ZULULAND DISTRICT MUNICIPALITY ANNUAL FINANCIAL STATEMENTS

for the year ended 30 June 2014

Approval of annual financial statements

I am responsible for the preparation of these annual financial statements, which are set out on pages 4 to 52, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors, as disclosed in note 24 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Cooperative Governance and Traditional Affairs's determination in accordance with this Act.

Municipal Manager: Mr J H De Klerk

29 August 2014

1 ACCOUNTING POLICIES

1.1 BASIS OF ACCOUNTING

1.1.1 BASIS OF PRESENTATION

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003)

Accounting policies for material transactions, events or conditions not covered by the GRAP Standards have been developed in accordance with paragraphs 7,11 and 12 of GRAP 3. These accounting policies and the applicable disclosures have been based on the South African Statements of Generally Accepted Accounting Practices (SA GAAP) including any interpretations of such Statements issued by the Accounting Practices Board.

A summary of the significant accounting policies, which have been consistently applied except where a transitional provision has been granted are disclosed below.

1.2 PRESENTATION CURRENCY

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.3 GOING CONCERN ASSUMPTION

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.4 COMPARATIVE INFORMATION

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

The following standards, amendments to standards and interpretations have been issued but are not yet effective and have not been early adopted by the municipality:

The presentation and classification of items in the current year is consistent with prior periods.

1.5 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

The following Standards of GRAP have been issued by the Accounting Standards Board but have not been given an effective date by the Minister of Finance. The entity has not earlyadopted any of these new Standards or amendments thereto, but has referred to them for guidance in the development of accounting policies in accordance with GRAP 3 as read with Directive 5.

Standard number	Standard name	Effective date (if applicable)
GRAP 18	Segment Reporting	No effective date
GRAP 20	Related Party Disclosures	No effective date
GRAP 32	Service Concessions Arrangement Grantor	No effective date
GRAP 105	Transfer of Functions Between Entities Under Common Control	No effective date
GRAP 106	Transfer of Functions Between Entities Not Under Common Control	No effective date
GRAP 107	Mergers	No effective date
GRAP 108	Statutory Receivables	No effective date

GRAP 18: SEGMENT REPORTING

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which a municipality reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of a municipality that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by a municipality within a particular region.

The adoption of this standard is not expected to impact on the results of the municipality, but may result in more disclosure than is currently provided in the financial statements.

GRAP 20: RELATED PARTY DISCLOSURES

The objective of this Standard of GRAP is to ensure that a municipality's financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

It is unlikely that the standard will have a material impact on the municipality's financial statements. For the year under review, the municipality has applied IPSAS 20.

GRAP 25: EMPLOYEE BENEFITS

The objective of this standard is to prescribe the accounting and disclosure for employee benefits. The major difference between this Standard of GRAP and IAS 19 is with regards to the treatment of actuarial gains and losses and past service costs. This Standard of GRAP requires a municipality to recognise all actuarial gains and losses and past service costs immediately in the statement of financial performance once occurred.

The effective date of the standard is for years beginning on or after 01 April 2013. The municipality expects to adopt the standard for the first time in the 2014 financial statements.

It is unlikely that the standard will have a material impact on the municipality's financial statements.

GRAP 31: INTANGIBI E ASSETS

This Standard of GRAP replaces the previous Standard of GRAP on Intangible Assets (GRAP 102) due to the IPSASB that has issued an IPSAS on Intangible Assets (IPSAS 31).

The effective date of the standard is for years beginning on or after 01 April 2013.

There is no impact of the standard on adoption.

GRAP 105: TRANSFERS OF FUNCTIONS BETWEEN ENTITIES UNDER COMMON CONTROL

The objective of this Standard of GRAP is to establish accounting principles for the acquirer and transferor in a transfer of functions between municipalities under common control.

The municipality expects to adopt the standard for the first time once it becomes effective.

It is unlikely that the standard will have a material impact on the municipality's financial statements

GRAP 106: TRANSFERS OF FUNCTIONS BETWEEN ENTITIES NOT UNDER COMMON CONTROL

The objective of this Standard of GRAP is to establish accounting principles for the acquirer and transferor in a transfer of functions between municipalities not under common control.

The municipality expects to adopt the standard once it becomes effective.

The impact of this amendment is currently being assessed.

GRAP 107: MERGERS

The objective of this Standard of GRAP is to establish accounting principles for the combined municipality and combining municipalities in a merger.

The municipality expects to adopt the standard once it becomes effective.

The impact of this standard is currently being assessed.

Impact on the municipality's financial statements once implemented:

1.6 PROPERTY, PLANT AND EQUIPMENT

1.6.1 INITIAL RECOGNITION

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plan and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. The major components are depreciated separately over their useful lives.

Where an asset is acquired by the municipality for no consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

1.6.2 SUBSEQUENT MEASUREMENT - COST MODEL

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

1.6.3 DEPRECIATION AND IMPAIRMENT

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. Depreciation on new acquisitions is charged to the statement of financial performance in the financial year in which the asset is available for use after talking into account the an assets' residual value where applicable.

The annual depreciation rates are based on the following estimated average asset lives: Infrastructure

innustructure	
Water	15-70 years
Sewerage	15-70 years
Community	
Buildings	30 years
Recreational Facilities	20-30 years
Finance lease assets	
Office equipment	5 years
Other	
Buildings	30 years

Buildings	30 years
Specialist vehicles	7 years
Other vehicles	7 years
Office equipment	3-7 years
Furniture and fittings	7 years
Emergency equipment	10 years
Computer equipment	5 years

The residual value, the useful life of an asset and the depreciation method is reviewed annually and adjusted where necessary. Any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

The municipality tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of the impairment is recognised in the Statement of Financial Performance.

Land is not depreciated as it is deemed to have an indefinite life.

DERECOGNITION 1.6.4

Items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

1.7 HERITAGE ASSETS

1.7.1 INITIAL RECOGNITION

A heritage asset is defined as an asset that has a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held and preserved indefinitely for the benefit of present and future generations. A heritage asset is recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the asset will flow to the entity, and the cost or fair value of the asset can be measured reliably.

1.7.2 MEASUREMENT AT RECOGNITION

Heritage asset is initially measured at cost at the date of acquisition or in the case where a heritage asset is acquired through a non-exchange transaction (i.e. donation or grant) at deemed cost, being the fair value of the asset at acquisition date.

The cost of a heritage asset is a purchase price and other costs directly attributable to bring the heritage asset to the location and condition necessary for it to be capable of operating in the manner intended by management of the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes attributable costs of dismantling and removing the asset and restoring the site on which the asset is located.

Where there is no evidence to determine the market value of an item of heritage asset in an active market, a valuation technique is used to determine the fair value.

1.7.3 SUBSEQUENT MEASUREMENT

The municipality uses either cost model or revaluation model to value each class of heritage asset. Subsequent expenditure relating to heritage assets is capitalised if that expenditure meets all the requirement of heritage asset and can be measured reliable. Subsequent expenditure is only capitalised when that expenditure increases the level of benefit from present and future generation.

If the municipality re-values heritage asset, the entire class of heritage assets to which that asset belongs is re-valued. The surplus or deficit realised during revaluation is either credited or debited against the revaluation surplus account.

Heritage assets are not depreciated; however the municipality assesses impairment to all heritage assets at each reporting date.

ZULULAND DISTRICT MUNICIPALITY SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

for the year ending 30 June 2014

1.7.4 DE-RECOGNITION OF HERITAGE ASSETS

The carrying amount of an item of heritage asset is de-recognised on disposal or when no future economic benefit or service potential or for the benefit of present and future generations.

The gains or losses derived from de-recognition is recognised in the surplus or deficit when the heritage asset is de-recognised.

Gains and losses are determined as the difference between the carrying amount (cost less accumulated impairment losses) and the disposal proceeds and included in the statement of financial performance.

1.7.5 TRANSITIONAL PROVISIONS

The municipality utilises the transitional provisions under Directive 4, which allows three (3) years for the measurement of heritage assets.

1.8 INTANGIBLE ASSETS

1.8.1 INITIAL RECOGNITION

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licenses, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

• the municipality intends to complete the intangible asset for use;

• it is technically feasible to complete the intangible asset;

· the municipality has the resources to complete the project; and

• it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

1.8.2 SUBSEQUENT MEASUREMENT - COST MODEL

Intangible assets are subsequently carried at cost less accumulated amortisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

1.8.3 AMORTISATION AND IMPAIRMENT

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method.

The annual amortisation rates are based on the following estimated average asset lives: Computer software 5-7 years

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

1.8.4 DERECOGNITION

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.9 INVENTORIES

1.9.1 INITIAL RECOGNITION

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

1.9.2 SUBSEQUENT MEASUREMENT

Inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down in this way. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

In general, the basis of allocating cost to inventory items is the first-in, first-out method (FIFO).

1.10 NON-CURRENT ASSETS HELD FOR SALE

1.10.1 INITIAL RECOGNITION

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

1.10.2 MEASUREMENT

Non-current assets held for sale (or disposal group) are measured at the lower of carrying amount and fair value less costs to sell. A non-current asset is not depreciated (or amortised) while it is classified as held for sale or while it is part of a disposal group classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

1.10.3 DERECOGNITION

Non-current assets and disposal groupies held for sale are derecognised upon disposal of the item or where no further economic benefits or service potential is expected to flow from the asset or disposal group. Gains / loss that result from the derecognition of non-current assets or disposal groups held for sale are recognised in surplus / deficit in the period of the derecognition

1.11 INVESTMENT PROPERTY

1.11.1 INITIAL RECOGNITION AND MEASUREMENT

Investment property includes property held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services or the sale of an asset in the ordinary course of operations. Investment Property is initially recognised when future economic benefits or service potential are probable and the cost or fair value can be determined reliably. At initial recognition, the entity measures investment property at cost including transaction costs once it meets the definition of investment property. Where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property (property, plant and equipment), the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the entity accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use. The cost of day to day servicing of investment property is recognised in the Statement of Financial Performance as incurred.

ZULULAND DISTRICT MUNICIPALITY SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

for the year ending 30 June 2014

1.11.2 SUBSEQUENT MEASUREMENT - COST MODEL

Investment property is measured using the cost model. Investment Property is stated at cost less accumulated depreciation and accumulated impairment losses. Depreciation is calculated on cost, using the straight-line method over the useful life of the property, which is estimated at 20 - 30 years. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately.

The gain or loss arising on the disposal of an investment property is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.11.3 IMPAIREMENTS

The entity tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an Investment Property is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of the impairment is recognised in the Statement of Financial Performance.

1.11.4 DERECOGNITION

An Investment Property is derecognised when there is a disposal or no future economic benefits or service potential are to be derived from the property. All gains or losses, which result from the derecognision, are recognised in the Statement of Financial Performance.

1.12 BIOLOGICAL ASSETS

1.12.1 RECOGNITION

Biological assets that are not managed as part of an agricultural activity are accounted for as property, plant and equipment where they are expected to be used for longer than 12 months (refer to accounting policy for property, plant and equipment).

- Biological assets that are managed as part of an agricultural activity, and agricultural produce are recognised when:
- o The entity controls the asset; and
- o Future economic benefits or service potential from the asset is probable; and
- o The fair value or cost of the asset can be determined.

1.12.2 MEASUREMENT

Biological assets are measured at fair value less estimated point-of-sale costs at initial recognition as well for subsequent reporting periods. Agricultural produce (as harvested from biological assets) are recognised at the point of harvest. Accordingly, agricultural produce is measured at fair value less point-of-sale costs at the point of harvest. When this agricultural produce is transferred to inventory (for the purpose of consumption or resale) the fair value less point-of-sale costs, becomes the cost of the agricultural produce inventory.

Where there is no active market for biological assets and it is not possible to determine the fair value of the biological assets reliably through the use of other valuation techniques, the biological assets are measured at cost less accumulated depreciation and accumulated impairment losses. Should the fair value of the biological asset become available or reliably determinable in subsequent periods, the biological asset will be measured at its fair value less point-of-sale costs

When measuring the biological asset at fair value less point-of-sale costs at initial recognition a gain arises on that asset. This gain is recognised in surplus or deficit for the period during which the biological asset was initially recognised. Any subsequent changes to the fair value less point-of-sale costs (which arise as a result of re-measurements at subsequent reporting dates) are also recognised in the surplus or deficit for the period.

The gain or loss that arises on the initial recognition of agricultural produce at fair value less point-of-sale costs is also recognised in surplus or deficit in the period that it arises.

1.12.2 DERECOGNITION

Agricultural produce is derecognised at the point of reclassification to inventory. As the fair value less point-of-sale costs becomes the cost of the inventory, no gain or loss is derecognised at the point of reclassification.

Biological assets are derecognised when the entity disposes thereof or when it is no longer probable that future economic benefits or service potential will be generated from the biological asset. Any gain or loss that arises at the point of derecognition is recognised in surplus or deficit at the point of derecognition.

1.13 FINANCIAL INSTRUMENTS

1.13.1 INITIAL RECOGNITION

The municipality has various types of financial instruments and these can be broadly categorised as either financial assets, financial liabilities or residual interests in accordance with the substance of the contractual agreement. The municipality only recognises a financial instrument when it becomes a party to the contractual provisions of the instrument. Financial instruments are initially recognised at fair value.

The Entity does not offset a financial asset and a financial liability unless a legally enforceable right to set off the recognised amounts currently exist; and the entity intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Financial instruments are evaluated, based on their terms, to determine if those instruments contain both liability and residual interest components (i.e. to assess if the instruments are compound financial instruments). To the extent that an instrument is in fact a compound instrument, the components are classified separately as financial liabilities and residual interests as the case may be.

The municipality has the following types of financial assets as reflected on the face of the Statement of Financial Position or in the notes thereto:

Type of Financial Asset	Classification in terms of GRAP 104
Short-term Investment Deposits – Call	Financial asset at amortised cost
Bank Balances and Cash	Financial asset at amortised cost
Long-term Receivables	Financial asset at amortised cost
Consumer Debtors	Financial asset at amortised cost
Other Debtors	Financial asset at amortised cost

1.13.2 MEASUREMENT

Financial Assets are categorised according to their nature as either financial assets at fair value through profit or loss, held-to maturity, loans and receivables, or available for sale. Financial liabilities are categorised as either at fair value through profit or loss or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and liabilities depends on this categorisation and, in the absence of an approved GRAP 104 Standard on Financial Instruments, is in accordance with IAS 39.

Subsequent to initial recognition, financial assets and financial liabilities are measured at fair value, amortised cost or cost.

1.13.3 IMPAIREMENTS

All financial assets measured at amortised cost, or cost, are subject to an impairment review. The entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

The entity does not offset financial assets and financial liabilities in the Statement of Financial Position unless a legal right of set-off exists and the parties intend to settle on a net basis.

1.13.4 RECOGNITION

A financial asset is derecognised at trade date, when:

The cash flows from the asset expire, are settled or waived;

a) Significant risks and rewards are transferred to another party; or

b) Despite having retained significant risks and rewards, the entity has transferred control of the asset to another entity.

A financial liability is derecognised when the obligation is extinguished. Exchanges of debt instruments between a borrower and a lender are treated as the extinguishment of an existing liability and the recognition of a new financial liability. Where the terms of an existing financial liability are modified, it is also treated as the extinguishment of an existing liability and the recognition of a new liability.

1.9 INVESTMENTS

Investments, which include short-term deposits invested in registered commercial banks, are categorised as either held-to-maturity where the criteria for that categorisation are met, or as loans and receivables, and are measured at amortised cost. Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified. Impairments are calculated as being the difference between the carrying amount and the present value of the expected future cash flows flowing from the instrument. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the Statement of Financial Performance

1.10 TRADE AND OTHER RECEIVABLES

Trade and other receivables are categorised as financial assets: loans and receivables and are initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on a review of all outstanding amounts at yearend. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 180 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value. Amounts that are receivable within 12 months from the reporting date are classified as current.

An impairment of trade receivables is accounted for by reducing the carrying amount of trade receivables through the use of an allowance account, and the amount of the loss is recognised in the Statement of Financial Performance within operating expenses. When a trade receivable is uncollectible, it is written off. Subsequent recoveries of amounts previously written off are credited against operating expenses in the Statement of Financial Performance.

1.11 TRADE PAYABLES AND BORROWINGS

Financial liabilities consist of trade payables and borrowings. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value and subsequently measured at amortised cost which is the initial carrying amount, less repayments, plus interest.

1.12 CASH AND CASH EQUIVALENTS

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at amortised cost.

1.13 UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.14 IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.15 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.16 LEASES

1.16.1 MUNICIPALITY AS LESSEE

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight line basis over the term of the relevant lease.

1.16.2 MUNICIPALITY AS A LESSOR

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

1.17 PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

1.18 REVENUE

REVENUE FROM EXCHANGE TRANSACTIONS 1.18.1

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved by the council an are levied monthly.

Service charges relating to water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made monthly by the system if the reading was not obtained. The provisional estimates of consumption are recognised as revenue when invoiced. The system automatically reverse the provisional readings, when the reading has been captured on the system.

Interest revenue is recognised on a time proportion basis.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods is passed to the consumer.

Revenue for agency services is recognised on a monthly basis once the revenue collected on behalf of agents has been quantified and once the terms of the agency agreement have been complied with

1.18.2 REVENUE FROM NON-EXCHANGE TRANSACTIONS

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Fines constitute both spot fines in the form of meter tempering fines. Fines are recognised when payment is received.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councilors or officials is virtually certain.

1.18.3 GRANTS, TRANSFERS AND DONATIONS

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset or expense is recognised.

1.19 BORROWING COSTS

Borrowing cost are recognised as an expense in Statement of Financial Performance in the period they become due and payable.

1.20 EMPLOYEE BENEFITS

Short-term Employee Benefits

Remuneration to employees is recognised in the Statement of Financial Performance as the services are rendered, except for non-accumulating benefits, which are only recognised when the specific event occurs.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service. The liability for leave pay is based on the total accrued leave days at year end and is shown as a creditor in the Statement of Financial Position. The municipality recognises the expected cost of performance bonuses only when the municipality has a present legal or constructive obligation to make such payment and a reliable estimate can be made.

Defined Contribution Plans

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees. The municipality has no further payment obligations once the contributions have been paid.

Defined Benefit Plans

A defined benefit plan is a post- employment benefit plan other than a defined contribution plan.

Pension obligations

The Municipality's personnel are members of either the Government Employees Pension Fund (GEPF) or one of the Natal Joint Municipal Pension (NJMPF) retirement funds, namely the Superannuation, Retirement and Provident Funds. Except for the NJMPF Provident fund, the aforementioned funds are defined benefit funds. As these defined benefit funds are multiemployer funds, the allocation of any surplus/deficit to individual municipalities cannot be determined. Furthermore disclosure of further details such as actuarial assumptions, cannot be attributed to any specific employer and is of no relevance to users of the municipality's financial statements. As the required disclosure information cannot be obtained the funds are all treated as defined contribution funds.

ZULULAND DISTRICT MUNICIPALITY SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

for the year ending 30 June 2014

Municipal Councillors

Councillors belong to the Councillors Pension Fund which is a defined contribution fund and employers have no legal or constructive obligation for any shortfalls in valuation of the fund.

Other post-employment benefit obligations

The municipality does not provide post retirement health care benefits to any of its employees and therefore has no liability for such benefits. Except for one staff member who was transferred from another local municipality.

1.21 VAT

VAT is accounted for on the payment basis i.e. VAT is paid over to SARS only once payment is received from debtors and/ or when actual payment is made to creditors.

1.22 BUDGET INFORMATION

The annual budget figures have been prepared in accordance with the GRAP 24. The amounts are scheduled as a separate additional financial statement, called the Statement of Comparison of Budget and Actual amounts.

Explanatory comments on material differences are provided in a separate budget statement in the annual financial statements giving firstly reasons for overall growth or decline in the budget and secondly motivations for over- or underspending on line items. The changes between the approved and final budget are a consequence of reallocations within the approved budget by the Council at the beginning and during the year following a period of consultation with the public as part of the Integrated Development Plan.

The budget is approved on an accrual basis by nature classification. The approved budget covers the reporting period from 1 July 2013 to 30 June 2014.

		R	R
	Water losses averaged 7.6% during the year	6 546 209	9 628 755
	Unaccounted for water comprises underground leaks, faulty meters, vandalism, resevoir overflows resulting from either faulty or malfunctioning ball balves. The Non Revenue Water Management Strategy is already in place. The municipality is currently drafting the business plan to source funding for the implementation of the Non Revenue Water Management Strategy.		
	Irregular Expenditure		
	Reconciliation of irregular expenditure

	Report on Deviations incurred	-	18 653 376
	Irregular expenditure condoned or written-off by council	(12 890 986)	-
	Irregular expenditure awaiting condonement	88 750	36 967 273
	Irregular expenditure condoned or written-off by council in 2012/13		(5 422 911
	Re-classified to Report on Deviations (Note 35.10)		(18 653 376
	Restated irregular expenditure awaiting condonement	88 750	12 890 986
	Irregular expenditure relates to procurements that were made from companies who have directors or members who are in		
	the service of the state. This was due to the members making misrepresentations on the Municipal Bidding Documentation (MBD 4) forms which are official dedarations from National Treasury. Investigations are oroging and further actions will be taken in accordance with the merits of each case. A legal opinion regarding the action that can be instituted has been obtained. However, the municipality does not have access to the database of government employees and cannot reasonably be expected to know all government employees. As a result, the declarations by members of respective companies are considered adequate. In June 2012 the municipality procured the services of a company that verifies the status of a company or individual before an appointment can be made. This has gone a long way to ensure that companies whose members are in the service of the state are not appointed.		
	in the service of the state are not appointed.

39 EMPLOYEE BENEFITS

29	EMPLOYEE BENEFITS Pension Benefits		
	Council's share of contributions to retirement benefit funds were	#REF!	9 138 808
	= 		
	As stated in the accounting policy note, all contributions to retirement benefit funds are treated as contributions to retirement contribution plans.		
	·		
	Post retirement benefits		
	Employees of the municipality do not enjoy post retirement medical benefits and the municipality has no legal or constructive obligation in this regard. Except for one employee who was transferred from one of the local municipality.		
40	CONTINGENT LIABILITIES		
	Contigent liabilities comprises of:		
	Pending cases	1 611 293	2 499 804
	-	1 611 293	2 499 804
41	CONTINGENT ASSET		
	Claim for Stolen cheques	2 831 539	3 481 539
	Subsequent to the stealing of cheques, the court case has been finalised and the suspect convicted. Some funds were frozen and according to our lawyers, it is probable that we may recover this amount from the Bank.		
42	FINANCIAL LOSS RECOVERED (Fraudulent Transactions)		
	Financial Loss Recovery from the Insurers	#REF!	#REF!
	Total =	#REF!	#REF!
	Financial Loss recovered from Insurers associated with stolen cheques.		
43	STATEMENT OF COMPARISON OF BUDGET AND ACTUAL AMOUNTS.		
	The Statement of comparison of Budget and actual amounts has been presented as a separate additional statement on page 8. T statements are prepared on the accrual basis and covers the same period from 1 July 2013 to 30 June 2014.	he budget and actual	financial

44 CHANGE OF ACCOUNTING ESTIMATES

The useful lives of certain assets were re-estimated in 2013 and extended accordingly. In the current period management have revised their estimates. The effect of this revision has increased the depreciation charges for the current and future periods by R 61,893.

The effect of these has resulted to an increase in depreciation as follows;	Pre-change of estimate	Post-change of estimate	Net effect
Current Depreciation		61 893	61 893

45 CAPITAL RISK MANAGEMENT

The capital structure of the municipality consist of accumulated surplus as disclosed in the statement of changes in net assets.

46 GEARING RATIO

The gearing ration is nil since the municipality does not have long term liabilities.

FINANCIAL RISK MANAGEMENT 47

The Department Financial Services monitors and manafges the finacial risk relating to the operations through internal policies and procedures. These risk include interest rate and liquidity risk. Compliance with policy and procedures is reviewed by internal auditors on a continous basis an annual by external auditor. the municipality does not enter into or trade financial immstruments for speculative purposes.

48 LIQUIDITY RISK

Liquidity risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its Financial Liabilities that are settled by delivering cash. The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipititys reputations.

Liquidity risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangement are establised at competitive rates to ensure that cash flow requirements are met.
