pay their account when they can due to the fact the water it supplies to the customer is a basic human right;
- It is probable that the borrower/debtor will enter sequestration (bankruptcy) or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties; or
- Observable data, for example historical data, indicating that there is a decrease in the estimated future cash flows that will be received (which can be measured reliably), from a group of financial assets (financial assets with similar credit risk characteristics grouped together) since the initial recognition of those assets. The decrease may not yet be identified for the individual financial assets in the group. These can include:
- the payment status of borrowers/debtors in the group has deteriorated (e.g. an increased number of delayed payments); or
- national or local economic conditions that are in line with non-payments in the group (e.g. an increase in the unemployment rate in the geographical area of the borrowers/debtors, or adverse changes in market conditions that affect the borrowers/debtors in the group)

An municipality assesses financial assets individually, when assets are individually significant, and individually or collectively for financial assets that are not individually significant. Where no objective evidence of impairment exists for an individually assessed asset (whether individually significant or not), an municipality includes the assets in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

The carrying amount of a financial asset is reduced directly through the use of an allowance account. The impairment loss is recognised in the statement of financial performance

Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised, are **not included** in the collective assessment of impairment.

As soon as information becomes available that specifically identifies losses on individually impaired assets in a group (that are collectively assessed for impairment), those assets are removed from the group and assessed individually for impairment.

For collective assessment of impairment, as indicated above, assets with similar credit risk characteristics are grouped together. The credit risk characteristics should be indicative of the debtors" ability to pay all amounts due according to the contractual terms

Gains and losses

gain or loss can arise from both a financial asset and financial liability measured at fair value, at amortised cost or cost. Any gains and losses are recognised in the statement of financial performance. Fair value — Changes in fair value will result in either a gain or loss.

Amortised cost and cost – gains and losses are recognised when derecognised, impaired or through the amortisation process

5.3 CATEGORIES OF FINANCIAL INSTRUMENTS

The municipality has the following categories of financial instruments:

Trade and other receivables

Trade and other payables

Cash and cash geuivalents

5.3.1 TRADE AND OTHER RECEIVABLES

Trade and other receivables are initially designated at fair value.

Short-term receivables with no stated interest rate is be measured at the original invoice amount if the effect of discounting is immaterial.

5.3.2 TRADE AND OTHER PAYABLES

Financial liabilities consist of trade payables. They are categorised as financial liaibilities held at fair value

Short-term payables with no stated interest rate is be measured at the original invoice amount if the effect of discounting is immaterial.

5.3.3 CASH AND CASH EQUIVALENTS

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at amortised cost.

5.4 DERECOGNITION

The municipality derecognises a financial asset only when:

- The contractual rights to the cash flows from the financial asset expire, are settled or waived;
- •The municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset: or
- The municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the that party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer.

If the municipality has not transferred substantially all of the risks and rewards of ownership of the financial asset, it should continue to recognise the asset.

The municipality derecognises a financial liability only when:

- •Discharges the liability (or part thereof) by paying the creditor, normally with cash, other financial liabilities, goods or services;
- •Is legally released from primary responsibility for the liability (o part of it) either by process of law (expires) or by the creditor (cancelled). If the debtor has given a guarantee, this condition may still be met: or
- •Waives the debt or it is assumed by another entity by way of a non-exchange transaction. These transactions are accounted for by considering the requirements in GRAP 104 and GRAP 23 Revenue from Non-exchange Transactions (Taxes and Transfers).

6 UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

7 IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

8 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

9 PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

A provision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision have been met:

- (a) The municipality has a detailed formal plan for the restructuring identifying at least:
 - the business or part of a business concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for terminating their
 - the location, function, and approximate number of employees who will be compensated for terminating their services:
 - · when the plan will be implemented; and
- (b) The municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

10 LEASES

10.1 MUNICIPALITY AS LESSEE

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease.

11 REVENUE

11.1 REVENUE FROM EXCHANGE TRANSACTIONS

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the group has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold; the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the group;
- the stage of completion of the transaction at the reporting date can be measured reliably; and the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

11 REVENUE

11.1 REVENUE FROM EXCHANGE TRANSACTIONS

Rendering of services

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the epenses recognised that are recoverable

Interest income

Revenue arising from the use of assets by others of the municipal assets yielding interest shall be recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the
- The amount of the revenue can be measured reliably:
- Interest shall be recognised on a time proportionate basis that takes into account the effective yield on the asset;

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

11.2 REVENUE FROM NON-EXCHANGE TRANSACTIONS

Revenue from non-exchange transactions refers to transactions where the municipality receives revenue from another municipality without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no obligation to repay the amount.

Grants, transfers and donations

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

12 EVENTS AFTER BALANCE SHEET DATE

Recognised amounts in the financial statements are adjusted to reflect events arising after the balance sheet date that provide evidence of conditions that existed at the Balance Sheet date. Events after the Balance Sheet date that are indicative of conditions that arose after the Balance Sheet date are dealt with by way of a note to the Financial Statements.

13 COMMITMENTS

A commitment arises when a decision is made to incur a liability e.g purchase order, delivery schedules or contract for construction of infrastructure assets. A commitment becomes a liability when the intention to agree to an outflow of resources outflow of resources becomes a present obligation.

14 CONSTRUCTION CONTRACTS

A construction contract is a contract, or a similar binding agreement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Where the outcome of a construction contract can be estimated reliably, costs are recognised by reference to the stage of completion of the contract activity at the balance sheet date in accordance with GRAP 11. The cost of the contract is measured according to the physical proportion that the contract costs, incurred for work performed to date, bear to the estimated total contract costs, except where this would not be representative of the stage of completion.

Variations in contract work are included to the extent that they have been approved by the Accounting officer or Council.

15 EMPLOYEE BENEFITS

15.1 Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance

15.2 Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

The municipality provides retirement benefits to employees and councillors through contributions made to designated retirement or pension funds.

15.3 Long term service awards and accumlated leave days

Long term service

Employees qualify for additional leave for various period of uninterrupted service in accordance with SALGBC condition of service. The long term service award measured in accordance with IAS 19 through an actuarial valuation.

Accumulated leave days

Accumulated leave benefit accrues to employees upto maximum of 48 leave days. The benefits are paid in the events of death, disability, retrechment or/and retirement. Employees who have leave days in excess of the 48 days for periods, before the conditions of service came to effect, are measured in accordance with IAS 19 through an actuarial valuation.

15.4 Post employment obligations

The municipality provides post employment medical care benefits to retired employees completion of a minimum service period. The expected cost, of these benefits is accrued over the life expectancy of the retired employees.

The actuarial valuation method used to value liabilities is the Projected Unit Credit Method prescribed by IAS 19.

Any plan assets are valued at current market value as required by IAS 19.

16 CHANGE IN ACCOUNTING POLICY, ACCOUNTING ESTIMATES AND PRIOR PERIOD ERRORS

16.1 Change in accounting estimate

Change in accounting estimate is an adjustment of the carrying amount of an asset or a liability, or the amount of the periodic consumption of an asset, that results from the assessment of the present status of, and expected future benefits and obligations associated with, assets and liabilities.

Changes in accounting estimates result from new information or new developments and, accordingly, are not corrections of errors. Any changes to the relevant financial items (associated with assets and liabilities) are made prospectively (see definition of prospective application below)

16.2 Change in accounting policy

Accounting policies are the specific principles, bases, conventions, rules and practices applied by an municipality in preparing and presenting financial statements. Any changes to these policies arising from new or amended GRAP standards will be applied either retrospectively or prospectively if transitional provisions exists. (see definition of retrospective application below).

16 CHANGE IN ACCOUNTING POLICY, ACCOUNTING ESTIMATES AND PRIOR PERIOD ERRORS 16.3 Prior period errors

Prior period errors are omissions from, and misstatements in, the municipality's financial statements for one or more prior periods arising from a failure to use, or misuse of, reliable information that;

- (a) was available when financial statements for those periods were authorised for issue; and
- (b) could reasonably be expected to have been obtained and taken into account in the preparation and presentation of those financial statements.

Such errors include the effects of mathematical mistakes, mistakes in applying accounting policies, oversights or misinterpretations of facts, and fraud.

16.4 Measurement/re-measurement

Change in accounting policy and change in estimate

Prospective application of a change in an accounting policy and of recognising the effect of a change in an accounting estimate, respectively, are;

- (a) applying the new accounting policy to transactions, other events and conditions occurring after the date as at which the policy is changed; and
- (b)) recognising the effect of the change in the accounting estimate in the current and future periods affected by the change.

Retrospective application is applying a new accounting policy to transactions, other events and conditions as if that policy had always been applied.

Prior period errors

Retrospective restatement is correcting the recognition, measurement and disclosure of amounts of elements of financial statements as if a prior period error had never occurred.

Capricorn District Municipality NOTES TO THE FINANANCIAL STATEMENTS

| | Incident Disciplinary steps/criminal | | | |
| | Non-adherence to Supply Chain Policy | | | |
| | The irregular expenditure was as a result of contracts awarded in | | | |
| | the prior financial year that were irregular due to the fact that the | | | |
| | municipality did not take in the new regulations effective 7 | | | |
| | December 2011. This resulted in the 80:10:10 point system used | | | |
| | instead of the 80:20 for all affected suppliers. As a result any | | | |
| | payment on these contracts will be regarded as irregular when | | | |
| | paid in the 12/13 financial year. Out of the 22 suppliers making | | | |
| | up the current irregular expenditure, only 1 (R265 500) relates to | | | |
| 33.3 | Fruitless and wasteful expenditure | | | |

| | Miscellaneous | | | -29 000 |
| | | | -831 000 | -1 072 000 |

Interest cost

Interest cost arises from the discounting of future expected subsidies. The interest cost should be accounted for in the financial statements

Actuarial Gain/ Loss

Actuarial gain/loss is made up of movement experience, inflation loss, data errors and miscellaneous. The actuarial gain/loss is recognised in the statement of financial performance.

Most court date has not yet been set. Should Council be unsuccessful in defending the claims, there is a possibility that the claim will be settled. | | | |
| 37.2 | Guarantee held by Eskom with regard to electricity accounts | | 294 600 | 294 600 |

38 RELATED PARTIES

Remuneration for members of key management Post employment benefit plan for employees of municipality and/or other related parties Compensation to councillors

39 KEY SOURCES OF ESTIMATION UNCERTAINTY AND JUDGEMENTS

The following areas involve a significant degree of estimation uncertainty:

Useful lives and residual values of property, plant, and equipment

Recoverable amounts of property, plant and equipment

Provision for rehabilitation of landfill sites (discount rate used, number of years, amount of cash flows)

Present value of defined benefit obligation

Fair value of plan assets

Provision for doubtful debts

Impairment of assets

Provision for long-term service award

Other

The following areas involved judgements, apart from those involving estimations disclosed above, that management has made in the process of applying the municipality's accounting policies and that have the most significant effect on the amounts recognised in the financial statements:

Impairment of assets

Provisions

40 RISK MANAGEMENT

40.1 Maximum credit risk exposure

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluates credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Note 2013 2012 R R

40.2 Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities. Cash flow forecasts are prepared.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

40.3 Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

OR

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the group to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. Municipality policy is to maintain approximately 60% of its borrowings in fixed rate instruments.

At year end, financial instruments exposed to interest rate risk were as follows:

- Call deposits
- Notice deposits
- Long term annuity
- Development Bank of South Africa Ioan
- ABSA overdraft

40.4 Other price risk

Examples include changes in commodity prices

41 COMPARISON WITH THE BUDGET

The comparison of the Municipality's actual financial performance with that budgeted is set out in Appendix E and Annexure B

The budget is approved on an accrual basis using a classification based on the nature of expenses. The approved budget covers the period from 01 July 2012 to 30 June 2013. The budget and accounting basis are the same.

Explanation for material variances between budget and actual.

Explanation of reasons for changes between the approved and final budget.

A reconciliation between the actual amounts on a comparable basis in the Statement of Comparison of Budget and Actual Amounts and the actual amounts in the Statement of Cash Flows for the year ended 30 June 2013 is presented as additional

| 43 IMPAIRMENT LOSS / (REVERSAL OF IMPAIRMENT LOSS) | Note | 2013 R | 2012 R |
|---|------|-----------------|-----------|
| Property, plant and equipment During the year an impairment test, was performed on all categories of Property, Plant and Equipment. The method which was used to determine the recoverable amount was the higher of fair value less costs and value in use. The impairment existed in the category of roads infrastructure | | - 14 938 090 | - - |
| Total Impairment loss / (Reversal of Impairment Loss) | | 14 938 090 | |

Fair value less damages and value in use

Because the unbundling of the infrastructure assets was done recently, the value in use and the fair value was deemed to be the same, other than the fact that it can differ if the infrastructure has significant damages. As such the recoverable amount being the greater of fair value less cost and value in use, differed with each with the costs of damages of the said infrastructure.

The engineer estimated the costs of damages of each class of infrastructure assets based on quoted prices available in the market to restore the infrastructure and the professional knowledge based on the industry norms

44 REASSESSMENT LOSS

GRAP 17 Paragraph 61 state that the residual value and the useful life of an asset shall be reviewed at least at each reporting date and, if expectations differ from previous estimates, the change(s) shall be accounted for as a change in an accounting estimate in accordance with the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors.
