Approval of Annual Financial Statements

I am responsible for the preparation of these annual financial statements, which are set out on pages 4 to 67, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. I certify that the salaries, allowances and benefits of Councillors, are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

Mrs AN Dlamini Municipal Manager

1. BASIS OF PRESENTATION

The Annual Financial Statements have been prepared on an accrual basis of accounting and are in accordance with the historical cost convention.

The Annual Financial Statements have been prepared in accordance with South African Standards of Generally Recognised Accounting Practice (GRAP) as prescribed by the Minister of Finance in terms of Government Gazette number 31021, Notice Number 516, dated 9 May 2008 and also in terms of the standards and principles contained in Directives 3 and 5 issued by the Accounting Standards Board ("ASB") in March 2009 and May 2010, respectively, as amended.

Accounting Policies have been consistently applied, except where otherwise indicated below:

For the years ended 30 June 2012 and 30 June 2013 the municipality has adopted the accounting framework as set out in point 1 above. The details of any resulting changes in accounting policy and comparative restatements are set out below.

The municipality changes an accounting policy only if the change:

- a) is required by a Standard of GRAP; or
- b) results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the performance or cash flow.

1.1 Critical judgments, estimations and assumptions

The following are the critical judgments, apart from those involving estimations, that management has made in the process of applying the municipality's accounting policies and that have the most significant effect on the amounts recognised in the Annual Financial Statements:

1.1.1 Revenue Recognition

Accounting Policy 1.14.2 on *Revenue from Exchange Transactions* and Accounting Policy 1.14.3 on *Revenue from Non-exchange Transactions* describes the conditions under which revenue will be recorded by the management of the municipality.

In making their judgment, the management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: *Revenue from Exchange Transactions* and GRAP 23: Revenue from Non-Exchange Transactions. In particular when services are rendered, and whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

1.1.2 Financial assets and liabilities

The classification of financial assets and liabilities into categories is based on judgment by management.

1.1.3 Impairment of Financial Assets

Accounting Policy 1.11.3.3 on *Impairment of Financial Assets* describes the process followed to determine the value by which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: *Financial Instruments*. The management of the municipality is satisfied that the impairment of financial assets recorded during the year, is appropriate.

1.1.4 Useful lives of Property, Plant and Equipment ("PPE")

As described in Accounting Policies 2.1 and 2.3, the municipality depreciates/amortises its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use. The useful lives and residual values of the assets are based on industry knowledge.

1.1.5 Impairment: Write down of PPE

Significant estimates and judgments are made relating to PPE impairment tests.

1.1.6 Defined Benefit Plan Liabilities

As described in Accounting Policy 10.3, the municipality obtains actuarial valuations of its defined benefit plan liabilities. The defined benefit obligations of the municipality that were identified are Post-retirement Health Benefit Obligations and Long-service Awards. The estimated liabilities are recorded in accordance with the requirements of IAS 19: *Employee Benefits*. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in Note 9 to the Annual Financial Statements.

Multi-employer defined benefit funds are accounted for as defined contribution plan as set out in note 9.

1.2 Presentation currency

The Annual Financial Statements are presented in South African Rand, rounded off to the nearest Rand which is the municipality's functional currency.

1.3 Going concern assumption

The Annual Financial Statements have been prepared on a going concern basis.

1.4 Offsetting

Assets, liabilities, revenues and expenses have not been offset, except when offsetting is required or permitted by a Standard of GRAP.

1.5 Standards and interpretations issued but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2012 or later periods:

GRAP 27: Agriculture

This Standard of GRAP replaces the previous Standard of GRAP on Agriculture (GRAP 101) due to the IPSASB that has issued an IPSAS on Agriculture (IPSAS 27).

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality has early adopted the standard for the first time in the 2012 financial statements.

There is no impact of the standard on adoption.

GRAP 31: Intangible Assets

This Standard of GRAP replaces the previous Standard of GRAP on Intangible Assets (GRAP 102) due to the IPSASB that has issued an IPSAS on Intangible Assets (IPSAS 31).

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality has early adopted the standard for the first time in the 2012 financial statements.

There is no impact of the standard on adoption.

GRAP 105: Transfers of Functions Between Entities Under Common Control

The objective of this Standard of GRAP is to establish accounting principles for the acquirer and transferor in a transfer of functions between municipalities under common control.

A transfer of functions between municipalities under common control is a reorganisation and/or reallocation of functions between municipalities that are ultimately controlled by the same entity before and after a transfer of functions.

In the event of a transfer of functions between municipalities under common control, the assets and liabilities should be recognised (by the acquirer) at their carrying amounts and should be derecognised (by the transferor) at their carrying amounts.

The difference between amount of consideration paid or received, if any, and the carrying amounts of assets and liabilities should be recognised in accumulated surplus / (deficit).

Specific disclosures are required when there is a transfer of functions between municipalities under common control.

No effective date has yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomes effective.

It is unlikely that the standard will have a material impact on the municipality's financial statements.

GRAP 106: Transfers of Functions Between Entities not Under Common Control

The objective of this Standard of GRAP is to establish accounting principles for the acquirer in a transfer of functions between municipalities not under common control.

A transfer of functions between municipalities not under common control is a reorganisation and/or reallocation of functions between municipalities that are not ultimately controlled by the same entity before and after a transfer of functions.

In the event of a transfer of functions between municipalities not under common control, the assets and liabilities should be recognised (by the acquirer) at their acquisition-date fair values and should be derecognised (by the acquiree) at their carrying amounts.

The difference between amount of consideration paid or received, if any, and the fair value of assets acquired and liabilities assumed or carrying amounts of assets transferred and liabilities relinquished should be recognised in surplus / (deficit).

For transfer of functions between municipalities not under common control there are some specific recognition and measurement principles and exceptions to the recognition and measurement principles.

Specific disclosures are required when there is a transfer of functions between municipalities not under common control.

No effective date has yet been determined by the Minister of Finance.

The municipality expects to adopt the standard once it becomes effective.

The impact of this amendment is currently being assessed.

GRAP 107: Mergers

The objective of this Standard of GRAP is to establish accounting principles for the combined municipality and combining municipalities in a merger.

A merger is where a new combined municipality is started, no acquirer can be identified and the combining municipalities do not have any control over the municipality.

In the event of a merger, the assets and liabilities should be recognised (by the combined municipality) at their carrying amounts and should be derecognised (by the combining municipalities) at their carrying amounts.

The difference between the carrying amounts of assets and liabilities should be recognised in accumulated surplus / (deficit).

Specific disclosures are required when there is a merger.

No effective date has yet been determined by the Minister of Finance.

The municipality expects to adopt the standard once it becomes effective.

The impact of this standard is currently being assessed.

GRAP 20: Related Party Disclosures

The objective of this Standard of GRAP is to ensure that a municipality's financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

This Standard of GRAP requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the municipality in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This Standard of GRAP also applies to individual financial statements.

This Standard of GRAP requires that only transactions with related parties where the transactions are not concluded within normal operating procedures or on terms that are not no more or no less favourable than the terms it would use to conclude transactions with another municipality, entity or person are disclosed.

The Standard of GRAP sets out the requirements, inter alia, for the disclosure of:

- · control;
- related party transactions; and
- remuneration of management

No effective date has yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomes effective.

It is unlikely that the standard will have a material impact on the municipality's financial statements.

Improvements to Standards of GRAP

The following Standards of GRAP have been amended as part of the ASB's Improvements Project for 2011:

- GRAP 1;
- GRAP 3:
- GRAP 7:
- GRAP 9;
- GRAP 12;
- GRAP 13;
- GRAP 16; and

GRAP 17.

The changes made will have no significant impact, except for the following:

A change to the cost model when a reliable measure of fair value is no longer available (or vice versa) for an asset that a Standard of GRAP would otherwise require or permit to be measured at fair value are no longer considered to be a change in an accounting policy in terms of the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors (as revised in 2010).

A requirement to include transaction costs on initial recognition of an investment in an associate under the equity method, has been included in the Standard of GRAP Investments in Associates.

Changes were made to the Standard of GRAP on Investment Property (as revised in 2010) to ensure the consistent application of the principle where assets are acquired in exchange for non-monetary assets when the exchange transaction lacks commercial substance. Furthermore the assessment of significant use of an investment property has been clarified.

Changes were made to the Standard of GRAP on Property, Plant and Equipment (as revised in 2010) to ensure the consistent application of the principle where assets are acquired in exchange for non-monetary assets when the exchange transaction lacks commercial substance. Furthermore the requirement to disclose property, plant and equipment that were temporarily idle, has been clarified.

The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality expects to adopt the amendment for the first time in the 2014 financial statements.

It is unlikely that the amendment will have a material impact on the municipality's financial statements.

1.6 New standards and interpretations

1.6.1 Standards and interpretations effective and adopted in the current year

GRAP 25: Employee Benefits

The objective of GRAP 25 is to prescribe the accounting and disclosure for employee benefits. The Standard of GRAP requires a municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when a municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

The Standard of GRAP states the recognition, measurement and disclosure requirements of:

- short-term employee benefits;
- all short-term employee benefits;
- short-term compensated absences;
- bonus, incentive and performance related payments;
- post-employment benefits;
- other long-term employee benefits; and
- termination benefits.

The major difference between this Standard of GRAP and IAS 19 is with regards to the treatment of actuarial gains and losses and past service costs. This Standard of GRAP requires a municipality to recognise all actuarial gains and losses and past service costs immediately in the statement of financial performance once occurred.

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality expects to adopt the standard for the first time in the 2014 financial statements.

It is unlikely that the standard will have a material impact on the municipality's financial statements.

1.6.2 Standards applicable and effective

GRAP 6: Consolidated and separate financial statements

Harry Gwala District Municipality registered an entity in 2011 for the purpose of promoting local economic development. The entity is a registered entity described as Sisonke Economic Development Agency (Pty) Ltd Registration number: 2011/001221/07. Although registered in 2011, the entity only commenced operations during the 2012/2013 financial year. Hence comparative information in the consolidated financial statements reflect those of Harry Gwala District Municipality only; for the financial year 2012.

The standard prescribes the circumstances in which consolidated and separate financial statements are to be prepared and the information to be included in those financial statements so that the consolidated financial statements reflect the financial performance, financial position and cash flows of an economic entity as a single entity.

Separate annual financial statements for both the parent municipality and entity have been compiled.

1.7 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2012 or later periods but are not relevant to its operations:

GRAP 18: Segment Reporting

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which a municipality reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of a municipality that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by a municipality within a particular region.

No effective date has yet been determined by the Minister of Finance.

The municipality expects to adopt the standard once it becomes effective.

The adoption of this standard is not expected to impact on the results of the municipality, but may result in more disclosure than is currently provided in the financial statements.

1.8 PROPERTY, PLANT AND EQUIPMENT

1.8.1 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

CLASSES OF ASSETS	USEFUL LIFE IN YEAR
BUILDINGS:	
Office buildings	30
OTHER STRUCTURES (INFRASTRUCTURE ASSETS	
WATER:	
Dams/ Structure:	
- Concrete	100
- Earth	50

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of municipality are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue.

All cash flows on these assets are included in cash flows from operating activities in the municipality.

1.8.2 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment.

Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in

surplus or deficit; and

(c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.9 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

An intangible asset acquired through a non-exchange transaction, the cost shall be its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.

1.10 INVESTMENT PROPERTY

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital

appreciation or both, rather than for:

- use in the production or supply of goods or services or for administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

1.11 FINANCIAL INSTRUMENTS

The municipality has various types of financial instruments and these can be broadly categorised as either Financial Assets or Financial Liabilities.

1.11.1 Financial Assets - Classification

A financial asset is any asset consisting of cash or a contractual right to receive cash. The municipality has the following types of financial assets as reflected on the face of the Statement of Financial Position or in the notes thereto:

- Investments in Fixed Deposits (Banking Institutions, etc.)
- Unlisted investments
- Consumer Debtors
- Certain Other Debtors (see note 2.3)
- Short-term Investment Deposits
- Bank Balances and Cash

In accordance with GRAP 104, the Financial Assets of the municipality are classified as follows into the categories allowed by this standard:

Type of Financial Asset	Classification in terms of GRAP 104
Short-term Investment Deposits - Call	Financial assets at amortised cost
Bank Balances and Cash	Financial assets at amortised cost
Long-term Receivables	Financial assets at amortised cost
Consumer Debtors	Financial assets at amortised cost

Other Debtors Financial assets at amortised cost

Investments in Fixed Deposits Financial assets at amortised cost

Financial assets at amortised cost are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months, which are classified as non-current assets.

Cash and cash equivalents include cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

1.11.2 Financial Liabilities - Classification

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity. The municipality has the following types of financial liabilities as reflected on the face of the Statement of Financial Position or in the notes thereto:

- Long-term Liabilities
- Trade and other payables
- Bank Overdraft
- Short-term loans

Financial Liabilities of the municipality are classified into the following category as allowed by this standard

Financial liabilities at amortised cost.

Financial liabilities at amortised cost are initially measured at fair value, net of transaction costs. These are subsequently measured at amortised cost using the Effective interest method, with interest expense recognised on an effective yield basis.

1.11.3 Initial and Subsequent Measurement

1.11.3.1 Financial Assets:

Financial assets are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. Subsequently, these assets are measured at amortised cost using the effective interest method less, any impairment, with interest recognised on an effective yield basis in surplus /deficit.

Financial assets are recognised on the trade date at which the municipality becomes party to the contractual provisions of the instrument.

1.11.3.2 Financial Liabilities

Financial Liabilities at amortised cost are initially measured at fair value net of transaction costs. Subsequently, these liabilities are measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

Financial liabilities are recognised on the trade date at which the municipality becomes a party to the contractual provisions of the instrument.

1.11.3.3 Impairment of Financial Assets

Financial assets are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired where there is objective evidence of impairment of financial assets (such as the probability of insolvency or significant financial difficulties of the debtor). If there is such evidence the recoverable amount is estimated and an impairment loss is recognised in accordance with GRAP 104

An allowance for impairment based on past default experience of all outstanding amounts at year-end. Bad debts are written off the year in which they are identified as irrecoverable and are recognized in surplus or deficit for the year.

An allowance for impairment of trade receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. Changes in the carrying amount of the allowance for impairment are recognized in surplus or deficit for the year.

1.11.3.4 Derecognition of Financial Assets

The municipality derecognises financial assets only when the contractual rights to the cash flows from the asset expire or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of financial assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred financial asset, the municipality continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

1.11.3.5 Derecognition of Financial Liabilities

The municipality derecognises Financial Liabilities when, and only when, the municipality's obligations are discharged, cancelled or they expire.

1.12 INVENTORIES

1.12.1 Initial recognition

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition.

1.12.2 Subsequent measurement

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

1.13 NON-CURRENT ASSETS HELD-FOR-SALE

1.13.1 Initial Recognition

Non-current Assets and Disposal Groups are classified as held-for-sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Council must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

1.13.2 Subsequent Measurement

Non-current Assets (and Disposal Groups) classified as held-for-sale are measured at the lower of carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

1.14 REVENUE RECOGNITION

1.14.1 General

Revenue comprises the fair value of the consideration received or receivable from exchange or non-exchange transactions in the ordinary course of the municipality's activities. Revenue is shown net of value-added tax, returns, rebates and discounts.

The municipality recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the municipality and when specific criteria have been met for each of the municipalities' activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The municipality bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

1.14.2 Revenue from Exchange Transactions

1.14.2.1 Service Charges

Service charges relating to water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

1.14.2.2 Finance income

Interest earned on investments is recognised in the Statement of Financial Performance on the time proportionate basis that takes into account the effective yield on the investment.

1.14.2.3 Tariff Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff.

1.14.2.4 Rentals

Revenue from the rental of facilities and equipment classified as operating leases is recognised on a straightline basis over the term of the lease agreement, where such lease periods span over more than one financial year.

1.14.3 Revenue from Non-exchange Transactions

1.14.3.1 Property rates

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue

With effect 1 July 2011 property rates are no longer assessed as this only applied to District Municipal Areas.

1.14.3.2 Public contributions

Revenue from public contributions is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment are brought into use. Where public contributions have been received and the municipality has not met the condition, a liability is recognised.

1.14.3.3 Revenue from Recovery of Unauthorised, Irregular, Fruitless and Wasteful Expenditure

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain. Such revenue is based on legislated procedures.

1.15 GOVERNMENT GRANTS AND RECEIPTS

Income received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs, are recognised in the Statement of Financial Performance in the period in which they become receivable.

Interest earned on investments is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest it is recognised as interest earned in the Statement of Financial Performance.

1.16 PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the obligation.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

Provisions are reviewed at reporting date and the amount of a provision is the present value of the expenditure expected to be required to settle the obligation. When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market

assessments of the time value of money. The impact of the periodic unwinding of the discount is recognised in the Statement of Financial Performance as a finance cost as it occurs.

1.17 EMPLOYEE BENEFITS

1.17.1 Short-term Employee Benefits

Remuneration to employees is recognised in the Statement of Financial Performance as the services are rendered, except for non-accumulating benefits, which are only recognised when the specific event occurs.

The municipality treats its provision for leave pay as an accrual.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service. The liability for leave pay is based on the total accrued leave days at year end and is shown as a provision in the Statement of Financial Position. The municipality recognises the expected cost of performance bonuses only when the municipality has a present legal or constructive obligation to make such payment and a reliable estimate can be made.

1.17.2 Defined Contribution Plans

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees. The municipality has no further payment obligations once the contributions have been paid.

1.17.3 Post-retirement benefits

A defined benefit plan is a post- employment benefit plan other than a defined contribution plan.

1.17.3.1 Pension obligations

The municipality and its employees contribute to 4 different pension funds, namely Natal Joint Municipal Pension Fund and South African Local Authority Pension Fund. The KSN Municipal Pension Fund is a defined contribution fund. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable. Natal Joint Provident, Superannuation & Retirement Funds and Government Employee Pension Fund are defined benefit funds. The Natal Joint Provident Fund and South African Local Authority Pension Fund are defined contribution funds.

The schemes are funded through payments to fund administrator or trustee-administered funds, determined by periodic actuarial calculations. The Municipality has both defined benefit and defined contribution plans.

Defined benefit plans have been accounted for as defined contribution plans in accordance with the requirements on multi-employer plans where sufficient information is not available to account for such plans as defined benefit plans. As the fund administrators do not have sufficient information available to allocate the shortfall on liabilities to individual employers, no liability is recognised for any shortfall of fund asset as compared to fund liabilities. Any surcharges that may be levied by the fund from time to time in order to compensate for shortfalls, are recognised as expenses in the period in which they become payable to the fund. As surcharges are advised long in advance, based on actuarial valuations of the fund as a whole, the necessary provision for the payment thereof is made in the course of the municipality's normal budgeting processes.

For defined contribution plans, the Municipality pays contributions to fund administrators. The Municipality has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

1.17.3.2 Post-retirement Health Care Benefits:

The municipality has an obligation to provide Post-retirement Health Care Benefits to certain of its retirees. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current Conditions of Service), on retirement, is entitled to remain a continued member of the Medical Aid Fund, in which case the municipality is liable for a certain portion of the medical aid membership fee.

The liability is the aggregate of the present value of the defined obligation and recognised actuarial gains and losses, adjusted by past service costs where applicable. The plan is unfunded. The present value of the defined benefit obligation is calculated using the projected unit credit method, incorporating actuarial assumptions and an appropriate discount rate. Valuations of these obligations are carried out every year by independent qualified actuaries.

Actuarial gains or losses are accounted for in full and are recognised in the Statement of Financial Performance.

1.17.3.3 Long-service Allowance

The municipality has an obligation to provide Long-service Allowance Benefits to all of its employees. According to the rules of the Long-service Allowance Scheme, which the municipality instituted and operates, an employee (who is on the current Conditions of Service), is entitled to a cash allowance, as well as additional once-off leave calculated in terms of the rules of the scheme, after 10, 15, 20, 25, 30, 35, 40 and 45 years of continued service.

The municipality's liability is based on an actuarial valuation. The projected unit credit method has been used to value the liabilities. Actuarial gains and losses on the long-term incentives are accounted for through the statement of financial performance.

Actuarial gains or losses are accounted for in full and are recognised in the Statement of Financial Performance.

1.18 LEASES

The Municipality as Lessee

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or Intangible Assets subject to finance lease agreements are capitalised at amounts equal to the fair value of the leased asset or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Corresponding liabilities are included in the Statement of Financial Position as Finance Lease Liabilities. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred. Lease payments are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangible assets. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are recognised as an expense in the statement of financial performance on a straight-line basis over the term of the relevant lease.

1.19 BORROWING COSTS

The municipality capitalises borrowing costs incurred that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset are recognised as an expense in surplus or deficit for the year.

It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established - the municipality expenses borrowing costs when it is inappropriate to capitalise it. The municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete.

1.20 VALUE ADDED TAX

The Municipality accounts for Value Added Tax on the payments basis.

1.21 CASH AND CASH EQUIVALENTS

Cash includes cash-on-hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in financial instruments, net of bank overdrafts.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

1.22 UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No 56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently account for as revenue in the statement of financial performance

1.23 IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No 56 of 2003), the Municipal Systems Act (Act No 32 of 2000), and the Public Office Bearers Act (Act No 20 of 1998) or is in contravention of the Municipality's or Municipal Entities' supply chain management policies. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as an expense in the Statement of Financial Performance, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.24 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.25 CHANGES IN ACCOUNTING POLICIES, ESTIMATES AND ERRORS

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate

the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Errors are corrected retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

1.26 RELATED PARTIES

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Key management personnel is defined as the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

1.27 EVENTS AFTER THE REPORTING DATE

Events after the reporting date that have been classified as adjusting events have been accounted for in the Annual Financial Statements. The events after the reporting date that are classified as non-adjusting events after the reporting date have been disclosed in the notes to the Annual Financial Statements.

1.28 COMPARATIVE INFORMATION

Prior year comparatives

When the presentation or classification of items in the Annual Financial Statements is amended, prior period comparative amounts are reclassified. The nature and reasons for the reclassification are disclosed.

1.29 CONTINGENT ASSETS AND CONTINGENT LIABILITIES

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the annual financial statements.

: SENSITIVITY ANALYSIS

The results presented are based on a number of assumptions. The extent to which the actual liability faced in the future by the Municipality differs from these results will depend on the extent to which actual experience differs from the assumptions made. The assumption which tends to have the greatest impact on the results is the rate of health care cost inflation relative to the discount rate.

Sensitivity Results

The liability at the Valuation Date was recalculated to show the effect of:

- (i) A 1% increase and decrease in the assumed rate of health care cost inflation;
- (ii) A one-year age reduction in the assumed rates of post-retirement mortality;
- (iii) A one-year decrease in the assumed average retirement age; and
- (iv) A 50% reduction in the assumed withdrawal rates

The following Table summarises the results of the sensitivity analysis.

Post-retirement Health Care Benefit Liability - Continued

: Sensitivity Analysis on the Accrued Liability (R Millions)

Assumption	Change	In-service	Continuation
Central Assumptions		10.373	0.551
Health care inflation	1.0%	12.156	0.583
	-1.0%	8.804	0.524
Post-retirement mortality	- 1 yr	10.757	0.575
Average retirement age	- 1 yr	11.623	0.551
Withdrawal rate	-50%	8.515	0.551

Assumption (Continued)	Total	% change
Central Assumptions	10.924	
Health care inflation	12.739	17%
	9.328	-15%
Post-retirement mortality	11.332	4%
Average retirement age	12.175	11%
Withdrawal rate	9.066	-17%

Note: The post-retirement mortality adjustment assumes that someone aged 70 will experience the mortality of someone aged 69. The liability is expected to increase under this scenario because members are expected to live longer

The table above indicates, for example, that if medical inflation is 1% greater than the long-term assumption made, the liability will be 17% higher than that shown.

SENSITIVITY ANALYSIS

The results presented are based on a number of assumptions. The extent to which the actual liability faced in the future by the municipality differs from these results will depend on the extent to which actual experience differs from the assumptions made.

The assumptions which tend to have the greatest impact on the results are:

- (1) The discount rate relative to the salary inflation assumptions;
- (2) The average retirement age of employees; and
- (3) Assumed rates of withdrawal of employees from service.

SENSITIVITY RESULTS

The liability at the Valuation Date was recalculated to show the effect of:

- (1) A 1% increase and decrease in the assumed general salary inflation rate;
- (2) A two-year decrease and increase in the assumed average retirement age of employees; and
- (3) A 50% decrease in the assumed withdrawal rates from service.

36.2	Operating leases		
	At the reporting date the entity has outstanding commitments under operating leases which fall due as follows:		
	Operating leases - lessee		
	Within one year	232 320	286 696
	In the second to fifth year inclusive	-	232 320
	Total Operating Leases Operating Leases appoints of the following:	232 320	519 016
	Operating Leases consists of the following:		

Operating lease payments represent rentals payable by the municipality for certain of its office properties. Leases are negotiated for an average term of seven years and rentals are

fixed for an average of three years.

37. RETIREMENT BENEFITS

Pension benefits

The Municipality's personnel are members of one of the Natal Joint Municipal Pension retirement funds, namely the Superannuation, Retirement and Provident Funds. As the aforementioned funds are multi-employer funds, the allocation of any surplus/deficit to individual municipalities cannot be determined. Furthermore disclosure of further details such as actuarial assumptions, cannot be attributed to any specific municipality and is of no relevance to users of the municipality's financial statements.

Superannuation

The interim valuation carried out on the Superannuation Fund as at 31 March 2013 reflected:

The memorandum account in respect of pensioners was fully funded. The required contribution rate for active members exceeded the contribution rate payable by 3.36% of pensionable salaries thus necessitating a contribution increase from 18% to 21.63% of pensionable salaries to fund the shortfall in contributions. The deficit in the fund, as at 31 March 2011, in respect of active members, amounted to R549.5m (discounted cashflow method). This deficit has increased since the last valuation date and has thus necessitated an increase in the surcharge from 7% to 9.5% for a period of 8 years from July 2012.

The interim valuation carried out on the Superannuation Fund as at 31 March 2012 reflected:

The memorandum account in respect of pensioners was fully funded. The required contribution rate for active members exceeded the contribution rate payable by 0.22% of pensionable salaries. It is recommended that local authorities continue to pay the current contribution rate of 21.63% of pensionable salaries. The deficit in the fund, as at 31 March 2012, in respect of active members, amounted to R270.0m (discounted cashflow method). This deficit has decreased since the last valuation date. In terms of the scheme, a surcharge of 9.5% of pensionable salaries is payable for a period of 8 years with effect from 1 July 2012.

Provident Fund

The latest interim statutory valuation of the Provident Fund (defined contribution) as at 31 March 2013 and the interim valuation as at 31 March 2010 revealed that the fund was in a sound financial position.

Retirement Fund

The interim valuation carried out on the Retirement Fund as at 31 March 2010 reflected: The memorandum account in respect of pensioners was fully funded on the discounted cash flow method. The Funds liabilities for the contributory members exceeded the value of the assets; it is expected that the shortfall will be funded by a surcharge of 17% of pensionable emoluments by 2015.

The latest statutory valuation of the Retirement Fund (defined benefit) as at 31 March 2012 reflected:

The memorandum account in respect of pensioners was fully funded on the discounted cash flow method. The Funds assets for the contributory members exceeded the value of the liabilities and reserves. The fund was in a sound financial condition as at 31 March 2012

39. FINANCIAL INSTRUMENTS

Financial Risk Management Objectives

Due to the largely non-trading nature of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities. The municipality's Corporate Treasury function provides services to the business, co-ordinates access to domestic financial markets, monitors and manages the financial risks relating to the operations of the municipality. These risks include market risk (including, fair value and interest rate risk), credit risk and liquidity risk.

The use of financial derivatives is governed by municipalities policies approved by the Council, which provides written principles on interest rate risks, credit risks, the use of financial derivatives and non-derivatives financial instruments, and the investments of excess liquidity. The municipalities does does not enter into or trade financial instruments, including derivatives financial instruments, for speculative purposes.

39.1 Maximum credit risk exposure

Credit rate risk consist mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party

Except as detailed below, the carrying amount of financial assets recorded in the Annual Financial Statements, which is net of impairment losses, without taking account of the value of any collateral obtained:

The maximum credit exposure in respect of the relevent financial instruments is as follows (domestic exposure only)

	2014	2013
	R	R
Investments	-	-
Cash and Cash Equivalents	29 474 485	20 185 998
interest rate swaps		-
Financial guarantees	-	-
Trade and other receivables	53 780 484	46 133 402
Maximum Credit Exposure	83 254 969	63 533 843

39.2 Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an on-going review of future commitments and credit facilities

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position to the contractual maturity date. The amounts disclosed in the table are the undisclosed cash flows.

2014	1 month or less	> 12 months
Gross finance lease obligations	2 923 407	5 129 664
Long Term Borrowings	3 415 335	22 063 772
Trade and other payables	81 573 445	-

2013	1 month or less	> 12 months
Gross finance lease obligations	1 697 816	2 088 618
Long Term Borrowings	3 297 062	25 595 948
Trade and other payables	85 614 047	-

Other Financial Risk Management Objectives

39.3 Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in the market interest rates.

At year end, financial instruments exposed to interest rate risk were as follows:

	2014	2013
	R	R
Call deposits	27 840 042	19 288 850
Bank balances and cash	1 634 143	897 148
DBSA loan	1 663 578	2 883 928
ABSA loan	23 815 529	26 009 082
Maximum Interest exposure	54 953 292	49 079 008

Property, Plant and Equipment as previously reported Infrastructure assets previously not recognised as Property, Plant and Equipment -Refer to Statement of changes in net assets

28 518 025

43. GOING CONCERN

Harry Gwala District Municipality has been experiencing working capital management challenges largely posed by its inability to maximize debt collection which would result in healthier cash flows. The liquidity position of the Municipality though still unsatisfactory reflects improvement over the past three years with the reporting period included at 0.85 (2014) 0.61:1 (2013) ratio.

The Municipality each year, in terms of Division of Revenue Act, receives considerable funding through equitable share for largely operating budget and Municipal Infrastructure grant for providing water and sanitation infrastructure development so as to provide basic services. In an effort to reduce the current liabilities the municipality has, in its 2014/2015 budget, provided for the projects the conditional grants of which were used on other programmes unrelated to the grant. Systems of internal controls have been established in order to appropriately manage the employment of conditional grants.

As a consequence, the Council believes that the Municipality is well placed to manage its business risks successfully despite the current uncertain economic outlook. The Council have a reasonable expectation that the municipality has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the annual financial statements

44. RELATED PARTIES

Controlled Entities

The municipality controls the following reporting entity:

Sisonke Economic Development Agency:

Harry Gwala District Municipality has 100% shareholding in Sisonke Economic Development Agency. Sisonke Economic Development Agency is a registered (PTY) Ltd company in terms of the Company Act
