ACCOUNTING OFFICER'S RESPONSIBILITIES AND APPROVAL

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with South African Statements of Generally Accepted Accounting Practice (GRAP) And the Municipal Finance Management Act (MFMA) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2015 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The councilors are remunerated within the upper limits of the framework envisaged in Section 219 of the Constitution, as required by the MFMA, section 124(1)(a)

Although the accounting officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page 4.

The annual financial statements set out on pages 4 to 61, which have been prepared on the going concern basis, were approved by the accounting officer on 29 August 2014 and were signed by him:

JZA Vumazonke
Municipal Manager

Annual Financial Statements for the year ended 30 June 2014

STATEMENT OF COMPARISON OF BUDGET AND ACTUAL AMOUNTS

Budget on Cash Basis

	Approved budget	Adjustments	Final Budget	Actual amounts on comparable basis	Difference between final budget and actual	Reference
--	--------------------	-------------	--------------	--	---	-----------

Figures in Rand

The reason for the amended budget was mainly due to reallocations as well as increases to non cash flow line items.

A. Fines

The function is performed by the Department of Transport. The municipality does not have any control.

B. Government grants and subsidies received

A grant from the Department of Human Settlements of R3,100,000 for the Construction of Down housing was budgeted for but did not materialise due to a delay in the authorisation for the project. An additional amount of R2,000,000 was received from National Treasury in respect of the Municipal Infrastructure Grant for good performance that was not budgeted for. An amount of R12,000,000 was gazetted in the DORA for the Regional Bulk Infrastructure Grant and this amount was budgeted for. Subsequently it was discovered that the full amount would not be received because of the difference in the financial years of the Department of Water Affairs and the Municipality. This resulted in an amount of R3,600,000 not being received in this financial year.

C. Licences and permits

The function of issuing drivers and learners license is a new function which started during the 2013/14 financial year. The income realised from this function was more than anticipated..

D. Debt impairment

The budget was based on a 100% collection rate which did not materialise.

E. Depreciation and amortisation

The new valuation rolls effective 1/7/2014 indicated an impairment on a number of investment properties which was not anticipated.

F. Bulk purchases

Less electricity consumption than anticipated.

G. Loss on disposal

Land was sold at less than market value.

H. General expenses

The overexpenditure on general expenses mainly relates to the Auditor General's fees. The budget was based on 1% of expenditure as prescribed whilst the total audit fees amounted to R2,400,000.

I. Other receivables

Less receivables than anticipated

J. VAT receivables

Did not budget for VAT provisions, eg. VAT provisions on debtors.

K. Consumer debtors

Did not budget for an increase in the provision for bad debts.

L. Investment Property

Restatements are due to audit queries which were considered in the budget

M. Property, plant and equipment

Budget could not materialize due to cash flow constraints as well as construction of Down housing did not materialize due to differences in financial years of DWA and the municipality. An amount of R3.6 million was already received and spent on capital projects in the previous financial year.

N. Repayment - National Revenue Fund

The municipality applied for a roll over of unspent conditional grants during the 2012/2013 financial year. The application was denied and the municipality is required to repay an amount of R5,131,616 to the National Revenue Fund. The municipality has requested that National Treasury reconsider the outcome.

Annual Financial Statements for the year ended 30 June 2014

STATEMENT OF COMPARISON OF BUDGET AND ACTUAL AMOUNTS

Budget on Cash Basis

	Approved budget	Adjustments	Final Budget	Actual amounts on comparable basis	Difference between final budget and actual	Reference
--	--------------------	-------------	--------------	--	---	-----------

Figures in Rand

Q. Trade and other payables

The municipality experienced severe cash flow constraints which resulted in creditors not being paid within the required 30 days. The situation was reported to both Provincial and National Treasury.

P. Unspent conditional grants

Grants from district municipalities was only received close to financial year end. The municipality did not foresee that there would be unspent grants at year end.

Q. Provisions

The actuarial valuation on the post employment medical aid benefit indicated a sharp increase of R1,000,000 in the provision which was not budgeted for.

R. Bank overdraft

Bank overdraft repaid before year end.

S. Repayment National revenue fund

Roll over of unspent conditional grant was not approved by National Treasury and has to be repaid. This was not known at the time of the adjusted budget.

T. Finance lease obligation

Did not budget for restructuring of existing finance lease.

Baviaans Local Municipality

ACCOUNTING POLICIES

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act No 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and incorporate the historical cost conventions as the basis of measurement, except where specified otherwise.

The principal accounting policies, applied in the preparation of these annual financial statements, are set out below.

These accounting policies are consistent with those applied in the preparation of the prior year financial statements, unless specified otherwise.

1.1 Presentation of currency

These annual financial statements are presented in South African Rand, which is the functional currency of the entity, rounded to R1.

1.2 Going concern

These annual financial statements were prepared based on the expectation that the entity will continue to operate as a going concern for at least the next 12 months.

1.3 Budget information

Budget information in accordance with GRAP 1 and 24, has been provided in the Statement of comparison of budget and actual amounts.

1.4 Comparative figures

When the presentation or classification of items in the financial statements is amended, prior period comparative amounts are also reclassified and restated, unless such comparative reclassification and / or restatement is not required by a Standard of GRAP. The nature and reason for such reclassifications and restatements are also disclosed.

Where material accounting errors, which relate to prior periods, have been identified in the current year, the correction is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

The presentation and classification of items in the current year is consistent with prior years.

The nature and reasons for the reclassifications and restatements are disclosed in note 32 to the financial statements.

1.5 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

1.6 Significant judgements and sources of estimation uncertainty

The use of judgement, estimates and assumptions is inherent to the process of preparing annual financial statements. These judgements, estimates and assumptions affect the amounts presented in the annual financial statements. Uncertainties about these estimates and assumptions could result in outcomes that require material adjustment to the carrying amount of the relevant asset or liability in future periods.

Judgements

In the process of applying these accounting policies, management has made the following judgements that may have a significant effect on the amounts recognised in the annual financial statements.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.6 Significant judgements and sources of estimation uncertainty (continued)

Estimates

Estimates are informed by historical experience, information currently available to management, assumptions, and other factors that are believed to be reasonable under the circumstances. These estimates are reviewed on a regular basis. Changes in estimates that are not due to errors are processed in the period of the review and applied prospectively.

In the process of applying the entity's accounting policies, the following estimates were made:

Inventory

The estimation of the water stock in the reservoirs is based on the measurement of water via electronic level sensors, which determines the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir.

Impairments of non-financial assets

In determining the value-in-use of non-financial assets, management is required to rely on the use of estimates about the asset's ability to continue to generate cash flows (in the case of cash-generating assets). For non-cash-generating assets, estimates are made regarding the depreciated replacement cost, restoration cost, or service units of the asset, depending on the nature of the impairment and the availability of information.

Provisions

Provisions are measured as the present value of the estimated future outflows required to settle the obligation. In the process of determining the best estimate of the amounts that will be required in future to settle the provision management considers the weighted average probability of the potential outcomes of the provisions raised. This measurement entails determining what the different potential outcomes are for a provision as well as the financial impact of each of those potential outcomes. Management then assigns a weighting factor to each of these outcomes based on the probability that the outcome will materialise in future. The factor is then applied to each of the potential outcomes and the factored outcomes are then added together to arrive at the weighted average value of the provisions. Additional disclosure of these estimates of provisions are included in note 17 - Provisions.

Pension and other post-employment benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate, future salary increase, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

The measurement of receivables is derived after consideration of the allowance for doubtful debts. Management makes certain assumptions regarding the categorisation of debtors into groups with similar risk profiles so that the effect of any impairment on a group of receivables would not differ materially from the impairment that would have been determined had each debtor been assessed for impairment on an individual basis. The determination of this allowance is predisposed to the utilisation of estimates, assumptions and management judgements. In determining this allowance the estimates are made about the probability of recovery of the debtors based on their past payment history and risk profile.

Provision for rehabilitation of refuse landfill sites

The entity has an obligation to rehabilitate its landfill sites in terms of its license stipulations. Provision is made for this obligation based on the size / extent of the land to be rehabilitated, the rehabilitation cost per square meter, the monitoring cost per square meter, and the rehabilitation period. Current costs are projected using the average rate of inflation over the remaining period until rehabilitation, and then discounted to their present value using an appropriate discounting rate, representing the time value of money.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.6 Significant judgements and sources of estimation uncertainty (continued)

Depreciation and amortisation

Depreciation and amortisation recognised on property, plant and equipment and intangible assets are determined with reference to the useful lives and residual values of the underlying items. The useful lives and residual values of assets are based on management's estimation of the asset's current condition, expected condition at the end of the period of use, its current use, expected future use and the entity's expectations about the availability of finance to replace the asset at the end of its useful life. In evaluating the useful life and residual value management considers the impact of technology and minimum service requirements of the assets.

1.7 Investment property

Initial recognition and measurement

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for use in the production or supply of goods or services, to meet service delivery objectives, for administrative purposes or sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at date of completion.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property (property, plant and equipment), the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the entity accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

The cost of day to day servicing of investment property is recognised in the Statement of Financial Performance as incurred.

Subsequent measurement

Cost model

Subsequent to initial recognition investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation recognised on investment property is determined with reference to the useful lives and residual values of the underlying items. Depreciation is provided to write down the cost, less estimated residual value by equal instalments over the useful life of the property, which is as follows:

Item	Useful life
Buildings	30 years

Land is not depreciated as it is considered to have an indefinite useful life.

Impairments

The entity tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an Investment Property is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of the impairment is recognised in the Statement of Financial Performance.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.7 Investment property (continued)

Derecognition

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in the Statement of Financial Performance in the period of retirement or disposal.

1.8 Property, plant and equipment

Initial recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when it is probable that future economic benefits or service potential associated with the item will flow to the municipality and the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the cost of dismantling and removing the asset and restoring the site on which it is operated.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

Major spare parts and servicing equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and servicing equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Subsequent measurement

Subsequent to initial recognition, property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for land, which is not depreciated as it is deemed to have an indefinite useful life.

Subsequent expenditure

Where the entity replaces part of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

Depreciation

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value. Components that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The depreciable amount is determined after taking into account an asset's residual value.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.8 Property, plant and equipment (continued)

The annual depreciation rates are based on the following estimated useful lives:

Item	Average useful life
Infrastructure	
Roads and paving	10-30 years
Water	15-20 years
Pedestrian malls	20 years
Electricity	20-30 years
Sewerage	15-20 years
Gas	20 years
Airports	20 years
Security	3-5 years
Community	
Buildings	30 years
Recreational equipment	20 years
Other	
Buildings	30 years
Office equipment	3-7 years
Furniture and fittings	7-10 years
Bins and containers	5-10 years
Emergency equipment - fire hoses and emergency lights	5 years
Emergency equipment - other firefighting equipment	15 years
Motor vehicles - motor cycles	3 years
Motor vehicles - fire engines	20 years
Motor vehicles - other	5-10 years
Plant and equipment - farming and construction	10-15 years
Plant and equipment - Specialised equipment	5 years
Plant and equipment - lawn mowers	2 years
Other	15 years

Impairments

The entity tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

Where items of property, plant and equipment have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the Statement of Financial Performance in the period that the impairment is identified.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of the impairment is recognised in the Statement of Financial Performance.

Derecognition

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.9 Intangible assets

An intangible asset is an identifiable non-monetary asset without physical substance. The entity recognises an intangible asset in its Statement of Financial Position when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and the cost or fair value of the asset can be measured reliably.

An internally generated intangible asset is subject to strict recognition criteria before it is capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the entity intends to complete the intangible asset, for use or sale
- it is technically feasible to complete the intangible asset
- the entity has the resources to complete the project
- it is probable that it will generate future economic benefits or service potential.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are initially recognised at cost.

An intangible asset acquired through a non-exchange transaction, the cost shall be its fair value as at the date of acquisition.

Subsequent measurement

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

The cost of an intangible asset is amortised over the useful life where that useful life is finite. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Financial Performance in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life assumption continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation and impairment

Amortisation is charged to write off the cost of intangible assets over their estimated useful lives using the straight-line method.

The annual amortisation rates are based on the following estimated average asset lives:

Computer software	5 years
-------------------	---------

Impairments

The entity tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is performed at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

Derecognition

Intangible assets are derecognised on disposal or when no future economic benefits or service potential are expected from its use or disposal.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.9 Intangible assets (continued)

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

1.10 Financial instruments

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Upon initial recognition the entity classifies financial instruments or their component parts as financial liabilities, financial assets or residual interests in conformity with the substance of the contractual arrangement and to the extent that the instrument meets the relevant definitions.

Financial instruments are evaluated, based on their terms, to determine if those instruments contain both liability and residual interest components (i.e. to assess if the instruments are compound financial instruments). To the extent that an instrument is in fact a compound instrument, the components are classified separately as financial liabilities and residual interests as the case may be.

Initial measurement

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Subsequent measurement

Subsequent to initial recognition, financial assets and financial liabilities are measured at fair value, amortised cost or cost.

All financial assets and financial liabilities are measured after initial recognition using the following categories:

a) Financial instruments at fair value:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

b) Financial instruments at amortised cost

Non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that the entity designates at fair value at initial recognition or are held for trading.

c) Financial instruments at cost

Investments in residual interest, which do not have quoted market prices and for which fair value cannot be determined reliably.

The entity assesses which instruments should be subsequently measured at fair value, amortised cost or cost, based on the definitions of financial instruments at fair value, financial instruments at amortised cost or cost, based on the definitions of financial instruments at fair value, financial instruments at amortised cost or financial instruments at cost as set out above.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.10 Financial instruments (continued)

Impairments

All financial assets measured at cost or amortised cost are subject to an impairment review. The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

The entity first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant and individually or collectively for financial assets that are not individually significant. If the entity determines that no objective evidence of impairment exists for an individually assessed asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly or by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition

Financial assets

The entity derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when the obligation is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.10 Financial instruments (continued)

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Policies relating to specific financial instruments

Cash and cash equivalents

Cash and cash equivalents are measured at amortised cost.

Cash includes cash on hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the Cash Flow Statement, cash and cash equivalents comprise cash on hand and deposits held on call with banks.

Trade and other receivables

Trade and other receivables are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition and subsequently stated at amortised cost less provision for impairment. All trade and other receivables are assessed at least annually for possible impairment. Impairments of trade and other receivables are determined in accordance with the accounting policy for impairments. Impairment adjustments are made through the use of an allowance account.

Bad debts are written off in the year in which they are identified as irrecoverable. Amounts receivable within 12 months from the reporting date are classified as current. Interest is charged on overdue accounts.

Trade and other payables

Trade payables are initially measured at fair value plus transaction costs that are directly attributable to the acquisition and are subsequently measured at amortised cost.

1.11 Leases

Finance leases - lessee

Initial recognition

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the entity through the lease agreement. Assets subject to finance leases are recognised in the Statement of Financial Position at the inception of the lease, as is the corresponding finance lease liability.

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Subsequent measurement

Subsequent to initial recognition the finance lease liability is carried at amortised cost, with the lease payments being set off against the capital and accrued interest. The allocation of the lease payments between the capital and interest portion of the liability is effected through the application of the effective interest method.

The finance charges resulting from the finance lease are expensed, through the Statement of Financial Performance, as they accrue. The finance cost accrual is determined using the effective interest method.

Finance lease liabilities are derecognised when the entity's obligation to settle the liability is extinguished. The assets capitalised under the finance lease are derecognised when the entity no longer expects any economic benefits or service potential to flow from the asset.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.11 Leases (continued)

Operating leases - lessor

For those leases classified as operating leases the asset subject to the lease is not derecognised and no lease receivable is recognised at the inception of the lease.

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the straight-lined lease payments and the contractual lease payments are recognised as either an operating lease asset or operating lease liability. An operating lease liability is raised to the extent that lease payments are received in advance (i.e. the straight-line lease payments are more than the contractual lease payments). The operating lease asset and / or operating lease liability are measured as the undiscounted difference between the straight-line lease receipts and the contractual lease receipts.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

Income for leases is disclosed under revenue in the statement of financial performance.

Operating leases - lessee

Assets subject to operating leases, i.e. those leases where substantially all of the risks and rewards of ownership are not transferred to the lessee through the lease, are not recognised in the Statement of Financial Position.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.12 Inventories

Initial recognition and measurement

Inventories are initially measured at cost. Cost refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their required location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Water inventory is being measured by multiplying the cost per kilo litre of purified water by the amount of water in storage.

Where inventory is acquired for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Subsequent measurement

Inventories, consisting of consumable stores, raw materials, work-in-progress (WIP) and finished goods (FG), are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost.

Water inventory is measured annually at the reporting date by way of dip readings and the calculated volume in the distribution network.

Redundant and slow-moving inventories are identified and written down from cost to net realisable value.

Derecognition

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.13 Employee benefits

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short term employee benefits are recognised in the Statement of Financial Performance as services are rendered, except for non-accumulating benefits, which are recognised when the specific event occurs. These short term employee benefits are measured at their undiscounted costs in the period the employee renders the related service or the specific event occurs.

Post-employment benefits

The entity provides post employment benefits for its officials. These benefits are provided as either defined contribution plans or defined benefit plans. The entity identifies as defined contribution plans any post-employment plan in terms of which it has no obligation to make further contributions to the plan over and above the monthly contributions payable on behalf of employees (for example in the event of a funding shortfall). Any other plans are considered to be defined benefit plans.

Defined contribution plans

Contributions made towards the fund are recognised as an expense in the Statement of Financial Performance in the period that such contributions become payable. This contribution expense is measured at the undiscounted amount of the contribution paid or payable to the fund. A liability is recognised to the extent that any of the contributions have not yet been paid. Conversely an asset is recognised to the extent that any contributions have been paid in advance.

Post retirement medical obligations

The municipality provides post-retirement medical benefits by subsidising the medical contributions of certain retired staff members according to the rules of the medical aid funds. Council pays 70% of the contributions and the remaining 30% is paid by the members.

The entitlement to post-retirement medical benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations, in accordance with GRAP 25 - "Employee Benefits". The plan is unfunded.

The contributions are recognised in the statement of financial performance when the employees have rendered the service entitling them to the contribution. The liability was calculated by means of the projected unit credit actuarial valuation method. The liability is recognised at the present value of the defined benefit obligation at the reporting date, minus the fair value of the plan assets (if any) out of which the obligations are to be settled directly, plus any liability that may arise as a result of minimum funding requirements. Payments made by the municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries, and are recognised in the Statement of Financial Performance upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions are recognised in the Statement of Financial Performance in the period that it occurs. These obligations are valued annually by independent qualified actuaries.

1.14 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.14 Provisions and contingencies (continued)

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditure for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 43.

1.15 Revenue from exchange transactions

Revenue from exchange transactions refers to revenue that accrues to the entity directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable, excluding indirect taxes, rebates and discounts.

Recognition

Revenue from exchange transactions is only recognised once all of the following criteria have been satisfied:

- a) The entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- b) The amount of revenue can be measured reliably; and
- c) It is probable that the economic benefits or service potential associated with the transaction will flow to the entity and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue arising out of situations where the entity acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the entity as compensation for executing the agreed services.

Specific exchange revenue sources

Service charges relating to electricity and water are based on consumption. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Electricity meters in industrial areas are read at the end of each month and billed the following month. Premises with high-tension electricity supplies are read and billed monthly.

Revenue arising from the consumption of electricity and water in the month of June is fully accounted for whether invoiced or not.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale. At reporting date, an estimate of the prepaid electricity consumed is made and revenue is adjusted accordingly. The estimate is based on trend analysis and historical data of electricity consumption.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff. Tariffs are determined per category of property usage and are levied on a monthly basis.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.15 Revenue from exchange transactions (continued)

Rental income arising on facilities and equipment is accounted for on a straight-line basis over the lease terms on ongoing leases.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and rebates.

1.16 Revenue from non-exchange transactions

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Recognition

Revenue from non-exchange transactions is only recognised once all of the following criteria have been satisfied:

- a) The entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- b) The amount of revenue can be measured reliably; and
- c) It is probable that the economic benefits or service potential associated with the transaction will flow to the entity and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Council applies a flat rating system. The same rate factor is applied for land and buildings. In terms of this system, assessment rates are levied on the value of land and buildings in respect of properties. Rebates are granted according to the use of the property concerned. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis.

Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Fines are recognised when it is probable that future economic benefits will flow to the entity, the costs can be reliably measured and all restrictions have been complied with. Fines constitute both spot fines and summonses. Revenue from spot fines is recognised when payment is received and the revenue from the issuing of summonses is recognised when collected. Due to the various legal processes that can apply to summonses and the inadequate information available from the courts, it is not possible to measure this revenue in the invoicing period.

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset and there is not a corresponding liability in respect of related conditions.

Measurement

An asset that is recognised as a result of a non-exchange transaction is recognised at its fair value at the date of the transfer. Consequently, revenue arising from a non-exchange transaction is measured at the fair value of the asset received, less the amount of any liabilities that are also recognised due to conditions that must still be satisfied.

Where there are conditions attached to a grant, transfer or donation that gave rise to a liability at initial recognition, that liability is transferred to revenue as and when the conditions attached to the grant are met.

Grants without any conditions attached are recognised as revenue in full when the asset is recognised, at an amount equalling the fair value of the asset received.

Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor.

1.17 Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.18 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.19 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.20 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.21 Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions or if the related party entity and other entity are subject to common control.

Transactions between related parties other than transactions that would occur within a normal supplier or client/recipient relationship on terms and conditions no more or less favourable than those which it is reasonable to expect the entity would have adopted if dealing with that individual or entity at arm's length in the same circumstances are disclosed within the annual financial statements.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.22 Heritage assets

Heritage assets, which are culturally significant resources and which are shown at cost, are not depreciated due to the uncertainty regarding their estimated useful lives.

Transitional provision

The municipality has taken advantage of the three year exemption on the measurement of Heritage Assets allowed by National Treasury.

1.23 Taxes - Value added tax

Revenue, expenses and assets are recognised net of the amounts of value added tax. The net amount of value added tax recoverable from, or payable to the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

1.24 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale are measured at the lower of its carrying amount and fair value less costs to sell.

1.25 Capital commitments

Capital commitments disclosed in the financial statements represents the contractual balance committed to the capital projects on reporting date that will be incurred in the period subsequent to the specific reporting date.

1.26 Post-reporting date events

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that is indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The entity will adjust the amounts recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The entity will disclose the nature of the event and an estimate its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.27. New standards and interpretations

1.27.1 Standards and Interpretations early adopted

The municipality has chosen to early adopt the following standards and interpretations:

Standard/ Interpretation:	Effective date: Years beginning on or after
GRAP 6 (as revised 2010): Consolidated and Separate Financial Statements	01 April 2014

1.27.2 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2014 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
GRAP 105: Transfers of functions between entities under common control	01 April 2014	No significant effect
GRAP 106: Transfers of functions between entities not under common control	01 April 2014	No significant effect
GRAP 107: Mergers	01 April 2014	No significant effect

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

ACCOUNTING POLICIES

Possible impact of initial application of standards of GRAP approved but not yet effective

GRAP 18: Segment Reporting - It is expected that this will only result in additional disclosures without affecting the underlying accounting.

GRAP 105: Transfers of functions between entities under common control - No significant impact is expected as no such transactions or events are expected in the foreseeable future.

GRAP 106: Transfers of functions between entities not under common control - No significant impact is expected as no such transactions or events are expected in the foreseeable future.

GRAP 107: Mergers - No significant impact is expected as no such transactions or events are expected in the foreseeable future.

GRAP 20: Related parties - No significant impact is expected as the information is to a large extent already included in the financial statements

10. Heritage assets

The municipality owns the following heritage assets:

The Heroes of Steytleville monument, situated in Steytleville, in honour of persons that died during the apartheid struggle.

The Great War Memorial monument, situated in Steytleville, in honour of service men killed during the First World War.

The municipality owns registered servitudes.

Transitional provision

The municipality has taken advantage of the three year exemption on the measurement of Heritage Assets allowed by National Treasury.

11. Non-current assets held for sale

	Opening balance	Additions	Disposals	Total
Non-current assets held for sale	110 000	8 500	(110 000)	8 500

Erf 1760 and 2119 were sold but had not yet been transferred at 30 June 2014.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

Figures in Rand	2014	2013
12. Repayment - National Revenue Fund		
Public Works - EPWP	264 524	-
Municipal Infrastructure grant	4 867 092	-
	5 131 616	-
Total other financial liabilities	5 131 616	-

The municipality applied for a roll over on the 2012/2013 unspent conditional grants. The application was denied and the municipality is required to repay R5,131,616.

The amount is repayable in instalments of R1,500,000 to be deducted from the next four tranches of the equitable share grant.

Non-current liabilities

At amortised cost 631 616 -

Current liabilities

At amortised cost 4 500 000 -

13. Finance lease obligation

Minimum lease payments due

- within one year 716 399 718 139
 - in second to fifth year inclusive 739 310 1 426 580

1 455 709 2 144 719

less: future finance charges (210 499) (641 885)

Present value of minimum lease payments 1 245 210 1 502 834

Present value of minimum lease payments due

- within one year 559 498 543 141
 - in second to fifth year inclusive 685 712 959 693

Current liabilities	570 035	578 040
	5 763 810	4 578 540

Annual Bonuses

Bonuses are paid out to all employees (except for senior management) during November each year and are based on a 13th monthly basic salary.

Long service awards

Long service awards to eligible employees are paid for services rendered by employees of 5 years and longer in five year intervals. The service awards are paid as per the collective agreement of 21 February 2011, signed by the Bargaining Council. The basis on which this was calculated is as follows:

- After 5 Continuous Years of Service - 2% of Basic Annual Salary
- After 10 Continuous Years of Service - 3% of Basic Annual Salary
- After 15 Continuous Years of Service - 4% of Basic Annual Salary
- After 20 Continuous Years of Service - 5% of Basic Annual Salary
- After 25 Continuous Years of Service - 6% of Basic Annual Salary
- After 30 Continuous Years of Service - 6% of Basic Annual Salary
- After 35 Continuous Years of Service - 6% of Basic Annual Salary
- After 40 Continuous Years of Service - 6% of Basic Annual Salary
- After 45 Continuous Years of Service - 6% of Basic Annual Salary

Post-employment medical benefits

This provision was valued by an independent valuator as at 30 June 2014. The valuation of this liability considers all employees, retired employees and their dependants who participate in the medical aid arrangements and are entitled to a post-employment medical aid subsidy. The Projected Unit Credit funding method has been used to determine the post-service liabilities at the valuation date and the projected annual expense in the year following the valuation date.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

Figures in Rand

2014

2013

17. Provisions (continued)

Rehabilitation of landfill

The obligation for the environmental rehabilitation results from the onus imposed by the Environmental Conservation Act No.73 of 1989 to rehabilitate landfill sites after use. The sites are expected to be closed in 2018, after which rehabilitation will take place over the course of the next 9 to 10 years after which the site is expected to be fully rehabilitated. The following assumptions were used when calculating the provisions for Landfill Site rehabilitation:

- The CPIX was used to adjust the cost as it is the only determining factor year on year.

The landfill sites are nearing the end of their useful lives and the ground and ground water on the entire site are thus considered to be contaminated and not just the portions in use, i.e. the provision provides for the cost of rehabilitating the entire site and not just the portions used up to financial year end. The entire site would need to be rehabilitated due to waste distributed across the entire site over the years since opening thereof. Thus, as provided in GRAP 19 where it states that the provision should only be raised to the extent that the costs would need to be incurred, it is considered that the full cost of rehabilitation would need to be incurred to rehabilitate the sites.

The municipality does not have licences for the landfills therefore the sites will need to be rehabilitated in their entirety.

18. Property rates

The mayor and councillors only receive remuneration as set out in Note 23. Rates and municipal services were in line with other customers, see note 46.

The senior management only receive remuneration as set out in Note 22. Rates and municipal services were in line with other customers.

All related government entities transactions, including the district municipality, such as rates and municipal services were in line with government legislation.

36. Risk management

Financial risk management

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument		
- Call deposits	9 817	7 430
- Trade and other receivables	1 405 213	766 755
- Other receivables	395 091	397 883

Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Interest rate risk is managed by investing any surplus funds into high yield investments. The resultant interest earned is likely to offset interest paid, as both are linked to prime rates.

37. Events after the reporting date

No events have been identified after the reporting date which could have a material impact on the annual financial statements.

Baviaans Local Municipality

Less: Certified by council as irrecoverable and written off	(828 197)	-
	2 277 377	828 197

41. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the council and includes a note to the annual financial statements.

Goods and services to the value of R6,990,577.89 (2012/2013: R2,686,080) were procured during the financial year under review and the process followed in procuring those goods deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the council who considered them and subsequently approved the deviation from the normal supply chain management regulations.

42. Compliance

The municipality was unable to pay creditors within the required 30 days due to cash constraints. This is in contravention of paragraph 65(2)(e) of the Municipal Finance Management Act.

Baviaans Local Municipality

Annual Financial Statements for the year ended 30 June 2014

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

Figures in Rand

2014

2013

43. Contingencies

Wanhoop

The municipality is involved in a dispute with the owner of a farm in respect of the municipality's rights to water that is sourced from the farm. The municipality's lawyers are of the opinion that the matter will only be resolved in court. If it goes to court, further costs could reach somewhere between R400,000 and R500,000. Should the municipality be successful, a reasonable portion of the costs will be payable by the owner of the farm.

The matter is still pending. The Department of Water Affairs are actively involved in trying to assist the municipality in finalising the matter to ensure that the municipality can register servitudes. On the matter of litigation it seems to be quiet for the moment and the lawyers foresee that it will remain like this for the immediate future.

Isiseko Soqoqosho CC

The municipality is being sued by Isiseko Soqoqosho CC for R 7 000 000 for damages incurred as a result of the termination of an agreement between the parties.

The matter was scheduled to be heard on 26 July 2011 but was sine die (for an undetermined time) postponed as the debtor's assets had to be valued. The debtor could only reschedule the hearing after they had paid the taxed costs which they did on 18 October 2012. They are in a position to schedule the matter for hearing but to date have not done such.

The municipality's lawyers regard this matter as being closed as the claimant has not applied for the case to be put on the roll again.

Landfill sites

The municipality has not obtained a permit for the landfill sites in terms of Section 24G of the National Environmental Management Act. This could lead to possible penalties and fines being imposed.

44. Material losses

During the 2013/2014 financial year the municipality incurred distribution losses relating to water of 21% (2012/2013: 20.51%) and relating to electricity of 11.82% (2013: 12.14%)

45. Pension and medical aid deductions

Pension

49. Employee benefits (continued)

Defined benefit obligation

The obligation in respect of the medical care contributions for retirement benefits is valued every year by independent qualified actuaries. The last actuarial valuation was performed on 30 June 2014 by Arch Actuarial Consulting using the Projected Unit Credit Method.

50. Going concern

The executives of the municipality together with council have pursued various avenues, including the Cacadu District Municipality, Department of Provincial and Local Government as well as Provincial and National Treasury in seeking a financial solution to the challenges faced by the municipality.

A detailed financial recovery plan has been drafted which is actively being implemented and progress monitored by dedicated Task Team which includes delegates from the Baviaans Municipality, CDM and Provincial Treasury. A realistic three year budget has been adopted for the purposes of achieving financial recovery, while efforts are under way to upgrade the standard of financial administration and systems at the municipality.

Management and council have again committed themselves to achieving a clean audit and compliance with Provincial and National Treasury requirements.
