Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Officer's Responsibilities and Approval**

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the unaudited annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the unaudited annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the unaudited annual financial statements and was given unrestricted access to all financial records and related data.

The unaudited annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The unaudited annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the unaudited annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the 12 months to June 30, 2015 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The accounting officer has reviewed the municipality's cash flow forecast for the 12 months to June 30, 2015 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the municipality's unaudited annual financial statements. The unaudited annual financial statements have been examined by the municipality's external auditors and their report is presented on page 5.

The unaudited annual financial statements set out on page1 to 81, which have been prepared on the going concern basis, were approved by the accounting officer on 30 June 2014 and were signed on its behalf by:

approved by the accounting officer on 50 c	Julie 2014 and were signed on its benan by.	
Accounting Officer S.N. kunene	_

## **Accounting Policies**

#### **Presentation of Unaudited Annual Financial Statements**

The unaudited annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These unaudited annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these unaudited annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.1 Presentation currency

These unaudited annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### 1.2 Significant judgements and sources of estimation uncertainty

In preparing the unaudited annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the unaudited annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the unaudited annual financial statements. Significant judgements include:

#### Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 5.

#### 1.3 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one reporting period.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or assets, or a combination of assets and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for assets acquired at no cost which is carried at revalued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.3 Property, plant and equipment (continued)

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus included in net assets related to a specific item of property, plant and equipment is transferred directly to accumulated surplus or deficit when the asset is derecognised.

The revaluation surplus included in net assets related to a specific item of property, plant and equipment is transferred directly to accumulated surplus or deficit as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Avorago usoful lifo

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life

The residual value, the useful life and depreciation method of each asset are reviewed at least at of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use or disposal of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Property, plant and equipment which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

#### 1.4 Intangible assets

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.4 Intangible assets (continued)

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

ItemUseful lifeWater rights30 yearsComputer software, other30 Years

Intangible assets are derecognised:

- on disposal: or
- when no future economic benefits or service potential are expected from its use or disposal.

The addistions to intangable assets relates to computer software purchased for the intercom system in the Board room.

### 1.5 Financial instruments

#### Initial recognition and measurement

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instruments.

The municipality classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Financial instruments are measured initially at fair value, except for equity investments for which a fair value is not determinable, which are measured at cost and are classified as available-for-sale financial assets.

For financial instruments which are not at fair value through surplus or deficit, transaction costs are included in the initial measurement of the instrument.

Regular way purchases of financial assets are accounted for at .

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.5 Financial instruments (continued)

#### Receivables from exchange transactions

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in surplus or deficit within operating expenses. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in surplus or deficit.

Trade and other receivables are classified as loans and receivables.

#### Payables from exchange transactions

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

#### Bank overdraft and borrowings

Bank overdrafts and borrowings are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the municipality's accounting policy for borrowing costs.

#### Derivatives

Derivative financial instruments, which are not designated as hedging instruments, consisting of foreign exchange contracts and interest rate swaps, are initially measured at fair value on the contract date, and are re-measured to fair value at subsequent reporting dates.

Derivatives embedded in other financial instruments or other non-financial host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contract and the host contract is not carried at fair value with unrealised gains or losses reported in surplus or deficit.

Changes in the fair value of derivative financial instruments are recognised in surplus or deficit as they arise.

Derivatives are classified as financial assets at fair value through surplus or deficit - held for trading.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.5 Financial instruments (continued)

#### Held to maturity

These financial assets are initially measured at fair value plus direct transaction costs.

At subsequent reporting dates these are measured at amortised cost using the effective interest rate method, less any impairment loss recognised to reflect irrecoverable amounts. An impairment loss is recognised in surplus or deficit when there is objective evidence that the asset is impaired, and is measured as the difference between the investment's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition. Impairment losses are reversed in subsequent periods when an increase in the investment's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the investment at the date the impairment is reversed shall not exceed what the amortised cost would have been had the impairment not been recognised.

Financial assets that the municipality has the positive intention and ability to hold to maturity are classified as held to maturity.

#### 1.6 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### **Operating leases - lessee**

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

#### 1.7 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.7 Inventories (continued)

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

#### 1.8 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish cash-generating assets from non-cash-generating assets are as follow:

#### Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

### 1.8 Impairment of cash-generating assets (continued)

#### Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

#### **Discount rate**

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

#### Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## Accounting Policies

#### 1.8 Impairment of cash-generating assets (continued)

#### Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

#### 1.9 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

### 1.9 Impairment of non-cash-generating assets (continued)

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish non-cash-generating assets from cash-generating assets are as follow: [Specify criteria]

#### 1.10 Share capital / contributed capital

An equity instrument is any contract that evidences a residual interest in the assets of an municipality after deducting all of its liabilities.

#### 1.11 Employee benefits

#### **Defined contribution plans**

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.11 Employee benefits (continued)

#### Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognised.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the entity is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

#### 1.12 Provisions and contingencies

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.12 Provisions and contingencies (continued)

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 39.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, an municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets;
   and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

#### 1.13 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

### 1.14 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### 1.15 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.16 Borrowing costs

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

#### 1.17 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

#### 1.18 Unauthorised expenditure

Unauthorised expenditure means:

overspending of a vote or a main division within a vote; and

Unauthorised expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act Act (No. 56 of 2003). All unauthorised expenditure is recognised as an expence in the Statement of Financial Performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.19 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.20 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

#### 1.21 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by functional classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 7/1/2013 to 6/30/2014.

The budget for the economic entity includes all the entities approved budgets under its control.

The unaudited annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

#### 1.22 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Accounting Policies**

#### 1.22 Related parties (continued)

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

#### 1.23 Going concern assumption

These financial statements have been prepared on the assumption that the municip[ality will continue to operate as a goining concern for at least the next 12 months

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Notes to the Unaudited Annual Financial Statements**

2014 2013

#### 2. New standards and interpretations

#### 2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

#### **GRAP 25: Employee benefits**

The objective of GRAP25 is to prescribe the accounting and disclosure for employee benefits. The Standard requires an municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when an municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

GRAP25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

GRAP25 defines, amongst others, the following:

- Employee benefits as all forms of consideration given by an municipality in exchange for service rendered by employees;
- Defined contribution plans as post-employment benefit plans under which an municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods;
- Defined benefit plans as post-employment benefit plans other than defined contribution plans;
- Multi-employer plans as defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that:
  - pool the assets contributed by various entities that are not under common control; and
  - use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the municipality that employes the employees concerned;
- Other long-term employee benefits as employee benefits (other than post-employment benefits and termination benefits) that is not due to be settled within twelve months after the end of the period in which the employees render the related service;
- Post-employment benefits as employee benefits (other than termination benefits) which are payable after the completion of employment;
- Post-employment benefit plans as formal or informal arrangements under which an municipality provides postemployment benefits for one or more employees;
- Short-term employee benefits as employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service;
- State plans as plans other than composite social security programmes established by legislation which operate
  as if they are multi-employer plans for all entities in economic categories laid down in legislation;
- Termination benefits as employee benefits payable as a result of either:
  - an entity's decision to terminate an employee's employment before the normal retirement date; or
  - an employee's decision to accept voluntary redundancy in exchange for those benefits;
- Vested employee benefits as employee benefits that are not conditional on future employment.

The standard states the recognition, measurement and disclosure requirements of:

- Short-term employee benefits;
  - All short-term employee benefits:
  - Short-term compensated absences;
  - Bonus, incentive and performance related payments;
- Post-employment benefits: Defined contribution plans;
- Other long-term employee benefits;
- Termination benefits.

The standard states Post-employment benefits: Distinction between defined contribution plans and defined benefit plans:

- Multi-employer plans;
- Defined benefit plans where the participating entities are under common control;
- State plans;

Unaudited Annual Financial Statements for the year ended June 30, 2014

## Notes to the Unaudited Annual Financial Statements

#### 2. New standards and interpretations (continued)

- Composite social security programmes;
- Insured benefits.

The standard states, for Post-employment benefits: Defined benefit plans, the following requirements:

- Recognition and measurement;
- Presentation;
- Disclosure;
- Accounting for the constructive obligation;
- Statement of financial position;
- Asset recognition ceiling;
- Asset recognition ceiling: When a minimum funding requirement may give rise to a liability;
- Statement of financial performance.

The standard prescribes recognition and measurement for:

- Present value of defined benefit obligations and current service cost:
  - Actuarial valuation method;
  - Attributing benefits to periods of service;
  - Actuarial assumptions;
  - Actuarial assumptions: Discount rate;
  - Actuarial assumptions: Salaries, benefits and medical costs;
  - Actuarial gains and losses;
  - Past service cost.
- Plan assets:
  - Fair value of plan assets;
  - Reimbursements:
  - Return on plan assets.

The standard also deals with Entity combinations and Curtailments and settlements.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance

The effective date of the standard is for years beginning on or after April 1, 2013.

The municipality has adopted the standard for the first time in the 2014 unaudited annual financial statements.

#### GRAP 1 (as revised 2012): Presentation of Financial Statements

Paragraphs .108 and .109 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to the Statement of Financial Performance as well as the Statement of Changes in Net Assets.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after April 1, 2013

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

### GRAP 3 (as revised 2012): Accounting Policies, Change in Accounting Estimates and Errors

Paragraphs .17 and .18 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Changes in Accounting Policies.

The effective date of the amendment is for years beginning on or after April 1, 2013

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

#### GRAP 9 (as revised 2012): Revenue from Exchange Transactions

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Notes to the Unaudited Annual Financial Statements**

#### 2. New standards and interpretations (continued)

Paragraphs .11 and .13 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to the Scope and Definitions.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after April 1, 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

#### GRAP 12 (as revised 2012): Inventories

Paragraph .30 was amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Measurement after recognition.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after April 1, 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

#### GRAP 13 (as revised 2012): Leases

Paragraphs .38 and .42 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Disclosures.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after April 1, 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

### GRAP 17 (as revised 2012): Property, Plant and Equipment

Paragraphs .44, .45, .72, .75, .79 and .85 were amended by the improvements to the Standards of GRAP issued previously:

Amendments were made to Measurement after recognition, Derecognition and Disclosure.

All amendments to be applied prospectively.

The effective date of the amendment is for years beginning on or after April 1, 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

#### GRAP 31 (as revised 2012): Intangible Assets (Replaces GRAP 102)

Numerous paragraphs were amended by the improvements to the Standards of GRAP issued previously:

Changes made comprise 3 areas that can be summarised as follows:

- Consequential amendments arising from the alignment of the accounting treatment and text of GRAP 102 with that in IPSAS 31.
- The deletion of guidance and examples from Interpretations issues by the IASB previously included in GRAP102,
- Changes to ensure consistency between the Standards, or to clarify existing principles.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after April 1, 2013.

Unaudited Annual Financial Statements for the year ended June 30, 2014

## **Notes to the Unaudited Annual Financial Statements**

#### 2. New standards and interpretations (continued)

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

#### IGRAP16: Intangible assets website costs

An entity may incur internal expenditure on the development and operation of its own website for internal or external access. A website designed for external access may be used for various purposes such as to disseminate information, for example annul reports and budgets, create awareness of services, request comment on draft legislation, promote and advertise an entity's own services and products, for example the E-filing facility of SARS that enables taxpayers to complete their annual tax assessments, provide electronic services and list approved supplier details. A website designed for internal access may be used to store an entity's information, for example policies and operating procedures, and details of users of a service, and other relevant information.

The stages of a website's development can be described as follows:

- Planning includes undertaking feasibility studies, defining objectives and specifications, evaluating alternatives and selecting preferences.
- Application and infrastructure development includes obtaining a domain name, purchasing and developing hardware and operating software, installing developed applications and stress testing.
- Graphical design development includes designing the appearance of web pages.
- Content development includes creating, purchasing, preparing and uploading information, either text or graphic, on the website before the completion of the website's development. This information may either be stored in separate databases that are integrated into (or accessed from) the website or coded directly into the web pages.

Once development of a website has been completed, the operating stage begins. During this stage, an entity maintains and enhances the applications, infrastructure, graphical design and content of the website.

When accounting for internal expenditure on the development and operation of an entity's own website for internal or external access, the issues are:

- whether the website is an internally generated intangible asset that is subject to the requirements of the Standard of GRAP on Intangible Assets; and
- the appropriate accounting treatment of such expenditure.

This Interpretation of Standards of GRAP does not apply to expenditure on purchasing, developing, and operating hardware (eg web servers, staging servers, production servers and internet connections) of a website. Such expenditure is accounted for under the Standard of GRAP on Property, Plant and Equipment. Additionally, when an entity incurs expenditure on an internet service provider hosting the entity's website, the expenditure is recognised as an expense under the paragraph .93 in the Standard of GRAP on Presentation of Financial Statements and the Framework for the Preparation and Presentation of Financial Statements when the services are received.

The Standard of GRAP on Intangible Assets does not apply to intangible assets held by an entity for sale in the ordinary course of operations (see the Standards of GRAP on Construction Contracts and Inventories) or leases that fall within the scope of the Standard of GRAP on Leases. Accordingly, this Interpretation of Standards of GRAP does not apply to expenditure on the development or operation of a website (or website software) for sale to another entity. When a website is leased under an operating lease, the lessor applies this Interpretation of Standards of GRAP. When a website is leased under a finance lease, the lessee applies this Interpretation of Standards of GRAP after initial recognition of the leased asset.

The effective date of the amendment is for years beginning on or after April 1, 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

#### **GRAP 20: Related parties**

The objective of this standard is to ensure that a reporting entity's unaudited annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;

Unaudited Annual Financial Statements for the year ended June 30, 2014

## Notes to the Unaudited Annual Financial Statements

#### 2. New standards and interpretations (continued)

- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual unaudited annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
  - has control or joint control over the reporting entity;
  - has significant influence over the reporting entity;
  - is a member of the management of the entity or its controlling entity.
- An entity is related to the reporting entity if any of the following conditions apply:
  - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
  - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
  - both entities are joint ventures of the same third party;
  - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
  - the entity is controlled or jointly controlled by a person identified in (a); and
  - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties:
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- · Related party transactions; and
- Remuneration of management

The effective date of the standard is for years beginning on or after April 1, 2014.

The municipality has early adopted the standard for the first time in the 2014 unaudited annual financial statements.

#### IGRAP1 (as revised 2012):Applying the probability test on initial recognition of revenue

Paragraphs .03, .04, .05, .06, .08 and .10, were amended and paragraph .02 was added in the Interpretation of the Standards of GRAP.

This Interpretation of the Standards of GRAP now addresses the manner in which an entity applies the probability test on initial recognition of both:

(a) exchange revenue in accordance with the Standard of GRAP on Revenue from Exchange Transactions and

### **Notes to the Unaudited Annual Financial Statements**

### New standards and interpretations (continued)

(b) non-exchange revenue in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

This Interpretation of the Standards of GRAP supersedes the Interpretation of the Standards of GRAP: Applying the Probability Test on Initial Recognition of Exchange Revenue issued in 2009.

The effective date of the amendment is for years beginning on or after April 1, 2013.

The municipality has adopted the amendment for the first time in the 2014 unaudited annual financial statements.

Office furniture and equipment donated 223,453

### 13. Accumulated surplus

Ring-fenced internal funds and reserves within accumulated surplus - 2014

Accumlated Total surplus Opening balance 748,554,401 748,554,401

### **Notes to the Unaudited Annual Financial Statements**

	2014	2013
14. Finance lease obligation		
Minimum lease payments due		
- within one year - in second to fifth year inclusive	2,053,777 221,152	2,832,443 2,334,489
less: future finance charges	2,274,929 (100,703)	5,166,932 (926,821)
Present value of minimum lease payments	2,174,226	4,240,111
Present value of minimum lease payments due		
- within one year	2,069,400	2,548,206
- in second to fifth year inclusive	104,826	1,691,905
	2,174,226	4,240,111
Non-current liabilities	104,826	1,691,905
Current liabilities	2,069,400	2,548,206
	2,174,226	4,240,111

It is the municipality's policy to lease motor vehicles under finance leases.

The average lease term was 3-5 year.

Interest rates are linked to prime at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

Unaudited Annual Financial Statements for the year ended June 30, 2014

### **Notes to the Unaudited Annual Financial Statements**

2014 2013

### 15. Unspent conditional grants and receipts (continued)

The nature and extent of government grants recognised in the unaudited annual financial statements and an indication of other forms of government assistance from which the municipality has directly benefited; and

Unfulfilled conditions and other contingencies attaching to government assistance that has been recognised.

See note 2323 for reconciliation of grants from National/Provincial Government.

These amounts are invested in a ring-fenced investment until utilised.

Imbabazane Municipality	· -	500,000
Nambithi Pumps	2,795,972	-
Andile Thwala	100,000	-
	4,118,240	2,297,752

The following Contingent Liabilities are being attended to by Councils Legal representative - Ramkhelewan Inc.

**D. Kistado - Collison -** Claim amount R15, 240.00 - The matter was set down for trial and postponed, There is a very good prospect of succeeding with the defence and Council's legal representative believe that the plaintiff's claim should have been against the Emnambithi/Ladysmith Municipality and not Uthukela.

**A.M.J. Hlongwane - Eradication of Bucket Latrines in Ekuwukeni "Contract 19/2005"** - Claim amount R174, 261.20 The matter is in the High Court and are awaiting for the plaintiff to take the next step. The prospect of success hererin is good and Council's Legal representative suggest that they continue defending the matter.

**Aurecon** - Claim amount R378, 606.54 The matter has been defended and must proceed. Prospects of success are good considering previous consultations Councils Legal representative had with S. Mthethwa and B.H. khoza. for now the matter is pending as the plaintiff is negotiating settlement with the Municipality directly

**J. Potgieter** - Claim amount R4, 534.10 The matter has been defended and Council's Legal representative is awaiting a trial date. Plaintiff's claim is against the Municipality for damages to his wall and pawing when a water pipe was repaired. Prospects of success are good.

**Telkom** - Claim 1 amount R23, 693.59 and claim amount 2 amount R49, 447.93 In both these matters Council's employees damaged the Telkom cables whilst repairing the water pipes. Unfortunatly a similar matter was heard in Court and the ruling was against the Municipality of Pietermaritzburg in consequence of them failing to adhere to the way-leave agreement. Council's Legal representative has from a very early stage of these matters suggested to Council to refer these matters to Councils Insurance for settlement as he has little or no prospect of succeeding at trial.

**Jeffares And Green** - Claim amount R576, 483.75 The matter was setdown for trial but removed from the roll as the plaintiff intends amendingits papers. Council's Legal representative will inform Council once a new trial date has been set.

Imbabazane Municipality - Claim amount R500, 000.00 The dispute between the two Municipalities has been resolved.

**Nambithi Pumps** - Claim amount R2, 795, 972.00 The plaintiff issued summons based on a breach of contract. The matter is being defended and will proceed to trial.

**Andile Thwala** - Claim amount R100,000.00 The claim arised from injuries suffered by her child by falling into an exposed manhole. The matter is being defended and the Municipality's Insurers has contacted Councils Legal representative in this regard.

Unaudited Annual Financial Statements for the year ended June 30, 2014

### **Notes to the Unaudited Annual Financial Statements**

2014 2013

### 39. Contingencies (continued)

Contingencies arising from pending litigations on wage curve agreement - On 21 April 2010 SALGA signed the "Categorisation and job evaluation wage curves collective agreement" (Wage Curve Agreement) with IMATU and SAMWU on behalf of Municipalities. The agreement established the wage curves and wage scales to be used by municipalities in determining the wages of municipal employees., based on the evaluation of employees jobs per the TASK job evaluation system. Subsequent to the signing of the agreement, the unions declared a dispute with the agreement. The dispute was referred to the Labour Court and the court delivered the ruling on 22 June 2012 that employees receive a salary increase backdated with effect 1 July 2010 instead of 1 July 2011. SALGA, on behalf of municipalities, applied for leave to appeal this ruling and was granted the right to appeal against the jugement on 29 August 2012. To date the Labour Court of appeal case has not been finalized.

The municipality completed jobs descriptions for all employees and submitted this information to the job evaluation committee (appointed by the Bargaining Council) for evaluation. The Municipality did not receive correspondence on the results of the evaluation. In effect, the Municipality was not able to implement the terms of the wage curve agreement and in consequence is not able to quantify the amount due or possibly even owed to the Municipality by it's employees.

### 40. Prior period errors

### 41. Risk management

### Financial risk management

The minicipality has adopted and implimented a risk management policy to minimise potential adverse effects on the municipalities financial performance.

Unaudited Annual Financial Statements for the year ended June 30, 2014

### **Notes to the Unaudited Annual Financial Statements**

2014 2013

### 41. Risk management (continued)

### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2014	2013
Bank balances and cash	126,554,326	148,772,941
Consumer debtors from exchange transactions	352,593,945	35,487,433
Other receivables from exchange transactions	5,600,191	1,640,824
Receivables from non exchange transactions	676.195	418.891

### 42. Going concern

We draw attention to the fact that at June 30, 2014, the municipality had accumulated surplus of 0.00 2,208,745,672 and that the municipality's total liabilities exceed its assets by 0.00 2,208,969,125.

The unaudited annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

			141,970,026	19,497,991

Water losses could not be accurately accounted for as bulk meters have not been installed yet

The estimate of water losses was done by comparing the production capacity of the water purification plants against the water consumption billled.

Due to the fact that the treatment works are not operating at full capacity as a result of downtime caused by operational inefficiencies, the plant productions has been reduced by 5% which is deemed to be a reasonable average downtime rate
