Accounting Officer's Responsibilities and Approval

The Amajuba District Municipality is situated at the Amajuba Building, B 9356, Madadeni, is a category C Municipality established in terms of section 12 (1) of the Municipal Structures Act, No.117 and published in terms of Provincial Government Notice 346 on the 19 September 2000. The Local Government Operations of the Municipality are assigned by Section 156 and 229 of the South African Constitution and defined specifically in terms of section 83 of the Municipal Structures Act.

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the financial statements and were given unrestricted access to all financial records and related data.

The financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The financial statements are based on appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and places considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2018 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the Provincial and National Government for continued funding of operations. The financial statements are prepared on the basis that the municipality is a going concern and that the Provincial and National Governments have neither the intention nor the need to liquidate or curtail materially the scale of funding of the municipality.

The financial statements set out on pages 4 to 51, which have been prepared on the going concern basis, were approved by the accounting officer on 25 August 2017 and were signed on its behalf by:

Accounting Officer Acting Municipal Manager

Statement of Financial Position as at 30 June 2017

Explanation of variances

The municipality had commenced with the data cleansing audit which has enabled billing of more accounts on actual meter readings and billing of customers that were not on our data base.

Due to the service charges increase, the outstanding letor balances increased resulting in an increase in interest raised. The municipality must strengthen its mplementation of the Debt Collection policy

Telephone cost recoveries More tender documents were sold during the financial rear.

Jnder budget Prudent investment of unspent grants.

Grants to fund capital expenditure and community assets were not budgeted for. Indudgeted donation from Sivet SA.

Budget understated. The municipalityb anticipated an increase in the Councillor Upper Limits, the Cogta MEC did not approve he implementation of the Upper Limits.

Budget understated. Budget under provision

Budget understated.

Certain savings were achieved. Budget over provision for bulk services

Aainly due to budget under provisions for water tanker services

t was not possible to budget for expenditure on community assets.

Financial Statements for the year ended 30 June 2017

Accounting Policies

1. Presentation of Financial Statements

The financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these financial statements, are disclosed below.

1.1 Presentation currency

These financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Consolidation

Entity combinations

The municipality accounts for entity combinations using the acquisition method of accounting. The cost of the entity combination is measured as the aggregate of the fair values of assets given, liabilities incurred or assumed and equity instruments issued. Costs directly attributable to the entity combination are expensed as incurred, except the costs to issue debt which are amortised as part of the effective interest and costs to issue equity which are included in equity.

Contingent liabilities are only included in the identifiable assets and liabilities of the acquiree where there is a present obligation at acquisition date.

On acquisition, the municipality assesses the classification of the acquiree's assets and liabilities and reclassifies them where the classification is inappropriate for municipality purposes. This excludes lease agreements and insurance contracts, whose classification remains as per their inception date.

Accounting Policies

1.2 Consolidation (continued)

Investment in associates

An associate is an entity over which the controlling entity has significant influence and which is neither a controlled entity nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

An investment in associate is accounted for using the equity method, except when the investment is classified as held-for-sale in accordance with Standard of GRAP on Non-current Assets Held-For-Sale and Discontinued Operations. Under the equity method, investments in associates are carried in the consolidated statement of financial position at cost adjusted for post acquisition changes in the municipality's share of net assets of the associate, less any impairment losses.

Equity method is a method of accounting whereby the investment is initially recognised at cost and adjusted thereafter for the post-acquisition change in the municipality's share of net assets of the investee. The surplus or deficit of the municipality includes the municipality's share of the surplus or deficit of the investee.

The municipality's share of the surplus or deficit of the investee is recognised in surplus or deficit.

Distributions received from an investee reduce the carrying amount of the investment.

The most recent available financial statements of the associate are used by the municipality in applying the equity method. When the reporting date's of the municipality and the associate are different, the associate prepares, for the use of the municipality, financial statements as of the same date as the financial statements of the municipality unless it is impractical to do so.

When the financial statements of an associate used in applying the equity method are prepared as of a different reporting date from that of the municipality, adjustments are made for the effects of significant transactions or events that occur between that date and the date of the municipality's financial statements. In any case, the difference between the reporting date of the associate and that of the municipality is more than three months. The length of the reporting periods and any difference in the reporting dates is the same from period to period.

The municipality's financial statements are prepared using uniform accounting policies for like transactions and events in similar circumstances.

Deficits in an associate in excess of the municipality's interest in that associate are recognised only to the extent that the municipality has incurred a legal or constructive obligation to make payments on behalf of the associate. If the associate subsequently reports surpluses, the municipality resumes recognising its share of those surpluses only after its share of the surpluses equals the share of deficits not recognised.

Any goodwill on acquisition of an associate is included in the carrying amount of the investment, however, a gain on acquisition is recognised immediately in surplus or deficit.

Surpluses and deficits on transactions between the municipality and an associate are eliminated to the extent of the municipality's interest therein.

The controlling entity discontinues the use of the equity method from the date that it ceases to have significant influence over an associate and account for the investment in accordance with the Standard of GRAP on Financial Instruments: Recognition and Measurement from that date, unless the associate becomes a controlled entity or a joint venture, in which case it is accounted for as such. The carrying amount of the date that it ceases to be an associate is regarded as its cost on initial measurement as a financial asset in accordance with the Standard of GRAP on Financial Instruments: Recognition and Measurement set is accounted for a such.

Jointly controlled entities

An interest in a jointly controlled entity is accounted for using the equity method, except when the investment is classified as held-for-sale in accordance with Standard of GRAP on Non-current Assets Held-For-Sale and Discontinued Operations. Under the equity method, interests in jointly controlled entities are carried in the consolidated statement of financial position at cost adjusted for post acquisition changes in the municipality's share of net assets of the jointly municipality, less any impairment losses. Surpluses and deficits on transactions between the municipality and a joint venture are eliminated to the extent of the municipality's interest therein.

Financial Statements for the year ended 30 June 2017

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty

In preparing the financial statements, management is required to make estimates and assumptions that affect the amounts represented in the financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the financial statements.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 14 - Provisions.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when: it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Accounting Policies

1.4 Property, plant and equipment (continued)

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The

decrease is debited in revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
Land	Indefinite
Buildings	30 years
Plant and machinery	10 - 15 years
Furniture and fixtures	7 - 10 years
Office equipment	-
Specialised Vehicles	10 -15 years
Other Vehicles	3 - 7 years
IT equipment	3 years
Computer software	3 years
Infrastructure	-
Water and Sewerage	10 years

Accounting Policies

1.4 Property, plant and equipment (continued)
Community

Recreational Facilities	20 - 30 years
Buildings	5 - 30 years
Other property, plant and equipment	2 -5 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred. An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Financial Statements for the year ended 30 June 2017

Accounting Policies

1.5 Intangible assets

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life. as intangible assets.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

ltem

Computer software, internally generated Computer software, other

Intangible assets are derecognised:

on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

1.6 Investment property

.

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

· use in the production or supply of goods or services or for

- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are

associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement. Where investment property

is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property.

If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised. Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

1.7 Financial instruments

Classification

The municipality classifies financial assets and financial liabilities into the following categories:

- Held-to-maturity investment financial assets
- Loans and receivables financial assets
- Available-for-sale financial assets
- Financial liabilities measured at amortized cost

Classification depends on the purpose for which the financial instruments were obtained / incurred and takes place at initial recognition. Classification is re-assessed on an annual basis.

Recognition

Financial assets and financial liabilities are initially recognized on the statement of financial position when the municipality becomes party to the contractual provisions of the instrument.

Measurement

When a financial asset or financial liability is recognized initially, the municipality measures it at its fair value plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal business considerations.

Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the municipality uses that technique.

The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Accounting Policies

1.7 Financial instruments (continued)

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid. The municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired. If any such evidence exists, the municipality applies the following to determine the amount of any impairment loss:

Financial assets carried at amortized cost: If there is objective evidence that an impairment loss on loans and receivables or held-to maturity investments carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The amount of the loss is recognized in surplus or deficit.

Financial assets carried at cost: If there is objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Available-for-sale financial assets: When a decline in the fair value of an available-for-sale financial asset has been recognized in accumulated surplus or deficit and there is objective evidence that the asset is impaired, the cumulative loss that had been recognized in accumulated surplus or deficit is reclassified from accumulated surplus or deficit to surplus or deficit as a reclassification adjustment even though the financial asset has not been derecognized.

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that the municipality has the positive intention and ability to hold to maturity.

Held-to-maturity investments are subsequently measured at amortized cost using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the municipality estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. In those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments) the municipality uses the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are subsequently measured at amortized cost using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

When calculating the effective interest rate, the municipality estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. In those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments) the municipality uses the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Available-for-sale financial assets

Available-for-sale financial assets are those non-derivative financial assets that are designated as available for sale or are not classified as loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss.

Available-for-sale financial assets are subsequently measured at fair value with changes in fair value recognized in accumulated surplus. Impairment losses, interest income and dividend income are reported in surplus or deficit.

Other financial liabilities

Other financial liabilities are subsequently measured at amortized cost using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the municipality estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. In those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments) the municipality uses the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Financial Statements for the year ended 30 June 2017

Accounting Policies

1.7 Financial instruments (continued)

De-recognition

Financial assets

A financial asset is de-recognized where the contractual rights to receive cash flow from the asset have expired, or the municipality has transferred the asset and the transfer qualifies for de-recognition. A transfer qualifying for de-recognition occurs when the municipality transfers the contractual rights to receive the cash flows of the financial asset. Where the municipality has transferred its rights to the cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the municipality's continuing involvement in the asset.

Financial liabilities

A financial liability is derecognized when the obligation specified in the contract is discharged, cancelled or expired.

Categorization

The municipality has various types of financial instruments and these can be broadly categorized as either financial assets or financial liabilities. A financial asset is any asset that is:

cash;

a contractual right to receive cash or to receive another financial asset from another entity;

a contractual right to exchange financial instruments on potentially favorable terms;

an equity instrument of another entity;

a contract that may or will be settled in the entity's own equity instruments (subject to certain conditions).

The municipality has the following types of financial assets as reflected on the face of the Statement of Financial Position or in the notes thereto: Loans and receivables

Consumer debtors

Consumer debtor

Other receivables Call investment deposits

The financial assets of the municipality are classified as follows into one of the four categories allowed by this standard:

Type of financial asset

Loans and receivables Consumer debtors

Other receivables Call investment deposits Classification in terms of GRAP 104 Loans and receivables Loans and receivables Loans and receivables Available for sale

A financial liability is any liability that is:

- a contractual obligation to deliver cash or to deliver another financial asset;

- a contractual obligation to exchange financial instruments on potentially unfavorable terms;

The municipality has the following types of financial liabilities as reflected on the face of the Statement of Financial Position or in the notes thereto: Long term liabilities

Trade and other payables Consumer deposits Unspent conditional grants Bank overdraft

There are two main categories of financial liabilities, classified based on how they are measured.

Any other financial liabilities are classified as financial liabilities that are not measured at fair value through profit or loss.

The financial liabilities of the municipality are classified only as financial liabilities that are not measured at fair

value through profit or loss because none of the following instruments are held for trading.

Type of financial liability

Long term liabilities Trade and other payables Consumer deposits Unspent conditional grants Bank overdraft

Classification in terms of GRAP 104

Financial liability that is not measured at fair value through profit or loss Financial liability that is not measured at fair value through profit or loss Financial liability that is not measured at fair value through profit or loss Financial liability that is not measured at fair value through profit or loss Financial liability that is not measured at fair value through profit or loss

Financial Statements for the year ended 30 June 2017

Accounting Policies

1.8 Water inventory

Water is regarded as inventory when the municipality purchases water in bulk with the intention to resell it to the consumers or to use it internally, or where the municipality has incurred purification costs on water obtained from natural resources (rain, rivers, springs,boreholes etc.). However, water in dams, that are filled by natural resources and that has not yet been treated, and is under the control of the municipality but cannot be measured reliably as there is no cost attached to the water, and it is therefore not recognised in the statement of financial position.

The basis of determining the cost of water purchased and not yet sold at statement of financial position date comprises all costs of purchase, cost of conversion and other costs incurred in bringing the inventory to its present location and condition, net of trade discounts and rebates.

Water is valued by using the weighted average method, at the lowest of purified cost and net realisable value, insofar as it is stored and controlled in reservoirs at year-end.

1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership. When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease. Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of return on the remaining balance of the liability.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.10 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return. Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

Financial Statements for the year ended 30 June 2017

Accounting Policies

1.10 Impairment of cash-generating assets (continued)

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets. Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense. Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life. Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a)the period of time over which an asset is expected to be used by the municipality; or
- (b)the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish cash-generating assets from non-cash-generating assets are as follow:

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired. The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Value in Use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Basis for estimates of future cash flows

In measuring value in use the municipality:

bases cash flow projections on reasonable and supportable assumptions that represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the asset. Greater weight is given to external evidence; base cash flow projections on the most recent approved financial budgets/forecasts, but excludes any estimated future cash inflows

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Financial Statements for the year ended 30 June 2017

Accounting Policies

1.10 Impairment of cash-generating assets (continued)

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of: its recoverable amount (if determinable); and

the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.11 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return. Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense. Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Financial Statements for the year ended 30 June 2017

Accounting Policies

1.11 Impairment of non-cash-generating assets (continued)

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use. Useful life is either:

(a)the period of time over which an asset is expected to be used by the municipality; or

(b)the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired. The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit. After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.12 Share capital / contributed capital

An equity instrument is any contract that evidences a residual interest in the assets of an municipality after deducting all of its liabilities.

1.13 Provisions and contingencies

Provisions are recognised when:

the municipality has a present obligation as a result of a past event;

it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Accounting Policies

1.13 Provisions and contingencies (continued)

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent assets and contingent liabilities are not recognised.

1.14 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Accounting Policies

1.14 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

the amount of revenue can be measured reliably;

it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;

the stage of completion of the transaction at the reporting date can be measured reliably; and

the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

1.15 Revenue from non-exchange transactions

1.16 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.17 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds. Borrowing costs are recognised as an expense in the period in which they are incurred.

1.18 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.19 Unauthorised expenditure

Unauthorised expenditure means: overspending of a vote or a main division within a vote

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.20 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.21 Irregular expenditure

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Accounting Policies

1.21 Irregular expenditure (continued)

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.22 Use of estimates

The preparation of financial statements in conformity with Standards of GRAP requires the use of certain critical accounting estimates. Sections of the financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

1.23 Investments

Where the carrying amount of an investment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the statement of financial performance.

1.24 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.25 Segmental information

Segmental information on property, plant and equipment, as well as income and expenditure, is set out in Appendices C and D, based on the International Government Financial Statistics classifications and the budget formats prescribed by National Treasury. The municipality operates solely in its area of jurisdiction as determined by the Demarcation Board.

Segment information is prepared in conformity with the accounting policies applied for preparing and presenting the financial statements.

1.26 Budget information

Municipalities are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the financial statements.

Accounting Policies

1.27 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the local sphere of government are considered to be related parties.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.28 Employee benefits

Retirement Funds

The municipality provides retirement benefits for its employees and councillors. The contributions to fund obligations for the payment of retirement benefits are expensed in the year in which they become payable.

The municipality contributes to defined contribution and defined benefit funds. These funds are multi-employer funds

Defined Contribution Funds

Where an employee has rendered services to the municipality during the year, the municipality recognizes the contribution payable to a defined contribution plan in exchange for that service immediately as an expense.

Defined Benefit Plans

The municipality does not apply "defined benefit accounting" to the defined benefit funds to which it is a member where these funds as classified in terms of IAS 19 as multi-employer plans, as sufficient information is not available to apply the principles involved. As a result, paragraph 30 of IAS 19 is applied and such funds are accounted for as defined contribution funds.

To the extent that a surplus or deficit in the place, based on available information, may affect the amount of future contributions, these are assessed. In the case of surpluses, no change is made in the rate of contributions. In the case of deficits, the municipality will increase contributions on a phased basis. To the extent that the full discounted value of obligations to the funds is not fully accounted for at year end, a contingent liability arises and is reported on accordingly.

Medical Aid: Continued Members

The municipality provides post-retirement benefits by subsidizing the medical aid contributions of certain retired staff. According to the rules of the medical aid funds, with which the municipality is associated, a member (subject to the applicable conditions of service), on retirement, is entitled to remain a continued member of such medical aid fund, in which case the member is liable for the portion as determined by Council from time to time, of the medical aid membership fee, and the municipality for the remaining portion.

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan. **Defined benefit plans**

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Past service costs are recognized immediately to the extent that the benefits are already vested, and are otherwise amortized on a straight line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognized actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognized in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognized.

Gains or losses on the curtailment or settlement of a defined benefit plan are recognized when the municipality is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognized as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognized for a reimbursement.

The amount recognized in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognized actuarial gains and losses and unrecognized past service costs, and reduces by the fair value of plan assets. Any asset is limited to unrecognized actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

Accounting Policies

1.28 Employee benefits (continued)

GRAP 25: Employee benefits

The objective of GRAP25 is to prescribe the accounting and disclosure for employee benefits. The Standard requires a municipality to recognize:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when an municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

GRAP25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

Notes to the Financial Statements

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted standards and interpretations that are effective for the

current financial year and that are relevant to its operations:

2.2 Standards and interpretations issued, but not yet effective

The municipality has not applied standards and interpretations which have been published and are only

mandatory for the municipality's accounting periods beginning on or after 01 July 2016 or later periods:

GRAP 20 - Related Party Disclosures

GRAP 32 - Service Concession Arrangements : Grantor

GRAP 108 - Statutory Receivables

GRAP 109 - Accounting by Principals and Agents

Credit quality of consumer debtors

The credit quality of consumer debtors that are neither past nor due nor impaired can be assessed by reference to

external credit ratings (if available) or to historical information about counterparty default rates.

Financial Statements for the year ended 30 June 2017

Notes to the Financial Statements

2017	2016
R	R

9. Consumer debtors (continued)

Consumer debtors impaired As of 30 June 2016, consumer debtors of R21 541 939 (2015: R5,691,359) were impaired and provided for.

10. Inventory

Purified water	6 926 767	5 483 245
The inventory has been valued at the gazetted tariff.		

11. Cash and cash equivalents

Cash and cash equivalents included in the statement of financial position comprise the following statement of amounts indicating financial position:

Petty cash	3 000	3 000
Bank balances	1 119 896	655 189
Call investment deposits	19 885 691	17 331 483
	21 008 587	17 989 672

No cash and cash equivalents (or portions thereof) were pledged as security for any financial liabilities. No restrictions exist with regard to the use of cash. No portion is past due or impaired.

These amounts best represent the maximum exposure to credit risk at the end of the reporting period, without taking account of any collateral held or other credit enhancements.

Credit quality of cash at bank and short term deposits, excluding cash on hand

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings.

Although credit quality can be assessed, the municipality did not apply any methods to evaluate the credit quality

The municipality had the following bank accounts

12. Other financial liabilities		

Designated at fair value DBSA Loan - 61000384	8 889 018	9 596 135
Less: Current portion	(785 955)	<u>(1 433 794)</u>
Long term portion	8 103 063	8 162 341

The financial liability relates to DBSA loans taken over form uThukela Water which are now due and payable by

Amajuba DM in terms of the transfer of the water and sanitation function. These loans include interest capitalised as

they were not serviced by uThukela Water.

The loans were consolidated into one loan with a repayment period of 10 years. The final repayment date is January 2025

Non-current liabilities Designated at fair value	8 103 063	8 162 341
13. Finance leases obligation		
Laptops and Tablets Less: Current portion Long term portion	295 170 (127 812) 167 358	11 754 (11 754) -
Opening Balance Additions Amortisation Total finance leases obligation	11 754 377 156 (93 740) 295 170	79 089 - (67 335) 11 754
Minimum lease payments due - within one year - in second to fifth year inclusive Present value of minimum lease payments	161 237 183 933 345 170	11 754 - 11 754

It is municipality policy to lease certain ICT equipment under finance leases.

The average lease term is 30 months and the average effective borrowing rate was 3.50% average (2016: 3.00%). Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been

Performance bonuses provision

Performance bonuses are paid to employees subject to certain conditions. The provision is a calculation of the amount due to employees at the reporting date. Performance bonuses are measured at face value as it is expected that these would normally be paid shortly after the financial year end once performance evaluations have been completed.

Notes to the Financial Statements		2047	2016
15. Provisions (continued)		2017 R	2016 R
Post retirement medical aid benefit Independent valuers, Arch Actuarial Consulting, carried out a statutory valuation on an annua The principal actuarial assumptions used were as follows: Discount rate per annum Healthcare cost inflation Net discount rate	al basis	9.00% 7.33% 1.55%	8.74% 7.79% 0.73%

34. Contingencies		

Litigation is in the process against the municipality relating to a dispute with a service provider who alleges that the municipality has contravened a contract by terminating the contract prior to the termination, and is seeking damages of R3,960,924.

The municipality's lawyers and management consider the likelihood of the action against the municipality being

successful as unlikely, and therefore no provision has been made in the financial statements. This is a dispute with former municipal attorneys, Phungo Inc. who allege that the municipality should settle the bill of cost amounting to R171,622

which the municipality regards as excessive. The municipality's lawyers and management consider the likelihood of the action against the

the municipality being successful as unlikely, and therefore no provision has been made in the financial statements.

PM Mchunu's services were terminated and the matter is currently at the Labour Court. The employee claims a settlement of R58,363. being 12 times his annual salary. The municipality's lawyers consider the likelihood of the action against the municipality being successful as unlikely.

Accumulated surplus	586 931 963	592 499 738

Notes to the Financial Statements

2017	2016
R	R

37. Risk management

Capital risk management

The capital structure of the municipality consists of debt, which includes the borrowings (excluding derivative financial liabilities) disclosed in note 12, cash and cash equivalents disclosed in note 11, and equity as disclosed in the statement of financial position.

Consistent with others in the industry, the municipality monitors capital on the basis of the gearing ratio.

This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings

(including 'current and non-current borrowings' as shown in the statement of financial position) less cash and cash

equivalents. Total capital is calculated as 'equity' as shown in the statement of financial position plus net debt. There are no externally imposed capital requirements.

Total borrowings

Finance lease obligation	295 170	11 754
Other financial liabilities	8 889 018	9 596 135
	9 184 188	9 607 889
Less: Cash and cash equivalents	(21 008 587)	(17 989 672)
	(11 824 399)	(8 381 783)
Total equity	590 684 366	592 499 738
Total capital	578 859 967	584 117 955

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

Credit risk

Credit risk consists mainly of cash deposits and cash equivalents. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

38.Going concern

We draw attention to the fact that at 30 June 2017, while the municipality had an accumulated surplus of R590 684 366, the current liabilities exceeded the current assets by R39 432 747.

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that both Provincial and National government have neither the intention nor the need to liquidate or curtail materially the scale of funding of the municipality.

39. Unauthorised expenditure

Balance brought forward	576 758 735	523 383 645
Unauthorised expenditure	-	674 011

44. Utilisation of Long-term liabilities reconciliation		
Long-term liabilities raised Used to finance property, plant and equipment		
Long-term liabilities have been utilized in accordance with the Municipal Finance Management Act.		
45. Water losses		
The water losses are as follows: Kilolitres Valued at cost	2 760 503 R 21 531 925	2 536 591 R 19 455 650

46. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process. Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the financial statements.

The services and goods as detailed above were procured during the financial year under review and the process followed in procuring those goods deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the accounting officer who considered them and subsequently approved the deviation from the normal supply chain management regulations.

The deviations were reported to Council and ratified by Council as per the municipality's Supply Chain Management Policy.

47. Services in-kind

During the year Provincial Treasury assigned resources to the municipality to provide financial management support, which support included preparation of the financial statements.

This was in accordance with Provincial Treasury's mandate to assist and support municipalities

in strengthening and building their financial management capacity.

These services in-kind are not considered significant to the municipality's operations and/or service delivery objectives.

48. Repairs and maintenance

Repairs and maintenance incurred to maintain Property, Plant and Equipment is represented as follows:
