Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Officer's Report

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2016 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Dissolving and merger of Nkonkobe Municipality with Nxuba Municipality

The Demarcation Board has suggested an amalgamation of Nkonkobe Local Municipality with Nxuba Local Municipality. Should the suggested merger be successful, both municipalities will be dissolved and a new municipality formed. The assets and liabilities of the municipality will be transferred on a going concern basis to the newly established municipality. The realisation of the assets transferred will be sufficient to settle the liabilities transferred. Accordingly, the financial statements will be prepared on accounting policies applicable to a going concern. The effective date of the merger is not yet determined

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors

Going concern.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

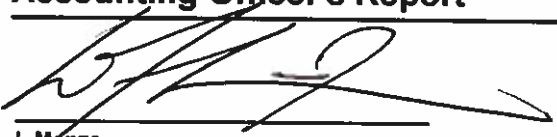

Subsequent events.

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year

The Municipality has appointed a fully fledged and functional audit committee in May 2015. As at year end, the audit committee both current and previous had not held the legislated number of meetings per annum. Although the current audit committee has recently been appointed, their presence and inputs are already being felt in the form of the review of annual financial statements and the general assesment of the processes of the Municipality. External auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page 7.

The annual financial statements set out on pages 7 to 58, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2015 and were signed by him.

Accounting Officer's Report

L. Menze
Acting Municipal Manager

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Mayor's Foreword

The accounting officer submits his report for the year ended 30 June 2015.

It gives me great pleasure to present the annual financial statements for the 2014/2015 financial year. The Municipal Finance Management Act provides that a municipality must prepare the annual financial statements of the institution and, within two months after the end of the financial year to which those statements relate, submit them to the Auditor General for auditing. During the last financial year we presented improved financial statements to Council. This year, as we endeavour to make further improvements to our financial statements, as the municipality we have tried our utmost best to adhere to the Generally Recognised Accounting Practices when preparing the financial statements - to produce reports attuned to specific needs of the Nkonkobe community.

The annual financial statements for the year under review 2014/2015 - portray a picture of continuous improvement from the previous financial year. This is with regards to financial viability and debt management of the municipality. As an institution with a thin revenue base we have devised strategies to enhance our revenue, so that we are able to move away from grant dependency and become a self sufficient municipality. Together with devising strategies to improve our thin revenue base, we are also attentive to the state of our records, particularly with debtors, in providing for and writing off bad debts. This is an attempt to ensure that the financial statements fairly present the financial state of Nkonkobe Municipality.

To this end, we continue to monitor the performance and successes of the technical unit as it progresses to do most of the projects inhouse. As some of the projects are funded through our own revenue, we have endeavoured to ensure that new projects are kept at a minimum so as to not overburden our already stretched internal revenue base. As a result, I can safely say that the current financial statements are a true reflection of all the institution's financial activities in the year under review. The challenges that the municipality faced before should be a thing of the past and as such, we firmly believe that we can do better to change the situation from qualified to clean audit.

We are especially pleased to have a new fully fledged and functional audit committee which continues to enhance the performance and output of our internal audit unit.

Honourable Mayor
AW Ntsangani

Nkonkobe Local Municipality

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

All amounts have been rounded off to the nearest rand in accordance with GRAP 1 paragraph 54 (e).

The principal accounting policies, applied in the preparation of these annual financial statements, are set out below. These accounting policies are consistent with those applied in the preparation of the prior year annual financial statements, unless specified otherwise. Details of any changes in the accounting policies are provided in note 46 "Prior period errors".

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

Dissolving and merger of Municipality:

The Demarcation Board has suggested an amalgamation of Nkonkobe Local Municipality with Nxuba Local Municipality. Should the suggested merger be successful, both municipalities will be dissolved and a new municipality formed. The assets and liabilities of the municipality will be transferred on a going concern basis to the newly established municipality. The realisation of the assets transferred will be sufficient to settle the liabilities transferred. Accordingly, the financial statements will be prepared on accounting policies applicable to a going concern. The effective date of the merger is not yet determined.

1.3 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.3 Property, plant and equipment (continued)

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount. When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset. Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit. Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset. The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised. The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited in revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight line	indefinite life
Buildings	Straight line	15-50
Sewerage Mains & Purification Works	Straight line	15-80

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.3 Property, plant and equipment (continued)

Plant and machinery	Straight line	5-15
Furniture and fixtures	Straight line	6
Motor vehicles	Straight line	5-10
Office equipment	Straight line	6
IT equipment	Straight line	3
Computer software	Straight line	3
Specialised Plant and Equipment	Straight line	10
Cemeteries	Straight line	15-50
Community Halls	Straight line	15-50
Public Conveniences	Straight line	15-50

Specialised vehicles	Straight line	6
Solid Waste/Landfill Sites	Straight line	20-100
Water network	Straight line	10-50
Electricity Transmission Network	Straight line	10-80

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

1.4 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.4 Intangible assets (continued)

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

1.5 Financial instruments

Initial Recognition

The entity recognises a financial asset or a financial liability in its Statement of Financial Position when, and only when, the entity becomes a party to the contractual provisions of the instrument. This is achieved through the application of trade date accounting.

Upon initial recognition the entity classifies financial instruments or their component parts as a financial liabilities, financial assets or residual interests in conformity with the substance of the contractual arrangement and to the extent that the instrument satisfies the definitions of a financial liability, a financial asset or a residual interest.

Financial instruments are evaluated, based on their terms, to determine if those instruments contain both liability and residual interest components (i.e. to assess if the instruments are compound financial instruments). To the extent that an instrument is in fact a compound instrument, the components are classified separately as financial liabilities and residual interests as the case may be.

Initial Measurement

When a financial instrument is recognised, the entity measures it initially at its fair value plus, in the case of a financial asset or a financial liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Derecognition

A financial liability is derecognised when the obligation is extinguished. Exchanges of debt instruments between a borrower and a lender are treated as the extinguishment of an existing liability and the recognition of a new financial liability. Where the terms of an existing financial liability are modified, it is also treated as the extinguishment of an existing liability and the recognition of a new liability.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.5 Financial instruments (continued)

Offsetting

The entity does not offset financial assets and financial liabilities in the Statement of Financial Position unless a legal right of set-off exists and the parties intend to settle on a net basis.

Trade and Other receivables

Trade and other receivables are categorised as financial assets: loans and receivables and are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition and subsequently stated at amortised cost, less provision for impairment and subsequently carried at amortised cost. All trade and other receivables are assessed at least annually for possible impairment. Impairments of trade and other receivables are determined in accordance with the accounting policy for impairments. Impairment adjustments are made through the use of an allowance account. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year-end. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value. The amount of the loss is recognised in the Statement of Financial Performance with in operating expenses. When a trade receivable is uncollectible, it is written off. Subsequent recoveries of amounts previously written off are credited against operating expenses in the Statement of Financial Performance, derivatives, combined instruments that are designated at fair value, instruments held for trading. A financial instrument is held for trading if:

- it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
- on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
- non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
- financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

All trade and other receivables are assessed at least annually for possible impairment. Impairments of trade and other receivables are determined in accordance with the accounting policy for impairments. Impairment adjustments are made through the use of an allowance account. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year-end. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value

The amount of the loss is recognised in the Statement of Financial Performance with in operating expenses. When a trade receivable is uncollectible, it is written off. Subsequent recoveries of amounts previously written off are credited against operating expenses in the Statement of Financial Performance.

Bad debts are written off in the year in which they are identified as irrecoverable. Amounts receivable within 12 months from their reporting date are classified as current. Interest is charged on overdue accounts.

Financial Assets at amortised cost

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at amortised cost

1.6 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.6 Leases (continued)

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis. The major class of asset being leased is Land and Buildings in Middlerift. Certain of the municipality's property is held to generate rental income. Lease agreements are non-cancellable and have terms from 3 to 6 years. There are no contingent rents receivable. The major class of asset being leased is Land and Buildings in Middlerift. At the reporting date the entity had contracted with tenants for the following future minimum lease payments: Certain of the municipality's property is held to generate rental income. Lease agreements are non-cancellable and have terms from 5 years. There are no contingent rents receivable. The major class of asset being leased is Vacant Land in Stockenstroom. At the reporting date the entity had contracted with tenants for the following future minimum lease payments: Certain of the municipality's property is held to generate rental income. Lease agreements are non-cancellable and have terms from 5 years. There are no contingent rents receivable. The major class of asset being leased is Land and Buildings in Alice. At the reporting date the entity had contracted with tenants for the following future minimum lease payments: Certain of the municipality's property is held to generate rental income. Lease agreements are non-cancellable and have terms from 5 years. There are no contingent rents receivable. The major class of asset being leased is Land and Buildings in Alice. At the reporting date the entity had contracted with tenants for the following future minimum lease payments: Certain of the municipality's property is held to generate rental income. Lease agreements are non-cancellable and have terms from 5 years. There are no contingent rents receivable. The major class of asset being leased is Vacant Land in Alice. At the reporting date the entity had contracted with tenants for the following future minimum lease payments: Certain of the municipality's property is held to generate rental income. Lease agreements are non-cancellable and have terms from 5 years. There are no contingent rents receivable. At the reporting date the entity had contracted with tenants for the following future minimum lease payments:

Operating leases - lessee

At the reporting date the entity has outstanding commitments under operating leases which fall due as follows: Leases are negotiated for an average term of two years and rentals are fixed for an average of two years. No contingent rent is payable. Operating Leases consists of the following:

Leases are negotiated for an average term of three years and rentals are fixed for an average of three years. No contingent rent is payable. The major category of asset leased is network cables. Leases are negotiated for an average term of five years and rentals are fixed for an average of five years. No contingent rent is payable. The major category of asset leased is photocopying machines. At the reporting date the entity had outstanding commitments under non-cancellable operating leases, which fall due as follows:

1.7 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.7 Inventories (continued)

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.8 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish cash-generating assets from non-cash-generating assets are as follow:

1.9 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.9 Employee benefits (continued)

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.9 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The entity determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.9 Employee benefits (continued)

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.9 Employee benefits (continued)

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

1.10 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.10 Provisions and contingencies (continued)

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note .

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, a municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.10 Provisions and contingencies (continued)

Levies

A levy is an outflow of resources embodying economic benefits that is imposed by governments on entities in accordance with legislation (i.e. laws and/or regulations), other than:

- those outflows of resources that are within the scope of other Standards, and
- fines or other penalties that are imposed for breaches of the legislation.

Government refers to government, government agencies and similar bodies whether local, national or international.

The obligating event that gives rise to a liability to pay a levy is the activity that triggers the payment of the levy, as identified by the legislation.

The municipality does not have a constructive obligation to pay a levy that will be triggered by operating in a future period as a result of the municipality being economically compelled to continue to operate in that future period. The preparation of financial statements under the going concern assumption does not imply that the municipality has a present obligation to pay a levy that will be triggered by operating in a future period.

The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time (i.e. if the activity that triggers the payment of the levy, as identified by the legislation, occurs over a period of time).

If an obligation to pay a levy is triggered when a minimum threshold is reached, the corresponding liability is recognised when that minimum threshold is reached.

The municipality recognises an asset if it has prepaid a levy but does not yet have a present obligation to pay that levy.

1.11 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.11 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably, and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by the proportion that costs incurred to date bear to the total estimated costs of the transaction.

1.12 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arises when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.12 Revenue from non-exchange transactions (continued)

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

1.13 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.14 Comparative information

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are also reclassified and restated, unless such comparative reclassification and or restatement is not required by a Standard of GRAP. The nature and reason for such reclassifications and restatements are also disclosed.

Where material accounting errors, which relate to prior periods, have been identified in the current year, the correction is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

1.15 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of anal location received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.16 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

1.17 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.18 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2014/07/01 to 2015/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.18 Budget information (continued)

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.19 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

Municipal Entity.

Nkonkobe Economic Development Agency is 100% owned by the Nkonkobe Local Municipality

The municipality provides a transfer subsidy to the development agency to assist with its operations. In addition the municipality also settles the entity's audit fees on its behalf.

Members of key management:

Municipal manager (Acting):	Mr L Menze
Chief Financial Officer :	Mrs B Lubelwana
Strategic and LED: Senior Manager	Mr L Menze
Engineering: Senior Manager	Mr Z Nkosinkulu
Corporate Services: Senior Manager	Mrs N Fololo

Accounting Policies

1.20 Events after reporting date

No events have occurred after 30 June 2015 which necessitates adjustment or disclosure within the annual financial statements.

1.21 Recovery of unauthorised, irregular, fruitless and wasteful expenditure

The recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (ActNo.56of2003) and is recognised when the recovery thereof from the responsible councillors or officials is probable. The recovery of unauthorised, irregular, fruitless and wasteful expenditure is treated as other income in the Statement of Financial Performance.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

2. New standards and interpretations

2.1 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2015 or later periods but are not relevant to its operations:

GRAP 18: Segment Reporting

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

Directive 4 – Transitional provisions for medium and low capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have not been recognised as a result of transitional provisions on the Standard of GRAP on Property, Plant and Equipment and the Standard of GRAP on Agriculture, the recognition requirements of the Standard would not apply to such items until the transitional provision in that standard expires.

The effective date of the standard is for years beginning on or after 01 April 2015.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 105: Transfers of functions between entities under common control

The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control. It requires an acquirer and a transferor that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying the acquirer and transferor, Determining the transfer date, Assets acquired or transferred and liabilities assumed or relinquished, Accounting by the acquirer and transferor, Disclosure, Transitional provisions as well as the Effective date of the standard.

The effective date of the standard is for years beginning on or after 01 April 2015.

The municipality expects to adopt the standard for the first time in the 2016 annual financial statements.

GRAP 106: Transfers of functions between entities not under common control

The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control. It requires an entity that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or other event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying a transfer of functions between entities not under common control, The acquisition method, Recognising and measuring the difference between the assets acquired and liabilities assumed and the consideration transferred, Measurement period, Determining what is part of a transfer of functions, Subsequent measurement and accounting, Disclosure, Transitional provisions as well as the Effective date of the standard.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

The effective date of the standard is for years beginning on or after 01 April 2015.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

GRAP 107: Mergers

The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control. It requires an entity that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or other event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying a transfer of functions between entities not under common control, The acquisition method, Recognising and measuring the difference between the assets acquired and liabilities assumed and the consideration transferred, Measurement period, Determining what is part of a transfer of functions, Subsequent measurement and accounting, Disclosure, Transitional provisions as well as the Effective date of the standard.

The effective date of the standard is for years beginning on or after 01 April 2015.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

GRAP 20: Related parties

The objective of this standard is to ensure that a reporting entity's annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
 - has control or joint control over the reporting entity;
 - has significant influence over the reporting entity;
 - is a member of the management of the entity or its controlling entity.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

- An entity is related to the reporting entity if any of the following conditions apply:
 - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
 - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
 - both entities are joint ventures of the same third party;
 - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
 - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
 - the entity is controlled or jointly controlled by a person identified in (a); and
 - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties;
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- Related party transactions; and
- Remuneration of management

The effective date of the standard is for years beginning on or after 01 April 2016.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

The adoption of this standard is not expected to impact on the results of the municipality, but may result in more disclosure than is currently provided in the annual financial statements.

GRAP32: Service Concession Arrangements: Grantor

The objective of this Standard is: to prescribe the accounting for service concession arrangements by the grantor, a public sector entity.

It furthermore covers: Definitions, recognition and measurement of a service concession asset, recognition and measurement of liabilities, other liabilities, contingent liabilities, and contingent assets, other revenues, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP108: Statutory Receivables

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

Nkonkobe Local Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

2. New standards and interpretations (continued)

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

IGRAP17: Service Concession Arrangements where a Grantor Controls a Significant Residual Interest in an Asset

This Interpretation of the Standards of GRAP provides guidance to the grantor where it has entered into a service concession arrangement, but only controls, through ownership, beneficial entitlement or otherwise, a significant residual interest in a service concession asset at the end of the arrangement, where the arrangement does not constitute a lease. This Interpretation of the Standards of GRAP shall not be applied by analogy to other types of transactions or arrangements.

A service concession arrangement is a contractual arrangement between a grantor and an operator in which the operator uses the service concession asset to provide a mandated function on behalf of the grantor for a specified period of time. The operator is compensated for its services over the period of the service concession arrangement, either through payments, or through receiving a right to earn revenue from third party users of the service concession asset, or the operator is given access to another revenue-generating asset of the grantor for its use.

Before the grantor can recognise a service concession asset in accordance with the Standard of GRAP on Service Concession Arrangements: Grantor, both the criteria as noted in paragraph .01 of this Interpretation of the Standards of GRAP need to be met. In some service concession arrangements, the grantor only controls the residual interest in the service concession asset at the end of the arrangement, and can therefore not recognise the service concession asset in terms of the Standard of GRAP on Service Concession Arrangements: Grantor.

A consensus is reached, in this Interpretation of the Standards of GRAP, on the recognition of the performance obligation and the right to receive a significant interest in a service concession asset.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

Included in Plant Machinery and Equipment is items of plant purchased on a hire purchase agreement from Laman Financial Services

Restrictions on the use of plant are as follows;

Use of goods:

· You must sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater

· You must sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater

Should it be required by law, you and any other person who uses or operates the goods must be fully qualified and/or licensed in respect of such goods.

· You must sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater

You may not modify the goods in any way without Lamans prior approval

· You must sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater

You may not take the goods out the republic of South Africa without prior written consent from Laman

Termination by passage of time:

· You must sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater

You sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater.

Cession and Assignment:

· You must sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater

You may not cede any of youre rights or assign youre obligations to any party without the prior written approval of Laman.

Insurance:

· You must sell the goods on behalf of laman for an amount not less than the residual value plus VAT or the market value whichever is greater

You at all times keep goods insured with a registered insurer approved by Laman against all insurable risks, loss and damage to the value of the principal debt reflected in the first schedule.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

6. Employee benefit obligations

Defined benefit plan

The defined benefit plan is focused on the liability that the municipality faces in respect of employees and continuation members currently covered by health care arrangements

The municipality offers employees and continuation members the opportunity of belonging to one of several medical aid schemes, most of which offer a range of options pertaining to levels of cover.

Upon retirement, an employee may continue membership of the medical scheme. Upon a member's death-in-service or death-in-retirement, the surviving dependants may continue membership of the medical scheme.

In service members will receive a post retirement subsidy of 70% of the contribution payable. Widows and orphans of eligible service members are entitled to receive 60% subsidy on and after the death in service of an employee. All continuation members currently receive a 70% subsidy. Upon a member's death-in-retirement, the surviving dependants will continue to receive the same 70% subsidy.

Statement of Financial Position

2015

2014

6. Employee benefit obligations (continued)

Changes in the present value of the defined benefit obligation are as follows:

Opening balance	18 479 000	13 381 304
Benefits paid	(546 914)	(168 854)
Net expense recognised in the statement of financial performance	466 103	5 266 550
	18 398 189	18 479 000

Key assumptions used

Assumptions used at the reporting date:

Discount rates used	9,06 %	9,18 %
Health care cost inflation rate	8,13 %	8,34 %
Net effective discount rate	0,86 %	0,97 %
Average retirement age	63,00	63,00
Continuation of membership at retirement	100,00 %	100,00 %
Proportion assumed married at retirement	90,00 %	90,00 %
Mortality during employment: SA 85-90		
Mortality post-retirement: PA(90) -2		

Withdrawal from service (sample annual rates)

Age	Female	Male
20	13 %	13 %
30	11 %	11 %
40	6 %	6 %
50	3 %	3 %
>55	-	-
140	33	33

Sensitivity Analysis

The liability at the Valuation Date was recalculated to show the effect of:

- (i) A 1% increase and decrease in the assumed rate of health care cost inflation;
- (ii) A 1% increase and decrease in the discount rate;
- (iii) A one-year age reduction in the assumed rates of post-retirement mortality;
- (iv) A one-year decrease in the assumed average retirement age; and
- (v) A 10% decrease in the assumed proportion of in-service members that continue to receive the subsidy after retirement.

Provision for rehabilitation of landfill sites

The municipality operates 4 refuse disposal sites in and around Nkonkobe Municipality (Alice, Middelrift, Fort Beaufort and Seymour). In accordance with legislation, every year the municipality raises a provision for the estimated cost of rehabilitating the land on which the sites are situated. The provision is assessed every year by a qualified valuer and a liability raised. Movements in the provision are recognised in the statement of financial performance.

Principal assumptions:

The estimates for the previous years were calculated by using the rates for items as used by ourselves during those years. The cost estimates show an increase from 2013 to 2014, but a decrease from 2014 to 2015 for the Alice and Middelrift sites. This is due to certain construction items having decreased in price per unit.

The table below indicates the CPI (all items) and PPI (Civil Engineering) headlines from June to June of the past 5 years obtained from StatsSA.

From the below it can be seen that construction item unit rates decreased from 2014 to 2015, but hourly rates for personnel and other costs increased.

Summary of assumptions

The following assumptions were made in order to provide estimates for the rehabilitation of the sites under consideration:

- All sites fall under the category of previously unlined B- sites, the capping design as described in section 3 is therefore used to calculate the estimates.
- The above indicated footprints requiring rehabilitation are correct and verified by the site owners.
- Sufficient quantities of capping material as described in section 3.1 are available from on-site and nearby sources.
- Minimal shaping of the existing waste body as this should be done during site operations to maximise use of the available disposal airspace.
- Provision for Fort Beaufort was not calculated for 30 June 2015 as construction for rehabilitation is under way and funded by D:EA.

Year	10/11	11/12	12/13	13/14	14/15
PPI Civ. Eng. (%)	-	5	5	3	(7)

Other	-	165 190 288
	4 357 314 692	3 319 962 908

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2014. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

A general rate of 0.0079 (residential), 0.016274 (business), 0.0237 (state) is applied to property valuations to determine assessment rates. Rebates of R35,000 are granted to residential property owners.

Rates are levied on a monthly or annual basis with the final date of payment being 30 September for annual levies. Interest at prime+1% per month (2014:prime +1%) is levied on outstanding rates. A reclassification in categories is noted here above. This is as a result of the new valuation roll that was implemented.

25. Government grants and subsidies (continued)

In terms of the Constitution, this grant is used to subsidise the provision of basic services to indigent community members.

All registered indigents receive a monthly subsidy of R 155 (2014: R 88), which is funded from the grant.

Changes in level of government grants

Based on the allocations set out in the Division of Revenue Act, (Act No2 of 2013), no significant changes in the level of government grant funding are expected over the forthcoming 3 financial years.

Impairments

Property, plant and equipment	9 643 512	-
Describe the events and circumstances that led to the recognition or reversal of the impairment loss. The recoverable amount or [recoverable service amount] of the asset was based on its fair value less costs to sell or [its value in use.]	9 643 512	-
	-	-

Fort Beaufort landfill site that has been used for disposing waste over the year, is in the process of closure. This site is being rehabilitated and will no longer be used for disposing waste. The total rehabilitation cost capitalised to the asset was R11million. With the closure and rehabilitation in progress, the total rehabilitation cost previously capitalised to the asset was impaired to correspond with the provision for rehabilitation of the site that was recognized as a non current liability.

Nkonkobe Municipality entered into an agreement with the department of environmental affairs whereby the department agreed to assist the municipality by paying for closure and rehabilitation of Fort Beaufort Landfill site and land rehabilitation, to the value of R20 000 000.00. No disclosure was made on the prior year's financial statement in respect of this agreement. The effect of the correction is as follows;

Receivables from non-exchange transactions

R20 000 000

Property Plant and Equipment

Roads and Work In Progress

A project that was completed in the 2013/14 financial year was not capitalised in that year. This project has now been capitalised based on the actual costs incurred. Accumulated depreciation on the asset has been re-stated as well. Incomplete projects were loaded on the system as assets instead of under construction projects. The assets were subsequently capitalised into completed assets on completion date. This resulted in double capitalisation thereby over stating assets. Depreciation was not affected by the double counting.

Effect;

39. Risk management

Financial risk management

Maximum credit risk exposure

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The entity only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Sales to customers are settled in cash or with bank guaranteed cheques.

The financial assets carried at amortised cost expose the entity to credit risk. The value of the maximum exposure to credit risk are as follows for each of classes of financial assets at amortised cost:

Financial assets

Cash and cash equivalents		3 851 778	3 264 261
Other receivables from non-exchange transactions (cost)		84 887 108	59 924 244
Other receivables from non-exchange revenue (impair)		(17 469 182)	(11 026 950)
Trade and other receivables (cost)		31 477 959	34 320 556
Trade and other receivables (impairments)		(19 095 513)	(22 206 633)
		83 652 150	64 275 478

Collateral held and other credit enhancements

The municipality does not hold any collateral in relation to the financial assets above.

Concentration of credit risk

Credit risk is mainly concentrated on Trade and other receivables from exchange transaction.

The major concentrations of credit risk that arise from the Municipality's receivables in relation to customer classification are as follows;

Consumer debtors	40 %	47 %
Industrial / Commercial	23 %	9 %
Provincial and National Government	37 %	44 %
	100 %	100 %

41. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

Goods and services were procured during the financial year under review and the process followed in procuring those goods deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the accounting officer and council who considered them and subsequently approved the deviation from the normal supply chain management regulations.

44. Operating Leases

At the reporting date the entity has outstanding commitments under operating leases which fall due as follows:

Operating lease arrangements

Lessee

The major category of asset leased is Cell phone and data cards

At the reporting date the entity had outstanding commitments under non-cancellable operating leases, which fall due as follows:

Up to 1 year	227 569	1 249 156
1 to 5 years	910 277	340 824
	1 137 846	1 589 980

Lessor

The municipality rents out houses within its area to staff members. Rental collected as at year end amounted to R168 329.65

At the reporting date the entity had contracted with tenants for the following future minimum lease payments

Heading

Up to 1 year	164 663	43 560
1 to 5 years	685 650	108 900
	850 313	152 460

45. Statement of Budget Comparison: Reasons for variances

Explanation for variances is given for variances of 10% and above as they are considered material.

1. Rates: The municipality implemented three (3) supplementary valuations which resulted in a huge increase in the billing of rates, service charges and interest levied on overdue accounts
2. Service Charges: The municipality implemented three (3) supplementary valuations which resulted in a huge increase in the billing of rates, service charges and interest levied on overdue accounts
3. Interest Received: The municipality implemented three (3) supplementary valuations which resulted in a huge increase in the billing of rates, service charges and interest levied on overdue accounts
4. Transfer recognised: Variance below 10% therefore considered immaterial
5. Other revenue: The municipality implemented three (3) supplementary valuations which resulted in a huge increase in the billing of rates, service charges and interest levied on overdue accounts
6. Employee Cost: Variance less than 10% therefore immaterial
7. Councillors Allowance: Variance is less than 10% therefore immaterial
8. Debt Impairment: Analysis of impairment was done at year end. It was not possible to estimate and budget accurately as the objections to the valuation roll were pending and subvaluation rolls loaded in the middle of the year.
9. Depreciation: Variance is less than 10%, therefore considered immaterial.
10. Finance Charges: Interest on unwinding of provisions was not known at the time of preparing the budget, and was therefore not budgeted for. It should be noted that this interest is calculated by specialists which are appointed by the municipality to prepare these reports as at year end. The financial year must be closed before this interest can be calculated.
11. Bulk Purchases: The municipality entered into an agreement with Eskom in respect of unpaid bills from the previous financial year. The payment thereof resulted in over expenditure
12. Transfers and Grants: Variance is less than 10% therefore immaterial.
13. General expenses: Variance is less than 10% therefore considered immaterial.
14. Impairment loss : The impairment loss arises as a result of derecognition of Fort Beaufort Landfill site which is in the process of being closed. The landfill site value was not known at the time of budgeting.
15. Repairs and Maintenance: The increase is attributable to repairs and maintenance of land rehabilitation and expenses incurred on closure of the landfill site. These expenses are funded by the Department of Environmental Affairs. The funding was not included in the budget.

47. Contingent Liabilities

Claim for damages

Claim 1

PLM Construction vs Nkonkobe Municipality - PLM Construction is suing the Municipality for payment in terms of a breach of contract on the construction of a road in Fort Beaufort. The claim was Increased by the Plaintiff and the matter is still pending at year end. (Case abandoned in 2015 financial year)

- 78 066

Claim 2

B.E Baba vs Nkonkobe Municipality - The plaintiff is claiming for damages caused to his vehicle after it collided with one belonging to the municipality. The plaintiff passed away and it is probable that the case will not continue

- 16 100

Claim 3

Nkonkobe Municipality vs Mdlalo - The employee ordered retrospective reinstatement with 16 months compensation to the amount of R176 000. The award is taken in the labour court

176 000 176 000

Claim 4

Ligitation in a matter between Nkonkobe Municipality and Mampana. Municipality sued for general damages for injuries sustained in a bridge at Fort Beaufort.

250 000 -

426 000 270 166

Fines and Penalties

The municipality is operating 3 landfill sites without the required permits from the Department of Environmental Affairs. The Department may impose a penalty of up to R10 000 000.00 per landfill site operated without the required permits or for non-compliance with permit conditions. There is uncertainty if the penalties will be imposed. (Licenses for all landfill sites were obtained from the Department of Environmental Affairs)

- 30 000 000

Contingent Assets

Nkonkobe Municipality vs Mdlalo & Luthweyi Civil - The employees were charged of embezzling funds. The municipality is in a process of recovering funds from their provident fund to the amount of R593 000. The claim is for legal costs incurred and the matter is before the labour court at year end.

104 000 104 000
