Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

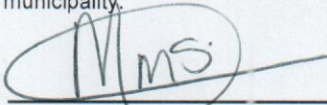

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

I certify that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in the note 25 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

I am responsible for the preparation of these annual financial statements, which are set out from pages 12 to 66, in terms of Section 126(1) of the Local Government: Municipal Financial Management Act and which I have signed on behalf of the municipality.

M M Skosana
Municipal Manager

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Report of the Chief Financial Officer

1. INTRODUCTION

The financial objective of the municipality is to secure sound and sustainable management of the financial affairs of the municipality and to assist the six local municipalities to be financially viable.

Critical functional areas for the district municipality amongst others include improvement of audit outcomes, effective financial management, fully functional internal audit units and audit committees, high vacancy rate in key positions, declining growth in the Regional Services Council Replacement Grant, increase in operational expenditure, which negatively impacts on the allocations to local municipalities.

Issue 3 of the IDP relates to financial viability and includes projects that contributed to the financial viability of the district and local municipalities.

The District is a pilot site for the new mSCOA regulations and successfully implemented the mSCOA for the 2016/17 financial year starting from 1 Jul 2015. 2016/17 are the second year of implementation of mSCOA. It has indeed been challenging as the mSCOA chart has been changing with every new version release of the mSCOA by National Treasury. The District has finalised and prepared the annual financial statements on version 5.4 of mSCOA, released 1 December 2015. Items were reclassified in terms of the mSCOA classification regulations in 2015/16.

2. REVIEW OF OPERATING RESULTS

The 2016/2017 budget of the Nkangala District Municipality was approved by Council on the 26 April 2016 under item DM 403/04/2016. The roll over budget was approved 25 August 2016 under DM 14/08/2016. An adjustment budget was approved on the 22th of February 2017 under item DM 220/02/2017. Herewith is commentary on the financial results.

2.1 REVENUE

The total revenue of the municipality increased from R381,760 (2015/16) to R387,883 million and indicate a positive outcome over the R368,675 budgeted for the 2016/17 financial year.

Revenue from exchange transactions amounts to R46,525 million, whilst the revenue from non-exchange transactions amounts to R341,358 million of which the major portions is from government grants and subsidies. The municipality is highly dependent on the RSC Replacement Grant that shows a deterioration growth rate year on year.

Indicative allocations published in Division of Revenue Act (DORA) point to an increase in the RSC Levy Replacement Grant.

The outlook for the next financial year is that the total revenue will increase compared to the year under review.

TRANSFERS AND SUBSIDIES

Transfers and subsidies decreased by 0.17 % from R340,046 million (2015/16) to R339,467 million (2016/17). Transfers and Subsidies include conditional and non-conditional grants, donations or subsidies to the District and amongst others include the RSC Levy Replacement grant, the Equitable Share, Municipal System Improvement Grant, Finance Management Grant, Rural Asset Management Grant and the Expanded Public Works Programme Incentive Grant. 100.62% of budgeted amount was realised for 2016/17 due to a donation received that was not foreseen during the budget process.

According to the accounting policies only the portion that has been expensed and meets the conditions of the conditional grant is recognized as revenue.

INTEREST, DIVIDENDS AND RENT ON LAND

The District earned interest, which increased by 14.86 from R38,258 (2015/16) to R43,945 million (2016/17). This increase is attributed to the slow implementation of projects to local municipalities under expenditure: transfers and subsidies paid and left more surplus cash for investment and the increase in interest rates on call deposits. 171.8% realised of budgeted amount for 2016/17 and the variance is due to the slow implementation of the projects for local municipalities under the transfer and subsidies expenditure.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Report of the Chief Financial Officer

FINES, PENALTIES AND FORFEITS

Revenue from Fines, Penalties and Forfeits decrease by 33.30% from R2,440 (2015/16) to R1,628 (2016/17). 98.61% of budgeted amount realised for 2016/17 due to the adhoc nature of the imposing of fines and penalties.

SALE OF GOODS

Sale of goods decreased by 31.03% from R0.704 (2015/16) to R0,485 million and consists mainly the selling of tender documents. 138.61% realised for 2016/17 due to more selling of goods than anticipated and more cost reflective tariffs.

OPERATIONAL REVENUE

Operational revenue increased by 1343.61% from R0,138 million (2015/16) to R1,995 million (2016/17). 138.61% of budgeted amount realised for 2016/17 due to more operational revenue received than anticipated , mainly due to the receipt form the insurance provider for stated benefits.

RENTAL FROM FIXED ASSETS

Rental from fixed assets decreased by 2.54% from R0,102 million (2015/16) to R0,100 million (2016/17) and flows from the lease agreement with Department of Public Works for offices at the Districts main office building. 88.90% realised as less facilities was rented out in 2016/17 than anticipated.

LICENCES AND PERMITS

The municipal health services have been transferred to the District and the District is for the first time receiving revenue from the issuing of environmental licences and permits. Revenue from licences and permits has increased with 274.94% from R0,070 million (2015/16) to R0,263 million was realised in the (2016/17) financial year. 263.11% of budgeted amount realised for 2016/17 due to the new function that are rendered by the District.

2.2 EXPENDITURE

The total expenditure increased with 2.06% from R356,770million (2015/16 to R363.980 million (2016/17) compared to the budgeted operating expenditure of R487,830 million (2016/17). Transfers and subsidies to local municipalities are the main driver of the expenditure of the District

TRANSFERS & SUBSIDIES

This expenditure relates to expenditure on infrastructure and operational projects for local municipalities within the District's jurisdictional area.

Actual grants and subsidies paid represent 44.58% (49.72% 2015/16) of the total expenditure and decreased by 8.48% from R177,349 million (2015/16) to R162,301 million (2016/17). The actual transfers and subsidies are 67.12% of the budgeted amount of R241,819 million (2016/17) due to the slow implementation of projects and the projects that were not finalised by 30 June 2017 and transferred to Inventory – Work in progress.

EMPLOYEE RELATED COST

Actual employee related costs increased by 20.52% from R90,060 (2015/16) to R108,540 million (2016/17) due to the drive to appoint staff in all vacancies. Actual employee related costs are 92.45 % of the budgeted employee related cost, which is due to the few vacancies which have not been filled in the year under review.

OPERATIONAL COST

The actual expenditure of operational costs increased by 3.27% from R31,318 million (2015/16) to R32,344 million (2016/17). Actual operational costs are 71.38% of the budgeted operational cost of R45,316 million. Due to non-responsive tenders and operational projects that were not fully completed.

CONTRACTED SERVICES

Contracted services increased by 9.98% from R30,847 million (2015/16) to R33,926 million (2016/17). Actual contracted services are 65.00% of the budgeted operational cost of R52,197 million, due to non- responsive tenders and contracts that were not fully completed by 30 June 2017.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Report of the Chief Financial Officer

REMUNERATION OF COUNCILLORS

Payments made to councillors are in terms of the legislation on remuneration of public office bearers.

Actual councillor allowance costs decreased by 2.29 % from R12,882 million (2015/16) to R12,587 million (2016/17). Actual councillor allowance costs are 87.41% of the budgeted remuneration of councillors, due to the low % increase that realised on the determination of upper limits and the elections that resulted in less council sittings.

DEPRECIATION/ AMORTISATION

Depreciation/amortisation is charged on Property, Plant & Equipment/intangibles at rates determined in the accounting policies and asset useful lives are reviewed annually.

Actual depreciation/amortisation costs increased by 2.42 % from R9,381 million (2015/16) to R9,609 million (2016/17). Actual depreciation/amortisation costs are 93.36% of the budgeted depreciation/amortisation cost of R10,292 million and is dependent on the acquisition of new assets for the District.

INVENTORY CONSUMED

Actual inventory consumed costs increased by 5.79 % from R3,351 million (2015/16) to R3,546 million (2016/17). Actual inventory consumed costs are 75.88% of the budgeted amount of R4,673 million, due to the less than anticipated inventory consumed.

INTEREST, DIVIDEND AND RENT ON LAND PAID

The District only realised interest paid on the annuity loan with DBSA and Financial leases for office equipment.

Actual interest costs decreased by 25.80 % from R1,519 million (2015/16) to R1,127 million (2016/17), the decline is due to the redemption of loans and finance leases. Actual interest costs are 99.92% of the budgeted amount of R1,128 million.

GAINS AND LOSSES

The District only realised a small gain on the disposal of fixed and intangible assets of R0,028 million (2015/16) compared to the loss of R0,071 million (2016/17) financial year.

SURPLUS

The municipality realised a surplus of R23,832 million 2016/17 as a result of the cost containment measures that was introduced.

3. FINANCIAL POSITION

The Statement of Financial position represents the financial strength of the municipality by a comparison of assets over liabilities.

The total assets of the municipality increased by 5.01% from R739,738 million (2015/16) to R776,770 million (2016/17). The contributing factors of this increase can mainly be attributed to declining inventory, increase in cash and cash equivalents, property, plant and equipment and long term investment.

Total liabilities increased by 18.90% from R69,827 million (2015/16) to R83,026 million (2016/17), which is mainly due to the increase in accruals, post-retirement benefits and provisions for long services.

4. KEY RATIOS

CURRENT RATIO

This ratio represents the ability of the municipality to pay short term obligations within the next 12 months.

	Current assets	Current Liabilities	
	R million	R million	Ratio
2015/16	562,654	43,666	12.89:1
2016/17	570,859	58,213	9.81:1

ACID TEST

A stringent indicator that determines whether a company/institution has enough short-term assets to cover its immediate liabilities without considering inventory. Institutions with ratios of less than 1 cannot pay their current liabilities and should be looked at with extreme caution.

	Current assets – Inventory	Current Liabilities	
	R million	R million	Ratio
2015/16	494,000	43,666	11.31:1
2016/17	467,764	58,213	8.04:1

SOLVENCY RATIO

This represents the ability of the municipality to pay both its long term and short term obligations.

	Total Assets	Total Liabilities	
	R million	R million	Ratio
2015/16	739,739	69,827	10.59:1
2016/17	776,770	83,026	9.36:1

OTHER RATIOS

Ratio	30 Jun 2016	30 Jun 2015
Employee related cost / Total expenditure	29.81	25.25
Actual transfers and subsidies paid / Total expenditure	44.58	49.72
Actual transfers and subsidies paid / Total revenue	41.84	46.45

5. CREDIT RATING

Global credit rating committee has in August 2013 rated the Nkangala District Municipality's as follows:

Security class	Rating scale	Rating	Rating outlook	Review date
Long term	National A(ZA)	Stable		08/2014

High credit quality relative to other issuers or obligations in the same country. Protection factors are good. However, risk factors are more variable and greater in periods of economic stress.

Security class	Rating scale	Rating	Rating outlook	Review date
Short term	National A(ZA)	Stable		08/2014

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Report of the Chief Financial Officer

Very high certainty of timely payment relative to other issuers or obligations in the same country. Liquidity factors are excellent and supported by good fundamental protection factors. Risk factors are minor.

Security class	Rating scale	Rating	Rating outlook	Review date
Long term	International	BBB-	Stable	08/2014

Adequate protection factors and considered sufficient for prudent investment. However, there is considerable variability in risk during economic cycles.

6. GENERALLY RECOGNISED ACCOUNTING PRACTICES

The financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The following standards were applicable during the year under review:

Reference Topic

GRAP 1 Presentation of Financial Statements

GRAP 2 Cash Flow Statements

GRAP 3 Accounting Policies, Changes in Accounting Estimates and Errors

GRAP 4 The Effects of Changes in Foreign Exchange Rates

7. CONCLUSION

Good governance, sound financial management and financial viability remain critical success factors for the municipality.

8. ACKNOWLEDGEMENT

I would like to extend my appreciation to the Honourable Executive Mayor, Mayoral Committee and Councillors for strategic direction and leadership demonstrated during the financial year.

The guidance and vision of the Municipal Manager and Heads of Departments are acknowledged with gratitude. A special word of appreciation is extended to all my colleagues for their loyalty and support.

Thank you

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Trade receivables / Held to maturity investments and/or loans and receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The trade receivables were individually reviewed for impairment indicators and there was no indication of that impairment was required during the year.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including supply demand, together with economic factors such as interest.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note - Provisions.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Useful lives of property, plant and equipment and other assets

The municipality's management determines the estimated useful lives and related depreciation/amortisation charges for property, plant and equipment and other assets. This estimate is based on the pattern in which an asset's future economic benefits or service potential are expected to be consumed by the municipality.

Effective interest rate

The municipality used the government bond rate to discount future cash flows.

Defined benefit obligations

The municipality obtains actuarial valuations of its defined benefit plan and other long-term employee benefits. The defined benefit plan and other long-term employee benefits identified are post-retirement health benefit obligations and long-service awards. The estimate liabilities are recorded in accordance with GRAP 25. Additional information is disclosed in Note 17 and 19.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment*. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment* are accounted for as property, plant and equipment*.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.4 Property, plant and equipment (continued)

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Directly attributable costs include the following:

- Cost of site preparation.
- Initial delivery and handling costs.
- Installation costs.
- Professional fees.
- Estimated cost of dismantling the asset and restoring the site to the extent that it is recognised as a provision.

Subsequently, property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses.

Land is not depreciated as it is deemed to have an indefinite life.

Subsequent expenditure is capitalised when the recognition and measurement criteria of an asset are met.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land		Indefinite life
Buildings and other structures	Straight line	15 to 30 years
Leased assets	Straight line	3 years
Machinery and equipment	Straight line	5 to 20 years
Furniture and office equipment	Straight line	1 to 15 years
Transport assets	Straight line	7 to 20 years
Computer equipment	Straight line	1 to 10 years
Infrastructure: Electricity	Straight line	20 years
Infrastructure: Roads, Pavements, Bridges and Stormwater	Straight line	10 to 30 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Where items of property, plant and equipment have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.5 Intangible assets

An intangible asset is an identifiable non-monetary asset without physical substance.

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, other	3-15 years

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.5 Intangible assets (continued)

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.6 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

1.7 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one municipality and a financial liability or a residual interest of another municipality.

Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Investments	Financial asset measured at amortised cost
Bank	Financial asset measured at fair value
Cash	Financial asset measured at fair value

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Other Payables	Financial liability measured at amortised cost
Long term Liabilities	Financial liability measured at amortised cost
Finance lease liabilities	Financial liability measured at amortised cost
Retentions	Financial liability measured at amortised cost

Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

The municipality recognises financial assets using trade date accounting.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.7 Financial instruments (continued)

Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The municipality measures a financial asset and financial liability initially at its fair value.

The municipality first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the municipality analyses a concessionary loan into its component parts and accounts for each component separately. The municipality accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, a municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The municipality assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

Financial assets measured at amortised cost:

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.7 Financial instruments (continued)

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition

Financial assets

The municipality derecognises financial assets using trade date accounting.

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another municipality by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.8 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the .

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term except where another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis over the lease term except where other systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

1.9 Inventories

The municipality constructs infrastructure projects, which will subsequently be transferred to local municipalities in its area of jurisdiction at no cost when the project is completed. Projects still in progress and not yet completed are disclosed as inventory. Inventory is measured at actual cost.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

1.10 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

Cost plus or cost based contract is a construction contract in which the contractor is reimbursed for allowable or otherwise defined costs and, in the case of a commercially-based contract, an additional percentage of these costs or a fixed fee, if any.

Fixed price contract is a construction contract in which the contractor agrees to a fixed contract price, or a fixed rate per unit of output, which in some cases is subject to cost escalation clauses.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.10 Construction contracts and receivables (continued)

The entity assesses the terms and conditions of each contract concluded with customers to establish whether the contract is a construction contract or not. In assessing whether the contract is a construction contract, an entity considers whether it is a contractor.

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by .

Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected deficit is recognised as an expense immediately.

1.11 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Assets that are subject to impairment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recovered.

An impairment loss is recognised if the recoverable amount of an asset is less than its carrying amount. The impairment loss is recognised as an expense in the statement of financial performance immediately. The recoverable amount of the asset is the higher of the asset's fair value less cost to sell and its value in use.

The fair value represents the amount obtained obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties.

The value in use of an asset represents the expected future cash flows, from continuing use and disposal that are discounted to their present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and the risks specified to the asset.

For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the assets belong. A cash generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash flows from other assets or group of assets. An impairment loss is recognised whenever the recoverable amount of a cash-generating unit is less than its carrying amount.

The impairment loss is allocated to reduce the carrying amount of the asset. The carrying amount of individual assets are not reduced below the higher of the value in use, R1.00 or fair value less cost to sell.

A previously recognised impairment loss related to assets is reserved if there has been a change in the estimates used to determine the recoverable amount, however not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognised in prior periods,

After the recognition of an impairment loss, any depreciation charge for the asset is adjusted for future periods to allocate the assets' revised carrying amount on a systematic basis over its remaining useful life.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation or amortisation.

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an oversized or overcapacity asset. Oversized assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.12 Impairment of non-cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.12 Impairment of non-cash-generating assets (continued)

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.12 Impairment of non-cash-generating assets (continued)

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.13 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

Short-term employee benefits include items such as:

- Wages, salaries and social security contributions
- Short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service
- Non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cell phone) for current employees.

When an employee has rendered services to the municipality during the reporting period, the municipality recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expenses), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of benefits, the municipality recognises the excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund;
- as an expense, unless another standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measures the expected cost of accumulating compensated absences as the additional amount that the municipality expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the municipality has no realistic alternative but to make the payments.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.13 Employee benefits (continued)

Defined contribution plans

Obligations for contributions to defined contribution plans are recognised as an expense in the statement of financial performance as incurred.

Contributions to the defined contribution pension plan in respect of service in a particular period are included in the employees' total cost of employment and are charged to the statement of financial performance in the year to which they relate as part of cost of employment.

The municipality contributes towards retirement benefits of its employees and councilors to the under- mentioned pension funds:

- Joint Municipal Pension Fund
- Municipal Employees Pension Fund

Municipal Gratuity Fund Councilors are members of the Municipal Councilor's Pension Fund that was established in terms of the Remuneration of Public Office Bearers Act 1998 (Act 20 of 1998).

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.13 Employee benefits (continued)

Defined benefit plans

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Post-employment medical care benefits:

The municipality provides post employment medical care benefits to its employees and their legitimate spouses. The entitlement to post-retirement medical benefits is based on employee remaining in service up to retirement age and the completion of a minimum service period. The expected cost of these benefits is accrued over the period of employment.

Defined benefit plans are post-employment benefit plans other than defined contribution plans. Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the municipality recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement.

The amount determined as a defined benefit liability may be negative (an asset). The municipality measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.13 Employee benefits (continued)

The municipality determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses, which is recognised immediately;
- past service cost, which is recognised immediately;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and where applicable, past service cost, the municipality attributes benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, the municipality attributes benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service) until;
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- ♦ any resulting change in the present value of the defined benefit obligation; and
- ♦ any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the municipality re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.13 Employee benefits (continued)

The municipality offsets an asset relating to one plan against a liability relating to another plan when the municipality has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflects the time value of money.

The currency and term of the financial instrument selected to reflect the time value of money are consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Accrued leave pay

The liability is based on the total accrued leave days at year end and it is recognised as it accrue for employees, regardless how the obligation will be settled at the future date.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.14 Long service awards

The municipality has an obligation to provide long-term service allowance benefits to all of its employees. According to the rules of the long-term service allowance scheme, which the municipality instituted and operates, an employee (who is on the current conditions of service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 5, 10, 15, 20, 25 and 30 years of continued service.

The municipality's liability is based on an actuarial valuation. The Projected Unit Credit Method is used to value the liabilities.

Actuarial gains and losses on the long-term service awards are recognised in the statement of financial performance.

The amount recognised as a liability for long-term service awards is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality recognises the net total of the following amounts as expense or revenue, except to the extent that another standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which is recognised immediately;
- past service cost, which is recognised immediately; and
- the effect of any curtailments or settlements.

1.15 Contingent liabilities

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability is:

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality; or
- present obligation that arises from past events but is not recognised because:
 - ◆ it is not probably that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation;
 - ◆ the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 34.

1.16 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.16 Commitments (continued)

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

1.17 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of tender documents

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

All other revenue is recognised at fair value as and when they occur.

Rental of facilities

Rental of facilities arising from the use by others of entity assets yielding interest is recognised when:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;

Interest

Revenue arising from the use by others of entity assets yielding interest is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

1.18 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Licences and permits

Revenue from the issuing of licenses and permits in terms of laws and regulations and is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably.

Fines, penalties and forfeits

Revenue from the issuing of fines is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

The municipality has two types of fines: spot fines and summonses. There is uncertainty regarding the probability of the flow of economic benefits or service potential in respect of spot fines as these fines are usually not given directly to an offender. Further legal processes have to be undertaken before the spot fine is enforceable. In respect of summonses the public prosecutor can decide whether to waive the fine, reduce it or prosecute for non-payment by the offender. An estimate is made for the revenue amount collected from spot fines and summonses based on past experience of amounts collected. Where a reliable estimate cannot be made of revenue from summonses, the revenue from summonses is recognised when the public prosecutor pays over to the entity the cash actually collected on summonses issued.

Government grants

Government grants are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

The municipality assesses the degree of certainty attached to the flow of future economic benefits or service potential on the basis of the available evidence. Certain grants payable by one level of government to another are subject to the availability of funds. Revenue from these grants is only recognised when it is probable that the economic benefits or service potential associated with the transaction will flow to the entity. An announcement at the beginning of a financial year that grants may be available for qualifying entities in accordance with an agreed programme may not be sufficient evidence of the probability of the flow. Revenue is then only recognised once evidence of the probability of the flow becomes available.

Restrictions on government grants may result in such revenue being recognised on a time proportion basis. Where there is no restriction on the period, such revenue is recognised on receipt or when the Act becomes effective, which-ever is earlier.

When government remit grants on a re-imbusement basis, revenue is recognised when the qualifying expense has been incurred and to the extent that any other restrictions have been complied with.

Other grants and donations

Other grants and donations are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably; and
- to the extent that there has been compliance with any restrictions associated with the grant.

If goods in-kind are received without conditions attached, revenue is recognised immediately. If conditions are attached, a liability is recognised, which is reduced and revenue recognised as the conditions are satisfied.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.19 Cash and cash equivalents

Cash includes cash on hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

1.20 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.21 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.22 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.23 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.24 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.25 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998), or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.26 Budget information

The comparison of budget and actual amounts presents separately for each level of legislative oversight:

- the approved and final amounts
- the actual amounts on a comparable basis
- by way of note disclosure, an explanation of material differences between the budget for which the municipality is held publicly accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.26 Budget information (continued)

Where the municipality prepares its budget and annual financial statements on a comparable basis, it includes the comparison as an additional column in the primary annual financial statements. Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the "Statement of Comparison of Budget and Actual Amounts". This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

A comparable basis means that the budget and annual financial statements:

- are prepared using the same basis of accounting i.e. either cash or accrual
- include the same activities and entities
- use the same classification system
- are prepared for the same period.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2015/07/01 to 2018/06/30.

1.27 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.28 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.29 Value Added Tax

The Municipality is registered with the South African Revenue Services as a VAT vendor in accordance with section 15(2) of the Value Added Tax Act (No. 89 of 1991).

The Municipality accounts for Value Added Tax on the payment basis as per the VAT Act.

	54 001 630	39 509 476

16. Consumer deposits

Rental properties	10 030	14 270
-------------------	--------	--------

Consumer deposits relates to the office space rented out by the municipality.

17. Defined benefit obligation

Projected accrued liability

The post-employment medical aid benefits are provided for retired employees and their legitimate spouses and is paid monthly. The entitlement to post-retirement medical benefits is based on employees remaining in service up to retirement age and the completion of a minimum service period. The provision is an estimate of the liability based on historical staff turnover and life expectancy of the relevant people and is discounted by using the inflation rate at the reporting date. The following is a reconciliation of the unfunded accrued liability:

Opening balance	16 146 640	13 798 769
Current service cost	1 577 037	1 085 182
Interest cost	1 510 939	1 261 079
Actuarial gain/ (loss)	(881 214)	121 970
Expected employer benefit payments	(188 264)	(120 360)
Total liability	18 165 138	16 146 640
Current portion of liability	235 938	161 460
Non-current portion of liability	17 929 200	15 985 180
Total post-retirement medical benefit liability	18 165 138	16 146 640

Valuation method

The method used is called the "Projected unit credit method". Under this method the accrued service liabilities are determined by projecting all future payments which will be made by the employer in respect of benefits accrued up to the valuation date. Assumptions are made in respect of, inter-alia, medical scheme contribution increases, withdrawals, deaths and ill-health, early and normal retirements. These payments are discounted at the valuation rate of discount to determine the present value of the liabilities at the valuation date.

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

Figures in Rand

2017

2016

17. Defined benefit obligation (continued)

Key financial assumptions

The following key financial assumptions were used to calculate the unfunded accrued liability and the expense figures for the current financial year:

Assumption	2017 value p.a.	2016 value p.a.
Discount rate	10%	9.40%
Health care cost inflation rate	8,27%	8.44%
Net effective discount rate	1,60%	0.89%
Salary inflation rate	5,83%	7.94%

Sensitivity Analysis

The liability at the Valuation Date was recalculated to show the effect of:

- i) A 1% increase and decrease in the assumed rate of health care cost inflation;
- ii) A 1% increase and decrease in the discount rate;
- iii) A one-year age reduction in the assumed rates of post-retirement mortality;
- iv) A one-year decrease in the assumed average retirement age; and
- v) A 10% decrease in the assumed proportion of in-service members that continue to receive the subsidy after retirement.

The table below summarises the results of the sensitivity on the accrued liability:

	Changes in assumptions	In-service R'Million	Continuation R'Million		
Central assumptions		14,714	3,451	18,165	
Health care inflation	+1%	15,669	3,638	19,307	6 %
	-1%	13,329	3,208	16,537	-9 %
Discount rate	+1%	12,471	3,120	15,591	-14 %
	-1%	17,582	3,850	21,432	18 %
Post retirement mortality	-1yr	15,080	3,555	18,635	3 %
Average retirement age	-1yr	15,865	3,451	19,316	6 %
Continuation of membership at retirement	-10%	13,286	3,451	16,737	-8 %

The table below summarises the results of the sensitivity analysis on the current service and interest costs for the year ending 30 June 2017:

	Changes in assumptions	Service cost R'000s	Interest cost R'000s		
Central assumptions		1 577	1 511	3 088	
Health care inflation	+1%	1 709	1 628	3 337	8 %
	-1%	1 363	1 356	2 719	-12 %
Discount rate	+1%	1 257	1 426	2 683	-13 %
	-1%	2 006	1 603	3 609	17 %
Post retirement mortality	-1yr	1 619	1 557	3 176	3 %
Average retirement age	-1yr	1 731	1 620	3 351	9 %
Continuation of membership at retirement	-10%	1 426	1 384	2 810	-9 %

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

Figures in Rand	2017	2016
19. Provision and impairment		
Long service awards		
Opening balance	2 555 244	1 247 286
Current service cost	581 698	278 850
Interest cost	207 336	99 823
Actuarial gain / (loss)	(302 039)	1 000 976
Expected employer benefits payments	(350 784)	(71 691)
Total liability	2 691 455	2 555 244
Current portion of liability	435 664	309 804
Non-current portion of liability	2 255 791	2 245 440
Total long-service benefit liability	2 691 455	2 555 244

Key financial assumptions

The following key financial assumptions were used to calculate the unfunded accrued liability and the expense figures for the current financial year:

Assumption	2017 value p.a.	2016 value p.a.
Discount rate	8,48%	9,40%
Health care cost inflation rate	8,44%	8,44%
Net effective discount rate	2,05%	0,89%
Salary inflation rate	6,30%	7,21%

Sensitivity Analysis

The liability at the valuation date was recalculated to show the effect of:

- A 1% increase and decrease in the assumed general salary inflation rate;
- A 1% increase and decrease in the discount rate;
- A two-year decrease and increase in the assumed average retirement age of employees; and
- A 50% decrease in the assumed withdrawal rates from service.

The table below summarises the results of the sensitivity on the accrued liability:

	Changes in assumptions	Liability R'Million	
Central assumptions		2,691	
General salary inflation	+1%	2,869	1 %
	-1%	2,532	-1 %
Discount rate	+1%	2,526	1 %
	-1%	2,878	-1 %
Average retirement age	-2yrs	2,474	-2 %
	+2yrs	2,957	2 %
Withdrawal rates	-50%	3,424	-50 %

The table on the next page summarises the results of the sensitivity analysis on the current service and interest costs for the year ending 30 June 2017:

North West Development Corporation vs NDM.

The matter was settled by NDM with a settlement amount of R40 000.

TC Makola vs NDM & 7others

A claim for unfair dismissal and unfair suspension was issued by Mr Makola for a total amount of R1 609 739.

Magiya Women Development vs NDM

A counterclaim for contractual damages and/or undue enrichment from NDM on allegations that there is no valid contract between Magiya and NDM, thus NDM unduly benefited from the works rendered by Magiya Women Development for an amount of R1 887 705.13.

Pipe Jack Gauteng (Pty)Ltd vs NDM

Plaintiff instituted action in the North Gauteng High Court, inter alia claiming payment of R1 898 454.51 plus interest and costs from the client for the work done for the municipality.

J Ntuli vs NDM

Plaintiff instituted action in the North Gauteng High Court, claiming payment of R1 550 000 from 3 defendants, namely Nkangala District Municipality, Thembisile Hani Local Municipality and Buzaphi Construction (Pty)Ltd for damages pertaining to injuries allegedly sustained when she fell into a trench dug.

Diamond Ntuli vs NDM

Applicant is seeking reinstatement as a councilor and the amount of R45 000 will be payable.

35. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's risk management policies are established and analyse the risks faced by the municipality, to set up limits and controls to monitor risks and adherence to limits. The risk management policy is reviewed annually and a risk assessment is performed annually and monitored regularly to effect changes in the municipality's activities and risk profile.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

Figures in Rand 2017 2016

35. Risk management (continued)

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2017	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	3 312 161	3 085 068	1 542 534	-
Derivative financial instruments	217 780	-	-	-
At 30 June 2016	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	3 402 998	3 085 068	4 627 602	-
Derivative financial instruments	267 922	217 780	-	-

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the council.

Nkangala district Municipality manages its credit risk in its borrowing and investing activities by dealing with A+ rated financial institutions and by spreading its exposure over a wide range of financial institutions in accordance with the approved cash and investment policy of Council.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2017	2016
Trade and other receivables from exchange transactions	118 780	143 786
Investments	44 846 358	40 862 493
Cash and cash equivalents	455 442 442	465 142 151
Construction contracts and receivables	648	648
Prepayments	218 576	-

Market risk

Interest rate risk

Nkangala District Municipality is exposed to interest rate risk on one of its long term borrowings, namely the Development Bank of South Africa loan conditions set on 6 months JIBAR - 2%.

Nkangala District Municipality has a long term investment in the form of a promissory note. The municipality's interest rate risk arises from long-term borrowings which are issued at variable rates thereby exposing the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

Nkangala District Municipality

(Registration number DC31)

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

Figures in Rand 2017 2016

36. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

37. Fruitless and wasteful expenditure

Opening balance	14 387	1 544
Current year expenditure	-	12 843
Amount recovered	(14 387)	-
	<u>-</u>	<u>14 387</u>

During the 2014/15 financial year accommodation was booked for two advocates to represent NDM at a CCMA case in Southern Sun - The Ridge Hotel. The advocates did not show up and the hotel charged a no show fee of R1,544 for the rooms not taken up. The matter will be referred to Council Committee for investigation.

During the 2015/16 financial year, an advert was erroneously placed in the newspapers seeking for public comments on the draft unaudited annual report. The municipality paid an amount of R12,843 and the matter was referred to Council Committee for investigation and Council resolved that the amount be recovered.

The total amount was recovered in the current financial period.

38. Irregular expenditure

Opening balance	-	14 735 720
Add: Irregular Expenditure - current year	859 933	-
Add: Irregular Expenditure - prior year	-	1 880 087
Less: Amounts recovered	-	(144 157)
Less: Amounts written off by Council	(59 250)	(16 408 331)
Less: Amount transferred to debtors (to be recovered)	-	(63 319)
	<u>800 683</u>	<u>-</u>

Refer to the annexure for additional disclosure on irregular expenditure.

The value of R800 683, as disclosed above, is not complete as management was still in the process of quantifying the full extent of the irregular expenditure.

39. Additional disclosure in terms of Municipal Finance Management Act

Amount paid - current year	(27 356 443)	(19 251 399)
	<u>-</u>	<u>-</u>

40. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

41. Prior period errors

VAT transaction were not captured in the prior years and interest was not recognised..

Accruals were erroneously captured against bank.

Advertising costs were erroneously capitalised under Work in Progress in the prior year.

Transports assets were erroneously not included/included in prior year.

The correction of the error(s) results in adjustments as follows:

Statement of financial position

Increase in VAT Receivables	-	3 285 368
Increase in Property plant and Equipment	-	221 926
Increase Payables from exchange transactions	-	(2 794 140)
Increase in Bank	-	2 794 140
Increase Opening Accumulated Surplus or Deficit	-	(3 345 982)
	<u>-</u>	<u>161 312</u>
