APPROVAL OF FINANCIAL STATEMENTS

I am responsible for the preparation of these annual financial statements year ended 30 June 2014, which are set out on pages 1 to 68 in terms of Section 126 (1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. The annual financial statements have been prepared in accordance with GRAP.

I acknowledge that I am ultimately responsible for the system of internal financial control and that the system of internal control provides reasonable assurance that the financial records can be relied on.

I have reviewed the Municipality's cash flow forecast for the year to 30 June 2014 and am satisfied that the Municipality can continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the Municipality's financial statements.

I certify that the remuneration of Councillors and in-kind benefits are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

T. Samuel Municipal Manager 29 August 2014

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1. ACCOUNTING PRINCIPLES AND POLICIES APPLIED IN THE FINANCIAL STATEMENTS

1.1. BASIS OF PREPARATION

The financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

The financial statements have been prepared in accordance with the Municipal Finance Management Act (MFMA) and effective standards of Generally Recognised Accounting Practices (GRAP), including any interpretations and directives issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

Accounting policies for material transactions, events or conditions not covered by the GRAP reporting framework , have been developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 (Revised – March 2012) and the hierarchy approved in Directive 5 issued by the Accounting Standards Board.

The Municipality resolved not to early adopt GRAP standards which have been issued but are not effective yet.

Assets, liabilities, revenue and expenses have not been offset except when offsetting is permitted or required by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated otherwise. The details of any changes in accounting policies are explained in the relevant notes to the financial statements.

In terms of Directive 7: "The Application of Deemed Cost on the Adoption of Standards of GRAP" issued by the Accounting Standards Board, the Municipality applied deemed cost to Investment Property, Property, Plant and Equipment and Intangible assets where the acquisition cost of an asset could not be determined.

1.2. PRESENTATION CURRENCY

Amounts reflected in the financial statements are in South African Rand and at actual values. Financial values are rounded to the nearest Rand.

1.3. GOING CONCERN ASSUMPTION

These financial statements have been prepared on a going concern basis.

1.4. COMPARATIVE INFORMATION

When the presentation or classification of items in the financial statements are amended, prior period comparative amounts are restated, unless a standard of GRAP does not require the restatement of comparative information. The nature and reason for the reclassification is disclosed. Where material accounting errors have been identified in the current year, the correction is made retrospectively as far as practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

year, the adjustment is made retrospectively as far as practicable, and the prior year comparatives are restated accordingly.

1.5 AMENDED DISCLOSURE POLICY

Amendments to accounting policies are reported as and when deemed necessary based on the relevance of any such amendment to the format and presentation of the financial statements. The principal amendments to matters disclosed in the current financial statements include errors.

1.6. MATERIALITY

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decision or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatements judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor. Materiality is determined as 1% of total operating expenditure. This materiality is from management's perspective and does not correlate with the auditor's materiality.

1.7. PRESENTATION OF BUDGET INFORMATION

The presentation of budget information is prepared in accordance with GRAP 24 and based on the Municipal Budget and Reporting Regulations format. The comparison of budget and actual amounts are disclosed as separate additional financial statements, namely Statements of comparison of budget and actual amounts.

Budget information is presented on the accrual basis and is based on the same period as the actual amounts, i.e. 1 July 2013 to 30 June 2014. The budget information is therefore on a comparable basis to the actual amounts.

The comparable information includes the following:

- the approved and final budget amounts;
- actual amounts and final budget amounts;

Explanations for differences between the approved and final budget are included in the Statements of Comparison of Budget and Actual Amounts for all differences exceeding 10% or R1'000'000.

Explanations for material differences between the final budget amounts and actual amounts are included the Statements of Comparison of Budget and Actual Amounts for all differences exceeding 10% or R1'000'000.

The disclosure of comparative information in respect of the previous period is not required in terms of GRAP 24.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.8. STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the Municipality:

Standard	Description	Effective Date
GRAP 6	Consolidated and Separate Financial	Unknown
(Revised – Nov 2010	Statements	
	The objective of this Standard is to prescribe the circumstances in which consolidated and separate financial statements are to be prepared and the information to be included in those financial statements so that the consolidated financial statements reflect the financial performance, financial position and cash flows of an economic entity as a single entity.	
	No significant impact is expected as the Municipality does not have any entities at this stage to be consolidated.	
GRAP 8	Interest in Joint Ventures	Unknown
(Revised – Nov 2010)	The objective of this Standard is to prescribe the accounting treatment of jointly controlled operations, jointly controlled assets and jointly controlled entities and to provide alternatives for the recognition of interests in jointly controlled entities. No significant impact is expected as the Municipality	
	is not involved in any joint ventures.	
GRAP 18	Segment Reporting	1 April 2015
(Original – Feb 2011)	The objective of this Standard is to establish principles for reporting financial information by segments.	
	No significant impact is expected as information to a large extent is already included in the appendixes to the financial statements which do not form part of the audited financial statements.	
GRAP 20	Related Party Disclosure	Unknown
(Original – June 2011)	The objective of this Standard is to ensure that a Municipality's financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.	

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

	The Municipality resolved to adopt the disclosure requirements as per GRAP 20. The information is therefore included in the financial statements.	
GRAP 32	Service Concession Arrangements: Grantor	Unknown
(Original – Aug 2013)	The objective of this Standard is to prescribe the accounting for service concession arrangements by the grantor and a public sector entity.	
	No such transactions or events are expected in the foreseeable future.	
GRAP 105 (Original – Nov 2010)	Transfer of Functions Between Entities Under Common Control	1 April 2015
	The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control.	
	No significant impact expected as no such transactions or events are expected in the foreseeable future.	
GRAP 106	Transfer of Functions Between Entities Not Under Common Control	1 April 2015
(Original – Nov 2010)	The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control.	
	No significant impact expected as no such transactions or events are expected in the foreseeable future.	
GRAP 107 (Original – Nov 2010)	Mergers The objective of this Standard is to establish accounting principles for the combined entity and combining entities in a merger.	1 April 2015
	No significant impact expected as no such transactions or events are expected in the foreseeable future.	
GRAP 108	Statutory Receivables	Unknown
(Original – Sept 2013)	The objective of this Standard is to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.	
	No significant impact is expected as the Municipality's current treatment is already in line with the Standards treatment.	

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

IGRAP 11	Consolidation - Special Purpose Entities (SPE) The objective of this Interpretation of the Standard is to prescribe under what circumstances an entity should consolidate a SPE. No significant impact is expected as the Municipality does not have any SPE's at this stage.	Unknown
IGRAP 12	JointlyControlledEntitiesnon-monetarycontributionsThe objective of this Interpretation of the Standard is to prescribe the treatment of profit/loss when an asset is sold or contributed by the venturer to a Jointly Controlled Entity (JCE).No significant impact is expected as the Municipality does not have any JCE's at this stage.	Unknown

These standards, amendments and interpretations will not have a significant impact on the Municipality once implemented.

1.9. LEASES

1.9.1 Municipality as Lessee

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the Municipality. Property, plant and equipment or intangible assets (excluding licensing agreements for such items as motion picture films, video recordings, plays, manuscripts, patents and copyrights) subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the Municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred. The interest rate used is the interest rate implicit in the lease or the bank prime interest rate.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant and equipment, investment property or intangibles assets. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to de-recognition of financial instruments are applied to lease payables.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined expenses and actual payments made will give rise to a liability. The Municipality recognises the aggregate benefit of

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

incentives as a reduction of rental expense over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern of the lessee's benefit from the use of the leased asset.

1.9.2 Municipality as Lessor

Under a finance lease, the Municipality recognises the lease payments to be received in terms of a lease agreement as an asset (receivable). The receivable is calculated as the sum of all the minimum lease payments to be received, plus any unguaranteed residual accruing to the Municipality, discounted at the interest rate implicit in the lease. The receivable is reduced by the capital portion of the lease instalments received, with the interest portion being recognised as interest revenue on a time proportionate basis. The accounting policies relating to de-recognition and impairment of financial instruments are applied to lease receivables.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease revenue is recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined revenue and actual payments received will give rise to an asset. The Municipality recognises the aggregate cost of incentives as a reduction of rental revenue over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern over which the benefit of the leased asset is diminished.

1.10. UNSPENT CONDITIONAL GOVERNMENT GRANTS AND RECEIPTS

Conditional government grants are subject to specific conditions. If these specific conditions are not met, the monies received are repayable.

Unspent conditional grants are financial liabilities that are separately reflected on the Statement of Financial Position. They represent unspent government grants, subsidies and contributions from government organs.

This liability always has to be cash-backed. The following provisions are set for the creation and utilisation of this creditor:

- Unspent conditional grants are recognised as a liability when the grant is received.
- When grant conditions are met an amount equal to the conditions met are transferred to revenue in the Statement of Financial Performance.
- The cash which backs up the creditor is invested as individual investment or part of the general investments of the Municipality until it is utilised.
- Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor. If it is the Municipality's interest, it is recognised as interest earned in the Statement of Financial Performance.

1.11. **PROVISIONS**

Provisions are recognised when the Municipality has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resource embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate of future outflows of resources. Where

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

the effect is material, non-current provisions are discounted to their present value using a discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability.

The Municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the probability of an outflow of resources embodying economic benefits or service potential is remote. A contingent asset is disclosed where an inflow of economic benefits or service potential is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

A provision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision were met:

- (a) The Municipality has a detailed formal plan for the restructuring identifying at least:
 - the business or part of a business concerned;
 - the principal locations affected;
 - the location, function and approximate number of employees who will be compensated for terminating their services;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented.
- (b) The Municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the reporting date.

If it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, the provision is de-recognised.

1.12. EMPLOYEE BENEFITS

Defined contribution plans are post-employment benefit plans under which the Municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

1.12.1 Post Retirement Medical Obligations

The Municipality provides post-retirement medical benefits by subsidizing the medical aid contributions of certain retired staff according to the rules of the medical aid funds.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Council pays 70% as contribution and the remaining 30% is paid by the members. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. The present value of the defined benefit liability is actuarially determined in accordance with GRAP 25 – "Employee Benefits" (using a discount rate applicable to high quality government bonds). The plan is unfunded.

These contributions are recognised in the Statement of Financial Performance when employees have rendered the service entitling them to the contribution. The liability was calculated by means of the projected unit credit actuarial valuation method. The liability in respect of current pensioners is regarded as fully accrued, and is therefore not split between a past (or accrued) and future in-service element. The liability is recognised at the present value of the defined benefit obligation at the reporting date, minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly, plus any liability that may arise as a result of a minimum funding requirements. Payments made by the Municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are recognised in the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experienced adjustments and changes in actuarial assumptions are recognised in the Statement of Financial Performance in the period that it occurs. These obligations are valued annually by independent qualified actuaries.

1.12.2 Long Service Awards

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the Municipality. The Municipality's obligation under these plans is valued by independent qualified actuaries annually and the corresponding liability is raised. Payments are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are recognised in the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions are recognised in the Statement of Financial Performance in the period that it occurs. These obligations are valued annually by independent qualified actuaries.

1.12.3 Provision for Staff Leave

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total amount of leave days due to employees at year-end and also on the total remuneration package of the employee.

Accumulating leave is carried forward and can be used in future periods if the current period's entitlement is not used in full. All unused leave will be paid out to the specific employee at the end of that employee's employment term.

Accumulated leave is vesting.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.12.4 Staff Bonuses Accrued

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year end is based on bonus accrued at year-end for each employee.

1.12.5 Provision for Performance Bonuses

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, is recognised as it accrue to Section 57 employees. Municipal entities' performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends.

1.13. PROPERTY, PLANT AND EQUIPMENT

1.13.1 Initial Recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. The cost of an item of property, plant and equipment is recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the item will flow to the Municipality, and the cost or fair value of the item can be measured reliably. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a nonmonetary asset or monetary assets, or a combination of monetary and non-monetary assets, the assets acquired is initially measured at fair value (the cost). It the acquired item's fair value is not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the Municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

1.13.2 Subsequent Measurement – Cost Model

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the Municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits or service potential associated with the asset.

1.13.3 Depreciation and Impairment

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis. The annual depreciation rates are based on the following estimated useful lives:

Infra atmost wa	Years	Other	Years
Infrastructure Roads and paving Pedestrian Malls Electricity	25 - 50 30 15 - 50	Other Buildings Plant and machinery Motor vehicles IT Equipment Office equipment Furniture and fittings	30 5 - 10 5 - 7 5 - 7 5 - 7 5 - 7
<u>Community</u> Improvements Recreational Facilities Security	30 20 - 30 5		
Investment property	30		

Property, plant and equipment are reviewed at each reporting date for any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. The impairment recognised in the Statement of Financial Performance is the excess of the carrying value over the recoverable amount.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of impairment is recognised in the Statement of Financial Performance.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.13.4 De-recognition

Items of property, plant and equipment are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.14. INTANGIBLE ASSETS

1.14.1 Initial Recognition

An intangible asset is an identifiable non-monetary asset without physical substance.

An asset meets the identifiability criterion in the definition of an intangible asset when it:

- is separable, i.e. is capable of being separated or divided from the Municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the Municipality intends to do so; or
- arises from binding arrangements from contracts, regardless of whether those rights are transferable or separable from the Municipality or from other rights and obligations.

The Municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the Municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the Municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the Municipality has the resources to complete the project;
- it is probable that the municipality will receive future economic benefits or service potential; and
- the Municipality can measure reliably the expenditure attributable to the intangible asset during its development.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value is not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.14.2 Subsequent Measurement – Cost Model

Intangible assets are subsequently carried at cost less accumulated amortisation and any accumulated impairments losses. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised, but is subject to an annual impairment test.

1.14.3 Amortisation and Impairment

Amortisation is charged so as to write off the cost or valuation of intangible assets over its estimated useful lives using the straight line method. Amortisation of an asset begins when it is available for use, i.e. when it is in the condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are amortised separately. The estimated useful lives, residual values and amortisation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis. The annual amortisation rates are based on the following estimated useful lives:

Intangible Assets	Years
Computer Software	5-10

1.14.4 De-recognition

Intangible assets are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.15. INVESTMENT PROPERTY

1.15.1 Initial Recognition

Investment property is recognised as an asset when, and only when:

- it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the Municipality, and
- the cost or fair value of the investment property can be measured reliably.

Investment property includes property (land or a building, or part of a building, or both land and buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations. Property with a currently undetermined use, is also classified as investment property.

At initial recognition, the Municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

the date of acquisition. The cost of self-constructed investment property is measured at cost.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the Municipality accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

1.15.2 Subsequent Measurement – Cost Model

Investment property is measured using the cost model. Under the cost model, investment property is carried at cost less accumulated depreciation and any accumulated impairment losses. Depreciation is provided to write down the cost, less estimated residual value over the useful life of the property, which is as follows:

Investment property	Years
Property - land	Indefinite
Property - buildings	30 years

1.15.3 De-recognition

Investment property is derecognised when it is disposed or when there are no further economic benefits expected from the use of the investment property. The gain or loss arising on the disposal or retirement of an item of investment property is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.16. IMPAIRMENT OF NON-FINANCIAL ASSETS

1.16.1 Cash-generating assets

Cash-generating assets are assets held with the primary objective of generating a commercial return.

The Municipality assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Municipality estimates the asset's recoverable amount.

In assessing whether there is any indication that an asset may be impaired, the Municipality considers the following indications:

- (a) External sources of information
 - During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
 - Significant changes with an adverse effect on the Municipality have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the Municipality operates or in the market to which an asset is dedicated.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

- Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's recoverable amount materially.
- (b) Internal sources of information
 - Evidence is available of obsolescence or physical damage of an asset.
 - Significant changes with an adverse effect on the Municipality have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an asset as finite rather than indefinite.
 - Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

The re-designation of assets from a cash-generating asset to a non-cash generating asset or from a non-cash-generating asset to a cash-generating asset shall only occur when there is clear evidence that such a re-designation is appropriate. A re-designation, by itself, does not necessarily trigger an impairment test or a reversal of an impairment loss. Instead, the indication for an impairment test or a reversal of an impairment loss arises from, as a minimum, the indications listed above.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. Impairment losses are recognised in the Statement of Financial Performance in those expense categories consistent with the function of the impaired asset.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the asset is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Municipality estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Financial Performance.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.16.2 Non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

The Municipality assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Municipality estimates the asset's recoverable service amount.

In assessing whether there is any indication that an asset may be impaired, the Municipality considers the following indications:

- (a) External sources of information
 - Cessation, or near cessation, of the demand or need for services provided by the asset.
 - Significant long-term changes with an adverse effect on the Municipality have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the Municipality operates.
- (b) Internal sources of information
 - Evidence is available of physical damage of an asset.
 - Significant long-term changes with an adverse effect on the Municipality have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, or plans to dispose of an asset before the previously expected date.
 - A decision to halt the construction of the asset before it is complete or in a usable condition.
 - Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.

An asset's recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use. If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss and is recognised in the Statement of Financial Performance.

The value in use of a non-cash-generating asset is the present value of the asset's remaining service potential. The present value of the remaining service potential of the asset is determined using any one of the following approaches, depending on the nature of the asset in question:

 depreciation replacement cost approach - the present value of the remaining service potential of an asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

- restoration cost approach the cost of restoring the service potential of an asset to
 its pre-impaired level. Under this approach, the present value of the remaining
 service potential of the asset is determined by subtracting the estimated restoration
 cost of the asset from the current cost of replacing the remaining service potential
 of the asset before impairment. The latter cost is usually determined as the
 depreciated reproduction or replacement cost of the asset, whichever is lower.
- service unit approach the present value of the remaining service potential of the
 asset is determined by reducing the current cost of the remaining service potential
 of the asset before impairment, to conform with the reduced number of service
 units expected from the asset in its impaired state. As in the restoration cost
 approach, the current cost of replacing the remaining service potential of the asset
 before impairment is usually determined as the depreciated reproduction or
 replacement cost of the asset before impairment, whichever is lower.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

An impairment loss is recognised immediately in surplus or deficit, unless the asset is carried at a revalued amount in accordance with another Standard of GRAP. Any impairment loss of a revalued asset shall be treated as a revaluation decrease in accordance with that Standard of GRAP.

The Municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for an asset may no longer exist or may have decreased. If any such indication exists, the Municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for an asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. If this is the case, the carrying amount of the asset is increased to its recoverable service amount. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods. Such a reversal of an impairment loss is recognised in the Statement of Financial Performance.

1.17. INVENTORIES

1.17.1 Initial Recognition

Inventories comprise of current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the Municipality, and the cost of the inventories can be measured reliably. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus non-recoverable taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Water inventory is being measured by multiplying the cost per kilo litre of purified water by the amount of water in storage.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Where inventory is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

1.17.2 Subsequent Measurement

Inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventory is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

The basis of allocating cost to inventory items is the first-in-first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

1.18. FINANCIAL INSTRUMENTS

Financial instruments recognised on the Statement of Financial Position include receivables (both from exchange transactions and non-exchange transactions), cash and cash equivalents, annuity loans and payables (both from exchange and non-exchange transactions) and non-current investments. The future utilization of Unspent Conditional Grants is evaluated in order to determine whether it is treated as financial instruments.

1.18.1 Initial Recognition

Financial instruments are initially recognised when the Municipality becomes a party to the contractual provisions of the instrument at fair value plus, in the case of a financial asset or financial liability not at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. If finance charges in respect of financial assets and financial liabilities are significantly different from similar charges usually obtained in an open market transaction, adjusted for the specific risks of the Municipality, such differences are immediately recognised in the period it occurs, and the unamortised portion adjusted over the period of the loan transactions.

1.18.2 Subsequent Measurement

Financial assets are categorised according to their nature as either financial assets at fair value, financial assets at amortised cost or financial assets at cost. Financial liabilities are categorised as either at fair value or financial liabilities carried at amortised cost. The subsequent measurement of financial assets and liabilities depends on this categorisation.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.18.2.1 <u>Receivables</u>

Receivables are classified as financial assets at amortised cost, and are subsequently measured at amortised cost using the effective interest rate method.

For amounts due from debtors carried at amortised cost, the Municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. Objective evidence of impairment includes significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 90 days overdue). If the Municipality determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the Statement of Financial Performance. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the municipality. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is recognised in the Statement of Financial Performance.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate, if material. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

1.18.2.2 Payables and Annuity Loans

Financial liabilities consist of payables and annuity loans. They are categorised as financial liabilities held at amortised cost, and are initially recognised at fair value and subsequently measured at amortised cost using an effective interest rate, which is the initial carrying amount, less repayments, plus interest.

1.18.2.3 Cash and Cash Equivalents

Cash includes cash on hand (including petty cash) and cash with banks. Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, highly liquid deposits and net of bank overdrafts. The Municipality categorises cash and cash equivalents as financial assets carried at amortised cost.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities carried at amortised cost.

1.18.2.4 <u>Non-Current Investments</u>

Investments which include fixed deposits invested in registered commercial banks, are stated at amortised cost.

Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the Statement of Financial Performance in the period that the impairment is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is recognised in the Statement of Financial Performance.

The carrying amounts of such investments are reduced to recognise any decline, other than a temporary decline, in the value of individual investments.

1.18.3 De-recognition of Financial Instruments

1.18.3.1 Financial Assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired; or
- the Municipality has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Municipality has transferred substantially all the risks and rewards of the asset, or (b) the Municipality has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Municipality has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the old asset is derecognised and a new asset is recognised to the extent of the Municipality's continuing involvement in the asset.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Municipality could be required to repay.

When continuing involvement takes the form of a written and/or purchased option (including a cash settled option or similar provision) on the transferred asset, the extent of the Municipality's continuing involvement is the amount of the transferred asset that the Municipality may repurchase, except that in the case of a written put option (including a cash settled option or similar provision) on an asset measured at fair value, the extent of the Municipality's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

1.18.3.2 <u>Financial Liabilities</u>

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the Statement of Financial Performance.

1.18.4 Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

1.19. REVENUE

1.19.1 Revenue from Non-Exchange Transactions

Revenue from non-exchange transactions refers to transactions where the Municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred, meet the criteria for recognition as an asset. A corresponding liability is recognised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. At the time of initial recognition the full amount of revenue is recognised. If the Municipality does not enforce its obligation to collect the revenue, this would be considered as a subsequent event. Collection charges are recognised when such amounts are legally enforceable. Rebates and discounts are offset against the related revenue, in terms of iGRAP 1, as there is no intention of collecting this revenue.

Penalty interest on unpaid rates is recognised on a time proportionate basis as an exchange transaction.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution were met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the Municipality. Where public contributions have been received, but the Municipality has not met the related conditions, it is recognised as an unspent public contribution (liability).

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Revenue from third parties i.e. insurance payments for assets impaired, are recognised when it can be measured reliably and is not being offset against the related expenses of repairs or renewals of the impaired assets.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the Municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

Revenue is measured at the fair value of the consideration received or receivable.

When, as a result of a non-exchange transaction, a Municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the present obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability will be recognised as revenue.

1.19.2 Revenue from Exchange Transactions

Revenue from exchange transactions refers to revenue that accrued to the Municipality directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable.

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The Municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods.
- The Municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the Municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

At the time of initial recognition the full amount of revenue is recognised where the Municipality has an enforceable legal obligation to collect, unless the individual collectability is considered to be improbable. If the Municipality does not successfully enforce its obligation to collect the revenue this would be considered a subsequent event.

Service charges relating to electricity and water are based on consumption and a basic charge as per Council resolution. Meters are read on a monthly basis and are recognised as revenue when invoiced. Where the Municipality was unable to take the actual month's reading of certain consumers, a provisional estimate of consumption for that month will be created. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

period in which meters have been read. These adjustments are recognised as revenue in the invoicing period.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale. It is estimated that pre-paid electricity is consumed within 5 to 7 days after date of purchase.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the recorded number of refuse points per property.

Interest revenue is recognised using the effective interest rate method.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods are passed to the consumer.

Revenue is measured at the fair value of the consideration received or receivable.

The amount of revenue arising on a transaction is usually determined by agreement between the Municipality and the purchaser or user of the asset or service. It is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts and volume rebates allowed by the Municipality.

In most cases, the consideration is in the form of cash or cash equivalents and the amount of revenue is the amount of cash or cash equivalents received or receivable. However, when the inflow of cash or cash equivalents is deferred, the fair value of the consideration may be less than the nominal amount of cash received or receivable. When the arrangement effectively constitutes a financing transaction, the fair value of the consideration is determined by discounting all future receipts using an imputed rate of interest. The imputed rate of interest is the more clearly determinable of either:

- The prevailing rate for a similar instrument of an issuer with a similar credit rating;
- A rate of interest that discounts the nominal amount of the instrument to the current cash sales price of the goods or services.

The difference between the fair value and the nominal amount of the consideration is recognised as interest revenue.

When goods or services are exchanged or swapped for goods or services which are of a similar nature and value, the exchange is not regarded as a transaction that generates revenue. When goods are sold or services are rendered in exchange for dissimilar goods or services, the exchange is regarded as a transaction that generates revenue. The revenue is measured at the fair value of the goods or services received, adjusted by the amount of any cash or cash equivalents transferred. When the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services received at the fair value of the goods or services given up, adjusted by the amount of any cash or cash equivalents transferred.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.20. RELATED PARTIES

The Municipality resolved to adopt the disclosure requirements as per GRAP 20 – "Related Party Disclosures".

A related party is a person or an entity:

- with the ability to control or jointly control the other party,
- or exercise significant influence over the other party, or vice versa,
- or an entity that is subject to common control, or joint control.

The following are regarded as related parties of the Municipality:

- (a) A person or a close member of that person's family is related to the Municipality if that person:
 - has control or joint control over the Municipality.
 - has significant influence over the Municipalities. Significant influence is the power to participate in the financial and operating policy decisions of the Municipality.
 - is a member of the management of the Municipality or its controlling entity.
- (b) An entity is related to the Municipality if any of the following conditions apply:
 - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others).
 - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member).
 - both entities are joint ventures of the same third party.
 - one entity is a joint venture of a third entity and the other entity is an associate of the third entity.
 - the entity is a post-employment benefit plan for the benefit of employees of either the Municipality or an entity related to the Municipality. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity.
 - the entity is controlled or jointly controlled by a person identified in (a).
 - a person identified in (a) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the Municipality. A person is considered to be a close member of the family of another person if they:

- (a) are married or live together in a relationship similar to a marriage; or
- (b) are separated by no more than two degrees of natural or legal consanguinity or affinity.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Management (formerly known as "Key Management") includes all persons having the authority and responsibility for planning, directing and controlling the activities of the Municipality, including:

- (a) all members of the governing body of the Municipality;
- (b) a member of the governing body of an economic entity who has the authority and responsibility for planning, directing and controlling the activities of the Municipality;
- (c) any key advisors of a member, or sub-committees, of the governing body who has the authority and responsibility for planning, directing and controlling the activities of the Municipality; and
- (d) the senior management team of the Municipality, including the chief executive officer or permanent head of the Municipality, unless already included in (a).

Management personnel include:

- (a) All directors or members of the governing body of the Municipality, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee.
- (b) Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting Municipality being the Municipal Manager, Chief Financial Officer an all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

Remuneration of management includes remuneration derived for services provided to the Municipality in their capacity as members of the management team or employees. Benefits derived directly or indirectly from the Municipality for services in any capacity other than as an employee or a member of management do not meet the definition of remuneration. Remuneration of management excludes any consideration provided solely as a reimbursement for expenditure incurred by those persons for the benefit of the Municipality.

The Municipality operates in an economic environment currently dominated by entities directly or indirectly owned by the South African government. As a result of the Constitutional independence of all three spheres of government in South Africa, only parties within the same sphere of government will be considered to be related parties. Only transactions with such parties which are not at arm's length and not on normal commercial terms are disclosed.

1.21. UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in a form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 56 of 2003). Unauthorised expenditure is accounted for as an expense (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.22. IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No. 56 of 2003), the Municipal Systems Act (Act No. 32 of 2000), the Public Office Bearers Act, and (Act. No. 20 of 1998) or is in contravention of the Municipality's Supply Chain Management Policy. Irregular expenditure excludes

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

unauthorised expenditure. Irregular expenditure is accounted for as expenditure (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.23. FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and could have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.24. CONTINGENT LIABILITIES AND CONTINGENT ASSETS

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Municipality. A contingent liability could also be a present obligation that arises from past events, but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to the obligation or the amount of the obligation cannot be measured with sufficient reliability.

The Municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the probability of an outflow of resources embodying economic benefits or service potential is remote. A contingent asset is disclosed where the inflow of economic benefits or service potential is probable.

Management judgement is required when recognising and measuring contingent liabilities.

1.25. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

In the process of applying the Municipality's accounting policy, management has made the following significant accounting judgements, estimates and assumptions, which have the most significant effect on the amounts recognised in the financial statements:

1.25.1 Post retirement medical obligations and Long service awards

The cost of post retirement medical obligations and long service awards are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Major assumptions used are disclosed in note 4 of the financial statements. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

1.25.2 Impairment of Receivables

The calculation in respect of the impairment of debtors is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This was performed per service-identifiable categories across all classes of debtors.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.25.3 Property, Plant and Equipment

The useful lives of property, plant and equipment are based on management's estimation. Infrastructure's useful lives are based on technical estimates of the practical useful lives for the different infrastructure types, given engineering technical knowledge of the infrastructure types and service requirements. For other assets and buildings management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and residual values of property, plant and equipment.

- The useful life of movable assets was determined using the age of similar assets available for sale in the active market. Discussions with people within the specific industry were also held to determine useful lives.
- Local Government Industry Guides was used to assist with the deemed cost and useful life of infrastructure assets.
- The Municipality referred to buildings in other municipal areas to determine the useful life of buildings. The Municipality also consulted with engineers to support the useful life of buildings, with specific reference to the structural design of buildings.

1.25.4 Intangible Assets

The useful lives of intangible assets are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate.

Management referred to the following when making assumptions regarding useful lives of intangible assets:

• Reference was made to intangibles used within the Municipality and other municipalities to determine the useful life of the assets.

1.25.5 Investment Property

The useful lives of investment property are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their economic lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and valuation of investment property:

• The Municipality referred to buildings in other municipal areas to determine the useful life of buildings.

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

• The Municipality also consulted with professional engineers and qualified valuators to support the useful life of buildings.

1.25.6 Provisions and Contingent Liabilities

Management judgement is required when recognising and measuring provisions and when measuring contingent liabilities. Provisions are discounted where the time value effect is material.

1.25.7 Revenue Recognition

Accounting Policy 1.23.1 on Revenue from Non-Exchange Transactions and Accounting Policy 1.23.2 on Revenue from Exchange Transactions describes the conditions under which revenue will be recognised by management of the Municipality.

In making their judgement, management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and GRAP 23: Revenue from Non-Exchange Transactions, specifically, whether the Municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been performed. The management of the Municipality is satisfied that recognition of the revenue in the current year is appropriate.

1.25.8 Provision for Landfill Sites

The provision for rehabilitation of the landfill site is recognised as and when the environmental liability arises. The provision is calculated by a qualified environmental engineer. The provision represents the net present value at the reporting date of the expected future cash flows to rehabilitate the landfill site. To the extent that the obligations relate to an asset, it is capitalised as part of the cost of those assets. Any subsequent changes to an obligation that did not relate to the initial related asset are recognised in the Statement of Financial Performance.

Management referred to the following when making assumptions regarding provisions:

• Professional engineers were utilised to determine the cost of rehabilitation of landfill sites as well as the remaining useful life of each specific landfill site.

1.25.9 Provision for Staff leave

Staff leave is accrued to employees according to collective agreements. Provision is made for the full cost of accrued leave at reporting date. This provision will be realised as employees take leave or when employment is terminated.

1.25.10 Provision for Performance bonuses

ACCOUNTING POLICY TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

The provision for performance bonuses represents the best estimate of the obligation at yearend and is based on historic patterns of payment of performance bonuses. Performance bonuses are subject to an evaluation by Council.

1.25.11 Pre-paid electricity estimation

Pre-paid electricity is recognised as income when the electricity is sold.

1.25.12 Componentisation of Infrastructure assets

All infrastructure assets are unbundled into their significant components in order to depreciate all major components over the expected useful lives. The cost of each component is estimated based on the current market price of each component, depreciated for age and condition and recalculated to cost at the acquisition date if known or to the date of initially adopting the standards of GRAP.

1.26. TAXES – VALUE ADDED TAX

Revenue, expenses and assets are recognised net of the amounts of value added tax. The net amount of Value Added Tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

1.27. CAPITAL COMMITMENTS

Capital commitments disclosed in the financial statements represents the contractual balance committed to capital projects on reporting date that will be incurred in the period subsequent to the specific reporting date.

1.28. EVENTS AFTER REPORTING DATE

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (nonadjusting events after the reporting date).

If non-adjusting events after the reporting date are material, the Municipality discloses the nature and an estimate of the financial effect.

	(498 655)	(932 745
Less: Future finance obligations		

There are no leases secured by property, plant and equipment - Note 11

2

The municipality has plant & equipment assets with a carrying value of R8,274,930 (2013: R7,258,227) subject to a finance lease.

It is the municipality's policy to lease certain motor vehicles, plant & equipment under finance leases. In terms of GRAP 13, when office equipment is rented over the major part of its useful life, the relevant lease is deemed a finance lease and the related liability raised and the asset capitalised.

The average lease term was 5 years and the average effective borrowing rate was prime for the Wesbank motor vehicles and prime plus 4% fixed for the plant & machinery. No escalation clause is contained in the lease agreements. Ownership on the vehicles will transfer to the municipality at the end of the lease term. Ownership for the office equipment remains with the leasor. No security has been offered by the municipality for the leased assets. Bell Equipment stand security for the plant & equipment.

Total finance costs paid for the current year is R666 420 (2013: R952,140)

The municipality performed their first actuarial valuation on 30 June 2008.

The municipality makes monthly contributions for health care arrangements to the following medical aid schemes

Hosmed
Kei Health
LA Health
Bonitas

Bo	MWUMED		0010	
Key actuarial assumptions used:		2014 %	2013 %	
i)	Rate of interest			
	Discount rate Health Care Cost Inflation Rate Net Effective Discount Rate	8.29% 7.67% 0.58%	7.65% 7.21% 0.41%	

Discount Rate: GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-employment liabilities should be used. Consequently, a discount rate of 8.29% per annum has been used. The corresponding index-linked yield at this term is 1.53%. These rates do not reflect any adjustment for taxation. These rates were deduced from the JSE Zero Coupon bond yield after the market close on 30 June 2014.

ii) Mortality rates

The post-retirement mortality used in the valuation is PA(90) M for males, and PA(90) F for Females.

iii) Normal retirement age

It has been assumed that the normal retirement age of the Sakhisizwe Municipality employees is 60 years for males and 60 years for females.

The amounts recognised in the Statement of Financial Position are as follows:	2014 R	2013 R
Present value of fund obligations	1 284 649	859 034
Total Liability	1 284 649	859 034
The fund is wholly unfunded.		

The municipality has elected to recognise the full increase in this defined benefit liability immediately as per IAS 19, Employee Benefits, paragraph 155 (a).

Reconciliation of present value of fund obligation:

Present value of fund obligation at the beginning of the year Total expenses Current service cost

Expenditure for the year Interest Cost Benefits Paid	68 205 (64 800)	63 791 (67 549)

Health care inflation	-1%	-	62 200	
Post-retirement mortality		-	71 400	

Sakhisizwe Municipality will contribute 70% of the total premium payable, subject to a maximum of Sakhisizwe Municipality will contribute 70% of the total premium spable, subject to a maximum of RS,372.89 (2012: R3,158). This is an increase of 6.79% (the same as the salary increase granted on 1 July 2014 per the SALGBC bargaining council agreement 3:2014) from the figure of R3,158.43 used in the previous valuation. The municipality only subsidises the employee, spouse or life partner, biological children, and legally adopted children, up to the age of 21 years. An assumption is therefore made that should a child dependant turn 21 years of age, he/she is no longer eligible for subsidy benefits.

Membership profile:

The calculation is based on 3 members (2012: 2) with an average age of 67.5 (2013: 68.8), and 0.3 average dependants 2013: 0.5) and an average monthly contribution of R2,761 (R2,700)

tions used at the reporting date: Valuation ass

It is difficult to predict future investment returns and health care cost inflation rates. The relationship between them is more stable and therefore easier to predict. GRAP 25 requires that financial assumptions be based on market expectations at the Valuation Date for the period over which the liability obligations are to be settled

Discount Rate: GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-employment liabilities should be used.

Consequently, a discount rate of 8,29% per annum has been used. The corresponding index-linked yield at this term is 1.53%. These rates do not reflect any adjustment for taxation. the JSE Zero Coupon bond yield after the market close on 30 June 2014. ation. These rates were deduced from

The fixed-interest and index-linked yield was taken from the JSE (Best Decency) Zero Coupon bond yield curve at the average duration, using an iterative process (because the yield depends on the liability, which in turn depends on the yield).

Health Care Cost Inflation Rate: This assumption is required to reflect estimated future changes in the cost of medical cost initiation rate: The assumption required to release sumated induce changes in the cost of medical acvices, resulting from both initiation and specific changes in medical costs (for example, due to technological advances or changes in utilisation patterns). Any assumption regarding future medical scheme contribution increases is therefore subjective.

A health care cost inflation rate of 7.67% has been assumed. This is 1.50% in excess of expected CPI inflation over the expected term of the liability, namely 6.17%. A larger differential would be unsustainal eventually forcing members to less expensive options. This implies a net discount rate of 0.58% which derives from ((1+8.29%)((1+7.67%))-1.

The expected inflation assumption of 6.17% was obtained from the differential between market yields on index-linked bords consistent with the estimated term of the liabilities (1.53%) and those of fixed interest bonds (8.29%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). This was therefore determined as follows: ((1+8.29%-0.50%)/(1+1.53%))-1.

The next contribution increase was assumed to occur with effect from 1 January 2015

Demographic Assumptions Demographic assumptions are required to estimate the changing profile of retirees who are eligible for post-

employment benefits

Post-retirement Mortality

Post-requering moticality PA(90) ultimate table, adjusted down by one year of age. Family Profile (retirees) It has been assumed that husbands will be four years older than their wives. Actual marital status was used and the potential for remarriage was ignored.

Plan Assets

Management has indicated that there are no long-term assets set aside off-balance sheet in respect of the Municipality's post-employment health care liability.

Other Assumptions

Unter Assumptions It was assumed that the Municipality's health care arrangements and subsidy policy would remain as outlined in Section 3. Furthermore, it was assumed that the level of benefits receivable, and the contributions payable in respect of such, would remain unchanged, with the exception of allowing for inflationary adjustments. Implicit in this approach is the assumption that current levels of cross-subsidy from in-service members to continuation members within the medical scheme are sustainable, and will continue.

It is assumed that the following information provided by the municipality is correct:
 The Sakhisizwe municipality could not confirm the operational date of the Cala site.
 Thus, the operational date was assumed to be 2005 when the permit for operation was received.
 The Sakhisizwe municipality could not confirm the operational date of ther the Elito site. Thus, the operational date was assumed to be 2012 when the permit for upgrades to the site was received.
 Rehabilitation requirements are guided by Minimum Requirements.

3.2

- Construction cost estimates were based on typical 'civil engineering' rates obtained from various recent Construction cost estimates were based on typical 'civil engineering' rates outained from Various recontracts and historic pricing data.
 The estimate includes:
 Contractor Preliminary and General Items at 20% of construction costs;
 Contrigencies at 10% of total construction costs to cover unforeseen costs;
 Design Fees at 14% of total costs (construction ad contingencies); and
 All costs exclude VAT.
 The May 2014 costs were escalated to the anticipated date of closure based on civil contract price
 ainistment (CPA) indices (2012 based: June 2014) (4.566%). These indices are based on labour, fuel,

The May 2014 costs were escalated to the anticipated date of closure based on civil contract price adjustment (CPA) indices (2012 based: June 2014) (4.566%). These indices are based on labour, fuel, material and plant costs. CPA has been calculated as per the other landfills done using Northern Cape (Province) price indices.
 Rehabilitation costs were calculated using criteria for closure detailed in the Minimum Requirements. The costs are based in verified contractor rates.
 The extent of the sites to be rehabilitated was determined from a site visit. A surveyor surveyed the Cala and Elito sites to detaile the lifespan. X, Y and Z co-ordinates were taken at set lintervals (20m x 20m) in order to allow for the modeling of the waste body. The extent of the waste disposal sites were considered to be as follows: Cala (5100 m2), Elitol (20100 m2)
 The approximate height of the Elitol landfill was established by using the existing perms on the site as the top of the landfill varies according to the established by using the highest existing peak according to the survey information;
 It is assumed that topsol/cover soil is available near the site.
 Where sites are not currently fenced, allowance has been made to fence the site. The municipal waste officer meanmation is that concurse.

Reconciliation of Provision for Bad Debts		
Balance at beginning of year Contribution to provision Water & Sanitation reallocation from agency account Bad Debts Writen Off	49 703 356 17 582 775 -	45 713 488 3 989 868

Balance at end of year Concentrations of credit risk with respect to trade receivables are limited due to the municipality's large number of customers. The municipality's historical experience in collection of trade receivables falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the municipality's trade receivables.

Rates debtors are payable within 30 days. This credit period granted is considered to be consistent with the terms used in the public sector, through established practices and legislation. Discounting of rates debtors are not performed in terms of GRAP 104 on initial recognition.

The entire provision for bad debts relates to the outstanding rates balance.

Concentrations of credit risk with respect to trade receivables are limited due to the municipality's large number of customers. The municipality's historical experience in collection of trade receivables falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the municipality's trade receivables.

2014 R

UNAUTHORISED, IRREGULAR, FRUITLESS AND WASTEFUL EXPENDITURE DISALLOWED (CONTINUE)

36.2 Fruitless and wasteful expenditure

Reconciliation of fruitless and wasteful expenditure:		
Opening balance	769 292	769 292
Fruitless and wasteful expenditure current year	25 234	-
Written off by council	-	-
Transfer to receivables for recovery	-	-
Fruitless and wasteful expenditure awaiting further action	794 526	769 292

Included in the opening balance is an amount identified in 2012 for a contract entered into between MTN Cellular Service Provider and Sakhisizve Municipality, whereby the municipality stands as surify for numerous cellphone contracts for unknown users of the cellphones. The original agreement between the service provider and the municipality was not conducted and signed by an authorised municipal official, neither have the costs been recovered from the users of the cellphones. The payment to MTN in the current financial year is regarded as fruitiess and wasteful expenditure. An amount of R56,030 was overpaid to a supplier due to a casting error on their invoice submitted. An amount of R56,430 was overpaid to the supplier due to a casting error on their invoice submitted. An amount of R56,430 was overpaid to the supplier for car hire. Included in the opening balance is an amount identified in 2011 for licencing & service fees totalling R23,138 were incurred in 2010 by the Traffic department on licencing & service fees paid to TCS (Pty)Ltd for the use of a system which is no longer in use by the Traffic department, but for which no notice has been given to the relevant company to cancel the contract. No attempt has been made to recover the fruitiess expenditure. No criminal or disciplinary steps were considered necessary in relation to the expenditure. The expense had not been condoned as at 30 June 2014. Fruitless expenditure of R25,234 was incurred in 2014 due to interest incurred on outstanding Eskom and Telkom accounts.

Telkom accounts.

36.3 Irregular expenditure

Reconciliation of irregular expenditure:		
Opening balance	28 581 481	22 077 021
Irregular expenditure current year	4 791 081	6 504 460
Irregular expenditure - Performance Bonuses	1 566 330	-
Condonement supported by council	-	-
Transfer to receivables for recovery	-	-
Irregular expenditure awaiting further action	34 938 892	28 581 481
Irregular expenditure awaiting condonement from National Treasury	<u> </u>	-

2011: During the 2011 financial year it was noted that under banking to the amount of R14,807 (2010: R21,713) occurred at the Cala Receipting office. No explanation could be provided and no authorisation was given for the under banking of the cash receipts. The relevant amounts have note been condoned by council and are included in the opening balance disclosed in the current year.

Expenditure to the value of R 4'791'081 (2013: R 6,504,460) was incurred during the current financial year, for which three quotations were not obtained for the expenditure in order to comply to the relevant SCM regulations, however the goods and services were received for this expenditure. As a result, the expenditure is considered irregular and it will be investigated further by management.

Included in the irregular expenditure, is an amount of R1 566 330 for Performance Bonuses paid to management for which no performance assessments had been performed by the municipality for the financial years ended 2009 to 2013. The payment for the 2009 to 2013 financial years were made in the 2014 financial year.

Recoverability of all irregular expenditure will be evaluated by Council in terms of section 32 of MFMA. No steps have been taken at this stage to recover any monies.

36.4 <u>Material Losses</u>

37

37.2

Water distribution losses - Kilo litres disinfected/purified/purchased		
- Kilo litres lost during distribution	-	-
- Percentage lost during distribution	-	-
Electricity distribution losses		
- Units purchased (Kwh)	-	-
- Units lost during distribution (Kwh)	-	-
- Percentage lost during distribution	-	-

Water losses: In terms of the Water Service Agreement between Chris Hani District Municipality and Sakhisizwe Local Municipality, the water assets are the responsibility of Chris Hani District Municipality. Sakhisizwe Local Municipality is responsible for the maintenance thereof, and any expenditure incurred thereon will be reimbursed by Chris Hani District Municipality. Any potential losses which could exist would be immaterial.

Electricity losses: as at the time of the submission of the financial statements, the municipality was unable to determine electricity losses as no bulk meters or other systems are currently in place to identify and quantify electricity distribution losses. The installation of bulk electricity meters is in its planning stage.

The following Councillors had arrear accounts for more than 90 days as at 30 June 2014:

	R Outstanding more than 90 days	R Outstanding more than 90 days
Councillor SP Ntakana	949	1 681
Councillor TT Doda	10 983	16 241
Councillor MS Jentile	2 663	
Councillor BE Ponoshe	5 080	-
Total Councillor Arrear Consumer Accounts	19 674	17 922

37.4 Other non-compliance (MFMA 125(2)(a))

Section 9(a) of the MFMA requires the accounting officer of a municipality to submit to the relevant provincial treasury and the Auditor General, in writing within 90 days after the municipality has opened a new bank account, the name of the bank where the account has been opened, and the type and number of the account. There were no new accounts opened during the current financial year.

Section 32 (4) (a) of the MFMA states that the accounting officer must promptly inform the mayor, the MEC of local government in the province and the Auditor General in writing of any unauthorised, irregular or fruitless and wasteful expenditure incurred by the municipality. The municipality did not inform the relevant parties as required by the section.

The municipality did not update their website with all relevant documentation as required by Section 75(2) of the MFMA. The matter has only been adressed after year-end.

This expenditure will be financed from:		
Equitable Share	970 661	
	970 661	

FINANCIAL RISK MANAGEMENT

The activities of the municipality expose it to a variety of financial risks, including market risk (comprising fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The municipality's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

(a) Foreign Exchange Currency Risk

The municipality does not engage in foreign currency transactions.

(b) Price risk

38

39

The municipality is not exposed to price risk.

(c) Interest Rate Risk

As the municipality has significant interest-bearing liabilities, the entity's income and operating cash flows are substantially dependent on changes in market interest rates.

The municipality analyses its potential exposure to interest rate changes on a continuous basis. Different scenarios are simulated which include refinancing, renewal of current positions, alternative financing and hedging. Based on these scenarios, the entity calculates the impact that a change in interest rates will have on the surplus/deficit for the year. These scenarios are only simulated for liabilities which constitute the majority of interest bearing liabilities.

The municipality did not hedge against any interest rate risks during the current year.

The potential impact on the entity's surplus/deficit for the year due to changes in interest rates were as follow:

1 % (2013 - 1%) Increase in interest rates	(26 021)	69 587
0.5% (2013 - 0.5%) Decrease in interest rates	13 011	(34 793)

(d) Credit Risk

Credit risk is the risk that a counter party to a financial or non-financial asset will fail to discharge an obligation and cause the municipality to incur a financial loss.

Credit risk consist mainly of cash deposits, cash equivalents, trade and other receivables and unpaid conditional grants and subsidies. The municipality only deposits cash with major banks with high quality credit standing and limited exposure to any one counter-party.

Receivables are disclosed net after provisions are made for impairment and bad debts. Trade debtors comprise of a large number of ratepayers, dispersed across different sectors and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Credit risk pertaining to trade and other debtors is considered to be moderate due the diversified nature of debtors and immaterial nature of individual balances. In the case of consumer debtors the municipality effectively has the right to terminate services to customers, however customers cannot be refused basic services, therefore in practice this is difficult to apply and this constitutes a serious credit risk. A credit control policy is in place so as to minimise the risk but the risk is largely dependent on the political will for execution to control the credit risk.

All rates and services are payable within 30 days from invoice date. Refer to note 14 and 15 for all balances outstanding longer than 30 days. These balances represent all debtors at year end which defaulted on their credit terms. Also refer to note 14 and 15 for balances included in receivables that were re-negotiated for the period under review.

No receivables are pledged as security for financial liabilities.

Due to the short term nature of receivables the carrying value disclosed in note 14 and 15 of the financial statements is an approximation of its fair value. Interest on overdue balances are included at prime lending rate plus 1% where applicable.

The provision for bad debts could be allocated between the different classes of debtors as follows:

2014	2014	2013	2013
%	R	%	R

2014 B 2013 B

Non-Exchange Receivables

Rates	23.58%	20 756 241	20.19%	12 574 666
Exchange Receivables

Other		4.27%	3 600 975	0.00%	-
a		100.00%	84 359 740	100.00%	62 278 022

The entity only deposits cash with major banks with high quality credit standing. No cash and cash equivalents were pledged as security for financial liabilities and no restrictions were placed on the use of any cash and cash equivalents for the period under review. Although the credit risk pertaining to cash and cash equivalents are considered to be low, the maximum exposure are disclosed below.

The entity only enters into non-current investment transactions with major banks with high quality credit standing. Although the credit risk pertaining to non-current investments are considered to be low, the maximum exposure are disclosed below.

The banks utilised by the municipality for current and non-current investments are all listed on the JSE (First National Bank). The credit quality of these institutions are evaluated based on their required SENS releases as well as other media reports. Based on all public communications, the financial sustainability is evaluated to be of high quality and the credit risk pertaining to these institutions are considered to be low.

The risk pertaining to unpaid conditional grants and subsidies are considered to be very low. Amounts are receivable from national and provincial government and there are no expectation of counter party default.

Long-term Receivables and Other Debtors are individually evaluated annually at Balance Sheet date for impairment.

Financial assets exposed to credit risk at year end are as follows:

	4 080 814	19 643 873
Cash and Cash Equivalents	2 090 257	12 996 850
Receivables from exchange transactions	1 990 557	6 647 023
Financial assets exposed to credit risk at year end are as follows.		

2014 R 2013 R

(e) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying business, the treasury maintains flexibility in funding by maintaining availability under credit lines.

The entity's risk to liquidity is a result of the funds available to cover future commitments. The entity manages liquidity risk through an ongoing review of future commitments and credit facilities. Cash flow and available borrowing facilities are monitored.

The table below analyses the entity's financial liabilities into relevant maturity groupings based on the remaining period at the financial year end to the contractual maturity date. The amounts disclosed in the table are the contractual undiscourted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

EVENTS AFTER THE REPORTING DATE 41

40

The municipality had the following material events which occurred after reporting date during the financial The maintaining has been written and the billowing material events which occurred after reporting date during the maintain year ended 2013/2014;
- Water and Sanitation revenue and expenditure is expected to be transferred to the Chris Hani District Municipality from 1 July 2014, however no formal agreement had been signed as at the date of the issuing of the audit report.

42 IN-KIND DONATIONS AND ASSISTANCE

The municipality did not receive any in-kind donations or assistance during the year under review

PRIVATE PUBLIC PARTNERSHIPS 43

Council has not entered into any private public partnerships during the financial year.

CONTINGENT LIABILITY 44

Workmens Compensation:

The municipality has not yet submitted the required assessments to the Department of Labour relating to Compensation for Occupational Health and Safety for the 2006, 2007, 2009 and 2010 financial years. The municipality is currently in the process of negotiating payment terms, however it was not possible to quantify the amount owed for the 2006 to 2010 financial years, nor was it possible to quantify the amount that will be due by the municipality for penalties and interest. All outstanding returns and payments have been made in the current and 2013 financial years.

Pending litigation exists against the municipality totalling approximately R2'310'499.26, comprising of the following pending cases: - Kate Lombaard: outstanding account subscription fee for advertisement servicesfor R54 651.60 - Mr W Pretorious: setting aside arbitration of commissioner T Neethezofor claim R700 000.00 - C Bodlani: termination of servicesfor claim R980 000.00 - MI. Peterson: payment of servicesfor claim R980 000.00 - Michael van der Veen: Sakhiszwe/Lukhanji construction/Mr M.M Malotana for R168 189.94 - Makhanya: payment for alleged abuttion servicesfor R 372 900.00 - Songelwa & Associates: repayment of impounded and then released bull for R12 000.00

ESKOM: under billing of electricity is disclosed as a contingent liability as electricity sales are approximately 497087 (2013: 1.5 million) units more than units purchased from Eskom, as it has been determined that Eskom has possibly under billed the municipality for electricity consumed, but not paid for 2014 financial year. A contingent liability has been disclosed for electricity consumed, but not paid for by the municipality as Eskom could bill the municipality for the amount under billed by Eskom.

45 RELATED PARTIES

Key Management and Councillors receive and pay for services on the same terms and conditions as other ratepayers / residents.

The rates, service charges and other charges are in accordance with approved tariffs that were advertised to the public. No bad debt expenses have been recognised in respect of amounts owed by related parties.

45.1 Related Party Loans

Since 1 July 2004 loans to councillors and senior management employees are not permitted. No loans have been granted by the municipality prior or subsequent to this date.

45.2 Compensation of key management personnel

The compensation of key management personnel is set out in note 21 to the Annual Financial Statements.

45.3 Other related party transactions

The following purchases were made during the year where Councillors or staff have an interest: None

46

FINANCIAL SUSTAINABILITY

The indicators or conditions that may, individually or collectively, cast significant doubt about the going concern assumption are as follows:

Financial Indicators

The municipality have budgeted for a surplus of R 15,318,170 for the 2014 financial year. These deficit will be covered by surplus cash in the Municipality.

Sakhisizwe Municipality do not have any overdraft facility arrangements with the bank.

We draw attention to the fact that as at 30 June 2014, the municipality had an accumulated surplus of R 125723'178 and that the municipality's total assets exceed its liabilities by R 155'781'667

Other Indicators

Possible outflow of resources due to the contingent liability are disclosed in note 44
