#### APPROVAL OF FINANCIAL STATEMENTS

I am responsible for the preparation of these annual financial statements year ended 30 June 2015, which are set out on pages 1 to 70 in terms of Section 126 (1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. The annual financial statements have been prepared in accordance with GRAP.

I acknowledge that I am ultimately responsible for the system of internal financial control and that the system of internal control provides reasonable assurance that the financial records can be relied on.

I have reviewed the Municipality's cash flow forecast for the year to 30 June 2015 and am satisfied that the Municipality can continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the Municipality's financial statements.

I certify that the remuneration of Councillors and in-kind benefits are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

ANNUAL FINANCIAL STATEMENTS for the year ended 30 June 2012

#### REPORT OF THE CHIEF FINANCIAL OFFICER

#### 1. INTRODUCTION

It gives me great pleasure to present the financial position of SAKHISIZWE LOCAL MUNICIPALITY for the fiscal year 2012/2013

In rendering a corporate financial management service to all departments, the Finance Department's primary objective is to assist the Municipal Manager and senior management to manage their budgets and ensure the effective application of financial resources in rendering services to the community.

Ubuntu Municipality is now compliant with the requirements of GRAP. It has been a long, difficult and very expensive process, the worth of which is at best minimal. In times when municipalities are battling to balance their budgets and when there is little or no local economic growth, to be able to know what the depreciated replacement cost of a pipe buried three metres under the ground beggars belief. It was once said that municipal financials were opaque and there was truth in that statement, but in making them less opaque and embracing transparency, we have assumed that people will understand them better and, even more so, that they actually care about what they are reading. People, just like banks and credit agencies, want to know what the budget is, what the debtors are like and have you got cash to pay your creditors. Nothing we have done in the last six years, in order to reach GRAP compliance, changes that.

#### 2. KEY FINANCIAL INDICATORS

The economic downturn and the Eskom issues continue to play havoc with good financial management. The Ubuntu economy has been battered of late and all indications are that it will get worse before it gets better.

This is not because of bad or incompetent management, but because it is the nature of the business and the economy. I would therefore hope that National and Provincial bureaucrats take heed of this fact before making any incorrect or ill-conceived statements or judgements.

#### **Financial Statement Ratios:**

INDICATOR	30 June 2013	30 June 2012
Surplus / (Deficit) for the year before Appropriations	15 774 311	(13 060 560)
Accumulated Surplus / (Deficit) at the end of the Year	170 637 203	154 862 891
Expenditure Categories as a percentage of Total Expenses:		
Employee related costs	35.89%	32.23%
Remuneration of Councillors	6.84%	4.86%
Debt Impairment	0.71%	12.12%
Depreciation and Amortisation	13.23%	9.92%
Impairments	0.00%	0.00%
Repairs and Maintenance	1.19%	4.70%
Actuarial losses	0.09%	0.00%
Finance Charges	0.96%	0.78%
Bulk Purchases	10.74%	5.75%
Contracted services	0.00%	0.00%
Grants and Subsidies	5.35%	5.09%
Stock Adjustments	0.00%	0.00%
Operating Grant Expenditure	0.00%	0.00%
General Expenses	24.99%	24.54%
Loss on disposal of Property, Plant and Equipment	0.00%	0.00%
Fair Value Adjustments	0.00%	0.00%
Current Ratio:		
Creditors Days	70	99
Debtors Days	987	1 728.33

One indicator needing comment is that of repairs and maintenance. In recent years there has been made much comments as to how low this ration is. It should be noted that the ratio improvement has been achieved despite the massive increases in Eskom charges.

2

The municipality has plant & equipment assets with a carrying value of R2,923,352 (2014: R8,274,930) subject to a finance lease.

It is the municipality's policy to lease certain motor vehicles, plant & equipment under finance leases. In terms of GRAP 13, when office equipment is rented over the major part of its useful life, the relevant lease is deemed a finance lease and the related liability raised and the asset capitalised.

The average lease term was 5 years and the average effective borrowing rate was prime for the Wesbank motor vehicles and prime plus 4% fixed for the plant & machinery. No escalation clause is contained in the lease agreements. Ownership on the vehicles will transfer to the municipality at the end of the lease term. Ownership for the office equipment remains with the lessor. No security has been offered by the municipality for the leased assets. Bell Equipment stand security for the plant & equipment.

Total finance costs paid for the current year is R371,231 (2014: R428,306)

The municipality performed their first actuarial valuation on 30 June 2008.

The municipality makes monthly contributions for health care arrangements to the following medical aid

Hosmed Kei Health LA Health Bonitas SAMWUMED

O/ WITT OINED	2015	2014
Key actuarial assumptions used:	%	%
i) Rate of interest		

Discount rate	8.49%	8.29%
Health Care Cost Inflation Rate	7.69%	7.67%
Net Effective Discount Rate	0.75%	0.58%

Discount Rate: GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-employment liabilities should be used.

Consequently, a discount rate of 8.29% per annum has been used. The corresponding index-linked yield at this term is 1.53%. These rates do not reflect any adjustment for taxation. These rates were deduced from the JSE Zero Coupon bond yield after the market close on 30 June 2015.

#### ii) Mortality rates

The post-retirement mortality used in the valuation is PA(90) M for males, and PA(90) F for Females.

#### iii) Normal retirement age

It has been assumed that the normal retirement age of the Sakhisizwe Municipality employees is 60 years for males and 60

The amounts recognised in the Statement of Financial Position are as follows:	2015 R	2014 R
Present value of fund obligations	1 360 235	1 284 649
Total Liability	1 360 235	1 284 649

The fund is wholly unfunded.

The municipality has elected to recognise the full increase in this defined benefit liability immediately as per IAS 19, Employee Benefits, paragraph 155 (a).

Sakhisizwe Municipality will contribute 70% of the total premium payable, subject to a maximum of R3,042 (2014: 3,372.89). This is an increase of 6.79% (the same as the salary increase granted on 1 July 2014 per the SALGBC bargaining council agreement 3:2014) from the figure of R3,158.43 used in the previous valuation. The municipality only subsidises the employee, spouse or life partner, biological children, and legally adopted children, up to the age of 21 years. An assumption is therefore made that should a child dependant turn 21 years of age, hc/sho is no longer eligible for subsidy benefits.

#### Membership profile:

The calculation is based on 3 members (2014: 3) with an average age of 68.5 (2014: 67.5), and 0.3 average dependants 2014: 0.3) and an average monthly contribution of R3,042 (2014: R2,761)

#### Assumptions used at the reporting date: Valuation assumptions

It is difficult to predict future investment returns and health care cost inflation rates. The relationship between them is more stable and therefore easier to predict. GRAP 25 requires that financial assumptions be based on market expectations at the Valuation Date for the period over which the liability obligations are to be settled.

Discount Rate: GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-employment liabilities should be used.

Consequently, a discount rate of 8.49% per annum has been used. The corresponding index-linked yield at this term is 1.7%. These rates do not reflect any adjustment for taxation. These rates were deduced from the JSE Zero Coupon bond yield after the market close on 30 June 2015.

The rate is calculated by using a weighted average of yields for the three components of the liability. Each component's fixed-interest and index-linked yield was taken from the JSE (Best Decency) Zero Coupon bond yield curve at that component's liability-weighted average duration, using an iterative process (because the yield depends on the liability, which in turn depends on the yield). The three components are as follows.

Health Care Cost Inflation Rate: This assumption is required to reflect estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs (for example, due to technological advances or changes in utilisation patterns). Any assumption regarding future medical scheme contribution increases is therefore subjective.

A health care cost inflation rate of 7.69% has been assumed. This is 1.50% in excess of expected CPI inflation over the expected term of the liability, namely 6.19%. A larger differential would be unsustainable, eventually forcing members to less expensive options. This implies a net discount rate of 0.75% which derives from ((148.49%)/(147.69%))-1.

The expected inflation assumption of 6.19% was obtained from the differential between market yields on indexlinked bonds consistent with the estimated term of the liabilities (1.70%) and those of fixed interest bonds (8.49%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). This was therefore determined as follows: ((1+8.49%-0.50%)/(1+1.70%))-1.

#### Demographic Assumptions

Demographic assumptions are required to estimate the changing profile of current employees and retirees who are eligible for post-employment benefits.

Post-retirement Mortality

PA(90) ultimate table.

Family Profile (retirees)

It has been assumed that husbands will be four years older than their wives. For current retiree members, actual marital status was used and the potential for remarriage was ignored.

#### Aurecon estimated the rehabilitation costs based on the following assumptions:

- It is assumed that the following information provided by the municipality is correct:

- It is assuring that the following information provided by the infinitelyainty is correct.

  The Sakhisizwe municipality could not confirm the operational date of the Cala site.

  Thus, the operational date was assumed to be 2005 when the permit for operation was received.

   The Sakhisizwe municipality could not confirm the operational date of either the Elliot site. Thus, the operational date was assumed to be 2012 when the permit for upgrades to the site was received.
- Rehabilitation requirements are guided by Minimum Requirements

#### Estimated year of closure of the Cala site is 2017 and the Elliot site is 2015

- Costing

   Construction cost estimates were based on typical 'civil engineering' rates obtained from various recent contracts and historic pricing data.

  The estimate includes:
- Contractor Preliminary and General Items at 20% of construction costs:
- Contingencies at 10% of total construction costs to cover unforeseen costs;
- Design Fees at 14% of total costs (construction and contingencies); and
   All costs exclude VAT.
   The May 2014 costs were escalated to the anticipated date of closure based on civil contract price adjustment (CPA) indices (2012 based: June 2014) (4.566%). These indices are based on labour, fuel, material and plant costs. CPA has been calculated as per the other landfills done using Northern Cape (Province) price indices.
- Rehabilitation costs were calculated using criteria for closure detailed in the Minimum

- Requirements. The costs are based in verified contractor rates.

  The extent of the sites to be rehabilitated was determined from a site visit. A surveyor surveyed the Cala and Eliot sites to determine the lifespan. X, Y and Z co-ordinates were taken at set intervals (20m x 20m) in order to allow for the modeling of the waste body. The extent of the waste disposal sites were considered to be as follows: Cala (5100 m2), Elliot (20100 m2).
- The approximate height of the Elliot landfill was established by using the existing berms on the site as the
- top of the landfill varies according to the existing berm heights;

   The approximate height of the Cala landfill was established by using the highest existing peak according to the survey information;
- It is assumed that topsoil/cover soil is available near the site.
- Where sites are not currently fenced, allowance has been made to fence the site. The municipal waste

#### SAKHISIZWE MUNICIPALITY NOTES ON THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2015

There was a significant increase in the provision for the rehabilitation of the landfill sites R9'358'586 in the current year based on the change in the assessment by the Engineer of the remaining useful live of the landfill sites.

Fruitless and wasteful expenditure awaiting further action 814 832 794 526

Included in the opening balance is an amount identified in 2012 for a contract entered into between MTN Cellular Service Provider and Sakhisizwe Municipality, whereby the municipality stands as surify for numerous cellphone contracts for unknown users of the cellphones. The original agreement between the service provider and the municipality was not conducted and signed by an authorised municipal official, neither have the costs been recovered from the users of the cellphones. The payment to MTN in the current financial year is regarded as fruitless and wasteful expenditure. An amount of R6,000 was overpaid to a supplier due to a casting error on their invoice submitted. An amount of R56,430 was overpaid to the supplier for car hire.

Included in the opening balance is an amount identified in 2011 for licencing & service fees totalling R23,138 were incurred in 2010 by the Traffic department on licencing & service fees paid to TCS (Pt)/Ltd for the use of a system which is no longer in use by the Traffic department, but for which no notice has been given to the relevant company to cancel the contract. No attempt has been made to recover the fruitless expenditure. No criminal or disciplinary steps were considered necessary in relation to the expenditure. The expense had not been condoned as at 30 June 2014.

Fruitless expenditure of R25,234 was incurred in 2014 due to interest incurred on outstanding Eskom and Telkom accounts.

2015: VAT penalties of R20'306 were incurred with SARS.

Expenditure to the value of R 17 115 733 (2014: R 4791'081) was incurred during the current financial year, for which three quotations were not obtained for the expenditure in order to comply to the relevant SCM regulations, however the goods and services were received for this expenditure. As a result, the expenditure is considered irregular and it will be investigated further by management.

Included in the irregular expenditure, is an amount of R1 566 330 for Performance Bonuses paid to management for which no performance assessments had been performed by the municipality for the financial years ended 2009 to 2013. The payment for the 2009 to 2013 financial years were made in the 2014 financial

Recoverability of all irregular expenditure will be evaluated by Council in terms of section 32 of MFMA. No

steps have been taken at this stage to recover any monies.

The municipality restated the prior balances of Irregular Expenditure with the following amounts:

2015: R 6'130'842

2014: (R 868'764) 2013: R 86'241

The total Irregular Expenditure written off by Council in 2015 was adjusted by R 19'464'587.

The municipality reviewed the supporting documentation for all expenditure for the 2013 till 2015 financial years. The management letters issued by the Auditor General for the related years were reviewed for misstatements detected by the Auditor General. It was not practical to go back further in the investigation by the municipality to restate the irregular expenditure as the documentation has subsequently been misplaced.

A balance of Irregular Expenditure totalling R 24'812'905 still needs to be written off by Council. The amount comprises Performance Bonuses of R1'566'330 for 2014 and R 23'246'575 for the current financial year.

#### 36.4 Material Losses

# Electricity distribution losses

- Units purchased (Kwh)
- Units lost during distribution (Kwh)
   Percentage lost during distribution

Electricity losses; as at the time of the submission of the financial statements, the municipality was unable to determine electricity losses as no bulk meters or other systems are currently in place to identify and quantify electricity distribution losses. The installation of bulk electricity meters is in its planning stage.

# Other non-compliance (MFMA 125(2)(a))

Section 9(a) of the MFMA requires the accounting officer of a municipality to submit to the relevant provincial treasury and the Auditor General, in writing within 90 days after the municipality has opened a new bank account , the name of the bank where the account has been opened, and the type and number of the account. There were no new accounts opened during the current financial year.

Section 32 (4) (a) of the MFMA states that the accounting officer must promptly inform the mayor, the MEC of local government in the province and the Auditor General in writing of any unauthorised, irregular or fruitless and wasteful expenditure incurred by the municipality. The municipality did not inform the relevant parties as

The municipality did not update their website with all relevant documentation as required by Section 75(2) of the MFMA. The matter has only been adressed after year-end.

# 39 FINANCIAL RISK MANAGEMENT

38

The activities of the municipality expose it to a variety of financial risks, including market risk (comprising fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and fquidity risk. The municipality's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance.

# (a) Foreign Exchange Currency Risk

The municipality does not engage in foreign currency transactions.

# (b) Price risk

The municipality is not exposed to price risk.

# (c) Interest Rate Risk

As the municipality has significant interest-bearing liabilities, the entity's income and operating cash flows are substantially dependent on changes in market interest rates.

The municipality analyses its potential exposure to interest rate changes on a continuous basis. Different scenarios are simulated which include refinancing, renewal of current positions, alternative financing and hedging. Based on these scenarios, the entity calculates the impact that a change in interest rates will have on the surplus/deficit for the year. These scenarios are only simulated for liabilities which constitute the majority of interest bearing liabilities.

The municipality did not hedge against any interest rate risks during the current year.

The potential impact on the entity's surplus/deficit for the year due to changes in interest rates were as follow:

 1 % (2014 - 1%) Increase in interest rates
 47 136
 (26 021)

 0.5% (2014 - 0.5%) Decrease in interest rates
 (23 568)
 13 011

# (d) Credit Risl

Credit risk is the risk that a counter party to a financial or non-financial asset will fail to discharge an obligation and cause the municipality to incur a financial loss.

Credit risk consist mainly of cash deposits, cash equivalents, trade and other receivables and unpaid conditional grants and subsidies. The municipality only deposits cash with major banks with high quality credit standing and limited exposure to any one counter-party.

Receivables are disclosed net after provisions are made for impairment and bad debts. Trade debtors comprise of a large number of ratepayers, dispersed across different sectors and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Credit risk pertaining to trade and other debtors is considered to be moderate due the diversified nature of debtors and immaterial nature of individual balances. In the case of consumer debtors the municipality effectively has the right to terminate services to customers, however customers cannot be refused basic services, therefore in practice this is difficult to apply and this constitutes a serious credit risk. A credit control policy is in place so as to minimise the risk but the risk is largely dependent on the political will for execution to control the credit risk.

All rates and services are payable within 30 days from invoice date. Refer to note 14 and 15 for all balances outstanding longer than 30 days. These balances represent all debtors at year end which defaulted on their credit terms. Also refer to note 14 and 15 for balances included in receivables that were re-negotiated for the period under review.

No receivables are pledged as security for financial liabilities.

Due to the short term nature of receivables the carrying value disclosed in note 14 and 15 of the financial statements is an approximation of its fair value. Interest on overdue balances are included at prime lending rate plus 1% where applicable.

The provision for bad debts could be allocated between the different classes of debtors as follows:

The entity only deposits cash with major banks with high quality credit standing. No cash and cash equivalents were pledged as security for financial liabilities and no restrictions were placed on the use of any cash and cash equivalents for the period under review. Although the credit risk pertaining to cash and cash equivalents are considered to be low, the maximum exposure are disclosed below.

# SAKHISIZWE MUNICIPALITY NOTES ON THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2015

The entity only enters into non-current investment transactions with major banks with high quality credit standing. Although the credit risk pertaining to non-current investments are considered to be low, the maximum exposure are disclosed below.

The banks utilised by the municipality for current and non-current investments are all listed on the JSE (First National Bank). The credit quality of these institutions are evaluated based on their required SENS releases as well as other media reports. Based on all public communications, the financial sustainability is evaluated to be of high quality and the credit risk pertaining to these institutions are considered to be low.

The risk pertaining to unpaid conditional grants and subsidies are considered to be very low. Amounts are receivable from national and provincial government and there are no expectation of counter party default.

Long-term Receivables and Other Debtors are individually evaluated annually at Balance Sheet date for impairment.

# (e) Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying business, the treasury maintains flexibility in funding by maintaining availability under credit lines.

The entity's risk to liquidity is a result of the funds available to cover future commitments. The entity manages liquidity risk through an ongoing review of future commitments and credit facilities. Cash flow and available borrowing facilities are monitored.

The table below analyses the entity's financial liabilities into relevant maturity groupings based on the remaining period at the financial year end to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Pending litigation exists against the municipality totalling approximately R3'769'409, comprising of the following pending cases:

- Xabane Civils CC has instituted action in the Grahamstown High Court for payment allegedly due to it in the sum of R 168 189.94 relating to a tender for construction of a road;
- Bay Drive Trading 151 (Pty) Ltd has instituted action in the Grahamstown High Court for payment in the sum of R 1 857 330.00, being allegedly due to it relating to a tender for crushed rock;
- Bavuka Trading has instituted action in the Mthatha High Court for payment allegedly due to it in the sum of R 372 900.00 relating to a tender for ablution facilities;
- Mr Dalasile has instituted action in the Cala Magistrate Court for alleged damages he suffered in the sum of R 12 000.00 for his impounded bull; - Barend Jakobus du Randt has launched an eviction application against Mr Khaka and eight others including
- the municipality;
   3 Sixty Precast Concrete (Pty)Ltd obtained default judgment against the municipality in the Cala Magistrate
- Court for the sum of R 28 233.90, which is allegedly due to it for goods sold and delivered.

   Kate Lombaard (30-Sep-13): Outstanding account subscription fee for advertisement services for R64
- 651.00.

   Mr W Pretorious (31-Oct-13): Setting aside arbitration of commissioner T Ncethezo for R900 000.

- M.I Peterson (03-Apr-15): Payment of services for 22 757.72.
   V. Nosindwa (22-Jun-15): Loyiso Nyembe, compensation for the death of a cow for an estimated R9 000.

ESKOM: under billing of electricity is disclosed as a contingent liability as electricity sales are approximately 497'087 (2013: 1.5 million) units more than units purchased from Eskom, as it has been determined that Eskom has possibly under billed the municipality for electricity consumed during the 2013 and 2014 financial year. A contingent liability has been disclosed for electricity consumed, but not paid for by the municipality as Eskom could bill the municipality for the amount under billed by Eskom.
