

I am responsible for the preparation of these financial statements, which are set out on pages 1 to 95, in terms of section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors, as disclosed in note 25 of these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Cooperative Governance and Traditional Affairs' determination in accordance with the Act.

JOHANN METTLER CITY MANAGER (ACTING)

<u>31 August 2016</u> Date

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY

ANNUAL FINANCIAL STATEMENTS AS AT 30 JUNE 2016

General Information

General information	1
Legal form of entity	It is a Metropolitan Municipality established in terms of section 155 of the Constitution of the Republic of South Africa (Act 108 of 1996)
Nature of business and principal activities	Local Government
	The principal activities are:
	- To provide democratic and accountable

	Nedbank	38 762 247	34 810 813
		1 376 718 616	1 471 966 017

The Financial liabilities are measured at amortised cost taking into account relevant interest rates.

In line with Chapter 6 of the MFMA, no loans are secured.

ABSA

The loan was taken up during the 2007/08 financial year and is repayable over 10 years in 20 half-yearly instalments, by 31 December 2017, at a fixed interest rate of 11.85% per annum. The loan was used to finance various electricity reticulation projects. A capital amount of R30 000 000 and interest of R8 025 534 was repaid during the financial year. (2015: Capital repaid R30 000 000 and Interest paid R11 561 0555)

DBSA

Various loans were consolidated into one single loan amounting to R238 297 599 with effect from 30 September 2005, repayable over 10 years in 20 half-yearly instalments, by 30 September 2015, including accrued interest. There are two choices of variable interest rate linked to the 6 month JIBAR or to the 3 month JIBAR and a fixed interest rate linked to Government Bond R157. From 1 October 2005 to 30 September 2006 the interest was calculated linked to the six month JIBAR, but on 1 October 2006 the interest rate was fixed, linked to the Government Bond R157 at 9.38%. Council has the right to amend the interest rate between variable or fixed. A capital amount of R17 107 749 and interest of R804 552 was repaid during the financial year. (2015: Capital repaid R31 952 612 and Interest paid R3 871 989)

A further loan of R420 000 000 was taken up during the 2008/09 financial year and is repayable over 20 years in 38 half yearly instalments of R27 651 367, by 30 September 2029, at a fixed interest rate of 11.62% per annum with a final payment of R27 651 367. The loan was used for various capital projects. A capital amount of R10 974 169 and interest of R44 328 564 was repaid during the financial year. (2015: Capital repaid R9 909 502 and Interest paid R45 393 231)

NEDBANK

The loan of R745 000 000 was taken up during the 2009/10 financial year and is repayable over 15 years in 30 half yearly instalments of R52 372 749, by 31 January 2025, at a fixed interest rate of 11.7% per annum. The loan was used for various capital projects. A capital amount of R34 810 813 and interest of R69 957 185 was repaid during the financial year. (2015: Capital repaid R30 512 922 and Interest paid R74 255 075)

RAND MERCHANT BANK

The loan of R470 000 000 was taken up during the 2010/11 financial year and is repayable over 20 years in 40 half yearly instalments of R27 779 027, by 31 May 2031, at a fixed interest rate of 10.24% per annum. The loan was used for various capital projects. A capital amount of R11 200 036 and interest of R44 358 018 was repaid during the financial year. (2015: Capital repaid R10 593 062 and Interest paid R44 964 992)

BROOKES BEQUEST

Brookes bequest represents a long-term creditor. The funds can only be utilised by the NMBM when the two remaining Trustees approve the donation of funds to the NMBM. The funds may be utilised for capital projects related to the development of Humewood. The fund bears interest at an average of 6.37% per annum.

	Total Employee Benefit Obligation	1 472 243 701	1 369 345 626

Refer to Note 47 for the full reconciliation and disclosures.

Gratuity Benefit

This obligation is in respect of the long-term liability relating to gratuities payable to employees that were not previously members of a pension fund.

Balance at beginning of year	30 859 879	32 597 454
Movement in Obligation	(186 005)	(1 737 575)
Balance at end of year	30 673 874	30 859 879

Post Retirement Benefits

The past service liability in respect of post retirement benefits relates to ill-health retirements and medical aid contributions, and ex-gratia pensions which have been actuarially assessed at R1 324 956 140.

Balance at beginning of year	1 223 674 216	1 162 816 000
Movement in Obligation	101 281 924	60 858 216
Balance at end of year	1 324 956 140	1 223 674 216

Long Service Awards and Long Service Bonus

This obligation is in respect of the long service award and long service bonus which the Municipality offers to its current employees and which become payable at certain pre-determined intervals.

Balance at beginning of year Contributions to Obligation	114 811 531 1 802 156	109 268 000 5 543 531
Balance at end of year	116 613 687	114 811 53
NON-CURRENT PROVISIONS		
Rehabilitation of Landfill sites	380 585 851	284 015 73
Rehabilitation of Swartkops River	81 617 595	45 756 19
Total Non-current Provisions	462 203 446	329 771 93

Rehabilitation of landfill sites

4.2

In terms of the licensing conditions of the landfill refuse sites, Council will incur rehabilitation costs of R191 520 191 for the Arlington Tip site, R82 454 114 for the Koedoeskloof Tip site and R106 611 546 for the Ibhayi Tip site determined at net present value to restore the sites at the end of their useful lives estimated to be in 2027 (Arlington) and 2020 (Koedoeskloof). Squatters are currently occupying the Ibhayi Landfill site that is already closed as a tip site. Provision has been made for the rehabilitation of the landfill sites based on the net present value of cost. For Arlington and Koedoeskloof landfill sites, the cost factors as determined have been applied and projected at an inflation rate of 6.3%. The projected amounts are discounted to the present value at the long term Treasury Bond rate of 2.25%, for Arlington and at an average borrowing cost of 10.27% for Koedoeskloof. The determined cost to rehabilitate IBhayi landfill site represents the present value.

Balance at beginning of year	284 015 733	267 291 647
Contributions to Provision	96 570 118	16 724 086
Balance at end of year	380 585 851	284 015 733
Rehabilitation of Swartkops River		
Balance at beginning of year	45 756 198	43 941 439
Contributions to Provision - unwinding of discount factor	35 861 397	1 814 759
Balance at end of year	81 617 595	45 756 198

The provision is in relation to the Municipality's obligation to address the environmental pollution of the Swartkops River.

Additional Disclosure:

The NMBM applies the Cost Model

The Market Value was determined by professional valuers of the NMBM who are experts in this field as at 30 June 2016:

The depreciated replacement cost method of valuation was applied in determining the valuation of the property. This method of valuation is usually applied to properties that do not often change hands in the open market. The depreciated replacement cost method of valuation is calculated by determining the replacement cost of the improvements, as at the date of the valuation, less a depreciation factor, which comprises physical deterioration, functional obsolescence and location deterioration. The value of land is determined by means of comparable sales of similar properties in the area. The two values are added together to arrive at the valuation of the property.

OTHER ADDITIONAL DISCLOSURES:		
35.7 IMPAIRMENT - OTHER		
Impairment - land and buildings	4 628 979	1 638 757
Impairment - Moveable assets	24 233	733 243
Impairment - Traffic Fines	154 403 489	31 144 372
Impairment - Housing Debtors	81 168 189	0
	240 224 890	33 516 372
Refer Restatement Note no. 40.1.9		

The Impairment of Land relates to a reduction in market values as per the valuation roll and Moveable assets relate to assets which have become redundant.

The Impairment of Traffic Fines was based on the collection rate of fines. Refer Note 21.2 for more details.

The Impairment of Housing Debtors relates to claims which have been repudiated by the MEC Human Settlements, in respect of the rectification of extended houses.

35.8 LOSS ON DISPOSAL OF PROPERTY, PLANT AND EQUIPMENT

Loss on disposal of property, plant and equipment

Relates to disposal of various redundant property, plant and equipment.

35.9 GAIN ON DISPOSAL OF PROPERTY, PLANT AND EQUIPMENT

Sale of motor vehicles

27 900 829 981

Relates to the disposal of motor vechicles which are past their useful lives.

35.10 WATER LOSSES

The NMBM suffered water losses of 47,736 megalitres (43.4%) amounting to R178 million (2015: 46,643 megalitres (42.7%) amounting to R148 million) during the year. The value of the water losses have been based on cost for both years. Various water demand management interventions are being implemented during the 2015/16 financial year to curb water losses.

35.11 ELECTRICITY LOSSES

The NMBM suffered electricity losses of 12.5% amounting to total accumulative losses of R291,1 million (2015: 12% amounting to R244.4 million). Various electricity management interventions are being implemented to curb these losses are being implemented.

The Electricity losses as defined above are separated between technical (6%), Public Lighting (1,5%) and non-technical losses (5%). Technical losses are inherent losses in a distribution system ad these includes copper losses, Iron losses and heat losses due to current flow. Public lighting includes traffic signals, Highmast and Streelights. Non-Technical Losses can be attributed to theft that is illegal connections, meter tampering and non billed revenue due to faulty meters.

39 FINANCIAL RISK MANAGEMENT

There have been no significant changes in the risks below from the prior year to current. The risks have remained the same.

Interest rate risk

The NMBM is not exposed to interest rate risk on its financial liabilities. All of the NMBM's interest-bearing external loan liabilities, as detailed in Note 3 are fixed interest loans. No interest rate swap agreements have been entered into. The NMBM invests its surplus funds in fixed interest rate deposits with banks for fixed terms not exceeding one year.

Liquidity risk

The liquidity risk is the risk that the NMBM is not able to settle its obligations. The NMBM manages liquidity risk by effectively managing its working capital, capital expenditure, external borrowings and cash flows. The NMBM has secured standby credit facilities in the form of an overdraft facility with its banker in order to cater for any unexpected temporary shortfall in operating funds. The maximum exposure to liquidity risk is the trade creditors and long term borrowings. Consumer deposits have a low exposure to liquidity risk.

The following table details the NMBMs remaining contractual maturity for its financial liabilities. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the NMBM can be required to pay. The table includes both estimated interest and principal cash flows. A sensitivity analysis was not considered to be necessary.

Trade payables		
1-3 months	1 193 829 526	1 193 943 076
> 3 months	187 317 921	161 363 544
Other payables		
1-3 months	0	0
> 3 months	3 943 532	5 869 960
Long term borrowings		
< 12 months	93 919 738	104 092 767
> 12 months	1 376 718 616	1 471 966 017

Credit risk

The NMBM manages credit risk in its borrowing and investing activities by dealing with only A-rated financial institutions, and by spreading its exposure over a range of such institutions in accordance with its approved Cash Management and Investments Policy. Credit risk relating to consumer debtors is managed in accordance with NMBM's credit control and debt collection policy. The NMBM's credit exposure is spread over a large number and wide variety of consumers and is not concentrated in any particular sector or geographical area. Adequate provision has been made for anticipated bad and doubtful debts. Additional information relating to the analysis of consumer debtors is given in Note 15 to the financial statements. The maximum exposure to credit risk is the consumer debtors, which may reduce as a result of non-payment by debtors.

Refer to note 52 for table.

NELSON MANDELA BAY METROPOLITAN MUNICIPALITY NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2016

39 FINANCIAL RISK MANAGEMENT (Continued)

Fair value interest risk

The NMBM is exposed to fair value interest rate risk on its external loan liabilities, which are all fixed interest rates. The fair value of financial assets and liabilities are disclosed and compared with their carrying values. See note 52 for fair values of all financial liabilities. SANLAM shares is the only financial instrument and has a very low risk exposure and have been disclosed at the Market value of the share as at 30 June.

Currency risk

There were no currency risk exposure in the current and prior year.

2	Breach of the Supply Chain Management policy A breach occurred as certain contracts were awarded to persons in the service of the state (certain officials and family of officials) where he/she may have a significant influence over the financial or operating policies of the entity.	35 900 393	1 228 152

3 SCM Deviations

Some of the deviations relating to the informal tender process appear to be made where improper planning was conducted and expenditure were incurred before the deviation was approved and therefore considered to be irregular.

4 Acting Appointments longer than 3 months

Certain Senior Managers acted for periods longer than the 3 months in the 2013/14 financial year and no proof could be found on employee files that the MEC gave permission to act longer than 3 months.

		2016	Restated 2015
44	UNAUTHORISED, IRREGULAR, FRUITLESS AND WASTEFUL EXPENDITURE DISALLOWED (Continued)	R	R
44.2	Irregular Expenditure (Continued)		
6	Irregular Expenditure review by Internal Audit The review process entailed extracting and analysing the payment information for all formal bids for the period 2010/11 to 2014/15 financial years. This information was then used to trace the relevant bid files / supporting documents, which were then assessed against a comprehensive irregular expenditure checklist. In addition, certain payments relating to formal bid awards appearing under the informal bid awards module were identified. These amounts were added to the schedule of formal bid award payments, and evaluated against the same irregular expenditure checklist. The combination of these amounts is therefore deemed to be a complete summary of all formal payments made during the period under review as set out below:		
	Non-compliance with regards to the Formal Bid and Deviation process Opening Balance - 01 July 2014	951 256 090	548 639 553
	Incurred - Current year	331 230 030 0	846 536 416

	·	12 147 645 554	12 397 679 528
	Deviations not considered as a limitation of scope Contracts awarded in the Service of state not considered	0	87 350 817
	as a limitation	0	162 683 157
		12 147 645 554	12 147 645 554

12 147 645 554 12 147 645 554

This item is has not been included in the Irregular expense calculation, because it is impracticable in terms of GRAP 1 to determine whether the tender files are indeed Irregular or Regular as described below:

These payments were considered to be a limitation of scope because it relates to old tender files for awards made 2012/13 and prior where the contract award files or documentation could not be provided for or had missing compulsory documentation or could not be linked to a formal contract file or award. This was due to the fact that tender files were previously decentralised and kept with the Directorates and have only been centralised recently.

46 SUBSEQUENT EVENTS

46.1 Kabuso Report

A summary of the above report was prepared by Internal Audit, which was discussed with the Audit Committee at a meeting held on 6 April 2016.

The Audit Committee is in agreement with the summary of the findings and considers the matter closed.

46.2 IPTS Investigation

National Treasury has conducted a forensic investigation on the IPTS project. A preliminary report was tabled, which implicated two officials of serious misconduct. The two officials have been suspended, but one official has since resigned. Another draft report was tabled in Council on 27 August 2015, which recommended that criminal charges be instituted against three officials and entities. Council adopted the recommendations and the City Manager was mandated to proceed with criminal charges.

The investigation by National Treasury is still on-going. The final reports from NT are still awaited.

46.3 Morrison Report

Council appointed Advocate Morrison from Gobodo Forensic Services to investigate allegations of serious misconduct against two Senior Managers. Advocate Morrison tabled his report in Council on 27 August 2015 and Council recommended:

- Further investigations against one Senior Manager
- Disciplinary action be instituted against the other Senior Manager

The Morrison report forms part and parcel of the investigation against a senior manager which is currently still in progress. The disciplinary hearing commenced and proceeded on 4 August 2016. The municipality has completed its evidence on all of the charges. The senior manager has completed his evidence and the matter will be reconvened in order to allow the municipality to cross examine.

46.4 Fire occurred on the 8th floor of Nelson Mandela Bay Municipality's Mfanasekhaya Gqobose Building

A fire occurred on the 8th floor of the Nelson Mandela Bay Municipality's Mfanasekhaya Gqobose Building during the early hours of the morning on Sunday, 8 May 2016.

The Deputy Director of Risk & Asset Management at the Municipality's Budget & Treasury Department appointed Cunningham Lindsey to assist the Municipality in dealing with the claim in terms of their Insurance Fund established to pay claims that fall below the ZAR 5,000,000.00 deductible applicable to the insurance policy.

The preliminary investigations suggest the claim will far exceed the ZAR 5,000,000.00 deductible and the Broker notified the

Underwriters. A subsequent instruction received from AIG to attend to the claim on behalf of the Insurers.

Investigations is still in progress.

46.5 Change in Council

A new council was elected on 18 and 24 August 2016 respectively as follows: Cllr Trollip (Executive Mayor) Cllr Bobani (Deputy Executive Mayor and Public Health Chairperson) Cllr Lawack (Speaker) Chief Whip - Cllr Senekal

Mayoral Committee members: Cllr Kayser (Roads and Transport) Cllr Whitfield (Economic Development, Toursim and Agriculture) Cllr Best (Safety and Security) Cllr Odendaal (Budget and Treasury) Cllr Sijadu (Sport, Recreation, Arts and Culture) Cllr Bhanga (Human Settlements) Cllr Biddulph (Corporate Services) Cllr Grootboom (Municipal Public Accounts) Cllr Lovemore (Infrastructure and Engineering) Cllr Sauls (Constituency Services)

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2016

47 Information on Post Retirement Benefits

RETIREMENT BENEFIT INFORMATION

The Nelson Mandela Bay Municipality makes provision for post-retirement benefits to employees who belong to different pension schemes. These funds are governed by the Pension Funds Act, and include both defined benefit and defined contribution schemes. Contribution of R213.233 million (2015: R 214.091 million) to the defined benefit and defined contribution structures are expensed as incurred during the financial year ended 30 June 2016.

DEFINED CONTRIBUTION SCHEMES

CAPE RETIREMENT FUND

The contribution rate paid by the members (9%) and the NMBM (18%) is sufficient to fund the benefits accruing from the fund in future. The actuary certified the fund as being in a sound financial position as at 30 June 2013. The funding level of the Share Account is 100.2%, the Preservation fund is 100% and the Pensions Account reflected a funding level of 105.1% as at 30 June 2013.

SALA CONTRIBUTION FUND

The SALA Contribution Fund operates as a defined contribution scheme. The contribution rate paid by the members (7.92%) and their councils (19.18%) is sufficient to fund the benefits accruing from the Fund in the future. The fund is 100% funded.

SOUTH AFRICAN MUNICIPAL WORKERS UNION (SAMWU) NATIONAL PROVIDENT FUND

The SAMWU National Provident Fund is a defined contribution scheme. The last actuarial valuation of the Fund was performed at 30 June 2008, and certified it as being in a financially sound position with the funding level remaining at 100% since the previous valuation date, 30 June 2005. The 30 June 2011 report is not available yet and is expected to be available towards the end of 2014. The contribution rate paid by the members (7.5%) and their councils (18%) is sufficient to fund the benefits accruing from the Fund in the future.

DEFINED BENEFIT SCHEMES

CAPE JOINT PENSION FUND

The defined benefit scheme is a multi-employer plan, and the contribution rate payable is 27% (9% by the members and 18% by their councils) and is constituted of 3 funds, namely, the Defined Benefit, Defined Contribution and Pensioner account. The fund was certified by the actuary as being in a sound financial condition as at 30 June 2013. The trustees resolved to ring-fence the pensioner assets as at 30 June 2013. The sections are funded at 99.7%, 99.8% and 100%, respectively.

SALA PENSION FUND

The defined benefit scheme is a multi-employer plan, and the contribution rate payable is 26.67% (7.92% by the members and 19.18% by their councils). This defined benefit plan, is financially sound, and was 100% funded as at 30 June 2013.

The Nelson Mandela Bay Municipality has used GRAP 25 as guidance for treatment of multi-employer plans as sufficient information was not available to use defined-benefit accounting. The Municipality has therefore accounted for the Cape Joint Pensnion Fund and the SALA Pension Fund as defined contribution plans. It is impracticable to disclose as a defined benefit plan because the funds do not determine a separate actuarial valuation per Municipality but do it as a whole for all the Municipalities together.

EX GRATIA PENSIONS

General Description

The Ex-gratia pension benefits scheme operates as pensions that are being paid from the Council's revenue, that is, they are not funded or paid from one of the Employer's formalised pension arrangements.

Employees who were under the age of 55 when appointed and who have at least ten years' service at retirement, will receive an annual ex-gratia pension calculated as:

Annual salary * 1/47 * Years of non-pensionable service

An employee's widow will get 50% of the accrued (full service) pension on the employees death. This is subject to a maximum of the Government Old Age Pension and will cease at age 60.

Pensions increase in line with those granted by the Cape Joint Pension Fund and increases at 50% of CPI inflation.

Detailed Results

An actuarial valuation of the Municipality's unfunded liability in respect of revenue pension benefits to eligible employees and retirees of the Nelson Mandela Bay Municipality, was performed as at 30 June 2015. The post employment benefits obligation recognised at 30 June 2016 is based on the figure projected for 2016, when the valuation was performed for the financial year ended 30 June 2015. The unfunded liability in respect of past service has been estimated at R42.827 million, of which R39.714 million relates to the non-current portion. It is expected that approximately 7.3% of the amount provided will be expensed per annum.

Past and Future Changes in the Accrued Liability

The table below shows the development of the accrued liability over the current period, and projects the Municipality's Unfunded Accrued Liability and periodic costs over the two-year period following the Valuation Date.

Past year and future projected liability			
	Year ending	Year ending	Year ending

KEY ASSUMPTIONS

Key Financial Assumptions:

GRAP 25 requires that financial assumptions be based on market expectations at the Valuation Date for the period over which the liability obligations are to be settled. **Key Financial Assumptions**

Assumption	Value p.a.
Discount rate	8.45%
Salary Increase Rate	7.40%
Pension Increase Rate	3.20%
Net Effective Discount Rate (Current employees)	0.98%
Net Effective Discount Rate (Pensioners)	5.09%

Discount Rate:

GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-employment liabilities should be used.

Consequently, a discount rate of 8.45% per annum has been used. The corresponding index-linked yield at this term is 1.46%. These rates do not reflect any adjustment for taxation. These rates were deduced from the JSE Zero Coupon bond yield after the market close on 30 June 2015.

The rate is calculated by using a liability-weighted average of yields for the three components of the liability. For each of the three liability components, yields were determined by looking at the average term of the liability component and finding the fixed-interest and index-linked gilt yields at the relevant duration of the JSE (Best Decency) Zero Coupon bond yield curve. The results are as shown below:

Component	Liability Average Term (Years)	Fixed-Interest Yield	Index-Linked Yields
Employees' post retirement annuity	17.9	9.37%	1.85%
Death-in-service liability	5.9	8.17%	1.60%
Pensioners' liability	3.9	7.82%	1.18%
Liability-weighted yields	9.58	8.45%	1.46%

CPI Inflation Rate:

This assumption is used to calculate the estimated growth in pensions of the eligible retirees.

An expected inflation assumption of 6.40% was obtained from the differential between market yields on index-linked bonds (1.46%) consistent with the estimated term of the liability and those of fixed-interest bonds (8.45%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). Therefore, expected inflation is determined as (1 + 8.45% - 0.50%) / (1 + 1.46%)

Thus, a pension increase rate of 3.20% per annum over the expected term of the liability has been assumed, which is 50% of the estimate of CPI inflation over the same term. This assumption reflects a post retirement interest rate of 5.09%.

Demographic Assumptions:

Demographic assumptions are about the future characteristics of eligible employees and pensioners who are eligible for ex-gratia benefits.

Pre-retirement Mortality:

SA85-90 ultimate table, adjusted for female lives.

47 Information on Post Retirement Benefits (Continued)

Post-retirement Mortality:

PA(90) ultimate table.

Withdrawal from Service:

If an eligible employee leaves, the employer's liability in respect of that employee ceases.

Withdrawal rates

Δαο	Withdrawal Rate	Withdrawal Rate
Age	Males	Females
20	24%	16%
25	18%	12%
30	15%	10%
35	10%	8%
40	6%	6%
45	4%	4%
50	2%	2%
>55	1%	1%

Average Retirement Age:

The normal retirement age for eligible employees is 65. It has been assumed that these employees will retire at the average retirement age of 63 for males and 58 for females, which then implicitly allows for expected rate of early and ill-health retirement.

Family Profile:

It has been assumed that husbands will be five years older than their wives.

Ex-Gratia Arrangement Assumptions:

It was assumed that employer's ex-gratia arrangements would remain as they are and that the level of benefits in respect of such would remain unchanged, with the exception of allowing for inflationary adjustments.

Plan Assets:

Management has indicated that there are no long-term assets set aside off-balance sheet in respect of the Municipality's post-employment health care liability.

Sensitivity Analysis

The results are based on a number of assumptions. The extent to which the actual liability faced by the Municipality in the future differs from these results will depend on the extent to which actual expenditure differs from the assumptions made.

Sensitivity Results

The liability at Valuation Date was recalculated to show the effect of:

(i) A 1% increase and decrease in the assumed general salary inflation rate;

(ii) A 1% increase and decrease in the discount rate;

(iii) A one-year age reduction in the assumed rates of post-retirement mortality;

(iv) A one-year decrease and increase in the assumed average retirement age; and

(v) A 50% decrease in the assumed withdrawal rates.

The table below summarises the results of the sensitivity analysis:

Sensitivity Analysis on the Accrued Liability

Assumption	Change	Employees	Pensioners	Total Liability	%
					Change

POST-EMPLOYMENT HEALTH CARE BENEFITS

Benefit Structure

Medical Aid Scheme Arrangements:

The Municipality offers employees and continuation members (pensioners) the opportunity of belonging to one of several medical aid schemes, most of which offer a range of options pertaining to levels of cover. Upon retirement, an employee may continue membership of the medical aid scheme. Upon a member's death-in-service or death-in-retirement, the surviving dependants may continue membership of the medical aid scheme.

Contribution Rate Structure:

Members contribute according to the tables of contribution rates, which differentiate between them on the type and number of dependants. Some options also differentiate on the basis of income.

Subsidy Arrangements:

The Municipality has agreed to subsidise the medical aid contributions of retired members as follows:

In accordance with Resolution 8 of the SALGBC (SALGA), all existing and new pensioners (employees currently in service) and their dependants will receive a subsidy ranging between 60% and 70% subject to the maximum (CAP) amount of R3,871.00 (per month, per member) for the period from 1 July 2015 to 30 June 2016. The subsidy for LA Health members is 70%, while members of other schemes only qualify for a 60% subsidy. The maximum (CAP) amount was R3,618.04 in the previous financial year.

The maximum subsidy is expected to increase at 50% of inflation.

Eligible employees should have at least five years of service to qualify for a benefit at retirement.

Valuation Method

The Projected Unit Credit funding method has been used to determine the past service liabilities at the valuation date and the projected annual expense in the year following the valuation date.

Post Employment Medical Aid Liabilities:

The expected value of each employee and their spouses' future medical aid subsidies is projected by allowing for future medical inflation. The calculated values are then discounted at the assumed discount interest rate to the present date of valuation. We also allowed for mortality, retirements and withdrawals from service. The accrued liability is determined on the basis that each employee's medical aid benefit accrues uniformly over the working life of an employee up until retirement. Further, it is assumed that the current policy for awarding medical aid subsidies remains unchanged in the future. We assume that 100% of all active members on medical aid will remain on medical aid option at retirement.

Valuation of Assets:

As at the valuation date, the medical aid liability of the municipality was unfunded, that is, no dedicated assets have been set aside to meet this liability. Therefore, no assets have been considered as part of this valuation.

Detailed Results

The total liability in respect of post-retirement health care benefits amounts to R1,332.541 million as at 30 June 2016 (2015: R1,228.072 million). Provision for R1,332.541 million has been made (non-current R1,285.243 million, current R47.298 million). It is expected that approximately 3.6% of the amount provided will be expensed per annum. This is dependent on the accuracy of the assumptions below.

Past and Future Changes in the Accrued Liability

The table below shows the development of the accrued liability over the current period, and projects the Municipality's Unfunded Accrued Liability and periodic costs over the next period following the Valuation Date.

Past year and future projected liability	Year ending	Year ending	Year ending
	30/06/2015	30/06/2016	30/06/2017

Total employee benefits expense	148 233 500	130 311 012

KEY ASSUMPTIONS

Key Financial Assumptions:

GRAP 25 requires that financial assumptions be based on market expectations at the Valuation Date. The table below summarises the key financial assumptions used for the liabilities at the Valuation Date and the expense figures for the ensuing year:

Assumption	Year Ending 30/06/2016	Year Ending 30/06/2015
Discount rate	8.94%	8.94%
Health care cost inflation rate	8.07%	8.07%
Net Effective Discount Rate	0.80%	0.80%

Discount Rate:

GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-emplyment liabilities should be used.

Consequently, a discount rate of 8.94% per annum has been used. The corresponding index-linked yield at this term is 1.75%. These rates do not reflect any adjustment for taxation. These rates were deduced from the JSE Zero Coupon bond yield after the market close on 30 June 2016.

Component	Liability Average Term (Years)	Fixed-Interest Yield	Index-Linked Yields
In-service members' retirement liability	16.77	9.34%	1.82%
Death-in-service liability	3.42	7.69%	1.04%
Continuation members' liability	9.14	8.49%	1.70%
Liability-weighted yields	13.8	8.94%	1.75%

Health Care Cost Inflation Rate:

This assumption is required to reflect estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

A health care cost inflation rate of 8.07% has been assumed. This is 1.50% in excess of expected CPI inflation over the expected term of the liability, namely 6.57%.

The next contribution increase is assumed to occur with effect from 1 January 2017.

Average Retirement Age:

The average retirement age for all male and female employees is assumed to be 63 and 58 years respectively. This assumption implicitly allows for ill-health and early retirements.

Replacement Ratio:

This is the expected pension as a percentage of final salary, at retirement. This assumption is required to determine the income band at retirement of members since some contribution rate tables are income-dependent. A replacement ratio of 65% was assumed. Income bands are assumed to increase with general salary inflation and therefore an explicit salary inflation assumption is not necessary.

Demographic Assumptions:

Demographic assumptions are required to estimate the changing profile of current employees and retirees who are eligible for post-employment benefits.

47 Information on Post Retirement Benefits (Continued)

Pre-retirement Mortality:

SA85-90 ultimate table, adjusted for female lives.

Post-retirement Mortality:

PA(90) ultimate table.

Withdrawal from Service:

If an in-service member leaves, the employer's liability in respect of that employee ceases. It is therefore important not to overstate withdrawal rates. The assumed withdrawal rates are set out below:

Withdrawal rates

400	Withdrawal Rate	Withdrawal Rate
Age	Males	Females
20	24%	16%
25	18%	12%
30	15%	10%
35	10%	8%
40	6%	6%
45	4%	4%
50	2%	2%
>55	1%	1%

Average Retirement Age:

The average retirement age for all male and female employees was assumed to be 63 and 58 years respectively. This assumption implicitly allows for ill-health and early retirements.

Continuation of Membership:

It has been assumed that 100% of in-service members will remain on the Municipality's health care arrangement should they stay until retirement.

Family Profile (Retirees):

It has been assumed that married employees will remain married at retirement and 90% of single in-service members on a health care arrangement will be married. Further, it has been assumed that husbands will be five years older than their wives. For current retiree members, actual marital status was used and the potential for remarriage was ignored.

Medical Scheme Options:

It has been assumed that continuation members will remain on the same medical scheme and option. In-service members are assumed to remain on the same medical scheme and option should they continue to receive the subsidy after retirement.

Other Assumptions:

It was assumed that the Municipality's health care arrangements and subsidy policy would remain as outlined. In Section 3. Furthermore, it was assumed that the level of benefits receivable, and the contributions payable in respect of such, would remain unchanged, with the exception of allowing for inflationery adjustments.

Implicit in this approach is the assumption that current levels of cross-subsidy from in-service members to continuation members within the medical scheme are sustainable and will continue.

Plan Assets:

Management has indicated that there are no long-term assets set aside off-balance sheet in respect of the Municipality's post-employment health care liability.

Sensitivity Analysis

The results are based on a number of assumptions. The extent to which the actual liability faced by the Municipality in the future differs from these results will depend on the extent to which actual expenditure differs from the assumptions made.

The table below summarises the results of the sensitivity analysis: Sensitivity Analysis on the Accrued Liability (R millions)

Assumption	Change	In-Service	Continuation	Total	%

LONG SERVICE AWARD AND LONG SERVICE BONUS

Description of the Long Service Award Arrangement

Long Service Bonuses:

Long service benefits are awarded in the form of leave days and a percentage of annual salary. The awarded leave days have been converted into a percentage of the employee's annual salary, for valuation purposes. The conversion is based on a 250 working day year.

Long Service Awards:

In addition to the above, employees are eligible to receive a Long Service Award to the value of R2,500 upon completion of 25 years in service.

The table below describes the benefits awarded.

Long Service Awards for levels of past service:

Completed Years of Service	Long Service Leave Award (Working Days)	Long Service Bonus Award	Total Long Service Benefit Award	Formula used t calculate Tota Long Service
		(% of Annual Salary)	(% of Annual Salary)	Benefit Award
5	5	2%	4%	(5/250+2%) * ann salary
10	10	3%	7%	(10/250+3%) * annual salary
15	15	4%	10%	(15/250+4%) * annual salary

Key Assumptions

Key Financial Assumptions

The table below summarises the key financial assumptions used for the liabilities at the Valuation Date and the expense figures for the 2015/16 financial year.

Assumption	Value p.a.
Discount Rate	7.87%
General Salary Inflation (Long Term)	7.00%
Net Effective Discount Rate	0.81%

The salaries used in the valuation include an assumed increase on 1 July 2015 of 7%. The next salary increase was assumed to take place on 1 July 2016.

Key Demographic Assumptions

Assumption		Value			
Average retirement age	63	63 for males; 58 for females			
Mortality during employment		SA 85-90			
Withdrawal from service	Age	R	ate		
		Female	Male		
	20	24%	16%		
	30	15%	10%		
	40	6%	6%		
	50	50 2%			
	55	1%	1%		

Detailed Assumptions

Discount Rate:

GRAP 25 stipulates that the choice of this rate should be derived from high quality corporate bond yields. However, where the market in these bonds is not significant, the market yields on government bonds consistent with the estimated term of the post-emplyment liabilities should be used.

Consequently, a discount rate of 7.87% per annum has been used. This is derived by using a liability-weighted average of the yields corresponding to the average term until payment of long service awards, for each employee. The corresponding liability-weighted index-linked yield is 1.28%. These rates do not reflect any adjustment for taxation. These rates were deduced from the JSE Zero Coupon bond yield after the market close on 30 June 2016.

The average duration of the total liability is 6.16 years.

Salary Inflation Rate:

This assumption is required to reflect the estimated growth in salaries of the eligible employees until retirement.

The assumption is traditionally split into two components, namely, General Salary Inflation and Promotional Salary Escalation. The latter is considered under demographic assumptions.

47 Information on Post Retirement Benefits (Continued)

General Salary Inflation:

The expected inflation of 6% was obtained from the differential between market yields and index-linked bonds (1.28%) consistent wit the estimated terms of the liabilities and those of nominal bonds (7.87%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). Therefore, expected inflation is determined as ((1+7.87% - 0.50%) / (1+1.28%)) - 1.

Thus a general salary inflation rate of 7.00% per annum over the expected term of the liability has been assumed, which is 1.00% higher than the estimate of CPI inflation over the same term. This assumption reflects a net discount rate of 0.81%.

Demographic Assumptions

Promotional Salary Scale:

The annual inflation rates below are in addition to the General Salary Inflation assumption of 7.00% per annum for all employees.

Age Band	Additional promotional scale
20 - 25	5%
25 - 30	4%
30 - 35	3%
35 - 40	2%
40 - 45	1%
45 and over	0%

Pre-Retirement Mortality:

SA85-90 ultimate table, adjusted down for female lives.

Average Retirement Age:

The normal retirement age is 65. It has been assumed that male employees will retire at age 63 and female employees will retire at age 58 on average, which implicitly makes an allowance for expected rates of early and ill-health retirement.

LSA Arrangement Assumptions

It was assumed that the employer's LSA arrangements would remain unchanged, and that the level of benefits would remain unchanged, with the exception of allowing for inflationary adjustments.

Plan Assets:

Management has indicated that there are currently no long-term assets set aside off-balance sheet in respect of the LSA liability.

Sensitivity Analysis

The liability at Valuation Date was recalculated to show the effect of:

(i) A 1% increase and decrease in the assumed general salary inflation rate;

(ii) A 1% increase and decrease in the discount rate;

(iii) A two-year decrease and increase in the assumed average retirement age of employees; and

(iv) A 50% decrease in the assumed withdrawal rates from service.

52 FINANCIAL INSTRUMENTS

Financial instruments are classified into the following categories:

Financial assets: At Amortised Cost Financial liabilities: At amortised cost Financial Assets: At Fair Value

The classification of financial instruments is determined at initial recognition based on the purpose for which the financial assets are acquired or liabilities are assumed.

The amounts relating to financial instruments reflected below approximates fair value

		2016			2015

53 EXPLANATION FOR OPERATING VARIANCES:

APPROVED ORIGINAL BUDGET VS APPROVED FINAL BUDGET:

In terms of GRAP 24.27 the changes between the approved original budget and approved final budget are as a consequence of reallocations within the approved original budget and the inclusion of the roll-over of unspent conditional grants as at 30 June 2015 as approved by National Treasury.

The Original Budget was approved on 18 June 2015 for the 2015/16 financial year (01 July 2015 to 30 June 2016), and the Final Budget was approved on 22 February 2016.

NMBM uses the accrual basis of accounting for its Budget.

The reconciliation of the Original approved Budget and Final Budget and Actual amounts are shown on the face of the Statement of Financial Performance, with the reasons in variances explained below.

ACTUAL VERSUS APPROVED FINAL BUDGET (REVENUE AND EXPENDITURE)

Explanations of Significant Variances greater than 10% versus Budget - The 10% threshold was considered to be the best indicator to meet performance.

1 Interest earned - Investments

Interest increased due to strict cashflow management.

2 Licences and Permits

Due to the ad hoc nature of this income source, accurate income projections are not possible.

3 Rental of Facilities and Equipment

Due to the ad hoc nature of this income source, accurate income projections are not possible.

4 Government Grants and Subsidies - Operating

Due to underspending on IPTS and Housing Top Structures.

5 Public Contributions

Due to the ad hoc nature of this income source, accurate income projections are not possible.

6 Dividends received

The dividend income relates to the Sanlam shares.

7 Impairment - receivables

Increased consumer debt was written off, than initially anticipated.

8 Grants and Subsidies Paid

The rebate for ATTP consumers was transferred from Grants and Subsidies Paid to the relevant Service Charges and it is now being treated as Revenue foregone.

	<u>Actual</u>	Budget	Real Variance	
Grants and Subsidies Paid before transfer of Rebate for ATTP Consumers	459 503 241	497 340 550		
Grant paid to MBDA - but unspent at end of year - now transferred to Other Debtors	48 538 173			
Total Paid	508 041 414	497 340 550	-2.15%	

9 General Expenses

The underspending in General expenses is due to underspending on Housing Top Structures

10 Repairs and Maintenance

The underspending in Repairs and Maintenance is due to underspending on overall maintenance on pipelines, buildings, roadworks, overhead lines, underground and water leaks.

11 Impairment - Other

The overspending is mainly attributed to the impairment of Housing Debtors.

12 Loss on Disposal of Property Plant and Equipment

Due to the ad hoc nature of this source, accurate projections are not possible.

54 EXPLANATION FOR CAPITAL VARIANCES:

APPROVED ORIGINAL BUDGET VS APPROVED FINAL BUDGET:

In terms of GRAP 24.27 the changes between the approved original budget and approved final budget are as a consequence of reallocations within the approved original budget and the inclusion of the roll-over of unspent conditional grants as at 30 June 2015 as approved by National Treasury.

The Original Budget was approved on 18 June 2015 for the 2015/16 financial year (01 July 2015 to 30 June 2016), and the Final Budget was approved on 22 February 2016.

NMBM uses the accrual basis of accounting for its Budget.

ith	
6	Explanation of Variances greater than 10 %
10	The variance is mainly attributable to the Capital Projects being delayed due to Minor works tender only approved in March 2016. Many of the projects utilize this contract for the appointment of service providers. Additionally, very little spending has been incurred on IPTS related projects. IPTS in only planned to commence in the 2016/17 financial year, subject to NT approving the carry-over.
-0	
-12	R745,000 transferred from Chief Operating Officer as per Executive Mayor 20 June 2016.
44	The Directorate has indicated that the variance is mainly attributable to the fact that there were delays experienced in the appointment of consultants, which caused them not to be able to spend their budget.
22	One of the significant Capital projects (Fire and Emergency Equipment) was cancelled at the Bid Committee, therefore resulting in the need for a carry over to the new financial year.
51	The variance is attributable to the Systems Enhancements Capital Project. The purchase of additional hardware could not take place during the 2015/16 financial year due to delays experienced at SCM Bid Committee. The unspent funds will be carried over to the 2016/17 financial year in order to purchase the required hardware equipment.
17	The underspending relates to Refuse Compactors that were budgeted for, but could not be purchased during the 2015/16 financial year due to unavailability of stock and the fact that the RT57 National Treasury contract had expired on 31 March 2016. These funds will be carried over to the 2016/17 financial year in order to procure the vehicles.
-2 6	R3,396,540 was brought onto the Capital Budget as per Executive Mayor 4 March 2016 for the roll-out of public Wi-Fi.
-1	
100	The Flagship project for this directorate is the Motherwell Thusong Traffic and Licence Center. The project was envisioned to be completed over 2 financial years commencing in 2015/16. The directorate has determined that in terms of the budget provided in 2015/16, it was insufficient in order to advertise for the tender as the total costs exceeded the available budget. National Treasury has confirmed that additional allocations will be made available in the 2016/17 financial year via the NDPG in order for the project to commence.
50	The Original Budget for this project was directly coupled with exchange rates and linked price increases. Once the project commenced it became possible to make use of a Transversal process via Tenders done by City of Cape Town to procure the needed service providers, based on 2014/2015 costing. This resulted in a saving of approximately 20% over the 2 contract years. A total of R2 million will be carried over to 2016/17 in order to meet committments. The balance of the unspent funds will be realised as savings.
	R745,000 transferred to EDTA as per Executive Mayor 20 June 2016.

- 3 R2 million transferred to Operating Budget as per Municipal Manager 19 May 2016 for the implementation of the Metro Police.
- 11
- 12

	12 619 801 941	11 923 399 975

1. BASIS OF PREPARATION AND STATEMENT OF COMPLIANCE

These Annual Financial Statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act (Act No 56 of 2003). In addition, these Annual Financial Statements include mandatory disclosures in accordance with the Municipal Finance Management Act (Act No 56 of 2003) and related regulations.

The Annual Financial Statements are prepared on the accrual basis of accounting and the transactions, assets and liabilities included in the financial statements are measured at historical cost unless otherwise stated.

With respect to accounting standards for material transactions, events or conditions not covered by Directive 5, the Municipality has developed accounting policies in accordance with paragraphs 8, 10 and 11 of GRAP 3.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's Annual Financial Statements, unless explicitly stated.

New standards now effective but not yet implemented:

Standard number	Standard name	Effective date from (if applicable)
GRAP 18	Segment Reporting	01 April 2016

Note: Municipalities, municipal entities, trading entities, Parliament and the Provincial Legislatures are not required to apply or early adopt GRAP 18 *Segment Reporting* as the Minister of Finance has not yet determined the effective date for application by these entities.

2. PRESENTATION AND FUNCTIONAL CURRENCY

These Annual Financial Statements are presented in South African Rand.

The functional currency of the Municipality is South African Rand. Financial values are rounded to the nearest one Rand.

3. GOING CONCERN ASSUMPTION

These Annual Financial Statements have been prepared on a going concern basis.

4. COMPARATIVE INFORMATION

4.1 Current year comparatives (Budget):

In accordance with GRAP 1 and 24, the Budget information has been provided on the face of the Statement of Financial Performance in these Annual Financial Statements.

4.2 Prior year comparatives:

When the presentation or classification of items in the Annual Financial Statements are amended, prior period comparative amounts are reclassified and restated. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

Where there has been a change in accounting policy in the current year and the standards require retrospective adjustment, the adjustment is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

The nature and reasons for the reclassifications and restatements are disclosed in Note 40 to the Annual Financial Statements.

5. STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE

STANDARDS

The following revised and newly approved Standards of GRAP have been approved and issued by the Accounting Standards Board but only become effective in the future or have not been given an effective date by the Minister of Finance. The Municipality has not early-adopted any new Standards or revised Standards of GRAP but has in some cases referred to them for guidance in developing appropriate accounting policies in accordance with the requirements of Directive 5: Determining the GRAP Reporting Framework.

Standard number	Standard name	Effective date (if applicable)
GRAP 20	Related Party Disclosures	No effective date
GRAP 32	Service Concession Arrangements - Grantor	No effective date
GRAP 108	Statutory Receivables	No effective date
GRAP 109	Accounting by Principals and Agents	No effective date

GRAP 20 - Related Party Disclosures

The objective of this standard is to ensure that a reporting entity's financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties. The standard does not have an effective date yet. It is expected that adoption of this standard will result in additional disclosures.

GRAP 32 - Service Concession Arrangements – Grantor

This Standard applies to an asset used in a service concession arrangement for its entire economic life (a "whole-of-life" asset) if certain conditions are met. The standard does not have an effective date yet. It is expected that adoption of this standard will not be significant.

GRAP 108 – Statutory Receivables

This standard deals with receivables that arise from legislation, supporting regulations or similar means and require settlement by another entity in cash or another financial asset. This standard does not yet have an effective date. It is expected that adoption of this standard will not be significant.

GRAP 109 – Accounting by Principals and Agents

This standard deals with principles to be used by an entity to assess whether it is party to a principalagent arrangement, and whether it is a principal or an agent in undertaking transactions in terms of such an arrangement. This standard does not yet have an effective date. It is expected that adoption of this standard will not be significant.

INTERPRETATIONS

The following interpretations have been approved and issued by the Accounting Standards Board but only become effective in the future or have not been given an effective date by the Minister of Finance. These interpretations are expected to have an insignificant impact on the financial statements since they generally reflect the interpretation and principles already established under GRAP.

Standard number	Standard name	Effective date (if applicable)
IGRAP 17	Service concession arrangements where a grantor controls a significant residual interest in an asset	Effective date not yet determined

6. SIGNIFICANT JUDGEMENTS

The use of judgement, estimates and assumptions is inherent to the process of preparing annual financial statements. These judgements affect the amounts presented in the annual financial statements. Uncertainties about these estimates and assumptions could result in outcomes that require a material adjustment to the carrying amount of the relevant asset or liability in future periods.

Management has made the following significant judgement:

Allowances for Credit losses

On Consumer debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the estimated future cash flows based on the historical payment trend.

Other key judgements

Provisions and contingent liabilities

Management judgement is required when disclosing and measuring provisions and contingent liabilities. Provisions have been discounted where the effect of discounting is material. Refer to accounting policy Note 11.

Operating lease commitments – the Municipality as lessor

The Municipality has entered into commercial property leases on its investment property portfolio. The Municipality has determined that it retains all the significant risks and rewards of ownership of these properties and therefore has continued to recognise the investment properties.

GRAP 5 Borrowing Costs

The Municipality has determined that it is inappropriate to capitalise borrowing costs, as it is unable to establish a clear link between borrowing costs and numerous individual assets falling within the broader range of specific capital projects. Refer to accounting policy Note 20.

Management's Going Concern Assessment:

Management considered the following matters relating to the Going Concern:

On 18 June 2015 the Council adopted the 2015/16 to 2017/18 Budget. This three-year Medium Term Revenue and Expenditure Framework (MTREF) to support the on-going delivery of municipal services to residents reflected that the Budget was funded over the three-year period.

Management has thus prepared the Annual Financial Statements on the Going Concern basis.

7. SIGNIFICANT ESTIMATES AND ASSUMPTIONS

In the process of preparing the Municipality's Annual Financial Statements, management has made the following key estimates and assumptions:

Provision for Rehabilitation of Refuse Landfill Sites

The Municipality has an obligation to rehabilitate its landfill sites in terms of its license stipulations. Provision is made for this obligation based on the net present value of cost to rehabilitate the landfill sites in the future. The cost factors, as determined, have been applied and projected at an inflation rate of 6.3% (2015: 4.7%) and discounted to the present value:

- a) For landfill sites with a remaining operating life of less than 5 years, at the average short term borrowing cost of 11.04% (2015: 11.04%).
- b) For landfill sites with a remaining operating life of greater than 5 years, at the average long-term treasury bond rate 2% (2015: 1.75%).

Provision for Rehabilitation of Swartkops River

The provision is in relation to the Municipality's obligation to address the environmental pollution of the Swartkops River. The provision is based on the estimated costs to carry out the rehabilitation work of a wetland beside the Swartkops River, which was present valued at a rate of 11.04% (2015: 11.04%).

Pension and other post-employment benefits

The cost of defined benefit pension plans (ex gratia pensions), other post-employment medical benefits, and the present value of the pension obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. For key assumptions, refer to Note 47 of the Annual Financial Statements.

Provision for gratuity pensions

This obligation is in respect of the long-term liability relating to gratuities payable to employees that were not previously members of a pension fund. A management decision was made to ensure that a provision be raised from 1975.

The provision is made up of two parts namely:

- Years' service prior to 1997: number of years' service prior to 1997 multiplied by the employee fortnightly wage rate in 1997 (R533) plus
- Years services after 1997: number of years' service multiplied by the employee fortnightly wage rate in 1997 (R533) increased per annum by the average earnings interest earned on investments of 6.48% (2015: 6.02%)

Property, plant and equipment including Investment Properties and Intangible Assets

The useful lives of assets are based on management's estimation. Management considered the impact of technology, availability of capital funding, service requirements and required return on assets in order to determine the optimum useful life expectation, where appropriate.

The Municipality maintains and acquires assets to provide a social service to the community, with no intention of disposing of the assets for any economic gain and thus residual values are determined to be nil for all assets.

Water inventory

The estimation of the water stock in the reservoirs is based on the measurement of water via electronic level sensors, which determines the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir. Refer to accounting policy Note 17.

8. HOUSING DEVELOPMENT FUND

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the Municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes both complete and in progress as at 1 April 1998, were transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

The Housing Development Fund is included as one of the reserves within Accumulated Surplus.

9. ACCUMULATED FUNDS

The Municipality maintains various internal reserves in terms of specific requirements, which include:

- Capital Replacement Reserve (CRR): Internal reserve administered within the Accumulated Surplus for control purposes
- Capitalisation Reserve (CR): Internal reserve administered within the Accumulated Surplus for control purposes
- Donations and Public Contributions Reserve: Internal reserve administered within the Accumulated Surplus for control purposes
- Self-Insurance Reserve: Internal reserve administered within the Accumulated Surplus for control purposes.
- Compensation for Occupational Injuries and Diseases (COID) Reserve

The Municipality has been exempted from making contributions to the Compensation Commissioner for Occupational Injuries and Diseases in terms of Section 84 of the COID Act, but is required to maintain a reserve of R10 million. This reserve is subject to annual review by the Commissioner.

The certificate of exemption issued by the Commissioner and as prescribed by the Compensation for Occupational Injuries and Diseases Act (No. 130 of 1993), requires that the Municipality deposit cash and/or securities relating to COID with the Commissioner. The combined market values shall not be less than the capitalised value of the continuing liability of the Municipality as at 31 December of each year.

The continuing liability is that of pensions, with the capitalised value being determined based on an actuarial determination as prescribed by the Commissioner. A COID reserve has been established to be equal to or greater than the value of the continuing liability. The Commissioner determines the market value of the securities annually and the Municipality is required to meet any shortfall in the aggregate value of the securities as at 31 December.

Monthly pensions are funded by allocating funds out of the COID portion of Accumulated Surplus to general Accumulated Surplus (refer to note 2).

- Government Grant Reserve: Internal reserve administered within the Accumulated Surplus for control purposes.

10. EMPLOYEE BENEFITS

Recognition and measurement

Short term employee benefits

Remuneration to employees is recognised as an expense in the Statement of Financial Performance as services are rendered, except for non-accumulating benefits, which are recognised when the specific event occurs.

The costs of all short-term employee benefits, such as leave pay, are recognised in the period the employee renders the related service.

Short-term employee benefits are measured on an undiscounted basis.

Short term compensated absences

The expected cost of compensated absences is recognised as follows:

Accumulating compensated absence: When employees render services that increase their entitlement to future compensated absences; and

Non-accumulating absences: When absences occur.

Leave pay accrual

The liability for accumulating compensated absences is based on the total amount of leave days accumulated by employees at reporting date and on the total remuneration package of the employees.

Bonus incentive and performance related payments

The Municipality recognises the expected cost of performance bonus when, and only when, it has a present legal or constructive obligation to make such payments, as a result of past events and a reliable estimate of the obligation can be made.

A provision in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees is raised once the timing and amount of such provision can be reliably determined. The provision is based on the performance of each S57 employee against the performance scorecard set and agreed upon for each financial year. If on assessment of the respective S57 employees it is decided that a bonus will be paid out, the S57 employee is entitled to receive this bonus irrespective of whether they are still in the service of the Municipality, or not.

Post-employment benefits

Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans. The cost of providing benefits under the defined benefit plans is determined separately for each plan, using the projected unit credit method. Actuarial valuations are conducted on an annual basis for each plan. In the event that an independent actuarial valuation is not performed, Management will assess whether the assumptions used in the previous valuation remain applicable. If so, the valuation will be based on the previous independent valuation. If not, an adjustment is made to take into account any changes in assumptions.

Recognition and measurement

The Municipality has used GRAP 25 as guidance for treatment of multi-employer plans as sufficient information was not available to use defined-benefit accounting. The Municipality has therefore accounted for the Cape Joint Pension Fund and the SALA Pension Fund as defined contribution plans. It is impracticable to disclose as a defined benefit plan because the funds do not determine a separate actuarial valuation per Municipality but do it as a whole for all the Municipalities together.

The actuarial gains or losses are recognised in the Statement of Financial Performance in the year incurred.

The past service costs are recognised as an expense immediately.

The defined benefit asset or liability comprises the present value of the defined benefit obligation (further detail is available in Note 47), less the fair value of plan assets out of which the obligations are to be settled. Plan assets are assets that are held by long-term employee benefit funds or qualifying insurance policies. Plan assets are not available to the creditors of the Municipality nor can they be paid directly to the Municipality.

Fair value is based on market price information and in the case of quoted securities; it is the published bid price. It should be noted that there are currently no plan assets.

Medical Aid: Continued Members

The Municipality provides post-retirement benefits by subsidising the medical aid contributions of certain retired staff. According to the rules of the Medical Aid Funds with which the Municipality is associated, a member, on retirement, is entitled to remain a continued member of such medical aid fund. Should the member opt to remain on the fund, the member is liable for the portion, as determined by Council from time to time, of the medical aid membership fee and the Municipality for the remaining portion.

These contributions are charged to the Statement of Financial Performance when employees have rendered the service entitling them to the contribution.

The liability in respect of current pensioners is regarded as fully accrued and is therefore not split between a past (or accrued) and future in-service element. The liability is recognised at the fair value of the obligation.

The actuarial gains or losses are recognised in the Statement of Financial Performance in the year incurred. Actuarial valuations are conducted on an annual basis for each plan. In the event that an independent actuarial valuation is not performed, Management will assess whether the assumptions used in the previous valuation remain applicable. If so, the valuation will be based on the previous independent valuation. If not, an adjustment is made to take into account any changes in assumptions.

Gratuity Provision

A provision in respect of the liability relating to gratuities payable to employees that were not previously members of a pension fund is maintained. The gratuity is payable by Council to wage earners who joined the Municipality before 1988. The Council decided to make gratuity payments to these employees upon retirement. The amount payable is based on the individual employee wage rate and the number of years in service until the employee joined a pension fund. The provision is determined with reference to minimum wage rate applicable immediately prior to joining the pension fund multiplied by number of years' service and adjusted annually based on the average interest earned on investments.

Long service awards

Employees who have completed 25 years unbroken service are entitled to receive a once-off cash award not exceeding R2 500. The cash award is included in the employee's salary in the month of the service anniversary.

Defined contribution plans:

Retirement benefits

The Municipality provides retirement benefits for its employees and councillors.

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions, if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

11. PROVISIONS AND CONTINGENCIES

Provisions are recognised when the Municipality has a present obligation (legal or constructive) as a result of past events and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision shall be the best estimate of the expenditure required to settle the present obligation at the reporting date (for example in the case of obligations for the rehabilitation of land). The impact of the periodic unwinding of the discount is recognised in the Statement of Financial Performance as a finance cost.

If the effect of the time value of money is material, provisions are discounted using a rate that reflects the risk of the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that there will be an outflow of resources embodying economic benefits or service potential to settle the obligation, the provision is reversed.

Future events that may affect the amount required to settle an obligation are reflected in the provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

With respect to litigation and claims against the Municipality: The Municipality's Legal Council assesses the list of claims against the Municipality on an annual basis. The Municipality recognises a provision for all claims/cases for which the outflow of economic resources is probable and the amount can be reliably estimated.

The Municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

12. FINANCIAL INSTRUMENTS

Initial Recognition

The Municipality recognises a financial asset or a financial liability in its Statement of Financial Position when, and only when, the Municipality becomes a party to the contractual provisions of the instrument.

The Municipality recognises financial assets using trade date accounting.

Distinguishing liabilities and residual interests

A financial instrument or its component parts is classified on initial recognition as a financial liability, a financial asset or residual interest in accordance with the substance of the contractual arrangement and the definitions of a financial liability, a financial asset and a residual interest.

Compound financial instruments

The Municipality evaluates the terms of a financial instrument to determine whether it contains both a liability and residual interest component. Such components are classified separately as financial liabilities or residual interests.

Initial Measurement of financial assets and financial liabilities

When a financial asset or financial liability is recognised initially, the Municipality measures it at its fair value plus, in the case of a financial asset or a financial liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The transaction price usually equals the fair value at initial recognition, except in certain circumstances, for example where interest free credit is granted or where credit is granted at a below market rate of interest.

Concessionary loans

The Municipality first assesses whether the substance of a concessionary loan meets the definition of a financial instrument. On initial recognition, the Municipality analyses a concessionary loan into its component parts and accounts for each component separately. The Municipality accounts for that part of a concessionary loan that is:

- a) A social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- b) Non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Nonexchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

The part of the concessionary loan that is a social benefit or non-exchange revenue is determined as the difference between the fair value of the loan and the loan proceeds, either paid or received.

After initial recognition, an entity measures concessionary loans in accordance with the subsequent measurement criteria set out for all financial instruments.

Subsequent Measurement of financial assets and financial liabilities

Subsequent to initial recognition, financial assets and financial liabilities are measured at fair value, amortised cost or cost.

All financial assets and financial liabilities are measured after initial recognition using the following categories:

- a) Financial instruments at fair value
 - Instruments held for trading.
 - Non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition.
 - Financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.
- b) Financial instruments at amortised cost
 - Non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that the Municipality designates at fair value at initial recognition or are held for trading.

c) Financial instruments at cost

• Investments in residual interests that do not have a quoted market price in an active market and whose fair value cannot be reliably measured.

The Municipality assesses which instruments should be subsequently measured at fair value, amortised cost or cost, based on the definitions of financial instruments at fair value, financial instruments at amortised cost or financial instruments at cost as set out above.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired or through the amortisation process.

Impairment of financial assets

All financial assets measured at amortised cost, or cost, are subject to an impairment review. The Municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

The Municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If an entity determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal may not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

Such impairment losses are not reversed. **Derecognition of financial assets:**

The Municipality derecognises financial assets using trade date accounting.

The Municipality derecognises a financial asset only when:

- a) The contractual right to the cash flow from the financial asset expire, are settled or waived;
- b) The Municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- c) Despite having retained significant risks and rewards, the entity has transferred control of the asset to another party.

Derecognition of financial liabilities:

The Municipality removes a financial liability from its statement of financial position when it is extinguished, that is, when the obligation specified in the contract is discharged, cancelled, expires or waived.

Presentation:

Interest, losses and gains

Interest, losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit

Offsetting a financial asset and a financial liability

The Municipality does not offset financial assets and financial liabilities in the Statement of Financial Position unless a legal right to set-off exists and the parties intend to settle on a net basis or to realise the asset and settle the liability simultaneously.

Policies relating to specific financial instruments

Investments at amortised cost

Investments, which include fixed deposits and short-term deposits invested in registered commercial banks, are categorised as financial instruments at amortised cost and are subsequently measured at amortised cost.

Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is recognised in the Statement of Financial Performance.

Investments at fair value

Investments, which represent investments in equity for which fair value can be measured reliably, are subsequently measured at fair value.

Gains and losses in the fair value of such investments are recognised in the Statement of Financial Performance.

Cash and cash equivalents

Cash and cash equivalents are measured at amortised cost.

Cash includes cash on hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprises of cash on hand and deposits held on call with banks.

Trade and other receivables

Trade and other receivables are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition and subsequently stated at amortised cost, less provision for impairment. Amounts that are receivable within 12 months from the reporting date are classified as current. Interest is charged on overdue accounts.

Bad debts are written off in the year in which they are identified as irrecoverable, subject to the approval of the Council.

Trade and other payables

Trade payables are initially measured at fair value plus transaction costs that are directly attributable to the acquisition and are subsequently measured at amortised cost using the effective interest method.

13. PROPERTY, PLANT AND EQUIPMENT

Initial recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, other than investment property, or for administrative purposes and are expected to be used during more than one year.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the municipality and the cost or fair value of the item can be measured reliably.

Measurement at recognition

Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. Where an asset is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Municipality. The cost also includes the initial estimate of the costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an item of property, plant and equipment is acquired in exchange for a similar asset, the acquired asset is initially measured at the carrying value of the asset given up.

Where an item of property, plant and equipment is acquired in exchange for a dissimilar asset, the acquired item is initially measured at the fair value (the cost). If the acquired item's fair value is not determinable, the allocated deemed cost is the carrying amount of the asset given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the Municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with a specific item of property, plant and equipment, they are accounted for as property, plant and equipment.

Subsequent measurement

Subsequent to initial recognition, items of property, plant and equipment (other than land) are measured at cost less accumulated depreciation and impairment losses.

Subsequent to initial recognition, land is measured at cost and is not depreciated because it has an indefinite useful life.

Where the Municipality replaces parts of an asset, it derecognises the part of the asset replaced and capitalises the new component.

Subsequent expenditure including major spare parts and servicing equipment qualify as property, plant and equipment if the recognition criteria are met.

Depreciation

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the component assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately.

The component assets' residual values, useful lives and depreciation methods are reviewed at each financial year-end and if expectations differ from previous estimates, the changes are accounted for as a change in estimate in accordance with the standard of GRAP on accounting policies, changes in accounting estimates and errors.

The depreciation charge for each reporting period is recognised in surplus or deficit, unless it is included in the carrying amount of another asset.

The annual depreciation rates for the current and previous year are based on the following average asset useful lives:

Land & Buildings	Useful Life Range in Years
Buildings	15 - 50
Land	Indefinite Life
Infrastructure Assets	Useful Life Range in Years
Fencing, Roads, Sidewalks & Stormwater Networks	5 – 100
Beach Developments	30 – 50
Electricity Reticulation & Supply	10 - 80
Sewerage Mains & Purification Works	15 – 80
Waste Disposal Facilities	20 – 100
Water Supply & Reticulation	10 – 50
Dams & Treatment Works	25 – 100
Other Assets	Useful Life Range in Years
Bins & Containers	5 – 15
Air Monitoring, Emergency & Medical Equipment	5 – 20
Vehicles & Plant	4 – 30
Office Furniture & Fittings	3 – 20
Landfill Sites	50
Security Systems	5 – 15
Tip Sites	30
Computer Hardware	4 – 8

Community Assets	Useful Life Range in Years
------------------	----------------------------

Libraries	15 – 50
Fire Stations	15 – 50
Library Books	5 – 20
Cemeteries	15 – 50
Clinics	15 – 50
Community Centres	15 – 50
Public Conveniences	15 – 50
Swimming Pools	15 – 50
Recreational Facilities	15 – 50
Selling & Letting Schemes	15 – 50

Impairment:

Recognition and measurement of an impairment loss for an item of property, plant and equipment

An entity shall assess at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the entity shall estimate the recoverable amount of the asset.

The carrying amount of an asset is reduced to its recoverable amount if, and only if, its recoverable amount is less than its carrying amount.

The impairment loss is recognised immediately in surplus and deficit.

Derecognition

The carrying amount of an item of property, plant and equipment is derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance. Residual values are assumed to be zero, unless otherwise stated.

14. HERITAGE ASSETS

Initial recognition and measurement

Heritage assets are assets that have cultural, historical, environmental, natural, scientific or technological significance that are held indefinitely for the benefit of present and future generations.

Heritage assets are recognised when it is probable that future economic benefits or service potential associated with the item will flow to the Municipality and the cost or fair value of the item can be measured reliably.

When an asset, does not meet the initial recognition criteria of a heritage asset, the Municipality discloses the relevant and useful information about such assets in the notes to the financial statements.

Heritage assets are initially recognised at cost on acquisition date.

The cost is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Municipality.

Where an asset is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an asset is acquired in exchange for a similar asset, the acquired asset is initially measured at the carrying value of the asset given up.

Where an asset is acquired in exchange for a dissimilar asset, the acquired item is initially measured at the fair value (the cost). If the acquired item's fair value is not determinable, the allocated deemed cost is the carrying amount of the asset given up.

Subsequent measurement

Subsequent to initial recognition, the Municipality uses the cost model to measure its heritage assets.

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

The table below reflects the class of heritage assets and the estimated useful life range in years:

Heritage Sites	Useful Life Range in Years
Memorials & Statues	Indefinite Life
Heritage Sites	Indefinite Life
Museums	Indefinite Life
Art Works	Indefinite Life
Collections of rare books and manuscripts	Indefinite Life

Impairment

The Municipality does not depreciate its heritage assets, but at each financial year end, it assesses whether there is an indication that the assets may be impaired. If such an indication exists, the Municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Derecognition

Heritage assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of a heritage asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

15. INTANGIBLE ASSETS

Initial recognition and measurement

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licences and development costs. The Municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the Municipality and the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the Municipality for no or nominal consideration (i.e. a nonexchange transaction), its initial cost at the date of acquisition is measured at its fair value as the date of acquisition.

Intangible assets acquired through non-exchange transactions:

Internally generated intangible assets:

Research phase

The Municipality does not recognise any intangible asset arising from a research phase of an internal project. Expenditure on research phase of an internal project is recognised as an expense when incurred.

Development phase

An intangible asset arising from development phase is recognised if, and only if the municipality can demonstrate all of the following:

- a) The technical feasibility of completing the intangible asset so it will be available for use or resale;
- b) Its intention to complete the intangible asset and use it or sell it;
- c) Its ability to use or sell the intangible asset;
- d) How the intangible asset will generate probable future economic benefits or service potential;
- e) The availability of technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- f) Its ability to measure reliably the expenditure attributable to the intangible asset during its development.

Exchanges of assets

The cost of an intangible asset acquired in exchange for another is measured at fair value unless the fair value of neither the asset received nor the asset given up is reliably measurable. If the acquired asset is not measured at fair value, its cost is measured at the carrying amount of the asset given up.

Subsequent measurement

Intangible assets are subsequently carried at cost less accumulated amortisation and impairment losses.

The cost of an intangible asset is amortised over its useful life where that useful life is finite. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Financial Performance in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are not amortised but are tested for impairment annually, either individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Amortisation and impairment

Amortisation is charged to write off the cost of intangible assets over their estimated useful lives using the straight-line method. Amortisation of an asset begins when it is available for use.

The annual amortisation rates are based on the following estimated average asset lives:

Intangible	Useful Life Range in Years
Computer Software	3 – 5
Website Development	3 – 5

The amortisation period, the amortisation method and residual value for intangible assets with finite useful lives are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

Derecognition

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

16. INVESTMENT PROPERTY

Initial recognition and measurement

Investment property includes property (land or a building or part of a building or both land or buildings held by owner or by a lessee under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services or the sale of an asset in the ordinary course of operations.

Investment property is initially recognised as an asset when, and only when, it is probable that future economic benefits and or service potential will flow to the Municipality and the cost or fair value can be measured reliably.

At initial recognition, the Municipality measures investment property at cost including transaction costs once it meets the definition of investment property.

Where an investment property was acquired through a non-exchange transaction (i.e. where the Municipality acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at date of completion.

Transfers are made to or from investment property only when there is a change in use. If owner occupied property becomes an investment property, the Municipality accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use. If investment property becomes owner-occupied property, the Municipality accounts for such property in accordance with the policy stated under investment property, the Municipality accounts for such property in accordance with the policy stated under investment property up to the date of change in use. The costs of day-to-day servicing of investment properties are recognised in the Statement of Financial Performance as incurred.

Subsequent measurement

Investment property is measured using the cost model. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation

Depreciation begins when the asset is available for use. Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Investment Property	Useful Life Range in Years
Land	Indefinite Life
Buildings	15 - 50

The investment property's residual values, useful lives and depreciation methods are reviewed and adjusted if appropriate, at each financial year-end.

Land is not depreciated.

Fair Value

The assumptions for determining the fair value of the investment property is set out in Note 12 of the Annual Financial Statements.

Derecognition

An investment property is derecognised when it is disposed of or when no future economic benefits or service potential are to be derived from the use of the asset. All gains or losses from the disposal of investment property are determined as the difference between the sales proceeds and the carrying value of the asset and are recognised in the Statement of Financial Performance.

17. INVENTORIES

Initial recognition and measurement

Inventories comprise assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes (other than VAT), transport costs and any other direct costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

Inventories, consisting of consumable stores, raw materials, water and finished goods (FG), are measured at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. The basis of determining cost is first-in, first-out (FIFO) method for all inventory categories except water. Water is measured on the weighted average method.

Redundant and slow-moving inventories are identified and written down from cost to net realisable value with regard to their estimated economic or realisable values.

An impairment provision for the write down of inventory is maintained in lieu of obsolete inventory. The level of the impairment provision for obsolete inventory is the value equivalent to the value of inventory assessed as obsolete at financial year-end.

Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

The Municipality purchases its water. The cost of water purchased and not yet sold as reflected in the statement of financial position comprises the purchase price and other direct costs attributable to the acquisition. The estimation of the water stock in the reservoirs is based on the measurement of water via electronic level sensors, which determines the depth of water in the reservoirs, which is then converted into volumes based on the total capacity of the reservoir.

18. IMPAIRMENT OF NON-CASH-GENERATING ASSETS

Recognition

The Municipality assesses at each reporting date whether there is an indication that an asset may be impaired. Where any such indication exists, the Municipality estimates the recoverable service amount of the asset. Where the carrying amount of an asset exceeds its recoverable amount (or recoverable service amount in the case of non-cash-generating assets), the asset is considered impaired and is written down to its recoverable amount (or recoverable service amount). An asset's recoverable amount (or recoverable service amount) is the higher of the fair value less costs to sell, and the value-in-use of the asset.

The Municipality classifies the asset/identifiable group of assets as cash-generating if the key purpose of such asset/group of assets is to derive a commercial return from continuing use, and are independent of the cash inflows from other assets or groups of assets. The Municipality will classify all other assets that do not meet the definition of cash-generating assets/group of assets as non-cash generating assets.

Measurement

An asset's recoverable amount (or recoverable service amount) is the higher of an asset's or cashgenerating unit's fair value less costs to sell and its value-in-use. This recoverable amount (or recoverable service amount) is determined for individual assets, unless those individual assets are part of a larger cash-generating unit, in which case the recoverable amount (or recoverable service amount) is determined for the whole cash-generating unit.

An asset is part of a cash-generating unit where that asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

In determining the recoverable amount (or recoverable service amount) of an asset the entity evaluates the assets to determine whether the assets are cash generating assets or non-cash generating assets.

For cash generating assets, the value in use is determined as a function of the discounted future cash flows from the asset.

Where the asset is a non-cash generating asset, the value in use is determined through one of the following approaches:

- Depreciated replacement cost approach: The current replacement cost of the asset is used as the basis for this value. This current replacement cost is depreciated for a period equal to the period that the asset has been in use so that the final depreciated replacement cost is representative of the age of the asset.
- Restoration cost approach: The present value of the remaining service potential of the asset is determined by subtracting the estimated restoration cost of the asset from the current cost of replacing the remaining service potential of the asset before impairment.
- Service units approach: The present value of the remaining service potential of the asset is determined by reducing the current cost of the remaining service potential of the asset before impairment, to conform to the reduced number of service units expected from the asset in its impaired state.

The decision as to which approach to use is dependent on the nature of the identified impairment.

In assessing value-in-use for cash-generating assets, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, other fair value indicators are used.

Impairment losses of continuing operations are recognised in the Statement of Financial Performance in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Municipality makes an estimate of the assets or cash-generating unit's recoverable amount.

Reversal of impairment losses

A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years.

The reversal of an impairment loss for an asset is recognised immediately in the Statement of Financial Performance.

19. REVENUE

19.1 Revenue from Exchange Transactions

Revenue from exchange transactions refers to revenue that accrues to the Municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable, excluding indirect taxes, rebates and discounts.

Recognition

The recognition criteria is usually applied separately to each transaction

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction shall be recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits or service potential associated with the transaction will flow to the Municipality;
- (c) the stage of completion of the transaction at the reporting date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue shall be recognised only to the extent of the expenses recognised that are recoverable.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- (a) the Municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- (b) the Municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) the amount of revenue can be measured reliably;
- (d) it is probable that the economic benefits or service potential associated with the transaction will flow to the Municipality; and
- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue arising out of situations where the entity acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the entity as compensation for executing the agreed services.

Specific exchange-revenue sources

Service charges relating to electricity, water and sewerage are based on consumption. Provisional estimates of consumption are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced.

Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read and the related revenue adjustment is recognised in the same period.

Electricity meters in industrial areas are read at the end of each month and billed the following month. Premises with high-tension electricity supplies are read and billed monthly.

Revenue arising from the consumption of electricity and water in the month of June is fully accounted for whether invoiced or not.

Revenue from the sale of electricity prepaid meter cards is recognised at point of sale.

Revenue arising from the application of the approved tariffs, fees and charges is generally recognised when the relevant service is rendered.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff. Tariffs are determined per category of property usage and are levied monthly based on the costs of providing the refuse removal service.

Rental income arising from the use of investment properties, facilities and equipment is accounted for on a straight-line basis over the lease term on on-going leases.

Revenue from the issue of permits and licenses is recognised at point and time of issue.

Interest income is recognised in surplus or deficit on a time proportionate basis, using the effective interest method (i.e. based on the effective interest rate of the individual investments).

Interest earned on the following investments is not recognised in the Statement of Financial Performance:

- Interest earned on trust funds is allocated to the fund concerned; and
- Interest earned on unutilised conditional grants is allocated to the creditor (i.e. recognised as an obligation), if grant conditions indicate that interest is payable to the funder.

Measurement

Revenue from exchange transactions is measured at the fair value of the consideration received or receivable.

The Municipality has an obligation in terms of legislation to collect all revenue and as such, the Municipality does not consider the collective collectability of the revenue on initial recognition on a portfolio basis. The Municipality assesses collectability subsequent to initial measurement and should the receivable be impaired, the impairment loss is recognised as an expense.

19.2 Revenue from Non-Exchange Transactions

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.

Recognition

Recognition of revenue

Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Recognition of assets

An inflow of resources from a non-exchange transaction that meets the definition of an asset is recognised as an asset when it is probable that the future economic benefits or service potential associated with the asset will flow to the Municipality and the fair value of the asset can be measured reliably. The asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow. A present obligation arising from a non-exchange transaction that meets the definition of a liability will be recognised as a liability when it is probable that an outflow of economic benefit will be required to settle the obligation and a reliable estimate of the amount can be made.

Specific non-exchange-revenue sources

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Council applies a flat rating system. The same rate factor is applied for land and buildings. In terms of this system, assessment rates are levied on the value of land and buildings in respect of properties. Rebates are granted according to the use of the property concerned. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis.

Fines are recognised when it is probable that future economic benefits will flow to the Municipality, the costs can be reliably measured and all restrictions have been complied with. Fines constitute both spot fines and summonses. Revenue from spot fines is recognised when payment is received and the revenue from the issuing of summonses is recognised when collected. Due to the various legal processes that can apply to summonses and the inadequate information received from the courts, it is not possible to measure this revenue in the invoicing period, therefore an accrual is raised at the end of the financial year based on the average collection of fines throughout the year.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualify for recognition and first becomes available for use by the Municipality. Where public contributions have been received but the Municipality has not met the related conditions that would entitle it to the revenue, a liability is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualify for recognition and first becomes available for use by the Municipality.

Fuel levy is recognised in revenue when the income is received.

Grants, transfers or donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset and there is no corresponding liability in respect of related conditions. Where the grant, transfer or donation has been received but the Municipality has not met the related conditions that would entitle it to the revenue, a liability is recognised.

Measurement of revenue from non-exchange transactions

Revenue from a non-exchange transaction shall be measured at the amount of the increase in net assets, recognised by the entity.

Fines

Assets arising from fines are measured at the best estimate of the inflow of resources to the Municipality.

Bequests

Bequests are measured at the fair value of the resources received or receivable.

Gifts and donations

On initial recognition, gifts and donations are measured at their fair value as at the date of acquisition, which may be ascertained by reference to an active market, or by appraisal. An appraisal of the value of an asset is normally undertaken by a member of the valuation profession that holds a recognised and relevant professional qualification.

An asset that is recognised as a result of a non-exchange transaction is recognised at its fair value at the date of the transfer. Consequently, revenue arising from a non-exchange transaction is measured at the fair value of the asset received, less the amount of any liabilities that are also recognised due to conditions that must still be satisfied.

Where there are conditions attached to a grant, transfer or donation that gave rise to a liability at initial recognition, that liability is transferred to revenue as and when the conditions attached to the grant are met. Therefore the best estimate of the amount required to settle the present obligation at the reporting date will be recognised as a liability.

Grants without any conditions attached are recognised as revenue in full when the asset is recognised, at an amount equalling the fair value of the asset received.

Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor.

The Municipality has an obligation in terms of legislation to collect all revenue and as such, the Municipality does not consider the collective collectability of the revenue on initial recognition on a portfolio basis. The Municipality assesses collectability subsequent to initial measurement and should the receivable be impaired, the impairment loss is recognised as an expense.

Expenditure from Non-exchange Transactions

The accounting policy for expenditure arising from non-exchange transactions is similar to policy for non-exchange revenue.

Expenditure from non-exchange transactions is recognised when the resources have been transferred to the beneficiaries. A corresponding asset is raised to the extent that conditions attached to the expenditure have not been met. The asset is transferred to the Statement of Financial Performance once the conditions are met.

20. BORROWING COSTS

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are capitalised to the cost of that asset unless it is inappropriate to do so. The Municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete.

It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established.

Borrowing costs incurred other than on qualifying assets are recognised as an expense in the Statement of Financial Performance using the effective interest method.

21. LEASES

Leases in the financial statements of lessees

Operating leases

Recognition:

Assets subject to operating leases, i.e. those leases where substantially all of the risks and rewards of ownership are not transferred to the lessee through the lease, are not recognised in the Statement of Financial Position. Lease payments under an operating lease are recognised as an expense in the statement of financial performance, on a straight line basis over the lease term. To the extent that the straight-lined lease payments differ from the actual lease payments the difference is recognised in the Statement of Financial Position as either lease payments in advance (operating lease asset) or lease payments payable (operating lease liability) as the case may be. This resulting asset and / or liability is measured as the undiscounted difference between the straight-line lease payments and the contractual lease payments.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date, namely whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Derecognition

The operating lease liability is derecognised when the Municipality's obligation to settle the liability is extinguished. The operating lease asset is derecognised when the Municipality no longer anticipates economic benefits to flow from the asset.

Leases in the financial statements of lessors

Operating leases

The Municipality presents assets subject to operating leases in its Statement of Financial Position according to the nature of the asset.

Lease revenue from operating leases is recognised as revenue on a straight-line basis over the lease term. Initial direct costs incurred by the Municipality in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as expenses over the lease term on the same basis as the lease revenue.

The depreciation policy for depreciable leased assets is consistent with the Municipality's normal depreciation policy for similar assets, and depreciation is calculated in accordance with the Standards of GRAP on Property, Plant and Equipment and Intangible Assets.

Recognition

For those leases classified as operating leases the asset subject to the lease is not derecognised and no lease receivable is recognised at the inception of the lease. Lease payments received under an operating lease are recognised as income, in the Statement of Financial Performance, on a straight-line basis over the lease period.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date, namely, whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Measurement

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined lease payments and the contractual lease

payments are recognised as either an operating lease asset or operating lease liability. An operating lease liability is raised to the extent that lease payments are received in advance (i.e. the straight-line lease payments are more than the contractual lease payments). The operating lease asset and / or operating lease liability are measured as the undiscounted difference between the straight-line lease receipts and the contractual lease receipts.

Derecognition

Operating lease liabilities are derecognised when the Municipality's obligation to provide economic benefits or service potential under the lease agreement expires. Operating lease assets are derecognised when the Municipality's right to the underlying cash flows expire or the Municipality no longer expects economic benefits to flow from the operating lease asset.

22. REPORTING FOREIGN CURRENCY TRANSACTION IN THE FUNCTIONAL CURRENCY

Initial recognition

A foreign currency transaction shall be recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Reporting at subsequent reporting dates

At each reporting date:

- (a) foreign currency monetary items shall be translated using the closing rate;
- (b) non-monetary items that are measured in terms of historical cost in a foreign currency shall be translated using the exchange rate at the date of the transaction; and
- (c) non-monetary items that are measured at fair value in a foreign currency shall be translated using the exchange rates at the date when the fair value was determined.

Recognition of exchange differences

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognised in surplus or deficit in the period in which they arise,

23. VALUE ADDED TAX (VAT)

The Municipality accounts for Value Added Tax on the payments basis. Revenue, expenses and assets are recognised net of the amount of VAT. The net amount of VAT refundable from or payable to, the taxation authority is disclosed on the face of the statement of financial position.

24. UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, Municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure incurred for the financial period is accounted for as a normal expense in the Statement of Financial Performance but form part of disclosure of unauthorised, irregular and fruitless and wasteful expenditure in the notes to the financial statements.

25. IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's Supply Chain Management Policy. Irregular expenditure incurred for the financial period is accounted for as a normal expense in the Statement of Financial Performance but form part of disclosure of unauthorised, irregular and fruitless and wasteful expenditure in the notes to the financial statements.

26. FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure incurred for the financial period is accounted for as a normal expense in the Statement of Financial Performance but form part of disclosure of unauthorised, irregular and fruitless and wasteful expenditure in the notes to the financial statements.

27. RECOVERY OF UNAUTHORISED, IRREGULAR, FRUITLESS & WASTEFUL EXPENDITURE

The recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, and is recognised when the recovery thereof from the responsible officials is probable. The recovery of unauthorised, irregular, fruitless and wasteful expenditure is treated as other income.

28. TRANSFER OF FUNCTIONS BETWEEN ENTITIES NOT UNDER COMMON CONTROL

The Municipality uses the acquisition method in accounting for transactions relating to transfer of functions, between entities not under common control.

Applying the acquisition method requires:

- a) Identifying the acquirer.
- b) Determining the acquisition date.
- c) Recognising and measuring the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.
- d) Recognising the difference between (c) and the consideration transferred to the seller.

The acquisition date is the date on which the acquirer obtains control of the acquiree.

Municipality as the acquirer:

At acquisition date, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree shall be recognised if:

- a) The assets taken on and the liabilities assumed meets the definitions of an asset and liability as set out in the Framework for the Preparation and Presentation of Financial Statements.
- b) These assets and liabilities relate to the binding agreement between the parties to the transaction and may not relate to separate transactions.

Assets and liabilities not previously recognised by the acquiree will be recognised if these assets and liabilities now meet the recognition criteria (for example internal generated intangible assets not previously recognised).

The acquirer measures the identifiable assets acquired and the liabilities assumed at their acquisition-date fair values.

29. EVENTS AFTER THE REPORTING DATE

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the Annual Financial Statements are authorised for issue. Two types of events can be identified:

- Those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- Those that is indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

Adjusting events after reporting date

The Municipality adjusts the amounts recognised in the Annual Financial Statements to reflect adjusting events after the reporting date

Non-adjusting events after the reporting date

The Municipality does not adjust the amounts recognised in its financial statements to reflect nonadjusting events after the reporting date. The Municipality discloses the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the Annual Financial Statements.

30. RELATED PARTIES

The Municipality has processes and controls in place to aid in the identification of related parties. A related party is a person or an entity with the ability to control or jointly control the other party or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. Related party relationships where control exists are disclosed regardless of whether any transactions took place between the parties during the reporting period.

Where transactions occurred between the Municipality and one or more related parties, and those transactions were not within:

- Normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the Municipality to have adopted if dealing with that individual entity or person in the same circumstances; and
- Terms and conditions within the normal operating parameters established by the Municipality's legal mandate.

Further details about those transactions are disclosed in the notes to the financial statements.

31. PRESENTATION OF BUDGET INFORMATION IN THE FINANCIAL STATEMENTS

Presentation of a comparison of budget and actual amounts

The Municipality presents a comparison of the budget amounts for which it is held publicly accountable and actual amounts as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP24. The comparison of budget and actual amounts present separately for each level of legislative oversight:

- (a) the approved and final budget amounts;
- (b) the actual amounts on a comparable basis; and
- (c) by way of note disclosure, an explanation of material differences between the budget for which the entity is held publicly accountable and actual amounts.

Presentation and disclosure

The Municipality presents a comparison of budget and actual amounts as additional budget columns in the primary financial statements because the financial statements and the budget are prepared on a comparable basis.

Changes from approved to final budget

The Municipality presents an explanation of whether changes between the approved and final budget are a consequence of reallocations within the budget or of other factors:

- (a) by way of note disclosure in the financial statements; or
- (b) in a report issued before, at the same time as, or in conjunction with the financial statements, and shall include a cross reference to the report in the notes to the financial statements.

Comparable basis

All comparisons of budget and actual amounts are presented on a comparable basis to the budget.

The Municipality is typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by the Municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by functional classification linked to performance outcome objectives.

The financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts. Comparative information is not required.

32. COMMITMENTS

Items are classified as commitments when the Municipality has committed itself to future transactions that will normally result in an outflow of cash.

Disclosure is done to the extent that it has not already been recognised elsewhere in the financial statements.

Capital commitments are treated as follows:

- The aggregate amount of capital expenditure contracted for at the reporting date, to the extent that the amount has not been recorded in the financial statements; and
- If a commitment is for a period longer than a year.

Commitments are disclosed in the following circumstances:

- Unrecorded capital expenditure approved and contracted for before/at reporting date;
- Unrecorded capital expenditure approved but not yet contracted for at reporting date; and
- Unrecorded capital expenditure approved after reporting date.

33. GRANTS-IN-AID

The Municipality transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the Municipality does not:

- Receive any goods or services directly in return as would be expected in a purchase or sale transaction;
- Expect to be repaid in future; or

- Expect a financial return, as would be expected from an investment.

These transfers are recognised in the statement of financial performance as expenses in the period in which the events giving rise to the transfer occurred.

34. IMPAIRMENT

Impairment of cash generating units:

In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

External sources of information

- (a) During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
- (b) Significant changes with an adverse effect on the entity have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which an asset is dedicated.
- (c) Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's recoverable amount materially.

Internal sources of information

- (d) Evidence is available of obsolescence or physical damage of an asset.
- (e) Significant changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an asset as finite rather than indefinite.
- (f) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (g) Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

Impairment of non-cash generating units:

In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

External sources of information

- (a) Cessation, or near cessation, of the demand or need for services provided by the asset.
- (b) Significant long-term changes with an adverse effect on the entity have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the entity operates.

Internal sources of information

- (c) Evidence is available of physical damage of an asset.
- (d) Significant long-term changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, or plans to dispose of an asset before the previously expected date.
- (e) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (f) Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.
