MEC	Member of the Executive Council
MFMA	Municipal Finance Management Act
MIG	Municipal Infrastructure Grant (Previously CMIP)

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgments and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the municipality sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2021 and, in the light of this review and the current financial position, she is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the Grants for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the Mhlabuyalingana Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

I would like to bring to your attention the following material matters to your attention:

I certify that the salaries, allowances and benefits of councilors as disclosed in note 27 to these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution of the Republic of South Africa, read with the Remuneration of Public Office Bearers Act, Act 20 of 1998 and the Minister of Provincial and Local Government's determination in accordance with the Act.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page 5.

The annual financial statements set out on page 5, which have been prepared on the going concern basis, were approved by the accounting officer on 31 October 2020 and were signed on its behalf by:

Accounting Officer
Mrs. NP Gamede

Accounting Policies

Figures in Rand	Note(s)	2020	2019
-----------------	---------	------	------

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgment is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgments include:

Other significant judgments, sources of estimation uncertainty and/or relating information, have been disclosed in the relating notes.

Trade receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgments as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the municipality determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

1.3 Significant judgements and sources of estimation uncertainty (continued)

Options granted

Management is aware of the new GRAP standard effective from 1 April 2019 GRAP 108 Statutory Receivables, This means that municipalities that apply standards of GRAP need to consider the standard in preparing their financial statements for 30 June 2020. Although the standard is effective from 1 April 2019, entities are allowed a three-year period within which to change the classification and measurement of their statutory receivables. This three-year period is voluntarily adopted by municipality. Municipality would comply with GRAP 108 by 30 June 2022. See note 52 for additional information on Transitional Provision per Directive 8 on Statutory Receivables.

Impairment of property, plant and equipment

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

The calculation in respect of the impairment of property, plant and equipment is based on an assessment of the extent to which the recoverable amount of the asset has declined below the carrying amount. This was performed across all classes of property, plant and equipment.

Provisions, contingent liabilities

Management's judgment is required when recognising and measuring provisions, as well as when measuring contingent liabilities. Provisions are discounted where the effect of discounting is material, the using cost of capital.

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 12 - Provisions.

Provisions for Landfill site

The entity has an obligation to rehabilitate it's landfill site in terms of it's licence stipulations. Provision is made for this obligation based on the size/ extent of the land to be rehabilitated and the rehabilitation period.

Useful lives of property plant and equipment and intangible assets

The useful lives of assets are based on management's estimates. Management considers the impact of technology, service requirements and required return on assets to determine the optimum useful-life expectation, where appropriate. This was performed on an individual basis as well as per service-identifiable categories across all classes.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Accounting by principals and agent

The municipality makes assessments on whether it is the principal or agent in principal-agent relationships. Municipality has used these criteria to assess if its an agent:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Additional information is disclosed in Note 53.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Post retirement benefit

The cost of long services awards benefits is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Buildings	Straight-line	20 -30 years
Boreholes	Straight-line	20 years

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.4 Property, plant and equipment (continued)

Mobile clinics	Straight-line	30 years
Furniture and fixtures	Straight-line	7 - 10 years
Motor vehicles	Straight-line	5 - 7 years
Office equipment	Straight-line	3 - 7 years
IT equipment	Straight-line	3 - 7 years
Creche	Straight-line	30 years
Infrastructure	Straight-line	3 - 30 years
Roads and Paving	Straight-line	20 years
Roads and Water	Straight-line	3 - 10 years
Gravel roads	Straight-line	10 years
Community Halls	Straight-line	30 years
Bins and containers	Straight-line	15 years
Libraries	Straight-line	30 years
Fence	Straight-line	5 - 10 years
Gates	Straight-line	5 - 10 years
Jojo Tanks	Straight-line	30 years
Park facilities	Straight-line	10 years
Landfill sites	Straight-line	30 years
Leased Office Equipment	Straight-line	5 years
Specialised vehicles	Straight-line	10 years
Special Plant and Equipment	Straight-line	10 - 15 years
Street lights	Straight-line	10 - 25 years

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 3).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 3).

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.5 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Computer software	Straight-line	5 years
Other Intangible assets	Straight-line	3 years

The Intangible assets are derecognised:

- on disposal; or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

1.6 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.6 Financial instruments (continued)

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterpart has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.6 Financial instruments (continued)

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Cash and cash equivalents	Financial asset measured at amortised cost
Consumer debtors	Financial asset measured at amortised cost
Receivables and exchange transactions	Financial asset measured at amortised cost
Receivables and non-exchange transactions	Financial asset measured at amortised cost
VAT Receivables	Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Unspent conditional grants	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Payables from exchange transactions	Financial liability measured at amortised cost

Initial recognition and measurement

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instruments.

The municipality classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Financial instruments are measured initially at fair value plus in case of a financial instrument not subsequently measured at fair value, transaction costs that are directly attributable to acquisition or issue.

Transaction costs on financial instruments at fair value through surplus or loss are recognised in surplus or loss.

Subsequent measurement

Financial instruments at fair value are subsequently measured at fair value, with gains and losses arising from changes in fair value being included in surplus or loss for the period.

Financial assets and liabilities at amortised cost are subsequently measured at amortised cost, using the effective interest method.

Impairment of financial assets

At each end of the reporting period the municipality assesses all financial assets; (individually for all significant debtors account and collectively for other debtors with similar credit risk characteristics), other than those at fair value, to determine whether there is objective evidence that a financial asset or group of financial assets has been impaired.

For amounts due to the municipality, significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy and default of payments are all considered indicators of impairment.

Impairment losses are recognised in surplus or loss.

Impairment losses are reversed when an increase in the financial asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the financial asset at the date that the impairment is reversed shall not exceed what the carrying amount would have been had the impairment not been recognised.

Reversals of impairment losses are recognised in surplus or loss.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.7 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.8 Inventories

Inventories comprise current assets, consumption or distribution during the ordinary course of business.

Inventories shall be recognised as an asset if, and only if:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the inventories can be measured reliably.

Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their present location and condition.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Inventories held for sale in the ordinary course of business are valued at the lower of cost and net realisable value, or where unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost.

Inventories held for consumption, distribution, consumables stores, raw materials, are valued at lower of cost or net replacement cost.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset. The first-in-first-out method is the basis of allocating costs to inventories, except for water balance which is determined at weighted average cost at the reporting date based on the water volume in the network on hand.

Redundant and slow-moving inventories are identified and written down to the estimated net realisable value, and are recognised as an expense in the period in which the write-down or loss occurs. Inventories identified for write-down/write-off, but for which a council resolution, to authorise the write-down/write-off, has not yet been obtained, is provided for as a provision for obsolete stock. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.9 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.10 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

1.11 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.11 Employee benefits (continued)

Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight-line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognised.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the entity is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

1.12 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.12 Provisions and contingencies (continued)

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of an activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 38.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgment. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, a municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.13 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

The amount of revenue arising on a transaction which is statutory (non-contractual) in nature is usually measured by reference to the relevant legislation, regulation or similar means. The fee structure, tariffs or calculation basis specified in legislation, regulation or similar means is used to determine the amount of revenue that should be recognised. This amount represents the fair value, on initial measurement, of the consideration received or receivable for revenue that arises from a statutory (non-contractual) arrangement (see the accounting policy on Statutory Receivables).

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight-line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by the proportion that costs incurred to date bear to the total estimated costs of the transaction.

Interest income

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised using the effective interest rate method.

1.14 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.14 Revenue from non-exchange transactions (continued)

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

1.15 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.16 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.17 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgment in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.18 Value Added Tax (VAT)

The municipality accounts for VAT on an invoice basis.

1.19 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.20 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.21 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.22 Irregular expenditure

Irregular expenditure as defined in section 1 of the MFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the MFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.22 Irregular expenditure (continued)

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure, in relation to a municipality, means-

- expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of this Act and which has not been condoned in terms of section 170;25
- expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the Municipal Systems Act, and which has not been condoned in terms of the Act;
- expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the Public Office-Bearers Act, 1998 (Act 30 No. 20 of 1998) or
- expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the supply chain management policy of the municipality or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in 35 terms of such policy or by-law, but excludes expenditure by a municipality which falls within the definition of "unauthorised expenditure".

1.23 Use of an estimate

The preparation of annual financial statements in conformity with Standards of GRAP requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the municipality's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in the relevant sections of the annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

1.24 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

1.25 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisation's (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2019/07/01 to 2020/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.26 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.26 Related parties (continued)

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the ventures).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

1.27 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.28 Retention

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.28 Retention (continued)

Retention is also commonly called retainage and is a term referring to the percentage of payment held back from a construction contract.

This is a financial term and the owners of a building, or those who are paying for its work to be done, take the lead in drawing up and enforcing the retention plan. General contractors sometimes have retention plans as well

Retention is a percentage of the amount certified as due to the contractor on an interim certificate, that is deducted from the amount due and retained by the client.

The purpose of retention is to ensure that the contractor properly completes the activities required of them under the contract. Retention can also be applied to nominated sub-contractors, and the main contractor may also apply retention to domestic sub-contractors.

- Often the percentage of retention ranges from 5% to 10% depending on:

- a) The risk of the project, if the risk of failure is high then the percentage will be at maximum 10%.
- b) The experience of the awarded contractor, if the contractor has minimum experience of the work to be executed then the percentage will be maximum 10%.

- Half of the amount retained is released on certification of practical completion ('substantial completion' for Institution of Civil Engineers (ICE) contracts) and the remainder is released upon certification of making good defects (or 'final statement' for design and build contracts such as Joint Contracts Tribunal (JCT)).

- Interim certificates should make clear the amount of retention and a statement should also be prepared showing retention for nominated sub-contractors. The contract may require that retention is kept in a separate bank account and that this is certified to contractors. In this case, the client will generally keep any interest paid on the account.

1.29 Commitments

Items are classified as commitments where the municipality commits itself into future transactions that will normally result in the outflow of resources.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- Approved and contracted commitments;
- Where the expenditure has been approved and the contract has been awarded at the reporting date; and
- Where disclosure is required by specific GRAP standard.

The municipality will disclose authorised operational and capital expenditure, that which has been approved and contracted for and that which has been approved and not yet contracted for. Outstanding operating lease commitments owing by the municipality and the periods in which payments fall due will also be disclosed.

Commitments are disclosed under note 37 of the annual financial statements.

1.30 Contracted Services

Contracted Services are distinguish between Outsourced Services, Contractors and Professional and Special Services.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.30 Contracted Services (continued)

Outsourced Services

The municipality should have the capacity and expertise to carry out certain services, but for some reasons not utilising their own staff. The reasons might include temporary incapacity or the outsourcing of services to save costs. In evaluating the classification of outsourced services it should be established whether the services being procured could have been provided by the municipality itself. It could also be that the municipality ordinarily has the expertise to provide the service but temporarily could not do so or to save costs.

Consultants and Professional Services

Consulting services refer to specialist services and skills provided that are required for the achievement of a specific objective, with the aim of providing expert and professional advice on a time and material basis. It is unnecessary to maintain these skills in-house, since they are required on a once-off or temporary basis. Therefore a consultant is a professional person appointed by the department to provide technical and specialist advice or to assist with the design and implementation of specific projects/programs. The legal status of this person can be an individual a partnership or a corporation. The fact that a consultant is defined as a professional person implies that the consultant is professionally qualified. The provision of advice or service is in line with a contractual arrangement. Remuneration is usually based on an hourly fee or a fixed fee for a product/deliverable. This category consists of groups for "Business and Advisory Services", "Infrastructure and Planning", "Laboratory" and "Legal Service".

Contractors

Contractors are required to provide services that are not the core business of the municipality. It is normally not cost effective to maintain these skills within the department. Contractors include costs associated with the use of contracted individuals or businesses on projects or tasks. This does not include amounts payable to contractors in respect of provision of services such as cleaning and security even if a staff element can be identified.

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• Guideline: Guideline on Accounting for Landfill Sites	01 April 2020	Impact is currently being assessed
• IGRAP 20: Accounting for Adjustments to Revenue	01 April 2020	Unable to reliably estimate the impact
• GRAP 20: Related parties	01 April 2019	Unable to reliably estimate the impact
• GRAP 32: Service Concession Arrangements: Grantor	01 April 2019	Unlikely there will be a material impact
• GRAP 109: Accounting by Principals and Agents	01 April 2019	Impact is currently being assessed
• IGRAP 18: Interpretation of the Standard of GRAP on Recognition and Derecognition of Land	01 April 2019	Impact is currently being assessed

2.2 Standards and interpretations effective, but not yet adopted

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2020 or later periods:

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
5. Operating lease liability		
Current liabilities	(11 410)	(16 064)
Minimum lease payment due:		
- within one year	551 028	1 539 022
- in second to fifth year inclusive	-	542 217
	551 028	2 081 239

Operating lease payments have been recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments have been recognised as an operating lease liability.

Operating lease payments represent rentals payable by the municipality for certain of its office properties. Leases are negotiated for an average term of two years and rentals vary in terms of a contract of the lease. Certain leases are subject to escalation at a rate of 5% over the lease period. No restrictions are imposed by lease arrangements.

6. Employee benefit obligations

Long Service Awards

The Council offers employees leave awards that may be exchanged for cash on certain anniversaries of commencing service and a retirement gift determined by reference to length of service.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out as at 30 June 2020 by Independent Actuarial One Pangaea Financial ('OPF'), Fellow of the Actuarial Society of South Africa.

The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

The amounts recognised in the statement of financial position are as follows:

Carrying value		
Opening balance	(2 373 151)	(1 944 212)
Service cost	(348 149)	(312 918)
Interest cost	(210 739)	(180 451)
Expected benefit payment	470 373	114 125
Actuarial (gain)/loss	(56 716)	(49 695)
	(2 518 382)	(2 373 151)
Non-current liabilities	(2 486 593)	(2 223 118)
Current liabilities	(31 789)	(150 033)
	(2 518 382)	(2 373 151)

Assumptions used at the reporting date:

Discount rates used

General Inflation Rate	10.18%	9.17%
Consumer Price Index (CPI)	4.97%	5.29%
Real Rate	5.97%	6.29%
Net discount rate	3.97%	2.71%
	63	63

Notes to the Annual Financial Statements

Figures in Rand 2020 2019

6. Employee benefit obligations (continued)

Demographic and Decrement Assumption

The following withdrawal assumptions were applicable over the prior and current valuation periods:

20	12,00 %	12,00 %
25	6,60 %	6,60 %
30	5,10 %	5,10 %
35	3,60 %	3,60 %
40	2,60 %	2,60 %
45	1,80 %	1,80 %
50	1,10 %	1,10 %

GRAP25 defines the determination of the investment return assumption to be used as the rate that can be determined by reference to market yields (at the balance sheet date) on government bonds. The currency and term of the government bonds should be consistent with the currency and estimated term of the obligation.

The methodology of setting the financial assumptions has been updated to be more duration specific. At the previous valuation report, 30 June 2019 the duration of liabilities was 9.37 years. At this duration the discount rate determined by using the Bond Exchange Zero Coupon Yield Curve as at 29 June 2020 is 10.18% per annum, and the yield on inflation linked bonds of a similar term was about 4.49% per annum. This implies an underlying expectation of inflation of 4.97% per annum $([1 + 10.18\% - 0.5\%] / [1 + 4.49\%] - 1)$.

We have assumed that salary inflation would exceed general inflation by 1.0% per annum, i.e. 5.79% per annum.

However, it is the relative levels of the discount rate and salary inflation to one another that are important, rather than the nominal values. We have thus assumed a net discount factor of 3.97% per annum $([1 + 10.18\%] / [1 + 5.97\%] - 1)$.

Valuation assumptions

The key assumptions used in the valuation, with the prior year's assumption shown for comparison, are summarised below:

	30 June 2020	30 June 2019
Discount rate	10,18%	9.17%
CPI	4,97%	5.29%
Salary increase rate	5,97%	6.29%
Net Discount Rate	3,97%	2.71%

Valuation Method

In accordance with the requirements of GRAP25, the Projected Unit Credit method has been applied. Accrued liabilities are defined as the actuarial present value of all benefits expected to be paid in future based on service accrued to the valuation date and awards projected to retirement date. In determining these liabilities, due allowance has been made for future award increases.

The valuation has been made with reference Actuarial Society of South Africa (ASSA) guidelines, in particular, the Advisory Practice Note 207, and is consistent with the requirements of GRAP25.

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
7. Inventories		
Opening	188 694	126 206
Inventory purchased	5 335 970	2 972 298
Inventory consumed	(2 747 636)	(2 909 810)
Covid-19 consumables	(2 587 565)	-
	189 463	188 694

Inventory consist of stationery, cleaning materials and consumable materials. Stock take was conducted at 30 June 2020 to determine the quantity and value of inventory at hand.

Inventories was assessed for redundancy and abnormal wastage. No obsolete inventory was discovered.

COVID-19 Inventory

Since the COVID-19 was declared a national disaster, there have been numerous measures put in place to curb its rapid spread and the provision of assistance to those less fortunate. In response to the COVID-19 pandemic municipalities have incurred increased expenditures, namely:-

- Purchase of personal protective equipment such as masks
- Hygiene items such as sanitizers
- Protective clothing
- Fumigation chemicals
- Surgical gloves and wipers

The current portion is made up of provision for bonuses 2020: (R 570 051) 2019: (R 524 574) and Skhemelele landfill site 2020: (R 9 630 450) 2019: (R 8 792 491).

Performance bonuses

A section 57 bonus provision is also provided for. The bonus is performance based, and is dependant on a performance assessment. The timing of the bonus is uncertain.

Environmental rehabilitation provision

The municipality operates two Landfill sites, which are Thandizwe and Mbazwana.

Skhemelele is in the process of being closed down.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand

	2020	2019
--	------	------

12. Provisions (continued)

The Municipality estimated rehabilitation cost are R22 444 635 (2018: R19 603 058) to restore the landfill site at the end of its useful life, estimated to be 17 years from the date of revaluation. The amount of rehabilitation is dependent on future costs technology, inflation and site consumption. The discount rate of the provision was 8.085% (2019: 8.5%).

The financial implication of rehabilitating the landfill site was determined by the independent practitioner engineer Zin Metalworx.

The date on which Zin Metalworx valued landfill sites was 30 June 2020. The landfill sites are revalued every four years.

During the financial period there was a change in rehabilitation cost for Mbazwana and Thandizwe Landfill Site, that resulted in an increase in the underlying assets and provision of R462 177 and R582 911 respectively.

Skhemelele Landfill Site is in the process of being rehabilitated. Detailed design for the closure of the site as laid out in the Environmental Management Programme (EMPr). The closure and rehabilitation activities will comply with the Minimum Requirements for Waste Disposal by Landfill (Second Edition, 1998). In compliance with the requirements for a communal landfill, during closure of the existing landfill the following activities will be conducted:

Closure

Depending on the volume of waste on site, the waste must be consolidated and taken to a licensed landfill facility or the waste must be consolidated and capped on site;

- Reshaping and recontouring of borrow pits so that they are no longer a safety hazard must take place;
- Placement of a "no dumping" notice at the site; and,
- Closing and locking the gate to the site so that no illegal dumping can take place.

Public service infrastructure	1 570 000	-
	2 628 200 000	2 069 415 000

Property valuations is performed every 5 years. The last general valuation roll came into effect on 1 July 2019. Annual valuations are processed on an annual basis to take into account changes in individual property value due to alterations and subdivisions.

A tariff of R0,0025 (2019: R0,0025) is applied to property valuations of ITB to determine assessment rates. The billing remained constant from previous year.

Business Properties are billed at R0.0087 (2019: R0,01) per Rand for a period. Hospitality will be included in this category.

Protected Area and Public Benefit Organisations are valuated but exempt from billing.

The new general valuation was implemented on 01 July 2019.

	2020	2019
--	------	------

29. Impairment of assets

Impairments

Impairment Fixed Assets	1 427 656	4 158 190
Certain Property, Plant and Equipment were considered for Impairment in the current period due to lack of maintenance in some areas of Sportfield. Impairment reversal was also considered on Manguzi Sportfield. The recoverable amount of the asset was based on its fair value less costs to sell.		

The main classes of assets affected by impairment losses are:

Sportfields

There's lack of maintenance on the local sportfields. It has been visible through verification that soccer fields are not maintained and possibly vandalism on the facilities. Impairment was recommended until facilities are maintained

Municipality has assessed infrastructure assets for impairment. The impairment assessment takes into account both external and internal source of information that indicated that these assets to be impaired. With the advent of the COVID-19 we considered:

- evidence of physical damage
- significant long term changes that have occurred in the way or extent to which the assets is used

30. Finance costs

Interest overdue accounts	336 620	3 384
Other interest	1 968 814	1 282 357
	2 305 434	1 285 741

The COVID-19 pandemic has had a significant impact on the day to day lives of individuals and organizations at large around the world. In South Africa, the threat of COVID-19 necessitated Government to declare it a National Disaster and since then Government has implemented measures to mitigate the threat of COVID-19 on the lives of the citizens as well as on the economy.

During this lockdown period:

- construction and maintenance activities have been halted;
- services have been limited where public facilities have closed for prolonged or short periods of time;
- there has been a demand for medical services, water, sanitation and temporary settlements from government;
- revenue and debt collections have decreased because people are unable to work thereby increasing the risk of non-payment of services;

Since the COVID-19 was declared a national disaster, there have been numerous measures put in place to curb its rapid spread and the provision of assistance to those less fortunate. In response to the COVID-19 pandemic, municipalities have incurred increased expenditures, namely:-

- Purchase of personal protective equipment such as masks
- Hygiene items such as sanitizers

Disaster supplies

Items of disaster supplies were acquired during the pandemic to assist curb the spread of the virus. These items include: Reflector jackets, Disaster relief tents, LED lamps, First Aid kits, Blankets, Chemicals and Overalls.

Bereavement assistance

With the compliance requirements to Disaster Management Act communities were restricted with movements and had to comply with the said regulations. Municipality had to intervene and assist in a number of areas to bereave affected communities.

Assistance ranged from arranging of hearse, buying coffins, provision of food and transportation of deceased.

38. Contingencies

38.1. Bhekusisa Derrick Zungu and 26 Others

This matter is still pending at the arbitration and will be heard again on 11 November 2020(subject to written confirmation by the bargaining council). There has been several sittings but we believe that the matter will be finalised in November 2020.

Legal costs are estimated at R 180 000

The applicants were employed on a fixed term contract basis. They dispute the limited duration contract and claim to have been employed on an indefinite basis. Their claim is spurious and bound to fail. Their claim is not ascertainable even if they were to succeed.

38.2 Department of Labour

This is the potential liability for assessment to be done by Department of Labour on returns due in terms of Compensation for Occupational Injuries and Disease Act (COIDA)The Department of Labour is claiming R 99 206 560.83 from the Municipality in respect of outstanding returns in terms of Compensation of Occupational Injuries and Diseases Act (COIDA). The Municipality has applied for the reassessment of the amount but the Commissioner for Compensation of Occupational Injuries and Diseases declined to accept the bid for reassessment.

Negotiations are ongoing with Commissioner and the and Labour Court for re-assessment. Legal Cost will amount to R800 000.

40. Change in estimate

Property, plant and equipment

The useful life of certain plant was estimated in 2018 to be 20 years. In the current period management have revised their estimate to 30 years. The effect of this revision has decreased the depreciation charges for the current and future periods.

The effect of estimate was determined to be R28 873, had the change in estimated useful life not done the assets in question could have depreciated by R34 799 in the current period. Now that we have changed the estimated useful life we have depreciated these assets by R5 927.

The estimated cost of Mbazwana and Thandizwe Landfill Sites was revised in the financial year under review. The effect of this revision has resulted in an increase in the underlying assets with the corresponding increase in Landfill Site Provision. Increased the depreciation charges for the current period was R104 509 and the asset increased by R1 045 088

The discount rate was estimated to be 8.085%(2020) a change from 8.085%(2019)

42. Risk management

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities balances due within twelve months equal their carrying balances as the impact of discounting is not significant.

Current liabilities

Trade and other payables from exchange transactions	13 447 265	12 975 331
Unspent conditional grants	17 639 112	4 422 566
	31 086 377	17 397 897

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

42. Risk management (continued)

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Consumer debtors comprise of a large number of ratepayers dispersed across different sectors and geographical areas. Management evaluated credit risk relating to customers on an ongoing basis. Credit exposure is managed by application of the municipality's policies regarding credit control and debt collection. The municipality has made a provision for doubtful debts in accordance to its policies. The carrying amount of financial assets is the maximum exposure to credit risk in relation to these assets.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	30 June 2020	30 June 2019
Receivables from exchange transactions	719 403	600 047
Receivables from non-exchange transactions	10 015 480	15 127 542
Cash and cash equivalents	64 348 251	49 652 113

Refer to note 8 for ageing of receivables as well as note 10 for further disclosure of cash and cash equivalents.

Market risk

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

43. Going concern

We draw attention to the fact that at 30 June 2020, the municipality had an accumulated surplus of R 1 180 427 and that the municipality's total assets exceed its liabilities by R 320 071 299.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

Since 31 December 2019, the spread of COVID-19 has severely impacted many local economies around the globe. In many countries, businesses are being forced to cease or limit operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide, resulting in an economic slowdown.

Governments and central banks have responded with monetary and fiscal interventions to stabilise economic conditions. The municipality has determined that these events are non-adjusting subsequent events. Accordingly, the financial position and results of operations as of and for the year ended 30 June 2020 have not been adjusted to reflect their impact. The duration and impact of the COVID-19 pandemic, as well as the effectiveness of government and central bank responses, remains unclear at this time. It is not possible to reliably estimate the duration and severity of these consequences, as well as their impact on the financial position and results of the municipality for future periods.

During April 2020, large number municipality major trade customers closed businesses following the outbreak of COVID-19 and related global responses have caused material disruptions to businesses leading to an economic slowdown. Of the R47 713 658 receivables from these customers, the municipality expects to recover less than R10 015 480. The allowances for expected credit losses for these receivables was R39 923 663 as at 30 June 2020.

There are no significant changes in the extent or manner in which the assets are used or is expected to be used. Plant and Machinery assets idled for a period of two months and that was considered not significant period for productive capacity.

During the year the following Councillors' had arrear accounts outstanding for more than 90 days.

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand 2020 2019

48. Actual operating expenditure versus budgeted operating expenditure

48.1 Licences and permits actual income is 57% below the budget because the traffic station was closed during the month of October and November due to municipal workers strike, again traffic station operations were also closed from the month of February till August due to community strikes that happened in February and National Lockdown due to COVID-19 virus outbreak.

48.2 Commissions receive is above the budget because the budget was understated

48.3 Interest on investments actual income is 32% below the budget because of COVID-19 virus outbreak that also affected the country's economy and interest rates

48.4 Interest on outstanding debtors is 26 % below the budget because of COVID-19 virus outbreak and the council decided to give its rates payers (business category)

48.5 Other revenue is 39% below the budget because of COVID-19 virus outbreak and the closure of the country on its operations that affected all economic sectors

48.6 Traffic fines actual revenue is 71% below the budget because the traffic station was closed during the month of October and November due to municipal workers strike, again traffic station operations were also closed from the month of February till August due to community strikes that happened in February and National Lockdown due to COVID-19 virus outbreak.

48.7 Finance charges actual expenditure is 10% above the budget because SARS penalties for late payments of PAYE and SDL contributions and ESKOM late payments, it also includes landfill sites provisions expense

48.8 Operating lease expense is 13% above the budget because of new contracts that the municipality entered into, but the budget was based on the fact that operating lease contracts were coming to an end in this financial year.

48.9 Transfers and subsidies expenditure is 14% above the budget because there was an increase in provision of social relief programmes due to the corona virus outbreak

48.10 Capital expenditure is 38% below the budget because the municipal offices were not operational during the month of October and November due to municipal

49. Actual capital expenditure versus budgeted capital expenditure

48.1 Capital expenditure is 31% below the budget because the municipal offices were not operational during the month of October and November due to municipal

50. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

The deviations for the current year, with the prior years' deviation shown for comparison, are summarised below:

Recommended supplier	298 322	539 033
Emergencies	1 153 456	172 607
	1 451 778	711 640

51. Budget differences

Material differences between budget and actual amounts

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

51. Budget differences (continued)

1. Service charges

Service charges was adjusted down because budget was overstated because the basis of its calculation was base on the wrong number of customers to be serviced.

2. Licences and permits

Licences and permits was adjusted up because of the high number of people who come from far places to get services of umhlabuyalingana

3. Commission received

Commission receive was adjusted up because of the amount we already have received as commission from the department of transport.

4. Rental income

Rental income was adjusted down because it was overstated in the budget because other market stalls were not being rented out because they were not in good condition.

5. Interest on investment

Interest on investment was adjusted up because we anticipated that there will be more interest received since there were more funds in the bank accounts

6. Interest on outstanding debtors

Interest on outstanding debtors was adjusted up because of commercial property rates debtors not paying for their accounts in time was high

7. Other revenue

Other revenue was adjusted up because of the refunds received from department of Arts and Culture

8. Property rates

Property rates was adjusted down because budget was overstated and it did not include rebates

9. Government grants

Government grants were adjusted up because it was supposed to include rollover funds and new allocation of COVID-19 grant

10. Traffic fines

Traffic fines were adjusted up because it was planned that there will be more road blocks to be conducted which will increase revenue base.

11. Employee related costs

Employee related costs were adjusted down because of the job evaluation process that was going to increase salary costs when it is implemented

12. Debt impairment

Debt impairment was adjusted down because it was overstated in the budget although there was an increase in interest on outstanding debtors

13. Finance charges

Umhlabuyalingana Local Municipality

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

51. Budget differences (continued)

Finance charges was adjusted up because of the increase in land fill site provision

14. Contracted services

Contracted services was adjusted up because it was understated in the budget

15. Transfers and subsidies

Transfers and subsidies was adjusted up because of increase in social relief programs due to COVID-19

16. Operating lease

Operating lease was adjusted up because of new operating lease contracts entered in to by the municipality after the contract we had were coming to an end.

17. Inventory consumed

Inventory consumed was adjusted up because more inventory items were to be procured after the declaration of COVID-19 disaster

18. Operational costs

Operational costs was adjusted up because it was understated in the budget

Income and expenditure variance

Annual Financial Statements for the year ended 30 June 2020

Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

51. Budget differences (continued)

1. Licences and permits

Licences and permits decreased by 56% from the prior year because the traffic station had to be closed in October and November due to municipal workers strike

2. Commissions received

Commissions received increased by 12% from the prior year actual because

3. Other income

Other income decreased by 35% from the prior year actual because there were no insurance refunds this year

4. Interest on outstanding debtors

Interest on outstanding debtors decreased by 128% because the council took a resolution to give hospitality debtors a discount relief of 35% and to write off

5. Public contributions and donations

Public contributions and donations decreased by 100% because there were no donation received in this financial year.

6. Fines, penalties and forfeits

Fines, penalties and forfeits decreased by 56% because of the municipal workers strike that happened in October and November, and another community strike

7. Reversal of impairments

Reversal of impairments decrease by 191% because only assets was affected by the impairment most assets were maintained in the current year which increased its

8. Finance costs

Finance costs increased by 44% from the prior year because of interest paid to SARS for late payment of PAYE contributions and increase in provision for land fill sites

9. Lease rentals on operating lease

Lease rental on operating lease increased by 27% because of new lease agreements signed by the municipality in this financial year

10. Inventory consumed

Inventory consumed increased by 21% from last year actual because the municipality had to purchase more cleaning materials in order to ensure safety of employees to avoid being infected by COVID-19 virus

11. Asset write off

Asset write off increased by 73% because they had to demolish netball court in order to construct Manguzi Multipurpose Hall

12. Transfers and subsidies

Transfers and subsidies increased by 61% because more social relief programs were implemented than the prior year to respond to the COVID-19 virus outbreak

13. Inventory COVID-19

Inventory COVID-19 increased by 100% when compared to prior year because COVID -19 virus outbreak started this

financial year

52. Transitional provisions

Transitional provision for Statutory Receivables

General information

The municipality took advantage of the transitional provision as per Directive 8 of the GRAP Reporting Framework.

The extent to which the entity has taken advantage of the transitional- provision and period is Three years, for financial years commencing on or after 1 April 2019 to 30 June 2022.

Details of items which have not been accounted for consistent with the requirements of the relating Standard of GRAP, are as follow Receivables related to Property Taxes, Fines for breaches of Legislation, Levies, and Appropriations, Grants and transfers outlined in the relevant division of revenue act.

Progress made towards full compliance with the relating Standard of GRAP is, The municipality intends to comply in full with the relating Standard of GRAP, as follow Firstly to distinguish Statutory Receivables from Receivables, Assess disclosures required about how these transactions arise, how the transaction amount is determined, whether interest or levies are charged (and if yes, how), how impairment is assessed and if a discount rate is applied.

53. Accounting by principals and agents

The entity is a party to a principal-agent arrangement(s).

Details of the arrangement(s) is as follows:

Municipality has entered into agreement to facilitate the expansion and rehabilitation of the electricity grid, the objective of this agreement is to enhance the Electrification Programme on long term national energy requirements that shall be met through clearly established national electrification principles, to ensure that resource allocation contributes to sustainable development and enhance empowerment to communities and to provide electricity to unelectrified household.

Obligations of the municipality

The municipality shall:

- ensure compliance with all statutory requirements stipulated in the DoRA
- the municipality shall not spend any allocated funds in arrears where they are not licensed to distribute electricity
- manage the programme as well as design and implementation of those projects that form the objective of this agreement
- take all reasonable steps necessary to ensure the programme is implemented effectively and efficiently
