ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1. BASIS OF PRESENTATION

The Annual Financial Statements have been prepared on an Accrual Basis of accounting and are in accordance with the historical cost convention, except where indicated otherwise.

The Annual Financial Statements have been prepared in accordance with the effective Standards of Generally Recognised Accounting Practices (GRAP), as approved by the Minister of Finance, including any interpretations, guidelines and directives issued by the Accounting Standards Board and the Municipal Finance Management Act, 2003 (Act No. 56 of 2003).

1.1 Changes in Accounting Policy and Comparability

Accounting Policies have been consistently applied, except where otherwise indicated below.

For the years ended 30 June 2013 and 30 June 2014 the municipality has adopted the accounting framework as set out in paragraph 1 above. The details of any resulting changes in Accounting Policy and comparative restatements are set out below and in the relevant Notes to the Annual Financial Statements.

The municipality changes an Accounting Policy only if the change:

- (a) Is required by a Standard of GRAP; or
- (b) Results in the Annual Financial Statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the municipality's financial position, financial performance or cash flow.

1.2 Critical Judgements, Estimations and Assumptions

In the application of the municipality's Accounting Policies, which are described below, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

These estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the critical judgements and estimations that management have made in the process of applying the municipality's Accounting Policies and that have the most significant effect on the amounts recognised in Annual Financial Statements:

1.2.1 Revenue Recognition

Accounting Policy 13.2 on Revenue from Exchange Transactions and Accounting Policy 13.3 on Revenue from Non-exchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality.

In making their judgement, the management considered the detailed criteria for the recognition of revenue as set out in GRAP 9 (*Revenue from Exchange Transactions*) and GRAP 23 (*Revenue from Non-exchange Transactions*). As far as Revenue from Non-exchange Transactions is concerned (see Basis of Preparation above), and, in particular, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services is rendered, whether the service has been rendered. Also of importance is the estimation process involved in initially measuring revenue at the fair value thereof. Management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

1.2.2 Financial Assets and Liabilities

The classification of Financial Assets and Liabilities, into categories, is based on judgement by management. Accounting Policy 9.1 on Financial Assets Classification and Accounting Policy 9.2 on Financial Liabilities Classification describe the factors and criteria considered by the management of the municipality in the classification of Financial Assets and Liabilities.

In making the above-mentioned judgement, management considered the definition and recognition criteria for the classification of Financial Instruments as set out in GRAP 104 (*Financial Instruments*).

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.2.3 Impairment of Financial Assets

Accounting Policy 9.4 on Impairment of Financial Assets describes the process followed to determine the value at which Financial Assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of Financial Assets as set out in GRAP 104 (Financial Instruments) and used its judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of the reporting period. The management of the municipality is satisfied that impairment of Financial Assets recorded during the year is appropriate.

Impairment of Trade Receivables:

The calculation in respect of the impairment of Debtors is based on an assessment of the extent to which Debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This is performed per service-identifiable categories across all classes of debtors.

The total increase in estimation of the impairment of Receivables from Exchange Transactions and that of Receivables from Non-exchange Transactions are disclosed in Notes 3 and 4 to the Annual Financial Statements.

1.2.4 Fair Value Estimations

As described in Accounting Policies 3.2, 5.2 and 7.2, the municipality subsequently measures its Buildings and Land in terms of the Revaluation Model, and its Investment Property and Biological Assets in terms of the Fair Value Model.

The valuation of assets are based on management's estimation. Management considered the impact of valuation techniques and market information in order to determine the current valuations, and more specific as follows:

- **Buildings and Land** are stated at revalued amounts based on valuation techniques and market information. The actual value of these items could differ from those estimated.
- **Investment Property** is measured at fair value amounts based on valuation techniques and market information. The actual value of these items could differ from those estimated.

• Biological Assets:

The fair value less estimated point-of-sale costs used to value Biological Assets requires management to make certain assumptions which are subject to change. The current assumptions are as follows:

- Cattle are valued at the prevailing market rates, as determined by breed, genetic merit and age, less point-of-sale costs.
- Fruit Trees, Harvest and Vegetables are valued by way of arm's length transaction that would have been applied / prevailing in replacing the existing fruit trees, harvest and vegetables with new fruit trees, harvest and vegetables.

1.2.5 Useful lives of Property, Plant and Equipment, Intangible Assets and Investment Property

As described in Accounting Policies 3.3 and 4.2, the municipality depreciates its Property, Plant & Equipment (excluding Buildings and Land) and amortises its Intangible Assets, over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use.

The useful lives of assets are based on management's estimation. Management considered the impact of technology, availability of capital funding, service requirements and required return on assets in order to determine the optimum useful life expectation, where appropriate.

The estimation of residual values of assets is based on management's judgement as to whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.2.6 Impairment: Write-down of Property, Plant & Equipment, Intangible Assets, Investment Property, Heritage Assets and Inventories

Accounting Policy 8 on Impairment of Assets, Accounting Policy 4.2 on Intangible Assets – Subsequent Measurement, Amortisation and Impairment and Accounting Policy 11.2 on Inventory – Subsequent Measurement describe the conditions under which non-financial assets are tested for potential impairment losses by the management of the municipality. Significant estimates and judgements are made relating to impairment testing of Property, Plant and Equipment, impairment testing of Intangible Assets and write-down of Inventories to the lowest of Cost and Net Realisable Value.

In making the above-mentioned estimates and judgement, management considered the subsequent measurement criteria and indicators of potential impairment losses as set out in GRAP 21 (Impairment of Non-cash Generating Assets) and GRAP 26 (Impairment of Cash Generating Assets). In particular, the calculation of the recoverable service amount for PPE and Intangible Assets and the Net Realisable Value for Inventories involves significant judgment by management.

Estimated impairments during the year to Inventory, Property, Plant and Equipment, Intangible Assets, Investment Property, Heritage Assets and Biological Assets are disclosed in Notes 2, 7, 8, 9, 10 and 11 to the Annual Financial Statements, if applicable.

1.2.7 Water Inventory

The estimation of the Water Inventory in reservoirs is based on the measurement of water via electronic level sensors, which determines the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir. Furthermore, the length and width of all pipes are also taken into account in determining the volume of water on hand at year-end. Refer to Accounting Policy 11.2.2.

1.2.8 Defined Benefit Plan Liabilities

As described in Accounting Policy 15.2, Employee Benefits – Post-employment Benefits, the municipality obtains actuarial valuations of its Defined Benefit Plan Liabilities. The defined benefit obligations of the municipality that were identified are Post-retirement Health Benefit Obligations and Long-service Awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the relevant Notes to the Annual Financial Statements.

1.2.9 Provisions and Contingent Liabilities

Management judgement is required when recognising and measuring Provisions and when measuring Contingent Liabilities. Provisions are discounted where the effect of discounting is material using actuarial valuations.

1.2.10 Budget Information

Deviations between budget and actual amounts are regarded as material differences when a 10% deviation exists. All material differences are explained in the relevant Notes to the Annual Financial Statements.

1.3 Presentation Currency

The Annual Financial Statements are presented in South African Rand, rounded off to the nearest Rand which is the municipality's functional currency.

1.4 Going Concern Assumption

The Annual Financial Statements have been prepared on a Going Concern Basis.

1.5 Offsetting

Assets, Liabilities, Revenues and Expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

1.6 Standards, Amendments to Standards and Interpretations issued but not yet Effective

The following GRAP Standards have been issued but are not yet effective and have not been early adopted by the municipality:

| • | GRAP 18 | Segment Reporting - issued March 2005 |
|---|----------|--|
| • | GRAP 20 | Related Party Disclosures (Revised) |
| • | GRAP 32 | Service Concession Arrangement Grantor |
| • | GRAP 105 | Transfers between Entities under common control - issued November 2010 |
| • | GRAP 106 | Transfers between Entities not under common control - issued November 2010 |
| • | GRAP 107 | Mergers - issued November 2010 |
| • | GRAP 108 | Statutory Receivables |

The Minister of Finance announced that the application of GRAP 25 will be effective for the period starting after 1 April 2013. All other standards as listed above will only be effective when a date is announced by the Minister of Finance.

The ASB Directive 5, paragraph 29, sets out the principles for the application of the GRAP 3 guidelines in the determination of the GRAP Reporting Framework hierarchy as set out in the standard of GRAP 3 on *Accounting Policies, Changes in Accounting Estimates and Errors*.

Where a standard of GRAP is approved as effective, it replaces the equivalent statement of International Public Sector Accounting Standards Board, International Financial Reporting Standards or Generally Accepted Accounting Principles. Where a standard of GRAP has been issued but is not yet in effect, the municipality may select to apply the principles established in that standard in developing an appropriate Accounting Policy dealing with a particular section or event before applying paragraph 12 of the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors.

The municipality applied the principles established in the following Standards of GRAP that have been issued but are not yet effective, in developing appropriate Accounting Policies dealing with the following transactions, but have not early adopted these Standards:

GRAP 20 Related Party Disclosures (Revised)

Management has considered all of the above-mentioned GRAP Standards issued but not yet effective and anticipates that the adoption of these standards will not have a significant impact on the financial position, financial performance or cash flows of the municipality.

2. NET ASSETS

Included in the Net Assets of the municipality are the following Reserves that are maintained in terms of specific requirements:

2.1 Reserves

2.1.1 Revaluation Reserve

The surplus arising from the revaluation of land and buildings is credited to a non-distributable reserve. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the Revaluation Reserve to the Accumulated Surplus/(Deficit). On disposal, the net revaluation surplus is transferred to the Accumulated Surplus/(Deficit) while gains or losses on disposal, based on revalued amounts, are credited or charged to the Statement of Financial Performance.

2.2 Accumulated Surplus

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

3. PROPERTY, PLANT AND EQUIPMENT

3.1 Initial Recognition

Property, Plant and Equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year.

The cost of an item of Property, Plant and Equipment is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and if the cost or fair value of the item can be measured reliably.

Property, Plant and Equipment are initially recognised at cost on its acquisition date or in the case of assets acquired by grants or donations, deemed cost, being the fair value of the asset on initial recognition. The cost of an item of Property, Plant and Equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of Property, Plant and Equipment have different useful lives, they are accounted for as separate items (major components) of Property, Plant and Equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

The cost of an item of Property, Plant and Equipment acquired in exchange for non-monetary assets or monetary assets, or a combination of monetary and non-monetary assets is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. If the acquired item could not be measured at its fair value, its cost is measured at the carrying amount of the asset given up.

Major spare parts and servicing equipment qualify as Property, Plant and Equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of Property, Plant and Equipment, they are accounted for as Property, Plant and Equipment.

3.2 Subsequent Measurement

Property, Plant and Equipment, excluding Buildings and Land

Subsequent expenditure relating to Property, Plant and Equipment is capitalised if it is probable that future economic benefits or potential service delivery associated with the subsequent expenditure will flow to the municipality and the cost or fair value of the subsequent expenditure can be reliably measured. Subsequent expenditure incurred on an asset is only capitalised when it increases the capacity or future economic benefits associated with the asset. Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

Subsequently all Property Plant and Equipment are measured at cost, less accumulated depreciation and accumulated impairment losses.

Buildings and Land

Subsequent to initial recognition Buildings and Land are carried at a revalued amount based on municipal valuations, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed by external independent valuers with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the Statement of Financial Position date. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset.

An increase in the carrying amount of Buildings and Land as a result of a revaluation is credited directly to a revaluation surplus reserve, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in the Statement of Financial Performance.

A decrease in the carrying amount of an asset as a result of a revaluation is recognised in the Statement of Financial Performance, except to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Where items of Buildings and Land have been impaired the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified except where the impairment reverses a previous revaluation.

When revalued assets are sold or retired the amounts included in the Revaluation Reserve in respect of that assets are transferred to the Statement of Changes in Net Assets.

Compensation from third parties for items of Property, Plant and Equipment that were impaired, lost or given up is included in the Statement of Financial Performance when the compensation becomes receivable.

3.3 Depreciation

Depreciation on assets other than land is calculated on cost, using the *Straight-line Method*, to allocate their cost or revalued amounts to their residual values over the estimated useful lives of the assets. The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. Each part of an item of Property, Plant and Equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

Depreciation only commences when the asset is available for use, unless stated otherwise. The depreciation rates are based on the following estimated useful lives:

| Asset Class | Years | Asset Class | Years |
|-------------------------|---------|------------------------|---------|
| Buildings | | Other | |
| Improvements | 10 - 30 | Bins and Containers | 5 - 15 |
| · | | Computer Equipment | 5 - 10 |
| Infrastructure | | Emergency Equipment | 5 - 10 |
| Electricity | 5 - 30 | Furniture and Fittings | 5 - 15 |
| Roads and Paving | 10 -80 | Motor Vehicles | 7 - 15 |
| Sanitation | 7 - 55 | Office Equipment | 5 - 15 |
| Sewerage | 7 - 100 | Plant and Equipment | 5 - 15 |
| Water | 50 | Specialist Vehicles | 10 - 20 |
| | | Other Assets | 25 - 30 |
| Community | | | |
| Community Facilities | 15 - 30 | | |
| Recreational Facilities | 15 - 30 | | |

The assets' residual values, estimated useful lives and depreciation method are reviewed annually and adjusted prospectively, if appropriate, at each reporting date. Reviewing the useful life of an asset on an annual basis does not require the municipality to amend the previous estimate unless expectations differ from the previous estimate.

3.4 Land

Land is stated at historical cost and is not depreciated as it is deemed to have an indefinite useful life.

3.5 Infrastructure Assets

Infrastructure Assets are any assets that are part of a network of similar assets. Infrastructure Assets are shown at cost less accumulated depreciation and accumulated impairment. Infrastructure Assets are treated similarly to all other assets of the municipality in terms of the Asset Management Policy.

3.6 Incomplete Construction Work

Incomplete Construction Work is stated at historical cost. Depreciation only commences when the asset is available for use.

3.7 Leased Assets

Assets capitalised under finance leases are depreciated over their expected useful lives on the same basis as Property, Plant and Equipment controlled by the municipality or, where shorter, the term of the relevant lease if there is no reasonable certainty that the municipality will obtain ownership by the end of the lease term.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

3.8 Derecognition

The carrying amount of an item of Property, Plant and Equipment is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an item of Property, Plant and Equipment is included in surplus or deficit when the item is derecognised. Gains are not classified as revenue.

Gains or losses are calculated as the difference between the carrying value of assets (cost less accumulated depreciation and accumulated impairment losses) and the proceeds from disposals are included in the Statement of Financial Performance as a gain or loss on disposal of Property, Plant and Equipment.

4. INTANGIBLE ASSETS

The municipality changed its Accounting Policy from GRAP 102 to GRAP 31 with no effect on the financial information previously disclosed.

4.1 Initial Recognition

Identifiable non-monetary assets without physical substance are classified and recognised as Intangible Assets. The municipality recognises an Intangible Asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated Intangible Assets are subject to strict recognition criteria before they are capitalised. Research expenditure is recognised as an expense as it is incurred. Costs incurred on development projects (relating to the design and testing of new or improved products) are recognised as Intangible Assets when the following criteria are fulfilled:

- (a) It is technically feasible to complete the Intangible Asset so that it will be available for use;
- (b) Management intends to complete the Intangible Asset and use or sell it;
- (c) There is an ability to use or sell the Intangible Asset;
- (d) It can be demonstrated how the Intangible Asset will generate probable future economic benefits;
- (e) Adequate technical, financial and other resources to complete the development and to use or sell the Intangible Asset are available; and
- (f) The expenditure attributable to the Intangible Asset during its development can be reliably measured.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Capitalised development costs are recorded as Intangible Assets and amortised from the point at which the asset is available for use. Development assets are tested for impairment annually, in accordance with GRAP 21 or GRAP 26.

Intangible Assets are initially recognised at cost. The cost of an Intangible Asset is the purchase price and other costs attributable to bring the Intangible Asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality, or where an Intangible Asset is acquired at no cost, or for a nominal cost, the cost shall be its fair value as at the date of acquisition. Trade discounts and rebates are deducted in arriving at the cost.

The cost of an Intangible Asset acquired in exchange for non-monetary assets or monetary assets, or a combination of monetary and non-monetary assets, is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. If the acquired item could not be measured at its fair value, its cost is measured at the carrying amount of the asset given up. If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

4.2 Subsequent Measurement, Amortisation and Impairment

After initial recognition, Intangible Assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Expenditure on an intangible item that was initially recognised as an expense shall not be recognised as part of the cost of an Intangible Asset at a later date.

In terms of GRAP 31, Intangible Assets are distinguished between internally generated Intangible Assets and other Intangible Assets. It is further distinguished between indefinite or finite useful lives. Amortisation is charged on a *Straight-line Basis* over the Intangible Assets' useful lives. The residual value of Intangible Assets with finite useful lives is zero, unless an active market exists. Where Intangible Assets are deemed to have indefinite useful lives, such Intangible Assets are not amortised. However, such Intangible Assets are subject to an annual impairment test.

Amortisation only commences when the asset is available for use, unless stated otherwise. The amortisation rates are based on the following estimated useful lives:

| Asset Class | Years | Asset Class | Years |
|-------------------|-------|-------------|-------|
| Computer Software | 5 | | |

Intangible Assets are annually tested for impairment as described in Accounting Policy 8 on Impairment of Assets, including Intangible Assets not yet available for use. Where items of Intangible Assets have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified. The impairment loss is the difference between the carrying amount and the recoverable service amount.

The estimated useful life, residual values and amortisation method are reviewed annually at the end of the financial year. Any adjustments arising from the annual review are applied prospectively as a Change in Accounting Estimate in the Statement of Financial Performance.

4.3 Derecognition

Intangible Assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an Intangible Asset is determined as the difference between the proceeds of disposal and the carrying value and is recognised in the Statement of Financial Performance.

5. INVESTMENT PROPERTY

5.1 Initial Recognition

Investment Property includes property (land or a building, or part of a building, or both land and buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

At initial recognition, the municipality measures Investment Property at cost including transaction costs once it meets the definition of Investment Property. However, where an Investment Property was acquired through a non-exchange transaction (i.e. where it acquired the Investment Property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed Investment Property is the cost at date of completion.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Based on management's judgement, the following criteria have been applied to distinguish Investment Properties from owner occupied property or property held for resale:

- (a) Land held for long-term capital appreciation rather than for short-term sale in the ordinary course of operations;
- (b) Land held for a currently undetermined future use (If the municipality has not determined that it will use the land as owner-occupied property or for short-term sale in the ordinary course of operations, the land is regarded as held for capital appreciation);
- (c) A building owned by the municipality (or held by the municipality under a finance lease) and leased out under one or more operating leases on a commercial basis (this will include the property portfolio rented out on a commercial basis on behalf of the municipality);
- (d) A property owned by the municipality and leased out at a below market rental; and
- (e) Property that is being constructed or developed for future use as investment property.

The rent earned does not have to be at a commercial basis or market related for the property to be classified as investment property.

The following assets do not fall in the ambit of Investment Property and shall be classified as Property, Plant and Equipment, Inventory or Non-current Assets Held-for-Sale, as appropriate:

- (a) Property held for sale in the ordinary course of operations or in the process of construction or development for such sale;
- (b) Property being constructed or developed on behalf of third parties;
- (c) Owner-occupied property, including (among other things) property held for future use as owner-occupied property, property held for future development and subsequent use as owner-occupied property, property occupied by employees such as housing for personnel (whether or not the employees pay rent at market rates) and owner-occupied property awaiting disposal;
- (d) Property that is leased to another entity under a finance lease;
- (e) Property held to provide goods and services and also generates cash inflows; and
- (f) Property held for strategic purposes which would be accounted for in accordance with the Standard of GRAP on Property, Plant and Equipment.

5.2 Subsequent Measurement

Investment Property is measured using the *Fair Value Model*. Investment Property is carried at fair value, representing open market value determined by external valuers at the date of the last general valuation. Fair value is based on active market prices, adjusted for any difference in the nature, location or condition of the specific asset, if necessary. A gain or loss arising from a change in the fair value of Investment Property is included in the Statement of Financial Performance for the period in which it arises.

If the municipality determines that the fair value of an Investment Property under construction is not reliably measurable but expects the fair value to be reliably measurable when construction is completed, it measures that Investment Property at cost until the fair value can be reliably determined or construction has been completed.

Where the municipality has determined that the fair value of an Investment Property (other than Investment Property under construction) is not determinable on a continuing basis, the municipality measures that Investment Property using the cost model (as per the Accounting Policy for Property, Plant and Equipment).

5.3 Derecognition

An Investment Property shall be derecognised (eliminated from the Statement of Financial Position) on disposal or when the Investment Property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

6. HERITAGE ASSETS

A Heritage Asset is defined as an asset that has a cultural, environmental, historical, natural, scientific, technological or artistic significance, and is held and preserved indefinitely for the benefit of present and future generations.

Heritage Assets are not depreciated owing to uncertainty regarding to their estimated useful lives. The municipality assess at each reporting date if there is an indication of impairment.

6.1 Initial Recognition

The cost of an item of Heritage Assets is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and if the cost or fair value of the item can be measured reliably.

Heritage Assets are initially recognised at cost on its acquisition date or in the case of assets acquired by grant or donation, deemed cost, being the fair value of the asset on initial recognition. The cost of an item of Heritage Assets is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

The cost of an item of Heritage Assets acquired in exchange for a non-monetary asset or monetary asset, or a combination of monetary and non-monetary assets, is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. If the acquired item could not be measured at its fair value, its cost is measured at the carrying amount of the asset given up.

6.2 Subsequent Measurement

Subsequent expenditure relating to Heritage Assets is capitalised if it is probable that future economic benefits or potential service delivery associated with the subsequent expenditure will flow to the municipality and the cost or fair value of the subsequent expenditure can be reliably measured. Subsequent expenditure incurred on an asset is only capitalised when it increases the capacity or future economic benefits associated with the asset. Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

Subsequently all Heritage Assets are measured at cost, less accumulated impairment losses.

6.3 Derecognition

The carrying amount of an item of Heritage Assets is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from the derecognition of an item of Heritage Assets is included in surplus or deficit when the item is derecognised. Gains are not classified as revenue. Gains or losses are calculated as the difference between the carrying value of assets (cost less accumulated impairment losses) and the disposal proceeds is included in the Statement of Financial Performance as a gain or loss on disposal of Heritage Assets.

6.4 Transitional Provisions

The municipality utilised the transitional provisions under Directive 4, which allows 3 years for the measurement of Heritage Assets.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

7. BIOLOGICAL ASSETS

The municipality changed its Accounting Policy from GRAP 101 to GRAP 27 with no effect on the financial information previously disclosed.

A Biological Asset is defined as a living animal or plant. Agricultural Produce is the harvested product of the municipality's Biological Assets.

7.1 Initial Recognition

The cost of an item of Biological Assets is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and if the cost or fair value of the item can be measured reliably.

Biological Assets are initially recognised at fair value less cost to sell on its acquisition date. The fair value of an item of Biological Assets is the transaction price or the market price.

Agricultural Produce is initially recognised at fair value less costs to sell at the date of the harvest. The municipality applies the measurement methods as described in Accounting Policy 11 on Inventories.

7.2 Subsequent Measurement

Subsequently all Biological Assets are measured at fair value less cost to sell on the reporting date. The fair value of an item of Biological Assets is the transaction price or the market price.

A gain or loss arising from the initial recognition of an item of Biological Assets at fair value less cost to sell and from a change in fair value at the reporting date shall be recognised in the Statement of Financial Performance.

A gain or loss arising from the initial recognition of an item of Agricultural Harvest at fair value less estimate point of sale cost at the date of the harvest shall be recognised in the Statement of Financial Performance.

7.3 Derecognition

The carrying amount of an item of Biological Assets is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from the derecognition of an item of Biological Assets is included in the Statement of Financial Performance when the item is derecognised. Gains are not classified as revenue. Gains or losses are calculated as the difference between the carrying value of assets (at fair value) and the disposal proceeds is included in the Statement of Financial Performance as a gain or loss on disposal of Biological Assets.

7.4 Transitional Provisions

The municipality utilised the transitional provisions under Directive 4, which allows 3 years for the measurement of Biological Assets.

8. IMPAIRMENT OF ASSETS

The municipality classifies all assets held with the primary objective of generating a commercial return as *Cash Generating Assets*. All other assets are classified as *Non-cash Generating Assets*.

8.1 Impairment of Cash Generating Assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash generating unit is the higher of its fair value less costs to sell and its value in use. The best evidence of fair value less cost to sell is the price in a binding sale agreement in an arm's length transaction, adjusted for the incremental cost that would be directly attributable to the disposal of the asset.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in the Statement of Financial Performance. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for cash generating units if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in the Statement of Financial Performance. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

8.2 Impairment of Non-cash Generating Assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the non-cash generating unit to which the asset belongs is determined.

The recoverable service amount of a non-cash generating asset is the higher of its fair value less costs to sell and its value in use. The value in use for a non-cash generating asset is the present value of the asset's remaining service potential.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in the Statement of Financial Performance. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for non-cash generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in the Statement of Financial Performance. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

9. FINANCIAL INSTRUMENTS

The municipality has various types of Financial Instruments and these can be broadly categorised as *Financial Assets*, *Financial Liabilities* or *Residual Interests* in accordance with the substance of the contractual agreement. The municipality only recognises a Financial Instrument when it becomes a party to the contractual provisions of the instrument.

Initial Recognition

Financial Assets and Financial Liabilities are recognised on the municipality's Statement of Financial Position when it becomes party to the contractual provisions of the instrument.

The municipality does not offset a Financial Asset and a Financial Liability unless a legally enforceable right to set off the recognised amounts currently exist and the municipality intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Fair Value Methods and Assumptions

The fair values of Financial Instruments are determined as follows:

- The fair values of quoted investments are based on current bid prices.
- If the market for a Financial Asset is not active (and for unlisted securities), the municipality establishes fair value by using
 valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are
 substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and
 relying as little as possible on entity-specific inputs.

The Effective Interest Rate Method

The Effective Interest Method is a method of calculating the amortised cost of a Financial Asset or a Financial Liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the Financial Instrument or, when appropriate, a shorter period to the net carrying amount of the Financial Asset or Financial Liability.

Amortised Cost

Amortised Cost is the amount at which the Financial Asset or Financial Liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation, using the Effective Interest Rate Method of any difference between that initial amount and the maturity amount, and minus any reduction for impairment or uncollectability.

9.1 Financial Assets - Classification

A Financial Asset is any asset that is a cash, a contractual right to receive cash or another financial asset from another entity.

In accordance with GRAP 104 the Financial Assets of the municipality are classified as follows into the three categories allowed by this standard:

- Financial Assets measured at Amortised Cost are non-derivative Financial Assets with fixed or determinable payments that are not quoted in an active market. They are included in Current Assets, except for maturities greater than 12 months, which are classified as Non-current Assets. Financial Assets at Amortised Cost are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition or issue of the Financial Asset. After initial recognition, Financial Assets are measured at amortised cost, using the Effective Interest Rate Method less a provision for impairment.
- Financial Assets measured at Fair Value are financial assets that meet either of the following conditions:
 - (i) Derivatives;
 - (ii) Combined instruments that are designated at fair value;
 - (iii) Instruments held for trading;
 - (iv) Non-derivative Financial Instruments with fixed or determinable payments that are designated at fair value at initial recognition; or
 - (v) Financial Instruments that do not meet the definition of Financial Instruments at Amortised Cost or Financial Instruments at Cost.
- Financial Assets measured at Cost are investments in residual Interest that do not have a quoted market price in an active market and whose fair value cannot be reliably measured.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

The municipality has the following types of Financial Assets as reflected on the face of the Statement of Financial Position or in the Notes thereto:

| Type of Financial Asset | Classification in terms of GRAP 104 |
|---|-------------------------------------|
| Long-term Receivables | Financial Assets at Amortised Cost |
| Receivables from Exchange Transactions | Financial Assets at Amortised Cost |
| Receivables from Non-exchange Transactions | Financial Assets at Amortised Cost |
| Bank, Cash and Cash Equivalents – Call Deposits | Financial Assets at Amortised Cost |
| Bank, Cash and Cash Equivalents – Bank | Financial Assets at Amortised Cost |
| Bank, Cash and Cash Equivalents – Cash | Financial Assets at Fair Value |
| Current Portion of Long-term Receivables | Financial Assets at Amortised Cost |

Cash includes cash-on-hand (including petty cash) and cash with banks (including call deposits). Cash Equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, which are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the Cash Flow Statement, Cash and Cash Equivalents comprise cash-on-hand and deposits held on call with banks, net of bank overdrafts. The municipality categorises Cash and Cash Equivalents as Financial Assets at Amortised Cost.

9.2 Financial Liabilities - Classification

A Financial Liability is a contractual obligation to deliver cash or another Financial Assets to another entity.

There are three main categories of Financial Liabilities, the classification determining how they are measured. Financial Liabilities may be measured at:

- (i) Financial Liabilities measured at Fair Value;
- (ii) Financial Liabilities measured at Amortised Cost; or
- (iii) Financial Liabilities measured at Cost.

The municipality has the following types of Financial Liabilities as reflected on the face of the Statement of Financial Position or in the Notes thereto:

| Type of Financial Asset | Classification in terms of GRAP 104 |
|--|---|
| Long-term Liabilities | Financial Liabilities at Amortised Cost |
| Payables from Exchange Transactions | Financial Liabilities at Amortised Cost |
| Payables from Non-exchange Transactions | Financial Liabilities at Amortised Cost |
| Current Portion of Long-term Liabilities | Financial Liabilities at Amortised Cost |

Financial Liabilities that are measured at Fair Value are Financial Liabilities that are essentially held for trading (i.e. purchased with the intention to sell or repurchase in the short term; derivatives other than hedging instruments or are part of a portfolio of Financial Instruments where there is recent actual evidence of short-term profiteering or are derivatives).

9.3 Initial and Subsequent Measurement

9.3.1 Financial Assets:

Financial Assets measured at Amortised Cost

Financial Assets at Amortised Cost are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the Financial Asset. Subsequently, these assets are measured at amortised cost using the Effective Interest Method less any impairment, with interest recognised on an Effective Yield Basis.

Trade and Other Receivables (excluding Value Added Taxation, Prepayments and Operating Lease receivables), Loans to Municipal Entities and Loans that have fixed and determinable payments that are not quoted in an active market are classified as Financial Assets at Amortised Cost.

Financial Assets measured at Fair Value

Financial Assets at Fair Value are initially measured at fair value, excluding directly attributable transaction costs. They are subsequently measured at fair value with unrealised gains or losses recognised directly in the Statement of Financial Performance.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

9.3.2 Financial Liabilities:

Financial Liabilities measured at Fair Value

Financial Liabilities at Fair Value are stated at fair value, with any resulted gain or loss recognised in the Statement of Financial Performance.

Financial Liabilities held at Amortised Cost

Any other Financial Liabilities are classified as *Other Financial Liabilities* (All Payables, Loans and Borrowings are classified as Other Liabilities) and are initially measured at fair value, net of transaction costs. Trade and Other Payables, Interest-bearing Debt including Finance Lease Liabilities, Non-interest-bearing Debt and Bank Borrowings are subsequently measured at amortised cost using the *Effective Interest Rate Method*. Interest expense is recognised in the Statement of Financial Performance by applying the effective interest rate.

Prepayments are carried at cost less any accumulated impairment losses.

9.4 Impairment of Financial Assets

Financial Assets, other than those at fair value, are assessed for indicators of impairment at the end of each reporting period. Financial Assets are impaired where there is objective evidence of impairment of Financial Assets (such as the probability of insolvency or significant financial difficulties of the debtor). If there is such evidence the recoverable amount is estimated and an impairment loss is recognised in accordance with GRAP 104.

9.4.1 Financial Assets at Amortised Cost

Accounts Receivable encompass Long-term Debtors, Receivables from Exchange Transactions (Consumer Debtors) and Receivables from Non-exchange Transactions (Other Debtors).

Initially Accounts Receivable are valued at fair value plus transaction costs, and subsequently carried at amortised cost using the *Effective Interest Rate Method*. An estimate is made for doubtful debt based on past default experience of all outstanding amounts at year-end. Bad debts are written off the year in which they are identified as irrecoverable. Amounts receivable within 12 months from the date of reporting are classified as current.

A provision for impairment of Accounts Receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The provision is made in accordance with GRAP 104 whereby the recoverability of accounts receivable is assessed individually and then collectively after grouping the assets in financial assets with similar credit risk characteristics. The amount of the provision is the difference between the Financial Asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Future cash flows in a group of Financial Assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Cash flows relating to short-term receivables are not discounted where the effect of discounting is immaterial.

Government accounts are not provided for as such accounts are regarded as receivable.

The carrying amount of the Financial Asset is reduced by the impairment loss directly for all Financial Assets carried at Amortised Cost with the exception of Consumer Debtors, where the carrying amount is reduced through the use of an allowance account. When a Consumer Debtor is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against revenue. Changes in the carrying amount of the allowance account are recognised in the Statement of Financial Performance.

9.4.2 Financial Assets at Cost

If there is objective evidence that an impairment loss has been incurred on an investment in a Residual Interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the Financial Asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses shall not be reversed.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

9.5 Derecognition of Financial Assets

The municipality derecognises Financial Assets only when the contractual rights to the cash flows from the asset expires or it transfers the Financial Asset and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of Financial Assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred Financial Asset, the municipality continues to recognise the Financial Asset and also recognises a collateralised borrowing for the proceeds received.

9.6 Derecognition of Financial Liabilities

The municipality derecognises Financial Liabilities when, and only when, the municipality's obligations are discharged, cancelled or they expire.

The municipality recognises the difference between the carrying amount of the Financial Liability (or part of a Financial Liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, in the Statement of Financial Performance.

10. INVESTMENT IN JOINT VENTURES

A Joint Venture is a contractual arrangement whereby the municipality and the other parties undertake an economic activity that is subject to joint control. Interests in jointly controlled entities are stated at cost.

11. INVENTORIES

11.1 Initial Recognition

Inventories comprise current assets held-for-sale, current assets for consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the Inventories to their current location and condition. Where Inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where Inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Direct costs relating to properties that will be sold as Inventory are accumulated for each separately identifiable development. Costs also include a proportion of overhead costs.

11.2 Subsequent Measurement

11.2.1 Consumable Stores, Raw Materials, Work-in-Progress and Finished Goods

Consumable stores, raw materials, work-in-progress, inventories distributed at no charge or for a nominal charge and finished goods are valued at the lower of cost and net realisable value (net amount that the municipality expects to realise from the sale on Inventory in the ordinary course of business). The cost is determined using the *First-in-First-out Method* for cost of commodities.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

11.2.2 Water Inventory

Water is regarded as Inventory when the municipality purchases water in bulk with the intention to resell it to the consumers or to use it internally, or where the municipality has incurred purification costs on water obtained from natural resources (rain, rivers, springs, boreholes, etc). However, water in dams, that are filled by natural resources and that has not yet been treated, that is under the control of the municipality but cannot be measured reliably as there is no cost attached to the water, is therefore not recognised in the Statement of Financial Position.

The basis of determining the cost of water purchased and not yet sold at Statement of Financial Position date comprises all costs of purchase, cost of conversion and other costs incurred in bringing the Inventory to its present location and condition, net of trade discounts and rebates.

Water and purified effluent are valued by using the *First-in-First-out Method*, at the lowest of purified cost and net realisable value, insofar as it is stored and controlled in reservoirs at year-end.

11.2.3 Other Inventories

Redundant and slow-moving Inventories are identified and written down from cost to net realisable value with regard to their estimated economic or realisable values and sold by public auction. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. Differences arising on the measurement of such Inventory at the lower of cost and net realisable value are recognised in the Statement of Financial Performance in the year in which they arise. The amount of any reversal of any write-down of Inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of Inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of Inventories is recognised as an expense in the period that the Inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

12. NON-CURRENT ASSETS HELD-FOR-SALE

12.1 Initial Recognition

Non-current Assets and Disposal Groups are classified as held-for-sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

12.2 Subsequent Measurement

Non-current Assets and Disposal Groups classified as held-for-sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held-for-sale, or while it is part of a disposal group classified as held-for-sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held-for-sale are recognised in the Statement of Financial Performance.

The gain or loss on the eventual sale of non-current assets held-for-sale is included in the Statement of Financial Performance as gain or loss on sale of assets. The gain or loss on the eventual sale of non-current assets held-for-sale is calculated on the difference between the net disposal proceeds and the carrying amount of the individual asset or the disposal group.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

13. REVENUE RECOGNITION

13.1 General

Revenue is derived from a variety of sources which include rates levied, grants from other tiers of government and revenue from trading activities and other services provided.

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the municipality's activities. Revenue is shown net of value-added tax, returns, rebates and discounts.

The municipality recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits or service potential will flow to the municipality and when specific criteria have been met for each of the municipality's activities as described below, except when specifically stated otherwise. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The municipality bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. Furthermore, services rendered are recognised by reference to the stage of completion of the transaction at the reporting date.

Revenue from Exchange Transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Revenue from Non-exchange Transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

13.2 Revenue from Exchange Transactions

13.2.1 Service Charges

Service Charges are levied in terms of approved tariffs.

Service Charges relating to water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without it being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

Service charges relating to sewerage and sanitation are recognised on a monthly basis in arrears by applying the approved tariff to all properties. Tariffs are determined per category of property usage, and are levied based on the extent of each property.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

13.2.2 Rentals Received

Revenue from the rental of facilities and equipment is recognised on a *Straight-line Basis* over the term of the lease agreement.

13.2.3 Finance Income

Interest earned on investments is recognised in the Statement of Financial Performance on the *Time-proportionate Basis* that takes into account the effective yield on the investment.

Interest earned on the following investments is not recognised in the Statement of Financial Performance:

• Interest earned on unutilised Conditional Grants is allocated directly to the Creditor: Unutilised Conditional Grants, if the grant conditions indicate that interest is payable to the funder.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

13.2.4 Tariff Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licences and permits.

13.2.5 Revenue from Agency Services

Revenue for agency services is recognised on a monthly basis once the revenue collected on behalf of agents has been quantified. The revenue recognised is in terms of the agency agreement.

13.2.6 Sale of Goods (including Houses)

Revenue from the sale of goods is recognised when all the following conditions have been met:

- (a) The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) The amount of revenue can be measured reliably;
- (d) It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- (e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

13.3 Revenue from Non-exchange Transactions

An inflow of resources from a Non-exchange Transaction, that meets the definition of an asset shall be recognised as an asset when it is probable that the future economic benefits or service potential associated with the asset will flow to the municipality and the fair value of the asset can be measured reliably. The asset shall be recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

A present obligation arising from a Non-exchange Transaction that meets the definition of a liability will be recognised as a liability when it is probable that an outflow of economic benefit will be required to settle the obligation and a reliable estimate of the amount can be made.

13.3.1 Public Contributions

Donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Revenue from public contributions is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment are brought into use.

Assets acquired from non-exchange transactions are measured at fair value in accordance with the Standards of GRAP.

13.3.2 Government Grants and Receipts

Conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs, are recognised in the Statement of Financial Performance in the period in which they become receivable.

Interest earned on investments is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest, it is recognised as interest earned in the Statement of Financial Performance.

Revenue is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment are brought into use.

13.3.3 Revenue from Recovery of Unauthorised, Irregular, Fruitless and Wasteful Expenditure

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

14. PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the obligation.

The best estimate of the expenditure required to settle the present obligation is the amount that the municipality would rationally pay to settle the obligation at the reporting date or to transfer it to a third party at that time and are determined by the judgment of the management of the municipality, supplemented by experience of similar transactions and, in some cases, reports from independent experts. The evidence considered includes any additional evidence provided by events after the reporting date. Uncertainties surrounding the amount to be recognised as a provision are dealt with by various means according to the circumstances. Where the provision being measured involves a large population of items, the obligation is estimated by weighting all possible outcomes by their associated probabilities.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision. An onerous contract is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it – this unavoidable cost resulting from the contract is the amount of the provision to be recognised.

Provisions are reviewed at reporting date and the amount of a provision is the present value of the expenditure expected to be required to settle the obligation. When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market assessments of the time value of money. The impact of the periodic unwinding of the discount is recognised in the Statement of Financial Performance as a finance cost as it occurs.

15. EMPLOYEE BENEFIT LIABILITIES

The municipality changed its Accounting Policy from IAS 19 to GRAP 25 with no effect on the financial information previously disclosed.

15.1 Short-term Employee Benefits

Remuneration to employees is recognised in the Statement of Financial Performance as the services are rendered, except for non-accumulating benefits which are only recognised when the specific event occurs.

The municipality has opted to treat its provision for leave pay as an accrual.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service. The liability for leave pay is based on the total accrued leave days at year end and is shown as a creditor in the Statement of Financial Position. The municipality recognises the expected cost of performance bonuses only when the municipality has a present legal or constructive obligation to make such payment and a reliable estimate can be made.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

15.2 Post-employment Benefits

The municipality provides retirement benefits for its employees and councillors, and has both defined benefit and defined contribution post-employment plans.

15.2.1 Defined Contribution Plans

A **Defined Contribution Plan** is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees. The municipality has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

15.2.2 Defined Benefit Plans

A **Defined Benefit Plan** is a post-employment benefit plan other than a defined contribution plan.

Post-retirement Health Care Benefits

The municipality has an obligation to provide Post-retirement Health Care Benefits to certain of its retirees. According to the rules of the Medical Aid Funds with which the municipality is associated, a member (who is on the current Conditions of Service), on retirement, is entitled to remain a continued member of the Medical Aid Fund, in which case the municipality is liable for a certain portion of the medical aid membership fee. Not all Medical Aid Funds with which the Municipality is associated, provide for continued membership.

The defined benefit liability is the aggregate of the present value of the defined benefit obligation and unrecognised actuarial gains and losses, reduced by unrecognised past service costs. The plan is unfunded. The present value of the defined benefit obligation is calculated using the *Projected Unit Credit Method*, incorporating actuarial assumptions and a discount rate based on the government bond rate. Valuations of these obligations are carried out annually by independent qualified actuaries.

Actuarial gains or losses are recognised immediately in the Statement of Financial Performance.

Past-service costs are recognised immediately in the Statement of Financial Performance.

Long-service Allowance

The municipality has an obligation to provide Long-service Allowance Benefits to all of its employees. According to the rules of the Long-service Allowance Scheme, which the municipality instituted and operates, an employee (who is on the current Conditions of Service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 10, 15, 20, 25 and 30 years of continued service. The municipality's liability is based on an actuarial valuation. The *Projected Unit Credit Method* is used to value the liabilities. Actuarial gains and losses on the long-term incentives are accounted for through the Statement of Financial Performance.

Provincially-administered Defined Benefit Plans

The municipality contributes to various National- and Provincial-administered Defined Benefit Plans on behalf of its qualifying employees. These funds are multi-employer funds. The contributions to fund obligations for the payment of retirement benefits are charged against revenue in the year they become payable. These defined benefit funds are actuarially valued triennially on the Projected Unit Credit Method basis. Deficits are recovered through lump sum payments or increased future contributions on a proportional basis from all participating municipalities.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

Defined Benefit Pension Plans

The municipality has an obligation to provide Post-retirement Pension Benefits to certain of its retirees. Pension contributions in respect of employees who were not members of a pension fund are recognised as an expense when incurred. Staff provident funds are maintained to accommodate personnel who, due to age, cannot join or be part of the various pension funds. The municipality contributes monthly to the funds.

The liability recognised in the Statement of Financial Position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets, together with adjustments for unrecognised past-service costs. The defined benefit obligation is calculated annually by independent actuaries using the *Projected Unit Credit Method*. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains or losses are recognised immediately in the Statement of Financial Performance.

Past-service costs are recognised immediately in the Statement of Financial Performance.

16. LEASES

16.1 Classification

Leases are classified as **Finance Leases** where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality.

Leases of property, plant and equipment, in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as **Operating Leases**.

16.2 The Municipality as Lessee

16.2.1 Finance Leases

Where the municipality enters into a finance lease, property, plant and equipment or intangible assets subject to finance lease agreements are capitalised at amounts equal to the fair value of the leased asset or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Corresponding liabilities are included in the Statement of Financial Position as Finance Lease Liabilities. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset, plus any direct costs incurred. Lease payments are allocated between the finance cost and the capital repayment using the *Effective Interest Rate Method*. Finance costs are expensed when incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant and equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the finance cost and the capital repayment using the *Effective Interest Rate Method*. Finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

16.2.2 Operating Leases

The municipality recognises operating lease rentals as an expense in the Statement of Financial Performance on a *Straight-line Basis* over the term of the relevant lease. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a *Straight-line Basis*, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

16.3 Determining whether an Arrangement contains a Lease

At inception of an arrangement, the municipality determines whether such an arrangement is, or contains a lease. A specific asset is the subject of a lease if fulfilment of the arrangement is dependent on the use of that specified asset. An arrangement conveys the right to use the asset if the arrangement conveys to the municipality the right to control the use of the underlying asset. At inception, or upon reassessment of the arrangement, the municipality separates payments and other considerations required by such an arrangement into those for the lease and those for other elements on the basis of their relative fair values. If the municipality concludes for a finance lease that it is impracticable to separate the payments reliably, an asset and a liability are recognised at an amount equal to the fair value of the underlying asset. Subsequently the liability is reduced as payments are made and an imputed finance charge on the liability is recognised using the municipality's incremental borrowing rate.

17. GRANTS-IN-AID

The municipality transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the municipality does not:

- (a) Receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- (b) Expect to be repaid in future; or
- (c) Expect a financial return, as would be expected from an investment.

These transfers are recognised in the Statement of Financial Performance as expenses in the period that the events giving rise to the transfer occurred.

18. VALUE ADDED TAX

The municipality accounts for Value Added Tax on the Payments Basis in accordance with section15(2)(a) of the Value-Added Tax Act (Act No 89 of 1991).

19. UNAUTHORISED EXPENDITURE

Unauthorised Expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state, and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No 56 of 2003). All expenditure relating to Unauthorised Expenditure is accounted for as an expense in the Statement of Financial Performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

20. IRREGULAR EXPENDITURE

Irregular Expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No 56 of 2003), the Municipal Systems Act (Act No 32 of 2000), the Public Office Bearers Act (Act No 20 of 1998), or is in contravention of the Municipality's or Municipal Entities' Supply Chain Management Policies. Irregular Expenditure excludes Unauthorised Expenditure. Irregular Expenditure is accounted for as an expense in the Statement of Financial Performance in the period it occurred and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

21. FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and Wasteful Expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. All expenditure relating to Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

22. CHANGES IN ACCOUNTING POLICIES, ESTIMATES AND ERRORS

Changes in Accounting Policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impractical to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality restated the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practical. Details of Changes in Accounting Policies are disclosed in the Notes to the Annual Financial Statements where applicable.

Changes in Accounting Estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the Notes to the Annual Financial Statements where applicable.

Correction of Errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impractical to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practical. Details of Correction of Errors are disclosed in the Notes to the Annual Financial Statements where applicable.

23. TREATMENT OF ADMINISTRATION AND OTHER OVERHEAD EXPENSES

The costs of internal support services are transferred to the various services and departments to whom resources are made available.

24. CONTINGENT ASSETS AND CONTINGENT LIABILITIES

Contingent Liabilities represent a possible obligation that arises from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality. A contingent liability can also arise as a result of a present obligation that arises from past events but which is not recognised as a liability either because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

Contingent Assets represent possible assets that arise from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

Contingent Assets and Contingent Liabilities are not recognised. Contingencies are disclosed in Notes to the Annual Financial Statements.

25. COMMITMENTS

Commitments are future expenditure to which the municipality committed and that will result in the outflow of resources. Commitments are not recognised in the Statement of Financial Position as a liability or as expenditure in the Statement of Financial Performance, but are included in the disclosure Notes. A distinction is made between capital and current commitments.

Commitments are disclosed for:

- Approved and contracted commitments, where the expenditure has been approved and the contract has been awarded at the reporting date, where disclosure is required by a specific standard of GRAP.
- Approved but not yet contracted commitments, where the expenditure has been approved and the contract has yet to be awarded or is awaiting finalisation at the reporting date.
- Items are classified as commitments where the municipality commits itself to future transactions that will normally result in the outflow of resources.
- Contracts that are entered into before the reporting date, but goods and services have not yet been received are disclosed in the disclosure Notes to the Annual Financial Statements.
- Other commitments for contracts that are non-cancellable or only cancellable at significant cost, should relate to something other than the business of the municipality.

ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2014

26. RELATED PARTIES

The municipality changed its Accounting Policy from IPSAS 20 to GRAP 20 with no effect on the financial information previously

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Management is regarded as a related party and comprises the Councillors, Mayor, Executive Committee Members, Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

27. EVENTS AFTER THE REPORTING DATE

Events after the reporting date that are classified as adjusting events have been accounted for in the Annual Financial Statements. The events after the reporting date that are classified as Non-adjusting Events after the Reporting Date have been disclosed in Notes to the Annual Financial Statements.

28. COMPARATIVE INFORMATION

28.1 Current Year Comparatives

In accordance with GRAP 1 Budgeted Amounts have been provided and forms part of the Annual Financial Statements.

28.2 Prior Year Comparatives

When the presentation or classification of items in the Annual Financial Statements is amended, prior period comparative amounts are reclassified. The nature and reason for the reclassification is disclosed.

28.3 Budget Information

The annual budget figures have been prepared in accordance with the GRAP standard and are consistent with the Accounting Policies adopted by the Council for the preparation of these Annual Financial Statements. The amounts are scheduled as a separate additional financial statement, called the Statement of Comparison of Budget and Actual amounts. Explanatory comment is provided in the statement giving reasons for overall growth or decline in the budget and motivations for over- or under spending on line items. The annual budget figures included in the Annual Financial Statements are for the municipality and do not include budget information relating to subsidiaries or associates. These figures are those approved by the Council at the beginning and during the year following a period of consultation with the public as part of the Integrated Development Plan. The budget is approved on an accrual basis by nature classification.

The approved budget covers the period from 1 July 2013 to 30 June 2014.

2014 2013 R R

1. GENERAL INFORMATION

OR Thambo District Municipality (the municipality) is a local government institution in Mthatha, Eastern Cape Province, and has 5 local municipalities under its jurisdiction. The addresses of its registered office and principal place of business are disclosed under "General Information" included in the Annual Financial Statements and in the introduction of the Annual Report. The principal activities of the municipality are disclosed in the Annual Report and are prescribed by the Municipal Finance Management Act (MFMA).

2. INVENTORIES

| Total Inventories | 37 172 755 | 19 539 706 |
|-------------------|------------|------------|
| Water - at cost | 746 822 | 368 739 |
| Consumable Stores | 36 425 933 | 19 170 967 |

Inventories are held for own use and measured at the lower of Cost and Current Replacement Cost. No write downs of Inventory to Net Realisable Value were required.

The cost of water production for the year amounted to R4,48 per kilolitre (2013: R3,82 per kilolitre).

No Inventories have been pledged as collateral for Liabilities of the municipality.

3. RECEIVABLES FROM EXCHANGE TRANSACTIONS

| | Gross Balances R | Provision for Impairment R | Net Balances R |
|--|------------------------|----------------------------------|----------------------|
| As at 30 June 2014 | | | •• |
| Service Debtors: | 275 612 080 | 232 451 681 | 43 160 399 |
| Sewerage | 50 020 235 | 42 187 149 | 7 833 087 |

| Total Receivables from Exchange Transactions | 340 846 886 | 295 710 144 | 45 136 742 |

Other Receivables include outstanding debtors for various other services, e.g. Deposits, Interest, Rentals and Sundry Services like Dumping Fees, Impounding Fees, etc.

Receivables from Exchange Transactions are billed monthly, latest end of month. No interest is charged on Receivables until the end of the following month. Thereafter interest is charged at a rate determined by council on the outstanding balance. The municipality strictly enforces its approved credit control policy to ensure the recovery of Receivables.

The municipality receives applications that it processes. Deposits are required to be paid for all water accounts opened. There are no consumers who represent more than 5% of the total balance of Receivables.

At 30 June 2014, the municipality is owed R13 124 480 (30 June 2013: R26 651 252) by National and Provincial Government.

The municipality did not pledge any of its Receivables as security for borrowing purposes.

| 3.3 Reconciliation of the Provision for Impairment | | | | |
| Balance at beginning of year | | | 295 710 144 | 222 278 012 |
| Impairment Losses recognised | | | 35 636 005 | 73 636 005 |
| Impairment Losses reversed | | | - | - |
| Amounts written off as uncollectable | | | - | (203 873) |
| Balance at end of year | | | 331 346 149 | 295 710 144 |

In determining the recoverability of Receivables, the municipality has placed strong emphasis on verifying the indigent status of consumers. Provision for impairment of Receivables has been made for all consumer balances outstanding based on the payment ratio over 12 months per service type. No further credit provision is required in excess of the Provision for Impairment.

No provision has been made in respect of government debt as these amounts are considered to be fully recoverable.

3.5 Derecognition of Financial Assets

No Financial Assets have been transferred to other parties during the year.

2014 2013 R R

4. RECEIVABLES FROM NON-EXCHANGE TRANSACTIONS

Included in **Payments made in Advance** for 2013 is and amount of R162 186 348 which is in respect of the purchase of steel coils from Metal Steel. The fabrication and testing of the steel pipes from the coils will be performed from the month of October 2013 to January 2014. The delivery will also be done on site accordingly. This amount was paid to Amathola Water under the KSD Presidential Intervention Project.

Short-term Loans mainly comprise temporary advances made to local municipalities which are repayable within 12 months.

Sundry Deposits are in respect of cash deposits made to Caltex for the supply of fuel and uMgungundlovu District Municipality for the supply of water.

Sundry Debtors are in respect of debits outstanding at year-end on normal business transactions entered into by the municipality.

The municipality does not hold deposits or other security for its Receivables.

None of the Receivables have been pledged as security for the municipality's financial liabilities.

The Provision for Impairment on Receivables exists predominantly due to the possibility that these debts will not be recovered. Loans and receivables were assessed individually and grouped together at the Statement of Financial Position as financial assets with similar credit risk characteristics and collectively assessed for impairment.

| | | R | R |
|----|---|---------------------------|---------------------------|
| | In determining the recoverability of Receivables from Non-exchange Transactions, the municipality considers any change in the credit quality of the Debtor from the date credit was initially granted up to the reporting date. The concentration of credit risk is limited due to the customer base being large and unrelated. Accordingly, the management believe that there is no further credit provision required in excess of the Provision for Impairment. | | |
| | No Provision for Impairment has been made in respect of government debt as these amounts are considered to be fully recoverable. | | |
| | The following Loans and Receivables are included in the total amount of the Provision for Impairment: | | |
| | Government Subsidy Claims Sundry Debtors | 82 961 653 730 099 | 82 961 653 730 099 |
| | Total Provision for Impairment on Receivables from Non-exchange Transactions | 83 691 752 | 83 691 752 |
| 5. | VAT RECEIVABLE | | |
| | Vat Receivable | 52 726 545 | 72 903 976 |
| | Vat is payable on the receipts basis. Only once payment is received from debtors, VAT is paid over to SARS. | | |
| | No interest is payable to SARS if the VAT is paid over timeously, but interest for late payments is charged according to SARS policies. The municipality has financial risk policies in place to ensure that payments are affected before the due date. | | |
| 6. | CASH AND CASH EQUIVALENTS | | |
| | Current Investments Bank Accounts | 142 579 981 61 675 089 | 181 839 169 11 244 822 |
| | Total Bank, Cash and Cash Equivalents | 204 255 070 | 193 083 992 |
| | For the purposes of the Statement of Financial Position and the Cash Flow Statement, Cash and Cash Equivalents include Cash-on-Hand, Cash in Banks and Investments in Money Market Instruments, net of outstanding Bank Overdrafts. | | |
| | 6.1 Current Investment Deposits | | |
| | Call Deposits | 142 579 981 | 181 839 169 |
| | Total Current Investment Deposits | 142 579 981 | 181 839 169 |
| | Call Deposits are investments with a maturity period of less than 3 months and earn interest rates varying from 4,50 % to 5,00 % (2013: 4,40% to 4,50%) per annum. | | |
| | Deposits attributable to Unspent Conditional Grants Deposits attributable to Creditors Deposits attributable to Current Provisions | 25 589 557 116 990 424 | 181 839 169 |

| Total Bank Accounts | 61 675 089 | 11 244 822 |
| Total Balik Accounts | 01073009 | 11 244 022 |
| The Municipality has the following bank accounts: | | |
| Primary Bank Account | | |
| First National Bank - York Road Branch, Mthatha - Account Number 539 9013 7772: | | |
| Cash book balance at beginning of year | 11 244 822 | 25 039 960 |
| Cash book balance at end of year | 61 675 089 | 11 244 822 |
| Bank statement balance at beginning of year | 244 251 261 | 46 066 804 |
| Bank statement balance at end of year | 150 891 137 | 244 251 261 |

The municipality does not have any overdrawn current account facilities with its banker and therefore does not incur interest on overdrawn current accounts. Interest is earned at different rates per annum on favourable balances.

The municipality did not pledge any of its Cash and Cash Equivalents as collateral for its financial liabilities.

No restrictions have been imposed on the municipality in terms of the utilisation of its Cash and Cash Equivalents.

9 PROPERTY, PLANT AND EQUIPMENT (Continued)

Other movements of Property, Plant and Equipment are in respect of Work-in-Progress completed and transferred to Cost.

The leased Property, Plant and Equipment is secured as set out in Note 18.

2014 2013 R R

7 PROPERTY, PLANT AND EQUIPMENT (Continued)

7.1 Gross Carrying Amount of Property, Plant and Equipment that is fully depreciated and still in use

There are no Property, Plant and Equipment that is fully depreciated at year-end and still in use by the municipality.

7.2 Carrying Amount of Property, Plant and Equipment retired from active use and held for disposal

No Property, Plant and Equipment were retired from active use and held for disposal during the financial year.

7.3 Assets pledged as security

The municipality did not pledge any of its assets as security.

The municipality's obligations under Finance Leases (see Note 18) are secured by the lessors' title to the leased assets. No other assets of the municipality have been pledged as security.

7.4 Impairment of Property, Plant and Equipment

No impairment losses have been recognised on Property, Plant and Equipment of the municipality at the reporting date.

7.5 Change in Estimate - Useful Life of Property, Plant and Equipment reviewed

There was no change (2012/13: R0) in the estimated useful life of various assets of the municipality for the financial year.

7.6 Land and Buildings carried at Fair Value

The municipality's Land and Buildings are accounted for according to the revaluation model and revalued every 5 years. No revaluations were performed in the current and prior years.

The revaluation surplus was credited to the Revaluation Reserve in Net Assets.

7.7 Revaluation Surplus

The Revaluation Reserve arises on the revaluation of Land and Buildings. Where revalued Land or Buildings are sold, the portion of the Revaluation Reserve that relates to that asset, and is effectively realised, is transferred directly to Accumulated Surplus.

The Revaluation Surplus is reconciled as follows:

| Balance at end of year | 68 329 926 | 68 329 926 |
|---|------------|------------|
| Depreciation offset to Income Statement | - | - |
| Transfers and Disposals | - | - |
| Surplus / (Deficit) realised from Revaluation | - | - |

| Accumulated Amortisation | (2 172 810) | (5 797 518) | (7 970 328) |

The amortisation expense has been included in the line item "Depreciation and Amortisation" in the Statement of Financial Performance (see Note 30).

All of the municipality's Intangible Assets are held under freehold interests and no Intangible Assets had been pledged as security for any liabilities of the municipality.

No restrictions apply to any of the Intangible Assets of the municipality.

8.1 Significant Intangible Assets

Significant Intangible Assets, that did not meet the recognition criteria for Intangible Assets as stipulated in GRAP 102 and SIC 32, are the following:

(i) Website Costs incurred during the last two financial years, if applicable, have been expensed and not recognised as Intangible Assets. The municipality cannot demonstrate how its website will generate probable future economic benefits.

| 2014 | 2013 |
|------|------|
| R | R |

8.2 Intangible Assets with Indefinite Useful Lives

The municipality amortises all its Intangible Assets and no of such assets are regarded as having indefinite useful lives.

The useful lives of the Intangible Assets remain unchanged from the previous year.

Amortisation is charged on a straight-line basis over the Intangible Assets' useful lives.

8.3 Impairment of Intangible Assets

No impairment losses have been recognised on Intangible Assets of the municipality at the reporting

| 2014 | 2013 |
|------|------|
| R | R |

Fruit Trees in Plantation and livestock classified as Bearer Biological Assets at carying value are made up as follows:

| | Actual Count | | | |
|--|--------------|--------|------------|-----------|
| | 2014 | 2013 | | |
| Trees in Plantation | 19 345 | 11 376 | 9 672 500 | 3 981 600 |
| Cattle | 1 139 | 997 | 6 428 721 | 5 862 540 |
| Total gain / (loss) on initial recognition | 20 484 | 12 373 | 16 101 221 | 9 844 140 |

Bearer Biological Assets are those biological assets that are used repeatedly or continuously for more than one year in an agricultural activity.

At 30 June 2014 livestock held for sale comprised 1 139 cattle (2013: 997 cattle). During the year the municipality sold 18 cattle (2013: 26 cattle).

11.1 Biological Assets carried at Fair Value

The municipality's Biological Assets is valued annually at 30 June at fair value by an independent, professionally qualified, valuer. The valuation, which conforms to International Valuation Standards, is arrived at by reference to market evidence of transaction prices for similar assets.

| Total Payables | 149 807 607 | 179 381 489 |

Included in Other Creditors is an amount of R50 272 484, which relates to Department of Water Affairs (DWA) outstanding invoices. This balance was identified subsequent to the preparation of the Annual Financial Statements in 2013 and was considered to be an adjusting subsequent event. The municipality is intending on engaging directly with DWA leadership on this matter.

The average credit period on purchases is 49 (2013: 85) days, as opposed to 30 days from the receipt of the invoice as determined by the MFMA.

No interest is charged for the first 30 days from the date of receipt of the invoice. Thereafter interest is charged in accordance with the credit policies of the various individual creditors that the municipality deals with. The municipality has policies in place to ensure that all payables are paid within the credit

The municipality did not default on any payment of its Creditors. No terms for payment have been renegotiated by the municipality.

16 PAYABLES FROM NON-EXCHANGE TRANSACTIONS

| Total Payables | 231 524 952 | 85 124 049 |
|----------------------------|-------------|------------|
| Suspense Accounts | 195 769 835 | 53 820 224 |

| Staff Bonuses | 5 681 399 | 5 327 256 |
| Income Received in Advance | 2 250 158 | 2 250 158 |

Staff Bonuses accrue to the staff of the entity on an annual basis, subject to certain conditions. The provision is an estimate of the amount due at the reporting date.

Staff Leave accrues to the staff of the municipality on an annual basis, subject to certain conditions. The provision is an estimate of the amount due at the reporting date.

No credit period exists for Payables from Non-exchange Transactions, neither has any credit period been arranged. No interest is charged on outstanding amounts.

The municipality did not default on any payment of its Creditors. No terms for payment have been renegotiated by the municipality.

17 UNSPENT CONDITIONAL GRANTS AND RECEIPTS

17.1 Conditional Grants from Government 25 589 557 195 302 702 National Government Grants 19 105 108 187 935 839 Provincial Government Grants 6 484 448 7 366 863

Total Conditional Grants and Receipts

The Unspent Conditional Grants and Receipts are invested in investment accounts until utilised.

See Note 23 for the reconciliation of Grants from Government. The Unspent Grants are cash backed by term deposits. The municipality complied with the conditions attached to all grants received to the extent of revenue recognised. No grants were withheld.

| Transfer to Current Provisions | (1 335 241) | (1 803 206) |
| Total Long Service Awards Liability | 11 069 741 | 8 117 136 |

The municipality operates an unfunded defined benefit plan for all its employees. Under the plan, a Long-service Bonus Award is payable after 5 years of continuous service, and every 5 years of continuous service thereafter to 45 years, to employees. The provision is an estimate of the long-service based on historical staff turnover. No other long-service benefits are provided to employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2014 by Mr C Weiss, Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

At year end, 849 (2013: 897) employees were eligible for Long-service Awards.

19

The Current-service Cost for the year ending 30 June 2014 is estimated to be R1 578 657, whereas the cost for the ensuing year is estimated to be R1 820 769 (30 June 2013: R1 535 903 and R1 578 657 respectively).

39 CHANGE IN ACCOUNTING POLICY

The municipality adopted the following Accounting Standards for the first time during the financial year 2013/14 in order to comply with the basis of preparation of the Annual Financial Statements as disclosed in Accounting Policy 1:

- GRAP 25 Employee Benefits

39.1 GRAP 20 - Related Parties

The municipality opted to develop an Accounting Policy based on GRAP 20, Related Parties.

The municipality has developed Accounting Policies to fully comply with GRAP 20 (*Related Parties*). Previously the municipality used the principles set out in IPSAS 20 to account for related parties. Management has evaluated the requirements of the Standard and it was found that no adjustments need to be made.

39.2 GRAP 25 - Employee Benefits

The Accounting Standard for *Employee Benefits* has been recognised in the Annual Financial Statements of the municipality as at 30 June 2014 in terms of GRAP 25.

The municipality has developed Accounting Policies to fully comply with GRAP 25 (*Employee Benefits*). Previously the municipality used the principles set out in IAS 19 to account for employee benefits. GRAP 25 is applied prospectively and there is no need for restatement of prior year figures as the principles in GRAP 25 and IAS 19 are similar.

The above-mentioned changes in Accounting Policies had no effect on the Accumulated Surplus as at 30 June 2013 and the Accumulated Surplus of prior years was not affected either.

2014 2013 R R

40 CORRECTION OF ERROR

Corrections were made during the previous financial years. Details of the corrections are described below:

40.1 Reclassification of Accumulated Surplus

The prior year figures of Accumulated Surplus has been restated to correctly disclose the monies held by the municipality in terms of the disclosure notes indicated below.

The effect of the changes are as follows:

| | | Accumulated Surplus |
|--|--------------|------------------------|
| Balances published as at 30 June 2012 | | 2 060 247 266 |
| Correction of Error:- | | |
| Revaluation Reserve reclassified | (68 329 926) | |
| Restatement of Infrastructure Assets | 803 040 145 | |
| Restatement of Other Assets | (47 137 408) | 687 572 812 |
| Restated Balances as at 30 June 2012 | | 2 747 820 078 |
| Transactions incurred for the Year 2012/13 | | 332 823 068 |

Property Rates:

The prior year amounts for *Property Rates* and Payables have been restated to correctly disclose the revenue for Property Rates, previously raised in error.

Rental of Facilities and Equipment:

The prior year amounts for *Rental of Facilities and Equipment* and Payables have been restated to correctly disclose the revenue for rental for halls exempted, previously raised in error.

Furthermore, the prior year amounts for *Rental of Facilities & Equipment*, Contracted Services and General Expenses have been restated to correctly disclose the revenue for rental of the plantation, expenditure previously netted off against income.

Interest Earned - External Investments:

The prior year amounts for *Interest Earned on External Investments* and Accumulated Surplus have been restated to correctly disclose the revenue for Interest Earned on investments of the Housing Development Fund in terms GRAP 1.114, previously credited directly to Net Assets.

Government Grants and Subsidies Received:

The prior year amounts for *Government Grants and Subsidies Received* and Infrastructure Assets have been restated to correctly disclose the revenue for Government Grants, expenditure for infrastructure assets previously incorrectly recorded.

Furthermore, the prior year amounts for *Government Grants and Subsidies Received* and Other Assets have been restated to correctly disclose the revenue for Government Grants, expenditure for infrastructure assets previously incorrectly recorded.

2014 2013 R R

40.3 Reclassification of Expenditure

The prior year figures of Expenditure Classes have been restated to correctly classify the nature of Expenditure of the municipality.

The effect of the Correction of Error is as follows:

| | Prior Year 2012/13 | Current Year 2012/13 | Restated |
|---|-----------------------|-------------------------|--------------|
| | Expenditure | Expenditure | Amount |
| Employee Related Costs | 231 595 042 | 227 482 673 | 4 112 369 |
| Remuneration of Councillors | 13 906 369 | 11 498 076 | 2 408 293 |
| Depreciation and Amortisation | 176 514 978 | 136 140 349 | 40 374 629 |
| Impairment Losses | 95 262 793 | 80 157 706 | 15 105 087 |
| Repairs and Maintenance | 61 862 724 | 58 037 423 | 3 825 301 |
| Finance Costs | 965 123 | 965 123 | - |
| Bulk Purchases | 79 113 383 | 78 243 815 | 869 568 |
| Contracted Services | 9 193 434 | 20 102 135 | (10 908 701) |
| Grants and Subsidies Paid | 61 723 867 | 77 074 698 | (15 350 832) |
| General Expenses | 469 337 076 | 459 357 567 | 9 979 509 |
| Other Losses on Continued Operations | 1 257 144 | 5 568 333 | (4 311 189) |
| Loss on Disposal of Property, Plant and Equipment | 132 204 | 685 929 | (553 725) |
| Surplus / (Deficit) for the Year | 335 901 068 | 392 817 988 | (56 916 920) |
| | 1 536 765 204 | 1 548 131 816 | (11 366 612) |

Prior year amounts of items in **Expenditure** included in the Statement of Financial Performance have been restated as indicated below:

| | Employee Costs | Remuneration Councillors | Depreciation & Amortisation | Impairment Losses |

46.7 Non-Compliance with the Municipal Finance Management Act

No known matters existed at reporting date.

46.8 Deviation from, and ratification of minor breaches of, the Procurement Processes

In terms of section 36(2) of the Municipal Supply Chain Management Regulations approved by the council, any deviation from the Supply Chain Management Policy needs to be approved / condoned by the Municipal Manager, noted by Council and bids where the formal procurement processes could not be followed must be noted in the Annual Financial Statements.

The following deviations from the tender stipulations in terms of the municipality's Supply Chain Management Policy were ratified by the Municipal Manager and reported to Council:

| Department | Date | Successful Tenderer | Reason | Amount |
|---|--------------------------|-------------------------------------|---|--------------|
| Various Departments | Year 2013/14 | Various occasions (4) | Emergency cases | 242 247.96 |

46.9 Bulk Water Losses in terms of Section 125 (2)(d)(i) of the MFMA

Material Water Losses were as follows and are not recoverable:

Water:

| | | Lost Units | Tariff | Value |
|--------------|--------------------------|------------|--------|------------|
| 30 June 2014 | Unaccounted Water Losses | 6 585 646 | 4.4800 | 29 503 692 |
| 30 June 2013 | Unaccounted Water Losses | 6 262 130 | 3.8200 | 23 921 337 |

Water Losses occur due to *inter alia*, leakages, the tampering of meters, the incorrect ratios used on bulk meters, faulty meters and illegal water connections. The problem with tampered meters and illegal connections is an ongoing process, with regular action being taken against defaulters. Faulty meters and leakages are replaced/repaired as soon as they are reported.

2014 2013 R R

FINANCIAL LIABILITIES:

In accordance with GRAP 104.13 the Financial Liabilities of the municipality are classified as follows:

| Financial Liabilities | <u>Classification</u> | | |
|--|------------------------------|-------------|-------------|
| Long-term Liabilities | | | |
| Finance Lease Liabilities | Amortised cost | 583 753 | 638 202 |
| Payables from Exchange Transactions | | | |
| Payments Received in Advance | Amortised cost | 4 836 750 | 3 655 293 |
| Trade Creditors | Amortised cost | 271 734 | 232 994 |
| Other Creditors | Amortised cost | 108 860 355 | 143 364 927 |
| VAT Income Suspense Account | Amortised cost | 35 838 768 | 32 128 275 |
| Payables from Non-exchange Transactions | | | |
| Income Received in Advance | Amortised cost | 2 250 158 | 2 250 158 |
| Staff Bonuses | Amortised cost | 5 681 399 | 5 327 256 |
| Staff Leave | Amortised cost | 27 823 560 | 23 726 411 |
| Suspense Accounts | Amortised cost | 195 769 835 | 53 820 224 |

| Total Financial Liabilities | | 382 344 463 | 266 018 116 |

48.2 Fair Value

The following methods and assumptions were used to estimate the Fair Value of each class of Financial Instrument for which it is practical to estimate such value:

<u>Cash</u>

The carrying amount approximates the Fair Value because of the short maturity of these instruments.

Long-term Investments

The Fair Value of some Investments are estimated based on quoted market prices of those or similar investments. Unlisted Equity Investments are estimated using the discounted cash flow method.

Loan Receivables/Payables

Interest-bearing Borrowings and Receivables are generally at interest rates in line with those currently available in the market on a floating-rate basis, and therefore the Fair Value of these Financial Assets and Liabilities closely approximates their carrying values. Fixed interest-rate instruments are fair valued based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date.

| 2014 | 2013 |
|------|------|
| R | R |

Trade and Other Receivables/Payables

The Fair Value of Trade and Other Payables is estimated at the present value of future cash flows.

The management of the municipality is of the opinion that the carrying value of Trade and Other Receivables recorded at amortised cost in the Annual Financial Statements approximate their fair values. The Fair Value of Trade Receivables were determined after considering the standard terms and conditions of agreements entered into between the municipality and other parties as well as the current payment ratios of the municipality's debtors.

Other Financial Assets and Liabilities

The Fair Value of Other Financial Assets and Financial Liabilities (excluding Derivative Instruments) is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

Long-term Liabilities

The Fair Value of Long-term Liabilities was determined after considering the standard terms and conditions of agreements entered into between the municipality and the relevant financing institutions.

Management considers the carrying amounts of Financial Assets and Financial Liabilities recorded at amortised cost in the Annual Financial Statements to approximate their Fair Values on 30 June 2014, as a result of the short-term maturity of these assets and liabilities.

No Financial Instruments of the municipality have been reclassified during the year.

48.3 Capital Risk Management

The municipality manages its capital to ensure that the municipality will be able to continue as a going concern while delivering sustainable services to consumers through the optimisation of the debt and equity balance. The municipality's overall strategy remains unchanged from 2010.

The capital structure of the municipality consists of debt, which includes Cash and Cash Equivalents and Equity, comprising Funds, Reserves and Accumulated Surplus as disclosed in Note 21 and the Statement of Changes in Net Assets.

Gearing Ratio

| | 2014 | 2013 |
|---|---------------|---------------|
| | R | R |
| The gearing ratio at the year-end was as follows: | | |
| Debt | 1 011 904 | 1 512 578 |
| Cash and Cash Equivalents | (204 255 070) | (193 083 992) |
| Net Debt | (203 243 165) | (191 571 414) |
| Equity | 3 560 661 281 | 3 208 967 994 |
| Net debt to equity ratio | -5.71% | -5.97% |

Debt is defined as Long-term Liabilities, together with its Short-term Portion.

Equity includes all Funds and Reserves of the municipality, disclosed as Net Assets in the Statement of Financial Performance and Net Debt as described above.

2014 2013 R R

48.4 Financial Risk Management Objectives

The Accounting Officer has overall responsibility for the establishment and oversight of the municipality's risk management framework. The municipality's risk management policies are established to identify and analyse the risks faced by the municipality, to set appropriate risk limits and controls and to monitor risks and adherence to limits.

Due to the largely non-trading nature of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities. Financial Instruments play a much more limited role in creating or changing risks that would be typical of listed companies to which the IAS's mainly apply. Generally, Financial Assets and Liabilities are generated by day-to-day operational activities and are not held to manage the risks facing the municipality in undertaking its activities.

The Department Financial Services monitors and manages the financial risks relating to the operations through internal policies and procedures. These risks include interest rate risk, credit risk and liquidity risk. Compliance with policies and procedures is reviewed by the internal auditors on a continuous basis, and annually by external auditors. The municipality does not enter into or trade financial instruments for speculative purposes.

Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, reports periodically to the municipality's audit committee, an independent body that monitors the effectiveness of the internal audit function.

Further quantitative disclosures are included throughout these Annual Financial Statements.

48.5 Significant Risks

It is the policy of the municipality to disclose information that enables the user of its Annual Financial Statements to evaluate the nature and extent of risks arising from Financial Instruments to which the municipality is exposed on the reporting date.

The municipality has exposure to the following risks from its operations in Financial Instruments:

- Credit Risk;
- Liquidity Risk; and
- Market Risk.

Risks and exposures are disclosed as follows:

Market Risk

Market Risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the municipality's income or the value of its holdings in Financial Instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Credit Risk

Credit Risk is the risk of financial loss to the municipality if a customer or counterparty to a Financial Instrument fails to meet its contractual obligations and arises principally from the municipality's receivables from customers and investment securities.

Liquidity Risk

Liquidity Risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its Financial Liabilities that are settled by delivering cash or another financial asset. The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation.

Liquidity Risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met.

A maturity analysis for Financial Liabilities (where applicable) that shows the remaining undiscounted contractual maturities is disclosed in Notes 48.8 to the Annual Financial Statements.

2014 2013 R R

48.6 Market Risk

The municipality's activities expose it primarily to the financial risks of changes in interest rates (see Note 48.7 below). No formal policy exists to hedge volatilities in the interest rate market.

There has been no change to the municipality's exposure to market risks or the manner in which it manages and measures the risk.

48.6.1 Foreign Currency Risk Management

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

48.6.2 Interest Rate Risk Management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with Absa Bank, First National Bank, Nedbank and Standard Bank. No investments with a tenure exceeding twelve months are made.

Consumer Debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Consumer debtors are presented net of a provision for impairment.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy. Consumer Deposits are increased accordingly.

Long-term Receivables and Other Debtors are individually evaluated annually at Balance Sheet date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality is not exposed to interest rate risk as the municipality borrows funds at fixed interest rates.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

Interest Rate Sensitivity Analysis

The sensitivity analysis has been determined based on the exposure to interest rates at the Statement of Financial Position date. The analysis is prepared by averaging the amount of the investment at the beginning of the financial year and the amount of the investment at the end of the financial year. A 100 basis point increase or decrease was used, which represents management's assessment of the reasonably possible change in interest rates.

The short and long-term financial instruments at year-end with variable interest rates are set out in Note 48.8 below.

Cash and Cash Equivalents:

If interest rates had been 100 basis points higher / lower and all other variables were held constant, the municipality's:

• Surplus for the year ended 30 June 2014 would have increased / decreased by R1 986 695 (30 June 2013: R3 103 174). This is mainly attributable to the municipality's exposure to interest rates on its variable rate investments.

| 2014 | 2013 |
|------|------|
| R | R |

48.7 Credit Risk Management

Credit Risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

Investments/Bank, Cash and Cash Equivalents

The municipality limits its counterparty exposures from its money market investment operations (financial assets that are neither past due nor impaired) by only dealing with Absa Bank, First National Bank, Nedbank and Standard Bank. No investments with a tenure exceeding twelve months are made.

Trade and Other Receivables

Trade and Other Receivables are amounts owed by consumers and are presented net of impairment losses. The municipality has a credit risk policy in place and the exposure to credit risk is monitored on an ongoing basis. The municipality is compelled in terms of its constitutional mandate to provide all its residents with basic minimum services without recourse to an assessment of creditworthiness. Subsequently, the municipality has no control over the approval of new customers who acquire properties in the designated municipal area and consequently incur debt for sewerage and water services rendered to them.

The municipality limits this risk exposure in the following ways, in addition to its normal credit control and debt management procedures:

- The application of section 118(3) of the Municipal Systems Act (MSA), which permits the municipality to refuse connection of services whilst any amount remains outstanding from a previous debtor on the same property;
- A new owner is advised, prior to the issue of a revenue clearance certificate, that any debt remaining from the previous owner will be transferred to the new owner, if the previous owner does not settle the outstanding amount;
- The requirement of a deposit for new service connections, serving as guarantee and are reviewed annually;
- Encouraging residents to install water management devices that control water flow to households, and/or prepaid electricity meters.

There were no material changes in the exposure to credit risk and its objectives, policies and processes for managing and measuring the risk during the year under review. The municipality's maximum exposure to credit risk is represented by the carrying value of each financial asset in the Statement of Financial Position, without taking into account the value of any collateral obtained. The municipality has no significant concentration of credit risk, with exposure spread over a large number of consumers, and is not concentrated in any particular sector or geographical area.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of trade and other receivables.

Payment of accounts of consumer debtors, who are unable to pay, are renegotiated as an ongoing customer relationship in response to an adverse change in the circumstances of the customer in terms of the Credit Control and Debt Collection Policy.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

| | 2014 | 2013 |
|---|-------------|-------------|
| | R | R |
| The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows: | | |
| Fixed Deposit Investments | - | - |
| Long-term Receivables | 117 285 | 1 716 278 |

| Group 2 | - | - |
| Total Receivables from Non-exchange Transactions | 58 892 774 | 174 538 448 |
| = | | |

Credit quality Groupings:

Group 1 - High certainty of timely payment. Liquidity factors are strong and the risk of non-payment is small.

Group 2 - Reasonable certainty of timely payment. Liquidity factors are sound, although ongoing funding needs may enlarge financing requirement. The risk of non-payment is small.

Group 3 - Satisfactory liquidity factors and other factors which qualify the entity as investment grade. However, the risk factors of non-payment are larger.

None of the financial assets that are fully performing have been renegotiated in the last year.

48 FINANCIAL INSTRUMENTS (Continued)

48.8 Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. Included in Note 45 is a listing of additional undrawn facilities that the municipality has at its disposal to further reduce liquidity risk (cash).

Liquidity and Interest Risk Tables

The following table details the municipality's expected maturity for its non-derivative financial assets. The tables below have been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets except where the municipality anticipates that the cash flow will occur in a different period.

| Description | Note ref in AFS | Average effective Interest Rate | Total | 6 Months or less | 6 - 12 Months | 1 - 2 Years | 2 - 5 Years | More than 5 Years |
|------------------------------------|-----------------------|---------------------------------------|-------------|---------------------|------------------|----------------|----------------|----------------------|
| | # | % | R | R | R | R | | R |
| 30 June 2014 | | | | | | | | |
| Non-interest Bearing | | 0.00% | 120 532 659 | 120 500 025 | - | 32 368 | - | 266 |
| Variable Interest Rate Instruments | | 9.59% | 204 255 070 | 204 255 070 | - | - | - | - |
| | | | 324 787 728 | 324 755 094 | - | 32 368 | - | 266 |
| 30 June 2013 | | | | | | | | |
| Non-interest Bearing | | 0.00% | 221 391 468 | 221 358 834 | - | 32 368 | - | 266 |
| Variable Interest Rate Instruments | | 6.93% | 193 083 992 | 193 083 992 | - | - | - | - |
| | | | 414 475 459 | 414 442 825 | - | 32 368 | - | 266 |
| | | | | | | | | |

The municipality expects to meet its other obligations from operating cash flows and proceeds of maturing financial assets. The municipality expects to maintain current debt to equity ratio. This will be achieved through increased service tariff charges and the increased use of unsecured bank loan facilities.

48.9 Other Price Risks

The municipality is not exposed to equity price risks arising from equity investments as the municipality does not trade these investments.

2014 2013 R R

49 MULTI-EMPLOYER RETIREMENT BENEFIT INFORMATION

The municipality makes provision for post-retirement benefits to eligible councillors and employees, who belong to different pension schemes.

No benefits is provided for councillors, but they van join the Pension Fund for Municipal Councillors on their own.

Employees belong to a variety of approved Pension and Provident Funds as described below.

These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

All of these afore-mentioned funds are multi-employer plans and are subject to either a tri-annual, bi-annual or annual actuarial valuation, details which are provided below.

Sufficient information is not available to use defined benefit accounting for the pension and retirement funds, due to the following reasons:-

- (i) The assets of each fund are held in one portfolio and are not notionally allocated to each of the participating employers.
- (ii) One set of financial statements are compiled for each fund and financial statements are not drafted for each participating employer.
- (iii) The same rate of contribution applies to all participating employers and no regard is paid to differences in the membership distribution of the participating employers.

It is therefore seen that each fund operates as a single entity and is not divided into sub-funds for each participating employer.

The only obligation of the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions.

The total expense recognised in the Statement of Financial Performance of R19 744 054 (2013: R17 504 426) represents contributions payable to these plans by the municipality at rates specified in the rules of the plans. These contributions have been expensed.

The Retirement Funds have been valued by making use of the Discounted Cash Flow method of valuation.

DEFINED BENEFIT SCHEMES

Cape Joint Pension Fund:

The scheme is subject to an annual actuarial valuation. The last statutory valuation was performed as at 30 June 2011.

The statutory valuation performed as at 30 June 2011 revealed that the fund had a deficit of R58,9 (30 June 2010: surplus of R0,0) million, with a funding level of 98,1% (30 June 2010: 100,0%). The balance of the Solvency Reserve was R4,9 (30 June 2010: R4,9) million. The contribution rate paid by the members (9,00%) and the municipalities (18,00%) is less than the recommended contribution rate of 32,4%.

Government Employees Pension Fund (GEPF):

The scheme is subject to an tri-annual actuarial valuation. The last statutory valuation was performed as at 31 March 2010.

The statutory valuation performed as at 31 March 2010 revealed that the fund had a surplus of R0,0 (31 March 2008: R0,0) million, with a funding level of 100,0% (31 March 2008: 100,0%). The contribution rate paid by the members (7,50%) and the municipalities (13,00%) is sufficient to fund the benefits accruing from the fund in the future.

Municipal Employees Pension Fund:

The scheme is subject to a tri-annual actuarial valuation. The last statutory valuation was performed as at 28 February 2011.

The statutory valuation performed as at 28 February 2011 revealed that the net assets of the fund were R552,8 (28 February 2008: R432,7) million, with a funding level of 107,9% (28 February 2008: 108,2%). The contribution rate paid by the members (7,50%) and Council (15,00%, 18,00% and 22,00%) is not sufficient to fund the benefits accruing from the fund in the future and there is a shortfall in the future employer contribution rate of 8,10% (28 February 2008: 0,70%).

2014 2013 R R

DEFINED CONTRIBUTION SCHEMES

Cape Joint Pension Fund:

The scheme is subject to an annual actuarial valuation. The last statutory valuation was performed as at 30 June 2011.

The statutory valuation performed as at 30 June 2011 revealed that the investment reserve of the fund amounted to R15 285 (30 June 2010: R7 311) million, with a funding level of 104,1% (30 June 2010: 102,0%). The contribution rate paid by the members (9,00%) and the municipalities (18,00%) is sufficient to fund the benefits accruing from the fund in the future.

Cape Joint Retirement Fund:

The scheme is subject to an annual actuarial valuation. The last statutory valuation was performed as at 30 June 2011.

The statutory valuation performed as at 30 June 2011 revealed that the assets of the fund amounted to R9 869 (30 June 2010: R8 220) million, with funding levels of 100,3% and 116,9% (30 June 2010: 99,9% and 100,3%) for the Share Account and the Pensions Account respectively. The contribution rate paid by the members (9,00%) and the municipalities (18,00%) is sufficient to fund the benefits accruing from the fund in the future.

National Fund for Municipal Workers

The scheme is subject to an annual actuarial valuation. The last statutory valuation was performed as at 30 June 2013.

The scheme's assets amounted to R6 981,5 (2012: R5 646,4) million at 30 June.

The statutory valuation performed as at 30 June 2013 revealed that the fund had a deficit of 65,2 (30 June 2012: deficit R63,6) million, with a funding level of 99,07% (30 June 2012: 98,89%). The contribution rate paid by the members (minimum of 2,00% to 5,00%) and the municipalities (minimum of 2,00% to 5,00%) is sufficient to fund the benefits accruing from the fund in the future.

The monthly deductions for cost were sufficient to cover the expenses incurred over the valuation period. The Trustees, with the support of the Valuator, must continue to monitor the position on an annual basis.

SAMWU (South African Municipal Workers Union) National Provident Fund:

The scheme is subject to an tri-annual actuarial valuation. The last statutory valuation was performed as at 30 June 2005.

The statutory valuation performed as at 30 June 2005 revealed that the fund had a funding ratio of 100.0% (30 June 2002: 100,0%). The contribution rate paid by the members (not less than 5,00%) and Council (not less than 12,00%) is sufficient to fund the benefits accruing from the fund in the future.

No further details could be obtained for the fund and of any subsequent valuations performed.

None of the above mentioned plans are State Plans.

50 RELATED PARTY TRANSACTIONS

All Related Party Transactions are conducted at arm's length, unless stated otherwise.

50.1 Interest of Related Parties

No Related Party Interests have been identified/declared for the two financial years under review.

O R Tambo Ntinga Development Agency is wholly controlled by the municipality.

50.2 Loans granted to Related Parties

In terms of the MFMA, the municipality may not grant loans to its Councillors, Management, Staff and Public with effect from 1 July 2004. Loans, together with the conditions thereof, granted prior to this date are disclosed in Note 12 to the Annual Financial Statements.

50.3 Compensation of Related Parties

Compensation of Key Management Personnel and Councillors is set out in Notes 28, 29 and Appendix G, Statement of Remuneration of Management, to the Annual Financial Statements.

50.4 Purchases from Related Parties

The municipality did not buy goods from any companies which can be considered to be Related Parties.

55 EVENTS AFTER THE REPORTING DATE

No events having financial implications requiring disclosure occurred subsequent to 30 June 2014.

56 COMPARATIVE FIGURES

The comparative figures were restated as a result of the effect of Prior Period Errors (Note 40).

57 GOING CONCERN ASSESSMENT

Management considered the following matters relating to the Going Concern:

- (i) On 25 June 2013 the Council adopted the 2013/14 to 2015/16 Budget. This three-year Medium Term Revenue and Expenditure Framework (MTREF) to support the ongoing delivery of municipal services to residents reflected that the Budget was cash-backed over the three-year period.
- (ii) The municipality's Budget is subjected to a very rigorous independent assessment process to assess its cash-backing status before it is ultimately approved by Council.
- (iii) Strict daily cash management processes are embedded in the municipality's operations to manage and monitor all actual cash inflows and cash outflows in terms of the cash-flow forecast supporting the Budget. The cash management processes is complemented by monthly reporting, highlighting the actual cash position, including the associated risks and remedial actions to be instituted.
- (iv) As the municipality has the power to levy fees, tariffs and charges, this will result in an on-going inflow of revenue to support the on-going delivery of municipal services. Certain key financial ratios, such as liquidity, cost coverage, debtors' collection rates and creditors' payment terms are closely monitored and the necessary corrective actions instituted.

Taking the aforementioned into account, management has prepared the Annual Financial Statements on the Going Concern Basis.
