# View Annual Reports online

Both the Integrated Annual Report (Abridged Version) - this report - and the detailed Integrated Annual Report for the period 1 July 2012 to 30 June 2013 are available on the City's website as downloadable documents in PDF format. The two books should be read in conjunction to obtain a comprehensive view of the City's performance during the year.

Available on:

# www.joburg.org.za

The detailed Integrated Annual Report will also be available in all Regional Offices of the City of Johannesburg for oversight and public consultation.

# Performance commentary

Commentary on the performance for each of the City of Johannesburg's four clusters is indicated throughout the report by means of the following icons:

Sustainable Services Cluster

Economic Growth Cluster

Human and Social Development Cluster

**Good Governance Cluster** 

# Referencing the Integrated Annual Report (Book 2)

This Abridged Integrated Annual Report (Abridged Version: Book 1) stands alone and also links to the detailed Integrated Annual Report (Book 2). In instances where summarised information points to more detailed sections in Book 2, the following referencing icon has been used to guide the reader to more comprehensive commentary.

# About the Integrated Report (Abridged Version)

# Statutory Annual Report Process

The Municipal Finance Management Act (MFMA) requires that the City of Johannesburg and its municipal entities prepare an annual report for each financial year. Section 46(1) of the Municipal Systems Act (MSA) requires municipalities to prepare a performance report for each financial year. The report sets out the performance of the municipality and its external service providers and provides a comparison of performance relative to performance in the previous year, together with measures to improve performance. The annual performance report must form part of the annual financial report. The City of Johannesburg's 2012/13 Integrated Annual Report reflects performance of the City and its entities

for the period 1 July 2012 to 30 June 2013. Performance is reported against targets provided for in the 'Joburg 2040', 2012/16 Integrated Development Plan (IDP) and the 2012/13 Service Delivery Budget Implementation Plan (SDBIP).

# Structure of the report

This Integrated Annual Report (Abridged Version) forms part of a two-part annual integrated reporting framework. It provides an abridged integrated view of the City's performance for the 2012/13 reporting year and forms the primary report to all stakeholders. A second comprehensive Integrated Annual Report provides a detailed representation of the City's performance for the year. It includes the consolidated Financial Statements, Annual Performance Report and the Auditor General's Audit report.

Figure 1: The City of Johannesburg's reporting for 2012/13 consists of two books

#### Book 1

#### 2012/13 Integrated Annual Report (Abridged version)

#### **Content**

The 2012/13 Integrated Annual Report (Abridged version) is the City's primary report to all stakeholders and is an abridged representation of the Consolidated Annual Report.

#### Book 2

#### 2012/13 Integrated Annual Report

The 2012/13 Integrated Annual Report contains the Conslidated Financial Statement, Annual Performance Report and the Auditor General's Audit report.

- 2012/16 Integrated Development Plan (IDP)

# An integrated approach to reporting

This Report is the first in which we purposely attempt to comply with the principles—based approach of integrated reporting as proposed by the International Integrated Reporting Council (IIRC) and the South African Integrated Reporting Committee (IRC SA). The integrated approach to reporting aligns with the City's integrated approach to strategy formulation and operational management. Accordingly, we have adopted this approach to enhance our commitment to the recommendations of the King III Code on Corporate Governance, which sets out international leading practices for governance of private and public organisations, including a recommendation that these organisations undertake integrated reporting.

The report further complies with legislative prescripts and conforms to National Treasury guidelines on annual reporting,

with respect to emphasising the integration of strategic plans and operational budgets to improve operational effectiveness. The main aim of interlinking plans and budgets is to ensure that key objectives and priorities are budgeted for and achieved. The National Treasury guidelines note the inherent tension between strategic planning and budgeting, which often makes it difficult to achieve the desired level of integration. In this report we provide an abridged view of the City's forward-looking strategic planning in relation to its service performance and financial performance for the 2012/13 year, thereby providing a strategic long-term context for short to medium-term operational and budgetary information. Chapter 3 of the Integrated Annual Report (Book 2) provides a comprehensive view of operational performance in the context of our strategic plans and operational budgets.

Table 1 below outlines the integrated reporting principles followed, as well as instances in both the Integrated Annual Report (Abridged Version: Book 1) and the Integrated Annual Report (Book 2) where these principles have been applied.

Table 1: Principles-Based Integrated Reporting Index (Covering Book 1 and Book 2)

# **Materiality**

We have applied the principle of "materiality" in determining pertinent content and disclosure. A matter is material if it is of such relevance and importance that it could substantially influence an assessment of the report and our ability to create value in the short, medium and long term. The following internal and external criteria were used to identify material issues:

Table 2: Defining 'material' issues for integrated reporting

| Internal criteria  | External criteria   |
|--|---|
| City of Johannesburg Growth and Development Strategy (Joburg | Critical opportunities and challenges the City is geared to respond |
| 2040 criteria and objectives.                                | to.   |

| Internal criteria   | External criteria   |
|---|---|
| National and Provincial Agenda.   | Changes in the socio-economic developmental agenda and priorities of National and Provincial Government.  |
| 12 National Outcomes of Government.   | Changes in the national and provincial political environment and a changing regulatory landscape.   |
| Enterprise Risk Management Process; including key risks impacting the City's strategic and operational objectives and the associated mitigating activities.   | Factors which may impact the City's reputation, thereby influencing its ability to promote sustainable growth.  |
| Stakeholder expectations and feedback – e.g. from residents, rate-payers, business community, Non-Governmental Organisations (NGOs), National and Provincial Government, neighbouring municipalities, designated targeted groups, academics, investors and the media. | The provisions of various frameworks including: Municipal Finance Management Act (MFMA); Public Finance Management Act (PFMA); Section 46(1) of the Municipal Systems Act (MSA); King III Code on Corporate Governance (King III); Discussion papers issued by the South African Integrated Reporting Committee and |
| City of Johannesburg's mission, vision and values.  City of Johannesburg's governance framework and policy environment.   | the International Integrated Reporting Council (IIRC); International Financial Reporting Standards (IFRS); GRI Framework; United Nations Global Compact; Millennium Development Goals; Carbon Disclosure Project; B-BBEE Code.  |

# Our perspective on sustainability

We view 'sustainability' - in its most inclusive sense – as balancing the societal needs of the present generation with the regenerative conditions broader social, economic and ecological environment which sustains them. We strive toward minimal reliance on and increased preservation of our natural resources. This requires our vigilance in reducing pollution, improving waste management, and ultimately ensuring efficient land use through appropriate urban spatial development, all supported by a proactive and genuinely participative stakeholder engagement process. We envisage a city that contributes minimally to climate change and where our spatial form celebrates our natural diversity and reflects our informed approach to resource utilisation and renewal.

From a social perspective, sustainability requires that communities have equitable access to key services and can participate in systems of human interaction that value cultural diversity; can experience a sense of community ownership; and are able to fulfil their own needs where possible.

From an economic perspective, sustainability requires that assets are used efficiently so that they may continue to function

profitably over time and that current economic activity does not disproportionately burden future generations.

From an ecological perspective, sustainability refers to a sustained condition of balance, resilience, and interconnectedness that allows citizens to satisfy their needs without exceeding the capacity of the supporting ecosystems to regenerate the resources necessary to meet their present and future needs and without diminishing biological diversity.

It is widely accepted that the trio of environmental, economic and social sustainability pillars are a sufficient model to address sustainability. However, because we are a public sector institution with clear accountability and public engagement imperatives, a sustainable governance framework provides the overall framework to support the three sustainability pillars.

From a governance perspective we have an obligation to report, clarify and to be accountable for the impact of our decisions on behalf of the communities we represent. Further, we have a responsibility to implement decisions and follow processes that optimise the use of the available human, financial and material, resources to ensure the best possible results for the long-term economic, social and environmental sustainability of our City. Ultimately, sustainability requires that citizens are free to contribute to political decision-making and enables communities at a local level to express their needs.

## **Engaging stakeholders**

This Integrated Annual Report (Abridged Version) strengthens our accountability and transparency processes and complies with legislative prescripts for regular, impartial feedback to stakeholders, including Johannesburg residents, National Treasury, Provincial Government and the Auditor General, among others.

Our stakeholder engagement processes play a critical role in

providing insight into the quality of the City's relationships with key stakeholders. We are committed to responding to stakeholders' legitimate needs, interests and expectations through effective and efficient service delivery. In so doing, the City engages its residents collaboratively so that it works with and for residents.

We are further committed to strengthening meaningful stakeholder engagement and participation going forward to respond to developmental challenges. For this reason, the City has embraced the programme: "Engaged Active Citizenry", which is informed by one of the Integrated Development Plan's ten priorities.

In the year ahead, the 2013/14 business planning and outreach process will provide us with an opportunity to communicate draft plans and budget to a larger audience and enable communities at a local level to express their needs.

Table 3: Stakeholder engagement process during the review period

| Vehicles for engaging stakeholders   | Stakeholders  | Stakeholder priorities   |
|--|---|--|
| Calls for public comment   | <ul><li>Residents</li><li>Rate-payers</li></ul>   | A municipality that is functional and responsive to the needs of its citizens. |
| Newspaper advertisements   | <ul><li>Business community</li><li>Non-Governmental Organisations</li></ul>   | Provision of quality services and addressing the basics.                       |
| Councillor engagement sessions   | (NGOs)  | Continue the agenda of transformation.   |
| IDP Outreach process   | <ul> <li>National and Provincial Government</li> <li>Neighbouring municipalities</li> <li>Designated targeted groups</li> </ul> | Communicate and engage with citizens on the development agenda.                |
| Regional stakeholder meetings  | Academics   | Address service delivery backlogs.   |
| Ward committee activities  | Investors and the media   |  |
| GDS Investor Roadshows and Roundtables                                     |   |  |
| Service delivery disputes, protests and petitions                          |   |  |
| Deploying regional MMCs for focused engagements with regional stakeholders |   |  |
| Project-Based engagement and petetions                                     |   |  |

#### **Assurance**

Assurance on the Integrated Annual Report was done through engagements with the Group Performance Audit Committee (GPAC) and Group Audit Committee (GAC). Council will undertake oversight of the Annual Report between February and March 2014, through its Municipal Public Accounts Committee (MPAC).

We will continue to refine our approach to integrated reporting in future annual reports to further align with international reporting standards and to promote consistency, accessibility and accountability with respect to our multi-faceted role in creating and sustaining value for all citizens of Johannesburg.

## Feedback

We aim to establish and maintain constructive and informed relationships with our stakeholders. Accordingly we wish to encourage all stakeholders reading our Integrated Annual Report (Abridged Version) to provide feedback on their views. This will enable us to gauge the adequacy and quality of our integrated reporting. To provide feedback, kindly complete the printed feedback form included in this report or download a form at <a href="www.joburg.org.za">www.joburg.org.za</a>
Feedback forms can be submitted at regional offices or emailed to <a href="mailto:salatialc@joburg.org.za">salatialc@joburg.org.za</a>

#### Performance achievements for 2012/13

Below is a consolidated view of our performance achievements for the year under review. Please see more comprehensive performance tables for each of the four clusters further on in this report.

Sustainable Services Cluster

35 953
Rea Vaya passengers
per day

16 489 457 Metrobus Passengers annually 27 091
Solar water heaters installed

5 343
New public lights were installed

3 307
First time electricity household installation

Human and Social Development Cluster

1 697 244
On "Ijozi Ihlomile"
health programme

2400 Metro police officers on duty daily

Economic Growth Cluster

155
Properties transferred through Land Regularisation

3 967
SMMEs supported

900 km
Of fibre optic cable layed

Good Governance Cluster

92% of revenue billed

100% Implementation of CBP in Region E

Net surplus of R3.4billion

# **Executive Mayor's Foreword**

#### "Johannesburg has a clear roadmap for delivery— in the immediate, medium and long term"

I am pleased to present the City of Johannesburg's 2012/13 Integrated Annual Report, covering the period 1 July 2012 to 30 June 2013. The report provides a measure of our progress in line with the City's Growth and Development Strategy (GDS), 'Joburg 2040' and tracks operational performance in the context of the City's approved 2012/16 IDP priorities.

To become increasingly accountable in our reporting; and to enhance transparency in respect of our budgetary, monitoring and oversight processes, we present an Integrated Annual Report which emphasises the connection between our strategic planning processes and our operational achievements. Accordingly, we share our successes and challenges during the year in the context of the strategic imperatives of our 'Joburg 2040' GDS, thereby deepening our communication with stakeholders and setting the bar high for future performance reporting in all areas of the City's service, infrastructure and administrative delivery.

I would like to take this opportunity to acknowledge efforts of the City's leadership and administration in positively advancing the City's strategic and transformative agenda during the year; and to thank them for their perseverance and readiness in boldly implementing the objectives of the GDS in the context of a changing and increasingly unpredictable

development paradigm.

In 2012/13 we attained some notable achievements firstly, by improving our ability to monitor and measure the implementation of strategic priorities — a critical focus area for the last two years. This entailed further aligning key performance indicators with the strategic priorities that drive our implementation processes. Second, in an effort to fulfil our agenda of socio-economic transformation — and dismantling of a City still labouring under the responsibilities of its history of separate development – we implemented a series of flagship programmes towards 'Joburg 2040'.

#### Committing to a promising future

The 2012/13 financial year marked a critical period in the implementation of our long-term strategy in that we had to show, tangibly, our firm commitment to the development of a resilient, sustainable and liveable Johannesburg for all our citizens. 2012/13 represents our second year in the implementation of our current five-year Integrated Development Plan (IDP). We have been decisive in identifying what is required as part of the long journey towards 2040 and resolute in demonstrating our commitment to our vision.

R100 billion infrastructure investment over ten-years

#### Committing to spatial equality

The new democratic South Africa secured political participation for all, facilitated greater access to economic participation and ensured the freedom of movement of people. However, not everyone has benefited equally from this transformation. We see this in the existing urban spatial form in which the majority of Johannesburg's residents live and play far from where they work. We have demonstrated our commitment to our vision by committing

to invest R100 billion in infrastructure development over ten years with the aim of eradicating spatial inequality. This will be achieved by 're-stitching' the City of Johannesburg and reclaiming parts of the City to ensure that transport nodes become "Corridors of Freedom"; and that Johannesburg's urban form is transformed into one where residents live and play close to where they work.

7% increase in total assets to **R60.2** billion

R3.4 billion surplus

#### Committing to a financially sustainable and resilient City

It gives me pleasure to report that the City is firmly on course to becoming financially sustainable and resilient. In 2012/13 we collected 92% of all billed revenue and concluded the year in a strong financial position, with a net surplus of R3.4 billion. We continued the upward trend of increasing the City's total assets to R60 191 121 billion, up from R56 374 108 billion in 2011/12. We concluded the year with a progressive increase in cash and cash equivalents of R5.4 billion, up from R2.2 billion. Our capital investment in the City continued to rise to R4.5 billion up from R3.7 billion in the preceding financial year. Our positive financial performance was further supported by the significant progress we have made towards eliminating billing issues. Our commitment and efforts towards addressing billing

challenges are yielding positive results. The 2012/13 customer satisfaction survey recorded significant improvement in efficiency in dealing with incorrect accounts, the highest improvement recorded over a six year period. The City is in an improved state of responsiveness to billing issues, as a result of open days and the Revenue Step Change Programme, both of which have led to a marked improvement in the resolution of queries, while the R3.4 billion surplus enables the City to further increase the capital investment to R7.66 billion in the 2013/14 year.

35 953
Rea Vaya passengers per day

27 091 Solar water heaters installed

#### Committing to a sustainable city

Rea Vaya, our world-class, affordable and reliable mode of public transport is indeed a proud achievement. In 2012/13 the Bus Rapid Transit system conveyed an average of 35 953 passengers daily while Metrobus ferried 16 489 457 passengers during the year. We are on track to increasing public transport patronage, and in the process, are decongesting the streets and reducing carbon emissions through advanced transport technology. In continuing to enhance our transport system during the year, we took every opportunity to create jobs and to ensure that busses used in the BRT system are manufactured locally.

We made positive progress toward environmental sustainability during the year by moving towards low carbon infrastructure and by introducing programmes to further conserve energy. We installed 27 091 solar water heaters in various communities and are working towards including sectors with a large carbon footprint in our programme to reduce carbon emissions through low carbon infrastructure. Our waste management programmes resulted in the diversion of more than 90 000 tonnes of waste from our stretched landfill sites. Our integrated waste management programme also received a boost with the establishment of additional waste sorting facilities and buy-back centres and other programmes such as the "waste for food" programme.

The 2011 Census revealed that 23% of Johannesburg's population is impoverished, of whom 42% go without food for two to three days per month. The City has responded to this with a programme to address poverty and income inequality through food security and the promotion of urban agriculture. We recognise the immediate need for measures to alleviate poverty among our city's poor and vulnerable; and for poverty eradication in the long term to ensure self-reliant communities. Accordingly, we established six agri-resource centres in Regions A, C and G. During the year, these centres offered agricultural training, as well as provided seeds and implements to small-scale urban farmers. The City further provided 'hub-and-spoke' support for small-scale producers in Orange Farm and Poortijie. Food gardens have been established in Regions A and G.

Creating a safe and secure city is a priority for Johannesburg and we have made significant progress through our "Joburg 10+" community policing initiatives as well as the 'smart practices' introduced to improve public safety and disaster readiness. These innovations – combined with our 'complete streets' programme to enhance road safety and our efforts to create safer public spaces – have contributed to making Johannesburg a safer and more secure city overall, with reductions in both violent and petty crimes.

36 588
EPWP opportunities

#### Committing to inclusive economic growth

We continue to excel in the implementation of the Expanded Public Works Programme (EPWP). Johannesburg was awarded the 2012 Kamoso Award for Excellence for the implementation of its EPWP programme. In 2012/13 the City created 36 588 EPWP job

opportunities against a target of 38 176. We continue to enhance our contribution to the growth of small to medium scale enterprises (SMMEs) to develop the economy of Johannesburg. In the financial year we supported close to 400 SMMEs and sourced funding for the Soweto Energy SMME incubator to the value of R27 million. To further promote inclusive economic growth, commercial connectivity and bridging the digital divide, the City completed the laying of over 900 kilometres of fibre optic cable as part of our Broadband Network Programme.

#### **Committing to building sustainable partnerships**

We recognise the need to foster strong partnerships across all spheres of Government, and to nurture our partnerships with our stakeholders and communities so as to remain relevant and accessible to our stakeholders. The work we are doing to transform Johannesburg's spatial form also requires a commitment to the citizens of Johannesburg, that they are not inert observers or passive recipients of Government services, but rather active partners in shaping our City's future. Accordingly, we rolled out 'community-based planning' (CBP) in Region E on a pilot basis and with the successful implementation in Region E in 2012/13 ratifying the merits of this model, we will be implementing the programme in other Regions in future.

The newly elected ward committees and refined ward committee structures assisted with consultations around the preparation of ward plans and also enhanced accountability in the implementation of key City programmes, in the process demonstrating our collaborative approach to stakeholder engagement. Our 'Joburg 10+' flagship programme, for instance, epitomises our commitment to sustainable partnerships with communities to create a safe and secure Johannesburg. As we progress toward our envisioned future, we remain mindful of our ability to mobilise the collective energy and efforts of the people of Johannesburg who have brought us this far and continue to enable us to meet the transformation agenda.

#### Committing to good governance

Enhancements in our governance processes have resulted in improved financial performance and an improved audit opinion, advancing us to an Unqualified Audit Opinion in 2012/13. We continue to be committed to fiscal responsibility and the highest standards of financial management.

We are committed to improving our performance in the year ahead. The City has introduced stretch targets based on an improvement in current performance. We are confident that we will continue to meet the expectations of our stakeholders as we drive implementation of our long, medium and short-term strategies.

We look back on 2012/13 as a year during which we continued to cement our position as the leading metro in South Africa and in Africa. The hosting of the opening and closing ceremonies of the Africa Cup of Nations football tournament validated the important position of Johannesburg as a leading African city, which embraces its African identity and represents a melting pot of the spontaneity and vibrancy of the diverse cities across the continent.

2012/2013 Unqualified Audit Opinion

#### Looking ahead

Notwithstanding our notable achievements, we recognise the magnitude of our task in addressing the enduring concerns of inequality as well as transforming the economic landscape of our City. We are responding to these challenges through proactive and creative interventions

to continually enhance the quality of our service delivery. This includes our commitment to investing R100 billion over ten years in infrastructure development; improving integrated waste management efforts; ensuring food security; maintaining a safetynet for the indigent; driving an inclusive economy; creating respectable jobs; and growing commercial opportunities for SMMEs and local service providers.

The City holds the hopes and aspirations of its entire people. Our vision of a promising future has a finite end-goal, of a liveable, sustainable and resilient Johannesburg. We are providing liveable communities in which our people live and play close to where they work. Through deliberate infrastructure investment we are transforming the urban spatial form of Johannesburg, reclaiming certain areas to ensure this vision is achieved. We are providing affordable, safe, reliable public transport systems that will ultimately reduce congestion on our streets, while decreasing our carbon footprint through state-of-the-art transport technology. We envisage that these transport nodes will become the centre of living activities within Johannesburg. We are creating safer caring communities and providing a safety-net for the indigent, in line with our position as a leading caring city. Globally, Johannesburg is claiming its pride of place as a one of the world's leading cities, and the leading City in Africa.

The 2012/13 Integrated Annual Report carries the theme "Committing to a promising future of a world-class African City that is resilient, sustainable and liveable". Johannesburg has a clear roadmap for delivery – in the immediate, medium, and long term – and this Annual Report provides a snapshot of our achievements during the 2012/13 financial year. It also outlines our commitments for the coming financial year. The Report addresses issues that are material and provides a fair representation of the integrated performance of the City of Johannesburg and its entities for the period 1 July 2012 to 30 June 2013.

Clr Mpho Parks Tau
Executive Mayor of the City of Johannesburg

# City Manager's Executive Summary

"Collectively, we remain committed to efficient service delivery and the attainment of a liveable, sustainable Johannesburg"

City Manager of the City of Johannesburg

#### Introduction

The 2012/13 Integrated Annual Report carries the theme 'Committing to a promising future'. The future we envisage is that of a world-class African city that is resilient, sustainable and liveable. This theme represents our long-term commitment to residents and stakeholders of Johannesburg to deliver a City that is resilient, liveable and able to preserve resources for future generations. It is strategically embodied in 'Joburg 2040' the City's Growth and Development Strategy (GDS) and operationally applied through the flagship programmes provided for in our Service Delivery and Budget Implementation Planning (SDBIP).

2012/13 was our first year of implementing the 'Joburg 2040' GDS. To give tangible expression to the commitments we have made in the GDS, we have pledged to spend R100 billion toward infrastructure development over ten years, thereby enabling Johannesburg to make a decisive break with apartheid era spatial planning. Further, our targeted flagship programmes are designed to address short and medium-term challenges whilst maintaining focus firmly on our long-term vision of 'Joburg 2040'. The City is committed to enhancing its

interactions with citizens and other stakeholders going forward, particularly through the implementation of Community-Based Planning (CPB) initiatives.

For 2012/13, using the principles of resilience, sustainability and liveability we reviewed the five-year Integrated Development Plan (IDP) and committed to the following ten flagship programmes to drive our service and infrastructure delivery:

- Financial sustainability and resilience.
- Greenways and mobility
- Agriculture and food security.
- From informal settlements to sustainable human settlements.
- Citizen Participation and Empowerment.
- Integrated Waste Management
- Urban water management
- Investment attraction, retention and expansion.
- Shift to low carbon infrastructure.
- A safe secure and resilient City that protects, serves, builds and empowers communities.

The service delivery review section (Page 40) provides a consolidated view of our performance with respect to the ten priorities listed above

# Overview of City of Johannesburg

**4.6** million population

1.4 million households

The City of Johannesburg (CoJ) continues to be South Africa's primary city, providing services to over 4.4 million people. This translates into approximately 8% of the total national population. Service delivery is facilitated through an employee base of over 25 000 employees. Recognised as one of the leading cities globally, the City of Johannesburg is known as a city of innovation and economic dynamism; a city that mobilises the strengths and qualities of its diverse population; and also a city that cares deeply for all its residents through its commitment to world-class service delivery for all.

Johannesburg, the largest and wealthiest city in South Africa accounts for 16% of the country's Gross Domestic Product (GDP). It hosts South Africa's largest corporations as well as many other international corporations operating on the African continent.

Johannesburg is the provincial capital of Gauteng, the wealthiest and most popular province in South Africa; and is one of the 40 largest metropolitan areas in the world. Johannesburg is the centre of a rapidly urbanising Gauteng Province. It is projected that by 2015, the urban portion of Gauteng - comprising mainly the cities of Johannesburg, Ekurhuleni (the East Rand) and Tshwane (greater Pretoria) - will be a polycentric urban region with a projected population of some 14,6 million people.

The City continues to offer its residents a high quality of life and endless economic opportunities by:

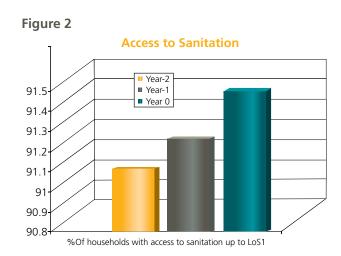

- Providing excellent transport and telecommunications infrastructure services.
- Being Africa's economic powerhouse and one of the world's leading emerging market economies.
- Promoting a well-structured regulatory environment.
- Hosting institutions of exceptional quality recognised in global competitiveness surveys.
- Creating an environment for Johannesburg to maintain its position as a centre for sound banking and financial syste.
- Having a good credit rating supported by good financial governance.
- Being recognised for its low cost of living and being the least expensive African city out of 214 cities on five continents; Johannesburg is almost three times less expensive than the most expensive city, Tokyo.
- Providing a shopping mecca for sub-Saharan Africa as well as ensuring strong cross-border trade.
- Providing a spring-board to Africa's markets.
- Providing good socio-economic infrastructure.

Every year, the City commits significant resources to support service delivery. In 2012/13, R31.9 billion was committed to service delivery programmes. In 2013/14 this increased and exceeded R40 billion, consisting of an operational budget of R36.3 billion while R7.5 billion was allocated towards capital expenditure. In 2013, Johannesburg became the first municipality in South Africa to pass a multi-year capital budget of R30.1 billion. The magnitude of these figures indicates Johannesburg's commitment to high quality service delivery and confidence in its future as a leading metropolitan municipality.

We are striving for urban wellbeing and are winning the battle against urban poverty, spatial inequality, and social exclusion. In the last ten years we have made significant investments in infrastructure, such as Bus Rapid Transit infrastructure to support Johannesburg's world-class public transport system as well as the creation of mixed housing opportunities. We forecast that the City will spend a further R100 billion investment over a ten year period in infrastructure development. This intervention aims to address poverty and to confront spatial inequality by transforming urban spatial form through reclaim particular areas of the City and re-stitching the City such that major transport nodes become "Corridors of Freedom" that promote densification but facilitate quick movement of residents. This is necessary because poverty and inequality in Johannesburg are geographically concentrated, with stark spatial differences in the levels of poverty and inequality. Massive infrastructure investment is required to undo the pattern of residential segregation enforced during the years of apartheid.

# Service delivery overview

During the 2012/13 financial year, City of Johannesburg made progress in key service delivery areas — as aligned with the City's Integrated Development Plan (IDP) and SDBIP:

90.8% access to electricity access to electricity

98.5% access to sanitation

96.9% access to refuse collection services

Collected
92%
of revenue billed

**Financial sustainability and resilience:** The City improved its response rate to billing queries through open days, the 'Revenue Step Change' process and 'Zero Tolerance' project during the year, resulting in many queries being resolved and accounts being corrected. Collections from alternative revenue streams further buoyed financial stability. These interventions, together with a strong focus on fiscal responsibility and the

development of prudent financial management practices, resulted in the City achieving its revenue target and collecting 92% of revenue billed. The City also maintained an upward trajectory in key indicators such as increasing the value of assets, increases in cash and cash equivalents as well as increase in surplus.

**Agriculture and food security:** This programme promotes food security with the aim of combatting hunger and addressing chronic lifestyle diseases which is as a result of poor dietary habits and sedentary lifestyles. Surveys indicate that 42% of the City's poor households go without food 2 – 3 days a month. The programme supports vulnerable communities in our society, including children and seniors. In addition, initiatives were undertaken to provide support to small emerging farmers to become self-sufficient in producing their own crops and to sell fresh produce to their communities and local markets. Six-Agri resource centres were established to provide training of the use of seeds and implements in areas of most unemployed in Region A (Ivory Park: Hikhensile & Diepsloot Skill Development Centre); Region C (Itsoseng Informal Settlement & Tshepisong-Vlakfontein Phase 7); Region G (Orange Farm Skills Centre and Poortije Skills Centre); These centres provided training, of seeds and implements. The City also developed a total of 322 new food gardens which will be expanded in the future.

5 343
New public lights installed

3 307 first-time electricity household installations From informal settlements to sustainable human settlements: We delivered 3470 mixed housing opportunities in 2012/13 and recognise that there is still a long way to go till we can respond fully to the challenge of housing within a sustainable urban form. We are responding to the housing challenge through a commitment to reshape the urban spatial form by committing R100 billion towards infrastructure development to construct a future city based on liveability, sustainability, and spatial equity. At the core of this approach is the City's 'Corridors of Freedom' initiative, representing a spatial incentive for knitting the urban form together and facilitating the mass transit of people and goods along corridors that strengthen the connectedness of different parts of the city

2012/13 further confirmed Johannesburg's position as a leading South African metropolitan city, with more people than ever before, accessing key basic services, such as water and

sanitation, electricity and waste removal. The quality of the City's drinking water was maintained at 99.9% against the South African National Standard (SANS) 241. The City's final treated effluent was maintained at 95.2% of industry standards as set by the Department of Water Affairs' (DWA) Effluent Discharge Permits. In 2012/13 we provided more than 3 000 new households with first-time connectivity to electricity.

**Greenways and mobility:** The annual performance recorded a high number of commuters on the City's world-class public transport system, Rea Vaya. There were on average, 35 953 passengers being transported daily on Rea Vaya, despite the challenges of labour unrest. Metrobus carried over 16 million passengers in the financial year. As we continue to improve the public transport system, we are improving mobility on the City's streets and, in the process, reducing our carbon footprint by using advanced technology on our public transport system. The City achieved its target on BRT roadways and the stations and depots. Improvements were undertaken in preparation for Phase 1B operations as a depot (at Dobsonville) was completed. In addition to the roroll out of Phase 1B and the restructuring of Metrobus we developed complete streets, introduced managed lanes and upgraded gravel roads. Jobs were created by manufacturing the BRT buses locally.

**Citizen Participation and Empowerment:** 2012/13 saw 130 Ward plans developed these ward plans include ward profiles and costed capital projects that will be implemented within individual wards. The City also successfully implemented Community Based Planning (CBP) pilot in Region E. Experiences from Region E will guide comprehensive CBP implementation across the City. As part of the pilot, included with CBP plans for Region E are Capex projects to be implemented in each ward; costed operational plans for each city department and entity; and community identified initiatives. As a result of these activities, the City is refining administrative processes of planning and budgeting to meet the basic needs of our communities. Johannesburg further

strengthened its commitment to cultivating meaningful stakeholder relations and to engaging stakeholders collaboratively in response to priority developmental needs. Accordingly, the IDP outreach processes were of great importance in building a collective and shared vision for the future of Johannesburg as a leading African city.

**Smart City:** During the year, our aspiration of building a high-performance organisation and to improve the culture of technological innovation, performance management and accountability evolved through the roll-out of enhanced broadband technology and capabilities. Public access to Internet services was enhanced through the Broadband Network Core Infrastructure and the Public Access to Internet in Libraries (PAIL) programme. Two City Libraries were connected to the internet, namely, Orlando East and Johannesburg Central Library. The City provided 315 (thin client laptops) for the 20 libraries. Landing pages were updated with eLearning content as well as training of staff and community members on E-learning.

900 km Of fibre optic cable layed

3 967 SMME's supported **Investment attraction, retention and expansion:** The City recognises the need to create an inclusive economy through increasing the contribution of SMME's to the economy. Johannesburg is committed to developing competitiveness, innovation and increased investment through support for SMMEs. During the year, a total of 3 967 SMMEs were supported through our SMME development programmes. This support included assisting informal traders to obtain trading licences, and mentoring 21 SMMEs for a full calendar year in partnership with the Gauteng Enterprise Propeller. In addition, the Expanded Public Works Programme (EPWP) aims to reduce unemployment and alleviate poverty by creating on-the-job training. During the year, the City created 36 588 work opportunities (against a target of 35 000), thereby exceeding our target by 1 588 work opportunities. Despite these

achievements there is a long way to go in achieving a totally inclusive economy and to eradicate unemployment.

**88 987**Verifiable Emissions Reductions

99 517
Tonnes of dry waste diverted from landfill sites

80 000
Tonnes of green waste diverted from landfill sites

**Shift to low carbon infrastructure and integrated waste management:** In 2012/13, the City accumulated 88 987 Verifiable Emission Reductions (VERs) from its 'landfill gas to energy' project at two landfill sites. Further, Johannesburg remains committed to the goal of '7% waste to landfills', implementing separation at source projects across the City in partnership with the community. The City also made substantial progress in rolling out our 'green strategic projects' by retrofitting community facilities with environmentally appropriate design elements. During the year, 27 091 solar water heaters (geysers) were installed in low income various areas, including Alexandra, Devland, Lehae, Pimville, Pennyville, Tshepisong and Vlakfontein.

A safe, secure and resilient City that protects, serves, builds and empowers communities: We are building a City that is safe, secure and resilient; and that protects, serves, and empowers our communities. During the year, we reduced assaults in our Inner City by 13% and fought serious traffic violations. While progress is acknowledged in creating a safer City, the city recognises the enormity of the task and will therefore upscale implementation of its safety programmes to preserve the safety and security of its residents.

**Urban Water Management:** We placed particular focus on repair and maintenance of water network to reduce water losses as well as repair and maintain dams that play a critical role in storm water management. We intensified water demand management strategies, pipe replacement, pressure management and waste water upgrades and introduced new storm water management strategies. Technical, social and financial interventions led to us meeting the target of bringing Unaccounted

for Water (UFW) to below 32%. . We developed a Consolidated Infrastructure Plan CIP to inform future and new capital investment plans for infrastructure to achieve further gains in water management.

Notwithstanding recorded achievements, the City acknowledges missed targets. To enhance the attainment of these the City is improving its environmental and operational issues, improving its capacity, and to improve the skills of its workforce to ensure improved delivery against set targets. The City is also improving communication of programmes to communities to ensure that programmes such as its waste 'separation at source' programme have a better uptake from households in identified areas. The City will proactively respond to the risk of labour unrest to reduce the impact to service delivery.

A detailed review of our performance against SDBIP targets can be found at the end of each cluster review in this report, reflecting where our targets were either met or missed.

Please see detailed commentary on our performance against our SDBIP targets in the Integrated Annual Report (Book 2) on pages 119 - 166 available on www.joburg.org.za and at all Regional Offices.

#### Financial health overview

7% increase in total assets to R60.2 billion

This report confirms that the City of Johannesburg has stabilised its finances. The City recorded significant progress towards the goal of financial sustainability and resilience as evidenced by its ability to generate a healthy net surplus, improve cash and cash equivalents as well as its responsiveness to customers as part of resolving billing queries. During the year, four of the key ratios that measure prudent financial management improved, namely: solvency, debt to revenue, net operating margin and cash coverage. The City realised a

 2011/12
 2012/13

 Increase in cash and cash equivalents

 R2 220 393 000
 R5 401 407 000

surplus of R3.4 billion and thus increased its capital budget by over 60% for the 2013/14 financial year. Our total asset base increased by 7% to R60.2 billion, driven largely by our capital expenditure of R4.2 billion, increased debtors and a significantly improved cash position of R5.4 billion. Collectively these efforts improve the City's ability to achieve its medium-term goal of spending more towards

infrastructure development as part of its commitment to spend R100 billion over ten years. The City still recognises that, despite this progress more work must be done to completely eliminate issues around billing. The City is committed to sound financial strategies and prudent financial management practices

# Organisational development overview

The City's biggest asset is its employees who bear responsibility for delivering its mandate to communities. They are the foundation and drivers of our collective success. Accordingly, the City strives to create value by attracting, developing and retaining skilled and competent people. Through our Human Resources Management (HRM) function, we are committed to inspiring and growing people through individual development analysis and plans, as well as career management programmes and by recognising performance excellence.

The City is committed to recruiting from within its communities while also ensuring a deliberate focus on developing a local skills base where this may not exist. Our Human Resources Strategy (HRS) is designed to develop professional, diverse and competent human capital to align with our vision of a world-class African city.

# **Auditor General Report**

2011/2012 Qualified Audit Opinion

2012/2013 Unqualified Audit Opinion In 2012/13 the City made significant progress and attained an Unqualified Audit Opinion, progressing from a position of a qualified audit in 2011/12. This reflects progress toward meeting the national target of 'Clean Audit 2014' for local Government. The City also improved its attainment of performance objectives

by 45% from 2011/12 year, with 56% of all targets completely achieved and significant progress recorded towards the complete attainment of the rest of the City's objectives. The City is responding comprehensively to all matters raised by the Auditor General to ensure progress towards the national objective of a clean audit.

# Appreciation

I would like to express my appreciation for the support received from the political leadership in Council, including the Executive Mayor, Councillor Mpho Parks Tau and the Mayoral Committee, Speaker of Council and Section 79 Committees; as well as the City's advisory committees which encompass the Group Audit Committee and Group Performance Management Committee and Group Risk Committee. Administratively I would like to thank the Chief Operations Officer, Gerald Dumas, Group Heads, Cluster Convenors, Executive Heads, Boards of Directors, Managing Directors and the entire staff of the City and its entities for their continued support. Collectively we remain committed to efficient service delivery and the attainment of a liveable, sustainable and resilient Johannesburg.

Trevor Fowler
City Manager of City of Johannesburg Metropolitan Municipality

# City of Johannesburg at a glance

# **Our vision**

Johannesburg – a World Class African City of the Future – a vibrant, equitable African city, strengthened through its diversity; a city that provides real quality of life; a city that provides sustainability for all its citizens; a resilient and adaptive society.

# **Our values**

**Resilience:** Our ability to work together and support each other in times of need and to adapt to difficult situations by recognising our strengths and assets, and mobilising these to deliver on our promises.

**Sustainability:** Using our resources to address inequality and poverty and to create a better life for all. We are committed to ensuring that resources are carefully managed to achieve our long-term vision without compromising the environment for future generations.

**Liveability:** Creating an environment that promotes civic engagement and a sense of place through access to safe sustainable choices for economic opportunities. Johannesburg is committed to providing access to adequate, affordable, environmentally sustainable and coordinated transport system as well as housing opportunities.

# 'Joburg 2040': An Outcome-based strategy

'Joburg 2040' Growth and Development Strategy (GDS) is our long-term response to emerging challenges and opportunities, a lens through which we view, conceptualise and enhance the City's strategic approach to development issues. It is informed by the United Nations eight Millennium Development targets and represents a commitment to the citizens of Johannesburg that their City will not treat them as passive recipients of government services, but rather as active agents in shaping their own future.

'Joburg 2040' GDS identifies a set of long-term tactical outputs and qualitative outcomes to realise the City's long-term vision. Table 4 below provides a description of each of the four over-arching GDS outcomes and references which of the 12 correlating National Outcomes each relates to (as informed by the United Nations' Millennium Development Goals).

Table 4: 'Joburg 2040' GDS Outcomes

| Outcomes  |   | Description   | Associated National Outcomes (as informed by the Millennium Goals)  |
|-----------|---|---|---|
| Outcome 1 | Improved quality of life and development-driven resilience for all.   | The City envisages a future that presents significantly improved human and social development realities by targeting poverty reduction, food security, self-sustainability development initiatives, improved health and life-expectancy, and authentic social inclusivity. By 2040, the City aims to achieve a significantly enhanced quality of life for all.  | <ul> <li>Outcome 1: Improved quality of basic education</li> <li>Outcome 2: A long and healthy life for all South Africans</li> <li>Outcome 3: All people in South Africa are and feel safe</li> <li>Outcome 7: Vibrant, equitable and sustainable rural communities with food security for all</li> <li>Outcome 8: Sustainable human settlements and improved quality of household life</li> <li>Outcome 11: Create a better South Africa and contribute to a better and safer Africa and world</li> </ul> |
| Outcome 2 | Provide a resilient, liveable, sustainable urban environment underpinned by infrastructure supportive of a low-carbon footprint.  | The City plans to lead in the establishment of sustainable and ecoefficient infrastructure solutions (e.g. housing, eco-mobility, energy, water, waste, sanitation and information and communications technology), to create a landscape that is liveable, environmentally resilient, sustainable, and supportive of low-carbon economy initiatives.  | 10: Environmental assets and<br>natural resources that are well<br>protected and continually<br>enhanced  |
| Outcome 3 | An inclusive, job-intensive, resilient and competitive economy that harnesses the potential of citizens.  | The City of Johannesburg plans to support the creation of an increasingly competitive, 'smart' and resilient city economy, when measured in relation to national, continent and global performance. The City aims to promote economic growth and sustainability through the meaningful mobilisation of all who work and live in Johannesburg, and through collaborating with others to build job-intensive long-term growth opportunities and prosperity. | <ul> <li>Outcome 4: Decent employment through inclusive economic growth</li> <li>Outcome 5: A skilled and capable workforce to support an inclusive growth path</li> <li>Outcome 6: An efficient, competitive and responsive economic infrastructure network</li> </ul>   |
| Outcome 4 | A high performing metropolitan government that pro-actively contributes to and builds a sustainable, socially inclusive, locally integrated and globally competitive Gauteng City Region. | The City envisages a future where it will drive a caring, responsive, efficient and progressive service delivery and developmental approach within the Gauteng City Region (GCR) and within its own metropolitan space, to enable both to reach their full potential as integrated and vibrant spaces.  | <ul> <li>Outcome 9: A responsive,<br/>accountable, effective and efficient<br/>local government system</li> <li>Outcome 12: An efficient, effective<br/>and development-oriented public<br/>service and an empowered, fair and<br/>inclusive citizenry</li> </ul>   |

## 10 Priorities for the future

The City's five-year IDP translates the long-term outcomes of the Growth and Development Strategy (GDS) into implementable programmes for a specific term of office. The City's ten strategic "priorities" were approved with a view to reducing poverty and inequality, promoting investment and business retention, with efficient, reliable and cost effective service delivery, and redeveloping areas in decline.

Figure 3: Ten strategic priorities for 2012/13

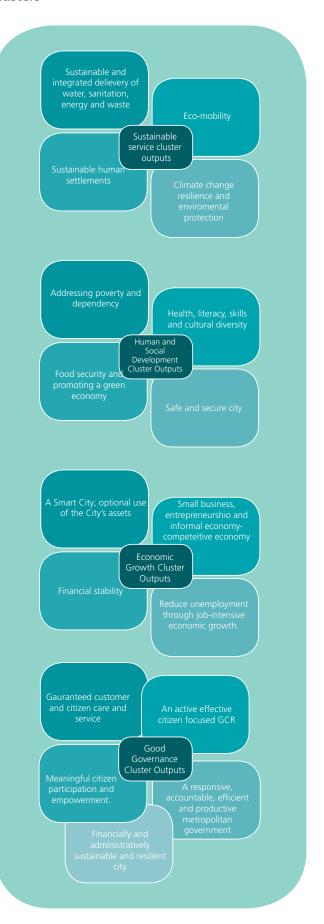

# Programme delivery through four clusters

The City's strategy is delivered through four clusters that are aligned with the principles of Sustainable Services, Economic Growth, Human and Social Development and Good Governance. These principles underpin the 'Joburg 2040' GDS, and enable the City to design targeted programmes to achieve the following long-term imperatives: eradicating poverty, promoting social inclusion; building an inclusive economy; providing sustainable services and settlements; ensuring resource security and environmental sustainability.

The diagram below provides an overview of the four clusters and their associated programme focus areas. Flagship programmes have been designed for each cluster as part of the City's Service Delivery and Budget Implementation Plan (SDBIP).

Figure 4: Programme delivery through four clusters

### A vision for the future

Johannesburg is committed to proactive, quality service delivery and the creation of a city environment that is resilient, sustainable and liveable. Our 'Joburg 2040' initiative is facilitated through targeted long-term programmes to promote quality services; to drive economic growth; to develop our society and the individuals within it; to ensure the optimal management of natural resources; to safeguard the environment; and to promote sound governance in all the City does.

Six principles inform 'Joburg 2040':

- Eradicating poverty
- Building and growing an inclusive economy
- Building sustainable human settlements
- Ensuring resource security and environmental sustainability
- Achieving social inclusion through support
- Enabling and promoting good governance.

# Operating context

Our 'Joburg 2040' Strategy acknowledges that, worldwide, cities experience increasingly complex challenges. With the future of cities becoming more unpredictable and uncertain, the development paradigm in relation to cities has changed. In this context, city strategies must navigate uncomfortable tensions between defining a chosen development growth path, and accommodating uncertainty resulting from population growth, migration, urbanisation, climate change, poverty and socio-economic inequalities. Factors of

population growth, unemployment, regionally concentrated economic growth and environmental sustainability present key challenges, opportunities and risks that Johannesburg, as a leading metro must respond to in an integrated way. This overview provides a meaningful backdrop for a discussion on the City's integrated approach to long-term value creation for its citizens.

# **Population growth**

The growth in urban population in South Africa is outstripping national population growth. This implies an increasing urgency for infrastructure development in South Africa's cities to support increases in population. This presents challenges for the management of water and sanitation, waste, energy, electricity, transport and social infrastructure.

Johannesburg is home to more than 4.4 million people, accounting for about 36% of Gauteng's population and 8% of the national population. Over the last decade the City has grown faster than the Gauteng region as a whole, as it continues to be the leading metropolitan gateway for migrants from other provinces and international migrants.

## Unemployment

Youth unemployment remains a major challenge both nationally (above 35%) and for the City. The City faces a 31.5% youth unemployment rate, which is atypical of a city that attracts youth looking for employment opportunities. Johannesburg is populated predominantly by youth, concentrated in working age group of between 20 years and

39 years. These demographics result primarily from economic immigration. As an economic hub of the country and the region, Johannesburg is a primary destination for job seekers across the region and the country as a whole. However, by attracting the young population, the City is presented with a growing youth unemployment challenge.

The issue of unemployment cannot be meaningfully addressed without a deeper investigation of youth unemployment. Johannesburg has made significant progress through positive economic growth and programmes such as the Expanded Public Works Programme (EPWP) among others, resulting in a 13.5% reduction in youth unemployment over the last decade. The City is committed to creating value through its long-term Growth and Development Strategy (GDS) to generate sustained growth and to address the challenges of unemployment.

# **Economic growth**

Based on the latest census data (Census 2011) the bulk of the population (12.27 million) is concentrated in the province of

Figure 5: City of Johannesburg regions

REGION A:
Diepsloot, Ivory Park, Midrand, Fourways and Kya Sand

REGION B:
Randburg, Rosebank, Emmarentia, Greenside, Melville,
Northcliff and Parktown

REGION C:
Roodepoort, Constantia Kloof, Northgate

REGION D:
Doornkop, Soweto, Dobsonville and Protea Glen

REGION F:
The Inner City of Johannesburg

REGION G:
Orange Farm, Ennerdale and Lenasia

In Johannesburg, 'Region G' has the highest number of people living in poverty followed by 'Regions D' and 'A', while 'Region B' has the lowest number of people living in poverty. Although a considerable number of Johannesburg's residents are poor, it has a substantial middle and upper class which competes in global financial and trade markets and adheres to international norms of urban consumption and culture. In addition, the city's growing middle class presents opportunities for economic growth and supports the City's drive to increase its revenue base. This growth requires that a variety of services

Gauteng, both as a consequence of population growth and increased migration. The City's economy is the main driver of national growth, historically performing at 50% higher in growth rates relative to national growth. However, given this strong link between the City's economy and that of South Africa, the impact of a struggling global economy is also felt locally. During 2012 manufacturing growth slowed and was further affected by shrinking export sales, high production costs and the increasing cost of credit, resulting in a slow-down of the GDP to 2.7% during 2012. Within Johannesburg, the slow-down of the economy was evident in the moderate rate of economic growth at 2.5% in 2012, down from 3.5% in 2011.

#### **Inequality and poverty**

The factors contributing to poverty encompass both spatial inequality and structural jobless economic growth, which is reinforced by low levels of skills. These factors inform the City's Developmental Service Delivery approach and Public Works Programmes. The City recognises that spatial inequality is a contributing factor to poverty.

and amenities are made accessible to all citizens.

# **Food security**

Food security is a significant challenge for the City. Poor households are particularly at risk given the high proportion of income used for food. Statistics reflect that as many as 42% of poor households are 'food insecure'. Poverty and food insecurity have a clear impact on health. The City identified

specific social mobility and human development priorities to address the issue of poverty and of food security.

Our GDS, IDP and SDBIP are also informed by National Government's 12 Outcomes as well as Provincial Government's outcomes to ensure the coordinated delivery of services to citizens in line with the Intergovernmental Relations Framework Act, Act No 13 of 2005. This allows national priorities to be delivered through local processes. These include housing, infrastructure development, provision of electricity and job creation.

The 12 National Outcomes of Government (as informed by the United Nations Millennium Development Goals) have a strong bearing on the following programmes implemented in Johannesburg:

- Improving the quality of basic education and health and life expectancy.
- Ensuring that all people in South Africa are protected and feel safe.
- Creating decent employment through inclusive economic

- growth, and creating a skilled and capable workforce to support inclusive economic growth.
- Creating an efficient, competitive and responsive economic infrastructure network.
- Creating vibrant, equitable and sustainable rural communities and food security.
- Promoting sustainable human settlements and improved quality of household life.
- Building a responsive and accountable, effective and efficient local government system.

In 2012/13 we responded to these national and provincial priorities and socio economic factors through programmes that emphasised improved sustainable financial efficiencies, improved basic services, job creation, support for sustainable human settlements and deepened democracy through refined ward committee modelling. We recognise that building an effective developmental state and a cohesive and caring society will require a collective effort from all spheres of Government.

# Our strategy: GDS 2040

"It's about the ability to mobilise business, communities and labour to be part of a broad coalition of people that are working towards a common objective of achieving a better city and a better Johannesburg for all."

The 'Joburg 2040' (GDS) is our roadmap to becoming a resilient, sustainable and liveable city. Through the three pillars of sustainable services, human and social development, and economic growth we strive toward minimal resource reliance and increased preservation of our natural resources. This entails reducing pollution, improving waste management, and promoting efficient land use through appropriate urban spatial development.

It is widely accepted that the trio of environmental, economic and social sustainability pillars are a sufficient model to address sustainability. However, because we are a public sector institution with clear accountability and public engagement imperative, governance provides the overall framework to support the three sustainability pillars and relies on authentically participative stakeholder engagement practices.

With our 'Joburg 2040' Growth and Development Strategy (GDS), we changed course and undertook a sustainability transition process, emphasising more sustainable policies, programmes, behaviours, and relationships. As a result, in Johannesburg, sustainability is less an end state – or a set of specific policy, behavioural, and institutional outcomes – but a socially instituted process of adaptive change that occurs over time at different levels.

The GDS not only provides a vision for a sustainable future, but importantly, it defines clear outcomes against which to measure our progress. Six value-based imperatives inform the GDS:

- 1. Assisting the poor in proactive ways.
- 2. Engaging more citizens to promote shared economic opportunities.

- Building 'equality neighbourhoods' and integrating communities.
- 4. Protecting the natural environment for future generations.
- 5. Promoting unity and togetherness to ensure a collective sense of belonging.
- 6. Promoting meaningful interactions between the City and its citizens.

There was no better time than 2011/12 for Johannesburg to commit to sustainability and liveability. Johannesburg's population keeps increasing in line with global trends in which over 50% of the world's population live in cities and urban areas. Such population increases present risks for the environment, natural resources and infrastructure. Over and above our primary concern for the environment – and the ability of our future generations to benefit from our natural resources – we are concerned with providing our residents with urban spaces that are liveable and foster social connections.

By giving expression to the GDS imperatives through our Service Delivery and Budget Implementation Planning (SDBIP) process – and tacking our performance against the SDBIP targets – we aim to demonstrate our on-going commitment to an urban spatial form that not only addresses the skewed configurations of the past but one that ensures that our residents will prosper well into the future.

The table below outlines the GDS's key drivers, as well as their desired outcomes. It further provides the indices we use to measure our performance. Going forward, we will continue to refine our reporting around these indicators to ensure

comparable and transparent mapping of our progress and to promote enhanced integrated reporting on our sustainability practices.

| Primary drivers  | Outcomes/Outputs   | GDS Indicators   |
|--|--|--|
| <ul> <li>Human and social development:</li> <li>Hard issues (access to infrastructure, social services and amenities)</li> <li>Soft issues (social cohesion</li> </ul> | <ul> <li>Improved quality of life and development-driven resilience:</li> <li>Reduce poverty and dependency</li> <li>Promote food security; health, literacy and skills, safe and secure city</li> </ul> | <ul> <li>HDI: 2020:0.79; 2030:&gt; 0.8</li> <li>Poverty Rate: 21% to 5%</li> <li>HIV: 29% to &lt;5%</li> <li>Safety Index: 56 to &gt;80</li> </ul>                                       |
| Infrastructure talks to resource security, withstand 'shocks' and Smart City   | Resilience, liveable, sustainable urban environment:  Eco-mobility  Sustainable human settlements  Climate change resilience  Environmental protection   | <ul> <li>UFW: 38% to 20% (2020)</li> <li>Private/Public transport ratio (30:70)</li> <li>Ecological footprint</li> <li>Zero waste to landfill (2020)</li> <li>Energy Mix: 50%</li> </ul> |

# 'Joburg 2040' GDS: Structure and implementation

The 'Joburg 2040' GDS identifies a set of long-term tactical outputs and qualitative outcomes to realise the City's long-term vision. The City's five-year IDP translates the long-term outcomes into implementable programmes for a specific term of office. Business planning is a short-term planning tool

that addresses annual operational planning. It is the basis for budget allocations that allow for the implementation of five-year IDP sub-programmes and projects. The City has sought to capture the complex multiple processes of planning through:

- · Long-term planning: The 'Joburg 2040' Strategy.
- Medium-term planning: The revised 2012/16 IDP.
- Short-term implementation: The core departments and municipal entities' annual business plans and Service Delivery and Budget Implementation Plan (SDBIP).

Figure 6: The complex process of planning: Long-term, medium-term and short-term planning

| Long-ter  | m Planning  | Medium-term Planning   | Short-te  | rm Planning  |
|---|---|--|---|--|
| National and Provincial<br>Agenda<br>Government priorities are set at both a<br>national and provincial level   | Growth and Developement Strategy Long-term strategy for the City (informed by Government planning, emerging trends and other development issues)  | Integrated Development Plan (IDP) Government proporities are set at both a national and provincial level   | Institutional SDBIP<br>(Annual)<br>Organisational Business Plan | Departmental SDBIP /<br>ME Business Plans<br>Government priorities are set at<br>both a national and provincial<br>level |
| 1. Impoved basic education 2. Long & health life for all 3.All are and feel safe 4. Decent employment through include economic growth 5.A skilled and capatable workforce 6.An efficient, competitive responsive infrastructure 7. Vibrant, sustainable rural communities & food security 8. Sustainable human settelments and improved quality of life 9.A responsive, accountable & efficient local government 10. Environmental assets and natural resources that are well protected and continually enhanced 11. Contribute to a better South Africa and world 12. An efficient development oriented public service and empowered inclusive citizenship | 1.Improved quality of life and development-driven resilicence for all 2.Provide a resilient, liveable, sustainable urban environmental underpinnted by infrastructure supportive of a low-carbon footprint 3.An inclusive, job-intensive, resilient and competitive economy that harnesses the potential of citizens 4.A high performing metropolitan government that pro-actively contributes to and builds a sustainable, socially inclusive, locally integrated and globally competitive Gauteng City Region | 1.Financial sustainability and resilience 2.Agriculture and food security 3.Sustainable human settlements 4.SMME and entrepreneur support 5.Engaged active citizenry 6.Resource resilience 7.'Smart City' 8.Investment attraction, retention & expansion 9.Green economy 10.Safer cities | Institutional SDBIP (Annual)                                    | Department SDBIP / ME<br>Business Plans  |

The following key IDP priority or 'flagship' programmes have been approved for implementation for the current term of office:

Table 6: IDP priority or 'flagship' programmes approved for implementation for the current term of office

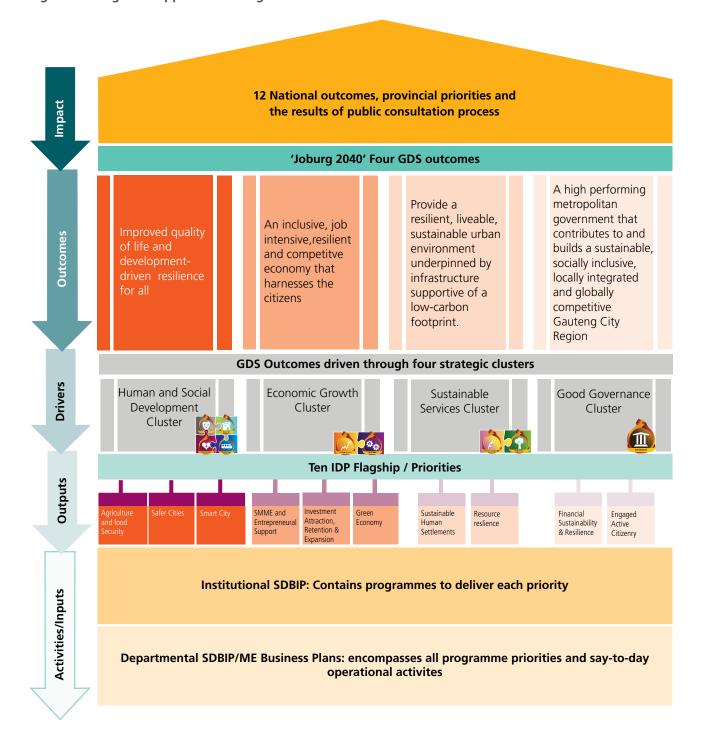

| Priority programme                       | Programme enablers   |
|--|--|
| Financial sustainability and resilience  | <ul> <li>Enhancing revenue.</li> <li>Optimising customer service centres and channels to enhance customer care.</li> <li>Creating a sound financial management environment.</li> </ul>   |
| Shift to low carbon infrastructure       | <ul> <li>Promoting 'Demand Side Management'.</li> <li>Smart metering.</li> <li>Energy generation and sales (energy mix)</li> <li>Gas to landfill.</li> <li>Timing of use management at household level.</li> </ul>   |
| Integrated waste management              | <ul> <li>Separating waste at source.</li> <li>Composting of organic waste.</li> <li>Recycling initiatives.</li> </ul>  |
| Greenways and mobility                   | <ul> <li>Quality service delivery of Rea Vaya BRT.</li> <li>Restoring pedestrian bridges and dams to protect lives and livelihoods.</li> <li>Re-sealing of roads and promoting road safety and public transport usage.</li> <li>Upgrading gravel roads.</li> <li>Introducing managed lanes, walking, cycling and other recreational activities.</li> <li>Integrating different modes of public transport – especially with rail.</li> </ul>                          |
| Sustainable human settlements            | <ul> <li>Providing basic services to vulnerable households.</li> <li>Upgrading marginalised areas/ areas of high deprivation.</li> <li>Formalisation and security of tenure.</li> <li>Enabling housing typologies (e.g. social housing, revitalisation of rental stock) that support Transit Orientated Development.</li> </ul>  |
| Urban water management                   | <ul> <li>Reducing water losses.</li> <li>Introducing stormwater management programmes.</li> <li>Implementing water demand management strategies.</li> <li>Diversifying sources of water (e.g. rain water harvesting) to address water scarcity and to increase revenue.</li> </ul>   |
| Citizen participation and empowerment    | <ul> <li>Promoting community-based planning and budgeting.</li> <li>Reviving 1-stop Centres targeted at citizen partnerships and engagements and citizen empowerment.</li> </ul>   |
| Strategic communications and marketing   | <ul> <li>Devising an integrated communication and marketing strategy to support the City Strategy.</li> <li>Promoting the 'Buy, Sell, Invest and Visit' initiative.</li> <li>Entrenching and positioning Johannesburg as an ideal destination.</li> </ul>  |
| Human capital development and management | <ul> <li>Introducing efficiency and productivity benchmarks, assessment and monitoring instruments.</li> <li>Creating labour stability.</li> <li>Integrating the COJ Group Human Capital Governance Framework and strategy.</li> <li>Aligning talent management in support of the City's imperatives through a skilled workforce (by developing, retaining and acquiring the appropriate skills).</li> <li>Establishing a municipal academy / university.</li> </ul> |

| Priority programme   | Programme enablers  |
|--|---|
| A safe, secure and resilient City that protects, serves, builds and empowers communities | <ul> <li>Promoting community-based policing and partnerships.</li> <li>Implementing 'smart technology' (implement disaster management centres).</li> <li>Promoting and facilitating life-long learning.</li> <li>Introducing safe social spaces for cultural interaction.</li> <li>Promoting public safety.</li> <li>Introducing a 'healthier lifestyles' programme.</li> </ul> |
| Economic growth  | <ul> <li>Promoting area-based development.</li> <li>Implementing the Oasis in Soweto initiative, Alexandra and Ivory Park etc.</li> <li>Accelerating the implementation of a skills hub.</li> <li>Introducing Joburg Broadband.</li> </ul>  |
| A city where none goes hungry  | <ul> <li>Subsidising food programmes to ensure safe, affordable food for all (people's restaurants, new markets, food exchanges and so forth.)</li> <li>Introducing Agri-resource centres.</li> </ul>   |

# An integrated approach to long-term value-creation

Figure 6 provides a consolidated view of the various strategic components impacting the City's 'Joburg 2040' Growth and Development Strategy, such as the South African Government's 12 National Outcomes (as informed by the United Nations' Millennium Development Goals), provincial priorities and the results of the public consultation process. It further shows the integration between the outcomes of the GDS – as driven through four strategic clusters – and the 10 IDP priorities; and reflects the ultimate delivery of strategic outcomes through the City's Institutional SDBIP, Departmental SDBIP and Municipal Business Plan.

Figure 7: Integrated approach to long-term value-creation

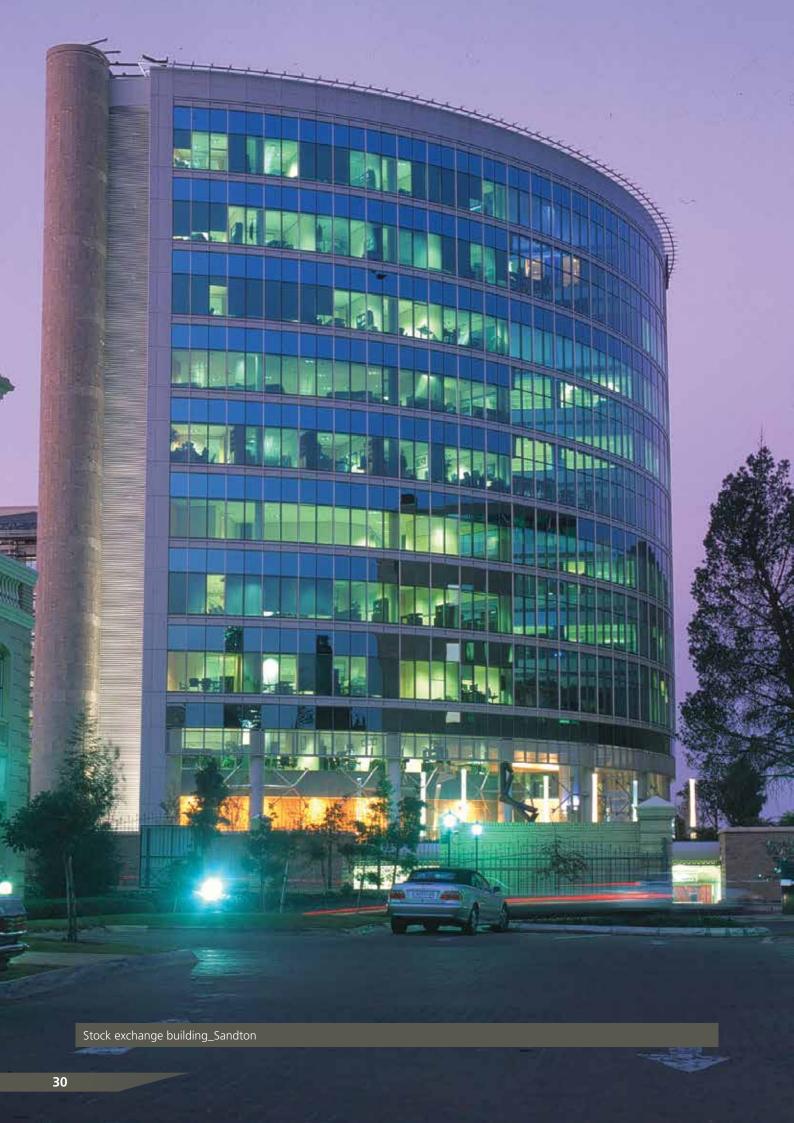

Our strategy seeks to achieve a sustainable city by focussing on the following:

- Reducing poverty and inequality through urban reengineering.
- Integrating urban design.
- Reducing the establishment of new suburban developments at the periphery of the City (compact design, mass transit systems).

Our strategic approach capitalises on economies of scale, thereby reducing the costs associated with service delivery, investment promotion, business retention, and the redevelopment of areas that are in decline.

The City's flagship programmes are supported by sound governance, which emphasises the engagement of citizens in decision-making, as well as financial sustainability, accountability and transparency.

# Operating model and management frameworks

"Joburg 2040 blueprint encourages efficient administration of the municipality".

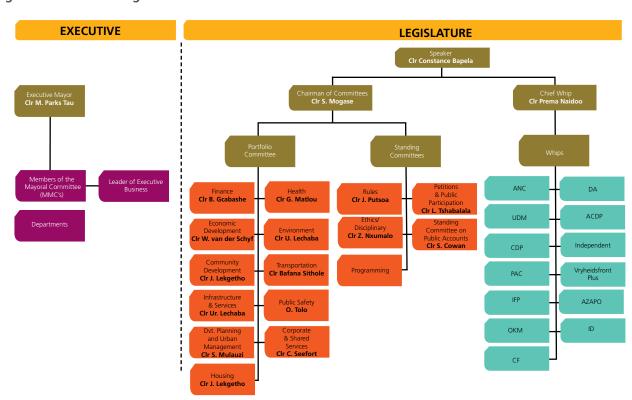

The City's governance and institutional practices are core to achieving our objective of a well governed, world-class African city; therefore our governance structures, systems and policies are underpinned by sound values and ethics to support the implementation of 'Joburg 2040' GDS. Over time, the City's governance models have been refined to facilitate a clear separation of policy-making, regulation and

implementation. The City's core administration is responsible for service delivery, policy-making and regulation. Municipal Entities (MEs) form the implementation arm of the City and create focused, specialised and non-bureaucratic processes. Its regional structures monitor service delivery and citizen care and provide a link between the City, its citizens and other stakeholders.

Currently, the City implements a political governance model similar to that of provincial and national parliament, emphasising the separation of executive and legislative functions to promote oversight, accountability and public participation. The separation of functions between legislative and executive arms of Council enhances oversight and public participation in Council programmes. This separation is achieved through the delegation of legislative and executive functions of Council to the legislative and executive arms respectively. Service delivery implementation and policy issues, such as integrated development planning (IDP) and tariffs, are delegated to the Executive, which is led by the Executive Mayor and supported by an administrative structure led by the City Manager. The legislative function of oversight is implemented by Council and its committees, led by the Council Speaker.

Figure 8: Johannesburg institutional structures

# Legislative arm of Council: Political leadership

**Speaker of Council**Councillor Constance
Bapela

The Speaker is Chairperson of Council presiding over Council meetings in accordance with Council's Standing Rules. In Johannesburg, the Speaker is also responsible for Section 79 oversight committees as well as for

Councillor Affairs to develop political governance capacity among Councillors.

# Chief Whip of Council

Councillor Prema Naidoo

The Chief Whip of Council is an official office bearer, a member of the majority party and Chief Whip of the Majority Party. The Chief Whip ensures proportional distribution of Councillors to various Committees of Council.

The Chief Whip maintains sound relations among the various political parties represented in Council.

## **Council oversight and scrutiny**

In July 2012 Council established committees of Council in terms of Section 79 of the Municipal Structures Act, chaired by non-executive councillors from the majority party. These committees assist Council in executing its responsibilities. Section 79 Portfolio Committees perform an oversight role by monitoring the delivery and outputs of the Executive. These committees do not have any delegated decision-making powers. Their functions include:

- Reviewing, monitoring and evaluating departmental policies.
- Reviewing and monitoring city plans and budgets.
- Considering guarterly and annual departmental reports.
- Examining the link between the City's strategy, plans and budgets
- Holding the political Executive accountable for performance against policies and City priorities.

**Appendix A** contains a comprehensive list of all committees of Council and their functions.

In 2011/13 the City also introduced ground-breaking innovations to support greater oversight. This entailed creating oversight committees for both the Mayoral Office and Legislature.

In 2012/13 the mandate of the Legislative Arm of Council focused on the following themes:

- Accountability, oversight and scrutiny.
- Strengthening the capacity of the Legislative Arm of Council.
- Public participation to safeguard local democratic processes.
- Sound financial management.

Legislative functions of Council also include the approval of by-laws, policies, budgets, the Integrated Development Plan (IDP), tariffs, rates and service charges.

Political oversight functions of Council are exercised primarily through the work of Section 79 Committees. Clear guidelines pertaining to the way these committees handle oversight are outlined in the Oversight and Scrutiny Framework. Councillors also physically visit sites where projects - especially service delivery projects - are implemented to fulfil their oversight role. Additional oversight 'tools' include questions from individual Councillors to hold the Executive to account, as well as motions to ensure debate on Council issues.

To promote oversight and accountability, committees determine priority areas for oversight in respect of each portfolio. The various portfolios are guided by the priorities of the City, as contained in its strategic agenda. Quarterly oversight reports are submitted to Council and are based on departmental quarterly reports. In addition, committee visits to projects and service delivery sites assist and complement the Committees' oversight function.

# Executive arm of the Council: Political leadership

The Executive constitutes Council's policy and programme implementation arm. The Municipal Systems Act defines "executive authority" in relation to a municipality to mean the "municipality's executive authority envisaged in Section 156 of the Constitution" (read with Section 11 of this Act). Section 156 of the Constitution defines the executive role as the administration of local government matters and any other matters delegated to it by the national and provincial governments.

**Executive Mayor**Councillor Mpho Parks
Tau

The Executive Mayor is tasked with the identification and prioritisation of community needs, drafting strategies to deliver those needs and to oversee the delivery of services by the City's administration.

# **The Mayoral Committee**

Section 60 of Municipal Structures Act provides for establishment of a Mayoral Committee when a Municipal Council has more than nine members. The Executive Mayor appointed a Mayoral Committee from among elected Councillors. The City's Mayoral Committee performs those elements of the Executive Mayor's powers and functions as may be designated by the Municipal Council, exercising and performing them in support of the Executive Mayor.

The City's Mayoral Committee ensures that service delivery takes place, including but not limited to improving efficiency, credit controls and revenue, and administration of the municipality. Annually, the Committee must report on community involvement and ensure regard is given to public

views during consultations.

Members of the City's Mayoral Committee for 2012/13 are included in Table 9 below.

# Cluster Mayoral Sub-Committees, Clusters and regional oversight model

The City has strengthened its governance structures to promote better coordination and integration of service delivery packages, as well as greater accountability and oversight. The City established sub-committees to attend to citywide, cross cutting programmes. Mayoral Sub-Committees are complemented by a system of political oversight of key service delivery interventions in the regions to enable better coordinated service delivery. The sub-committees assist the Mayoral Committee in fulfilling its executive functions by enhancing decision-making and focusing on the strategic mandate of the City.

The City has also established four clusters that are aligned with the principles of Sustainable Services; Economic Growth; Human and Social Development and Good Governance. These principles underpin the 'Joburg 2040' GDS, and enable the City to design targeted programmes to achieve the following long-term imperatives: eradicating poverty, promoting social inclusion; building an inclusive economy; providing sustainable services and settlements; and ensuring resource security and environmental sustainability.

**Table 7: Composition of Mayoral Sub-Committees** 

| Sub-committee                | Focus area  | MMCs responsible  |
|------------------------------|---|---|
| Sustainable Services         | <ul> <li>Resource management of (water, energy)</li> <li>Sustainable Human Settlements</li> <li>Mass public transport and, non-motorized transport</li> <li>Climate change resilience</li> <li>Waste minimization</li> <li>Informal Settlement Upgrading</li> </ul> | <ul> <li>MMC: Development Planning</li> <li>MMC: Environment</li> <li>Infrastructure and Services</li> <li>MMC: Housing</li> <li>MMC: Transportation</li> </ul> |
| Economic Growth              | <ul> <li>Activist Government</li> <li>Job Intensive economic growth</li> <li>Small business, entrepreneurship and informal economy</li> <li>Competitiveness Support</li> <li>Smart City</li> <li>Financial Sustainability</li> </ul>                                | <ul> <li>MMC: Finance</li> <li>MMC: Economic Development</li> <li>MMC: Corporate and Shared Services</li> <li>MMC: Development Planning</li> </ul>              |
| Human and Social Development | <ul> <li>Cohesion and inclusion</li> <li>Community Safety</li> <li>HIV/AIDS and non-communicable diseases</li> <li>ECD, ABET and learning</li> <li>Food Security and poverty Support</li> </ul>   | <ul> <li>MMC: Public Safety</li> <li>MMC: Health and Human Development</li> <li>MMC: Community Development</li> </ul>   |
| Good Governance              | <ul> <li>Clean, accountable and productive governance</li> <li>Civic collaboration and participation</li> <li>Citizen and Customer Care</li> </ul>  | <ul> <li>Executive Mayor</li> <li>MMC Corporate and Shared Services</li> <li>MMC Finance</li> <li>MMC Economic Development</li> </ul>                           |

# Administrative governance structures

## **Executive Management Team**

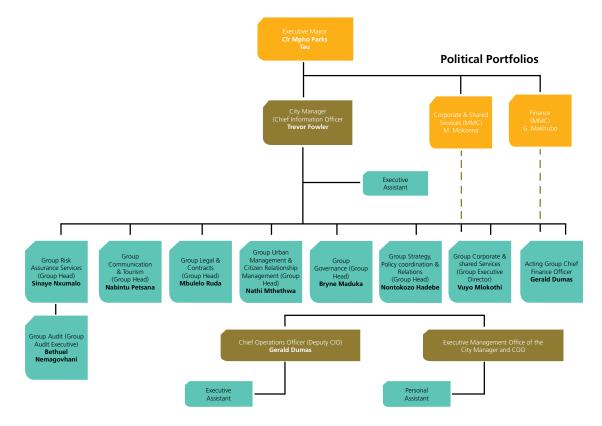

**City Manager of City of Johannesburg Metropolitan Municipality**Trevor Fowler

The City Manager is the accounting officer of the municipality, providing guidance on compliance with political structures, as well as the responsibilities of political office bearers, officials of the municipality, and all City entities. The City Manager heads the City's administration and is Chairperson of the Executive Management Team. He is responsible for the day-to-day management and administration of the municipality. The City Manager operates in terms of relevant sections of the Municipal Structures Act, Municipal Systems Act and Municipal Finance Management Act.

In discharging his responsibilities in the 2012/13 financial year, the City Manager was assisted by the Executive Management Team, as represented by the diagram below:

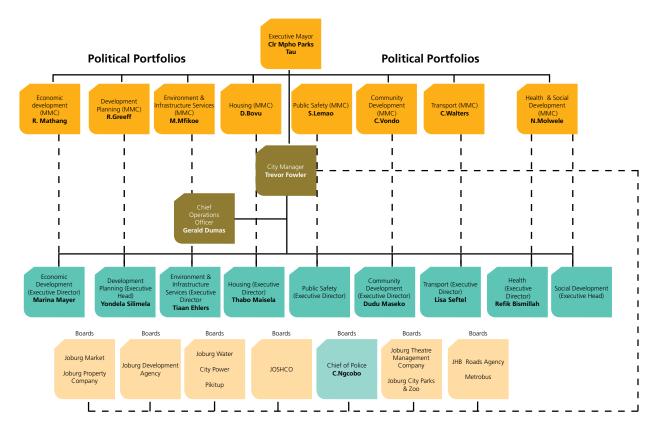

Figure 9: office of the city Manager, Group functions and relevant political portfolios

# Municipal entities (MEs)

The City established wholly owned municipal entities under the Companies' Act of 2008 that exist purely as service delivery agents for the City, who in this case, is the principal or shareholder. The entities are governed through a Service Delivery Agreement signed between the shareholder (City) and the company. Although the entities have an individual corporate identity, they remain fully controlled by the Metropolitan Council. The full list of entities and their respective mandates are contained in **Appendix B.** 

Figure 10: City of Johannesburg line functions reporting to the City Manager, MEs and relevant political portfolios

### Corporate governance

To adequately discharge our governance responsibilities in line with applicable legislation and leading practice, the City established independent structures to provide unbiased opinions and guidance to Council. These structures include:

- Group Audit Committee
- Group Performance Audit Committee
- Group Risk Governance Committee
- Municipal Entity Board of Directors
- Municipal Entity Audit Committee
- Entity Social and Ethics Committee

These Committees comprise individuals who are not employees of the City. Committee members have broad competencies spanning specialised disciplines across the functional areas of Strategy, Finance, Legal, Risk Management, Engineering, Accounting, Performance management and Human Resources.

The City ensured the stability of the Entity Boards and Group Committee in the year under review. This was achieved by retaining experienced members so that the strategic direction can be sustained uninterrupted. The City encourages a developmental approach to capacitation of the Boards and Committees, including the annual rotation of seasoned board members. This creates opportunities for new and less experienced individuals to serve with experienced members.

During the year, we renewed our focus on governance and improved our governance footprint by creating a secretariat department called Group Governance. This department not only focuses on the entities and how they are governed but is also responsible for the governance standards for the entire City Group. Since its formation, Group Governance has embarked on a process to create and promote a stable environment for effective governance within the City. An essential aspect of this process is the development of a Governance Strategic Framework for the City, which will support and inform the City's 'Joburg 2040' GDS vision.

#### **By-Laws**

The MSA 2000 s11 (3) (m) provides municipal councils with the legislative authority to pass and implement by-laws for the betterment of the community within the terms of the legislation. In 2012/13 the City considered two by-laws: the Waste Management By-Law and the Ombudsman By-law. Public consultations were conducted from March to February and from July to August 2013.

#### **Anti-Corruption and Fraud**

The risk of fraud and corruption was ranked seventh (7th) in the top 15 strategic areas identified in the financial year. Therefore, some of the strategic policy interventions include:

- Developing a city-wide anti-corruption and anti-fraud strategy.
- Establishing a Mayoral Anti-Corruption Advisory Panel.
- Implementing a centralised whistle-blowing mechanism by way of a centralised and independent 24-hour fraud hotline service, anti-corruption and anti-fraud awareness campaign to mobilise City officials and citizenry.
- Introducing fraud awareness workshops.

There is a concerted effort to conduct fraud risk assessments focusing on processes, such as supply-chain management, so that the City can implement appropriate systems of controls to either prevent or detect incidents of fraud, corruption and theft.

Since the launch of the anonymous tip-off hotline, which is available in all 11 official languages, we have seen a dramatic increase in the number of tipoffs received from the public. The calls received range from service delivery related issues to illegal water and electricity connections, other irregularities and allegations of fraud and corruption. We acknowledge the need to increase capacity for forensic investigations, and are developing strategies accordingly. We are also working with the country's law enforcement agencies. A number of officials have been suspended and disciplinary action taken, and ten employees have been arrested.

#### State of internal controls within the City

The City's Internal Audit function follows an effective combined and integrated assurance approach to enhancing the provision of value-add assurance services to the City. The Internal Audit function is mandated in terms of an approved internal audit charter and has functional accountability to the Group Audit Committee. During the financial year, audit focus was placed on effective implementation of the City's annual audit coverage plan, which is risk based.

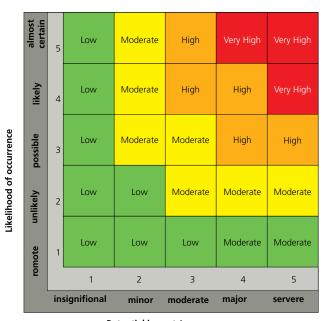

#### Enterprise risk management (ERM) achievements

The embedding of risk management processes improved during the year although there are still certain areas that require effort by management and the Group Risk and Assurance Services Department. During the year, city-wide strategic risk assessments were conducted and the City's top 15 strategic risk register was monitored on an on-going basis.

Table 8 reflects our integrated approach to enterprise risk management (ERM) by linking the top five identified risks to the City's strategic outcomes and Mayoral priorities. It ranks each risk according to the relative priority settings within the overall hierarchy of risks.

The residual risk 'heat map' is a guide to the priority levels for each of the risks outlined in the table below.

Figure 11: Residual risk 'heat map'

Potential impact / consequences

Kindly consult the section on Risk Management on page 25 of the City's Integrated Annual Report 2012/13 (Book 2) for a detailed description of potential sources of risks and a view of established controls and on-going mitigation activities.

Table 8: City of Johannesburg's top five risks

|              |                                 | Strategic ¡  | perspective  | Risk Landscape  |
|--------------|---------------------------------|--|--|---|
| Risk<br>Rank | Impacted<br>Service<br>Clusters | Risk description   | Strategic outcomes   | Mayoral Priority Programmes   |

| 4            |                                 | Asset management risk: Asset management and ageing infrastructure  | <ul> <li>Improved quality of life and development driven resilience for all</li> <li>Provide a resilient, liveable, sustainable urban environment -underpinned by infrastructure supportive of a low-carbon economy</li> </ul> | <ul> <li>Sustainable human settlements</li> <li>Resource sustainability</li> <li>Smart city</li> <li>Investment attraction, retention and expansion</li> <li>Financial Sustainability and resilience</li> </ul> |
| 5            |                                 | Risk of resistance to spatial transformation: Social, economic and infrastructural challenges creating a resistance to spatial transformation. | <ul> <li>A leading metropolitan<br/>government that pro-actively<br/>contributes to and builds a<br/>sustainable, socially inclusive,<br/>locally integrated and globally<br/>competitive GCR</li> </ul>                       | <ul> <li>Sustainable Human Settlements</li> <li>Green Economy</li> <li>Active Engaged Citizenry</li> <li>Financial Sustainability</li> <li>Smart City</li> </ul>  |

### Service delivery performance review

35 953 passengers per day transported on Rea Vya

16,489,457 Passengers commuted by Metrobus

Drinking water quality standard met and exceeded at 99.9%

27 091 solar water heaters installed in various areas

5 343 New public lights installed

3 307 households electrified

## Review of Service Delivery Performance

Provide a resilient, liveable, sustainable urban environment underpinned by infrastructure supportive of a low-carbon footprint

Please see detailed commentary on the Sustainable Services Cluster in the Integrated Annual Report (Book 2) on page 40 available on www.joburg.org.za and at all Regional Offices.

#### Overview of the Sustainable Services Cluster

The City's Joburg Vision 2040 strategy promotes interventions to adapt and shape the urban environment through structural changes that promote equality, access to economic opportunities and the efficient use of land and energy resources.

The most efficient urban form is compact, with mixed land-use and an extensive public transport network that includes high intensity movement corridors, with attractive environments for walking and cycling. Energy efficiency is not the only reason for promoting compact cities - there are also social and economic sustainability reasons, which encompass issues of access, inclusion, health, social cohesion, household savings and air quality.

The Sustainable Services Cluster has the following key outputs:

- The provision of sustainable and integrated delivery of water, sanitation, energy and waste.
- Enabling eco-mobility.
- Ensuring climate change resilience and environmental protection.
- Promoting sustainable human settlements.

The Sustainable Services Cluster achieves its mandated outputs through the following priority programmes:

### Urban water management

The objective of this programme is to roll out programs in support of water Demand Side Management to ensure that we reduce water demand, curb water losses, and reduce the level of Unaccounted for Water, whilst simultaneously investigating alternative water supplies and the use of recycled water. The secure and safe supply of water and the protection of essential water resources is the backbone of any economy. Johannesburg has the dual challenge of water scarcity and the increasing cost of water provision and network maintenance. The City has become the motor of the South African economy, accounting for more than a third of the GDP. Water is central to economic production and the well-being of our residents, yet most of the City's water is imported from elsewhere.

In our IDP we placed particular emphasis on implementation of demand reduction measures to avert a water crisis and reduce water wastage through on-going repair and maintenance of existing infrastructure to prevent water losses and pollution of water sources. The City is also investigating alternative water resources to preserve our potable water and to promote green infrastructure. We will be implementing the principles of SUDS that institutionalises the urban water cycle of waste water, potable water and storm-water, and grey water reuse (particularly for new developments); and

- Water harvesting programs with these being implemented worldwide, through well-established mechanisms (although this approach would need to be practiced alongside others, given the obvious dependency of water harvesting on rain).
- Rehabilitation of rivers, streams and impoundments for a healthy state of water resources

## Integrated waste management

The City is running out of landfill space and existing airspace is depleting at a rapid pace. The objective of this programme is to adopt a new approach to waste collection and management in the City. Projects include waste minimisation through

reduction, reuse, reduce and reclamation to support the City objectives of job creation, urban management, public health, sustainability and resilience. Projects under this programme include development of integrated waste disposal and treatment systems and solutions that simultaneously address waste issues and the city's need for reliable, affordable energy (e.g. solutions such as mining of methane, and the use of waste-to-energy plants). Revenue generation benefits are also associated with many of these technologies, with waste being both a hazard and a commodity with an attached value.

The concept of bottom-up waste management as both household practice and commercial opportunity provides a strong cross-linkage to the Mayoral Food resilience flagship programme led by the Human and Social Development cluster, A City Where None Go Hungry. The food resilience programmes include amongst others the new forms of food consumption subsidy to be rolled out as a food for waste exchange. This will allow qualifying individuals to trade a portion of pre-separated, recyclable waste for a quantity of fresh food.

### Greenways and mobility

The long-term objective of the greenways and mobility programme is to make walking, cycling and public transport the modes of choice for Johannesburg's residents. This involves:

The construction and maintenance of environmentally appropriate transport infrastructure which accommodates all road users, including public transport

- users, pedestrians, cyclists and motorists.
- The provision of quality public transport services including Rea Vaya and Metrobus.
- The improvement of mobility and making roads accessible to all.

The programme aims to reduce the current 31% carbon emissions from the transport sector, thereby becoming a key enabler of a restructured city that promotes healthy living and a reduced carbon footprint. Central to the implementation of the programme and its related deliverables, is the necessity for stakeholder partnerships and a renewed collaboration with the City's communities. This requires a paradigm shift in the way stakeholders view their relationship to – and hence their responsibility toward – city infrastructure. It further requires behavioural change and a collective reclaiming of roads as safe, attractive public spaces.

## Shift to low carbon infrastructure

This programme aims to reduce energy demand, decrease greenhouse gas emissions and enhance energy security for the future. However, programme incentives go beyond simply the challenges of energy supply; there are a myriad of opportunities inherent in a shift to low carbon solutions, both in terms of supply and demand. This programme aims to move the City from a carbon intensive economy, which releases large quantities of greenhouse gases into the atmosphere (mainly from coal and oil) to a less carbon intensive economy, with minimal greenhouse gas emissions. Reducing the carbon load requires three major shifts:

- Changing the composition of energy supply, shifting towards renewables.
- Changing consumer behaviour to limit energy consumption, including creating options such as public transport, which enable lower-carbon choices.
- Developing and retrofitting infrastructure to ensure maximum energy efficiency.

The programme further enables deprived spaces to access offthe-grid energy, as renewables are the main ingredients in the energy mix proposed for these areas in the short term.

# From informal settlements to sustainable human settlements

The objective of the programme is to bridge the deficit in living conditions between the least deprived and most deprived residents of the city. In the short term, the operational priority is to provide for basic levels of service regardless of whether or not permanent settlement is possible on a given site. This frequently requires creating off-grid, portable and non-permanent solutions to bridge service gaps. In the medium term the focus is on creating fully functional and liveable residential areas that will replace current informal settlements, either through upgrade or relocation. This entails not only a full mix of basic services, but also detailed integration of commercial and social facilities that can give life to economic aspirations of residents while promoting social cohesion. Our integrated implementation approach allows multiple departments to play a role in the implementation of this programme. This process of collaborative intervention, partnership, policy development and standard setting will ensure an improvement in the quality of household life for residents of afflicted informal settlements.

This programme includes significant integration and involvement of Municipal Entities (MEs) to ensure improved:

- Roads and sidewalks for mobility and walkability by JRA and JDA;
- Provision of water and sanitation by Joburg Water;
- Provision of free basic energy including solar water geysers by City Power;
- Provision of waste services, reduction of illegal dumping and job creation by Pikitup; and
- Provision of social and economic facilities.

## **Performance highlights**

**Table 9: Sustainable Services Cluster performance highlights** 

| Flagship Programme   | Performance Achievement   |  |  |
|--|---|--|--|
| Urban water  | The year's percentage of unaccounted for water (UFW) was at 32.4 %.   |  |  |
| management   | Meter reading performance increased to 86.32%.  |  |  |
|  | Drinking water quality recorded at 99.9% (target: 99%) and the overall final treated effluent quality recorded at 93.3% (target: 97%).  |  |  |
|  | BBBEE recognition target of 75% for this service area was exceeded, with an achievement of 92% (R288.8 million) and percentage spend on Qualifying Small Enterprises (QSE) and Exempted Micro Enterprises (EME) suppliers was 115% (R50.3 million) against a target of 60%. |  |  |
|  | Unplanned water service interruptions response times recorded at 84.16% (target: 91%) and sewerage blockages emergency response times recorded at 95.26% (target: 95%).   |  |  |
|  | Joburg Water provided water services LOS-1 (communal standpipe within 200m), with performance at 98.10% against a plan of 98.05%.   |  |  |
|  | Installation of 27 091 solar water heaters (geyser) in Alexandra, Devland, Lehae, Pimville, Pennyville,<br>Tshepisong and Vlakfontein.  |  |  |
|  | Installed 5 343 public lighting units during the year.  |  |  |
|  | A total of 3 307 households have been electrified during the financial period.  |  |  |
| Integrated waste<br>management                             | Pikitup remained within the target of maintaining the 123 informal settlement areas at the multiple days per week schedule, and increased the service to 133 informal settlements during the last quarter of 2012/13.   |  |  |
|  | 22 Hostels were cleaned on a regular basis during the year and were able to maintain a 'Level 3' cleanliness ranking.   |  |  |
|  | Pikitup achieved 53.62% on landfill compliance and 68% for operational sites.   |  |  |
| Greenways and mobility                                     | Rea Vaya services reflected a reliability of fleet and performance according to schedule. However, labour instability affected overall numbers of passengers transported. An average of 35 953 Rea Vaya passengers were transported per day during the year.                |  |  |
|  | 4.92 km of roadways and 4 stations completed on Phase 1 and 2 of Rea Vaya infrastructure project.   |  |  |
|  | 16 489 457 Passengers were commuted by Metrobus during the year.  |  |  |
|  | Gravel roads were upgraded to surfaced standards in Braamfischerville, Diepsloot, Ivory Park and Orange Farm.   |  |  |
|  | Open storm water drains were converted to underground systems in Braamfischerville, Diepsloot, Alexandra and Orange Farm. Designs were drafted for the rehabilitation of Naledi bridge, New Canada and Emmarentia Dam.  |  |  |
| Shift to low carbon  | Completion of Phase 1 of the City's Spatial Development Framework.  |  |  |
| infrastructure   | A 12% reduction of E.coli was achieved for the review period. The majority of monitoring is done in indigent communities to ensure good quality of surface water.   |  |  |
|  | Six waste buy back centres were established and achieved an 8% diversion of waste destined for landfills.   |  |  |
|  | The City accumulated 88 987 Verifiable Emission Reductions (VERs) from the 'landfill gas to energy' project at two landfill sites, namely Marie Louis and Robinson Deep.  |  |  |
|  | In terms of monitoring environmental compliance of flagship projects (Alexandra Renewal Project, Cosmo City and Gautrain) the City achieved an environmental compliances rate of 93.75% during the year (2011/12:94.6%).  |  |  |
| From Informal settlements to sustainable human settlements | 3 470 Mixed income housing opportunities were delivered   |  |  |

#### **Future outlook**

The City faces a number of spatial challenges arising from our legacy of the apartheid era and its spatial planning. This has led to urban sprawl, traffic congestion and the high cost of transport particularly for poor communities who are forced to live on the periphery of the city and far from centres of work and learning. Traffic congestion is exacerbated by the predominance of private cars and a City form shaped by the prioritisation of private car users.

The City will continue to roll out the BRT to its identified strategic transit oriented development (TOD) nodes and corridors, including the upgrading of station precincts. We envisage a City of low carbon emissions and endeavour to reduce energy demand, decrease greenhouse gas emissions and enhance energy security for the future. The City of Johannesburg is ranked amongst the largest emitters of greenhouse gases in South Africa. With the short-term interventions, waste will be converted into an economic resource. The City will continue to deliver on its mandate of sustainable integrated waste management services whilst introducing a shift towards addressing the imperatives of the GDS 2040. The City will lead

its citizens to implement 'separation at source' projects across the City, and communities will be mobilized to sort waste at a household level as a first step towards overall waste reduction and the creation of a clean city.

# Sustainable services cluster performance against annual planned targets of the SDBIP

Please see detailed commentary on performance against SDBIP targets for the Sustainable Services Cluster in the Integrated Annual Report (Book 2) on page 119 available on www.joburg.org.za and at all Regional Offices.

| IDP Flagship<br>Programme | Project/s            | Annual targets  | Achievement as 30 June 2013   |
|---------------------------|----------------------|---|---|
| Greenways and mobility    | Roll out of Rea Vaya | 45 000 Passengers per day on<br>Phase 1A of the Rea Vaya BRT<br>system.   | Annual target partially met.  • An overall annual average of 35 953 passengers carried per day. The under achievement is attributed to external pressures such as the number of strikes experienced – including the three weeks national bus driver strike during the fourth quarter, which lasted for longer than envisaged. (Figure to be confirmed)  |
| Greenways and mobility    |                      | <ul> <li>Original approved target</li> <li>Phase 1B completed and Phase</li> <li>1C planned.</li> <li>Revised approved</li> <li>4.92. Km Phase 1B</li> <li>4 Stations constructed</li> <li>4 Stations (as per list attached ) and 100</li> <li>% depot completed</li> <li>(Dobsonville depot for Rea Vaya phase 1B completed)</li> <li>134 Buses purchased</li> </ul> | <ul> <li>Annual target partially met.</li> <li>The annual target on both the roadways, stations and depot was achieved. 4.92kms of roadways and 4 stations completed. Improvements underway in preparations for Phase 1B operations during second quarter of 2013/2014 Financial Year. 1 Depot (at Dobsonville) completed. On the 134 buses purchased: Significant progress was achieved:</li> <li>Buses have been ordered and a prototype bus was inspected.</li> <li>Negotiations with affected operators although not concluded are on-going.</li> <li>Delays of the delivery of buses due to the change in the bus requirements to include local content towards job creation.</li> </ul> |
|                           |                      | <ul> <li>Phase 1C Sustainability<br/>study and business plan<br/>completed¹.</li> </ul>   | <ul> <li>Annual target partially met.</li> <li>The Rea Vaya phase 1C sustainability study was completed. Consultation with various stakeholders both internal and external on the findings of the study has commenced.</li> <li>Phase 1C business plan not completed.</li> </ul>  |

| IDP Flagship<br>Programme  | Project/s  | Annual targets  | Achievement as 30 June 2013  |
|--|--|---|--|
|  | Public transport<br>Facilities   | Facility completed <sup>2</sup> .                                       | <ul> <li>Target not achieved.</li> <li>By the end of the financial year, the facility was still under construction and was not completed on targeted date. |                                   | Implementation of<br>sustainable urban<br>drainage system<br>(SUDS) principles for<br>new developments.<br>Development of<br>Sustainable Urban<br>Drainage System guidelines | 60 Developments where urban drainage system (SUDS) principles have been adopted.   | <ul> <li>Target achieved and exceeded.</li> <li>Actual performance recorded was 84 developments where urban drainage system (SUDS) principles have been adopted for the financial year.</li> </ul>   |
|                                   |  | 100% Completion.   | <ul><li>Target achieved.</li><li>100% Development of Sustainable Urban Drainage<br/>System guidelines.</li></ul>   |
| Integrated<br>Waste<br>Management | Waste diverted from landfills: Reduce, reuse, recycle and reclaim (Community participation in separation at source – SLA's with PPP's)                                       | <ul> <li>99 517<sup>4</sup> Tonnes of dry recyclable waste diverted from landfill sites.</li> <li>80 000 Green waste tonnes diverted.</li> </ul> | <ul> <li>Annual target partially met.</li> <li>The targeted total for waste diverted from landfill sites as at the end of year was not achieved.         However, total waste diverted - through City and Industry interventions was 88 934 tonnes out of 1 163 941 tonnes amounting to an 8% diversion for the financial year.     </li> <li>Green waste diverted was 23 356; lower than target of 80 000 due to challenges with compost plant during period under review.</li> </ul> |
|                                   | Construction of buy-<br>back centres, drop-off<br>centres and garden<br>sites (sorting facilities)   | 3 Buy-back centres/garden sites  | <ul> <li>Target achieved.</li> <li>4 Garden sites upgraded: Allie Street, Meredale, Migson Manor and Randburg are operational.</li> <li>5 Buy back centres conceptualized and designs completed in the 2012/13 financial year to be constructed in 2013/14 financial year: Diepsloot, Protea North, Mapetla Chiawelo and Orange Farm<sup>5</sup>.</li> </ul>   |

 $<sup>^4\</sup>text{Targets}$  are indicative and they will be verified through a survey.

<sup>&</sup>lt;sup>5</sup> The development plan requires land to be allocated, lease agreements to be concluded, designs to be completed before construction takes place. Capital funding has been allocated in 2013/14 to construct the facilities as well as the design for further facilities indicated in phase 2 of the project.

#### **Economic Growth Cluster**

155 properties transferred through the Land Regularisation Project in Soweto, Orange Farm, Ivory Park and Alexandra.

3 967 SMMEs supported through the SMME development programmes.

21 SMMEs mentored for a full calendar year in partnership with the Gauteng Enterprise Propeller.

900 Kilometres of fibre optic cable rolled out as part of Joburg's Broadband Network project

36 588 work opportunities created through the Expanded Public Works Programme - up from 35 149 in 2011/12

8 987 Verifiable Emissions Reductions

8% diversion of waste to landfill up from 7%

An inclusive, job-intensive, resilient and competitive economy that harnesses the potential of citizens

Please see detailed commentary on the Economic Growth Cluster in the Integrated Annual Report (Book 2) on page 80 available on www.joburg.org.za and at all Regional Offices.

## Overview of the Economic Growth Cluster

There are major economic opportunities that come with a transition away from a carbon-intensive economy to a sustainable economy. Within Johannesburg the Economic Growth Cluster is mandated to lead the City in the pursuit of its vision of an inclusive, job-intensive, resilient competitive economy. In so doing, it must also champion the City's approach in transforming the economy of Johannesburg and in addressing the triple challenges of unemployment, poverty and inequality. We view our transition to a sustainable Johannesburg not as an environmental policy but as a blueprint to economic prosperity.

Johannesburg's socio-economic profile makes it imperative for us to prioritise programmes that increase job opportunities, improve skills within our communities, reduce the cost of doing business and improve business competitiveness. While Johannesburg has unemployment levels that are below the average rate of unemployment in South African metropolitan cities, the City places particular emphasis on job creation to further reduce unemployment. Unemployment statistics in Johannesburg were recorded at approximately 25% in 2011, down from 29.6% in 2001. Using the broader definition that includes discouraged workers, the rate is pushed to above 30% in 2011. Youth unemployment remains a major challenge both nationally (above 35%) and for the City.

The Department of Economic Development (DED) is the 'command centre' for economic growth in the City, working proactively in collaboration with other key stakeholders such as the private sector, civil society, other City Departments, Municipal Entities (MEs), and other spheres of Government. At the same time it capitalises on the City's own economic levers such as City-owned assets and other indirect instruments to leverage and stimulate both local and foreign investment.

During our Integrated Development Planning (IDP) process we responded to these challenges by prioritising the following programmes that reflect our commitment to reduce unemployment, poverty and inequality.

### Multi-level skills development

Multi-level skills development comprises of the Jozi Skills Hub and Expanded Public Works Programmes (EPWP). To address skills shortage we established the LMID website-based system to assist jobseekers with placement in different economic sectors. We set out with an annual target for facilitating 1000 job placement. However, the target was revised at midyear to 500. By the end of the financial year the cluster facilitated a total of 794 job placements in the Tourism sector alone.

## Expanded Public Works Programme (EPWP)

The Expanded Public Works Programme (EPWP) initiative is our flagship programme to reduce unemployment and alleviate poverty by facilitating on-the-job training. In 2012/13, we set out to create a total of 35 000 work opportunities. At the end of the financial year, the total number of employment opportunities created during the year was 36 588, surpassing the planned target by 1 588 work opportunities.

### Leveraging city-owned assets

Our flagship initiative to transformation the Inner City through the Inner City Property Scheme (ICPS) has enabled us to acquire eight properties, either through abandonment, expropriation or prescriptions. During 2012/13 we initiated developments covering at least 10 properties previously awarded for ICPS1 and created employment by directing construction work to Broad Based Black Economic Empowerment (BBBEE) service providers.

## Transfer of properties to intended beneficiaries

We recognise the significant demand for transferring properties to rightful owners in the Greater Soweto area, Greater Orange farm, Ivory Park and Alexandra. We are also cognisant of the complex process and legal challenges associated with the facilitation of a single transfer. Such challenges result in transfers taking longer than expected. We set out to transfer 150 properties in the 2012/13 financial year and transferred 155 properties to targeted beneficiaries despite these challenges.

### Mixed development projects

Through the Economic Growth Cluster, we aim to support the development of a dynamic entrepreneurial spirit, competitiveness and innovation within our city's formal and informal economic sectors, as well as promote economic development through increased investment in SMME support. This entails creating partnerships to provide citywide enterprise development and support. A total of 3 967 SMMEs were supported through our SMME programmes, including informal traders assisted with trading licences, and 21 SMMEs mentored for a full calendar year in partnership with the Gauteng Enterprise Propeller. The Department also facilitated funding for the Soweto Energy SMME Incubator to the value of R27 million from the Eskom Foundation and the Department of Trade and Industry.

## **Performance highlights**

**Table 10: Economic Growth Cluster performance highlights** 

| Flagship Programme         | Performance Achievement  |  |  |
|----------------------------|--|--|--|
| Sector diversification and | 3967 SMMEs supported through SMME development programme  |  |  |
| competitiveness            | 27 million spent to support Soweto Energy SMME Incubator   |  |  |
| Deduce unempleyment        | 794 job placements in the Tourism Sector.  |  |  |
| Reduce unemployment        | 36 588 work opportunities created  |  |  |
| Optimal use of the City's  | More than 150 properties transferred to beneficiaries (Soweto, Orange Farm, Ivory Park, Alexandra) |  |  |
| assets                     | Broadband infrastructure layout also completed (over 900 km) as planned across the City.           |  |  |

## Economic Growth Cluster performance against annual planned targets of the SDBIP

Please see detailed commentary on performance against SDBIP targets for the Economic Growth Cluster in the Integrated Annual Report (Book 2) on page 136 available on www.joburg.org.za and at all Regional Offices.

| IDP Flagship<br>Programme  | Project/s   | Annual targets   | Achievement as 30 June 2013  |
|--|---|--|--|

<sup>&</sup>lt;sup>6</sup> 2012/16 CBP Concept, Region E Stakeholder Consultation, Region E Ward Plans, Region E CBP Pilot Case Study, 2013/14 CBP Citywide Implementation Plan

<sup>&</sup>lt;sup>7</sup> Implementation refers to piloting of the charter, confirmation of adherence to standards, finalising charter and customer charter launch as per quarterly targets.

 $<sup>^{\</sup>rm 8}$  Community Outreach to 65 wards to promote responsible active citizenry and sustainable urban governance.

### **Human and Social Development Cluster**

The "Ijozi Ihlomile" health programme expanded to 30 additional new wards across the City. A total of 1 697 244 people reached with face to face education.

The Johannesburg 10+ project implemented toward creating safer communities.

72% reduction in illegal advertising.

678 adults and 356 children were removed from streets and placed in shelters.

1 782 Individuals participated in small-scale poverty alleviation projects.

The Department of Community Development provides services and programmes with respect to sport, recreation, arts, culture, heritage, libraries and information services. The Department also provides access to various community-based facilities, ranging from multi-purpose centres, sporting grounds, museums; as well as other public space enhancements, such as public art forms and monuments.

- 460 000 People accessed museums, galleries and art centres across the city.
- 7 129 049 People utilised libraries.

Johannesburg is widely considered to be one of South Africa's most vibrant and diverse cultural centres.

Improved quality of life and development-driven resilience for all

Please see detailed commentary on the Human and Social Development Cluster in the Integrated Annual Report (Book 2) on page 86 available on www.joburg.org.za and at all Regional Offices.

## Overview of Human and Social Development

The Human and Social Development Cluster integrates the work of several city departments and entities that take strategic and practical lead from the City's constitutional mandate of promoting social development and upliftment of its residents. Reflecting on these goals, the mandate of the Human and Social Development Cluster is to:

 Transform the poorest communities, reducing inequalities by addressing imbalances in access to income and economic opportunities access to social infrastructure and access to services.

- Provide a robust and sustainable safety that seeks to uplift the working age and able bodied to self-sufficiency while enabling a basic level of care for the vulnerable.
- Raise the level of social cohesion across the City decade on decade.
- Improve the total health profile of the City.
- Improve the total public safety profile of the City.

During the year, this translated into a commitment to improve social as well as health and safety conditions city wide. Emphasis was placed on poverty alleviation and a strong push to promote social inclusion and self-sustaining transformation. Johannesburg is achieving this through a combination of the following strategies:

- Smartly integrated services using technology to link city staff, NGO's and the private sector into a common and efficient system which can respond to specific issues quickly and effectively.
- Enforcement that is progressive and ultimately transformative rather than simply reactive.

- Strategic management of public space to increase positive social contact and combat social problems.
- Mobilising the private sector and civil society to act in positive and transformative ways that are aligned to the City's goals.
- Reducing risks faced by citizens and the burden on the city by ensuring as far as possible that all sections of the public understand the dangers they can bring upon themselves and their communities through their lifestyle, their behaviour and their failure to follow the city's bylaws.
- Deploying programmes and interventions that promote literacy and enable people of all age groups to get the most out of the education options available, working with low-literacy adults as well as learners and children attending early childhood development (ECD) programmes within the City's boundaries.

#### **Performance highlights**

Table 11: Human and Social Development Cluster performance higlights

| Flagship Programme                        | Performance Achievement   |
|---|---|
| Addressing poverty and dependency         | 678 Adults and 356 children were removed from the streets and placed in shelters and/or provided with other assistance to become more self-sustained.   |
|   | 1 782 Individuals participated in small-scale poverty alleviation projects.   |
| Community development, cultural diversity | 7 129 049 People utilised libraries; 400 956 people utilised sport and recreation centres; 460 000 people accessed museums, galleries and art centres across the city.  |
|   | The 2012/13 phase of Orange Farm Library Project was completed.   |
| Healthcare                                | The "Ijozi Ihlomile" programme was expanded to 30 additional new wards across the City and a total of 1 697 244 people were reached with face to face education.  |
| Environmental health                      | 30 primary schools had access to Integrated Environmental Education programmes  |
|   | 688 'blitzes' carried out to control rodents in 404 hot spots   |
| Policing                                  | 5 341 arrests for drinking and driving, 13 arrests for possession of illegal firearms, 116 arrests for possession of illegal drugs, and 50 arrests for possession of stolen vehicles.   |
|   | Compared to the previous year (2011/12), the Inner City experienced a decrease of 268 (-13%) assaults and an increase of 189 (60%) in robberies. This resulted in a total decrease of 79 (-3%) in assaults and robberies.   |
|   | Policing around by-laws resulted in 8 486 fines for illegal street trading, 1 399 fines for illegal dumping and littering, 2 531 fines for illegal electricity connections, and 1 446 fines for illegal advertising.  |
|   | Key operations implemented to improve compliance to traffic regulations and improve traffic management resulted in 58 074 fines issued for driving without valid driver and vehicle documentation, 723 691 for moving violations, 119 928 for vehicle roadworthiness, and 3 471 568 for speeding. |
| Food security                             | A programme promoting food security was rolled out during the year with the aim of combating hunger and addressing chronic lifestyle diseases resulting from poor dietary habits and the lack of physical activity.   |

Human and Social Development Cluster performance against annual planned targets of the SDBIP

Please see detailed commentary on performance against SDBIP targets for the Human and Social Development Cluster in the Integrated Annual Report (Book 2) on page 141 available on www.joburg.org.za and at all Regional Offices.

| Key Flagship<br>Programme   | Project/s   | Annual targets   | Achievement as 30 June 2013   |
|---|---|--|---|
| A safe, secure and resilient city that protects, serves builds and empowers communities | A safe, secure and resilient city: Promoting social cohesion through access to common social spaces and common cultural opportunities | 10 Developments in open spaces (parks) constructed.                          | <ul> <li>Target achieved and exceeded.</li> <li>Developments were constructed in 13 open spaces as follows: 8 Parks, 1 cemetery and 3 in road islands as a beautification project.</li> <li>The immediate community residing within the parameters of the facility is served by the developments (parks, road islands). Between +/-500 to 2 000 community members access the facility on day-to-day basis. Cemeteries: The greater Johannesburg population will be served by the facility.</li> </ul> |
|   |   | 2 New public spaces developed to increase and maintain the cultural capital. | <ul> <li>Public art was installed in 2 public spaces as outlined below:         <ol> <li>Revitalisation of Westgate Precinct (the old Ferreirastown). New artwork installed opposite Chancellor House, public space upgraded, and street furniture introduced.</li> </ol> </li> <li>Back to the city: development of open spaces in Newtown Mary Fitzgerald Square. Artwork/murals to revitalise the spaces.</li> </ul>   |
|   |   | 1 Programme across all regions.  | <ul> <li>Target achieved.</li> <li>1 Programme was implemented in terms of Regional carnival camps across all Regions in December 2012.</li> </ul>  |
|   |   | 2 Public performances supported through the public spaces programme.         | <ul> <li>Target achieved.</li> <li>3 Performances were supported as follows: 1)         Joburg Arts Alive; 2) Joburg Carnival; 3) Africa Day celebration.     </li> </ul>   |

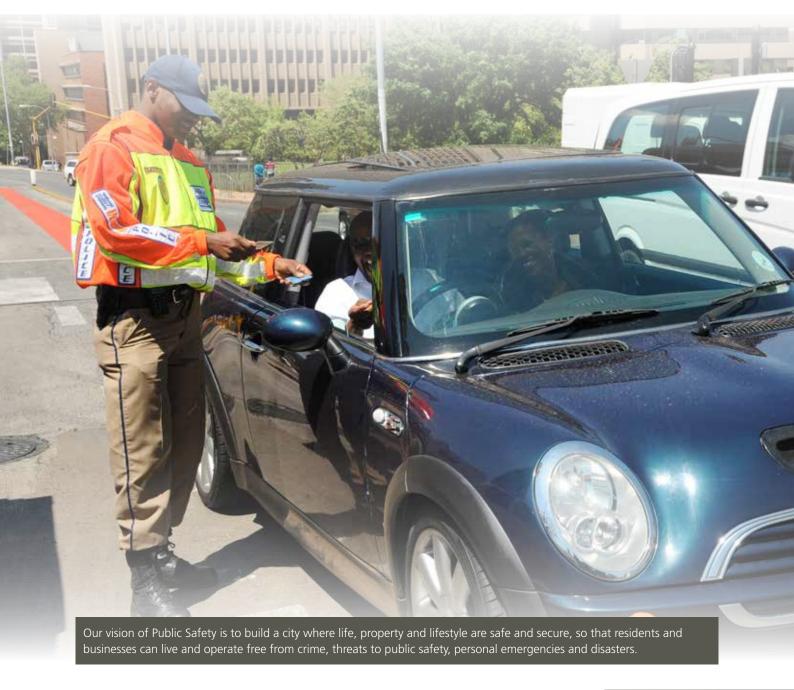

| Key Flagship<br>Programme | Project/s   | Annual targets   | Achievement as 30 June 2013   |
|---------------------------|---|--|---|
|                           | A safe, secure<br>and resilient city:<br>Promoting social<br>cohesion through<br>dialogue, engagement<br>and outreach | 1 000 Senior citizens participating in day care centres.   | <ul> <li>Target achieved and exceeded.</li> <li>A total of 1 251 senior citizens were assisted.</li> <li>The Day Care for Senior Citizens provides: Fitness and recreational programmes; a family support programme, a care and support programme, social security and extended social services packages.</li> </ul>  |
|                           |   | 10 (2 new) old age centres supported with chronic medication health promotion and Environmental health system (EHS). | <ul> <li>Target achieved.</li> <li>A total of ten old age homes and elderly day care centre are supported with chronic medication, health promotion and EHS.</li> </ul>   |
|                           |   | 7 Sites established for women empowerment.   | <ul> <li>Target achieved.</li> <li>The Women Empowerment Zones are located as follows:</li> <li>Region A: Hikhensile Social Development Centre; Region B: Randburg Techno Centre; Region C: Cosmos City Skills Development Centre; Region D: Meadowlands Welfare Centre; Region E: Paterson Park; Region F: Bertrams Skills Centre; Region G: Poortjie Skills Development Centre.</li> </ul>  |
|                           |   | 5 Projects socially or economically empowering women.  | <ul> <li>Target achieved and exceeded.</li> <li>6 Projects were supported as follows:</li> <li>1. SA National Women's Development Co-op (Mothers of the Nation): offered use of space at Orchards project and linked the women supported with The Business Place for business planning and financial training. The Directors of the women's co-op received training at the Orchards centre by The Business Place.</li> <li>2. Supported female artist Usha Seejarim with her solo exhibition at the Joburg Art gallery.</li> <li>3. Supported women artist and photographer, Iris Dawn Parker to exhibit her "Quotidian life" exhibition at Museum Africa as part of the support for female artists programme.</li> <li>4. Supported Art with Heart Africa by providing free office space at the Worker Museum. This organisation has now moved from the museum to the vacant Joburg Artbank building so the support continues.</li> <li>5. Through the 2012 Arts Alive programme, we supported 253 female artists.</li> <li>6. Supported Phumzile Buthelezi with her exhibition at Worker Museum by providing free space, curatorial support and financial support for the framing of the artworks in the exhibition.</li> </ul> |

| Key Flagship<br>Programme | Project/s   | Annual targets   | Achievement as 30 June 2013   |
|---------------------------|---|--|---|
|                           |   | 5 Africa Day counter xenophobia programmes.  | <ol> <li>Target achieved and exceeded.</li> <li>7 Programmes implemented as part of Africa Day include:         <ol> <li>Ubuntu Cup – participating schools from 7 regions. Schools teams representing African countries. Using soccer as a vehicle to counter xenophobia. Held at Bezuidenhout Park in Region F with 1 000 participants.</li> <li>Mamas and Papas – held at the Zoo, on 26 May 2013.</li> <li>New Africa Movement Art Exhibition displays at Museum Afrika as part of Africa Day.</li> <li>Indigenous Music Festival - held in partnership with Jazz and Indigenous Music Incubator (JIMI) to support the development of indigenous music. The festival was held at Soweto Theatre on 25 May 2013.</li> <li>Indigenous Reading Programme – held at the City's libraries in celebrating the Africa Month. Books in African languages being read.</li> <li>Africa History Work in May to commemorate Africa Day.</li> </ol> </li> <li>World Refugee Day was celebrated. The events were coordinated in partnership with stakeholders that are active participants in the JMAC and JMAP.</li> </ol> |
|                           | A safe, secure<br>and resilient city :<br>Empowering and<br>supporting learners | 2 200 (Revised to 1 200 ECD practitioners accessing accredited training).                    | <ul> <li>Target not achieved.</li> <li>As of the end of the 4th quarter a total of 919 practitioners had been trained. The training covered the following areas:</li> <li>1. ECD Level 4 by Gauteng Department of Education.</li> <li>2. Training on Nutrition – Adill Institute.</li> </ul>  |
|                           |   | 450 ECD facilities empowered through educational and skills development support.             | <ul> <li>Target achieved.</li> <li>A total of 493 ECD facilities were supported. The ECD centres are assessed using an assessment tool measuring them from level 1-4. The centres are then assisted as per their needs and progressively moved to the next level.</li> </ul>  |
|                           |   | 800 ECD facilities provided with education on by-law enforcement and compliance.             | <ul> <li>Target achieved.</li> <li>800 Facilities were provided with education on by-law enforcement and compliance. The number compliant facilities inspected is derived as follows:</li> <li>200 Inspections on facilities were targeted per quarter and were all achieved.</li> </ul>  |
|                           |   | 2 Libraries with public access to ICT, procurement of equipment and furniture for libraries. | <ul> <li>Target achieved.</li> <li>2 Libraries were connected to internet, namely; Orlando East and Johannesburg Central Library.</li> <li>The implemented of ICT panned out as follows:</li> <li>LIS procured 315 (thin client laptops) for the 20 libraries.</li> <li>A user survey has been done at Orlando East Library.</li> <li>Updated landing pages with eLearning content.</li> <li>Training of staff and community members on E-learning.</li> </ul>  |

| Key Flagship<br>Programme | Project/s  | Annual targets  | Achievement as 30 June 2013  |
|---------------------------|--|---|--|
|                           |  | 3 Programmes with 13 projects to increase functionality through reading development, community literacy and education, and information literacy programmes. | <ul> <li>Target achieved.</li> <li>3 Programmes with 13 projects implemented across City's libraries as follows:</li> <li>Reading Development Programme; Ready to Read, Battle of the Books, Story Skirmish and Indigenous reading programme.(4 projects)</li> <li>Community Literacy Programme; Computer based literacy, Traditional literacy/ABET and family literacy. |                           | Exchanging food for waste                     | 5 000 Households benefiting from exchange food for waste programme. | <ul> <li>Target achieved and exceeded.</li> <li>7 223 Households benefited. The partnering with Red Farmers has resulted in increased number of beneficiaries in targeted Regions A, C, G.</li> </ul>                        |

#### **Good Governance Cluster**

#### Collected 92% of revenue billed

The City allocated 90% of its total capital expenditure for the 2012/13 financial, which is an improvement of 4% compared to the previous year.

Cash and cash equivalents increased to R5 401 407 from R2 220 393 in 2012

13% improvement in Net Assets position to R30.4 billion

3.4 billion net surplus

100% implementation of CBP in Region E

A high performing metropolitan government that pro-actively contributes to and builds a sustainable, socially inclusive, locally integrated and globally competitive Gauteng City

Please see detailed commentary on the Good Governance Cluster in the Integrated Annual Report (Book 2) on page 112 available on www.joburg.org.za and at all Regional Offices.

## **Overview of the Good Governance Cluster**

We acknowledge that a city that cannot govern itself is not sustainable and recognise the role of governance in defining and making a transition to a more sustainable society by 2040. Governance matters not only as a critical system in itself but in enabling progress in our environmental, economic, and social systems. Sustainability requires that we maintain a balance between our environmental, economic and social systems, using sound governance as the critical enabling paradigm. For Johannesburg, effective governance is a set of capacities that facilitates sustainability in its broad dimensions. Therefore, we place particular focus on issues of participation, equity and transparency, critical dimensions of sustainability.

We consider good governance to be the fourth pillar of sustainability on par with environmental, economic, and social systems of sustainability. Governance enables the City to function and achieve the other sustainability imperatives. Values of efficiency, participation, empowerment, transparency, accountability and equity are central to our definition and analysis of sustainability. In this report we present Johannesburg's governance capacities, structures, and processes as they relate to sustainability.

We are committed to meeting the core expectations of governance — consultation and engagement – to implement collective decisions and provide basic services to sustain the ecological, social, and economic aspects of the concept of sustainability. Our understanding of governance in a sustainable organisation is demonstrated by our current political and administrative governance arrangements. This cluster has the following five outputs:

- An active and effective citizen-focused Gauteng City Region (GCR)
- A responsive, accountable, efficient and productive metropolitan government.
- A financially and administratively sustainable and resilient city.
- Meaningful citizen participation and empowerment.
- Guaranteed customer and citizen care and service.

The Good Governance Cluster, through its stated outputs above, envisages a future where the City will promote caring, responsive, efficient and progressive service delivery through a proactive developmental approach within its own metropolitan region and the GCR to enable both to reach their full potential as integrated and vibrant spaces.

#### Priorities include:

- A need to perform strategic reviews of the powers, function, structures and legislative environment impacting on a developing government in the face of citizens' growing expectations of service delivery, mobility and infrastructural development.
- A need for meaningful stakeholder collaboration, participation and engagement – extending to the provision of sufficient capacity and support to all stakeholders (including internal stakeholders, such as councillors and officials, and factoring uniformity of service delivery as well as differing community needs into the City's planning processes;
- A need to strengthen intergovernmental cooperation, especially within the context of Gauteng City Region (GCR).
- A need to build financial sustainability and resilience which require new approaches in procurement and contracting (translating as better value for money); longterm funding options; alternative funding sources and sound financial management practices.
- A need for a well capacitated, resourced and efficient organisation to enable a high performance culture and a continuous learning organisation.

#### Mandate and organisation of the cluster

The mandate of the Good Governance Cluster is informed by

the need to respond to the overarching challenges faced by the City, and the need to ensure financial sustainability, create institutional efficiencies, address negative public perceptions, promote a progressive corporate climate, and promote labour stability within the City of Johannesburg as a Group, all of which necessitate an institutional configuration which facilitates effective planning and delivery.

#### Citizen participation and empowerment

The Citizen Participation and Empowerment programme aims to democratise the City's planning and budgeting processes through the implementation of community-based planning and by managing customer and employee perceptions about the City's services through employee and customer education awareness programmes. Employees receive qualitative training on the City's delivery activities and desired standards as well as how to render professional services to customers.

The Revenue Step Change project supports citizen participation and empowerment by responding to customers' needs. While emphasis is on the customer, the project internally advances business process improvements. The following are the key outputs of the project:

- Customer centricity the aim being to provide a wholesome customer experience citywide.
- Efficient and prudent response to customer queries.
- Providing concise customer feedback.
- Improving service delivery standards.
- Issuing accurate bills at predictable intervals.

**Table 12: Good Governance Cluster performance highlights** 

| Flagship Programme  | Performance Achievement  |
|---|--|
| A responsive, accountable, efficient and productive metropolitan government | Innovation and knowledge sharing: Annual Target of 100% implementation not fully achieved. However progress was made and three innovative projects were identified based on the set criteria. The three projects identified were the Outdoor Green Gyms: promoting healthy lifestyles in the City, Landfill Gas to Energy Clean Development Mechanism and the Bus Rapid Transit (BRT). |
|   | Governance, Risk and Compliance: Group integrated assurance framework and combined assurance model completed. Implementation achievements to date (100%).  |
|   | Combined assurance and integrated planning for 13/14 completed (core admin); City-wide strategic risk analysis for 2013/14 performed   |
|   | Total of 19 Forensic Investigations completed in the core administration.  |

| Flagship Programme                   | Performance Achievement  |
|--------------------------------------|--|
|                                      | Completed investigation and conducted follow-ups on disciplinary action relating to AGSA audit finding on SCM Section 44 non-compliance (officials doing business with the City).  |
|                                      | Fraud awareness and City's Code of Conduct awareness training in high risk departments, attended by 222 employees.   |
| Financially and administratively     | Financial Sustainability: 92% of revenue collected from revenue billed – annual target achieved.   |
| sustainable and resilient city       | Cash and cash equivalents increased to R5 401 407 from R2 220 393 in 2012  |
|                                      | 13%improvement in Net Assets position to R30.4 billion   |
| Meaningful citizen participation and | Community Based planning implemented 100% in Region E.   |
| empowerment                          | 130 Ward plans have been developed for all wards in the City of Johannesburg as originally planned. Ward plans include ward profiles and costed capital projects for individual wards.   |
|                                      | A Community Based Planning (CBP) pilot has been successfully completed in Region E and will guide comprehensive CBP implementation across the City. We also concluded a detailed case study to capture key learning's from this pilot as the intention is to replicate the CBP model in other regions within the City of Johannesburg.   |
|                                      | The Customer Service Charter was finalised and approved by the Mayoral Committee. Following the approval, the charter was widely distributed throughout the regions as well as electronically via the intranet and CoJ website. There are 57 Service Level Standards. Of the 57 Service Level Standards 25 have reached a 100% target. This translates to 41.07% and the departments and entities have committed to reach a 100% by August 2014. |
|                                      | The City's Civic Education and Awareness programmes were enhanced, with more than 50 outreach programmes being undertaken and a total of 80 wards being reached.   |
|                                      | Enhancement of the Civic Education awareness: annual target exceed with a total of 80 wards reached against the projected 65 wards.  |

#### **Future outlook**

We will continue to refine our governance capability to ensure the long-term financial, environmental and social sustainability of Johannesburg. As a consequence, a core governance capacity of a sustainable city will be that of integrating cross-system policies through a comprehensive city-wide governance model that recognises our current configuration. We are confident that the City's ability to make strategic long-term policy decisions within a multi-system framework will define us as a sustainable and resilient City by 2040.

We acknowledge that the path to a sustainable future lies in preserving our natural capital – including our people, our natural resources and our intellectual capital – and valuing it more appropriately than in the past. We further acknowledge that our political cultural and institutional setting requires and supports widespread citizen engagement. The collective aspects of sustainability require expanded participation from the City's citizens to promote the collective realisation that a transition toward sustainability is in all our best interest.

## Good Governance Cluster performance against annual planned targets of the SDBIP

Please see detailed commentary on performance against SDBIP targets for the Good Governance Cluster in the Integrated Annual Report (Book 2) on page 157 available on www.joburg.org.za and at all Regional Offices.

### Organisational development performance

"Our employees are our greatest assets"

## Operational performance overview

Our biggest asset is our employees who carry the responsibility of delivering our mandate to communities. To remain a leading City, we need to continue to invest in our people. They are the foundation and drivers for our success. We strive to create value by attracting, developing and retaining competent people. Through our Human Resources Management function we are committed to inspiring and growing our people through individual development and career management programmes and by recognising and rewarding performance excellence. We seek to provide a complete and innovative HR function that addresses skills development and enhances optimal administrative performance. We are firmly committed to recruiting from communities in which we operate while ensuring that we place a deliberate focus on developing a local skills base where this may not exist. Our human resources strategy has a vision of delivering professional, diverse and competent human capital for a world-class African City through the development of human resources in all aspects.

#### Vacancies and turnover

We successfully recruited 20 of the 22 Section 54A and Section 56 positions as well as CEOs/MDs for 10 of the 11 Municipal Entities. Processes are in place to recruit individuals for the remaining positions and will be concluded early in the 2013/14 year. The two outstanding positions under recruitment are the Group CFO and the Executive Director Public Safety. The Group CFO position was advertised twice in 2012/13 but a suitable candidate could not be identified due to scarcity of group financial skills. The recruitment of Executive Director: Public Safety could not be concluded in 2012/13 either as the report proposing the appointment was withdrawn at a Council meeting to clarify the status of the proposed candidate.

Our staff turnover rate was low at 3.57% in 2012/13 (excluding seasonal terminations). Our ability to attract and retain skills at levels below that of Section 57 is good. However, with staff turnover being potentially low, there is a risk of stagnation and an increase in the average age of employees. The City experiences certain areas (hotspots) where turnover is higher than the average. For this purpose we have various interventions to retain skills including talent management, succession planning and delegations in terms of remuneration.

| Vacancy Rate  |                                   |        |   |  |  |  |
|---|-----------------------------------|--------|---|--|--|--|

| Highly skilled supervision: levels 9-12 (Finance posts)           | 6490                              | 346.16 | 5.33  |  |  |  |
| Total   | 18114                             | 866.4  | 4.78  |  |  |  |

#### Workforce expenditure

During the year, the City analysed its workforce expenditure (employee cost) and found that:

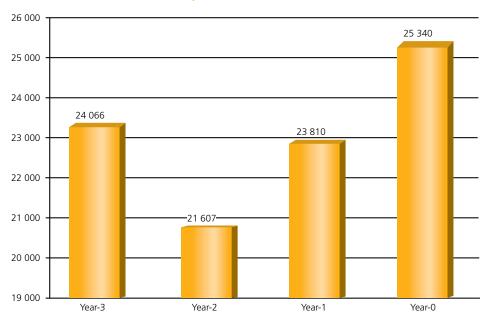

- Personnel costs have been rising above annual inflation in the last seven years.
- Head count has been increasing while the municipal powers and functions, as well as services, have remained relatively the same.
- There are negative correlations between productivity, revenue collection and personnel costs.
- There is a perception that hundreds of the City's employees are under-employed.
- The employee cost vs. operating cost (less bulk purchases) is unacceptably high at 37.8%.

To address the latter point, we sought to reduce the ratio of employee cost vs. total operating cost (less bulk purchases). Preliminary results indicate that the City has managed to reduce this ratio to 32%. This was achieved through:

- Natural attrition and optimum utilisation of existing staff.
- Capping the salaries of ex-FTC employees that are being remunerated outside the band – that is, they will not qualify for annual increases until their salaries are again within the required range (in line with the FTC Settlement Agreement with the Unions).
- All appointments being subject to oversight by the Staffing Vacancy Committee.
- Charging the salary cost of staff that manages capital projects to the relevant capital project.
- Charging the salary cost of staff that manage maintenance projects to the relevant maintenance line item.

**Figure 12: Workforce Expenditure Trends** 

The employee cost steadily increased at a rate above inflation as illustrated in the table above; however, the Employee Cost Reduction Project has kept the rate of increase of employee cost at only 4.22% during the past year, which is below inflation. This has had a positive effect on the ratio of employee cost vs. operating cost, which is now at 32%.

Please see more comprehensive commentary on the following Human Capital related performance areas in the Integrated Annual Report (Book 2) on page 168 available on www.joburg.org.za and at all Regional Offices:

- Entities and citywide turnover as well as vacancies
- HR Policies effective at the beginning of the financial year 2012/13
- Commentary on workforce policy development
- Employees affected by injuries, sickness and suspensions in 2012/13
- Number of days and the cost of leave days taken by municipal employees in 2012/13

### Chief Financial Officer's summary

Chief Financial Officer of the City of Johannesburg

I am pleased to report that the City made significant progress during the year, both operationally and financially, despite a challenging operational and economic environment. A clear financial strategy, coupled with advanced planning, reliable monitoring and reporting mechanisms, as well as prompt decisive actions by our political leadership enabled the City to strengthen its

financial platform for sustainable performance going forward.

#### Revenue

Our revenue composition has remained relatively unchanged from the previous year, with service charges and property rates accounting for approximately 70% of the total revenue generated. Government grants for the current year contributed 20% to total revenue, which is lower than the previous year's 22% contribution. We demonstrated less reliance on grants in the year under review.

Figure 13: Revenue % composition

#### **Revenue Composition**

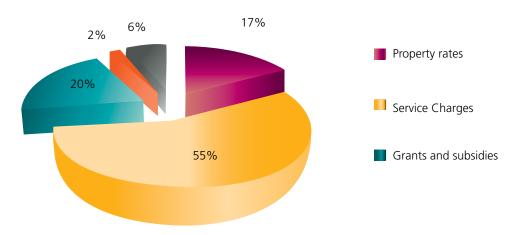

Figure 14: Revenue trend analysis

#### **Year to Year Trend Analysis**

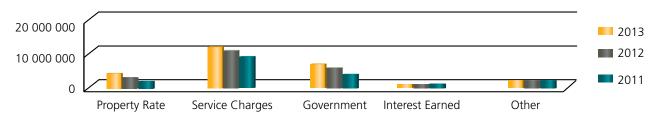

Table 12: Breakdown of property rates

| Figures in Rand | 2013 2012 |      |           |        |  |
|-----------------|-----------|------|-----------|--------|--|
| thousand        | Actual    |      | Actual    | Actual |  |
|                 | R'000     | %    | R'000     | %      |  |
| Residential     | 2 249 405 | 37%  | 1 839 826 | 34%    |  |
| Commercial      | 3 715 484 | 62%  | 3 441 982 | 64%    |  |
| State           | 51 087    | 1%   | 50 782    | 1%     |  |
| Municipal       | 18 970    | 0%   | 80 024    | 1%     |  |
|                 | 6 034 946 | 100% | 5 412 614 | 100%   |  |

The composition of revenue from property rates remained relatively unchanged, although residential property rates contributed marginally higher compared to the previous year, due mainly to newly rateable properties added to the residential and commercial categories. The 11% increase in revenue from total property rates is attributable to a 6% tariff increase and efforts made by the City to bring in rateable properties that were outside the net. Commercial customers continue to be the largest contributors to revenue derived from property rates at 62% (2012: 64%).

Service charges increased by 6% (See table below). The revenue increase was mainly due to the tariff increases for electricity, water and refuse removal charges.

Table 13: Breakdown of service charges

| Figures in Rand                 | 2013       | 2012 |            |      |
|---------------------------------|------------|------|------------|------|
| thousand                        | Actual     |      | Actual     |      |
|                                 |            | %    |            | %    |
| Service Charges comprise        |            |      |            |      |
| Sale of electricity             | 12 214 776 | 64%  | 11 831 619 | 65%  |
| Sale of water                   | 3 973 745  | 21%  | 3 136 732  | 17%  |
| Surcharges: Electricity         | 6 835      | 0%   | 125 281    | 1%   |
| Surcharges: Water               | 25 847     | 0%   | 31 226     | 0%   |
| Surcharges: refuse              | 2 787      | 0%   | 2 424      | 0%   |
| Refuse removal                  | 963 666    | 5%   | 890 487    | 5%   |
| Sewerage and sanitation charges | 1 898 223  | 10%  | 2 001 116  | 11%  |
| Other services                  | 134 219    | 1%   | 116 588    | 1%   |
|                                 | 19 220 098 | 100% | 18 135 473 | 100% |

The main contributor of service charges is electricity at 64%, as it was in the previous financial year, with water being the second highest contributor at 17%.

Refuse removal has increased despite Round Collected Refuse (RCR) removal, which was affected by the condition of the fleet. Pikitup worked hard to ensure that Round Collected Refuse remained regular and consistent; and the introduction of a new fleet management and monitoring regime assisted in resolving the fleet challenges of the past.

### **Expenditure**

Figure 15: Expenditure % composition

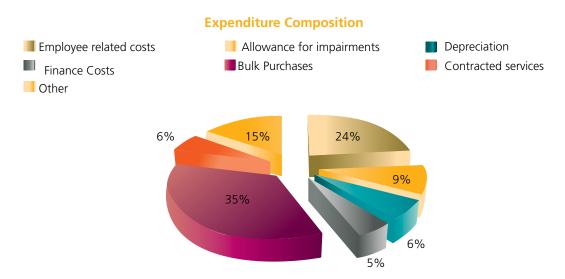

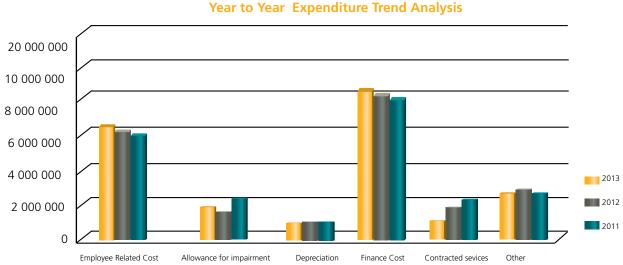

Figure 16: Expenditure trend analysis

In 2012/13, the City's high value cost drivers were bulk purchases, employee-related costs and contracted services. Bulk purchases are throughput costs for the City, and are recovered through revenue generated from water and electricity.

Employee related costs increased by 8% which is attributable to the absorption of third party staff in Pikitup and general annual salary increases.

The decline in contracted services is testament to our increased ability to do work in-house which was previously outsourced.

Our customers continue to face economic pressure and as a result collection levels for consumer debts are still depressed, albeit improved, hence an increased allowance for impairment. We continue to follow a conservative and prudent approach in our impairment assessment model.

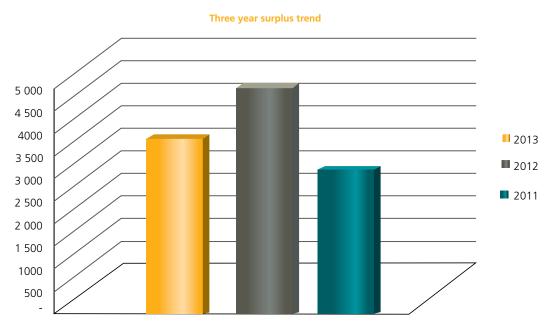

Finance charges decreased by 8% compared to the previous

year and are under budget by 7%. This is due to the City incurring the long-term capital debt late in the financial year, which resulted in a saving. We relied on internally generated cash for most of the year which is further testament to our improved liquidity management approach.

#### **Annual surplus generated**

Despite the challenging economic climate, we generated a healthy net surplus of R3.4 billion, which is a 26% decline from the previous year's R4.6 billion. The decrease is largely due to a 30% increase in impairment charge. The achievement of a surplus is in line with our Growth and Development Strategy and augurs well towards achieving financial sustainability and resilience.

Figure 17: Three-year surplus trend

Johannesburg is committed to its robust R100 billion capital expenditure programme which will be partially funded from internally generated reserves, hence the importance of this surplus. The City aims to commit its own funds out of surpluses alongside the contributions made by investors and Government in order to realise our capital expenditure programme.

#### **Statement of Financial Position**

| Figures in Rand thousand   | 2013       | 2013               | 2013               | 2012       | Growth | Variance |

| Assets                     |            |                    |                    |            |        |          |
| Non-current assets         | 46 304 989 | 45 507 281         | 45 350 184         | 44 136     | 5%     | 2%       |
| Current assets             | 13 886 132 | 9 806 587          | 11 646 198         | 12 237     | 13%    | 42%      |
|                            | 60 191 121 | 55 313 868         | 56 996 382         | 56 374 108 | 7%     | 9%       |

Our Net Assets position has improved by 13% to R30.4 billion. The increase in net assets is a result of the surplus reported in the statement of financial performance.

Non-current liabilities increased by a modest 2%, while current liabilities increased by 1% when compared to the

previous year.

The City's total assets increased by 7%, which is mainly due to a rise in trade receivables as well as a significant increase in cash and cash equivalents as at year end.

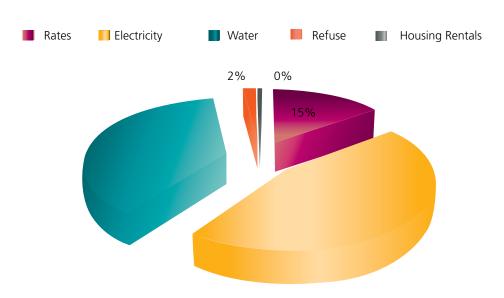

Table 14

| Figures in Rand thousand                     | 2013      | 2012      |
|--|-----------|-----------|
| Cash and cash equivalents at end of the year | 5 401 407 | 2 220 393 |

The cash and cash equivalents increased by 143% to R5.4 billion reflecting the results of an improved liquidity management approach adopted by the City. The surplus achieved in the current year also contributed to the significant increase in cash and cash equivalents.

Figure 18: Composition of debtors

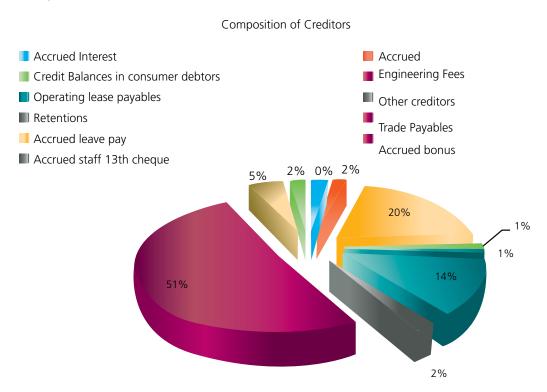

#### **Composition of Debtor's Balances**

Electricity has the highest number of outstanding debtors and the electricity debtors have increased as compared to the previous year. This is due largely to the significant spike in tariff increases impacting negatively on consumers.

Electricity and water debtors account for 83% of the total consumers debtors balance. This is in line with the revenue generated from these services. The year-on-year increase can be partly attributed to the tariff increases implemented in the current year. The debtors collection rate improved considerably during the year, contributing to the City's cash position.

Figure 19: Composition of creditors

The main contributors to the creditors are the trade payables, credit balances and other creditors.

The increase in expenditure in the last quarter, accompanied by the increased level of accruals at year end, is the reason for the significant growth of the trade payables.

## **Capital expenditure**

Capital expenditure amounted to R4.2 billion in the current year against the approved budget of R4.5 billion.

The increase in the percentage spent from 89% in the previous year to 93% in the current year reflects the City's ability to spend its Capex budget to improve service delivery.

#### **Financial ratios**

Table 15

| Financial ratios          | 30-Jun-13 | 30-Jun-12 | Target |
|---------------------------|-----------|-----------|--------|
| Current ratio             | 1.04      | 0.92      | 1,00   |
| Solvency ratio            | 2.02      | 1.92      | 2,00   |
| Debt: Revenue             | 38.77%    | 41.21%    | 45,0%  |
| Remuneration: Expenditure | 36.59%    | 35.76%    | 30,0%  |
| Maintenance: Expenditure  | 2.19%     | 1.63%     | 7,0%   |
| Interest: Expenditure     | 4.69%     | 5.44%     | 5,0%   |

The current ratio reflects an improvement from the previous year and is currently above the City's own target of 1. This is mainly due to an increase in current assets, especially with regards to cash and cash equivalents.

The debt to revenue ratio at 38.77% is significantly down from 41.21% reported in the previous year. This ratio is below the self-imposed target limit of 45%; however with the City rolling out its planned capital expenditure programme of over R100 billion in ten years, borrowings will increase and therefore push this ratio up, albeit within the target level.

The remuneration to expenditure ratio is calculated excluding bulk purchases, at 36.6% up from 35.8% in the previous year. We are implementing initiatives to effectively contain and reduce this ratio and to improve productivity levels.

Although the ratio of maintenance to expenditure has improved to above 2% in the current year, it remains well below the target of 7% set internally. It is our objective

going forward to increase spending levels on maintenance to address the current gap towards the target. It is worth noting that 85% of our assets are underground and require continuous attention to ensure that the value of the assets is safeguarded through routine maintenance.

Overall the City has shown improvements in all but one key ratio in the reporting year. Remuneration costs and maintenance costs require deliberate actions by the City in the years ahead.

# **Audit opinion**

Our efforts and dedication towards achieving a clean audit are beginning to bear fruits with the achievement of an Unqualified Audit Opinion for the 2012/13 year. The detailed audit opinion is available on p x of the Integrated Annual Report (Book 2). The City is proud of this achievement and will continue to work very hard toward achieving a clean audit by 2014.

## **Credit rating**

The City has maintained commendable credit ratings from both its international rating agencies as reflected below.

The City's credit rating for the period ending June 2013 was as follows:

| Fitch   | AAzaf/F1+.zaf | Stable Outlook   |
|---------|---------------|------------------|
| Moody's | A1.za/P-1.za  | Negative Outlook |

The credit ratings by both international rating agencies reflect the City's status as solid investment grade quality counterparty. The negative outlook by Moody's is based on concerns about the sovereign contagion, which is not a City-specific issue. The rating agencies have also raised concerns with respect to deteriorating economic conditions and also the weakening of public finances in general. The City is proud to have maintained such a good credit rating in a very challenging economic environment, thereby ensuring that its listed bonds remain attractive to investors.

# Revenue and billing

Our Roadmap for Revenue and Billing was launched in November 2011 to resolve billing queries from customers and to wipe out the backlog of outstanding queries. Between January and March 2013, we rolled out a regional campaign in our walk-in centres with the intention of resolving non-technical queries, reducing customer waiting times, providing technical product knowledge, and promoting a culture of efficiency and professionalism. By the end of the financial year the City received 15 000 billing queries per month, which were resolved within 30 days. This is a significant improvement from the levels achieved in previous years. We will continue to improve interactions with customers and work towards minimising the billing queries.

# Analysis of the annual financial statements for the financial year 2012/13

# **Statement of Financial Position**

|   | 2013       | 2013               | 2013               | 2012       | Budget   | Change |      | %Of Total |

| NET SURPLUS AFTER TAXATION  | 3 438 456  |                    |                    | 4 614 681  |          |        |      |           |

The detailed City Consolidated Annual Financial statements are available in Book 2 on page xxxx and on <a href="https://www.joburg.org.za">www.joburg.org.za</a>

**Looking forward** 

In light of the ambitious targets that the City has set itself in implementing the corridors of freedom and other priority plans, financial sustainability remains our first priority. We will continue to strengthen financial management practices and discipline throughout the City to ensure long-term financial sustainability and resilience.

We remain committed to the continued strengthening of the City's financial position, the attainment of a clean audit and the achievement of the long-term goals of a financially sustainable and resilient City.

Reggie Boqo

Joburg Open Day: Assisting members of the public with billing queries

# Auditor General's Report.

# REPORT OF THE AUDITOR-GENERAL TO THE GAUTENG PROVINCIAL LEGISLATURE AND THE COUNCIL ON THE CITY OF JOHANNESBURG METROPOLITAN MUNICIPALITY

#### REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

#### Introduction

1. I have audited the consolidated and separate financial statements of the City of Johannesburg Metropolitan Municipality set out on pages xx to xx, which comprise the consolidated and separate statement of financial position as at 30 June 2013 and the consolidated and separate statement of financial performance, statement of changes in net assets, cash flow statement, statement of comparison of budget and actual amounts for the year then ended, and the notes comprising a summary of significant accounting policies and other explanatory information.

#### Accounting officer's responsibility for the financial statements

2. The accounting officer is responsible for the preparation and fair presentation of these consolidated and separate financial statements in accordance with South African Standards of Generally Recognised Accounting Practice (SA Standards of GRAP) the requirements of the Municipal Finance Management Act of South Africa, 2003 (Act No. 56 of 2003) (MFMA) and Division of Revenue Act of South Africa, 2011 (Act No. 6 of 2011) (DORA), and for such internal control as the accounting officer determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor-general's responsibility

- 3. My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA), the general notice issued in terms thereof and International Standards on Auditing. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.
- 4. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.
- 5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

#### Opinion

6. In my opinion, the consolidated and separate financial statements present fairly, in all material respects, the financial position of the City of Johannesburg Metropolitan Municipality (municipality) and its entities as at 30 June 2013, and their financial performance and cash flow for the year then ended in accordance with SA Standards of GRAP and the requirements of the MFMA and DORA.

#### **Emphasis of matters**

7. I draw attention to the matters below. My opinion is not modified in respect of these matters.

#### Significant uncertainties

8. As disclosed in note 51 to the consolidated financial statements, the municipality and its entities are the defendants in various lawsuits. The ultimate outcome of these matters cannot currently be determined and reliably measured, therefore no provision for any liabilities that may result has been made in the financial statements.

#### Restatement of corresponding figures

9. As disclosed in note 52 to the consolidated financial statements, the corresponding figures for 30 June 2012 have been restated as a result of errors discovered during the year ended 30 June 2013.

#### Material impairments

10. As disclosed in note 10 to the consolidated financial statements, receivables have significantly been impaired. The impairment of receivables amounts to R14 440 605 000 (2012: R13 360 488 000), which represents 75% (2012: 71%) of consumer debtors. The contribution to the provision for debt impairment in the current year was R1 080 117 000 (2012: R2 869 675 000).

#### Material losses

- 11. As disclosed in note 53 to the consolidated financial statements, material losses to the amount of R2 144 771 000 (2012: R1 554 360 000) were incurred as a result of electricity distribution losses. The total technical losses incurred amounted to R754 332 (2012: R709 461). Non technical losses of electricity incurred amounted to R1 390 439 000 (2012: R844 899 000) and are due to non-metering of electricity and unauthorised consumption.
- 12. As disclosed in note 53 to the consolidated financial statements, material losses amounting to R820 600 000 (2012:R769 300 000) were incurred as a result of water distribution losses. The total technical losses incurred amounted to R389 004 152 (2012: R374 806 920). Non technical losses amounted to R431 600 000 (2012: R443 800 000) and are due to non-metering of water and unauthorised consumption.

#### Restructuring of entities

13. As disclosed in note 18 to the consolidated financial statements, the municipality finalised the process of re-structuring some of the functions conducted through its municipal entities. This process will result in the legal deregistration of some of the municipal entities.

#### Additional matter

14. I draw attention to the matter below. My opinion is not modified in respect of this matter.

#### Unaudited supplementary schedules

15. The supplementary information set out on pages xx to xx does not form part of the consolidated financial statements and is presented as additional information. I have not audited these schedules and accordingly I do not express an opinion thereon.

# REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS PAA REQUIREMENTS

16. In accordance with the PAA and the general notice issued in terms thereof, I report the following findings relevant to performance against predetermined objectives, compliance with laws and regulations and internal control, but not for the purpose of expressing an opinion.

#### Predetermined objectives

- 17. I performed procedures to obtain evidence about the usefulness and reliability of the information in the annual performance report as set out on pages xx to xx of the annual report.
- 18. The reported performance against predetermined objectives was evaluated against the overall criteria of usefulness and reliability. The usefulness of information in the annual performance report relates to whether it is presented in accordance with the National Treasury's annual reporting principles and whether the reported performance is consistent with the planned objectives. The usefulness of information further relates to whether indicators and targets are measurable (i.e. well defined, verifiable, specific, measurable and time bound) and relevant as required by the National Treasury Framework for managing programme performance information (FMPPI). The reliability of the information in respect of the selected programmes is assessed to determine whether it adequately reflects the facts (i.e. whether it is valid, accurate and complete).
- 19. The material findings are as follows:

Usefulness of information

Presentation

Measures taken to improve performance not disclosed Consistency

20. Section 46 of the Municipal Systems Act (MSA) requires disclosure in the annual performance report of measures taken to improve performance where planned targets were not achieved. Measures to improve performance for a total of 44% of the planned targets not achieved by the municipality were not reflected in the annual performance report. This was due to the fact that management was not able to apply the requirements of the FMPPI due to capacity constraints.

#### Changes to indicators not approved

21. Section 25(2) of the MSA determines that an integrated development plan adopted by a municipal council may be amended in terms of section 34 and remains in force until an integrated development plan is adopted by the next elected council. Therefore, if the integrated development plan is changed during the year this process has to take place in accordance with the process as prescribed per section 34 of the MSA. A total of 31% of indicators relating to Economic Growth cluster of the municipality were changed during the-year without following the process as prescribed in section 34 of the MSA. This was due to a lack of management review and monitoring of compliance with applicable laws and regulations governing predetermined objectives.

#### Measurability

Performance targets not specific

22. The FMPPI requires that performance targets be specific in clearly identifying the nature and required level of performance. A total of 39% of the targets relating to Sustainable Services were not specific in clearly identifying the nature and the required level of performance. This was due to the fact that management was not able to apply the requirements of the FMPPI due to capacity constraints.

#### Performance Indicators/measures not well defined

23. The FMPPI requires that indicators/measures should have clear unambiguous data definitions so that data is collected consistently and is easy to understand and use. A total of 25% of the indicators and targets relating to Sustainable Services cluster of the municipality were not well defined in that clear, unambiguous data definitions were not available to allow for data to be collected consistently. This was due to the fact that management was not able to apply the requirements of the FMPPI due to capacity constraints.

#### Performance targets not measurable

24. The FMPPI requires that performance targets be measurable. With regards to PIKITUP Johannesburg SOC Ltd the required performance could not be measured for a total of 27% of targets relevant to upgrading of landfill sites, extension of landfill airspace and regular domestic waste collection. This was due to management not implementing all required FMPPI prescripts.

#### Reliability of information

- 25. The FMPPI requires that institutions should have appropriate systems to collect, collate, verify and store performance information to ensure valid, accurate and complete reporting of actual achievements against planned objectives, indicators and targets. 26. With regards to Johannesburg Metropolitan Bus Services SOC Ltd material targets with respect to Finance, Customer Perspective and Growth and Safety and Security objectives were not reliable. The evidence provided to support performance information reported was not adequate. 27. This was due to the lack of standard operating procedures for the accurate recording of actual achievements and frequent review of validity of reported achievements against source documentation.
- 26. With regards to Johannesburg Metropolitan Bus Services SOC Ltd material targets with respect to Finance, Customer Perspective and Growth and Safety and Security objectives were not reliable. The evidence provided to support performance information reported was not adequate. 27. This was due to the lack of standard operating procedures for the accurate recording of actual achievements and frequent review of validity of reported achievements against source documentation.

#### Additional matters

28. In addition to the above material findings, I draw attention to the following matters and these do not have an impact on the predetermined objective findings reported above.

#### Achievement of planned targets

- 29. Of the total number of 162 targets planned for the year, 71 targets were not achieved by the municipality during the year under review. This represents 44% of the total planned targets that were not achieved during the year under review. This was mainly due to the fact that indicators and targets were not suitably developed during the strategic planning process.
- 30. Of the total number of 56 targets planned for the year, 23 targets were not achieved during the year under review for City Power Johannesburg SOC Ltd. This represents 42% of total planned targets that were not achieved during the year under review .This was as a result of the entity not considering the evidential requirements during the annual strategic process.
- 31. Of the total number of 24 targets planned for the year, nine were not achieved during the year under the review for Johannesburg Water SOC Ltd. This represents 37% of total planned targets that were not achieved during the year under review. This was mainly due to the fact that indicators and targets were not suitably developed during the strategic planning process.
- 32. Of the total number of 18 targets planned for the year, six targets were not achieved during the year under review for PIKITUP Johannesburg SOC Ltd. This represents 33% of total planned targets that were not achieved during the year under review. This was as a result of the institution not considering relevant systems and evidential requirements during the annual strategic planning process.

- 33. Of the total number of 26 targets planned for the year, 14 of targets were not achieved during the year under review for Johannesburg Metropolitan Bus Services SOC Ltd. This represents 54% of total planned targets that were not achieved during the year under review. This was due to reduced number of bus trips due to aging fleet.
- 34. Of the total number of 31 targets planned for the year, seven targets were not achieved during the year under review for Johannesburg City Parks Soc Ltd. This represents 23% of total planned targets that were not achieved during the year under review. This was as a result of the institution reprioritisation of the budget during the year under review.
- 35. Of the total number of 21 targets planned for the year, five targets were not achieved during the year under review for Johannesburg Property Company SOC Ltd. This represents 24% of total planned targets that were not achieved during the year under review. This was mainly due to the fact that indicators and targets were not suitably developed during the strategic planning process.
- 36. Of the total number of 41 targets planned for the year, 20 targets were not achieved during the year under review for Johannesburg Road Agency SOC Ltd. This represents 49% of total planned targets that were not achieved during the year under review. This was as a result of the institution reprioritisation of the budget during the year under review.

#### Material adjustments to the annual performance report

37. Material audit adjustments in the annual performance report of the municipality were identified during the audit, all of which were corrected by management.

#### Compliance with laws and regulations

38. I performed procedures to obtain evidence that the entity has complied with applicable laws and regulations regarding financial matters, financial management and other related matters. My findings on material non-compliance with specific matters in key applicable laws and regulations as set out in the general notice issued in terms of the PAA are as follows:

#### **Budget**

- 39. Expenditure was incurred in excess of the limits of the amounts provided for in the votes of the approved budget, in contravention of section 15 of the MFMA.
- 40. The total unforeseen and unavoidable expenditure incurred exceeded R15 million in contraventions of Municipal Budget and Reporting Regulation 72. Annual financial statements
- 41. The financial statements submitted for auditing were not prepared in all material respects in accordance with the requirements of section 122(1) of the MFMA. Material misstatements of revenue, receivables and property, plant and equipment identified by the auditors in the submitted financial statements were subsequently corrected, resulting in the financial statements receiving an unqualified audit opinion.

#### Assets management

42. An adequate management, accounting and information system which accounts for assets was not in place, as required by section 63(2) (a) of the MFMA.

#### Procurement and contract management

- 43. Contracts and quotations were awarded to bidders who did not submit a declaration on whether they are employed by the state or connected to any person employed by the state, as required by National Treasury's Municipal Supply Chain Management regulation (SCM regulation) 13(c).
- 44. Awards were made to providers who are in the service of other state institutions or whose directors/ principal shareholders are in the service of other state institutions, in contravention of section 112(j) of the MFMA and SCM regulations 44. Similar awards were identified in the prior year and no effective steps were taken to prevent or combat the abuse of the SCM process in accordance with SCM regulation 38(1).

- 45. Goods and services with a transaction value of below R200 000 were procured without obtaining the required price quotations as required by SCM regulation 17(a) & (c).
- 46. Goods and services of a transaction value above R200 000 were procured without inviting competitive bids, as required by SCM regulation 19(a). Deviations were approved by the accounting officer even though it was not impractical to invite competitive bids, in contravention of SCM regulation 36(1).

#### Expenditure management

47. Money owing by the municipality was not always paid within 30 days of receiving an invoice or statement, as required by section 65(2)(e) of the MFMA.

#### Leadership

48. The accounting officer did not adequately exercise oversight responsibility regarding financial and performance reporting. The municipality did not have sufficient monitoring controls to ensure that financial and performance reports submitted for audit are accurate and complete.

#### Financial and performance management

49. There is lack of proper record management system that provides for the maintenance of information reported in the financial statements and performance reporting. Non-compliance with laws and regulations such as the MFMA, SCM regulations and MSA regulations could have been prevented had compliance been properly reviewed and monitored.

#### **OTHER REPORTS**

#### Investigations

50. Twenty cases of alleged irregularities were being investigated. Five of these were conducted by external investigators and the remainder were investigated by the forensic section of the municipality's internal audit division during the 2012-13 financial year. Of these, three have been finalised. The nature of the cases covered a wide spectrum of activities, namely, bribery, theft, financial corruption, tender irregularities and various other issues.

Johannesburg

14 December 2013

Auditing to build public confidence

### **Future outlook**

"The 'Corridors of Freedom' will change current entrenched settlement patterns of the City made up by urban sprawl and uncontrolled spread of low-density developments on the fringes of the city to high-density developments and environments made up of a mixture of residential space with office accommodation, retail, leisure and recreational opportunities".

## Aligning vision and planning

To implement our 'Joburg 2040' Growth and Development Strategy (GDS), we revised our 2012/16 IDP to ensure we develop and implement a series of intervention and flagship programmes that will support us in meeting our envisioned outcomes.

We have reviewed and finalised our priorities for 'decade 1' and for the remainder of the present term of office. Using the principles of resilience, sustainability and liveability we have continued to refine our five-year Integrated Development Plan (IDP) as well as developing an annual Service Delivery Budget Implementation Plan (SDBIP) aligned to the five-year IDP. In the process, we placed particular focus on refining and enhancing priorities of the previous IDP's flagship and master programmes. These priorities include:

- Financial sustainability and resilience.
- Agriculture and food security.
- Sustainable human settlements.
- SMME and entrepreneurial support.
- Engaged active citizenry.
- Resource resilience.
- 'Smart City'.
- Investment attraction, retention and expansion.
- Green economy.
- Safer cities.

## Re-shaping urban form

Under our Executive Mayor's leadership, we are re-shaping the City's urban form, and actively breaking with the spatial forms of the apartheid era, thereby constructing a future based on equity, accessibility and sound economic principles. At the core of this drive to re-shape the City, is an emphasis on 'Corridors of Freedom'. As the name suggests, these 'corridors' will be developed to support freely accessible, inclusive, high-density, mixed-use spatial developments to reduce commuting times and costs. Through this initiative, we seek to slow down the process of urban sprawl and the uncontrolled spread of lowdensity developments on the fringes of the City. During the year, using a model of transit oriented development (TOD), the City began the process of knitting the urban form together and facilitating the mass transit of people and goods along corridors that strengthened the connectedness of different parts of the city. To this end we plan to invest R100 billion over the next 10 years in partnership with the private sector to create the required infrastructure to unlock economic opportunities, expand investment and create jobs as part of the restructuring of our urban form.

Our Spatial Development Framework (SDF) which encompasses transit oriented developments (TODs) will continue to transform Johannesburg into an urban environment characterised by walkability, accessibility and safe neighbourhoods; and where cycling and the use of non-motorised transport in the City will be promoted and supported. In 2012/13 we deliberately

reoriented a number of programmes toward the urban spatial form we seek to achieve. In the housing sector, the city is shifting away from the exclusive focus on RDP housing to rental and mixed-use housing. The impact of this will be higher density developments that will grow up around the corridors and development nodes, resulting in a more efficient and liveable city. This shift will continue into the future and will also focus on the following initiatives:

- Focussing development around multi-nodal centres of activity.
- Building effective transportation networks that work for all and connect economic opportunities.
- Developing public transport nodes and corridors.
- Emphasising the benefits of rental accommodation.

# Focusing development around multi-nodal centres of activity

Clustering a mix of land uses at accessible nodal locations provides the City with a network of commercial, residential, social and institutional hubs. The City's historic Inner City, contemporary Greenstone node, and the emerging nodes of Jabulani and Stretford represent examples of historic and future nodal developments where mixed-use development is being cultivated. Other specialist, industrial uses are typically found in the City's industrial nodes, many of which are clustered in and around the mining belt. Although the City's nodes have contrasting characters, land use profiles and management issues they accommodate the majority of the City's economic activities and employment prospects, as reflected in the City's Gross Value Added (GVA) performance measure, as well as provide a growing residential stock in a number of the key metropolitan and regional nodes.

The vibrancy and feasibility of the City's nodal points are directly linked to the functioning and health of the City's economy and also to specific locations within the City. Addressing the lack of nodal opportunities and mixed use development in the historically marginalised areas remain a key developmental challenge that is being addressed on a programmatic basis. Future economic growth, development and job creation is to be facilitated through focused and prioritised public and private sector investment as well as a re-investment in services and infrastructure within existing (mature and emerging) and planned nodes in the City.

# Effective transportation networks that work for all and connect economic opportunities

The City's efficiency relates directly to the efficiency of its transport system; that being the ability to move goods and people within and beyond Johannesburg's municipal boundary. We are committed to reducing the time and cost of transportation and expanding the modal choices available to our citizens and trade partners. The inherited and fragmented City structure and historic transportation networks has inhibited equitable access and choice to both communities and businesses within the City. An increased emphasis and investment in public transport and non-motorised transport - such as cycling and pedestrian infrastructure - is the City's short to medium-term response to these prevailing conditions. Future development and investment will need to demonstrate urban design responses to these emerging networks. The move towards a more effective single-ticketing approach to public transport modes will also assist existing users and inspire new potential users.

The emerging backbone of a new public transport system based on the City's Rea Vaya infrastructure, as well as existing commuter rail and the Gautrain, affords the City new and exciting opportunities to facilitate mixed-use, mixed income development at increased densities and greater bulk than considered previously. To support these bold objectives, we will require significant capital investment going forward. In addition, clear development guidelines and pragmatic expectations in facilitating both public and private developments in a manner that is supportive of transit orientated development principles, are critical success factors in realising our SDF transformation agenda.

The vertebral column of our public transportation system is formed by the commuter rail stations located centrally and to the south of the City; as well as the existing and emerging Metrobus and BRT routes; formal taxi ranks; the Gautrain rail stations; and feeder routes with their and associated precincts.

Where these different modes are located in close proximity to each other the transportation options available to commuters increase exponentially; as do the opportunities to introduce additional amenities, facilities and services to meet new and growing needs of these passengers.

Transit oriented design (TOD) is typified by higher-density, walk up housing typologies based on both rental and freehold options. The design is further supportive of office and retail developments as well as social amenities, and is underpinned by a high standard of urban design and effective management. Within the City context these TOD precincts would provide environments that promote an inclusionary social profile – that is, a mixed income profile, that is neither the preserve of only the most or least wealthy within the City and develops opportunities for citizens to live, work and play within walkable distances of each other.

Linking the prospective TOD precincts and inherent public transportation infrastructure are public transportation corridors that represent the broader routes traversed by the current and envisioned BRT, rail and Gautrain stations. Beyond the regularly spaced and convenient transit stops and stations provided by the respective modes of public transport, a 'complete streets' approach to design and use of roads would be key features within these corridors. The public transportation corridors that will be targeted for implementation during the current Term of Office are:

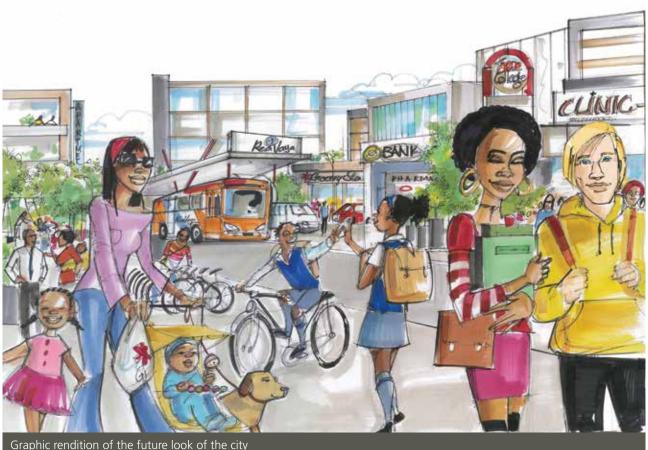

Louis Botha

- Empire-Perth
- Turffontein
- Randburg-Marlboro
- The Mining Belt
- Diepsloot-Randburg

# **Emphasis on rental** accommodation

We recognise that not all residents' needs are the same and that a significant proportion of the City's residents consider 'home' to be beyond the country's borders. Accordingly, there is a strong focus on expanding flexible living opportunities through rental accommodation within the full range of rental markets.

Although our Sustainable Human Settlements Urbanisation Plan (SHSUP) considered a split of tenure typologies throughout the City in illustrating potential development yields, the public transport corridors and nodes will be the focal areas of rental, high-density accommodation typologies. We have aligned most of these locations and the registered Social Restructuring Zones lodged with the Social Housing Registration Authority (SHRA). Beyond the formal intensification of development initiatives by role players such as JOSHCO and the Johannesburg Housing Company (JHC), the City will also re-consider the role and impact of informal

'backyard rental units' in formally developed, state-sponsored housing developments.

Going forward, we will continue to prioritise the following strategic imperatives:

- Financial Sustainability and Resilience: We will persist with the intention of prioritising the City's financial position to ensure that, finances are at all times sustained so that the City has the resilience to recover easily and immediately from unexpected, unfavorable occurrences that may have a severe impact on the City's operations. In 2013/14 we will seek to achieve 97% bill collection rate, disciplined expenditure management and to attract high levels of confidence in the City by private sector partners and citizens. We will implement effective management, oversight and monitoring of people and processes while pursuing value for money via smart and efficient supply chain management procurement. Overall, we will continue to retain and improve the competitive edge of the City.
- Agriculture and food security: Johannesburg will continue to address poverty and income inequality. We recognise the immediate need for poverty alleviation measures (focusing on poor and vulnerable) and poverty eradication in the long term to ensure self-reliant communities. We will pursue a reduction in food insecurity by 50% in identified areas and mobilise appropriate incentives as well as an enabling environment for high value food commodities (e.g. vegetables, fruit and animal products to be sold locally) thereby linking small farmers in their own areas with large food retailers, distributors and manufacturers to create a localised system to ensure food security.
- **Sustainable human settlements:** We have made a firm commitment to address spatial inequality and create the material conditions for economic growth with an emphasis on strengthening the inclusive nature of entrepreneurial, middle, working class and marginalised economic activity. In 2013/14 the City will pursue improved accessibility of people and goods, reduced commute times and costs, as well as safe, affordable and reliable public transport. We will also endeavour to establish integrated living spaces enable people to live, work and play, with sufficient open and recreational spaces. We will provide increased economic opportunities that, enhance and enable both formal and informal economic activities. We will promote a range of accommodation options - typologies, affordability levels, tenure options as well as social cohesion — using the spatial form (and a public transportation system) to enable social cohesion.
- **SMME and entrepreneurial support:** Within the same objective of addressing poverty and inequality, we will identify key success factors to facilitate interventions which will optimise the development of the entrepreneurial and middle classes. We will seek to create a physical and regulatory environment to ensure transformation in the SMME sector while defining

- economic sectors where SMMEs will thrive and will ensure growth in the economy. We will promote smart partnerships to ensure development of SMMEs and develop Empowerment Zones and Hubs. We will establish programmes to develop an entrepreneurial culture culture as an alternative to formal employment fall back and will institutionalise exit strategies for SMMEs.
- **Engaged Active Citizenry:** The city will encourage residents of Johannesburg to take an active interest in their communities by motivating them to show inspirational leadership at all levels of society, and by enlisting community based structures to re-energise the City. The latter will be achieved by developing shared responsibility and values through the creation of social, compact and effective urban governance. The City will actively enhance the vision of a caring City, promote meaningful state-society engagements and encourage values of responsible citizenship and solidarity.
- **Resource Sustainability:** We recognise that economic growth is strongly inter-related with the demand for water, electricity, liquid fuel and mining. Managing limited natural resources - as well as the consequences of using these natural resources - and unlinking economic growth from natural resource extraction is, therefore, very important. We will continue to promote clean air and reduced GHG emissions, adapting to climate change impacts and work to ensure the security of our water supply. This will extend to the improvement of the quality of our river health and the protection of our eco-systems and bio-diversity. We will endeavor to minimise waste to landfill sites and reduce environmental pollution. We will place particular emphasis on resilient and consolidated infrastructure planning and asset management and behavioral change around demand side management; and promote behavioral change environmental sustainability.
- **Smart City:** Johannesuburg is alive to the benefits of building a Smart City. This will result in economic development and job creation, promoting resource efficiency and mitigating climate change. It will provide a greater place to live and work while enabling the City to run efficiently. To this end we will strive to become a technologically competent institution, with enhanced service efficiencies and productivity. We will promote smart and effective service delivery while ensuring quality information, Communication and Technology systems (ICT) and services to support and enhance active citizen involvement and engagement. This will be based on our established broadband infrastructure.
- **Investment attraction, retention and Expansion:** This will be a key priority focussing on recruiting investment into the city, and positioning Joburg as a world-class business destination of choice by promoting the City's value added goods and services as well as the strategies for commercial and / or economic infrastructure funding models.
- **Green Economy:** This priority aims to shift the City's economy toward one that grows and creates jobs as a

result of economic opportunities from more sustainable and 'green' production. This includes manufacturing and services such as the production of bioethanol, the manufacturing of solar geysers and the provision of public transport. Major focus will be placed on job creation and income generation based on energy diversification, green re-fleeting for both private and public transport vehicles as well as City fleets. Futher, waste recycling initiatives will provide additional opportunities for job creation and income generation. As a result of such innovations, Johannesburg will become a leader in harnessing the many opportunities presented by a green economy.

• **Safer city:** We will continue the trend of becoming a safe, secure and resilient City that protects and builds communities through integrated law enforcement and the use of 'Smart City Solutions'. We will also improve our urban planning and design guidelines to further develop a Safer City approach which emphasises enhanced urban safety and security.

To conclude, beyond the above commitments to the future renewal of our city, we will endeavour to consistently meet

our stakeholders' expectations of us, as gauged through our many varied interactions with different stakeholder groupings during the year.

# Stakeholder Responsiveness Framework (SRF)

The Stakeholder Responsiveness Framework (SRF) table that follows provides an integrated view of the priorities raised by different stakeholder groups and our response to these priorities. The table further references (partial) where associated information can be sourced in the Integrated Annual Report (Abridged Version: Book 1) and in the more comprehensive Integrated Annual Report (Book 2). We will continue to update and refine the framework going forward to ensure our performance is measurable, transparent and comparable with future reports.

# Stakeholder Responsiveness Framework

Our perspective on sustainability (as expressed through our 'Joburg 2040' GDS - is informed by National Government's 12 Outcomes, which in turn has been informed by the United Nations' eight Millennium Development Goals. Broadly, these outcomes seek to halve poverty and unemployment by 2014, ensure the more equitable distribution of the benefits of economic growth, improve the nation's health profile, eradicate gender and racial biases, and reduce crime.

#### Reference Key: The 12 National Outcomes

Outcome 1: Improved quality of basic education

Outcome 2: A long and healthy life for all South Africans Outcome 3: All people in South Africa are and feel safe

Outcome 4: Decent employment through inclusive economic growth

Outcome 5: A skilled and capable workforce to support an inclusive growth path

Outcome 6: An efficient, competitive and responsive economic infrastructure network

Outcome 7: Vibrant, equitable and sustainable rural communities with food security for all

Outcome 8: Sustainable human settlements and improved quality of household life

Outcome 9: A responsive, accountable, effective and efficient local government system

Outcome 10: Environmental assets and natural resources that is well protected and continually enhanced

Outcome 11: Create a better South Africa and contribute to a better and safer Africa and world

Outcome 12: An efficient, effective and development-oriented public service and an empowered, fair and inclusive citizenry

Table 15: Stakeholder Responsiveness Framework

| Environment, Infrastructure and Services | Public participation and oversight over the IDP, budget and by-law processes of the Department of Environment, Infrastructure and Services.                      |
| Finance                                  | Public participation and oversight over the IDP, budget and by-law processes of the Department of Finance.   |
| Development Planning                     | Public participation and oversight over the IDP, budget and by-law processes of the Department of Development Planning.  |
| Corporate and shared Services            | Public participation and oversight over the IDP, budget and by-law processes of the Department of Corporate and shared Services.                                 |
| Standing committees                      |  |
| Municipal Public Accounts Committee      | Political oversight over financial management and value for money in the City.   |
| Rules committee                          | Review over amendments to the membership/s to council and its committees and review of a local/internal legislation (processes, policies, standing rules, etc.). |
| Oversight Committee on the Legislature   | Public participation and oversight over the IDP, budget and by-law processes of the legislative arm of Council.  |
| Gender Youth and People With Disability  | Public participation and oversight over the IDP, budget and by-law processes of programmes that target designated groups.  |
| Mayoral Committees                       | Sub-Mayoral clusters are established to assist the Mayoral Committee in fulfilling its executive or strategic function.  |
| Ethics and Disciplinary                  | Resolution over breaches in the code of conduct for municipal employees and councillors.   |

# Appendix B: List of Municipal Entities

| Entity                                       | Function  |
|--|---|
| City Power                                   | City Power is responsible for electricity supply and therein, contributes to improved quality of life. It further educates customers about the safe use of electricity, participates in renewal projects that empower entire communities, and provides and maintains the public lighting that reduces crime and keeps communities safe.                                     |
| Johannesburg City Parks                      | City Parks is responsible for developing and maintaining all city parks, open spaces, cemeteries and conserved areas.   |
| Joburg Theatre Company                       | The Joburg Theatre is Africa's leading provider of live entertainment, presenting world-class international and home-grown theatre. It is responsible for providing venues where performing arts professionals and amateurs alike can showcase their work.  |
| Johannesburg Development Agency (JDA)        | JDA is responsible for stimulating and supporting area-based economic development initiatives throughout the Johannesburg metropolitan area in support of the long-term Growth and Development Strategy (GDS).  |
| Johannesburg Fresh Produce Market (JFPM)     | JFPM is South Africa's major centre for the marketing of fresh produce. It is also the largest fresh produce market in Africa. It deals in fruit, vegetables, meat, fish and general groceries, most of them on sale to the public at wholesale prices.   |
| Johannesburg Property Company (JPC)          | JPC is responsible for property development; alienation of the Greater Johannesburg Metropolitan Council properties; property management services; and all associated ancillary services. The company develops and manages Council-owned properties for the purpose of maximising both social and commercial opportunities for the Council in the short and longer term.    |
| Johannesburg Social Housing Company (Joshco) | Joshco provides and manages affordable rental housing stock for the lower income market as part of its contribution to eradicating the housing backlog.   |
| Johannesburg Roads Agency (JRA)              | JRA is responsible for the design, maintenance, repair and development of Johannesburg's road network and stormwater infrastructure, including bridges and culverts, traffic lights and signage.  |
| Johannesburg Tourism Company                 | JTC is a destination marketing organisation, dedicated to promoting tourism growth in Johannesburg and to promote Johannesburg as a business, lifestyle, and sport and leisure destination, both locally and internationally.   |
| Johannesburg Water (JW)                      | JW is mandated to provide water and sanitation services to the residents of Johannesburg. It supplies water and sanitation services to an area stretching from Orange Farm, in the south of Johannesburg, to Midrand in the north, Roodepoort in the west and Alexandra in the east. It operates in six regions with 10 network depots and six wastewater treatment plants. |
| Johannesburg Zoo                             | Johannesburg Parks and Zoo is responsible for the accommodation, enrichment, and husbandry and medical care of wild animals. The Johannesburg Zoo also offers a variety of educational and entertainment programmes.  |
| Metrobus                                     | Metrobus is responsible for providing customer-friendly public bus transport within greater Johannesburg.   |
| Metro Trading Company                        | Metro Trading Company is responsible for informal traders and taxis, giving developmental support to the sector and managing the facilities the City has set aside for micro retailers and taxi operators.  |
| Pikitup                                      | Pikitup is responsible for keeping the city clean and preserving an attractive and hygienic environment for residents and visitors.   |
| Roodepoort Theatre                           | Roodepoort Theatre Is responsible for providing a venue where performing arts professionals and amateurs alike can showcase their work  |

Chief Financial Officer's Report......175

Auditor General's Findings......370

Appendix A: ......376

# Structure of the Integrated **Annual Report**

National Treasury's MFMA Annual Report Circular 63 requires municipalities and municipal entities to adopt the following format for an Annual Report:

- Chapter 1: Mayor's Foreword and Executive Summary.
- Chapter 2: Governance.
- Chapter 3: Service Delivery Performance.
- Chapter 4: Organisational Development Performance.
- Chapter 5: Financial Performance.
- Chapter 6: Auditor General's Findings.

- Appendices.
- Volume II: AFS.

This report forms part of a two-part annual integrated reporting framework. It provides a comprehensive integrated view of the City's performance for the 2012/13 reporting year. It has been compiled in line with the format outlined above and includes the consolidated Financial Statements, Annual Performance Report and the Auditor General's Audit report.

A second Integrated Annual Report (Abridged Version: Book 1) provides an abridged representation of the City's performance for the year and forms the primary communication report to all City stakeholders.

Figure 1: The City of Johannesburg's reporting for 2012/13 consists of two books

# An integrated approach to reporting

This Report is the first in which the City purposely attempts to comply with the principles—based approach of integrated reporting as proposed by the International Integrated Reporting Council and the South African Integrated Reporting Committee. The integrated approach to reporting aligns with the City's integrated approach to strategy formulation and operational management. The City has adopted this approach to enhance its commitment to recommendations of the King III Code on Corporate Governance, which sets out international leading practices for governance of private and public organisations, including a recommendation that these organisations undertake integrated reporting.

The report further complies with legislative prescripts and conforms to National Treasury guidelines on annual reporting, which emphasises the integration of strategic plans and operational budgets to improve operational effectiveness. The main aim of interlinking plans and budgets is to ensure that key objectives and priorities are

budgeted for and achieved. The National Treasury guidelines note the inherent tension between strategic planning and budgeting, which often makes it difficult to achieve the desired level of integration. Chapter 3 of this report interlinks the City's forward-looking strategic planning perspective with its reporting of both service performance and financial performance for the 2012/13 year, thereby providing a strategic long-term context for short to medium-term operational and budgetary information.

In addition, the report has been informed by the guiding principles of the South African Integrated Reporting Committee and the International Integrated Reporting Council (IIRC). These include the principles-based requirements of a strategic focus and future orientation; the connectivity of information; stakeholder responsiveness; materiality and conciseness; reliability and completeness; as well as consistency and comparability.

The table below outlines the integrated reporting principles followed, as well as instances in both this Integrated Annual Report (Book 2) and the Integrated Annual Report (Abridged Version: Book 1) where these principles have been applied.

Table 1: Principles-Based Integrated Reporting Index (Covering Book 1 and Book 2)

| Consistency and comparability         | <ul> <li>The Integrated Annual Report (Abridged Version: Book 1) and the Integrated Annual Report (Book 2) are the first in which the City purposely attempts to comply with the principles—based approach of integrated reporting as proposed by the IIRC and IRC SA. Accordingly it is setting a firm foundation for future reporting by:         <ul> <li>Introducing recognisable cluster icons to facilitate ease of information access and comparison between this and future reports.</li> <li>Introducing a stakeholder responsiveness framework to facilitate ease of access to stakeholder priorities and the City's commitments, to be updated each consecutive year as a guide to our performance.</li> <li>Introducing a principles-based approach to integrated reporting through which cluster performance can be easily grouped, accessed and compared.</li> <li>Including tabled performance indicators and 2012/13 performance against SDBIP targets.</li> <li>Including the Principles-Based Integrated Reporting Index (Covering Book 1 and Book 2) to gauge "reporting maturity" in future integrated reports.</li> </ul> </li> </ul> | <ul> <li>The Integrated Annual Report (Abridged Version: Book 1) and the Integrated Annual Report (Book 2) are the first in which the City purposely attempts to comply with the principles—based approach of integrated reporting as proposed by the IIRC and IRC SA. Accordingly it is setting a firm foundation for future reporting by:         <ul> <li>Introducing recognisable cluster icons to facilitate ease of information access and comparison between this and future reports.</li> <li>Introducing a stakeholder responsiveness framework to facilitate ease of access to stakeholder priorities and the City's commitments, to be updated each consecutive year as a guide to our performance.</li> <li>Introducing a principles-based approach to integrated reporting through which cluster performance can be easily grouped, accessed and compared.</li> <li>Including tabled performance indicators and 2012/13 performance against SDBIP targets.</li> <li>Including the Principles-Based Integrated Reporting Index (Covering Book 1 and Book 2) to gauge "reporting maturity" in future integrated reports.</li> </ul> </li> </ul> |  |  |

This Integrated Annual Report strengthens the City's accountability and transparency processes and complies with legislative prescripts for regular, impartial feedback to stakeholders, including Johannesburg residents, National Treasury, Provincial Government and the Auditor General, among others.

The City is committed to enhancing its integrated reporting process going forward.

## **Materiality**

The City of Johannesburg has applied the principle of "materiality" in determining pertinent content and disclosure. A matter is material if it is of such relevance and importance that it could substantially influence an assessment of the report and the City's ability to create value in the short, medium and long term. The following internal and external criteria were used to identify material issues:

Table 2: Defining 'material' issues for integrated reporting

| Internal criteria   | External criteria   |
|---|---|
| City of Johannesburg Growth and Development Strategy (Joburg 2040 criteria and objectives.  | Critical opportunities and challenges the City is geared to respond to.   |
| National and Provincial Agenda.   | Changes in the socio-economic developmental agenda and priorities of National and Provincial Government.  |
| 12 National Outcomes of Government.   | Changes in the national and provincial political environment and a changing regulatory landscape.   |
| Enterprise Risk Management Process; including key risks impacting<br>the City's strategic and operational objectives and the associated<br>mitigating activities.   | Factors which may impact the City's reputation, thereby influencing its ability to promote sustainable growth.  |
| Stakeholder expectations and feedback – e.g. from residents, rate-payers, business community, Non-Governmental Organisations (NGOs), National and Provincial Government, neighbouring municipalities, designated targeted groups, academics, investors and the media. | The provisions of various frameworks including: Municipal Finance Management Act (MFMA); Public Finance Management Act (PFMA); Section 46(1) of the Municipal Systems Act (MSA); King III Code on Corporate Governance (King III); Discussion papers issued by the South African Integrated Reporting Committee and |
| City of Johannesburg's mission, vision and values.  City of Johannesburg's governance framework and policy environment.   | the International Integrated Reporting Council (IIRC); International Financial Reporting Standards (IFRS); GRI Framework; United Nations Global Compact; Millennium Development Goals; Carbon Disclosure Project; B-BBEE Code.  |

# **Engaging stakeholders**

Our stakeholder engagement processes play a critical role in providing insight into the quality of the City's relationships with its key stakeholders. We are committed to responding to stakeholders' legitimate needs, interests and expectations through effective and efficient service delivery. In so doing, the City engages its residents collaboratively so that it works with and for residents.

We are further committed to strengthening meaningful stakeholder engagement and participation going forward to respond to developmental challenges. For this reason, the City has embraced the adage: "Engaged Active Citizenry", which informs one of its ten approved priorities.

In the year ahead, the 2013/14 business planning and outreach process will provide the City with an opportunity to communicate its draft plans and budget to a larger audience and enabled communities at a local level to express their needs.

Table 3: Stakeholder engagement process during the review period

| Vehicles for engaging stakeholders   | Stakeholders  | Stakeholder priorities   |
|--|---|--|
| Calls for public comment   | <ul><li>Residents</li><li>Rate-payers</li></ul>   | A municipality that is functional and responsive to the needs of its citizens. |
| Newspaper advertisements   | <ul><li>Business community</li><li>Non-Governmental Organisations</li></ul>   | Provision of quality services and addressing the basics.                       |
| Councillor engagement sessions   | (NGOs)  | Continue the agenda of transformation.   |
| IDP Outreach process   | <ul> <li>National and Provincial Government</li> <li>Neighbouring municipalities</li> <li>Designated targeted groups</li> </ul> | Communicate and engage with citizens on the development agenda.                |
| Regional stakeholder meetings  | Academics   | Address service delivery backlogs.   |
| Ward committee activities  | Investors and the media   |  |
| GDS Investor Roadshows and Roundtables                                     |   |  |
| Service delivery disputes, protests and petitions                          |   |  |
| Deploying regional MMCs for focused engagements with regional stakeholders |   |  |
| Project-Based engagement and petetions                                     |   |  |

# Our perspective on sustainability

The City of Johannesburg views 'sustainability' - in its most inclusive sense – as balancing the societal needs of the present generation with the regenerative conditions of the broader social, economic and ecological environment which sustains them.

From a social perspective, sustainability requires that communities have equitable access to key services and can participate in systems of human interaction that value cultural diversity; can experience a sense of community ownership; and are able to fulfil their own needs where possible.

From an economic perspective, sustainability requires that assets are used efficiently so that they may continue to function profitably over time and that current economic

activity does not disproportionately burden future.

Generations from an ecological perspective, sustainability refers to a sustained condition of balance, resilience, and interconnectedness that allows citizens to satisfy their needs without exceeding the capacity of the supporting ecosystems to regenerate the resources necessary to meet their present and future needs and without diminishing biological diversity.

From a governance perspective Local Government has an obligation to report, clarify and be accountable for the impacts of the decisions it makes on behalf of the community it represents. Further, it has a responsibility to implement decisions and follow processes that optimise the use of the available people, resources and time to ensure the best possible results for the long-term economic, social and environmental sustainability of its community. In addition, sustainability requires that citizens are free to contribute to political decision-making, particularly at a local level.

## **Guidelines for reading the Integrated Annual Report**

Commentary on the performance for each of the clusters is indicated throughout the report by means of the following icons:

**Sustainable Services Cluster** 

**Economic Growth Cluster** 

**Human and Social Development Cluster** 

**Good Governance Cluster** 

#### Assurance

Assurance on the Integrated Annual Report was done through engagements with the Group Audit Committee (GAC) and Group Assurance Services (GRAS). Council will undertake oversight of the Annual Report between February and March 2014, through its Municipal Public Accounts Committee (MPAC). The report will be communicated to all City stakeholders.

The City will continue to refine its approach to integrated reporting in future annual reports to further align with international reporting standards and to promote consistency, accessibility and accountability with respect to its multi-faceted role in creating and sustaining value for all citizens of Johannesburg.

## Feedback

The City of Johannesburg aims to establish and maintain constructive and informed relationships with its stakeholders. Accordingly we wish to encourage all stakeholders reading our Integrated Annual Report to provide feedback on their views. This will enable Council to gauge the adequacy and quality of its integrated reporting. To provide feedback, kindly complete the printed feedback form included in this report or download a form at <a href="https://www.joburg.org.za">www.joburg.org.za</a>. Feedback forms can be submitted at regional offices or emailed to <a href="mailto:salatialc@joburg.org.za">salatialc@joburg.org.za</a>.

# Executive Mayor's Foreword and City Manager's Executive Summary

# Executive Mayor's Foreword

I am pleased to present the City of Johannesburg's 2012/13 Integrated Annual Report, covering the period 1 July 2012 to 30 June 2013. The report provides a measure of our progress in line with the City's Growth and Development Strategy

(GDS), 'Joburg 2040' and tracks operational performance in the context of the City's approved 2012/16 IDP priorities.

To become increasingly accountable in our reporting; and to enhance transparency in respect of our budgetary, monitoring and oversight processes, we present an Integrated Annual Report which emphasises the connection between our strategic planning processes and our operational achievements. Accordingly, we share our successes and challenges during the year in the context of the strategic imperatives of our 'Joburg 2040' GDS, thereby deepening our communication with stakeholders and setting the bar high for future performance reporting in all areas of the City's service, infrastructure and administrative delivery.

I would like to take this opportunity to acknowledge efforts of the City's leadership and administration in positively advancing the City's strategic and transformative agenda during the year; and to thank them for their perseverance and readiness in boldly implementing the objectives of the GDS in the context of a changing and increasingly unpredictable development paradigm.

In 2012/13 we attained some notable achievements firstly, by improving our ability to monitor and measure the implementation of strategic priorities — a critical focus area for the last two years. This entailed further aligning key performance indicators with the strategic priorities that drive our implementation processes. Second, in an effort to fulfil our agenda of socio-economic transformation — and dismantling of a City still labouring under the responsibilities of its history of separate development – we implemented a series of flagship programmes towards 'Joburg 2040'.

#### Committing to a promising future

The 2012/13 financial year marked a critical period in the implementation of our long-term strategy in that we had to show, tangibly, our firm commitment to the development of a resilient, sustainable and liveable Johannesburg for all our citizens. 2012/13 represents our second year in the implementation of our current five-year Integrated Development Plan (IDP). We have been decisive in identifying what is required as part of the long journey towards 2040 and resolute in demonstrating our commitment to our vision.

#### **Committing to spatial equality**

The new democratic South Africa secured political participation for all, facilitated greater access to economic participation and ensured the freedom of movement of people. However, not everyone has benefited equally from this transformation. We see this in the existing urban spatial form in which the majority of Johannesburg's residents live and play far from where they work. We have demonstrated our commitment to our vision by committing to invest R100 billion in infrastructure development over ten years with the aim of eradicating spatial inequality. This will be achieved by 're-stitching' the City of Johannesburg and reclaiming parts of the City to ensure that transport nodes become "Corridors of Freedom"; and that Johannesburg's urban form is transformed into one where residents live and play close to where they work.

# Committing to a financially sustainable and resilient City

It gives me pleasure to report that the City is firmly on course to becoming financially sustainable and resilient. In 2012/13 we collected 92% of all billed revenue and concluded the year with a strong financial position, with a net surplus of R3.4 billion. We continued the upward trend of increasing the City's total assets to R60 191 121 billion, up from R56 374 108 billion in 2011/12. We concluded the year with a progressive increase in cash and cash equivalents of R5.4 billion, up from R2.2 billion. Our capital investment in the City continued to rise to R4.5 billion up from R3.7 billion in the preceding financial year. Our positive financial performance was further supported by the significant progress we have made towards eliminating billing issues. The City is in an improved state of responsiveness to billing issues, as a result of open days and the Revenue Step Change Programme, both of which have led to a marked

improvement in the resolution of queries, while the R3.4 billion surplus enables the City to further increase the capital investment to R7.66 billion in the 2013/14 year.

#### Committing to a sustainable city

Rea Vaya, our world-class, affordable and reliable mode of public transport is indeed a proud achievement. In 2012/13 the Bus Rapid Transit system conveyed an average of 35 953 passengers daily while Metrobus ferried 16 489 457 passengers during the year. We are on track to increasing public transport patronage, and in the process, are decongesting the streets and reducing carbon emissions through advanced transport technology. In continuing to enhance our transport system during the year, we took every opportunity to create jobs and to ensure that busses used in the BRT system are manufactured locally.

We made positive progress toward environmental sustainability during the year by moving towards low carbon infrastructure and by introducing programmes to further conserve energy. We installed 27 091 solar water heaters in various communities and are working towards including sectors with a large carbon footprint in our programme to reduce carbon emissions through low carbon infrastructure. Our waste management programmes resulted in the diversion of more than 90 000 tonnes of dry waste and over 80 000 tonnes of green waste from our stretched landfill sites. Our integrated waste management programme also received a boost with the establishment of waste sorting facilities and buy-back programmes – such as our "waste for food" programme.

The 2011 Census revealed that 23% of Johannesburg's population is impoverished, of whom 42% go without food for two to three days per month. The City has responded to this with a programme to address poverty and income inequality through food security and the promotion of urban agriculture. We recognise the immediate need for measures to alleviate poverty among our city's poor and vulnerable; and for poverty eradication in the long term to ensure self-reliant communities. Accordingly, we established six agri-resource centres in Regions A, C and G. During the year, these centres offered agricultural training, as well as provided seeds and implements to small-scale urban farmers. The City further provided 'hub-and-spoke' support for small-scale producers in Orange Farm and Poortijie. Food gardens have been established in Regions A and G.

Creating a safe and secure city is a priority for Johannesburg and we have made significant progress through our "Joburg 10+" community policing initiatives as well as the 'smart practices' introduced to improve public safety and disaster readiness. These innovations – combined with our 'complete streets' programme to enhance road safety and our efforts to create safer public spaces – have contributed to making Johannesburg a safer and more secure city overall, with reductions in both violent and petty crimes.

#### Committing to inclusive economic growth

We continue to excel in the implementation of the Expanded Public Works Programme (EPWP). Johannesburg was awarded the 2012 Kamoso Award for Excellence for the implementation of its EPWP programme. In 2012/13 the City created 36 588 EPWP job opportunities against a target of 38 176. We continue to enhance our contribution to the growth of small to medium scale enterprises (SMMEs) to develop the economy of Johannesburg. In the financial year we supported close to 400 SMMEs and sourced funding for the Soweto Energy SMME incubator to the value of R27 million. To further promote inclusive economic growth and commercial connectivity, the City completed the laying of over 900 kilometres of fibre optic cable as part of our Broadband Network Programme.

#### **Committing to building sustainable partnerships**

We recognise the need to foster strong partnerships across all spheres of Government, and to nurture our partnerships with our stakeholders and communities so as to remain relevant and accessible to our stakeholders. The work we are doing to transform Johannesburg's spatial form also requires a commitment to the citizens of Johannesburg, that they are not inert observers or passive recipients of Government services, but rather active partners in shaping our City's future. Accordingly, we rolled out 'community-based planning' (CBP) in Region E on a pilot basis and with the successful implementation in Region E in 2012/13 ratifying the merits of this model, we will be implementing the programme in other Regions in future.

The newly elected ward committees and refined ward committee structures assisted with consultations around the preparation of ward plans and also enhanced accountability in the implementation of key City programmes, in the process demonstrating our collaborative approach to stakeholder engagement. Our 'Joburg 10+' flagship programme, for instance, epitomises our commitment to sustainable partnerships with communities to create a safe and secure Johannesburg. As we progress toward our envisioned future, we remain mindful of our ability to mobilise the collective energy and efforts of the people of Johannesburg who have brought us this far and continue to enable us to meet the transformation agenda.

#### **Committing to good governance**

Enhancements in our governance processes have resulted in improved financial performance and an improved audit opinion, advancing us to an Unqualified Audit Opinion in 2012/13. We continue to be committed to fiscal responsibility and the highest standards of financial management

Notwithstanding our notable achievements, we recognise the magnitude of our task in addressing the enduring concerns of inequality as well as transforming the economic landscape of our City. We are responding to these challenges through proactive and creative interventions to continually enhance the quality of our service delivery. This includes our commitment to investing R100 billion over ten years in infrastructure development; improving integrated waste management efforts; ensuring food security; maintaining a safety-net for the indigent; driving an inclusive economy; creating respectable jobs; and growing commercial opportunities for SMMEs and local service providers.

We are committed to improving our performance in the year ahead. The City has introduced stretch targets based on an improvement in current performance. We are confident that we will continue to meet the expectations of our stakeholders as we drive implementation of our long, medium and short-term strategies.

We look back on 2012/13 as a year during which we continued to cement our position as the leading metro in South Africa and in Africa. The hosting of the opening and closing ceremonies of the Africa Cup of Nations football tournament validated the important position of Johannesburg as a leading African city, which embraces its African identity and represents a melting pot of the spontaneity and vibrancy of the diverse cities across the continent.

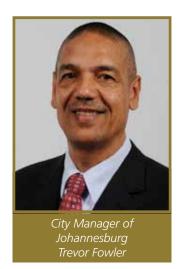

Looking ahead

The City holds the hopes and aspirations of its entire people. Our vision of a promising future has a finite end-goal, of a liveable, sustainable and resilient Johannesburg. We are providing liveable communities in which our people live and play close to where they work. Through deliberate infrastructure investment we are transforming the urban spatial form of Johannesburg, reclaiming certain areas to ensure this vision is achieved. We are providing affordable, safe, reliable public transport systems that will ultimately

reduce congestion on our streets, while decreasing our carbon footprint through state-of-the-art transport technology. We envisage that these transport nodes will become the centre of living activities within Johannesburg. We are creating safer caring communities and providing a safety-net for the indigent, in line with our position as a leading caring city. Globally, Johannesburg is claiming its pride of place as a one of the world's leading cities, and the leading City in Africa.

The 2012/13 Integrated Annual Report carries the theme "Committing to a promising future of a world-class African City that is resilient, sustainable and liveable". Johannesburg has a clear roadmap for delivery – in the immediate, medium, and long term – and this Annual Report provides a snapshot of our achievements during the 2012/13 financial year. It also outlines our commitments for the coming financial year. The Report addresses issues that are material and provides a fair representation of the integrated performance of the City of Johannesburg and its entities for the period 1 July 2012 to 30 June 2013.

Clr Mpho Parks Tau
Executive Mayor of the City of Johannesburg

# City Manager's Executive Summary Introduction

The 2012/13 Integrated Annual Report carries the theme 'Committing to a promising future'. The future we envisage is that of a world-class

African city that is resilient, sustainable and liveable. This theme represents our long-term commitment to residents and stakeholders of Johannesburg to deliver a City that is resilient, liveable and able to preserve resources for future generations. It is strategically embodied in 'Joburg 2040' the City's Growth and Development Strategy (GDS) and operationally applied through the flagship programmes provided for in our Service Delivery and Budget Implementation Planning (SDBIP).

2012/13 was our first year of implementing the 'Joburg 2040' GDS. To give tangible expression to the commitments we have made in the GDS, we have pledged to spend R100 billion toward infrastructure development over ten years, thereby enabling Johannesburg to make a decisive break with apartheid era spatial planning. Further, our targeted flagship programmes are designed to address short and medium-term challenges whilst maintaining focus firmly on our long-term vision of 'Joburg 2040'. The City is committed to enhancing its interactions with citizens and other stakeholders going forward, particularly through the implementation of Community-Based Planning (CPB) initiatives.

For 2012/13, using the principles of resilience, sustainability and liveability we reviewed the five-year Integrated Development Plan (IDP) and committed to the following ten flagship programmes to drive our service and infrastructure delivery:

- Financial sustainability and resilience.
- Greenways and mobility
- Agriculture and food security.
- From informal settlements to sustainable human settlements.
- Citizen Participation and Empowerment.
- Integrated Waste Management
- Urban water management
- Investment attraction, retention and expansion.
- Shift to low carbon infrastructure.
- A safe secure and resilient City that protects, serves, builds and empowers communities.

The service delivery review section (Page 40) provides a consolidated view of our performance with respect to the ten priorities listed above.

# Overview of City of Johannesburg

The City of Johannesburg (CoJ) continues to be South Africa's primary city, providing services to over 4.4 million people. This translates into approximately 8% of the total national population. Service delivery is facilitated through an employee base of over 25 000 employees. Recognised as one of the leading cities globally, the City of Johannesburg is known as a city of innovation and economic dynamism; a city that mobilises the strengths and qualities of its diverse population; and also a city that cares deeply for all its residents through its commitment to world-class service delivery for all.

Johannesburg, the largest and wealthiest city in South Africa accounts for 16% of the country's Gross Domestic Product (GDP). It hosts South Africa's largest corporations as well as many other international corporations operating on the African continent.

Johannesburg is the provincial capital of Gauteng, the wealthiest and most popular province in South Africa; and is one of the 40 largest metropolitan areas in the world. Johannesburg is the centre of a rapidly urbanising Gauteng Province. It is projected that by 2015, the urban portion of Gauteng - comprising mainly the cities of Johannesburg, Ekurhuleni (the East Rand) and Tshwane (greater Pretoria) - will be a polycentric urban region with a projected population of some 14,6 million people.

The City continues to offer its residents a high quality of life and endless economic opportunities by:

- Providing excellent transport and telecommunications infrastructure services.
- Being Africa's economic powerhouse and one of the world's leading emerging market economies.
- Promoting a well-structured regulatory environment.
- Hosting institutions of exceptional quality recognised in global competitiveness surveys.
- Creating an environment for Johannesburg to maintain its position as a centre for sound banking and financial syste.
- Having a good credit rating supported by good financial governance
- Being recognised for its low cost of living and being the least expensive African city out of 214 cities on five continents; Johannesburg is almost three times less expensive than the most expensive city, Tokyo.
- Providing a shopping mecca for sub-Saharan Africa as well as ensuring strong cross-border trade.
- Providing a spring-board to Africa's markets.
- Providing good socio-economic infrastructure.

Every year, the City commits significant resources to support service delivery. In 2012/13, R31.9 billion was committed to

service delivery programmes. In 2013/14 this increased and exceeded R40 billion, consisting of an operational budget of R36.3 billion while R7.5 billion was allocated towards capital expenditure. In 2013, Johannesburg became the first municipality in South Africa to pass a multi-year capital budget of R30.1 billion. The magnitude of these figures indicates Johannesburg's commitment to high quality service delivery and confidence in its future as a leading metropolitan municipality.

We are striving for urban wellbeing and are winning the battle against urban poverty, spatial inequality, and social exclusion. In the last ten years we have made significant investments in infrastructure, such as Bus Rapid Transit infrastructure to support Johannesburg's world-class public transport system as well as the creation of mixed housing opportunities. We forecast that the City will spend a further R100 billion investment over a ten year period in infrastructure development. This intervention aims to address poverty and to confront spatial inequality by transforming urban spatial form through reclaim particular areas of the City and re-stitching the City such that major transport nodes become "Corridors of Freedom" that promote densification but facilitate quick movement of residents. This is necessary because poverty and inequality in Johannesburg are geographically concentrated, with stark spatial differences in the levels of poverty and inequality. Massive infrastructure investment is required to undo the pattern of residential segregation enforced during the years of apartheid.

# Service delivery overview

During the 2012/13 financial year, City of Johannesburg made progress in key service delivery areas — as aligned with the City's Integrated Development Plan (IDP) and SDBIP:

**Financial sustainability and resilience:** The City improved its response rate to billing queries through open days, the 'Revenue Step Change' process and 'Zero Tolerance' project during the year, resulting in many queries being resolved and accounts being corrected. Collections from alternative revenue streams further buoyed financial stability. These interventions, together with a strong focus on fiscal responsibility and the development of prudent financial management practices, resulted in the City achieving its revenue target and collecting 92% of revenue billed. The City also maintained an upward trajectory in key indicators such as increasing the value of assets, increases in cash and cash equivalents as well as increase in surplus.

**Agriculture and food security:** This programme promotes food security with the aim of combatting hunger and addressing chronic lifestyle diseases which is as a result of poor dietary habits and sedentary lifestyles. Surveys indicate that 42% of the City's poor households go without food 2-3 days a month. The programme supports vulnerable communities in our society, including

children and seniors. In addition, initiatives were undertaken to provide support to small emerging farmers to become self-sufficient in producing their own crops and to sell fresh produce to their communities and local markets. Six-Agri resource centres were established to provide training of the use of seeds and implements in areas of most unemployed in Region A (Ivory Park: Hikhensile & Diepsloot Skill Development Centre); Region C (Itsoseng Informal Settlement & Tshepisong- Vlakfontein Phase 7); Region G (Orange Farm Skills Centre and Poortije Skills Centre); These centres provided training, of seeds and implements. The City also developed a total of 322 new food gardens which will be expanded in the future.

#### From informal settlements to sustainable

**human settlements:** We delivered 3470 mixed housing opportunities in 2012/13 and recognise that there is still a long way to go till we can respond fully to the challenge of housing within a sustainable urban form. We are responding to the housing challenge through a commitment to reshape the urban spatial form by committing R100 billion towards infrastructure development to construct a future city based on liveability, sustainability, and spatial equity. At the core of this approach is the City's 'Corridors of Freedom' initiative, representing a spatial incentive for knitting the urban form together and facilitating the mass transit of people and goods along corridors that strengthen the connectedness of different parts of the city

2012/13 further confirmed Johannesburg's position as a leading South African metropolitan city, with more people than ever before, accessing key basic services, such as water and sanitation, electricity and waste removal. The quality of the City's drinking water was maintained at 99.9% against the South African National Standard (SANS) 241. The City's final treated effluent was maintained at 95.2% of industry standards as set by the Department of Water Affairs' (DWA) Effluent Discharge Permits. In 2012/13 we provided more than 3 000 new households with first-time connectivity to electricity.

**Greenways and mobility:** The annual performance recorded a high number of commuters on the City's world-class public transport system, Rea Vaya. There were on average, 35 953 passengers being transported daily on Rea Vaya, despite the challenges of labour unrest. Metrobus carried over 16 million passengers in the financial year. As we continue to improve the public transport system, we are improving mobility on the City's streets and, in the process, reducing our carbon footprint by using advanced technology on our public transport system.

The City achieved its target on BRT roadways and the stations and depots. Improvements were undertaken in preparation for Phase 1B operations as a depot (at Dobsonville) was completed. In addition to the roroll out of Phase 1B and the restructuring of Metrobus we developed complete streets, introduced managed lanes and upgraded gravel roads. Jobs were created by manufacturing the BRT buses locally.

Citizen Participation and Empowerment: 2012/13 saw 130 Ward plans developed these ward plans include ward profiles and costed capital projects that will be implemented within individual wards. The City also successfully implemented Community Based Planning (CBP) pilot in Region E. Experiences from Region E will guide comprehensive CBP implementation across the City. As part of the pilot, included with CBP plans for Region E are Capex projects to be implemented in each ward; costed operational plans for each city department and entity; and community identified initiatives. As a result of these activities, the City is refining administrative processes of planning and budgeting to meet the basic needs of our communities. Johannesburg further strengthened its commitment to cultivating meaningful stakeholder relations and to engaging stakeholders collaboratively in response to priority developmental needs. Accordingly, the IDP outreach processes were of great importance in building a collective and shared vision for the future of Johannesburg as a leading African city.

**Smart City:** During the year, our aspiration of building a high-performance organisation and to improve the culture of technological innovation, performance management and accountability evolved through the roll-out of enhanced broadband technology and capabilities. Public access to Internet services was enhanced through the Broadband Network Core Infrastructure and the Public Access to Internet in Libraries (PAIL) programme. Two City Libraries were connected to the internet, namely, Orlando East and Johannesburg Central Library. The City provided 315 (thin client laptops) for the 20 libraries. Landing pages were updated with eLearning content as well as training of staff and community members on E-learning.

#### Investment attraction, retention and expansion:

The City recognises the need to create an inclusive economy through increasing the contribution of SMME's to the economy. Johannesburg is committed to developing competitiveness, innovation and increased investment through support for SMMEs. During the year, a total of 3 967 SMMEs were supported through our SMME development programmes. This support included assisting informal traders to obtain trading licences, and mentoring 21 SMMEs for a full calendar year in partnership with the Gauteng Enterprise Propeller. In addition, the Expanded Public Works Programme (EPWP) aims to reduce unemployment and alleviate poverty by creating on-thejob training. During the year, the City created 36 588 work opportunities (against a target of 35 000), thereby exceeding our target by 1 588 work opportunities. Despite these achievements there is a long way to go in achieving a totally inclusive economy and to eradicate unemployment.

Shift to low carbon infrastructure and integrated waste management: In 2012/13, the City accumulated 88 987 Verifiable Emission Reductions (VERs) from its 'landfill gas to energy' project at two landfill sites. Further, Johannesburg remains committed to the goal of '7% waste

to landfills', implementing separation at source projects across the City in partnership with the community. The City also made substantial progress in rolling out our 'green strategic projects' by retrofitting community facilities with environmentally appropriate design elements. During the year, 27 091 solar water heaters (geysers) were installed in low income various areas, including Alexandra, Devland, Lehae, Pimville, Pennyville, Tshepisong and Vlakfontein.

A safe, secure and resilient City that protects, serves, builds and empowers communities: We are building a City that is safe, secure and resilient; and that protects, serves, and empowers our communities. During the year, we reduced assaults in our Inner City by 13% and fought serious traffic violations. While progress is acknowledged in creating a safer City, the city recognises the enormity of the task and will therefore upscale implementation of its safety programmes to preserve the safety and security of its residents.

**Urban Water Management:** We placed particular focus on repair and maintenance of water network to reduce water losses as well as repair and maintain dams that play a critical role in storm water management. We intensified water demand management strategies, pipe replacement, pressure management and waste water upgrades and introduced new storm water management strategies. Technical, social and financial interventions led to us meeting the target of bringing Unaccounted for Water (UFW) to below 32%. We developed a Consolidated Infrastructure Plan CIP to inform future and new capital investment plans for infrastructure to achieve further gains in water management.

Notwithstanding recorded achievements, the City acknowledges missed targets. To enhance the attainment of these the City is improving its environmental and operational issues, improving its capacity, and to improve the skills of its workforce to ensure improved delivery against set targets. The City is also improving communication of programmes to communities to ensure that programmes such as its waste 'separation at source' programme have a better uptake from households in identified areas. The City will proactively respond to the risk of labour unrest to reduce the impact to service delivery.

A detailed review of our performance against SDBIP targets can be found at the end of each cluster review in this report, reflecting where our targets were either met or missed.

# Financial health overview

This report confirms that the City of Johannesburg has stabilised its finances. The City recorded significant progress towards the goal of financial sustainability and resilience as evidenced by its ability to generate a healthy net

surplus, improve cash and cash equivalents as well as its responsiveness to customers as part of resolving billing queries. During the year, four of the key ratios that measure prudent financial management improved, namely: solvency, debt to revenue, net operating margin and cash coverage. The City realised a surplus of R3.4 billion and thus increased its capital budget by over 60% for the 2013/14 financial year. Our total asset base increased by 7% to R60.2 billion, driven largely by our capital expenditure of R4.2 billion, increased debtors and a significantly improved cash position of R5.4 billion. Collectively these efforts improve the City's ability to achieve its medium-term goal of spending more towards infrastructure development as part of its commitment to spend R100 billion over ten years. The City still recognises that, despite this progress more work must be done to completely eliminate issues around billing. The City is committed to sound financial strategies and prudent financial management practices

# Organisational development overview

The City's biggest asset is its employees who bear responsibility for delivering its mandate to communities. They are the foundation and drivers of our collective success. Accordingly, the City strives to create value by attracting, developing and retaining skilled and competent people. Through our Human Resources Management (HRM) function, we are committed to inspiring and growing people through individual development analysis and plans, as well as career management programmes and by recognising performance excellence.

The City is committed to recruiting from within its communities while also ensuring a deliberate focus on developing a local skills base where this may not exist. Our Human Resources Strategy (HRS) is designed to develop professional, diverse and competent human capital to align with our vision of a world-class African city.

# **Auditor General Report**

In 2012/13 the City made significant progress and attained an Unqualified Audit Opinion, progressing from a position of a qualified audit in 2011/12. This reflects progress toward meeting the national target of 'Clean Audit 2014' for local Government. The City also improved its attainment of performance objectives by 45% from 2011/12 year, with 56% of all targets completely achieved and significant progress recorded towards the complete attainment of the rest of the City's objectives. The City is responding comprehensively to all matters raised by the Auditor General to ensure progress towards the national objective of a clean audit.

## Appreciation

I would like to express my appreciation for the support received from the political leadership in Council, including the Executive Mayor, Councillor Mpho Parks Tau and the Mayoral Committee, Speaker of Council and Section 79 Committees; as well as the City's advisory committees which encompass the Group Audit Committee and Group Performance Management Committee and Group Risk Committee. Administratively I would like to thank the Chief Operations Officer, Gerald Dumas, Group Heads, Cluster Convenors, Executive Heads, Boards of Directors, Managing Directors and the entire staff of the City and its entities for their continued support. Collectively we remain committed to efficient service delivery and the attainment of a liveable, sustainable and resilient Johannesburg.

Trevor Fowler
City Manager of City of Johannesburg
Metropolitan Municipality

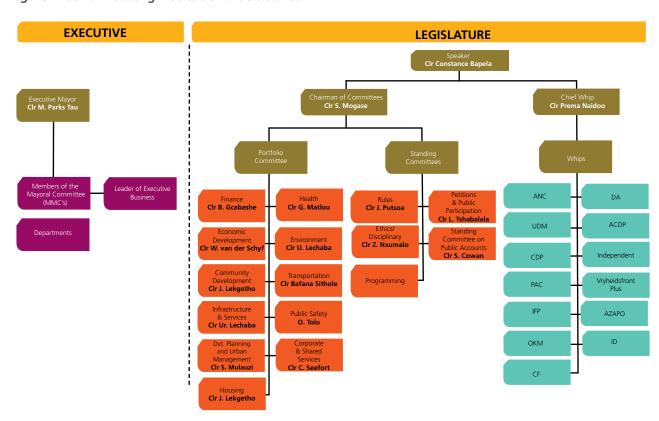

## Introduction

The City's governance and institutional practices are core to achieving its vision of a well governed, world-class African city; and its governance structures, systems and policies are underpinned by sound values and ethics to support the implementation of its *Joburg 2040* GDS. Over time, the City's governance models have been refined to facilitate a clear separation of policy-making, regulation and implementation. The City's core administration is responsible for service delivery, policy-making and regulation. Municipal Entities (MEs) form the implementation arm of the City and create focused, specialised and non-bureaucratic processes. Its regional structures monitor service delivery and citizen care and provide a link between the City, its citizens and other stakeholders.

Currently, the City implements a governance model similar to that of provincial and national parliament, emphasising the separation of executive and legislative functions to promote oversight, accountability and public participation. The separation of functions between legislative and executive arms of Council enhances oversight and public participation in Council programmes. This separation is achieved through the delegation of legislative and executive functions of Council to the legislative and executive arms respectively. Service delivery implementation and policy issues, such as integrated development planning (IDP) and tariffs, are delegated to the Executive, which is led by the Executive Mayor and supported by an administrative structure led by the City Manager. The legislative function of oversight is implemented by Council and its committees, led by the Council Speaker. The diagram below shows the positioning of Johannesburg's institutional structures.

Figure 2: Johannesburg institutional structures

#### **Governance structures**

Legislative arm of Council: Political leadership

**Speaker of Council** Councillor Constance Bapela

The Speaker is Chairperson of Council presiding over Council meetings in accordance with Council's Standing Rules. In Johannesburg, the Speaker is also responsible for Section 79 oversight committees as

well as for Councillor Affairs to develop political governance capacity among Councillors.

# Chief Whip of Council

Councillor Prema Naidoo

The Chief Whip of Council is an official office bearer, a member of the majority party and Chief Whip of the Majority Party.
The Chief Whip ensures proportional distribution of Councillors to various Committees of Council.

The Chief Whip maintains sound relations among the various political parties represented in Council.

#### Council oversight and scrutiny

In July 2012 Council established committees of Council in terms of Section 79 of the Municipal Structures Act, chaired by non-executive councillors from the majority party. These committees assist Council in executing its responsibilities. Section 79 Portfolio Committees perform an oversight role by monitoring the delivery and outputs of the Executive. These committees do not have any delegated decision-making powers. Their functions include:

- Reviewing, monitoring and evaluating departmental policies
- Reviewing and monitoring city plans and budgets.
- Considering quarterly and annual departmental reports.
- Examining the link between the City's strategy, plans and budgets.
- Holding the political Executive accountable for performance against policies and City priorities.

**Appendix B** contains a comprehensive list of all committees of Council and their functions.

In 2011/13 the City also introduced ground-breaking innovations to support greater oversight. This entailed creating oversight committees for both the Mayoral Office and Legislature.

In 2012/13 the mandate of the Legislative Arm of Council focused on the following themes:

- Accountability, oversight and scrutiny.
- Strengthening the capacity of the Legislative Arm of Council.
- Public participation to safeguard local democratic processes.
- Sound financial management.

Legislative functions of Council also include the approval of by-laws, policies, budgets, the Integrated Development Plan (IDP), tariffs, rates and service charges.

Political oversight functions of Council are exercised primarily through the work of Section 79 Committees. Clear guidelines pertaining to the way these committees handle oversight are outlined in the Oversight and Scrutiny Framework. Councillors also physically visit sites where projects - especially service delivery projects - are implemented to fulfil their oversight role. Additional oversight 'tools' include questions from individual Councillors to hold the Executive to account, as well as motions to ensure debate on Council issues.

To promote oversight and accountability, committees determine priority areas for oversight in respect of each portfolio. The various portfolios are guided by the priorities of the City, as contained in its strategic agenda. Quarterly oversight reports are submitted to Council and are based on departmental quarterly reports. In addition, committee visits to projects and service delivery sites assist and complement the Committees' oversight function.

Executive arm of Council: Political leadership

The Executive constitutes Council's policy and programme implementation arm. The Municipal Systems Act defines "executive authority" in relation to a municipality to mean the "municipality's executive authority envisaged in Section 156 of the Constitution" (read with Section 11 of this Act). Section 156 of the Constitution defines the executive role as the administration of local government matters and any other matters delegated to it by the national and provincial governments.

**Executive Mayor** Councillor Mpho Parks Tau

The Executive Mayor is tasked with the identification and prioritisation of community needs, drafting strategies to deliver those needs and to oversee the delivery of services by the City's administration.

#### The Mayoral Committee

Section 60 of Municipal Structures Act provides for establishment of a Mayoral Committee when a Municipal Council has more than nine members. The Executive Mayor appointed a Mayoral Committee from among elected Councillors. The City's Mayoral Committee performs those elements of the Executive Mayor's powers and functions as may be designated by the Municipal Council, exercising and performing them in support of the Executive Mayor. The City's Mayoral Committee ensures that service delivery takes place, including but not limited to improving efficiency, credit controls and revenue, and administration of the municipality. Annually, the Committee must report on community involvement and ensure regard is given to public views during consultations.

In 2012/13 the City's Mayoral Committee was composed as follows:

#### Cluster Mayoral Sub-Committees

The City has strengthened its governance structures to promote better coordination and integration of service delivery packages, as well as greater accountability and oversight. The City established sub-committees to attend to city-wide, cross cutting programmes. Mayoral Sub-Committees are complemented by a system of political oversight of key service delivery interventions in the regions to enable better coordinated service delivery. The sub-committees assist the Mayoral Committee in fulfilling its executive functions by enhancing decision-making and

focusing on the strategic mandate of the City.

The City has formed four clusters that are aligned with the principles of Sustainable Services; Economic Growth; Human and Social Development and Good Governance. These principles underpin the Joburg 2040 GDS, and enable the City to design targeted programmes to achieve the following long-term imperatives: eradicating poverty, promoting social inclusion; building an inclusive economy; providing sustainable services and settlements; and ensuring resource security and environmental sustainability.

**Table 4: Composition of sub-committees** 

| Sub-committee                | Focus area  | MMCs responsible  |
|------------------------------|---|---|
| Sustainable Services         | <ul> <li>Resource management of (water, energy)</li> <li>Sustainable Human Settlements</li> <li>Mass public transport and, non-motorized transport</li> <li>Climate change resilience</li> <li>Waste minimization</li> <li>Informal Settlement Upgrading</li> </ul> | <ul> <li>MMC: Development Planning</li> <li>MMC: Environment</li> <li>Infrastructure and Services</li> <li>MMC: Housing</li> <li>MMC: Transportation</li> </ul> |
| Economic Growth              | <ul> <li>Activist Government</li> <li>Job Intensive economic growth</li> <li>Small business, entrepreneurship and informal economy</li> <li>Competitiveness Support</li> <li>Smart City</li> <li>Financial Sustainability</li> </ul>                                | <ul> <li>MMC: Finance</li> <li>MMC: Economic Development</li> <li>MMC: Corporate and Shared Services</li> <li>MMC: Development Planning</li> </ul>              |
| Human and Social Development | <ul> <li>Cohesion and inclusion</li> <li>Community Safety</li> <li>HIV/AIDS and non-communicable diseases</li> <li>ECD, ABET and learning</li> <li>Food Security and poverty Support</li> </ul>   | MMC: Public Safety; MMC: Health and Human<br>Development; MMC: Community Development  |
| Good Governance              | <ul> <li>Clean, accountable and productive governance</li> <li>Civic collaboration and participation</li> <li>Citizen and Customer Care</li> </ul>  | <ul> <li>Executive Mayor; MMC Corporate and Shared<br/>Services</li> <li>MMC Finance</li> <li>MMC Economic Development</li> </ul>                               |

The main function of the Mayoral Sub-Committees is to provide political leadership, guidance and oversight for coordinated and integrated service delivery.

#### The mandate includes:

- Identifying priority multi-sectoral programmes for coordination and integration (Programme of Action Plan).
- Ensuring overall co-ordination and alignment of service delivery between Sectors/Portfolios within the cluster.
- Providing guidance and oversight in the implementation of service delivery programmes.
- Overseeing the development of business plans for crosssectorial programmes.
- Overseeing the allocation and use of resources for identified programmes.
- Monitoring progress and impact of identified programmes among other functions.

The City of Johannesburg's seven Regions (A-G) are unique in terms of location, socio-economic profiles and other characteristics. Through successful regional development the City is able to improve the quality of life of the local citizens, ensure sustainable and resilient service delivery, sustainable economic growth and promote a caring, responsive and activist local government.

In 2012/13 the City emphasised the role of Regions in the service delivery value chain as they are best positioned to co-ordinate, integrate, and monitor service delivery on the ground and also to ensure local stakeholder management. The City strategically strengthened and allocated leadership to the Regions to fulfil these very important functions through a political oversight mechanism, thereby providing a support structure for the Regions. Members of the Mayoral Committee were assigned political oversight responsibilities over service delivery implementation in each Region.

## Regional political oversight

In the 2012/13 financial year the Regional MMCs were:

- Region A: N. Molwele
- Region B: D. Bovu
- Region C: R. Moosajee
- Region D: C. Vondo
- Region E: S. Lemao
- Region F: R. Greef
- Region G: M. Mokoena

#### **Functions of Regional MMCs**

The key challenge for the City of Johannesburg has been to integrate service delivery at a regional and ward level as well as real-time service delivery monitoring and evaluation. Political oversight by the respective MMCs broadly involves:

- Overseeing resolution of regional service delivery issues that arise from time to time (e.g. petitions referred by the Chairperson of the Petitions Committee, citizen complaints through JO-SERVE or service delivery protests).
- Overseeing and advising Sub-committees and/or Executive Mayor on implementation of Regional Urban Management Plans.
- Identifying and escalating to relevant MMCs key service delivery issues per Region (e.g. by-law infringements).
- Coordination of quarterly service delivery forums (with ward councillors, communities, operational depots within the Region).

# Administrative governance structures

#### **Executive Management Team**

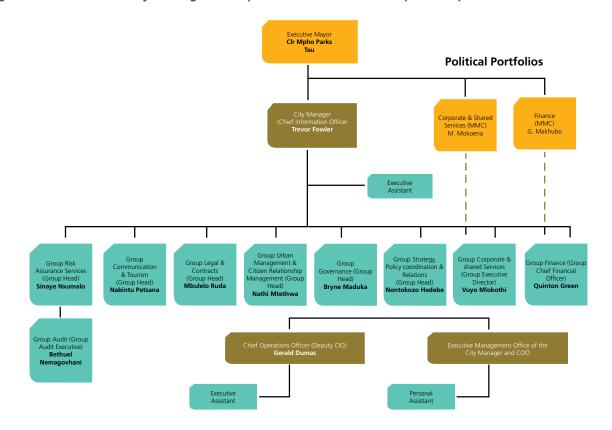

City Manager of City of Johannesburg Metropolitan Municipality Trevor Fowler

The City Manager is the accounting officer of the municipality, providing guidance on compliance with political structures, as well as the responsibilities of political office bearers,

officials of the municipality, and all City entities. The City Manager heads the City's administration and is Chairperson of the Executive Management Team. He is responsible for the day-to-day management and administration of the municipality. The City Manager operates in terms of relevant sections of the Municipal Structures Act, Municipal Systems Act and Municipal Finance Management Act.

In discharging his responsibilities in the 2012/13 financial year, the City Manager was assisted by the Executive Management Team, as represented by the diagram below:

Figure 3: Office of the city Manager, Group functions and relevant political portfolios

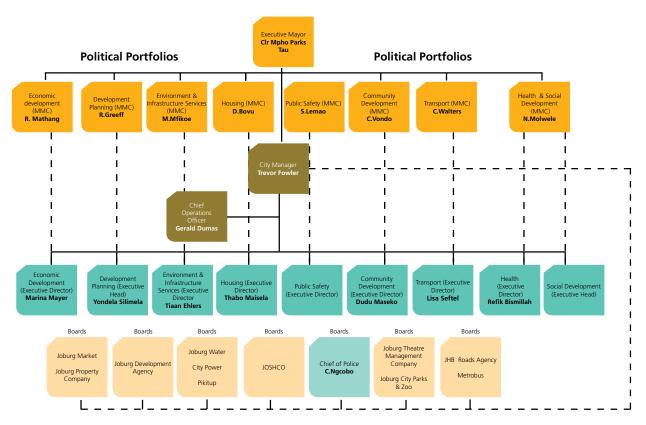

## **Municipal Entities**

The City established wholly owned municipal entities under the Companies' Act of 2008. Such entities exist purely as service

delivery agents for the City, who in this case, is the principal or shareholder. The entities are governed through a Service Delivery Agreement signed between the shareholder (City) and the company. Although the entities have an individual corporate identity, they remain fully controlled by the Metropolitan Council.

Figure 4: City of Johannesburg Line functions reporting to the City Manager, MEs and relevant political portfolios

# Corporate governance summary

To adequately discharge its governance responsibilities in line with applicable legislation and leading practice, the City established independent structures to provide unbiased opinions and guidance to Council. These structures include:

- Group Audit Committee
- Group Performance Audit Committee
- Group Risk Governance Committee
- Municipal Entity Board of Directors
- Municipal Entity Audit Committee
- Entity Social and Ethics Committee

These Committees comprise individuals who are not employees of the City. Committee members have broad competencies spanning specialised disciplines across the functional areas of Strategy, Finance, Legal, Risk Management, Engineering, Accounting, Performance management and Human Resources.

The City ensured the stability of the Entity Boards and Group

Committee in the year under review. This was achieved by retaining experienced members so that the strategic direction can be sustained uninterrupted. To counter some of the prevailing historical disadvantages created by Apartheid policies, the City encourages a developmental approach to capacitation of the Boards and Committees. This approach includes a mechanism whereby seasoned members rotate annually, thereby creating opportunities for new and less experienced individuals to serve with experienced members. This creates a considerable platform for growing the competencies of young professionals.

During the year, the city renewed its focus on governance and improved its governance footprint by creating a secretariat department called Group Governance. This department not only focuses on the entities and how they are governed but is also responsible for the governance standards for the entire City Group. Since its formation, Group Governance has embarked on a process to create and promote a stable environment for effective governance within the City. An essential aspect of this process is the development of a Governance Strategic Framework for the City, which will support and inform the City's Joburg 2040 GDS vision.

### **By-Laws**

The MSA 2000 s11 (3) (m) provides municipal councils with the legislative authority to pass and implement by-laws for the betterment of the community within the terms of the legislation. In 2012/13 the City considered two by-laws: the Waste Management By-Law and the Ombudsman By-law. Public consultations were conducted from March to February and from July to August 2013.

## **Anti-Corruption and fraud**

The risk of fraud and corruption was ranked seventh (7th) in the top 15 strategic areas identified in the financial year. Therefore, some of the strategic policy interventions include:

- Developing a city-wide anti-corruption and anti-fraud strategy.
- Establishing a Mayoral Anti-Corruption Advisory Panel.
- Implementing a centralised whistle-blowing mechanism by way of a centralised and independent 24-hour fraud hotline service, anti-corruption and anti-fraud awareness campaign to mobilise City officials and citizenry.
- Introducing fraud awareness workshops.

There is a concerted effort to conduct fraud risk assessments focusing on processes, such as supply-chain management, so that the City can implement appropriate systems of controls to either prevent or detect incidents of fraud, corruption and theft.

Since the launch of the anonymous tip-off hotline, which is available in all 11 official languages, the City has seen a dramatic increase in the number of tipoffs received from the public. The calls received range from service delivery related issues to illegal water and electricity connections, other irregularities and allegations of fraud and corruption. The City notes the need to increase capacity for forensic investigations, and is developing strategies accordingly. The City is also working with the country's law enforcement agencies. A number of officials have been suspended and disciplinary action taken, and ten employees have been arrested

# State of internal controls within the Group

The City's Group Internal Audit Unit follows an effective combined and integrated assurance approach to enhancing the provision of value-add assurance services to the City. The Group Internal Audit Unit is mandated in terms of its approved internal audit charter and has functional accountability to the Group Audit Committee. During the financial year, Group Internal Audit focused on the effective implementation of the City's Core Administration's annual audit coverage plan, which is risk based.

# Enterprise risk management (ERM) achievements

The City's drive to embed risk management processes and policies throughout its operations improved during the year, albeit there are still areas requiring interventions from management and the Group Risk and Assurance Services Department.

Every department and municipal entity has an operational risk register for both strategic and unit-level risks. During the year, city-wide strategic risk assessments were performed and the City's 'top-15 strategic risk register' was regularly monitored and updated. The implementation of risk treatment plans was monitored quarterly and risk movements were reported accordingly.

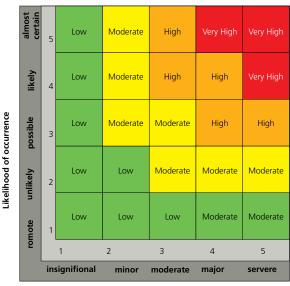

Although the implementation of risk treatments and mitigation action plans progressed well during the year, various key risk exposures remained high. This was often due to the nature of the risk area and external influencing factors. By year-end, the City's overall residual risk profile had improved significantly. For example, improvements were observed in the management of financial sustainability risk, and the implementation of infrastructure projects.

The table that follows reflects the City's integrated approach to enterprise risk management (ERM) by linking the top five identified risks to the City's strategic outcomes and Mayoral priorities. It ranks each risk according to the relative priority settings within the overall hierarchy of risks.

The table further highlights the potential sources of risks and provides a view of established controls and on-going mitigation activities.

The residual risk 'heat map' is a guide to the priority levels for each of the risks outlined in the table that follows.

Figure 5: Residual risk 'heat map'

Potential impact / consequences

# Strategy and service delivery performance

# Planning for the future: Joburg 2040

## Vision

Johannesburg – a World Class African City of the Future – a vibrant, equitable African city, strengthened through its diversity; a city that provides real quality of life; a city that provides sustainability for all its citizens; a resilient and adaptive society.

#### **Values**

Our Vision is informed by a value system that promotes: **Resilience:** Our ability to work together and support each other in times of need and to adapt to difficult situations by recognising our strengths and assets, and mobilising these to deliver on our promises.

**Sustainability:** Using our resources to address inequality and poverty and to create a better life for all. We are committed to ensuring that resources are carefully managed to achieve our long-term vision without compromising the environment for future generations.

**Liveability:** Creating an environment that promotes civic engagement and a sense of place through access to safe sustainable choices for economic opportunities. Johannesburg is committed to providing access to adequate, affordable, environmentally sustainable and coordinated transport system as well as housing opportunities.

# Committing to a promising future

The City of Johannesburg is committed to proactive, quality service delivery and the creation of a city environment that is resilient, sustainable and liveable. The City's "Joburg 2040" initiative is facilitated through targeted long-term programmes to promote quality services; to drive economic growth; to develop our society and the individuals within it; to ensure the optimal management of natural resources; to safeguard the environment; and to promote sound governance in all the City does.

Six principles inform Joburg 2040:

- Eradicating poverty
- Building and growing an inclusive economy
- Building sustainable human settlements
- Ensuring resource security and environmental sustainability
- Achieving social inclusion through support
- Enabling and promoting good governance.

# Operating context

The City's "Joburg 2040" Strategy acknowledges that, worldwide, cities experience increasingly complex challenges. With the future of cities becoming more unpredictable and uncertain, the development paradigm in relation to cities has changed. In this context, city strategies must navigate uncomfortable tensions between defining a chosen development growth path, and accommodating uncertainty resulting from population growth, migration, urbanization, climate change, poverty and inequalities.

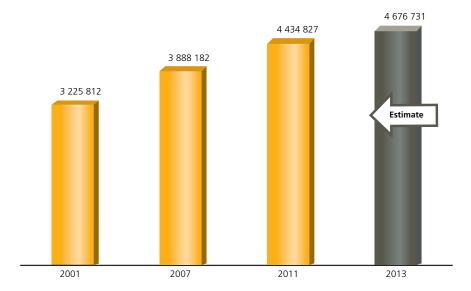

The following summary view of the City of Johannesburg highlights some of the key challenges associated with factors of population growth, unemployment, regionally concentrated economic growth and environmental sustainability. This overview provides a meaningful backdrop for a discussion on the City's integrated approach to long-term value creation for its citizens.

## **Population growth**

The growth in urban population in South Africa is outstripping national population growth. This implies an increasing urgency for infrastructure development in South Africa's cities to support increases in population. This presents challenges for the management of water and sanitation, waste, energy, electricity, transport and social infrastructure.

Johannesburg is home to more than 4.4 million people, accounting for about 36% of Gauteng's population and 8% of the national population. Over the last decade the City has grown faster than the Gauteng region as a whole, as it continues to be the leading metropolitan gateway for migrants from other provinces and international migrants.

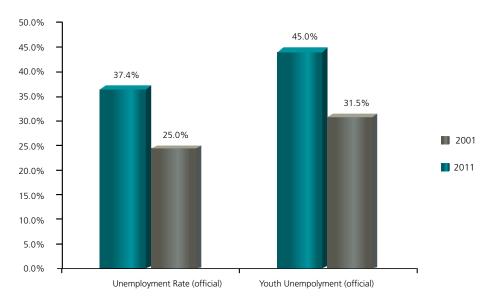

Figure 4: City of Johannesburg Population Movement

## **Unemployment**

Youth unemployment remains a major challenge both nationally (above 35%) and for the City.

Figure 5: Unemployment Rate/Youth Unemployment Rate<sup>2</sup>

The City faces a 31.5% youth unemployment rate, which is atypical of a city that attracts youth looking for employment opportunities. Johannesburg is populated predominantly by youth, concentrated in working age group of between 20 years and 39 years. These demographics result primarily from economic immigration. As an economic hub of the country and the region, Johannesburg is a primary destination for job seekers across the region and the country as a whole. However, by attracting the young population, the City is presented with a growing youth unemployment challenge.

The issue of unemployment cannot be meaningfully addressed without a deeper investigation of youth unemployment. Johannesburg has made significant progress through positive economic growth and programmes such as Expanded Public Works Programme (EPWP) among others, resulting in a 13.5% reduction in youth unemployment over the last decade. The City is committed to creating value through its long-term Growth and Development Strategy (GDS) to generate sustained growth and to address the challenges of unemployment.

<sup>&</sup>lt;sup>1</sup>StatsSA Census 2011. The 2013 estimate was obtained from Municipal IQ.

<sup>&</sup>lt;sup>2</sup>StatsSA Census 2011

## **Economic growth**

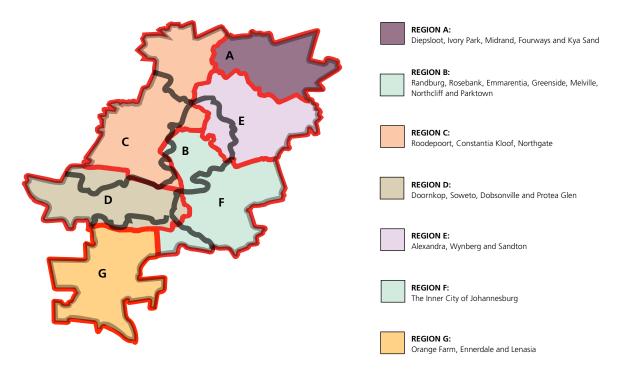

Based on the latest census data (Census 2011) the bulk of the population (12.27 million) is concentrated in the province of Gauteng, both as a consequence of population growth and increased migration. The City's economy is the main driver of national growth, historically performing at 50% higher in growth rates relative to national growth. However, given this strong link between the City's economy and that of South Africa, the impact of a struggling global economy is also felt locally. During 2012 manufacturing growth slowed and was further affected by shrinking export sales, high production costs and the increasing cost of credit, resulting

Figure 6: City of Johannesburg regions

in a slow-down of the GDP to 2.7% during 2012. Within Johannesburg, the slow-down of the economy was evident in the moderate rate of economic growth at 2.5% in 2012, down from 3.5% in 2011.

## **Inequality and poverty**

The factors contributing to poverty encompass both spatial inequality and structural jobless economic growth, which is reinforced by low levels of skills. These factors inform the City's Developmental Service Delivery approach and Public Works Programmes. The city recognises that spatial inequality is a contributing factor to poverty.

In Johannesburg, 'Region G' has the highest number of people living in poverty followed by 'Regions D' and 'A', while 'Region B' has the lowest number of people living in poverty. Although a considerable number of Johannesburg's residents are poor, it has a substantial middle and upper class which competes in global financial and trade markets and adheres to international norms of urban consumption and culture. In addition, the city's growing middle class presents opportunities for economic growth and supports the City's drive to increase its revenue base. This growth requires that a variety of services and amenities are made accessible to all citizens.

# **Food security**

Food security is a significant challenge for the City. Poor households are particularly at risk given the high proportion of income used for food. Statistics reflect that as many as 42% of poor households are 'food insecure'. Poverty and

food insecurity have a clear impact on health. The City identified specific social mobility and human development priorities to address the issue of poverty and of food security.

# A value-based strategy

The City of Johannesburg's Growth and Development Strategy (GDS) – which will lead the City toward its Vision of 2040 - is underpinned by a set of core values, a tangible vision of the future, and importantly, measurable outcomes to facilitate meaningful progress reporting.

Six value-based imperatives inform the GDS:

- Assisting the poor in proactive ways.
- Engaging more citizens to promote shared economic opportunities.
- Building 'equality neighbourhoods' and integrating communities.

- Protecting the natural environment for future generations.
- Promoting unity and togetherness to ensure a collective sense of belonging.
- Promoting meaningful interactions between the City and its citizens.

These imperatives are mutually expressed in the maxim: "Johannesburg 2040 vision – a vision for the City of the future".

"Johannesburg – a World Class African City of the Future – a vibrant, equitable African city, strengthened through its diversity; a city that provides real quality of life; a city that provides sustainability for all its citizens; a resilient and adaptive society." The GDS is the City's long-term response to emerging challenges and opportunities, a lens through which the City views, conceptualises and enhances its strategic approach to development issues. It represents a commitment to the citizens of Johannesburg that their city will not treat them as passive recipients of government services, but rather as active agents in shaping their own future. As local government, creating spaces for conversation is the city's duty as it seeks to partner its citizens in addressing the challenges and opportunities going forward. The GDS not only provides a vision of the future, but importantly, it defines clear outcomes against which to measure progress.

*Joburg 2040* GDS is based on four outcomes that promote resilience, sustainability and liveability:

**Table 5: Joburg 2040 GDS Outcomes** 

|           | Outcomes  | Description   |
|-----------|---|---|
| Outcome 1 | Improved quality of life and development-<br>driven resilience for all.   | The City envisages a future that presents significantly improved human and social development realities by targeting poverty reduction, food security, self-sustainability development initiatives, improved health and life-expectancy, and authentic social inclusivity. By 2040, the City aims to achieve a significantly enhanced quality of life for all.  |
| Outcome 2 | Provide a resilient, liveable, sustainable urban environment underpinned by infrastructure supportive of a low-carbon footprint.  | The City plans to lead in the establishment of sustainable and eco-<br>efficient infrastructure solutions (e.g. housing, eco-mobility, energy,<br>water, waste, sanitation and information and communications<br>technology), to create a landscape that is liveable, environmentally<br>resilient, sustainable, and supportive of low-carbon economy initiatives.  |
| Outcome 3 | An inclusive, job-intensive, resilient and competitive economy that harnesses the potential of citizens.  | The City of Johannesburg plans to support the creation of an increasingly competitive, 'smart' and resilient city economy, when measured in relation to national, continent and global performance. The City aims to promote economic growth and sustainability through the meaningful mobilisation of all who work and live in Johannesburg, and through collaborating with others to build job-intensive long-term growth opportunities and prosperity. |
| Outcome 4 | A high performing metropolitan government that pro-actively contributes to and builds a sustainable, socially inclusive, locally integrated and globally competitive Gauteng City Region. | The City envisages a future where it will drive a caring, responsive, efficient and progressive service delivery and developmental approach within the Gauteng City Region (GCR) and within its own metropolitan space, to enable both to reach their full potential as integrated and vibrant spaces.  |

# Joburg 2040 GDS structure and implementation

The *Joburg 2040* GDS identifies a set of long-term tactical outputs and qualitative outcomes to realise the City's long-term vision. The City's five-year IDP translates the long-term outcomes into implementable programmes for a specific term of office. Business planning is a short-term planning tool that addresses annual operational planning. It is the basis for

budget allocations that allow for the implementation of fiveyear IDP sub-programmes and projects. The City has sought to capture the complex multiple processes of planning through:

- Long-term planning: The Joburg 2040 Strategy.
- Medium-term planning: The revised 2012/16 IDP.
- Short-term implementation: The core departments and municipal entities' annual business plans and Service Delivery and Budget Implementation Plan (SDBIP).

Figure 7: The complex process of planning: Long-term, medium-term and short-term planning

The City's ten strategic "Priorities" were approved with a view to reducing poverty and inequality, promoting investment and business retention, reducing the cost of service delivery, and redeveloping areas in decline.

# Priority programmes

Various priority plans were identified to launch the implementation process and to form the basis of the approved 2012/16 IDP and annual operational plans, which consist of the annual service delivery budget implementation

plan (SDBIPs) and business plans.

These priority plans and subsequent projects are not simply a 'means to an end' but drive the following short, medium and long-term objectives:

- Short term: emphasise continuity and address basic service delivery.
- Short term: enable conditions and catalytic interventions.
- Medium term: focus on the process of deep transformation.
- Long term: enable citizens to lead interventions in a self-sustaining manner where appropriate.

Figure 8: Ten strategic priorities for 2012/13

The following key IDP priority programmes have been approved for implementation in the current term of office:

Table 6: IDP priority programmes approved for implementation for the current term of office

| Priority programme                      | Programme enablers  |
|---|---|
| Financial sustainability and resilience | <ul> <li>Enhancing revenue.</li> <li>Optimising customer service centres and channels to enhance customer care.</li> <li>Creating a sound financial management environment.</li> </ul>  |
| Shift to low carbon infrastructure      | <ul> <li>Promoting 'Demand Side Management'.</li> <li>Smart metering.</li> <li>Energy generation and sales (energy mix)</li> <li>Gas to landfill.</li> <li>Timing of use management at household level.</li> </ul>  |
| Integrated waste management             | <ul><li>Separating waste at source.</li><li>Composting of organic waste.</li><li>Recycling initiatives.</li></ul>   |
| Greenways and mobility                  | <ul> <li>Quality service delivery of Rea Vaya BRT.</li> <li>Restoring pedestrian bridges and dams to protect lives and livelihoods.</li> <li>Re-sealing of roads and promoting road safety and public transport usage.</li> <li>Upgrading gravel roads.</li> <li>Introducing managed lanes, walking, cycling and other recreational activities.</li> <li>Integrating different modes of public transport – especially with rail.</li> </ul> |
| Sustainable human settlements           | <ul> <li>Providing basic services to vulnerable households.</li> <li>Upgrading marginalised areas/ areas of high deprivation.</li> <li>Formalisation and security of tenure.</li> <li>Enabling housing typologies (e.g. social housing, revitalisation of rental stock) that support Transit Orientated Development.</li> </ul>   |
| Urban water management                  | <ul> <li>Reducing water losses.</li> <li>Introducing stormwater management programmes.</li> <li>Implementing water demand management strategies.</li> <li>Diversifying sources of water (e.g. rain water harvesting) to address water scarcity and to increase revenue.</li> </ul>  |
| Citizen participation and empowerment   | <ul> <li>Promoting community-based planning and budgeting.</li> <li>Reviving 1-stop Centres targeted at citizen partnerships and engagements and citizen empowerment.</li> </ul>  |
| Strategic communications and marketing  | <ul> <li>Devising an integrated communication and marketing strategy to support the City Strategy.</li> <li>Promoting the 'Buy, Sell, Invest and Visit' initiative.</li> <li>Entrenching and positioning Johannesburg as an ideal destination.</li> </ul>   |

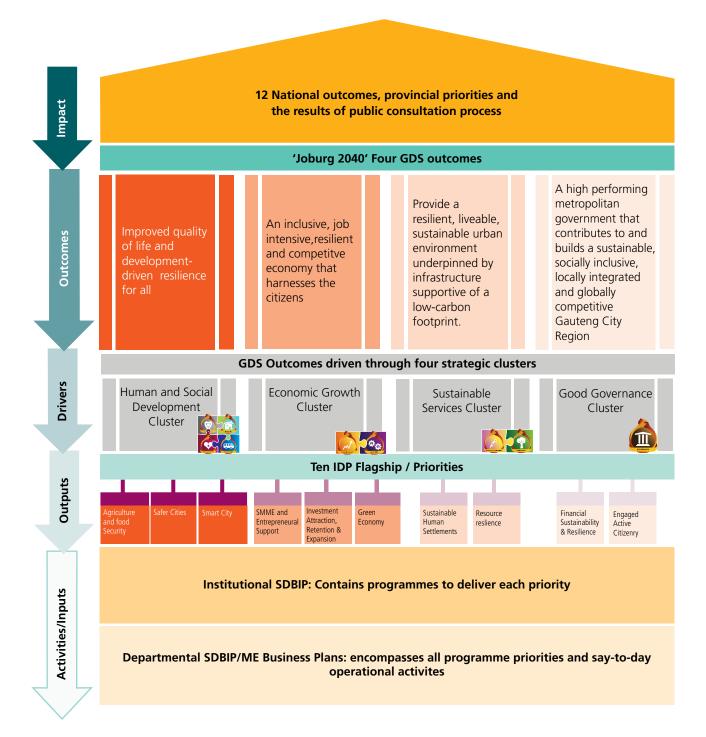

| Priority programme   | Programme enablers   |
|--|--|
| Human capital development and management   | <ul> <li>Introducing efficiency and productivity benchmarks, assessment and monitoring instruments.</li> <li>Creating labour stability.</li> <li>Integrating the COJ Group Human Capital Governance Framework and strategy.</li> <li>Aligning talent management in support of the City's imperatives through a skilled workforce (by developing, retaining and acquiring the appropriate skills).</li> <li>Establishing a municipal academy / university.</li> </ul> |
| A safe, secure and resilient City that protects, serves, builds and empowers communities | <ul> <li>Promoting community-based policing and partnerships.</li> <li>Implementing 'smart technology' (implement disaster management centres).</li> <li>Promoting and facilitating life-long learning.</li> <li>Introducing safe social spaces for cultural interaction.</li> <li>Promoting public safety.</li> <li>Introducing a 'healthier lifestyles' programme.</li> </ul>  |
| Economic growth  | <ul> <li>Promoting area-based development.</li> <li>Implementing the Oasis in Soweto initiative, Alexandra and Ivory Park.</li> <li>Accelerating the implementation of a skills hub.</li> <li>Introducing Joburg Broadband.</li> </ul>   |
| A city where none goes hungry  | <ul> <li>Subsidising food programmes to ensure safe, affordable food for all (people's restaurants, new markets, food exchanges and so forth.)</li> <li>Introducing Agri-resource centres.</li> </ul>  |

These flagship programmes contextualise and inform the City's performance for the period under review, as reported in Chapter 3 of this report.

Figure 9 provides a consolidated view of the various strategic components impacting the City's GDS, such as the South African Government's 12 National Outcomes, provincial priorities and the results of the public consultation process. It further shows the integration between the outcomes of

the GDS - as driven through four strategic clusters - and the ten IDP priorities; and reflects the ultimate delivery of strategic outcomes through the City's Institutional SDBIP, Departmental SDBIP and Municipal Business Plan.

Figure 9: Integrated approach to long-term value-creation

# Johannesburg's Spatial Development Framework (SDF)

The City's long-term strategy is supported by a Spatial Development Framework (SDF), which provides a structural context for delivering on its deliberate plan to restructure and re-engineer the City's urban form. The SDF is underpinned by a set of policies and strategies which are used to direct the City's strategic decision-making processes and policy development for local area development and land use management. Johannesburg population distribution highlights the need for effective planning that will address the issues of a growing population and increasing urban edge. The SDF is focussed on accessibility, efficiency and the City's sustainability aspirations, as illustrated below.

Table 7: Spatial Development Framework (SDF) principles and outcomes

| Principles     | Outcomes  | Key to Implementation  |
|----------------|---|--|
| Sustainability | <ul> <li>Responsible use of the City's natural and heritage resources (water, open spaces, rivers and so forth).</li> <li>A sustainable rates base and financial model.</li> <li>Safe and secure urban environments promoted through safety and design principles.</li> <li>Affordable energy supply and consumption patterns.</li> <li>Low emissions and pollution levels.</li> <li>Promotion of food security within the city and province.</li> <li>Protection and conservation of the City's cultural heritage.</li> <li>Sustainable economic growth and job creation.</li> </ul> | <ul> <li>Demand management and resource protection.</li> <li>Protection and management of environmental systems.</li> <li>Quality of infrastructure and service delivery (engineering and social) – the role technology can play in future delivery modes and management.</li> <li>Sustainable human settlements – affordable, sustainable housing solutions.</li> </ul> |
| Efficiency     | <ul> <li>An efficient and robust urban form and structure that facilitates:</li> <li>Appropriate and functional service delivery.</li> <li>Affordability of business and living costs.</li> <li>Managed growth within the constraints of future plans relating to infrastructure provision.</li> <li>A connected and effective movement system (in terms of time and cost).</li> </ul>  | <ul> <li>High density, compact, mixed use urban systems.</li> <li>An efficient and affordable public transportation system.</li> <li>Pedestrian-friendly cities and neighbourhoods.</li> <li>Quality of infrastructure and service delivery.</li> </ul>  |
| Accessibility  | <ul> <li>Facilitating physical access to opportunities for all communities and citizens through an economy that caters for a full spectrum of skills and experience for job seekers.</li> <li>Diversity of opportunities, e.g. economic, social and institutional, afforded by the City.</li> <li>All modes of transport supporting good access to opportunities</li> <li>A range of housing typologies and tenure models enabling residents to live with dignity and enjoy quality of life.</li> </ul>   | <ul> <li>An efficient and affordable public transportation system.</li> <li>Pedestrian friendly cities and neighbourhoods.</li> <li>Avoid large enclaves of poverty</li> </ul>   |

# Strategies for spatial development

The development principles of the SDF influenced the City's six spatial development strategies. The strategies enable the City to address alternative outcomes where undesirable urban trends occur in the City. These strategies are in line with the *Joburg 2040* Strategy principles and outcomes.

# Strategy 1: Supporting an efficient movement system

The desired urban form for this strategy includes multi-modal transportation and land-use patterns that support public transport and pedestrian movement. It further prioritises the development of existing public-transport infrastructure, especially for higher density residential uses.

#### Strategy 2: Ensuring strong viable nodes

The desired urban form for this strategy includes a managed

hierarchy of nodes within the City. Non-residential uses are limited to existing and emerging, managed nodal points and an increased profile of the pedestrian and public-transport aspects of the nodes.

# **Strategy 3: Supporting sustainable environmental management**

The desired urban form for this strategy emphasises public space, i.e. the pedestrian environment, public parks and facilities, and prioritises the protection of wetland systems, priority habitats and biodiversity areas.

# Strategy 4: Initiating and implementing corridor development

The desired urban form for this strategy includes delineation of two development corridors, focused infrastructure delivery to support corridor development and a series of goals and objectives established per corridor.

# Strategy 5: Managing urban growth and delineating an urban development boundary

The desired urban form for this strategy includes infill, "brown-fields" developments, the abatement of urban sprawl on the periphery of the City and conservation of the rural character of areas beyond the urban development boundary.

# Strategy 6: Increased densification of strategic locations

The desired urban form for this strategy includes higher densities and clustered activities in identified strategic locations and coordinated investment in infrastructure to support densification initiatives.

## Sustainable Services Cluster

Provide a resilient, liveable, sustainable urban environment underpinned by infrastructure supportive of a low-carbon footprint

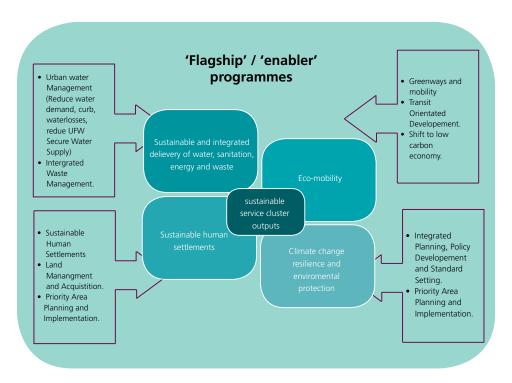

# Resilience through structural change

The City's Joburg Vision 2040 strategy promotes interventions to adapt and shape the urban environment through structural changes that promote equality, access to economic opportunities and the efficient use of land and energy resources.

The most efficient urban form is compact, with mixed land-use and an extensive public transport network that includes high intensity movement corridors, with attractive environments for walking and cycling.

Energy efficiency is not the only reason for promoting compact cities - there are also social and economic sustainability reasons, which encompass issues of access, inclusion, health, social cohesion, household savings and air quality. The Sustainable Services Cluster intervenes directly in the physical adaptation and transformation of the City, with the prime objective of progressively creating a metropolitan environment that is resilient, liveable and sustainable - both for Johannesburg and the greater city-region, of which it is part.

Figure 10: Outputs for the Sustainable Service Cluster, with associated 'Flagship' / 'enabler' programmes

# Performance highlights

Table 8: performance highlights for the Sustainable Service Cluster

# Performance overview

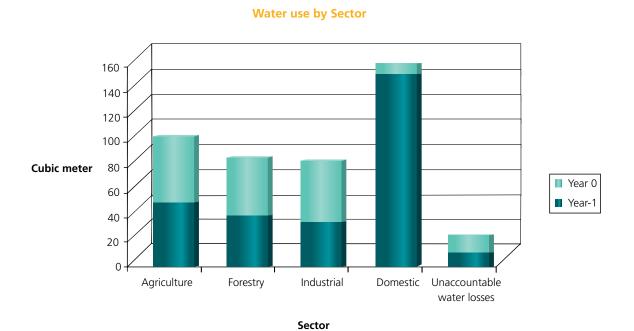

| Service area                   | Performance highlight  |
|--------------------------------|--|
| Urban water                    | The year's percentage of unaccounted for water (UFW) was at 32.4 %, with 14.2 % relating to physical   |
| management                     | losses and 17.2% being commercial losses.  |
|                                | Meter reading performance increased to 86.32%.   |
|                                | Drinking water quality recorded at 99.9% (target: 99%) and the overall final treated effluent quality recorded at 93.3% (target: 97%).   |
|                                | BBBEE recognition target of 75% for this service area was exceeded, with an achievement of 92% (R288.8 million) and percentage spend on Qualifying Small Enterprises (QSE) and Exempted Micro Enterprises (EME) suppliers was 115% (R50.3 million) against target of 60%.  |
|                                | Unplanned water service interruptions response times recorded at 84.16% (target: 91%) and sewerage blockages emergency response times recorded at 95.26% (target: 95%).  |
|                                | Joburg Water provided water services LOS-1 (communal standpipe within 200m), with performance at 98.10% against a plan of 98.05%.  |
|                                | Installation of 27 091 solar water heaters (geyser) in various areas including Alexandra, Devland, Lehae, Pimville, Pennyville, Tshepisong and Vlakfontein.  |
|                                | Installation of 5 343 public lighting units during the year.   |
|                                | A total of 3 307 households were electrified during the financial period.  |
|                                | The EPWP initiative created 3 318 work opportunities for the financial year.   |
| Integrated waste<br>management | Pikitup remained within the target of maintaining the 123 informal settlement areas at the multiple days per week schedule, and increased the service to 133 informal settlements during the last quarter of 2012/13.  |
|                                | 22 Hostels were cleaned on a regular basis during the year and were able to maintain a 'Level 3' cleanliness ranking.  |
|                                | Pikitup achieved overall 53.62% on landfill compliance and 68% for operational sites.  |
| Greenways and mobility         | Rea Vaya services reflected a reliability of fleet and performance according to schedule. However, labour instability affected overall numbers of passengers transported. An annual average of 35 953 passengers per day were transported during the year.   |
|                                | The annual target on Phases 1 and 2 of the Rea Vea infrastructure project (roadways, stations and depot) was achieved. 4.92 Kilometres of roadways and four stations were completed.   |
|                                | 16 489 457 Passengers were commuted by Metrobus during the year.   |
|                                | Gravel roads were upgraded to surfaced standards in Braamfischerville, Diepsloot, Ivory Park and Orange Farm.  |
|                                | Open storm water drains were converted to underground systems in Braamfischerville, Diepsloot, Alexandra and Orange Farm. Designs were drafted for the rehabilitation of Naledi bridge, New Canada and Emmarentia Dam.   |
|                                | Construction was started on Alexandra and Le Roux Avenue bridges.  |
|                                | The repair of the sinkhole in Anchorville, Lenasia, reflected the JRA's state of readiness to respond to emergency situations without compromising supply chain management processes or the quality of the end product.  |
|                                | The City allocated 90% of its total capital expenditure for the 2012/13 financial, which is an improvement of 4% compared to the previous year.  |
|                                | During the review period, various programmes were implemented to address storm water improvements, city-wide road resurfacing and reconstruction, the upgrading and installation of traffic signals, and sinkhole repairs. A challenge affecting service delivery during the year was the lack of reliable fleets. |

| Service area          | Performance highlight   |
|-----------------------|---|
| Shift to a low carbon | Completion of Phase 1 of the City's Spatial Development Framework.  |
| economy               | Completion of the final draft 'Building Retrofit for Energy Efficiency Guideline Document'; completion of the framework for the 'Johannesburg Built Environment Standards and Guidelines' (the Joburg 'Red Book'); and completion of the 'Future City Model', including 3-D images of the future City form, from 'Decade 0' (present day) to 'Decade 3' (2040). |
|                       | A 3% reduction of E.coli was achieved for the review period. The majority of monitoring is done in indigent communities to ensure good quality of surface water.  |
|                       | The City established six waste sorting facilities (buy back centres) and achieved an 8% diversion of waste destined for landfills.  |
|                       | The City accumulated 88 987 Verifiable Emission Reductions (VERs) from the 'landfill gas to energy' project at two landfill sites, namely Marie Louis and Robinson Deep. The VERs can be claimed from The United Nations Framework Convention on Climate Change (UNFCCC) as certified emission reductions, commonly known as carbon credits.                    |
|                       | The City achieved an 8% diversion of waste to landfill (2011/12: 7%).   |
|                       | In terms of waste licencing, 277 registrations were undertaken during the year (2011/12: 498) and 607 licenses issued (2011/12: 1 160).   |
|                       | In terms of monitoring environmental compliance of flagship projects (Alexandra Renewal Project, Cosmo City and Gautrain) the City achieved an environmental compliances rate of 93.75% during the year (2011/12:94.6%).  |
| Sustainable human     | 3 470 Mixed income housing opportunities were delivered against a target of 6 800 units.  |
| settlements           | Rental collection reached 58.13%, despite efforts to ensure a 100% expenditure on repairs and maintenance on rental units.  |
|                       | Challenges for the year included the slow pace of formalising informal settlements; budgets cuts that resulted in reduced delivery; the misalignment of delivery targets with key departments; a lack of monitoring and evaluation capability; and unsatisfactory communication of the Department's programmes to the electorate.                               |

## **Water provision**

Joburg Water provides services to approximately 750 000 domestic, commercial and industrial customers, constituting an estimated consumer base of 3.8 million people. The City's service area stretches from Orange Farm (south) to Midrand (north), Roodepoort (west) and Alexandra (east).

Figure 11: Total use of water by sector (cubic meters)

The City introduced programmes to facilitate pipe replacements, pressure management and waste water upgrades, all of which are essential for maintaining service reliability and preventing leakage deterioration. Additional service benefits resulting from these programmes include more accurate metering and reduced interruptions to supply. Joburg Water targeted 26 suburbs with 46 kilometres of water pipelines that have a remaining life of less than two years. During the year, the replacement cost of near-redundant pipelines was R45 million. To avoid the negative impact imposed by rising electricity prices, the City implemented a project to promote low consumption, using biogas to generate energy as a fuel source to provide electricity at the Northern Waste Water Treatment Works. The City intends to expand similar innovations to other Waste Water Treatment Works.

The City developed a consolidated infrastructure plan (CIP) to inform future capital investment plans for new infrastructure and to refurbish or upgrade existing infrastructure. The CIP facilitates funding of maintenance plans to keep current assets in good working order. Phase 1 of this plan was developed in 2012/13 and is assisting the City to identify and prioritise bulk infrastructure upgrading and renewal projects for the next ten years. R354 Million has been allocated for commencing new projects in the year ahead. The majority of the investment has been allocated toward the upgrade and renewal of marginalised areas in Soweto and bulk water projects.

The current percentage of unaccounted for water (UFW) is at 32.4 %, with 14.2 % relating to physical losses and 17.2% being commercial losses.

During the year, programmes were implemented to reduce water losses. Technical, social and financial interventions are being implemented to reduce the current UFW from 29.5% to 22% by 2016/17. It is anticipated that water savings resulting from these programmes will amount to R368 million in financial value by the end of 2013/14.

Water service delivery levels

Water and treated effluent quality - In compliance with both South African National Standard (SANS) 241 and Department of Water Affairs (DWA) Effluent Discharge Permits, drinking water quality and the overall final treated effluent quality were 99.9% and 93.3% against the targets 99% and 97%, respectively.

Water and sewer incidents response times - The unplanned water service interruptions and sewerage blockages emergency response times were 84.16% and 95.26% against the targets of 91% and 95% respectively.

The table below provides details pertaining to water services standards as per National Treasury requirements and how the City performed during 2012/13 compared to the previous three years.

Table 9: Water service delivery levels

| Households  |                   |                   |                   |                  |  |  |  |  |  |
|---|-------------------|-------------------|-------------------|------------------|--|--|--|--|--|
| Description                                       | Year -3 (2009/10) | Year -2 (2010/11) | Year -1 (2011/12) | Year 0 (2012/13) |  |  |  |  |  |
|   | Actual no.        | Actual no.        | Actual no.        | Actual no.       |  |  |  |  |  |
| Water: (above min level)                          |                   |                   |                   |                  |  |  |  |  |  |
| Piped water inside dwelling                       | 972 657           | 972 657           | 972 657           | 972 657          |  |  |  |  |  |
| Piped water inside yard (but not in dwelling)     | 45 835            | 45 835            | 45 835            | 45 835           |  |  |  |  |  |

#### Access to basic services

The City made progress with regards to basic water programme in 2012/13, Joburg Water provided water services LOS-1 (communal standpipe within 200m), and the performance was 98.10% against a plan of 98.05%.

Figure 12: Access to water

Water service policy objectives derived from the IDP

Table 11 contains the Electricity Services policy objectives derived from the IDP and shows a comparison of performance for 2012/13 relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

## **Waste Water**

The City of Johannesburg's sanitation status is above the minimum requirements. A main feature for 2012/13 was the installation of flushing toilets, with the main aim of eradicating the bucket system in the City of Johannesburg. Figure 13 shows that this goal has been achieved

Figure 13: Performance of sanitation service delivery for the period 2012/13

#### Access to sanitation

The Basic Sanitation Programme for the period 2012/13 progressed well. The City achieved 91.48% coverage of sanitation services (ventilated pit latrines) in the less formal areas, against a target of 91.40%.

Figure 6: Access to sanitation for the period 2012/13

Waste water (sanitation) service policy objectives derived from the IDP

Table 16 contains the waste water policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the next three years, as envisaged in the IDP. The past two financial years indicate the performance progress achieved by the entity.

Table 16: Waste water (sanitation) service policy objectives derived from the IDP

## **Electricity services**

City Power Johannesburg (SOC) Ltd is the electricity distribution service provider for Johannesburg Council. The business's core competency is to purchase, distribute and sell electricity within its geographical business footprint. The Council, by means of a Service Delivery Agreement, regulates service in respect of financial issues (such as tariffs and capital expenditure), human resource issues (such as skills development), delivery targets (maintenance of assets and addressing assets), and standards of customer care.

In 2012/13 City Power continued to introduce interventions to improve electricity services. These included meter readings; clearing of billing errors; improving the functionality of street lights; the reduction of outages; the installation and maintenance of public lights; the installation of bulk meters and the conversion to prepaid

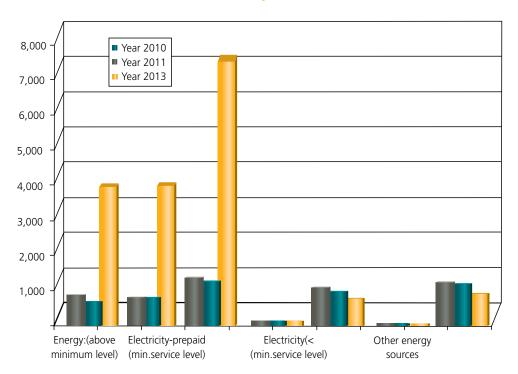

metering; and the removal of illegal connections.

Over 10 000 faulty meters were identified and replaced or repaired as part of "Metering War Plan". Additional major achievements for the entity during 2012/13 include the following:

- The City introduced interventions such as the 'Revenue Step Change' initiatives (Revenue Step Change and Zero Tolerance Project), which resulted in accounts being corrected.
- 27 091 Solar water heaters (geyser) were introduced in various areas, including Alexandra, Devland, Lehae, Pimville, Pennyville, Tshepisong and Vlakfontein.
- City Power installed 5 343 public lights.
- A total of 3 307 households were newly electrified during the year.
- During the year, the number of prepaid customers getting connected increased, resulting in higher purchases of prepayment vouchers.

Commentary on capital expenditure for the year ended 30 June 2013 for electricity services

Electrical infrastructure projects consist of the upgrading of electrical networks, network development and load management and meter installation projects. The budget was expended in projects such as metering, the conversion of LV bare conductors to ABC conductors, emergency projects and various upgrades of electrical infrastructure projects. Total expenditure for the year amounted to R872 million, which is R196 million above the budget of R676 million. The overspending was accommodated by the R200 million additional allocations.

Year-end expenditure for public lighting amounted to R102 million, compared to the year-end budget of R115

million. This reflects an under-spending of R12 million. The Department of Energy (DoE) had made the funds available for the Building Retrofit Project; however given that the project could not start due to a delay in finalising the procurement process in 2012/13, the funds were ultimately deferred. During the year, the City engaged the DoE regarding the deferment of the funds. The fund allocation encompasses projects such as Sebenza, the Transformer Programme, and the upgrade of Kelvin - Cydna substations.

In 2013 Johannesburg installed 27 091 solar water heaters (geyser) in various areas, including Alexandra, Devland, Lehae, Pimville, Pennyville, Tshepisong and Vlakfontein. Overall, 5 343 public lights were installed and 3 307 households were newly electrified.

Table 21: 2012/13 Capital expenditure: Electricity services

| Capital Projects                    | Year 0 (2012/13) |                   |                    |                                   |

### **Waste management**

Pikitup Johannesburg SOC Limited has a mandate to provide waste management services.

During the year, Pikitup embraced the shift towards a new waste management model, which advocates 'waste avoidance', 'waste recycling and reuse', and 'disposal as the last resort'. Resulting structural challenges within the organisation were addressed in the remodelling of Pikitup, now complete, which entailed refining the operational structure and appointing a new management team. In 2012/13 Pikitup provided a wide range of waste management services to approximately 4.4 million people.

**Street cleaning:** Street cleaning entails picking and collection of litter in the Outer City and sweeping in high population density areas. Targeted areas of the Inner City have a 24/7 cleaning schedule. Alexandra is cleaned for eight hours seven days a week. The Outer City is cleaned for eight hours, five days a week and a sixth day cleaning programme per week has been added in targeted areas to improve the level of cleanliness. Areas such as Lenasia, Midrand and Melville/Brixton are on a five-day, two-shifts cleaning service. In areas where lanes exist, such as in the Inner City, Turffontein and Rosettenville, the cleaning of lanes is undertaken as an integrated part of street cleaning. Outside perimeters of taxi ranks, shopping malls and bus stations are also cleaned as part of street cleaning.

**Illegal dumping**: At the core of illegal dumping is a lack of awareness of how to maintain a healthy environment as well as inadequate by-law enforcement. Whilst inadequate by-law enforcement is a challenge for the entire City, low levels of environmental awareness is more prevalent in low income areas.

**Informal settlements**: During the year, Pikitup remained within the target of maintaining the 123 informal settlement areas at multiple days per week schedule, and increased service to 133 informal settlements during the last quarter of 2012/13. These areas consist of 184 275 units, which constitutes 94% of all settlements city-wide. The remaining

6% areas were serviced on a one-day service per week schedule from Pikitup Depots. Since the absorption of 3rd party contract workers in the Southdale depot area, the cleanliness level ranking has improved from 'Level 3' to 'Level 4'.

**Hostel cleaning:** Pikitup renders a cleaning service to hostels based on an agreement with the Department of Housing. As part of the agreement, 22 hostels were cleaned on a regular basis during the year and were able to maintain a 'Level 3' cleanliness ranking.

The service rendered was aligned to the DoE agreement and budget allocation. Illegal electricity connections in some hostels complicated access by heavy waste vehicles, and at times made it impossible.

Separation at source – In 2010 Pikitup implemented a project to encourage residents to separate waste at household level. Initially the project was only implemented in the Waterval Depot area, but during the review period the project was implemented in additional depot areas, including Zondi, Diepsloot and Orange Farm. A gradual increase in tonnages was reported in areas where the project had been implemented and where recyclable waste had been separated at source. The present overall rate of participation of residents from these areas is estimated at 17%, providing an opportunity for significant increase as the project unfolds. Pikitup will introduce robust initiatives to market and improve awareness for the benefits of the project in the year ahead.

Solid waste management services

The table below provides Pikitup's service delivery levels for solid waste management and includes both formal and informal settlements in terms of budget distribution for the review period and future demands.

Table 22: Solid waste management services: Pikitup service delivery levels

| Description         | Year -3 | Year -2 | Year -1 | Year 0 (2       | 2012/13)        |
|---------------------|---------|---------|---------|-----------------|-----------------|
|                     | Actual  | Actual  | Actual  | Original budget | Adjusted budget |
| Formal settlement   |         |         |         |                 |                 |
| Total household     | 908 000 | 868 000 | 824 000 | 785 000         | 789 000         |
| Informal settlement |         |         |         |                 |                 |
| Total household     | 160 000 | 168 000 | 177 000 | 190 000         | 186 000         |

Solid waste service levels

A completion time of round collected refuse (RCR) was impacted during the year, as a result of fleet availability. This improved during the fourth quarter as a result of additional fleet being made available. However, on average completion times were below the target of 17h00. The table below details the Pikitup solid waste services levels.

Table 23: Pikitup solid waste removal service levels

| Description                  | Year -3   | Year -2   | Year -1   | Year 0 (2012/13) |  |
|------------------------------|-----------|-----------|-----------|------------------|--|

| Solid Waste Removal          |           |           |           |                  |  |
| Removed at least once a week | 1 068 000 | 1 036 000 | 1 001 000 | 973 000          |  |
| Total number of households   | 1 068 000 | 1 036 000 | 1 001 000 | 973 000          |  |

Solid waste service policy objectives derived from the IDP

Table 24 contains the solid waste services policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Table 24: Solid waste service policy objectives derived from the IDP

<sup>&</sup>lt;sup>5</sup> Informal areas refer to informal settlements within CoJ.

<sup>&</sup>lt;sup>6</sup>The intention was to implement a food for waste exchange programme during the financial year. The project proposal was amended to focus on illegal dumping and additional agreements had to be concluded with Johannesburg Property Company, Fresh Produce Company and others. The Board therefore resolved that the projects be deferred and implemented in the 2013/14 financial year after conclusion of various agreements.

Employees: solid waste management services (Pikitup)

During the year under review, Pikitup consisted of 5 077 employees and 2 911 vacancies. The table below provides an analysis of Pikitup staff positioning.

Table 25: Employee positioning for Pikitup solid waste management services during 2012/13

|           | Year -1 (2011/12) | Year 0 (2012/13) |              |               |                                   |

Commentary on capital expenditure for the year ended 30 June 2013 for solid waste management services (PIKITUP)

The table below shows capital expenditure for Pikitup for the year under review. Pikitup provided waste management services to 741 455 domestic customers and 9 658 business 'round collected refuse' (RCR) customers. They further delivered bulk services to 1 666 customers; 752 dailies and 522 institutions. They also serviced several customers requiring compost related services.

<sup>&</sup>lt;sup>7</sup>Cleanliness levels refer to levels and descriptions as prescribed by COJ.

#### Housing

The Department of Housing and the Johannesburg social Housing Company (JOSHCO) has the mandate for delivering housing opportunities that:

- Provide alternative tenure options.
- Are located close to economic opportunities.
- Are adequately serviced.
- Are affordable.
- Are preferably found in high-density environments.

It executes this mandate within the ambits of the Joburg 2040 GDS outcome of "building a resilient, liveable, sustainable urban environment underpinned by infrastructure supportive of a low-carbon economy".

The Department, in consultation with its stakeholders, developed a framework for conceiving and implementing its housing strategy in different wards of the City. The programme targets for the review period are as follows:

- Rental accommodation: Deliver 4 600 rental units under the rental programme.
- Hostel upgrading: Deliver 500 hostel units.
- Housing opportunities: Deliver an annual target of 6 800 housing opportunities through the mixed income housing programme.
- Proficient management of City stock: Implement the repairs and maintenance plan and collect rentals with an

annual target of 80% rental collections.

 Administration of the National Housing Programme: Implement 'Level 1' and 'Level 2' accreditation requirements.

Although 2012/13 represented a functional planning year in human settlements space, the Department delivered 3 470 mixed income opportunities against a target of the 6 800 units. Rental collection reached 58.13%, despite efforts by the Department to ensure a 100% expenditure on repairs and maintenance on rental units. The City's 'readiness level' to be assigned the housing function has received a substantial institutional boost, whereby key departments within the City rallied around the process, forming different working group streams, such as 'Asset and Liabilities', 'Programmes and Projects', and 'Human Capital'.

A key challenge for the year was the slow pace of formalising informal settlements.

Housing service policy objectives derived from IDP.

The table below contains the housing services policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Table 28: Housing service policy objectives derived from the IDP

## Free basic services and indigent (electricity)

In line with the City's Expanded Social Package (ESP) policy, the infrastructure and services sector provides free basic services to indigent community households in the City of Johannesburg. These basic services include distribution of free basic water and free basic electricity. The table below shows the distribution of free basic services to low income households during 2012/13.

Table 31: Distribution of free basic services to low income households in 2012/13

| Free basic services to low income households |   |        |                  |     |            |                                  |        |                    |        |             |  |

## Transport, roads and waste

The City of Johannesburg's transport sector comprises the core Transport Department, the Johannesburg Roads Agency (JRA) and the Metropolitan Bus Service (Metrobus). JRA is responsible for planning, design, construction, operation, control, rehabilitation and maintenance of roads and storm water infrastructure in the City of Johannesburg. The JRA's main responsibilities include construction and maintenance of bridges and culverts, traffic signals and traffic signal systems, footways, road signage and road markings. Metrobus is a wholly owned bus company tasked with provision of customer-friendly public bus transport to the residents of Johannesburg.

#### **Transport Department**

During the year, the Transport Department's delivery agenda promoted walking, cycling, public transport and safety for all road users. Interventions can be summarised as follows: **Public transport service provision through the Rea Vaya BRT project:** This phase of Rea Vaya BRT project started operations in August 2009. During 2012/13, an average of 35 953 passengers were commuted per day. A bank-based smart card Automated Fare Collection (AFC) system was also piloted from May 2013 to be fully operational by 1 July 2013.

During the year a sustainability study was completed for the Rea Vaya Phase 1C route, which concluded that Rea Vaya BRT, with improvements, was the appropriate mode to provide safe, affordable and reliable public transport on this route. Stakeholder engagements and consultation commenced on the basis of the sustainability study. In addition, the Transport Department commenced detailed design of roadways and other required infrastructure. Rea Vaya Phase 1C will be rolled out from the Johannesburg CBD to Alexandra and to the Sandton CBD.

Public transport infrastructure provision through public transport facilities and integration of public transport: the Department commenced with construction of the Roodepoort, Rank 5 public transport facility. This facility is being built in line with a new sustainable model for public transport facilities. Various initiatives to provide integrate public transport were also facilitated in partnership with other stakeholders. These included the realignment of Metrobus routes to integrate

with Gautrain at Park station. Stakeholders continued to be engaged on the management of travel demand, which included a study on park and rides with Gautrain.

**Integrated Transport Plan (ITP):** as part of the review for the ITP, the draft Strategic Integrated Transport Plan Framework (SITPF) was prepared for consultation. The household survey was completed including the draft Transport Information Register (TIR).

Municipal bus service data: Transport Department (Rea Vaya BRT)

The overall annual average of 35 953 passengers per day was achieved. The table below shows 2012/13 Rea Vaya BRT services data.

Transport Department (Rea Vaya) Bus Service policy objectives derived from the IDP

The table below contains the Transport Department (Rea Vaya) bus services policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Table 34: Transport Department (Rea Vaya) Bus Service policy objectives derived from the IDP

#### Roads

The Johannesburg Road Agency is committed to delivering quality services in accordance with the Service Delivery Agreement (SDA) with the City of Johannesburg. During the year, to improve efficiencies within the company and ensure the JRA delivered on its mandate, the company embarked on a turnaround strategy to deliver on this objective. The JRA developed its Service Delivery Improvement Plan (SDIP) to escalate and improve performance in key areas. Of significance, was the alignment of the JRA improvement activities to the new service delivery standards (SDS) as expressed in the Customer Charter and service level agreement (SLA) with the City of Johannesburg.

The JRA operates under the Sustainable Services and Economic Growth clusters, which mainly focus on three key concepts: resilience, sustainability and liveable urbanism.

A resilient city is one that is able to continually change and adapt, yet remain within sustainable thresholds of existence,

even when confronted with complexity and uncertainty. Major projects implemented during the year include:

- Upgrading of gravel roads to surfaced standards in Braamfischerville, Diepsloot, Ivory Park and Orange Farm.
- Conversion of open storm water drains to underground systems in Braamfischerville, Diepsloot, Alexandra and Orange Farm. Designs were drafted for the rehabilitation of Naledi Bridge, New Canada and Emmarentia Dam.
- Construction was commenced on Alexandra and Le Roux Avenue bridges.
- Various storm water improvements were implemented.
- Road resurfacing and reconstruction was performed city wide, and traffic signal systems were upgraded.
- The repair of the sinkhole in Anchorville, Lenasia, reflected the JRA's state of readiness to respond to emergency situations. The project was completed within the allocated time, budget and the required quality.

Through JRA, the City continued to address challenges affecting service delivery, including resource capacitation,

system integration, vandalism of infrastructure, underground water, vandalism of road traffic equipment, and overloading.

#### Gravel roads infrastructure

Road service policy objectives derived from the IDP

The table below contains the road services policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Table 44: Road service policy objectives derived from the IDP

|  |  | F  | Road service p                             | olicy objectives   | s taken from I   | DP   |  |  |

# Waste water: Stormwater drainage

The City's waste water services sector is responsible for installing and upgrading stormwater systems; resurfacing, rehabilitating and reconstructing roads; and installing and upgrading traffic signals.

During the year, stormwater systems were included in gravel road upgrade projects. This ensured stormwater could be properly drained from the road area. The conversion of open drains to enclosed stormwater systems is on-going as budget

is allocated. Given the magnitude of open drains to be replaced, it will take many years to achieve acceptable replacement levels. A priority has been to replace open drains around schools to ensure the safety of children.

Over the years the City has neglected the upgrading of stormwater systems and the repair of erosion damage from storms in the various streams. In the year ahead, there will be a sharper focus on these requirements, especially with the potential impacts of climate change.

The increased surface areas resulting from additional complexes and shopping centres being built have further increased the run-off into existing stormwater systems and

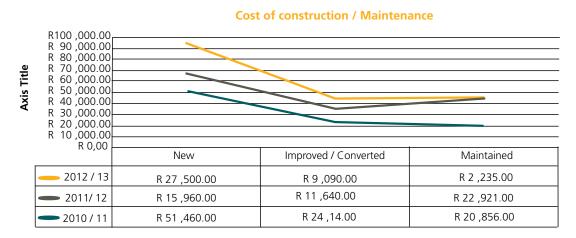

keeping ahead of the additional erosion remains a challenge. Numerous projects have been delayed due to the more stringent regulations from the Department of Water Affairs. Accordingly, the Johannesburg Road Agency has had to intensify preplanning efforts to ensure all legislation requirements are complied with before projects are identified for construction.

The table below provides a comparative analysis of stormwater infrastructure and the subsequent cost of construction.

Table 45: Stormwater infrastructure: cost of construction

| Stormwater infrastructure<br>Kilometres |                              |                                     |  |                                |  |  |  |  |  |  |

Comment on capital expenditure for the year ended 30 June 2013 for Roads and stormwater services

The City experienced numerous delays in the execution of its 2012/13 capital projects, including work stoppages due to labour disputes; water and sewerage overflow; and cash flow challenges experienced by contractors. The City allocated 90% of its total capital expenditure for the 2012/13 financial, which is an improvement of 4% compared to the previous year. In the year ahead, the approved capital expenditure budget for

2013/14 will incorporate minor variances within programmes, without impacting the overall budget allocation for the year.

During the review period, various programmes were implemented to address stormwater improvements, citywide road resurfacing and reconstruction, the upgrading and installation of traffic signals, and sinkhole repairs. Two challenges affecting service delivery during the year were the lack of reliable fleets; and pre-planning delays resulting from longer lead-times for meeting environmental compliance requirements.

## Planning and development

The City's Department of Development Planning is responsible for formulating medium to long-term spatial strategies and policies to guide development in the City towards the achievement its Joburg 2040 Vision and GDS outcomes.

The Department provides the regulatory policy framework for decision-making on development issues in the City. All other

departments and municipal entities (MEs) are required to align with the framework towards achieving the City's future vision. The Department's robust strategic urban planning function is supported by statutory operations of land use and building development management. These daily operations are critical in supporting economic growth, as the improvement and regulation of property development are key determinants for directing revenue to the City.

As property is the primary building block for urban development, the Department is also the custodian of the City's property information as well as other core datasets, such as street addresses and aerial photography. The property lifecycle is managed through the property value chain and maintained in the Land Information System (LIS), which is the source of property information for billing purposes.

The Department performs the following strategic 'enabling' functions:

- Strategic metropolitan planning and spatial development.
- Land-use development management and statutory enforcement.
- Building development management and statutory enforcement.
- Spatial data, spatial mapping and spatial information dissemination.
- City-wide capital prioritisation and coordination.

Given the Department's role as strategic 'enabler' in the City, it is the key driver of the location, type and scale of development in the City. In parallel, the Department has to manage this development so that that the City's goals of urban restructuring are achieved. By providing an effective and efficient land-use and building control service, the Department plays a pivotal role in the management of the built environment to support the City's sustainable economic growth.

The following achievements were reported during the year:

- Completion of Phase 1 of the City's Spatial Development Framework.
- Completion of final draft 'Building Retrofit for Energy Efficiency Guideline Document'.
- Completion of the framework for the 'Johannesburg Built Environment Standards and Guidelines' (the Joburg 'Red Book').

• Completion of the 'Future City Model', including 3-D images of the future City form, from 'Decade 0' (present day) to 'Decade 3' (2040).

The completion of the Future City Model was the Department's milestone achievement for the year under review, as the model provides the basis for the 'Corridors of Freedom' announced by the Executive Mayor in his State of the City Address. The 'Corridors of Freedom' are the anchor of the City's urban restructuring mandate over the next three decades leading up to 2040. The Future City Model is, therefore, the current spatial policy output produced by the Department to provide the primary development decision-making framework to guide and enable both the City's political leadership and the administration at large to work towards the collective realisation of the future City, as envisaged by Joburg Vision 2040.

During the year, the Department prioritised the processing of town planning and building applications, as well as the legal enforcement of approved applications.

To improve efficiency in this regard, the Department completed the process design for a re-engineered law enforcement system, which will be implemented in the year ahead. Further, the turnaround times for the processing of both town planning and building applications were maintained during the review period, with only a slight reduction in the percentage of building plans processed in the fourth and final quarter of 2012/13.

The Department prioritised the reconciliation of disparities between the SAP system and the Land Information System (LIS). Accordingly, further resources were allocated to intensify the resolution of SAP/LIS mismatches. As at the end of 2012/13, 98% of deeds transfers were processed on the LIS and 100% of new mismatches between the graphic information system (GIS) and monthly deeds downloads were resolved.

Table 50: Applications for building development management

| Applications for building development management                        |  |                  |                   |                  |  |  |  |  |  |  |

| Applications outstanding at year end (accumulation from previous years) | 112  | 71               | 255               | 331              |  |  |  |  |  |  |

Planning and development service policy objectives derived from the IDP

Table 51 contains the planning and development policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Employees: Department of Development

During the year, employees for the Department of Development consisted of 378 employees, 389 vacancies (fulltime equivalents); and vacancies constituted 51% of total posts.

## **Environmental protection**

The City of Johannesburg's facilitates environmental sustainability programmes for the conservation of water, land and air through its Environmental Management Department and the Infrastructure and Services Department (collectively known as 'EISD'). These programmes are aligned with national conservation objectives relating to water conservation; integrated waste management; the protection of biodiversity; air quality management; energy diversification; and the impacts of climate change.

#### Water conservation and urban water management

The City endeavours to ensure reliability and availability of acceptable quality and quantity of water to promote

communal health, positive livelihoods and commercial production for the citizens of Johannesburg. It does so by developing programmes that continually enhance and protect water resources and manage water demand. In 2012/13, the City finalised its position paper on Acid Mine drainage (AMD) and mine residue areas (MARs) and proposes recommendations on the City's response towards addressing these issues. The City undertakes continuous water quality monitoring in identified 'hot spots'. A 3% reduction of E.coli was achieved for 2012/13. The majority of monitoring is done in indigent communities to ensure good quality of surface water.

The hot spots referenced below refer to indigent communities and the reporting relates to improvements or deterioration against a baseline count for E.coli in the reporting year.

Table 55: Progress (improvements / deterioration) against a baseline count for E.coli in 2012/13

| Hot spot monitoring point(s)                      | Description   | Progress against baseline count for Ecoli<br>2012/13 |
|---|---|--|
| Bosmontspruit monitoring point.                   | Monitors water flowing through the Mayibuye informal settlements.   | Showed an improvement.                               |
| Orlando Dam monitoring point.                     | Monitors water quality flowing along the Diepkloof-Baileyspruit area.   | Showed an improvement.                               |
| Alexandra monitoring points (Inflow and Outflow). | Monitor water quality flowing into and out of Alexandra township as well as the S'tlwetla informal settlements. | Showed an improvement.                               |

| Hot spot monitoring point(s)  | Description                                       | Progress against baseline count for Ecoli 2012/13 |

| monitoring points.            |   | improvement and the outflow monitoring            |
|                               |   | point showed deterioration.                       |

#### Pollution control

#### Integrated waste management

The City provides integrated waste management services to ensure alternative and sustainable methods of waste disposal to prevent serious health and ecological degradation in Johannesburg. This is undertaken with the long-term objective of reducing the waste destined for landfill sites through recycling initiatives. For 2012/13 the City established six waste sorting facilities (buy back centres) and achieved an 8% diversion of waste destined for landfills. These facilities are conveniently located in areas for easy access

by communities transporting the waste. For indigent communities, this initiative has the added benefit of providing income generation opportunities through the sale of collected materials.

The City supports community members participating in the waste reduction initiative - known as "waste reclaimers" - by providing training (such as waste recycling and financial management training) and by forming cooperatives.

Newly established facilities have also been located close to communities in the south of Johannesburg.

#### **Energy diversification and climate change impacts**

The City endeavours to ensure adequate energy supply, whilst controlling and managing the associated impact for both present and future generations. This is undertaken with the long-term objective of reducing the impact of climate change and diversifying the supply of energy. In 2012/13, the City accumulated 88 987 Verifiable Emission Reductions (VERs) from 'landfill gas to energy' projects at two landfill sites, namely Marie Louis and Robinson Deep. The VERs can be claimed from The United Nations Framework Convention on Climate Change (UNFCCC) as certified emission reductions, commonly known as carbon credits. The communities benefiting from the initiative are in Dobsonville and Braamfischerville. The benefits for these communities include reduced odours and greenhouse gases, which collectively contribute to cleaner air in the area. The initiatives also have associated opportunities for job creation and conservation oriented skills transfer.

In support of the reduction of climate change impact, the City completed the feasibility study on fuel conversion for Metrobus for future implementation. These buses are mostly used by poorer communities within Johannesburg. The implementation of fuel conversion project will further benefit these communities - and Johannesburg residents as a whole - by reducing greenhouse gases and enhancing the quality of surrounding air.

Service statistics for environmental protection

The City has a responsibility to regulate, monitor and enforce city-wide compliance with a variety of environmental laws, ranging from the Constitution, to the National Environmental Management Act (NEMA), specific environmental management acts (SEMAs) and local government by-laws. The city is constitutionally mandated to perform the above compliance related functions in terms of its original functions set out in Parts B of Schedule 4 and 5 of the Constitution.

**Waste Diversion:** The City monitors the ratios of 'diversion of waste to landfill site' with the aim of providing sustainable waste management service to the residents of Johannesburg.

In the previous year (2011/12), the City achieved 7% diversion of waste to landfill, whilst achieving an 8% diversion of waste to landfill during 2012/13.

Waste licensing: As part of its mandate to enforce compliance with waste bylaws, the City has implemented a registration and licensing regime. The regime aims to register all wasterelated activities and to issue a license once certain conditions have been met. The decline in the number of registrations during the review period is attributed to the fact that many companies and individuals are already registered on the system. The licenses issued during the year included renewals from previous years' registrations and new license applications. During the year, 277 registrations were undertaken (2011/12: 498) and 607 licenses issued (2011/12: 1 160).

**Urban Water Management**: The City monitors E.coli reduction to ensure good quality of water. The City recorded a 3% reduction of Ecoli during the reporting year.

Environmental compliance of flagship projects: The City monitors environmental compliance of its three flagship projects within Johannesburg. These are the Alexandra Renewal Project (ARP), Cosmo City and Gautrain. An environmental compliance calculator is used to determine the compliance levels of each of the projects on a quarterly basis and an average compliance is concluded at the end of the financial year. The City achieved an environmental compliances rate of 93.75% during the year (2011/12:94.6%).

**Orlando dam rehabilitation**: Johannesburg Property Company (JPC) acts as an implementing agent, and has completed the following activities at the cost of R1.3 Million (allocated in the year under review):

- Orlando Wetland Rehabilitation Plan
- Clearing alien vegetation and planting of indigenous plants
- Fencing off the wetland and installation of signage.

Environment and Infrastructure Services Department (EISD) service policy objectives derived from the IDP

The table below contains the Environment and Infrastructure Services Department's policy objectives derived from the IDP, and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

## Looking ahead

During the 2012/16 term of office, the Sustainable Service Cluster aims to institute programmes that are transformative (changing course), whilst taking care of the core business of municipal infrastructure provision and maintenance (continuity), with a view to intersecting programmes which can optimise City revenue

## **Economic Growth Cluster**

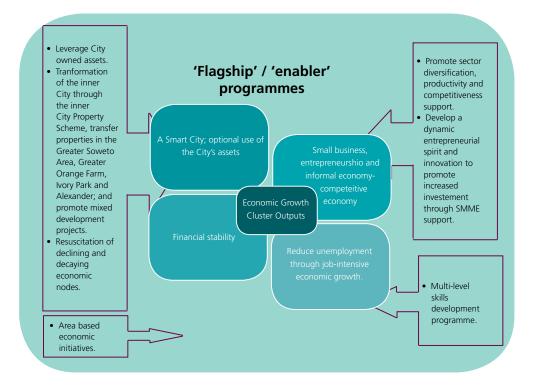

An inclusive, job-intensive, resilient and competitive economy that harnesses the potential of citizens

# Vision of an inclusive, job-intensive, resilient and competitive economy

The Department of Economic Development is mandated to lead the City in the pursuit of its vision of an inclusive, job-intensive, resilient and competitive economy. In so doing, it must also champion the City's approach to the economic transformation of Johannesburg and, therein, the city's efforts to address the triple challenges of unemployment, poverty and inequality. One of the Department's primary tasks is to develop a coherent economic development policy framework for the City, to provide clarity, quidance and leadership on its development agenda.

Figure 18: Outputs for the Economic Growth Cluster, with associated 'Flagship' / 'enabler' programmes

## Performance highlights

**Table 60: Economic Growth Cluster Performance highlights** 

| Strategic imperative       | Performance highlight   |
|----------------------------|---|
| Sector diversification and | A total of 3 967 SMMEs were supported through the SMME development programmes. This support       |
| competitiveness            | included assisting informal traders to obtain trading licences, and mentoring 21 SMMEs for a full |
|                            | calendar year in partnership with the Gauteng Enterprise Propeller.                               |
|                            | The Soweto Energy SMME Incubator supported with funding to the value of R27 million from the      |
|                            | Eskom Foundation and the Department of Trade and Industry.  |

| Strategic imperative             | Performance highlight  |
|----------------------------------|--|
| Reduce unemployment              | Facilitated a total of 794 job placements in the Tourism Sector.   |
|                                  | The City created 36 588 work opportunities (against a target of 35 000), thereby exceeding its target by 1 588 work opportunities.   |
| Optimal use of the City's assets | The City initiated developments covering at least ten properties in the previously awarded ICPS and created employment by directing construction work to Broad Based Black Economic Empowerment (BBBEE) service providers. |
|                                  | More than 150 properties transferred to beneficiaries (Soweto, Orange Farm, Ivory Park, Alexandra.)  |
|                                  | Broadband infrastructure layout also completed (over 900 km) as planned across the City; in the next step it is critical to realise intended objectives of access/connectivity.  |

## Performance overview

During the City's Integrated Planning Process (IDP) the Economic Growth Cluster identified a number of priority programmes, which include:

- Promoting sector diversification, productivity and competitiveness support.
- The leveraging of City-owned assets which encompasses the transformation of the Inner City through the Inner City Property Scheme (ICPS), the transfer of properties in the Greater Soweto Area, Greater Orange Farm, Ivory Park and Alexandra; as well as the promotion of mixed development projects.
- A Multi-level skills development programme, which comprises the Jozi Skills Hub and the Expanded Public Works Programmes (EPWP).
- A programme to develop a dynamic entrepreneurial spirit, competitiveness, innovation and to promote increased investment through SMME support. The latter entails creating partnerships to provide City-wide enterprise development training and support.

A consolidated SDBIP and performance progress is contained at the end of Chapter 3.

## Multi-level skills development

Jozi Skills Hub (JSH)

The City established the Jozi Skills Hub website to assist jobseekers with placements across different sectors. The City facilitated a total of 794 job placements in the Tourism Sector.

**Expanded Public Works Programme (EPWP)** 

The Expanded Public Works Programme (EPWP) aims to reduce unemployment and alleviate poverty by creating on-the-job training. During the year, the City created 36 588 work opportunities (against a target of 35 000), thereby exceeding its target by 1 588 work opportunities.

## Leveraging city-owned assets

Inner City Property Scheme (ICPS)

In line with its commitment to transform the Inner City of Johannesburg through the Inner City Property Scheme (ICPS), the City acquired eight properties during the year. The City initiated developments covering at least ten properties in the previously awarded ICPS and created employment by directing construction work to Broad Based Black Economic Empowerment (BBBEE) service providers.

Transfer of properties to targeted beneficiaries

During the year, the City achieved and exceeded its planned transference target of 150 properties, by transferring 155 properties to targeted beneficiaries.

## **SMME** development

A total of 3 967 SMMEs were supported through SMME development programmes. This support included assisting informal traders to obtain trading licences, and mentoring 21 SMMEs for a full calendar year in partnership with the Gauteng Enterprise Propeller. The Department of Economic Development also facilitated funding to support the Soweto Energy SMME Incubator to the value of R27 million from the Eskom Foundation and the Department of Trade and Industry.

## Human and Social Development Cluster

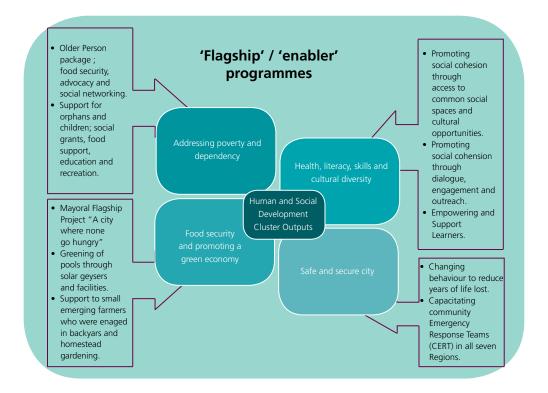

Improved quality of life and development-driven resilience for all

### Vision of a development-driven city

The Human and Social Development Cluster contributes to all four strategic outcomes as set out in the Joburg 2040 GDS, however, its own outputs are primarily organised around the GDS outcome of: "An improved quality of life and development-driven resilience for all".

In being development-driven, the City is committed to establishing an inclusive City where the standard of living is increased for all through income opportunities, food security and universal access to education, as well as the provision of world-class basic services. The outcome envisioned is a city which fosters and upholds institutions that promote human dignity and respect for all, while providing the necessary support for a free and economically mobile population.

Figure 19: Outputs for the Human and Social Development Cluster, with associated 'Flagship' / 'enabler' programmes

## Performance highlights

Table 69: Human and Social Development Cluster performance highlights

| Service area                              | Performance highlight  |
|---|--|
| Addressing poverty and dependency         | 678 Adults and 356 children were removed from the streets and placed in shelters and/or provided with other assistance to become more self-sustained.                  |
|   | 1 782 Individuals participated in small-scale poverty alleviation projects.  |
| Community development, cultural diversity | 7 129 049 People utilised libraries; 400 956 People utilised sport and recreation centres; 460 000 People accessed museums, galleries and art centres across the city. |
|   | The 2012/13 phase of Orange Farm Library Project was completed.  |

| Service area                    | Performance highlight   |
|---------------------------------|---|
| Healthcare                      | The "Ijozi Ihlomile" programme was expanded to 30 additional new wards across the City and a total of 1 697 244 people were reached with face to face education since July 2012 through this programme. Overall 53 wards (out of 130 wards / (40.7%) have implemented the programme, thereby creating job opportunities for 1 116 schools-levers. |
| Environmental health            | Integrated environmental health educational programmes were conducted at 30 primary schools. Eight campaigns relating to chemical safety were conducted by environmental health staff city-wide.  |
|                                 | In terms of vector control (rodent or pest control), 404 hotspot areas were identified and 688 'blitzes' carried out.   |
| Child care and care of the aged | During the year, the Department oriented its child care initiatives to enhance Early Childhood Development (ECD) care givers' training, which included accredited training on ECD Levels 1-4, as well as basic entrepreneurial/financial training, and literacy and business skills.  |
| Policing                        | Crime prevention initiatives in the City resulted in 5 341 arrests for drinking and driving, 13 arrests for possession of illegal firearms, 116 arrests for possession of illegal drugs, and 50 arrests for possession of stolen vehicles.  |
|                                 | Compared to the previous year (2011/12), the Inner City experienced a decrease of 268 (-13%) assaults and an increase of 189 (60%) in robberies. This resulted in a total decrease of 79 (-3%) in assaults and robberies (when clustered together) for the current financial year.  |
|                                 | Policing around by-laws resulted in 8 486 fines for illegal street trading, 1 399 fines for illegal dumping and littering, 2 531 fines for illegal electricity connections, and 1 446 fines for illegal advertising.  |
|                                 | Key operations implemented to improve compliance to traffic regulations and improve traffic management resulted in 58 074 fines issued for driving without valid driver and vehicle documentation, 723 691 for moving violations, 119 928 for vehicle roadworthiness, and 3 471 568 for speeding.   |
| Food security                   | A programme promoting food security was rolled out during the year with the aim of combating hunger and addressing chronic lifestyle diseases resulting from poor dietary habits and the lack of physical activity.   |

## Performance overview

## Community development services

The Department of Community Development provides services and programmes with respect to sport, recreation, arts, culture, heritage, libraries and information services. The Department also provides access to various community-based facilities, ranging from multi-purpose centres, sporting grounds, museums; as well as other public space enhancements, such as public art forms and monuments.

Community development services are targeted at various social groupings across the City's regions, including children, particularly vulnerable children and orphans in indigent communities, the youth, and senior persons.

Libraries, museums, galleries and community facilities

The Department delivers on its mandate to promote an engaged, active and cohesive citizenry through the following priority social services:

#### Library and information services

- Providing books and other information resources for enhancing library facilities, including reading development support programmes.
- Providing E-Learning initiatives, such as 'eWorld', remote access to 'Symphony', techno literacy skills, Wi-Fi access for communities in libraries.
- Providing information services at the City's public libraries.

#### Art, culture and heritage

- Supporting emerging artists on artistic development programmes and ensuring all community members – including orphans and vulnerable children – have access to galleries, museums tours and events.
- Promoting heritage programmes by developing adequate and well maintained built environments for social interaction and identity preservation, including monuments, plaques and public art.
- Fostering cultural dialogues through exhibitions, workshops, tours and commemorative events to foster common citizenship. This includes public tributary days such as National Remembrance Sunday, June 16, Youth Day and Africa Day. It further includes the naming (and renaming) of streets and places of interest to promote social identity.

#### **Promote sport and recreation**

- Devising recreation activities and promoting competitive sports and mass participation at recreation facilities.
- Promoting community access to facilities and major events such as the AFCON tournament, Mayoral Cup, Kiddies Olympics, Gauteng Future Champions Challenge, and so forth.

#### Safe city

 Ensuring optimal facilities management, including 'intelligent social design' and refurbishment of community facilities to enable wide-spread community access and participation.

#### **Green economy**

 Moving towards 'green strategic projects' by retrofitting community facilities with environmentally appropriate design elements. Service statistics for libraries, museums, galleries and community facilities

During the year, the following statistics were recorded for the utilisation and access to community development facilities:

- 7 129 049 People utilised libraries.
- 400 956 People utilised sport and recreation centres.
- 460 000 People accessed museums, galleries and art centres across the city.

Libraries, museums, galleries and community facilities service objectives derived from the IDP

The table below contains the priority service objectives for libraries, museums, galleries and community facilities derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Table 70: Libraries, museums, galleries and community facilities service policy objectives derived from the IDP

## **Cemeteries and crematoriums**

Introduction to cemeteries and crematoriums

Greater Johannesburg has a population of approximately 4 million people. To accommodate the burial needs of a community of this size up to the year 2040, an additional

1500 hectares of suitable land will have to be obtained for cemetery use.

At present and also in the future, cemetery space will continue to play a vital role in the history, heritage and culture of the community of Johannesburg.

Cemeteries enrich the quality of community life by providing reassurance of a final and dignified resting place. At present, of the 37 cemeteries within the City, 27 are considered 'passive', allowing only for second burials. Collectively, they consist of a total of 1 200 hectares of land, of which only 250 hectares are presently available for burial. Avalon cemetery is fully occupied and unavailable for primary burials; however, Avalon extension of 25 hectares will rapidly be utilised, given that it accommodates 65% of all burials within the City.

The strategic direction of cemetery development is informed by the business imperatives contained in the Johannesburg City Parks Zoning (JCPZ) Business Plan, which supports the expansion of the City's geographic boundaries and population density to meet community needs within the scope of the Joburg 2040 vision. During the year, the City performed primary stakeholder analysis to support the zoning strategy and a 400-hectare site at Olifantsvlei farm, South-East of Soweto, is currently being developed to provide burial space for the next 50 years. A provisional element for cremation has also been factored into the strategy as well as the life expectancy rate.

Figure 20: Numbers of burials for 2012/13

Service statistics for cemeteries and crematoriums

The graph below depicts 14 207 burials for 2012/13 including paupers and indigent burials.

## Child care, aged care and social programmes

Introduction to child care, aged care and social programmes

The Social Development Department is responsible for promoting social development programmes to uplift the lives of residents. It achieves this by providing the following service benefits:

- Support programmes and services to vulnerable households and indigent communities, migrants, children and the homeless.
- Victims' empowerment programmes and support for people living with disabilities.
- Skills development programmes for targeted beneficiaries, specifically, women, the youth and former combatants.
- A range of food resilience activities in support of the Mayoral Flagship Project "A City where none go hungry".

The Social Development Department provides these services in the context of three priority areas:

**Child care:** In 2012/13, the Department oriented its child care initiatives to enhance Early Childhood Development (ECD) care givers' training, which included accredited training on ECD Levels 1-4, as well as basic entrepreneurial/ financial training, and literacy and business skills. Further, on-going support for Orphans and Vulnerable Children (OVC) ensures eligible children are linked to a basket of ECD services, including social grants, food support, health support, educational support and recreation.

**Aged care:** Programmes oriented around care of the City's

senior citizens emphasised programmes promoting overall health and wellbeing. The Department developed a 'Senior Persons Package' with different social support components, including food security support, an advocacy office and social networking. Senior Citizens' Day Care Centres have been established in all regions and are operating daily.

**Food security:** A programme promoting food security was rolled out during the year with the aim of combatting hunger and addressing chronic lifestyle diseases resulting from poor dietary habits and lack of physical activity.

This programme was designed to contribute to the Joburg 2040 GDS outputs of:

- Ensuring food security that is both healthy and safeguarded.
- Substantially reducing HIV/ Aids prevalence and noncommunicable diseases.

Accordingly, the programme prioritised the development of urban agriculture and the promotion of a healthy life-style:

- Urban agriculture and food security: projects
  providing support to small emerging farmers who have
  been engaged in backyard/homestead gardening as
  well as small plot cultivation. The programme aims to
  empower small farmers to become self-sufficient in
  producing their own crops and to sell fresh produce to
  their communities and local markets.
- Healthy lifestyle: projects and campaigns promoting
  a healthy lifestyle through partnerships with various
  private and public-sector stakeholders. The campaign
  promotes healthy diets and increased physical activity;
  reduced or no smoking and limited or no alcohol use.
  Physical testing is promoted to detect early symptoms
  of hypertension, diabetes, mellitus, HIV, and 'common
  cancers'.

Child care, aged care and social programmes service policy objectives derived from the IDP

The table below contains the priority service objectives for child care, aged care and social programmes derived from the IDP; and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

During the year, major capital projects included:

- The completion of an ECD Renewal Community Centre.
- The construction of the Golden Harvest Drug and Rehab
  Centre
  Control

  Control
- Establishment of the Agricultural Resource Centre and Associated Packaging Houses.

## **Theatres**

Johannesburg is widely considered to be one of South Africa's most vibrant and diverse cultural centres. With the City also being one of the most densely populated cities in the country, with a large number of educational institutions – many of which encourage

innovative self-expression – Johannesburg has cultivated a thriving visual and performing arts community.

Joburg City Theatres is responsible for the managere performing arts professionals and amateurs can showcase their work. Through its strategy to transform and invigorate theatres, Joburg City Theatres aims to promote cultural inclusion and cohesion in deprived areas by ensuring access to quality visual and performing art productions and by encouraging creative use of public spaces.

City theatres service policy objectives derived from the IDP

The table below contains priority service objectives for City theatres derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

## **Healthcare services**

The City's Health Department is focused on developing a high quality, efficient, equitable health system that is accessible to all residents. The service delivery priorities for the City include:

- Strengthening the development of district health systems through improved access to primary health care services.
- Promoting municipal ward-based outreach teams.
- Facilitating functional integration within healthcare provision.
- Rationalising health facilities.
- Improving health literacy levels as well as improving community participation and co-operative governance in the health sector.
- Improving access to antenatal care services.
- Enhancing access to TB curative practices and thereby improving cure rates.
- Consolidating the City's focus on Environmental Health Services (Municipal Health Services) through promotional and educational programmes.

The Department is responsible for the provision of primary health care services through its network of 82 clinics (80 fixed, 1 satellite and one mobile) as well as HIV and AIDS campaigns and Public health and Environmental Health programmes. These City's clinics operate in conjunction with the health facilities managed by Gauteng Department of Health, which include 22 fixed clinics, 10 community health centres, one district hospital (South Rand), three regional hospitals (Coronation, Helen Joseph and Edenvale), two

tertiary hospitals (Chris Hani Baragwanath and Charlotte Maxeke), and two specialised hospitals (Tara and Sizwe Tropical). There are also two non-governmental organisations that render primary health care services: Alexandra Health Centre and Witkoppen Clinic.

During 2012/13, the City supported ten homes for aged and elderly day care centres with chronic medication and elementary health services. A total of 1 200 elderly citizens benefited from the programme. 67 Clinics out of 80 fixed clinics (83.75%) are now providing comprehensive public healthcare services.

To improve access to antenatal care, all clinics offer antenatal care services including the dual therapy for the Prevention of Mother to Child Transmission (PMTCT) programme. The counselling and testing of babies, infants and children exposed to HIV infection has also been strengthened across all public healthcare facilities.

To enhance management of chronic diseases, a total of 6 820 men were screened for prostate cancer during the year (against a target of 4 000). In addition 14 awareness campaigns were conducted, including several 5km walks to raise awareness for chronic diseases. On-going community involvement was encouraged and progress and achievements were shared during several workshops targeting the management of chronic disease management. Community-based health workers, including traditional healers, provided homebased care and also facilitated 'directly observed treatment' (DOT) of TB. Door-to-door health promotion campaigns and community outreach programmes further supported the on-going awareness

programmes around chronic diseases. Support in the form of training and health promotional materials were also provided. This included the "Ijozi Ihlomile" programme which was expanded to 30 additional new wards across the City, targeting indigent informal settlements. The community-based outreach project educates communities to respond appropriately to the HIV and Aids pandemic and benefits from the Mayoral Aids Fund. A total of 1 697 244 people were reached with face-to-face education since July 2012 through this programme. Overall 53 wards (out of 130 wards / 40.7%) have implemented the programme, thereby creating job opportunities for 1 116 schools-levers.

#### Clinics

Six clinics were identified for upgrading or building during 2012/13. Two were completed (i.e. Davidsonville in Region C and Petervale in Region E) and four clinics are due for completion in 2013/14 financial year. These are Slovoville in Region D, Freedom Park in Region G, Mpumelelo in Region A and Mountain View in Region G. Further, minor upgrades were undertaken at various clinics including Rosettenville, Bellavista, Yeoville, Thulamntwana, Lawley and Zandspruit.

| Mountain View                                | 500    | 500                  | 462,901            | 37,099               |  |  |  |  |  |  |
| Mpumelelo                                    | 4,500  | 500                  | 413,356            | 86,099               |  |  |  |  |  |  |

During the year, efforts to upgrade clinics focussed on areas that were previously deprived of clinic services.

#### Ambulance services

The provision of ambulance services is the responsibility of Emergency Management Services (EMS) Department. The City has a memorandum of understanding (MOU) with the Gauteng Provincial Government (GPG) Department regarding the provision of ambulance services on an agency bases. The service is provided in line with basic norms and standards determined by Provincial Government. The personnel providing the service are multi-skilled, and trained in both fire and ambulance services. The City of Johannesburg has 28 fire stations, which are used as ambulance bases as well.

The service is provided on a 24/7-basis in a four shift system.

The province has provided 60 ambulances to the City. Key challenges in 2012/13 included insufficient ambulances as well as the unreliability of the current fleet, which affected service turnaround times. The City procured 60 additional ambulances to complement the current ambulance fleet so as to meet service standards. This includes dispatching services within three minutes of a service call. The dispatch time is measured from the time the call is acknowledged until the time the service is dispatched.

Health inspection, food licensing and inspection

The Environmental Health section of the City's Health Department is mainly concerned with consolidating the City's focus on Environmental Health Services (Municipal Health Services) through promotional, educational and enforcement programmes. In terms of the National Health Act of 2003, the City is responsible for provision of municipal health services, which are listed as follows:

- Water quality monitoring.
- Food control.
- Waste management.
- Health surveillance of premises.
- Surveillance and prevention of communicable diseases, excluding immunization.
- Vector control.
- Environmental pollution control.
- Disposal of the deceased as well as chemical safety.

During the year, the Department consolidated its focus on Environmental Health Services (Municipal Health Services) through promotional and educational initiatives that included integrated environmental health education programmes conducted at 30 primary schools. Eight campaigns relating to chemical safety were conducted by environmental health staff city-wide.

In terms of vector control (rodent or pest control), 404 hotspot areas were identified and 688 'blitzes' carried out. Vector control measures were instituted at the same time. Illegal dumping and the careless disposal of food and waste material are the primary causes of rodent and pest infestations. The vector initiative resulted in an improvement in households' understanding of the need to reduce rodent infestation. In addition the use of owls in the control of rodent infestation was piloted at schools in the

City's Region E.

During the year, all the City's formal and informal food establishments were inspected for compliance with legislation as part of the food resilience programme. This ensured that no cases of food poisoning were reported during the year.

Environmental health service policy objectives derived from the IDP

The table below contains the environmental health services policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Table 88: Environmental health service policy objectives derived from the IDP

## **Security and safety**

The City's vision of public safety is "to build a city where life, property and lifestyle are safe and secure, so that residents and businesses can live and operate free from crime, threats to public safety, personal emergencies and disasters".

The Department comprises of the Johannesburg Metropolitan Police Department (JMPD) and Emergency Management Services (EMS). The mandate of Johannesburg Metropolitan Police Department is to provide road traffic policing, by-law enforcement and crime prevention. Other services include the provision of driver and vehicle testing and licensing, prosecutorial services against traffic offenders and administrative support services to the municipal courts.

Public safety strategic objectives have been developed in line with the IDP priorities and the Joburg 2040 strategy as follows:

- Preventing and reducing crime, injury and loss of life through integrated multi-agency interventions, including social, rehabilitative and enforcement activities.
- Decreasing selected contact crimes, such as assaults and robberies.
- Increasing the level of compliance to City by-laws with respect to street trading, waste management, water, electricity, and advertising.
- Increasing the level of compliance to traffic regulations and improving traffic management.
- Being a proactive and well-capacitated disaster management and emergency response service, with a sustained 100% state of readiness.
- Providing community awareness on dangers and empowerment of communities in the mitigation of disasters.
- Providing efficient and effective responses to emergency incidents.
- Being a vigilant custodian of safety prescripts.

#### Police

The Johannesburg Metropolitan Police Department (JMPD) is primarily responsible for road traffic policing, by-law enforcement and crime prevention.

During the year, the three service delivery priorities for the JMPD were as follows:

- Preventing and reducing crime.
- Increasing the level of compliance to City by-laws.
- Increasing the level of compliance to traffic regulations and improving traffic management.

Key operations implemented city-wide to prevent and reduce crime during the year included visible and undercover patrols, 'stop and search' operations, daily roadside checkpoints, roadblocks, 'cordon and search' operations at buildings and hostels, rapid response to reported crime (10111 and CCTV), and surveillance technology (CCTV).

During the year, activities to prevent and reduce crime in the City resulted in 5 341 arrests for drinking and driving, 13 arrests for possession of illegal firearms, 116 arrests for possession of illegal drugs, and 50 arrests for possession of stolen vehicles.

A key priority for the JMPD during the year was to handle cases of assault and robberies in areas covered by CCTV (mainly the Inner City). The department deployed Metro Police Officers on foot and in vehicle patrols in the Inner City to enhance visible patrols, thereby deterring offenders from committing assault and robberies. In addition the Department also monitored the streets of the Inner City by using surveillance cameras, and incidents detected via CCTV were responded to by dedicated reaction units.

Compared to the previous year (2011/12), the Inner City experienced a decrease of 268 (-13%) assaults and an increase of 189 (60%) in robberies. This resulted in a total decrease of 79 (-3%) in assaults and robberies (when clustered together) for the current financial year.

The decrease in assaults, together with an increase in arrests, can be attributed to numerous factors such as, the efficiency of patrol officers to detect and respond to these crimes, the ability of CCTV monitors to detect crimes together with rapid dispatch reaction units, and the alertness of residents and businesses in the Inner City. Similarly factors that may have contributed to the increase in robberies, include the downtime of CCTV cameras and the lack of safety awareness of pedestrians and road users.

Key operations implemented city-wide to police municipal by-laws and regulations included the implementation of visible and undercover patrols, complaint handling, compliance inspections, monitoring of problematic areas, and the use surveillance technology (CCTV).

In terms of policing municipal by-laws, priority was given to illegal street trading, illegal dumping, illegal electricity connections and illegal advertising. The enforcement resulted in 8 486 fines for illegal street trading, 1 399 fines for illegal dumping and littering, 2 531 fines for illegal electricity connections, and 1 446 fines for illegal advertising.

Key operations implemented to improve compliance to traffic regulations and improve traffic management included the implementation of visible patrols, daily roadside checkpoints, major roadblocks, point duty, and speed and red light violations enforcement (manual and electronic). These operations resulted in 977 059 vehicles stopped, 58 074 fines issued for driving without valid driver and vehicle documentation, 723 691 for moving violations, 119 928 for vehicle roadworthiness, and 3 471 568 for speeding.

#### Fire services

The City of Johannesburg has 28 fire stations to provide fire and rescue services to two operational regions. The regions are divided into six districts. Employees within the service are multi-skilled in terms of fire, rescue and ambulance services. The fire stations are *SANS10090 compliant – Community protection against fire*.

The City's priority objectives in terms of fire services include:

- Creating an end-to-end customer relationship management (CRM) strategy.
- Ensuring emergency and disaster management preparedness.
- Promoting effective custodianship of the City's by-laws and prescripts.
- Empowering communities.

Fire service policy objectives derived from the IDP

The table below contains the electricity services policy objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

#### Disaster management and vehicle licensing

The City's Disaster Management services focus on integrated and coordinated disaster risk management to prevent or reduce the risk of disasters, ensure preparedness, and promote rapid and effective response to disasters and post disaster recovery. Directorate activities for Disaster Management are guided by the Disaster Management Act no. 57 of 2002 and the Policy Framework.

The top three service disaster management delivery priorities include:

- 1. Reducing the City's top ten risks.
- 2. Strengthening and expanding the Community Emergency Response Teams (CERT) programme to vulnerable areas (informal settlements prone to fires, flooding, and so forth.)
- 3. Conducting seasonal awareness programmes on the prevalent risks for identified vulnerable areas (informal settlements).

Two critical disaster management related risks prevalent

in the City include fires, especially in informal settlements, and flooding. During the year, a total of 504 shack fires, 34 structural fires and 18 flooding incidences were responded to. Affected communities were provided with relief in the form of blankets and food parcels with assistance from the City's Social Development Department, the South African Social Security Agency and non-governmental organisations (NGOs). The City further capacitated Community Emergency Response Team (CERT) champions in all seven City regions. Campaigns were implemented to promote disaster prevention awareness. These included campaigns relating to water safety, basic first aid, basic fire fighting and the 'Stay Alive Till We Arrive' and 'Learn not to Burn' campaigns.

### Vehicle licensing

The Johannesburg Metropolitan Police Department is responsible for the provision of vehicle and driver licensing. It operates as an agent for Gauteng Department of Transport with regards to motor vehicle registration and driver license testing centres within the City.

Table 101: Turnaround times for vehicle registrations and licence renewals

|     | Average turnaround times: |                   |                  |  |  |  |  |  |
|-----|---------------------------|-------------------|------------------|--|--|--|--|--|

## EMS capital projects

Wash bays are required facilities at EMS fire stations to ensure a safe, clean environment for EMS staff when cleaning and sterilizing vehicles and equipment, as per a citation issued by the Department of Labour and the OHS Act 85 of 1993. They are further required to mitigate the risk of staff being infected after being exposed to medical, biological and chemical waste; and ultimately to minimize the City's exposure to possible liabilities.

The project to build 21 wash bays and to revamp three existing bays for City of Joburg Emergency Management

Services (EMS) was initiated in October 2010. The allocated funding of R3.5 million served to build three new wash bays and revamp two existing bays. The additional funding will be

used to build five more wash bays and to create additional job opportunities. The Project is spread over a period of three years.

Table 106: Wash bay revamp project implementation progress

| No | Fire station  | Scope   | Contractor | Contract amount (R'000) |
|----|---------------|---------|------------|-------------------------|
| 1  | Brixton       | New     | TedVest    | 893,509.00              |
| 2  | Eldorado Park | New     | TedVest    | 921,628.00              |
| 3  | Florida       | Upgrade | TedVest    | 502,075.00              |
| 4  | Jabulani      | New     | Microzone  | 736,643.50              |
| 5  | Midrand       | Upgrade | Microzone  | 374,332.75              |
| 6  | Total         |         |            | 3,428,188.25            |

In 2012/13, new wash bays were completed at Brixton fire station, Eldorado Park Fire Station Jabulani fire station as well as the upgrade of Florida fire station and Midrand fire station. This was achieved at as total cost of R3 428 188 against the allocated budget of R 3 500 000.00.

## **Sports and recreation**

The Sports and Recreation Directorate oversees provision of sporting, recreational and social opportunities and formulates policies. It further focuses on social upliftment, ensuring that City communities, especially marginalised ones, are involved in its projects and take ownership of them. The directorate oversees a total of 565 facilities, 394 for sports, 108 for recreation and 63 for aquatics.

Sport and recreation services are responsible for:

- Maintaining sporting and other facilities.
- Formulating policy.
- Addressing issues of social upliftment through the initiation and overseeing of projects and functions.
- Encouraging the involvement of communities by implementing programmes and by making facilities available.

Sports facilities include various stadiums, some of international standard such as Ellis Park and Wanderers, while others meet national and regional standards. Grass and gravel fields are provided, as are open, indoor and multipurpose facilities. Recreational facilities range from simple indoor structures to multi-purpose indoor facilities, outdoor play areas and wide-open spaces at parks. Aquatic facilities vary from international standard swimming pools, such as Ellis Park, to standard pools, both outdoor and indoor. The City has a number of heated pools, such as at Coronation, Ellis Park and Linden.

Overall Johannesburg has 111 recreation centres, 239 sports facilities, and 59 swimming pools across the City's seven regions

Sport and recreation service policy objectives derived from the IDP

The table below contains the sport and recreation policy objectives derived from the IDP; and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

Table 107: Sport and recreation service policy objectives derived from the IDP

### **Good Governance Cluster**

A high performing metropolitan government that pro-actively contributes to and builds a sustainable, socially inclusive, locally integrated and globally competitive Gauteng City Region

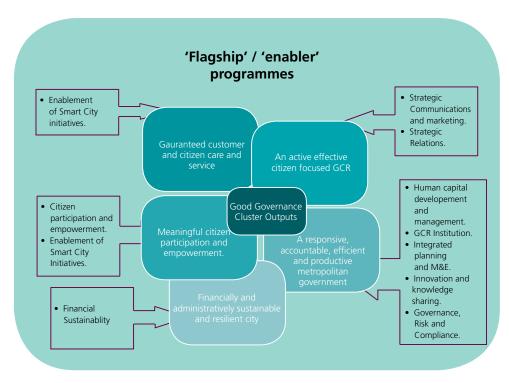

# Perspective on good governance

Good governance relates to the processes for making and implementing decisions. It is less about making 'correct'

decisions, than about ensuring the best possible process to structure and implement the outcomes of those decisions. Good decision-making processes, and therefore good governance, share several characteristics in that they have a positive effect on the various aspects of local government, including consultation policies and practices; meeting procedures; service quality protocols; the conduct of councillors, officers and employees; role clarification; and the promotion of good working relationships.

Accountability is a fundamental requirement of good governance. Local government has an obligation to report, explain and be answerable for the impact of the decisions it makes on behalf of the community it represents. It further has a responsibility to implement decisions and follow processes that make the best use of the available people, resources and time to ensure the best possible results for the long-term economic, social and environmental sustainability of its community.

Figure 23: Outputs for the Good Governance Cluster, with associated 'Flagship' / 'enabler' programmes

### Performance highlights

**Table 110: Good Governance Cluster performance highlights** 

| Service area  | Performance highlight  |
|---|--|
| A responsive, accountable, efficient and productive metropolitan government | Innovation and knowledge sharing: Annual Target of 100% implementation not fully achieved.  However progress was made and three innovative projects were identified based on the set criteria.  The three projects identified were the Outdoor Green Gyms: promoting healthy lifestyles in the City, Landfill Gas to Energy Clean Development Mechanism and the Bus Rapid Transit (BRT). |
|   | Governance, Risk and Compliance: Group integrated assurance framework and combined assurance model completed. Implementation achievements to date (100%).  |
|   | Combined assurance and integrated planning for 13/14 completed (core admin); City-wide strategic risks 2013/14 performed.  |
|   | Total of 19 Forensic Investigations completed during 4th quarter in the core administration.   |
|   | Completed investigation and conducted follow-ups on disciplinary action relating to AGSA audit finding on SCM Section 44 non-compliance (officials doing business with the City).  |
|   | Fraud awareness and City's Code of Conduct awareness training in high risk departments, attended by 222 employees.   |
| Financially and administratively sustainable and resilient city             | Financial Sustainability: 92% of revenue collected from revenue billed – annual target achieved.   |
| Meaningful citizen participation and empowerment                            | 130 Ward plans have been developed for all wards in the City of Johannesburg as originally planned. Ward plans include ward profiles and costed capital projects for individual wards.   |
|   | Enhancement of the Civic Education awareness: annual Target exceed with a total of 80 wards reached against the projected 65 wards.  |

### Performance overview

The Joburg 2040 Strategy recognises the importance of sound governance practices that will support the City in the attainment of its long-term objectives and goals. The Governance Cluster supports the GDS outcome of: "A high performing metropolitan government that pro-actively contributes to and builds a sustainable, socially inclusive, locally integrated and globally competitive Gauteng City Region."

This GDS outcome is further supported by the Cluster's five core outputs:

- An active and effective citizen focused Gauteng City Region (GCR)
- A responsive, accountable, efficient and productive metropolitan government.
- A financially and administratively sustainable and resilient city.
- Meaningful citizen participation and empowerment.
- Guaranteed customer and citizen care and service.

The Governance Cluster envisages a future where the City will drive a caring, responsive, efficient and progressive approach to service delivery and development within the GCR.

# Information and communication technology (ICT) services

The City's aspiration of becoming a leading Smart City through the roll-out of Broadband technology and capabilities is underpinned by its information and communications technology (ICT) strategy, which in turn is enabled by adopting sound governance processes. The upgrade of the City's ICT infrastructure assets has increased the number of departments connected to a common interoperable 'Smart City' platform. During the year, public access to internet services was increased through the PAIL (Public Access to Internet in Libraries) programme and the Broadband Network Core Infrastructure. PAIL implementation is planned to continue in the year ahead and will be continually refined in future years.

The City's ICT objectives include:

- Improving productivity.
- Improving efficiencies by deploying appropriate ICT systems and solutions.
- Ensuring the implementation of an ICT Governance Framework and supporting structures.
- liminating the 'Digital Divide' that still exists between different social groupings.

ICT service policy objectives derived from the IDP

Table 111 contains the ICT service objectives derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the next three years, as envisaged in the IDP. The past two financial years indicate the performance progress achieved by the entity. During the year the SAP system maintained an average uptime/availability of more than 95%. With regard to ICT Outsourced Operations, the table below indicates aggregated average performance per Service Level Agreement (SLA) in each functional area.

Table 111: ICT service policy objectives derived from the IDP

## Corporate policy offices: Financial services

In line with the City's Institutional Review process, the Revenue and Customer Relations Management and Finance departments form the Group Finance Department, which has oversight of the financial well-being of the City.

The Department has the following key outputs:

- Increasing the bill collection rate (complete revenue).
- Ensuring disciplined expenditure management.

- Promoting high confidence levels in the City, for private sector partners and citizens.
- Ensuring effective management oversight and monitoring of people and processes.
- Creating value for money via smart and efficient supply chain management (SCM) procurement.
- Retaining and improving the competitive edge of the City.
- Promoting a financially stable City with healthy financial reserves.

### Performance highlights

**Table 114: Group Finance Department's performance highlights** 

| Output area                      | Performance highlight  |
|----------------------------------|--|
| Reducing unnecessary expenditure | The Department introduced austerity measures during the year to reduce employee related costs and unnecessary expenditure, which yielded positive results.   |
| Billing                          | Checks and balances were refined to validate the accuracy of bills delivered to customers. Systemic parameters were implemented and human interventions introduced to ensure accurate bills are dispatched to customers. This has resulted in reduced customer complaints and increased revenue collections. Dedicated teams were deployed at regional level to receive and resolve customer queries at points of contact. |
| Revenue collection               | The Department enhanced its efforts to improve the collection of billed revenue. Credit control measures were intensified. The speedy resolution of customer queries relating to billing and meter readings (amongst others) resulted in a steady improvement in the collection ratio.   |

## **Group Finance Department service policy objectives derived** from the IDP

The table below contains the policy objectives for the Group Finance Department derived from the IDP and shows a comparison of performance for the review period relative to planned performance for the years 2013-2016, as envisaged in the IDP. Year -1 (2011/12) and Year 0 (2012/13) indicate progress achieved against IDP plans.

## Cluster performance against SDBIP targets for 2012/ 13

Table 120: Sustainable services cluster performance against the SDBIP

| IDP<br>flagship<br>programme  | Project/s  | Indicator  | Measurement<br>unit  | Baseline  | Annual<br>targets   | Achievement as 30 June 2013   |
|-------------------------------|------------|--|--|---|---|---|
| Greenways<br>and<br>Mobility. | and of Rea | Original approved Indicator:  Rea Vaya – Phase 1A: Quality service delivery; Phase 1B: Operationalization; and Phase 1C: Planning. | Tickets sales.   | 41 000 passengers.                                  | 45 000 passenger per day on Phase 1A of the Rea Vaya BRT system.  | Annual target partially met. The Rea Vaya BRT system achieved an overall annual average of 35 953 passengers per day. The under achievement is attributed to external pressures such as the number of strikes experienced including a 3 week national bus driver strike during the fourth quarter which lasted for longer than envisaged.   |
|                               |            | Revised approved indicator:  Phase 1 A: Average number of passengers per day . 9   |  |   |   | Alternative measures are being explored to mitigate challenges to meeting the set annual target, particularly during strikes. The department will continue to provide quality services including marketing and communications.  |
|                               |            | Kilometres of dedicated road ways constructed, numbers of stations constructed and % of depots completed and purchase of buses.    | Visual inspection.  Phase 1B buses: Agreement with affected operators. | Completed<br>Rea Vaya<br>Phase 1A<br>infrastructure | Original approved target: Phase 1B completed and Phase 1C planned. Revised Approved target: Phase 1B – 4.92 kilometres of roadways and 4 stations constructed (4 stations as per list attached); 100 % completion of depot (Dobsonville depot for Rea Vaya); and 134 buses purchased. | Annual target partially met. The annual target on both the roadways and the stations and depots was achieved, that is 4.92 kilometres of roadways and 4 stations (asper list attached) were completed. Improvements underway in preparations for Phase 1B operations during second quarter of 2013/2014 financial year. 1 Depot (at Dobsonville) completed. Preparations to launch the Rea Vaya services in the new financial year (2013/2014) on this Phase 1B route are underway. Regarding the 134 buses purchased, significant progress was achieved: The buses have been ordered and a prototype bus was inspected; negotiations with affected operators although not concluded are on-going; There are delays on the delivery of the buses however, due to the change in the bus requirements to include local content towards job creation. The Phase 1B delivery of 134 buses will be done in the next financial year. Authorization for deviation from the original target was sought and approved at midyear. |

<sup>&</sup>lt;sup>9</sup>The average number of passengers per day denotes the number of passengers commuted through Phase 1B operations of the Rea Vaya BRT system. Phase 1B operationalization includes purchase of 134 buses to run the service, negotiations with the affected operators and the establishment of a second BOC to run the operations.

| IDP<br>flagship<br>programme | Project/s                      | Indicator  | Measurement<br>unit                         | Baseline       | Annual targets   | Achievement as 30 June 2013  |
|------------------------------|--------------------------------|--|---|----------------|--|--|
|                              |                                | Planning for Phase 1C commenced (Phase 1C sustainability study and Phase 1C business plan completed) towards phase 1C implementation.                                      | Sustainability study. Business plan.        | New indicator. | Phase 1C<br>sustainability study<br>and business plan<br>completed <sup>10</sup> .   | One annual target achieved. The Rea Vaya phase 1C sustainability study was completed. Consultation with various stakeholders both internal and external on the findings of the study has commenced. The Phase 1C business plan not completed.  |
|                              | Introduction of managed lanes. | No. of<br>kilometres<br>of managed<br>lanes <sup>11</sup> .  | Feasibility<br>study. No. of<br>kilometres. | New indicator. | Original approved target: Feasibility study and at least 1 managed lane implemented.  Revised Approved Target: 2 kilometres of public transport managed lanes introduced (bypass lanes & dedicated public transport lanes in inner city).  | Annual target partially achieved. The annual target on the feasibility study (at Ntemi Peliso) was achieved. The traffic volumes however did not warrant implementation of managed lanes on this road. A follow-up broader study for the area is to be done in the new year (2013/2014) - aimed at introducing managed lanes particularly where they will be warranted.  |
|                              |                                | Original approved Indicator:  Managed lanes implemented.  Revised Approved Indicator:  Number of kilometres of managed lanes implemented in the Inner City <sup>12</sup> . | No. of kilometres implemented.              | New indicator. | Original approved target:  Feasibility study and at least 1 managed lane implemented.  Revised Approved Target:  2 kilometres of managed lanes (bypass lanes & dedicated public transport lanes in Inner City) introduced / implemented in the Inner City (Ntemi Peliso street). | The annual target on managed lanes on the identified route (Ntemi Peliso) was not achieved. The feasibility study for possible implementation of managed lanes at this road (Ntemi Peliso) was done. However, the 2 kilometres of dedicated lanes envisaged for implementation on the road (Ntemi Peliso) was not implemented. This is because the results of the feasibility study indicated it would not be practicable. Traffic volumes are too high to introduce a dedicated lane on this road.  A comprehensive study will now be done in the next financial year to look at the overall impact in the CBD for introducing dedicated lanes. |

<sup>&</sup>lt;sup>10</sup> NF12: Corronationville Station, NF006: UJ Sophiatown Station, CBD21: Park Station, NF17: Noordgesig Ext Station.

<sup>11</sup> Feasibility study conducted on possible implementation of managed lanes in the Inner City (e.g. Ntemi Peliso Street) aimed at implementing managed lanes to enhance mobility and reduction of congestion particularly in the Inner City.

 $<sup>^{\</sup>rm 12}{\rm Ntemi}$  Peliso Street and Rosherville to enhance mobility and reduce congestion.

| IDP flagship<br>programme | Project/s   | Indicator   | Measurement<br>unit              | Baseline       | Annual targets  | Achievement as 30<br>June 2013   |
|---------------------------|---|---|----------------------------------|----------------|---|--|
|                           | Improved<br>movement<br>of freight<br>within the<br>borders of<br>the City. | Original approved Indicator:  Manage movement of freight.  Revised approved indicator:  Implementation of a freight policy through managed lanes. | Parking audits.  Freight policy. | New indicator. | Original approved target.  Complete freight policy.                         | Annual target partially met.  A target of twenty five parking audits was achieved. The implementation of parking audits study and development of policy to commence in the new year (2013/2014).   |
|                           | Streets<br>Alive.   | Open Street programme <sup>13</sup> .   | Open Street activities.          | New indicator. | Number of Open<br>Street activities in<br>different regions <sup>14</sup> . | The target of three events was achieved and exceeded.  2 Streets Alive: Open Streets activities were held on 21 April 2013 and 1 May 2013 respectively.  Cumulatively 7 (including through partnerships) Open Streets events / activities were held) during the 2012/13 financial year. The areas where Open Street activities were held include Orlando to Bosmont (with estimated 300 people), Alexandra (with estimated 1000), Eldorado Park (with estimated 400), Roodepoort (with estimated 200) and Dlamini (with estimated 800). Open Streets activities will continue in the new year (2013/2014). |

<sup>&</sup>lt;sup>13</sup>The number of open streets activities/programmes (of which there were 13) implemented along the identified route from Vilakazi Street in Orlando to Sandton Square aimed at reclaiming City roads as public spaces.
<sup>14</sup>Three open streets activities/programmes implemented.

| IDP flagship<br>programme     | Project/s   | Indicator  | Measurement<br>unit   | Baseline                                    | Annual targets   | Achievement as 30 June<br>2013  |
|-------------------------------|---|--|---|---|--|---|
|                               | Travel Demand Management.   | Development and implementation of travel demand policy.                        | TDM policy<br>and measures.<br>Number of TOD<br>interventions<br>measures<br>interventions<br>introduced. | New indicator.                              | 100%<br>Development<br>of policy and<br>implementation<br>started <sup>15.</sup> | Target not achieved.  However, a draft TDM policy was developed for internal use and was included in the strategic Integrated Transport Plan framework.  Various measures were introduced on TDM interventions, these included:  Park and rides study on potential areas; Participation in a study on Nasrec as venue with PRASA; and The twenty five parking audits mentioned above for small CBDs (list attached) included TDM recommendations. |
| Greenways<br>and<br>Mobility. | Public<br>transport<br>facilities.  | Model Taxi<br>Facility:<br>Roodepoort<br>Rank 5<br>constructed <sup>16</sup> . | Completed facility.   | Design and earthworks completed.            | Facility completed <sup>17</sup> .   | Target not achieved.  The facility is still under construction and was not completed on targeted date. Delays were caused by contractor cash flow problems. This facility will be completed by the end of first quarter of the 2013/2014 financial year.  |
| Shift to low carbon economy.  | Improve network performance and quality of supply and service. (Improve restoration times, reduction in unplanned outages, improvement of network health) .18 | System Average<br>Interruption<br>Duration Index<br>(SAIDI).                   | Minutes.  | <1 138 minutes system average interruption. | 11.7 minutes system average interruption.  | This is as a result of cable theft, City continues to work with JMPD and SAPS and communities in dealing with cable theft.  |

 <sup>15</sup>TDM policy developed and four (4) interventions introduced including through partnerships.
 16Number of public transport facilities constructed in line with the new model of ranks aimed at promoting walking, cycling and public transport.
 17One Public Transport Facility (Roodepoort Rank 5) constructed and completed.
 18City Power implemented an international tool which is not giving the ideal envisaged outcomes.

| IDP flagship<br>programme | Project/s   | Indicator  | Measurement<br>unit   | Baseline  | Annual targets   | Achievement as 30 June 2013  |
|---------------------------|---|--|---|---|--|--|

|-----------------------------------|--|--|---------------------------------|--|----------------------------------|--|
| Integrated<br>Waste<br>Management | Waste diverted from landfills.  Reduce, reuse, recycle and reclaim (community participation in separation at source – SLAs with PPP's).            | Dry recyclable<br>waste diverted<br>from landfills<br>99517 tonnes.<br>80 000 Green<br>waste tonnes. | Waste tonnes.                   | 99 778<br>Tonnes.<br>10 000<br>Tonnes. | 99 517 tonnes.<br>80 000 tonnes. | Annual target partially met.  The total waste diverted from landfill site as at the end of the year was not achieved. The total waste diverted through City and Industry interventions was 88 934 tonnes out 1 163 941 tonnes disposed.  Green waste diverted was 23 356. It was lower than the target of 80 000 due to challenges with compost plant during period under review.  |
|                                   | Construction<br>of buy-back<br>centres, drop-<br>off centres<br>and garden<br>sites (sorting<br>facilities).                                       | Number of sites.   | Number of buy-<br>back centres. | 4 Buy-back centres.                    | 3 Buy-back centres.              | Target achieved.  4 Garden sites were upgraded in Allie Street, Meredale, Migson Manor and Randburg, and they are operational.  5 buy back centres were conceptualized with designs completed in the 2012/13 financial year to be constructed in 2013/14 financial year in Diepsloot, Protea North, Mapetla Chiawelo and Orange Farm . <sup>21</sup>   |
|                                   | Roll-out of separation at source. Community participation, education and awareness, taking responsibility for environment and poverty alleviation. | Participation rate in targeted areas.  | % Participation.                | 0%                                     | 60% Average participation rate.  | The set annual target was not achieved.  17% Average participation rate in targeted depot areas, Diepsloot, Orange Farm, Zondi and Waterval. The various areas perform at different rates; with certain areas such as Waterval have a higher participation rate. This is due to fact that the project has been in operation for more than a year in some areas whereas areas such as Orange Farm only started the project during the last 4 months and not enough households are fully aware of the project. |

 $<sup>{}^{\</sup>scriptscriptstyle{0}}\textsc{Targets}$  are indicative and they will be verified through a survey.

<sup>&</sup>lt;sup>21</sup>The development plan requires land to be allocated, lease agreements to be concluded, designs to be completed before construction takes place. Capital funding has been allocated in 2013/14 to construct the facilities as well as the design for further facilities indicated in phase 2 of the project.

<sup>&</sup>lt;sup>22</sup>Action Plan is developed for each landfill site to address matters of non-compliance. In the 2012/13 financial year some of the mitigation plans have been implemented such as fencing at sites, weighbridges fixed etc. These are aimed to improve compliance by the next audit. Capital Funds have also been allocated in the 2013/14 financial year to address further items where there was non-compliance and will be implemented in the next financial year.

| Targeting deprived spaces. | Functionally align all cluster-level strategic and planning processes to assign priority to the development and upliftment of the most deprived areas defined by the City of Johannesburg geographic index of deprivation, with specific emphasis on: Outreach targeting deprived areas (using iJozi Ihlomile project as a platform linked to a/the single window systems.) | Number of dimensions of deprivation programmatically targeted through coordination and/ or outreach. | Number of dimensions targeted. | New indicator. | 5 Dimensions of deprivation programmatically targeted. | Target not achieved.  Only 1 dimension was achieved. The social surge approach, through which social work teams have targeted informal settlements in the most deprived areas and seeks – amongst other interventions - to connect children in particular with grants they are eligible for, and identify working age adults in the same households that can be connected to employment and new venture programmes. This methodology will be core to the income deprivation targeting action plan. This is reflected as 1 dimension against performance data.  Action plans for the remaining dimensions of deprivation (living environment, education, employment, health) are under development with the respective departments. |

Table 125: Governance Cluster performance against the SDBIP

| Citizen participation and empowerment. | Community based planning and budgeting. | Development<br>of community<br>based ward<br>plans. | Ward plans.         | 2011 CBP pilot. | 130 Ward based<br>developed. | Finalisation of ward plans.  130 Ward plans have been developed for all wards in the City of Johannesburg, as originally planned.  These ward plans include ward profiles and costed capital projects that will be implemented within individual wards. |

| IDP flagship<br>programme | Project/s                                    | Indicator   | Measurement<br>unit         | Baseline                                  | Annual targets   | Achievement as 30 June<br>2013  |
|---------------------------|--|---|-----------------------------|---|--|---|
|                           |  | New indicator. % Implementation of CBP pilot in Region E. | CBP Region E. Pilot report. |   | 100% Implementation of CBP in Region E. <sup>29</sup>                      | Community Based Planning pilot has been successfully completed in Region E and it should be able to guide comprehensive CBP implementation across the City.  Included with CBP plans for Region E is Capex projects to be implemented in each ward; costed operational plans for each city department and entity; community identified initiatives (which are still to be prioritised and detailed in the implementation plan).  The Department also concluded a detailed case study to capture key learning's from this pilot as the intention is to replicate the CBP model in other regions within the City of Johannesburg. The key lessons which emerged related to the timing of the CBP process, feedback from the community and how well CBP meets the community's needs. |
|                           | Implementation of customer services charter. | Customer service charter confirmation.                    | Charter readiness.          | Draft<br>customer<br>services<br>charter. | Implementation <sup>30</sup> of the customer services charter commitments. | The charter was finalised for piloting.  The charter was developed and finalised for piloting in the period under review.  The charter was printed and widely distributed throughout the regions as well as electronically via the intranet and CoJ website. Relevant entities/departments initiated implementation. There are 57 service level standards; of the 57 service level standards 25 have reached a 100% target of completion.  The charter will be approved by relevant governance structure and launched.  |

<sup>&</sup>lt;sup>29</sup> 2012/16 CBP Concept, Region E Stakeholder Consultation, Region E Ward Plans, Region E CBP Pilot Case Study, 2013/14 CBP Citywide Implementation Plan. <sup>30</sup>Implementation refers to piloting of the charter, confirmation of adherence to standards, finalising charter and customer charter launch as per quarterly targets.

CoJ is in the process of obtaining approval for the implementation of the Contract Management Framework.   |
|                           | Legal<br>Advocacy.                               | Identify new and review existing legislation to be amended to ensure an empowered metropolitan government that includes decentralised decision structures (sub- councils). | (a) Percentage of identified legislation that was influenced. (b) Number of amendments to legislation formulated and influenced. (c) Percentage support to establish decision making structures (sub-councils) discussion document. | New.     | (a) Identify and lobby for strategic powers and functions necessary for a proper functioning metropolitan government. (b) Lobby for amendments and liaise with relevant stakeholders. (c) Develop subcouncil by-laws in terms of the adopted CoJ Sub-Council Policy . <sup>40</sup> | Annual target not achieved. Progress was made in public participation of draft by-laws for the establishment of the Office of the Ombudsman in the City of Johannesburg; Vetted amendment of the Emergency Housing Policy and submitted opinions on review of the PIE Act; Lobbied and submitted comments on proposed amendments of the NLTA. |

<sup>&</sup>lt;sup>38</sup> The development of a contract management framework to facilitate and influence legal - commercially sound, efficient and effective contracts and contract management.

<sup>&</sup>lt;sup>39</sup>A fully developed and approved contract management framework for the administration which will enable the monitoring of contract management by departments and MOEs.

<sup>&</sup>lt;sup>40</sup>Review will cover - having identified legislation and proposed amendments, comments made on new provincial and national legislation; identify the constitutional powers and functions for amendments and approved delegations.

 $<sup>^{40}</sup>$ The campaigns are intended to create awareness about the City's vision & strategy locally and internationally.

# Chapter 4

## Organisational development performance

## Introduction to the municipal workforce

The City's biggest asset is its employees who bear responsibility for delivering its mandate to communities. They are the foundation and drivers for the City's success. Accordingly, the City strives to create value by attracting, developing and retaining skilled and competent people. Through its Human Resources Management (HRM) function, the City is committed to inspiring and growing people

through individual development analysis and plans, as well as career management programmes and by recognising performance excellence.

The City is committed to recruiting from within its communities while also ensuring a deliberate focus on developing a local skills base where this may not exist. Its Human Resources Strategy has a vision of delivering professional, diverse and competent Human Capital for a World-class African City. The strategy focuses on the development of human resources in all aspects.

Table 126: Human resource management (HRM) performance highlights

| Functional area | Performance highlights   |
|-----------------|--|
| Recruitment     | Successfully recruited of 20 of the 22 Section 54A and Section 56 positions.   |
|                 | Successfully appointed CEOs/MDs of 10 of the 11 Municipal Entities. The two outstanding positions under recruitment are the Group CFO and the Executive Director Public Safety.  |
| Staff turnover  | The City experienced a 4.71% staff turnover rate in 2012/13 (excluding seasonal terminations). Turnover 'hotspots' continue to be prioritised - where turnover is higher than the average - through skills retention strategies such as talent management, succession planning and delegations in terms of remuneration. |

Table 127: Entities and citywide turnover as well as vacancies

## **Comment on workforce policy development**

During the review period the Workforce Policy has been reviewed and will be covered by the suite of Human Capital Management Policies which include the following:

- Employee Mobility Policy
- Employee Relations Policy
- Succession and Promotion Policy
- Employment Equity and Transformation Policy
- Job Evaluation Policy
- Travel and Subsistence Allowance Policy

- Talent Acquisition Policy
- Organisational Structuring, Review, Design and Maintenance Policy
- Professional Registration
- Training and Development Policy
- Locomotion Allowance Policy
- Employee Health and Wellness Policy
- Employee Assistance Programme
- HIV and AIDS in the Workplace Policy
- Substance Abuse Policy

These Policies have all been developed in a group context and are awaiting the adoption of the Group Operating Model and subsequent Council approval.

# **Chapter 5**

## Financial performance

## Chief Financial Officer's Report

#### Introduction

Chief Financial Officer of the City of Johannesburg Reggie Boqo "We commit ourselves to embrace the important position of our City on the African continent; that we are a city that embraces its African identity and

represents the spontaneity and vibrancy of our diverse cities across this continent." Executive Mayor Cllr Mpho Parks Tau

It is with great pleasure that I present the consolidated Annual Financial Statements for the City of Johannesburg for the year ended 30 June 2013. These consolidated Annual Financial Statements of the Municipality incorporate the results and operations of the Core Administration as well as the Municipal Owned Entities (MOE's).

City of Johannesburg's consolidated Annual Financial Statements were prepared in full compliance with the provisions of the Generally Recognized Accounting Practice (GRAP), Generally Accepted Municipal Accounting Practice (GAMAP) and South African Generally Accepted Accounting Practice (SA GAAP) which ensures comparability against those of the prior years as well as against those of other Municipalities whose reports have been prepared on the same basis.

#### Financial overview

The year under review was challenging given the depressed economic growth both globally and in the domestic environment. South Africa's economic growth rate was revised downwards and the household debts levels have remained very high and possibly at unsustainable levels in this period. It is against this backdrop that the City is presenting its consolidated annual results where a surplus of R3,4 billion was achieved and the City achieved an Unqualified Audit Opinion for the first time in three years.

The City's total assets have increased by 7% to R60,2 billion driven largely by capital expenditure of R4,2 billion, increased debtors and a significantly improved cash position of R5,4 billion. The City has spent 93% of its capital expenditure budget during the year under review. The City has maintained healthy levels of liquidity and successfully redeemed listed bonds and other liabilities amounting to R2,3 billion that fell due during the year under review. This was achieved despite the City only raising new funding of R703 million whilst continuing to funds its operational activities. The current ratio at year end was above the City's target of 1 whilst the solvency ratio also exceeded the target of 2. The net assets increased by 13% to R30,4 billion as a result of the surplus achieved.

Total income increased by an insignificant 2% to R34,8 billion from prior year whilst operational expenditure increased by 7% to R31,4 billion in the same period. The increase in operational expenditure is significantly influenced by 30% increase in the impairment charge for the year of R2,9 billion. Employee related costs increased by 8% resulting in a remuneration: expenditure ratio of 36,6% which breached the target of 30% set by the City.

Cash generated by operations increased significantly to R8,7 billion from R5,3 billion in the prior year resulting in materially improved cash position at year end as reported above.

The City has maintained its respectable credit ratings with Fitch and Moody's at AA- (zaf) with a stable outlook and A1.za with a negative outlook respectively. These credit ratings will assist in containing the funding costs of the City and ensuring that the City's listed bonds remain an attractive proposition to the investors.

The City's objective is to manage financial risk in a way that "Builds a Sustainable, Resilient and Responsive Local Government". We will continue to balance the needs of short term operational expenditure against investment in infrastructure for the medium and long term in line with the aspirations of the Growth and Development Strategy (GDS).

The City remains committed to prudent management of its finances, focusing on strengthening the balance sheet; tightening credit policies and continued improvement in revenue collection strategies. These, and other strategic interventions, will continue to contribute to a financially healthy City

# Analysis of the annual financial statements for the financial year 2012/13

| NET SURPLUS AFTER TAXATION  | 3 438 456  |                    |                    | 4 614 681  |               |        |      |              |

#### Revenue

The revenue composition has remained relatively unchanged from prior year with services charges and property rates accounting for around 70% of the total revenue generated. Government grants for the current contribute 20% to total revenue which is lower than prior year's 22% contribution. The City has shown less reliance on grants in the year under review.

Figure 25: Revenue % composition

#### **Revenue Composition**

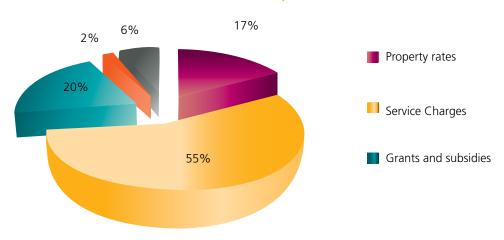

Figure 26: Revenue trend analysis

Year to Year Trend Analysis

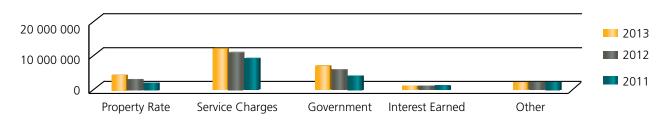

Table 133: Breakdown of property rates

| Figures in Rand | 2013      |      | 2012      |      |
|-----------------|-----------|------|-----------|------|
| thousand        | Actual    |      | Actual    |      |
|                 |           | %    |           | %    |
| Residential     | 2 249 405 | 37%  | 1 839 826 | 34%  |
| Commercial      | 3 715 484 | 62%  | 3 441 982 | 64%  |
| State           | 51 087    | 1%   | 50 782    | 1%   |
| Municipal       | 18 970    | 0%   | 80 024    | 1%   |
|                 | 6 034 946 | 100% | 5 412 614 | 100% |

The composition of property rates revenue has remained relatively unchanged although the residential property rates contribute marginally higher than in the prior year largely due to newly ratable properties added to the residential and commercial categories. The 11% increase in total property rates revenue is attributable to the 6% tariff increase and efforts made by the City to bring in ratable properties that

were outside the net. Commercial customers continue to be the largest contributor to property rates revenue currently at 62% (2012: 64%).

Service charges increased by 6% (See table below). The revenue increase is mainly attributable to the tariff increases on electricity, water and refuse removal charges.

Table 134: Breakdown of service charges

| Figures in Rand thousand        | 2013<br>Actual |      | 2012<br>Actual |      |

| Surcharges: refuse              | 2 787          | 0%   | 2 424          | 0%   |
| Refuse removal                  | 963 666        | 5%   | 890 487        | 5%   |
| Sewerage and sanitation charges | 1 898 223      | 10%  | 2 001 116      | 11%  |
| Other services                  | 134 219        | 1%   | 116 588        | 1%   |
|                                 | 19 220 098     | 100% | 18 135 473     | 100% |

The main contributor for service charges is electricity at 64%, as it was in the previous financial year, with water being the second highest contributor at 17%.

Refuse removal has increased in spite of Round Collected Refuse removal that was affected due to the condition of the fleet. Pikitup has worked hard to make sure that Round Collected Refuse is regular and consistent and the introduction of a new fleet management and monitoring regime has assisted in resolving the fleet challenges of the nast

### Expenditure

Figure 27: Expenditure % composition

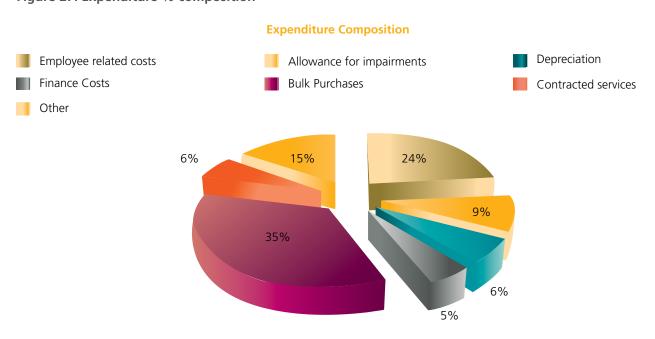

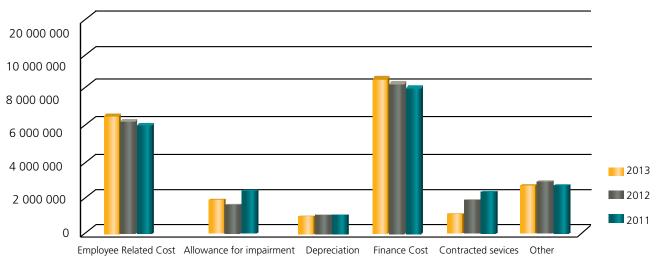

Figure 28: Expenditure trend analysis

In the financial year under review, the City's high value cost drivers were the bulk purchases, employee related costs and contracted services. Bulk purchases are throughput costs for the City which are recovered through the revenue generated from water and electricity.

Employee related costs increased by 8% which is attributable to the absorption of third party staff in Pikitup and general annual salary increases.

The decline in contracted services is testament to the City increasingly doing work in-house which was previously outsourced.

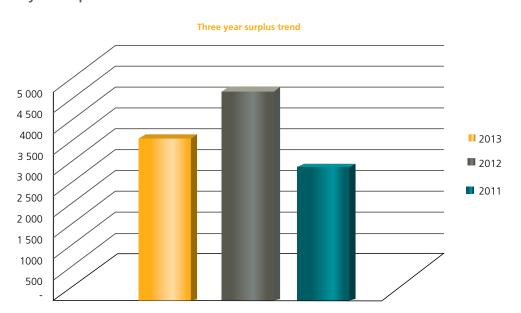

The City's customers continue to face economic pressure and as a result collection levels for consumer debts are still depressed, albeit improved, hence an increased allowance for impairment. The City continues to follow a conservative and prudent approach in its impairment assessment model.

Finance charges decreased from last year by 8% and are under budget by 7% as the City incurred the long term capital debt late in the financial year which resulted in a saving. The City has relied on its internally generated cash for most of the year which is further testament to its improved liquidity management approach.

#### Annual surplus generated

Despite the challenging economic climate, the City was able to generate a healthy net surplus of R3.4 billion which is a 26% decline from the previous year's R4.6 billion. The decrease is largely due to a 30% increase in impairment charge. The achievement of a surplus is in line with the City's Growth and Development Strategy and augurs well towards achieving financial sustainability and resilience.

Figure 29: Three-year surplus trend

#### **Statement of Financial Position**

| Figures in Rand thousand   | 2013       | 2013               | 2013               | 2012       | Growth | Variance |

|                            |            |                    |                    |            |        |          |
| Assets                     |            |                    |                    |            |        |          |
| Non-current assets         | 46 304 989 | 45 507 281         | 45 350 184         | 44 136     | 5%     | 2%       |
| Current assets             | 13 886 132 | 9 806 587          | 11 646 198         | 12 237     | 13%    | 42%      |
|                            | 60 191 121 | 55 313 868         | 56 996 382         | 56 374 108 | 7%     | 9%       |

#### Composition of debtors

The City is committed to its ambitious R100 billion capital expenditure programme announced previously which will partially be funded from internally generated reserves hence the importance of this surplus. The City aims to commit its own funds out of surpluses alongside the contributions made by investors and government in order to realize the City's ambitious capital expenditure programme.

The City's Net Assets position has improved by 13% to R30,4

billion. The increase in net assets is a result of the surplus reported in the statement of financial performance.

Non-current liabilities increased by a modest 2%, while current liabilities increased by 1% when compared to prior year. The City's total assets increased by 7%, which is mainly due to a rise in trade receivables as well as a significant increase in cash and cash equivalents as at year end.

**Table: 135** 

| Figures in Rand thousand                     | 2013      | 2012      |
|--|-----------|-----------|
| Cash and cash equivalents at end of the year | 5 401 407 | 2 220 393 |

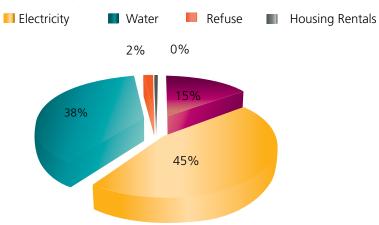

The cash and cash equivalents increased by 143% to R5,4 billion reflecting the results of an improved liquidity management approach adopted by the City. The surplus

achieved in the current year also contributed to the significant increase in cash and cash equivalents.

Figure 30: Composition of Debtor's Balances

Rates

#### **Composition of Debtor's Balances**

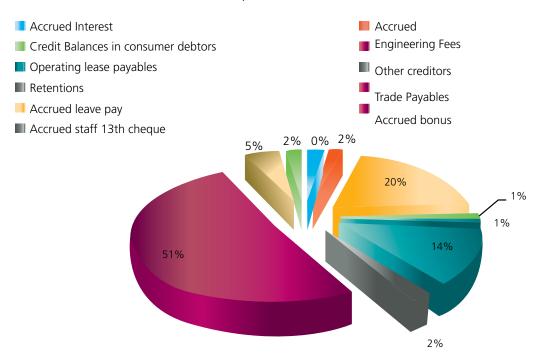

Electricity has the highest number of outstanding debtors and the electricity debtors have increased as compared to the previous year. This can be considered to be the impact on consumers of the significant spike in the increase in tariffs.

Electricity and water debtors account for 83% of the total

consumers debtors balance. This is in line with the revenue generated from these services. The year-on-year increase can be partly attributed to the tariff increases implemented in the current year. The debtors collection rate has improved considerably during the year under review contributing to the City's cash position.

#### Composition of Creditors

The main contributors to the creditors are the trade payables, credit balances and other creditors.

The increase in expenditure in the last quarter accompanied by the increased level of accruals at year end is the reason for the significant growth of the trade payables.

#### Capital expenditure

Capital Expenditure amounted to R4,2 billion in the current year under review against the approved budget of R4,5 billion.

The increase in the percentage spent from 89% in the prior year to 93% in the current year reflects the City's ability to spend its capex budget and its commitment towards service delivery and a better life for its citizens. This ability to spend on capex will the stand the City in good stead in delivering on its IDP as well as its Growth and Development Strategy.

#### **Financial Ratios**

Table: 136

| Financial ratios          | 30-Jun-13 | 30-Jun-12 | Target |
|---------------------------|-----------|-----------|--------|
| Current ratio             | 1.04      | 0.92      | 1,00   |
| Solvency ratio            | 2.02      | 1.92      | 2,00   |
| Debt: Revenue             | 38.77%    | 41.21%    | 45,0%  |
| Remuneration: Expenditure | 36.59%    | 35.76%    | 30,0%  |
| Maintenance: Expenditure  | 2.19%     | 1.63%     | 7,0%   |
| Interest: Expenditure     | 4.69%     | 5.44%     | 5,0%   |

The current ratio reflects an improvement from the previous financial year and is currently above the City's own target of 1. This is mainly due to an increase in current assets especially with regards to cash and cash equivalents. The City has set up strategic interventions, as indicated in the previous year, aimed at the continued improvement of this ratio in the medium term.

The debt to revenue ratio at 38.77% is significantly down from 41.21% reported in the prior year. This ratio is now below the self-imposed target limit of 45% however with the City rolling out of its planned capital expenditure programme of over R100 billion in 10 years, borrowings will increase and therefore push this ratio up albeit within the target level.

The remuneration to expenditure ratio is, calculated excluding bulk purchases, at 36,6% up from 35,8% in the prior year. The City is implementing initiatives to effectively contain and reduce this ratio and improve productivity levels. The institutional review is one such initiative aimed at managing this ratio towards the target of 30% in the near future.

Although the ratio of maintenance to expenditure has improved to above 2% in the current year, it remains well below the target of 7% set internally. It is the City's objective going forward to increase spending levels on maintenance to address current gap towards the target. It is worth noting that 85% of the City's assets are underground

and require continuous attention to ensure that the value of the assets is safeguarded through routine maintenance.

Resources will be made available to give specific focus to this process.

Overall the City has shown improvements in all but one key ratio in the year under review. Remuneration costs and maintenance costs require deliberate actions by the City in the years ahead. This overall improvement reflects the efforts of the City's leadership towards improving financial sustainability and resilience.

### Audit opinion

The City's efforts and dedication towards achieving a clean audit are beginning to bear fruits with the achievement of an Unqualified Audit Opinion for the year under review. The audit opinion was issued with matters of emphasis as outlined in the report of the Auditor General of South Africa included in the annual report.

The City is proud of this achievement and its leadership is encouraged and committed to continuing working very hard towards achieving a clean audit.

The City has put in place corrective measures to ensure that the matters reported on by the Auditor General of South Africa are remedied going forward.

#### Credit rating

The City has maintained commendable credit ratings from both its international rating agencies as reflected below. The City's credit rating for the period ending June 2013 was as follows:

Table: 136

| Moody's | A1.za/P-1.za  | Negative Outlook |
|---------|---------------|------------------|
| Fitch   | AAzaf/F1+.zaf | Stable Outlook   |

The credit ratings by both the above-listed international rating agencies reflect the City as solid investment grade quality counterparty. The negative outlook by Moody's is based on concerns about the sovereign contagion which is not a City specific issue. The rating agencies have also raised concerns on deteriorating economic conditions and the weakening public finances in general.

The City is proud to have maintained such a good credit rating in a very challenging economic environment thereby ensuring that its listed bonds remain attractive to the investors.

## Revenue and billing

The Roadmap for Revenue and Billing was launched in November 2011 to resolve billing queries from customers and wipe out the backlog of outstanding queries. The City committed itself to a customer-centric approach to dealing with the public at offices and call-centres. The Roadmap sets out clearly defined objectives and milestones to be achieved in the short to medium.

Several initiatives were undertaken by the City to improve billing data integrity, including meter audits and customer open days. A new number for the City's call centre was introduced – 0860 Joburg (or 0860 562874). This new citywide number is easy to remember and makes use of improved technology, which is more stable and is not bound to any one location.

Between January and March 2013, the City rolled out a regional campaign in our walk-in-centres with the intention of resolving non-technical queries; reducing customer waiting times; providing technical product knowledge;nd promoting a culture of efficiency and professionalism. By the end of the financial a year the City received 15 000 billing queries per

month which were resolved within 30 days.

This is a significant improvement from the levels achieved in the prior years. The City will continue to improve its interactions with its customers and work towards minimizing the billing queries.

#### Looking forward

The theme for the year for the City: 'building corridors of freedom to our hearts desire'

The Executive Mayor put in place this vision and also set out the blueprint. The duty of the officials of the City is to ensure that the construction takes place. The task is to build the bridge to the future. The budget of the City being the bricks and cement that we will use to build this bridge that will take us to the Corridors of Freedom to our heart's desire.

In light of the ambitious targets that the City has set itself in implementing the corridors of freedom, financial sustainability remains the City's number one priority. We will continue to strengthen financial management practices and discipline throughout the city to ensure long-term financial sustainability and resilience.

The Corridors of Freedom present the City with a unique opportunity to reshape its urban form and construct a future based on equity, accessibility and sound economic principles. It is within our grasp to leave a lasting legacy for future generations based on our hearts' desire.

#### Conclusion

I would like to express my gratitude to the Executive Mayor, Councillors, Member of Mayoral Committee responsible for finance, Mayoral Committee, the Group Audit Committee, Municipal Manager, Chief Operations Officer, Group Heads, Boards of Directors, Managing Directors, CFO's of Municipal Owned Entities and Directors for the support they have provided during the 2012/2013 financial year.

We remain committed to continued strengthening of the City's financial position as well as to the attainment of a clean audit and the achievement of the long term goals of a financially sustainable and resilient City.

Reggie Bogo

Management considers 10% or more of variance as material. A detailed discription of the variances is provided below

#### Reference:

- 1. The revenue from licenses and permits increased by 62% in the current financial year due to an increase in applications for trade licenses and resident's permits to open day care centers. This line item is driven by public demand.
- 2. The revenue amount from sale housing stock was not budgeted for in the current year. Initially the amount was budgeted for as rental income of which is was later discovered that the units are sold under an instalment sales greement which in terms of the revenue statndard is should be treated as an outright sales when the ISA is effective.
- 3. The variance is as result of a higher positive cash balance than inticipated. The following contributed to the higher interest received: USDG funding received quarterly in advance and savings in bulk purchases.
- 4. The fines income is under budget by 18%. The variance is due to the following: A Service Level Agreement between JMPD and RTMC has not yet been signed and the RTIA have not been complying to the enforcement orders which has resulted in a drop in the payment of fines. The other contributing factor for the decrease in the fine revenue was due to the Post Office strike from February 2013 to April 2013.
- 5. The depreciation is over budget. The variance was as results of Capitalization of Assets Under Construction in the current year, which are subsequently depreciated depending on the capitalization date.
- 6. The debt impairment increased compared to budget. The variance is due to an increase in the provision for bad debts resulting from an increase in the debtors in the 180 days category which is attributed to the poor current economic conditions.
- 7. Contracted Services is under budget and the under expenditure is mostly related to the following departments:
- Transportation Department The under expenditure is mostly related to the delay in the completion of Phase 1B of the Rea Vaya BRT project;
- Revenue Department The under expenditure is related to a saving on expenditure on the revenue step change project;
- Corporate Services The under expenditure is related to a saving on IT costs; and
- City Power The decrease in the capacity charge (lease costs) due to lower units purchased from Kelvin Power.
- 8. The stands anticipated to be ready for implementation during the year were not ready due to some communities demanding to be employed in excess of the agreed quota which would have negatively affected our budget and/or complaining about the rates of pay \\ as well as the size of the units being constructed.
- 9. The general expenses are over budget mainly due to following: increase in softtware, consulting services, double increase in advertising and printing & stationary

Management considers 10% or more of variance as material. A detailed discription of the variances is provided below

#### Reference:

- 1. The revenue from licenses and permits increased by 62% in the current financial year due to an increase in applications for trade licenses and resident's permits to open day care centers. This line item is driven by public demand.
- 2. The revenue amount from sale housing stock was not budgeted for in the current year. Initially the amount was budgeted for as rental income of which is was later discovered that the units are sold under an instalment sales greement which in terms of the revenue statndard is should be treated as an outright sales when the ISA is effective.
- 3. The fines income is under budget by 18%. The variance is due to the following: A Service Level Agreement between JMPD and RTMC has not yet been signed and the RTIA have not been complying to the enforcement orders which has resulted in a drop in the payments of fines. The other contributing factor for the decrease in the fine revenue was due to the Post Office strike from February 2013 to April 2013.
- 4. The depreciation is over budget 13%. The variance was as results of Capitalization of Assets Under Construction in the current year, which are subsequently depreciated depending on the capitalization date.

Group Annual Financial Statements for the year ended 30 June 2013

- 5. Impairments are accounting entries which are not budgeted for.
- 6. The debt impairment increased by 22% compare to budget. The variance is due to an increase in the provision for bad debts resulting from an increase in the debtors in the 180 days category which is attributed to the poor current economic conditions.
- 7. Repairs and maintenance is under budget by 20%. The under spending of the budgeted amount is related to supply chain management delays experienced in the current year in appointing the contractors for various department.
- 8. The contracted services are under budget by 21%. The under spending is mainly related to delays experienced in the implementation of the BRT project. The other factor was due to general decrease in consultation, expiry of fleet contract and IT costs.
- 9. The general expenses are over budget by 12% mainly due to the following: Settlement of contingent liability, double increase in advertising and printing & stationary.
- 10. Fair value adjustments are accounting entries which are not budgeted for.

#### 1. Statement of compliance

Basis of Preparation and Presentation

The Group Annual Financial Statements have been prepared in accordance with the Generally Recognized Accounting Practice (GRAP) and the Municipal Finance Management Act (MFMA) including any interpretations, guidelines and directives issued by the Accounting Standards Board

These Group Annual Financial Statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

#### 1.1 Consolidation

#### **Basis of consolidation**

Consolidated group annual financial statements are the group annual financial statements of the group presented as those of a single entity.

The consolidated group annual financial statements incorporate the group annual financial statements of the core and all controlled entities, including special purpose entities, which are controlled by the core.

Control exists when the core has the power to govern the financial and operating policies of another entity so as to obtain benefits from its activities.

The results of shareholder loans, are included in the consolidated group annual financial statements from the effective date of acquisition or date when control commences to the effective date of disposal or date when control ceases. The difference between the proceeds from the disposal of the controlled entity and its carrying amount as of the date of disposal, including the cumulative amount of any exchange differences that relate to the controlled entity recognized in net assets in accordance with the Standard GRAP on The Effects of Changes in Foreign Exchange Rates, is recognized in the consolidated statement of financial performance as the surplus or deficit on the disposal of the controlled entity.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1. Statement of compliance (continued)

An investment in an entity is accounted for in accordance with the Standards of GRAP on Financial Instruments from the date that it ceases to be a controlled entity, unless it becomes an associate or a jointly controlled entity, in which case it is accounted for as such. The carrying amount of the investment at the date that the entity ceases to be a controlled entity is regarded as the fair value on initial recognition of a financial asset in accordance with the Standards of GRAP on Financial Instruments.

The group annual financial statements of the core and its shareholder loans used in the preparation of the consolidated group annual financial statements are prepared as of the same reporting date.

When the reporting dates of the core and a controlled entity are different, the controlled entity prepares, for consolidation purposes, additional group annual financial statements as of the same date as the core unless it is impracticable to do so. When the group annual financial statements of a controlled entity used in the preparation of consolidated group annual financial statements are prepared as of a reporting date different from that of the core, adjustments are made for the effects of significant transactions or events that occur between that date and the date of the core's group annual financial statements. In any case, the difference between the reporting date of the controlled entity and that of the core shall be no more than three months. The length of the reporting periods and any difference in the reporting dates is the same from period to period.

Adjustments are made when necessary to the group annual financial statements of the shareholder loans to bring their accounting policies in line with those of the core.

All intra-entity transactions, balances, revenues and expenses are eliminated in full on consolidation.

Minority interests in the net assets of the group are identified and recognised separately from the core's interest therein, and are recognised within net assets. Losses applicable to the minority in a consolidated controlled entity may exceed the minority interest in the controlled entity's net assets. The excess, and any further losses applicable to the minority, are allocated against the majority interest except to the extent that the minority has a binding obligation to, and is able to, make an additional investment to cover the losses. If the controlled entity subsequently reports surpluses, such surpluses are allocated to the majority interest until the minority's share of losses previously absorbed by the majority has been recovered.

Minority interests in the surplus or deficit of the economic entity is separately disclosed.

#### 1.1 Consolidation (continued)

#### Investment in associates

An associate is an entity over which the core has significant influence and which is neither a controlled entity nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

An investment in associate is accounted for using the equity method, except when the investment is classified as held-for- sale in accordance with Standard of GRAP on Non-current Assets Held-For-Sale and Discontinued Operations. Under the equity method, investments in associates are carried in the consolidated statement of financial position at cost adjusted for post acquisition changes in the group's share of net assets of the associate, less any impairment losses.

Equity method is a method of accounting whereby the investment is initially recognised at cost and adjusted thereafter for the post-acquisition change in the group's share of net assets of the investee. The surplus or deficit of the group includes the group's share of the surplus or deficit of the investee.

The group's share of the surplus or deficit of the investee is recognised in surplus or deficit.

Distributions received from an investee reduce the carrying amount of the investment.

The most recent available group annual financial statements of the associate are used by the group in applying the equity method. When the reporting date's of the group and the associate are different, the associate prepares, for the use of the group, group annual financial statements as of the same date as the group annual financial statements of the group unless it is impractical to do so.

When the group annual financial statements of an associate used in applying the equity method are prepared as of a different reporting date from that of the group, adjustments are made for the effects of significant transactions or events that occur between that date and the date of the group's group annual financial statements. In any case, the difference between the reporting date of the associate and that of the group is more than three months. The length of the reporting periods and any difference in the reporting dates is the same from period to period.

Group Annual Financial Statements for the year ended 30 June 2013

The group's group annual financial statements are prepared using uniform accounting policies for like transactions and events in similar circumstances.

Deficits in an associate in excess of the group's interest in that associate are recognised only to the extent that the group has incurred a legal or constructive obligation to make payments on behalf of the associate. If the associate subsequently reports surpluses, the group resumes recognising its share of those surpluses only after its share of the surpluses equals the share of deficits not recognised.

Any goodwill on acquisition of an associate is included in the carrying amount of the investment, however, a gain on acquisition is recognised immediately in surplus or deficit.

Surpluses and deficits on transactions between the group and an associate are eliminated to the extent of the group's interest therein.

The core discontinues the use of the equity method from the date that it ceases to have significant influence over an associate and account for the investment in accordance with the Standards of GRAP on Financial Instruments from that date, unless the associate becomes a controlled entity or a joint venture, in which case it is accounted for as such. The carrying amount of the investment at the date that it ceases to be an associate is regarded as the fair value on initial recognition as a financial asset in accordance with the Standards of GRAP on Financial Instruments.

#### 1.2 Transfer of functions between entities under common control

#### **Definitions**

An acquirer is the group that obtains control of the acquiree or transferor.

Carrying amount of an asset or liability is the amount at which an asset or liability is recognised in the statement of financial position.

Control is the power to govern the financial and operating policies of another group so as to benefit from its activities.

A merger is the establishment of a new combined entity in which none of the former entities obtains control over any other and no acquirer can be identified.

Transfer date is the date on which the acquirer obtains control of the function and the transferor loses control of that function.

A transfer of functions is the reorganization and/or the re-allocation of functions between entities by transferring functions between entities or into another group.

A transferor is the group that relinquishes control of a function.

Common control - For a transaction or event to occur between entities under common control, the transaction or event needs to be undertaken between entities within the same sphere of government or between entities that are part of the same economic entity. Entities that are ultimately controlled by the same entity before and after the transfer of functions are within the same economic entity.

#### 1.3 Significant judgements and sources of estimation uncertainty

In preparing the Annual Financial Statements in conformity with GRAP, management is required to make judgements, estimates and assumptions that affect the amounts represented in the Annual Financial Statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the Annual Financial Statements. These estimates and underlying assumptions are reviewed on an ongoing basis.

Significant judgements include:

#### Useful lives of waste water, water networks and other non-current assets

The company's management determines the estimated useful lives and related depreciation charges for the waste water, water networks and other non-current assets. This estimate is based on industry norms. Management will adjust the depreciation charge where the useful lives of these assets have changed from previous estimates. Due to the nature of assets acquired from the City of Johannesburg Metropolitan Municipality in terms of the sale of business agreement, the cost of re-assessing the useful lives of these assets will outweigh the benefits. Furthermore, the impact on the financial statements will be insignificant and therefore management have not re-assessed the useful lives of these assets.

Group Annual Financial Statements for the year ended 30 June 2013

#### Financial instruments at amortised cost

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognised in surplus or deficit.

#### Available-for-sale financial assets

#### Allowance for slow moving, damaged and obsolete stock

Management makes an estimate of the selling price and direct cost to sell to determine the net realizable value of inventory items.

#### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### Fair value estimation

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The group uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the group for similar financial instruments.

#### Impairment testing

The recoverable amounts of cash-generating units and individual assets are determined based on the higher of value-inuse calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the fair value assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of cash-generating units and individual assets.

The group reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for cash-generating units and individual assets. Expected future cash flows used to determine the value in use of assets are inherently uncertain and could materially change over time.

#### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### **Provisions**

Provisions are raised and management determines an estimate based on the information available.

Provisions are measured at management's best estimate of the expenditure required to settle the obligation at the reporting date, and are discounted to present value where the effect is material.

The estimates are discounted at a pre-tax discount rate that reflect current market assessments of the time value of money.

#### Contingent provisions on entity combinations

Contingencies recognised in the current year required estimates and judgments, refer to note on entity combinations.

#### Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost/(income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

Group Annual Financial Statements for the year ended 30 June 2013

The group determines the appropriate discount rate at the end of each year. This is the interest rate used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the group considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions.

#### **Debt impairment provision**

On debtors, an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

#### 1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the group, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

#### Cost model

#### **Initial Recognition**

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement. Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

#### Subsequent Measurement.

#### 1.4 Investment property (continued)

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value using the straight-line basis over the useful life of the property, which is as follows:

ItemUseful lifeProperty - Buildings30 years

Land is not depreciated.

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

#### Cost Model.

#### Initial Measurement.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

#### Subsequent Measurement.

Property, plant and equipment is carried at cost less accumulated depreciation and any accumulated impairment losses.

Items of Zoo animals are recognised as assets when it is probable that:

- . the company controls the asset as a result of past events:
- . it is probable that future economic benefits or service potential associated with the asset will flow to the company; and
- . the fair value or cost of the asset can be measured reliably.

#### 1.5 Property, plant and equipment (continued)

Animals are accountted for in terms of GRAP 17. The majority of animals are received as donations and transfers from other similar institutions for no consideration or from procreation. These assets are recorded at a deemed cost, and are depreciated accordingly.

Market determined prices or values are not available for certain animals due to lack of market because they are not commodities, as well as restrictions on trade of exotic animals which precludes the determination of a fair value.

The Johannesburg Zoo also acquires animals through supply chain processes and this newly acquired animals are carried at cost less accumulated depreciation and any impairment losses. the offspring of newly acquired animals shall be recorded at a deemed cost and will also be depreciated accordingly.

Group Annual Financial Statements for the year ended 30 June 2013

Property, plant and equipment with the exception of land are depreciated on the straight line basis over their expected useful lives to their estimated residual values as follows:

| Item                            | Average useful life          |
|---------------------------------|------------------------------|
| Buildings • Plant and equipment | 5- 50 years<br>10 - 85 years |
| Furniture and fittings          | 6 - 20 years                 |
| Motor vehicles                  | 4 - 17 years                 |
| Office equipmentv               | 3 - 10 years                 |
| Computer equipment              | 2- 10 years                  |
| Infrastructure                  |                              |
| • Electricity                   | 40 - 85 years                |
| • Housing                       | 30 years                     |
| Pedestrian Malls                | 30 years                     |
| Roads and Paving                | 30 years                     |
| Sewerage Infrastructure         | 4 - 100 years                |
| Water Infrastructure            | 4 - 100 years                |
| Community                       |                              |
| Recreational Facilities         | 20 - 30 years                |
| • Security                      | 5 years                      |
| Other                           |                              |
| • Dogs and horses               | 5 - 7 years                  |
| Bins and containers             | 5 years<br>16 - 36 years     |
| Landfill Site                   |                              |
| Specialised vehicles            |                              |
| Library books                   | 10 years                     |
| Emergency equipment             | 5 - 15 years                 |
| Leasehold improvements          | 3 -5 years                   |
| Zoo animals                     |                              |
| • Amphibia                      | 4- 16 years                  |
| • Arachnida                     | 2 - 20 years                 |
| • Aves                          | 4 - 64 years                 |
| • Mammalia                      | 6 -64 years                  |
| • Pisces                        | 1- 35 years                  |
| • Reptilia                      | 7 -80 years                  |
| • Insecta                       | 4 years                      |

Signage

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.5 Property, plant and equipment (continued)

Specialised vehicles

Buses
 10- 30 years

Leased infrastructure

Leased property
 5 -20 years

#### 1.6 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the group or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the group; and
- the cost or fair value of the asset can be measured reliably.

Cost Model.

#### Initial Recognition.

Intangible assets are initially recognised at cost.

An intangible asset acquired through a non-exchange transaction, the cost shall be its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

#### Subsequent Recognition.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses..

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Intangible assets are derecognised on disposal, or when no future economic benefits are expected from its use or disposal. Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

| Item                                    | Useful life  |
|---|--------------|
| Additional capacity rights              | 10 years     |
| Computer software, internally generated | indefinite   |
| Computer software                       | 2 - 12 years |
| Operating software                      | 3 - 7 years  |

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

#### 1.7 Investments in Municipal Entities

#### **CORE** group annual financial statements

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.7 Investments in Municipal Entities (continued)

In the municipality's separate group annual financial statements, investments in municipal entities are carried at cost less any accumulated impairment.

The cost of an investment in a controlled entity is the aggregate of:

- the fair value, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the municipality; plus
- any costs directly attributable to the purchase of the controlled entity.

#### 1.8 Financial instruments

Non-derivative financial assets.

The municipality initially recognises loans and receivables and deposits on the date that they are originated. All other financial assets (including assets designated at fair value through profit or loss) are recognised initially on the trade date, which is the date that the municipality becomes a party to the contractual provisions of the instrument.

The municipality derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the municipality is recognised as a separate asset or liability.

The municipality classifies its non-derivative financial assets into the following categories:

- Amortised cost; and
- Cost.

Financial assets at amortised Cost

Non-derivative financial assets are initially measured at fair value plus any directly attributable transactional costs. Subsequent to initial measurement, these assets are measured at amortised cost using the effective interest rate method, less any impairment losses

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with original maturities of three months or less.

Impairment of non-derivative financial assets

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

Objective evidence that financial assets are impaired can include default or delinquency by a debtor, restructuring of an amount due to the municipality on terms that the municipality would not consider otherwise, indications that a debtor or issuer will enter bankruptcy, adverse changes in the payment status of borrowers or issuers in the municipality, economic conditions that correlate with defaults or the disappearance of an active market for a security.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against loans and receivables or financial asset at amortised costs. Interest on the impaired asset continues to be recognised. When a subsequent event (e.g. repayment by a debtor) causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through surplus or deficit.

Non-derivative financial liabilities

The municipality initially recognises debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are recognised initially on the trade date, which is the date that the municipality becomes a party to the contractual provisions of the instrument.

The municipality derecognises a financial liability when its contractual obligations are discharged, cancelled or expire.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.8 Financial instruments (continued)

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the municipality has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Such financial liabilities are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these financial liabilities are measured at amortised cost using the effective interest method.

Bank overdrafts that are repayable on demand and form an integral part of the municipality's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

Derivative financial instruments, including hedge accounting

The municipality holds derivative financial instruments to hedge its interest rate risk exposures.

On initial designation of the derivative as the hedging instrument, the municipality formally documents the relationship between the hedging instrument and hedged item, including the risk management objectives and strategy in undertaking the hedge transaction and the hedged risk, together with the methods that will be used to assess the effectiveness of the hedging relationship. The municipality makes an assessment, both at the inception of the hedge relationship as well as on an ongoing basis, of whether the hedging instruments are expected to be "highly effective" in offsetting the changes in the fair value or cash flows of the respective hedged items attributable to the hedged risk, and whether the actual results of each hedge are within a range of 80 – 125 percent. For a cash flow hedge of a forecast transaction, the transaction should be highly probable to occur and should present an exposure to variations in cash flows that could ultimately affect reported surplus or deficit.

Derivatives are recognised initially at fair value and attributable transaction costs are recognised in surplus or deficit as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

Cash flow hedges

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction that could affect surplus or deficit, the effective portion of changes in the fair value of the derivative is recognised in other comprehensive income and presented in the hedging reserve in net assets. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in surplus or deficit.

Other than designated through profit and loss

When a derivative financial instrument is not designated in a hedge relationship that qualifies for hedge accounting, all changes in its fair value are recognised immediately in surplus or deficit.

#### 1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of return on the remaining balance of the liability

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.9 Leases (continued)

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

#### 1.10 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and net realisable value where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the group incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the group.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

#### 1.11 Non-current assets held for sale and disposal groups

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets held for sale (or disposal group) are measured at the lower of its carrying amount and fair value less costs to sell.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.11 Non-current assets held for sale and disposal groups (continued)

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised insurplus or deficit.

#### 1.12 Impairment

The municipality assess at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the asset. If the resulting estimate of the recoverable amount or recoverable service amount is lower than the carrying amount, the asset is written down to the recoverable amount as impairment loss.

The Impairemt loss is recognised as an expense.

The increased carrying amount of an asset attributable to a reversal of an impairment loss shall not exceed the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior years..

A reversal of an impairment loss for an asset shall be recognised immediately in surplus or deficit.

#### Impairment of cash-generating assets.

Cash-generating assets are those assets held by the group with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return. Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the group; or
- (b) the number of production or similar units expected to be obtained from the asset by the group.

Impairment of non-cash generating asset:

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return:

Non-cash-generating assets are assets other than cash-generating assets

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.12 Impairment (continued)

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

(a)the period of time over which an asset is expected to be used by the municipality; or

(b)the number of production or similar units expected to be obtained from the asset by the municipality.

#### 1.13 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the group with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the group; or
- (b) the number of production or similar units expected to be obtained from the asset by the group.

#### 1.14 Employee benefits

#### Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.14 Employee benefits (continued)

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

#### **Defined contribution plans**

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

#### Other post retirement obligations

The entity provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The entity also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

#### Bonus pensionable service and medical boarding's.

The benefits of Bonus Pensionable Service and Medical Boardings are afforded to members of certain funds in terms of the applicable rules of the relevant funds. The payments are accounted for in the statement of financial performance in the period in which it is paid.

#### 1.15 Provisions and contingencies

Provisions are recognised when:

- the group has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the group settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Additional disclosure of these estimates of provisions are included in note 27 - Provisions.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.15 Provisions and contingencies (continued)

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of a activity/operating unit concerned;
  - the principal locations affected;
     the location, function, and approximate number of employees who will be compensated for services being terminated:
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the group

No obligation arises as a consequence of the sale or transfer of an operation until the group is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition, contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised but are separately disclosed in note 51.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The group recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability
  of entities to repay their obligations.

Where a fee is received by the group for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the group considers that an outflow of economic resources is probable, an group recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.16 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the group has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- · the group retains neither continuing managerial involvement to the degree usually associated with ownership nor
- effective control over the goods sold;
- the amount of revenue can be measured reliably;
- · it is probable that the economic benefits or service potential associated with the transaction will flow to the group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the group;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

#### Interest, royalties and dividends

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

#### 1.17 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.17 Revenue from non-exchange transactions (continued)

Fines

Revenue from the issuing of fines is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

The group has two types of fines: Aarto traffic fines and criminal procedure act fines.

There is uncertainty regarding the probability of the flow of economic benefits in respect of criminal procedure act fines. Legal processes have to be undertaken before the criminal procedure act fine is enforceable. In respect of summonses the public prosecutor can decide whether to waive the fine, reduce it or prosecute for non-payment by the offender. Where a reliable estimate cannot be made of revenue from summonses, the revenue from summonses is recognised when the public prosecutor pays over to the entity the cash actually collected on summonses issued.

#### 1.18 Investment income

Investment income comprises interest income on funds invested. Investment income is recognised on a time-proportion basis using the effective interest method.

#### 1.19 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any investment income
  on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the group on funds generally borrowed for the purpose of obtaining a
  qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred;
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

When the carrying amount or the expected ultimate cost of the qualifying asset exceeds its recoverable amount or recoverable service amount or net realisable value or replacement cost, the carrying amount is written down or written off in accordance with the accounting policy on Impairment of Assets as per accounting policy number 1.12 and 1.13. In certain circumstances, the amount of the write-down or write-off is written back in accordance with the same accounting policy.

Capitalisation of borrowing costs are suspended during extended periods in which active development is interrupted.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

When the group completes the construction of a qualifying asset in parts and each part is capable of being used while construction continues on other parts, the entity ceases capitalising borrowing costs when it completes substantially all the activities necessary to prepare that part for its intended use or sale.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

#### 1.20 Comparative figures

Where necessary, comparative figures have been restated to conform to changes in presentation in the current year.

#### 1.21 Unauthorised expenditure

Unauthorised expenditure means:

• overspending of a vote or a main division within a vote; and

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.21 Unauthorised expenditure (continued)

• expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and when recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.22 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.23 Irregular expenditure

The Municipality recognises irregular expenditure as defined in section 1 of the MFMA when:-

- (a) expenditure incurred by the municipality is in contravention of, or is not in accordance with, a requirement of this MFMA, and which has not been condoned by National Treasury;
- (b) expenditure incurred by the municipality is in contravention of, or is not in accordance with, a requirement of the Municipal Systems Act, and which has not been condoned in terms of that Act;
- (c) expenditure incurred by a municipality is in contravention of, or that is not in accordance with, a requirement of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998); or.
- (d) expenditure incurred by a municipality is in contravention of, or that is not in accordance with, a requirement of the supply chain management policy of the municipality or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in terms of such policy or by-law, but excludes expenditure by a municipality which falls within the definition of "unauthorised expenditure.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

#### 1.24 Presentation of currency

These Annual Financial Statements are presented in South African Rand.

#### 1.25 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

Group Annual Financial Statements for the year ended 30 June 2013

#### 1.26 Internal reserves

#### Capital replacement reserve (CRR)

In order to finance the provision of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR. A corresponding amount is transferred to a designated CRR bank or investment account. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

#### Compensation for occupational injuries and diseases (COID) reserve

The Compensation for Occupational Injuries and Diseases Act (Act 130 of 1993) is to provide for payment of medical treatment and compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, or for death resulting from such injuries or diseases. The contribution to the COID fund is 0.75% of the salary expense. The municipality is an exempt employer in terms of Section 84 (1) (a)(ii) & (2) and as such does not pay any assessments to the COID Commissioner. In terms of the exempt status the municipality is mandated to establish its own fund and administers this fund in terms of the COID Act.

#### 1.27 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

#### 2. STATEMENT AND INTERPRETATIONS NOT YET EFFECTIVE

Mama

At the date of authorisation of these Annual Financial Statements, the following Standards and Interpretations were in issue but not yet effective:

| <u>name</u>  | Effective Date                   |
|--|----------------------------------|
| GRAP 18 - Segment Reporting  | No effective date determined yet |
| GRAP 20 - Related Parties  | No effective date determined yet |
| GRAP 25 - Employee benefits  | 01 July 2013                     |
| GRAP 105 - Transfer of functions between entities under common control     | No effective date determined yet |
| GRAP 106 - Transfer of functions between entities not under common control | No effective date detremined yet |
| GRAP 107 - Mergers   | No effective date detremined yet |

Effective Date

All standards and interpretations will be adopted at their effective date (except those Standards and Interpretations that are not applicable to the City of Johannesburg).

The impact of the application of the above standards and interpretations have not been fully assessed for the following financial year.

#### 11. OTHER FINANCIAL ASSETS AT FAIR VALUE

The total investments pledged as collateral for CJMM Bonds.

Other financial assets through profit or loss

The investments pledged as collateral cannot be sold until the related liability is settled in full.

The terms and conditions are such that the collateralised asset upon maturity should be of the same value as the liability so that the liability can be redeemed.

A register containing the information for CORE as required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

The Johannesburg Fresh Produce Market (Pty) Ltd

• Stand 118 City Deep Extension 2, Johannesburg, Gauteng - comprising of retail shops.

Investment property that was purchased from The City of Johannesburg Metropolitan Municipality, in terms of the sale of business agreement, dated 03 July 2000, has not yet been transferred into the name of the entity due to the absence of a framework provided by Section 14(6) of the Municipal Finance Management Act 2003. National Treasury has been engaged by The City of Johannesburg Metropolitan Municipality with the aim of resolving the matter.

Details of valuation

CORE

The CORE valuation is based on the valuation roll and is reviewed every three years.

The Johannesburg Fresh Produce Market (Pty) Ltd

An external, independent valuation entity, having appropriate recognised professional qualifications and recent experience in the location and category of property being valued, values the entity's investment property portfolio annually. The fair values are based on market values, being the estimated amount for which a property could be exchanged on the date of the valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.

In the absence of current prices in an active market, the valuations are prepared by considering the aggregate of the estimated cash flows expected to be received from renting out the property. A yield that reflects the specific risks inherent in the net cash flows then is applied to the net annual cash flows to arrive at the property valuation.

Valuations reflect, when appropriate: the type of tenants actually in occupation or responsible for meeting lease commitments or likely to be in occupation after letting vacant accommodation, and the market's general perception of their creditworthiness; the allocation of maintenance and insurance responsibilities between the entity and the lessee; and the remaining economic life of the property. When rent reviews or lease renewals are pending with anticipated reversionary increases, it is assumed that all notices, and when appropriate counternotices, have been served validly and within the appropriate time.

The gross property rental income earned by the entity from its investment property, all of which are leased out under gross operating leases, amounted to R1025 (million) (2012: R1,424 (million).

Expenditure incurred during the year on investment property amounted to Rnil (2012:RNil).

#### 18. INVESTMENTS IN MUNICIPAL ENTITIES (continued)

During the year under review, the City finalized the process of re-structuring some of the functions currently conducted through it's Municipal Entities (MEs). This reorganization/ institutional review would result in the legal deregistration of some MEs. The overall functions carried out by the City through deregistered MEs would be maintained albeit through different forms and mechanisms.

- 1. Metropolitan Trading Company (MTC)
  - MTC's functions were reintegrated into the CoJ and JPC, and the functions of MTC were transferred to the Transportation Department as well as the Department of Economic Development.
- 2. Johannesburg Tourism Company(JTC)
  - The functions of JTC were reintegrated into the CoJ, within the Group Communications and Tourism Department.
- 3. Johannesburg Zoo (ZOO) and Johannesburg City Parks (JCP)

  The business activities of the Zoo was transferred to City Parks, with City Parks surviving as the new entity and the Zoo legal company being deregistered, post merger.
- 4. Joburg Theatre and Roodepoort City Theatre (RCT) RCT was integrated into the Joburg Theatre.

The above mentioned reorganisations has had no material impact on the group assets and liabilities, other than the dissolution of the above mentioned MEs.

#### 19. INVESTMENT IN JOINT VENTURES

| Name of company | % holding | % holding | Carrying    | Carrying    |
|-----------------|-----------|-----------|-------------|-------------|
|                 | 2013      | 2012      | amount 2013 | amount 2012 |
| Joshco JV       | 55.00 %   | 55.00 %   | 31,691      | 31,575      |

The carrying amount of the joint venture is shown net of lossess of R 0,116 million (2012: R0,152 million).

#### Principal activities and reporting dates of joint ventures

| Name of entity                          | Principal<br>activity | Reporting date | Reporting date                 |
|---|-----------------------|----------------|--------------------------------|
| Joshco Madulamoho Joint Venture (JM/JV) | 55%                   | 30/06/2013     | 1 July 2012 to<br>30 June 2013 |

The JM/JV is an investment between Joshco and Madulamoho for social rental housing. The separate annual financial statements of the Joint Venture are available at the registered office of the entity. There are no contingent liabilities, contingent assets or commitments relating to the Joint Venture.

#### Restrictions on a joint venture to distribute its reserves

The Joint Venture's ability to distribute its reserves is not restricted in terms of the Joint Venture agreement.

#### Joint ventures pledged as security

The JM/JV has not been pledged as security.

#### **20. INVESTMENTS IN ASSOCIATES**

| Name of entity            | Listed / | % holding | % holding | Carrying    | Carrying    |
|---------------------------|----------|-----------|-----------|-------------|-------------|
|                           | Unlisted | 2013      | 2012      | amount 2013 | amount 2012 |
| Fried shelf 128 (Pty) Ltd | Unlisted | 50.00 %   | 50.00 %   | 15,847      | 13,737      |

The carrying amounts of associates are shown net of impairment losses.

#### Movements in carrying value

| Opening balance            | 13,737 | 13,960 |
|----------------------------|--------|--------|
| Share of surplus/(deficit) | 2,110  | (223)  |
|                            | 15,847 | 13,737 |

#### Summary of controlled entity's interest in associate

| Total assets      | 36,767  | 32,449  |
|-------------------|---------|---------|
| Total liabilities | (6,430) | (6,164) |
| Revenue           | 4,810   | 4,373   |
| Surplus (deficit) | 4,052   | 3,570   |

#### Associates with different reporting dates

The financial year-end of the associate is the last day of February. The year ends of the two entities are more than three months apart. The entity made estimates to the accounts of the associate to bring the two year ends in line with each other.

Revaluations are performed by the directors who have extensive experience in the location and category of the investment property being valued.

Registers containing the information for the Group is available for inspection at the respective registered offices of the CJMM and ME's.

It is municipality policy to lease certain buildings and equipment under finance leases.

A lease agreement for Soccer City Stadium was signed on the 7 August 2009 between the Department of Public Works (Lessor) and City of Johannesburg Metropolitan Municipality (Lessee). Term of the lease is 99 years.

Interest on Finance Leases are calculated at variable rates of interest, ranging between 9% and 15% per annum and repayments on these Finance Leases range from monthly to quarterly.

The Finance Lease terms for Office Equipment range from three years to five years. There are no renewal or purchase options and no restrictions imposed by the lease agreements.

The carrying values of the finance leased assets are included under other property, plant and equipment in the note to the financial statements.

#### **BUS OPERATING COMPANY**

Finance Lease Liabilities relate to vehicles with a lease term of 12 (2012: 12) years. The effective interest rate on Finance Leases is 9.7% (2012: 9.7%). Capitalised Lease Liabilities are secured by the related finance lease assets. Refer to note 13.

WATER: Interest on finance leases are calculated at variable rates of interest, ranging between 7.41% and 8.5% per annum, and repayments on the lease arrangements are made quarterly. The lease terms are over a period of three years. The carrying value of the finance leased assets are included in property, plant and equipment under Office equipment.

PARKS: The average lease term is 3 years and the average effective borrowing rate is 9% (2012: 9%). Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent. The entity's obligations under finance leases are secured by the lessor's charge over the leased assets. No restrictions other than for transfer or disposal of leased property have been imposed by the lessor.

JOSHCO: The finance leases relates to the lease of office equipment. The average lease term ranges between 3 years and 5 years. The company did not default on any of the interest or capital repayments of the finance leases. Interest rates are linked to prime. All leases have fixed repayments and no arrangements have been entered into for contingent rent on the leased asset. The entity's obligations under finance leases are secured by the lessor's charge over the leased assets.

JFPM: The average lease term was 3-5 years and the average effective borrowing rate was 13% (2012: 10%). Interest rates are linked to prime at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent. The entity has not defaulted on any of its interest or capital repayments during the year, and none of the terms and conditions of the finance leases were re-negotiated. The entity's obligations under finance leases are secured by the lessor's charge over the leased assets.

BUS: The average lease term was 3 years and the average effective borrowing rate was 5% (2012: 5%). All leases have fixed repayments. The entity's obligations under finance leases are secured by the lessor's charge over the leased assets.

| Expanded Public Works Programme (EPWP)      | 32,789    | 65      | 32,789    | 65      |
| Orange African cup of nations               | 4,737     | -       | 4,737     | -       |
| Ambulance subsidy                           | 15,282    | 13,971  | 15,282    | 13,971  |
| Social Housing Foundation Grant - City Deep | 42,186    | 7,814   | -         | -       |
| Unspent public contributions and donations  | 24,326    | 14,850  | 12,981    | 14,850  |
|   | 1,410,169 | 807,011 | 1,356,139 | 797,716 |

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement.

A liability is recognised for any unfulfilled conditions, criteria, obligations and other contingencies attaching to government grants or assistance.

See note 38 for reconciliation of grants from National/Provincial Government.

These amounts are invested in a ring-fenced investment until utilised.

#### 27. PROVISIONS (continued)

#### CJMM

Provision for liabilities

A claim for damages was instituted by the Plaintiff as a result of the construction of the Grayston fly-over for loss of income. The total claim is in excess of R10,000,000.00 plus interest and is not insured. SCA has ruled against the City on the matter of whether the construction amounted to a diversion. Court is to decide on Plaintiff quantum of damages suffered.

Pension fund provisions

The pension fund provision relates to the change from defined benefit plans to defined contribution plans of the pension funds. The provision is based on the actuarial valuations of the pension funds and agreement reached by management and the trustee's of the pension funds.

During the 2010 financial year the Auditor General performed an interest calculation that increased the balance of the pension fund. Subsequently there has been no claims against the fund and therefore management has taken the decision to write down the balance of the fund.

Pikitup Johannesburg SOC Limited

The provision is management's best estimate of the obligations to settle escalations on procurement service contract and the environmental oblogations to rehabilitate the various landfill sites upon closure.

The calculations of the landfill rehabilitation are based on the following assumptions in line with the permits requirements and constistent with prior years.

- The final side slopes for each landfills are 1:3;
- The cover to waste ratio is 1:5 for each site;
- The growth rates for each site are based zero growth;
- The final landfill footprint extends over the entire landfill property size (excluding infrastructure and a 20m buffer zone between the site boundary and the toe of the landfill;
- The density of the waste is calculated using both the survey and weighbridge data;

The final landfill airspace estimation was performed by the Topographical surveyor appointed by the Company who has extensive experince in the field with an Advance Mine Survey Certificate - M3.

#### 28. RETIREMENT BENEFIT OBLIGATION

For all post retirement employee liabilities, an actuarial calculation is performed at the end of the financial year.

#### 28.1 Post retirement liabilities

Post-Retirement Medical Aid Plan Post-Retirement Housing Subsidy Plan Retirement Gratuity Plan

#### 28. RETIREMENT BENEFIT OBLIGATION (continued)

#### 28.1.1 Post retirement medical aid plan

City of Johannesburg Metropolitan Municipality has obligations to subsidise medical aid contributions in respect of certain qualifying staff and pensioners and their surviving spouses. Post-retirement medical aid subsidies are provided to pensioners, in the service of the CJMM as at 1 January 2001, and employees 50 years and older on 1 July 2003 whilst contributory members to either LA Health or Key Health medical schemes. The subsidy remains payable only for as long as members remain contributory members to these medical schemes.

#### 28.1.2 Post retirement housing subsidy plan

The City of Johannesburg Metropolitan Municipality provides housing subsidies in respect of certain qualifying staff members. In the event that the housing loan that the subsidy related to is not fully repaid at retirement date, the subsidy will continue into the members' retirement. The subsidy amount is based on the subsidy received at the date of valuation. The subsidy amount is assumed to remain constant and to continue for a period of 10 years after retirement.

The above liability is unfunded. However, City of Johannesburg Metropolitan Municipality has undertaken to cover such portion of the liability for the staff of City of Johannesburg Metropolitan Municipality who are entitled to benefits that relates to their service with the City of Johannesburg Metropolitan Municipality since the City of Johannesburg Metropolitan Municipality was established. The amount was determined at 1 July 2003 and has been crystallised in the form of a notional loan account which earned interest and against which the company may claim benefit payments made. This loan does not constitute a plan asset and in terms of IAS 19 cannot be offset against the liability. It has however been included in the assets of the City of Johannesburg Metropolitan Municipality.

#### Amounts recognised in the Statement of financial position

| Present value of unfunded obligation in respect of | 2,124 | 4,085 | 459 | 2,892 |
|--|-------|-------|-----|-------|
| CJMM employees                                     |       |       |     |       |
|  |       |       |     |       |

The fair value of plan assets includes:

#### 28.1.3 Post retirement gratuity plan

City of Johannesburg Metropolitan Municipality provides gratuities on retirement or prior death in respect of certain qualifying staff members who have service with the City of Johannesburg Metropolitan Municipality when they were not members of one of the retirement funds and who meet certain service requirements in terms of City of Johannesburg Metropolitan Municipality's conditions of employment. The gratuity amount is based on 1 month's salary per year of non-retirement funding service.

The above liability is unfunded. However, City of Johannesburg Metropolitan Municipality has undertaken to cover such portion of the liability for the staff of City of Johannesburg Metropolitan Municipality who are entitled to benefits that relates to their service with the City of Johannesburg Metropolitan Municipality since the company was established. This amount was determined at 1 July 2003 and has been crystallised in the form of a notional loan account which earned interest and against which the company may claim benefit payments made. This loan does not constitute a plan asset and in terms of IAS 19 cannot be offset against the liability. It has however been included in the assets of the City of Johannesburg Metropolitan Municipality.

#### 29. DEFERRED INCOME

#### **Bond tap**

| Balance unspent at beginning of year                    | 54,444  | 56,828  | 54,444  | 56,828  |
|---|---------|---------|---------|---------|
| Conditions met - transferred to revenue                 | (2,640) | (2,384) | (2,640) | (2,384) |
| Conditions still to be met - transferred to liabilities | 51,804  | 54,444  | 51,804  | 54,444  |

The Bond tap is a Bond issued into the life of an existing Bond. The Tap was issued at a premium on the prevailing interest rate at the time of the Tap. The premium is amortised over the maturity of the Bond and released to interest income on an annual basis.

The tap was issued on 09 December 2008, due to mature on 05 June 2023. The tap was issued at a premium of R58,038,692.00, at an interest rate of 12.21% per annum. The notional amount was R468,000,000.00 and the issue price was R526,038,692.00.

# Deferred income related to advertising income received in advance

| Balance at beginning of year                            | 167   | 500   | - | - |
|---|-------|-------|---|---|
| Conditions met - transferred to revenue                 | (167) | (333) | - | - |
| Conditions still to be met - transferred to liabilities | -     | 167   | - | - |

Deferred income represents advertising income received in advance amounting to R1,000,000 to be recognised over a 3 year period commencing 1 January 2010 and ending 31 December 2012.

#### Passenger trips received in advance

| Balance unspent at beginning of year                    | 4,366 | 3,228 | - | - |
|---|-------|-------|---|---|
| Current year receipts                                   | (260) | 1,138 | - | - |
| Conditions met - transferred to revenue                 | (260) | 4.266 | - | - |
| Conditions still to be met - transferred to liabilities | 4,106 | 4,366 | - | - |

Deferred income refers to the liability relating to passenger trips sold in advance through the Smartcards Multi-Journey Software. The deferred income is released as and when the passengers present these cards on the buses and the bus operators issue a ticket accordingly.

#### Joshco Madulamoho Joint Venture (JM/JV) Grant

| Balance unspent at beginning of year                    | 27,420  | 30,427  | - | - |
|---|---------|---------|---|---|
| Current year receipts                                   | -       | (2,093) | - | - |
| Conditions met - transferred to revenue                 | (914)   | (914)   | - | - |
| Conditions still to be met - transferred to liabilities | 26,506  | 27,420  | - | - |
|   |         |         |   |   |
| Commission received                                     |         |         |   |   |
| Balance unspent at beginning of year                    | 24,085  | 32,003  | - | - |
|   |         |         |   |   |
| Conditions met - transferred to revenue                 | (6,655) | (7,918) | - | - |

The above deferred income relate to commission received on the conclusion of the 5 year lease agreement relating to outdoor advertising and land sales transaction not yet finalised.

| Total deferred income | 99,846 | 110,482 | 51,804 | 54,444 |
|-----------------------|--------|---------|--------|--------|

#### 32. PROJECT FUNDS PAYABLE

#### **Project funds**

| Opening balance               | 10,026    | 15,718    | - | - |
|-------------------------------|-----------|-----------|---|---|
| Funding received for the year | 393,565   | 461,557   | - | - |
| Expenditure for the year      | (397,951) | (467,249) | - | - |
| Closing balance               | 5,640     | 10,026    | - | - |

The project funds payable relates to funding that was previously received in advance from CJMM for the implementation of projects. The remaining balances represent the projects that were either implemented below the original estimated cost or recoveries that were received after the completion of the projects.

Except for the funds from the Industrial Development Corporation and Consitution Hill, these leftover funds are from original capex advances from the CJMM for the implementation of the related projects and are therefore due and payable to the CJMM.

#### 50. COMMITMENTS (continued)

Joshco; Operating lease payments represent rentals payable by the company for its Head office premises. Leases are negotiated for an average term of three years and rentals are fixed for one year and subject to escalation clauses. No contingent rent is payable Other than the details provided above, management is not aware of any further contingencies.

POWER: Operating lease payments represent rentals payable by the company for certain of its motor vehicles, office equipment and the capacity rights for the supply of electricity from Kelvin Power station. None of these leases are subject to escalation.

CJMM: Operating lease smoothing and calculations are based on the contracts relating to operating leases of buildings held in the various Departments of the CJMM. The average leasing term for the CJMM is 4 years and the average escalation rate is 9%. Restrictions imposed on lease agreements are limited to those contained in individual contracts. A complete register of operating leases, as well as all the contracts are maintained by facilities management.

#### 51. CONTINGENCIES

#### **GROUP**

#### **Roodepoort City Theatre**

Subsequent to the disciplinary hearing in respect of the Irregular expenditure referred to in Note 28, civil proceedings have commenced against the employees concerned to recover an amount of R477,035.68. It is probable that the proceedings will result in the recovery of the full amount but this recovery is virtually uncertain.

#### Johannesburg Roads Agency (Proprietary) Limited

These are legal claims that have arisen in the normal course of business and represent the possible amounts that could be awarded should the claims succeed against the entity. No provision has been made as management believes the claims will not succeed. The amounts have been based on attorneys' best estimates of the possible amount payable and are subject to interest at 15.5% from commencement date of the litigation. Refer to cases below:

Baledi Engineering solutions and Tsurikomi Engineering solutions ( Questioning non appointment to the panel). The amount involved cannot be quantifiable.(2013).

Witwatersrand Estates Ltd and others (interdict to stop construction of a road and reinstatement of the property to its initial state). Amount involved current year not quantifiable (2013).

Thabang Johannes Mogashoa and Others v/s JRA (A group of residents around Diepkloof Extension 10 are complaining about flooding of their properties due to the seepage which its ground water comes to the surface and flows to the river). They allege that the see page is so severe in such that it affects their houses. Amount invloved current year not quantifiable (2013).

- Pipe Jack v JRA ( Claim for unpaid invoice ) Amount involved R1,000,000.00
- Hetta Eiendoms Bpk v JRA (Claim for specific performance / Alleged damage to property due to construction).

Amount involved R1,500,000.00. -

Midnight Moon Trading (Pty) Ltd (Dispute on quality of work). Amount Involved R3,870,167.00. -

Mvelase matter vs JRA (JRA employees are jointly suing the company for injury to reputation, inconvenience, deprivation of dignity and privacy). Amount involved R2,500,000.00

#### The Johannesburg Fresh Produce Market (Proprietary) Limited

The company is currently involved in various legal proceedings against it. Certain of these proceedings are long outstanding, the company in consultation with its legal counsel has assessed the outcome of these proceedings and the likelihood that certain of these cases are not likely to be in the company's favour. Following this assessment the company's management has determined that no provision is required in respect of these legal proceedings as at 30 June 2013. The total estimated claims amount to R81,466,349.00 which is in respect of disputes with employees and suppliers.

The entity is involved in two (2) litigation matters and disputes relating to the dismissal of former employees. One (1) case has been lodged with the Labour court and one (1) with the Labour Appeal court. Both of the cases have been brought forward from prior years. The estimated exposure is unknown at this stage. The directors are of the opinion that the claims can be successfully defended by the company.

There are several potential claims and disputes against the entity, the outcome of which cannot at present be foreseen or reliably measured. The claims and disputes arise due to termination of contracts due to poor performance, possible noncompliance with procurement and SCM policies and possible fraud within the entity and relates to a number of suppliers or contractors.

There are also several uncertainties relating to the claims and disputes resulting from the litigation process which includes inter alia determination of possible value received and non-compliance with procurement and SCM policies.

#### Metropolitan Bus Services (Pty) Ltd

Group Annual Financial Statements for the year ended 30 June 2013

|                          |      | OUP  | CC   | DRE  |

| Figures in Rand thousand | 2013 | 2012 | 2013 | 2012 |

#### 51. CONTINGENCIES (continued)

There are several labour disputes that exist between Metrobus and ex-employees. Should the disputes be settled in favour of the former employees, management estimates Metrobus could incur or be liable for claims of backpay up to R250,000. At this moment the disputes are still uncertain.

#### City Power (Pty) Ltd

The company has an ongoing legal action instituted by Grinpal Energy Management for the company to absorb its employees in term of section 197 of the LRA. An appeal process is underway after the applicant has obtained a Court Order compelling the company to absorb the employees. The potential liability is estimated at R750,000.00.

Litigation by Nicolaas Ligt 10122 cc a supplier is in progress relating to demages for alleged breach of contract by the company for failure to pay for services rendered. The potential liability is R4,268,499.00. An out of court settlement is being negotiated with the supplier. The liability has subsequently been settled.

The company has an ongoing legal dispute with the Labour union regarding non-payment of bonuses to employees for the 2012 financial year. The potential liabitly is estimated to be R28,163,994.00.

ABB South Africa has launched legal action against the company on the basics of an irregular award of a tender. It is alleged that the consultant appointed by the company interfered with the tender process to the detriment of the applicant. The matter is being defended and potential liability is still unknown.

City Power is currently claiming consumer debtor impairment at 100% as a tax deduction. South African Revenue Services has approved a deduction of 25%. City Power is appealing the decision of the Receiver. The potential liabitity is estimated to be R160,000,000.00.

#### City Parks (Pty) Ltd

There is a claim against the company for possible contractual non-performance brought by Full Circle Construction for R1,707,733.90. The company has opposed the matter and filed a defendant's plea. There is a claim against the company for restitution of land brought by A Million Up Investments 81 (Pty) Ltd for R17,812.50.

Summons have been instituted against Lindie Lombard and Sonwabiso Maduna for the amount of R22,000.00.

There is a claim against Boogy Tymz for an amount of R454,746.00. The matter is proceeding in the South Gauteng High Court.

#### Johannesburg Development Agency (Pty) Ltd

The JDA has entered into legal proceedings regarding the relocation of illegal occupants in various buildings around the Bertrams Priority Block. Eviction proceedings have been instituted in the South Gauteng High Court. Negotiations areunderway with illegal occupants to settle the matter out of court. Progress made in 2012 - Some of the illegal occupants have agreed to be reallocated to properties operated by the Johannesburg Social Housing Company. The few that would be left because of inability to meet monthly rental payments will be accommodated by the Department of Housing.

The CJMM and the JDA were served with a summons by Tembu Convenience Centre CC, trading as a convenience store and Engen Fuel dealership, for loss of income amounting to more than R17,000,000.00, as a result of BRT construction works. The City has filed its papers defending the matter in the South Gauteng High Court. The trial date is set for 31January 2014.

Up to May 2008, there was a thinking that the JDA was regarded as an agent and not the principal and thus was not allowed to account for Output and Input Value Added Tax on capital expenditure funded by the City of Johannesburg on projects rolled out by the JDA. This view was upheld in a ruling issued by the South African Revenue Service dated February 2008, with reference number TCS01/2008.

Group Annual Financial Statements for the year ended 30 June 2013

| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

#### 51. CONTINGENCIES (continued)

Subsequent to the said ruling, and further engagement with the South African Revenue Service through Deloitte, a second ruling by SAR dated 13 May 2008, stated the following: "The JDA acted as a principal and not an agent on behalf of the COJ. Further, the payments received by JDA constituted of consideration for a taxable supply which is subject to VAT at the standard rate in terms of section 7 (1) (a) of the VAT Act. Furthermore, JDA should have accounted for output tax on the receipt of the consideration for those services and could have been permitted to claim the VAT incurred on goods and services, pertaining to the agreement, as input tax." SARS requested the JDA to recalculate VAT for all the periods starting with the 2002 year through to 30 June 2007.

Deloitte were appointed by the JDA to calculate the net Value Added Tax payable to/ receivable from the South African Revenue Service for the periods 2002 to 2007.

A provision for Value Added Tax payable of R8,261,946.00 was raised in the financial statements in 2008/09.

During the 2011 financial year, an amount of R7,848,985.00 was paid over to SARS based on calculations prepared by Deloitte. In June 2012, SARS conducted an audit of the work performed by Deloitte after which an assessment will be issued. A final assessment has still not been issued by the South African Revenue Service. Based on the payments made, no provision has been raised in the annual financial statements until the final assessment has been received.

Subsequent to the forensic investigations in respect of the fruitless and wasteful expenditure referred to in Note 36, an insurance claim has been submitted to recover an amount of R2,935,688.00. According to forensic investigators, it is probable that the proceedings will result in the recovery of the full amount.

#### Johannesburg Social Housing Company (Pty) Ltd

For the financial year, the sole shareholder, made available capital infrastructure development to the value of R134,520,000.00. These funds were obtained through various Government Grants through the City of Johannesburg. In addition, JOSHCO secured funding from the Social Housing Regulatory Authority (SHRA) and Provincial Housing Subsidies on the development of the Fleurhof Junction project to the value of R38,000,000.00. The development related to social housing and infrastructure in Anthea, AA House, Klipspruit, Randburg Selkirk, City Deep, Orlando Ekhaya, Selby Village, Fleurhof, Roodepoort, Bellavista, Dobsonville, Lombardy East, Turffontein and Lynatex. For the year, R160,706,733.00 expenditure was incurred for the development of these projects. A marginal amount of R11,813,267.00 remains as a contingent claim by contracted developers for the project.

Operating lease payments represent rentals payable by the company for its Head office premises. Leases are negotiated for an average term of three years and rentals are fixed for one year and subject to escalation clauses. No contingent rent is payable.

#### Pikitup (Pty) Ltd

Freehold land, buildings and servitudes purchased from The City of Johannesburg Metropolitan Municipality in terms of the sale of business agreement, have not as yet been transferred into the name of Pikitup Johannesburg SOC Ltd. Transfer duties might be payable by the company on the transfer of property. It is not possible to estimate an expected amount.

The company has a contingent liability to the value of R10,300,000.00 in respect of disputed claims with respect to service providers.

#### CORE

#### **Uninsured claims & litigations**

Five Plaintiffs brought action against the Council in the 1990's, arising from major road and other construction works at the Empire Interchange, around the suburbs of Braamfontein, Milpark, Cottesloe, Melville, Parktown West, Emmarentia and Richmond. They allegedly suffered damages as a result of the Council having closed the road. (This claim was originally for R4,146,583.00 the majority of which was for loss of earnings). The approximate amount that the plaintiff could now claim would be in the order of approximately R500,000.00.

Group Annual Financial Statements for the year ended 30 June 2013

|--------------------------|-------|------|------|------|
| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

#### 51. CONTINGENCIES (continued)

Claim for damages for R10,000,000.00 in respect of relocation of homeless people. The Plaintiff sued the City allegedly because the City relocated homeless people onto the Defendant's property without his consent, making it impossible for him to develop the property.

Claim for damages against the COJ amounting to R11,668,746.00. The claim is based on an alleged breach of contract in that the City has allegedly failed to use its "best andeavors" to have the property transferred to the plaintiff.

Claim for R50,000,000.00 for services rendered in terms of contract for the provision of red light violation services. The matter was referred to arbitration.

Claim for at least R39,000,000.00 plus legal costs in respect of monies allegedly owing by the City of Johannesburg to a previous service provider for IT services rendered.

The Plaintiff instituted action against the City for wrongful termination of contract. It sought relief twofold, to uphold the contract, alternatively damages in the sum of R33,150,639.30. The matter was referred to arbitration, the plaintiff is however refusing to sign the arbitration agreement. The City is prepared to proceed with the arbitration however the Plaintiff has not taken any further steps for more than one year now.

The City appointed a service provider (a joint venture) to construct 1000 low cost RDP houses. The one partner to the JV subsequently ceded its rights and obligations in terms of the JV agreement to the other partner, which the City was not party to. The latter partner then only concluded 385 foundations. After various opportunities to remedy the defects, the City terminated the contract. A dispute was declared and the matter referred to arbitration in terms of the JBCC agreement for the sum of R29,406,592.00.

The City is being sued in the amount of R52,000,000.00 by a firm of consulting engineers who claim they were not paid for work done in the construction of a stadium for the 2010 Soccer World Cup in full and final settlement of all claims with regard to this contract.

Claim for unpaid services plus interest in the amount of R3,467,826.82. A tender in the amount of R1,976,616.08 plus interest and costs was made to the court. The City is disputing the difference between the amount being claimed and the amounts as per the tender.

#### Contingencies arising from pending litigation on wage curve agreement

On 21 April 2010 SALGA signed the "Categorisation and job evaluation wage curves collective agreement" (wage curve agreement) with IMATU and SAMWU on behalf of municipalities. The agreement established the wage curves and wage scales to be used by municipalities in determining the wages of municipal employees, based on an evaluation of employees' jobs per the TASK job evaluation system.

Subsequent to the signing of the agreement, the Unions declared a dispute with the agreement. The dispute was referred to the Labour Court and the Court delivered a ruling on 22 June 2012 that employees receive a salary increase backdated with effect from 1 July 2010 instead of 1 July 2011. SALGA, on behalf of municipalities, applied for leave to appeal this ruling and was granted the right to appeal against the judgement on 29 August 2012. To date this Labour Court of Appeal case has not been finalised.

In order to implement the CJEWCC (Categorisation and Job Evaluation Wage Curve Collective Agreement), it is a rerequisite that all municipalities must have finalised and signed off job descriptions as provided by the TASK Job Evaluation Collective Agreement. To implement the CJEWCC the CoJ therefore first had to convert to the TASK Job Evaluation System from the HAY Job Evaluation and JE Manager Job Evaluation System.

The dispute that the Unions declared meant that the CJEWCC could not be implemented. However, the City continued with the process to prepare for the implementation and to this end had started to do the conversion to the TASK Job Evaluation System. There were some challenges in this process since Labour had stopped participating in the CoJ Principal Job Evaluation Committee. The CoJ managed to submit a large number of Job Descriptions the SALGBC Gauteng Principal Job Evaluation Committee (GPJEC) for benchmarking and the issuing of a Provisional Outcomes Report (POR).

#### 51. CONTINGENCIES (continued)

Due to capacitation problems at the GPJEC the Job Evaluations and Provisional Outcomes Report (POR) were delayed and the City eventually obtained approval to use a correlation table that can be used to correlate the HAY and JE Manager Job Evaluation outcomes to the TASK Job Grading Results.

The City further made the required configuration changes to the Payroll System for implementation upon the resolution of the dispute. As part of SALGA we await the outcome of the Labour Court.

As a result of the uncertainties arising from the dispute declared by the unions and the pending litigation regarding the wage curve agreement, the municipality may have an additional receivable/ payable for employee wages, depending on the outcome of the pending litigation. The amount of the obligation cannot be measured with sufficient reliability due to the requirement of the CJEWCC, that all positions must be graded according to the TASK Grading System. Once a TASK Grade is established the individual employee's grading must be compared to a TASK Grading table and placed into 1 of 26 grading results. The applicable salary for the grading result must then be compared to the Employee's salary and the Employee's salary must then be adjusted to the applicable notch salary. There are several rules attached to the adjustment of the employee's salary. In order to implement this each employee's salary must be compared to the TASK notch and without the applicable TASK Grading per Job, the calculations of the liability amount cannot be accurately calculated.

#### 52. PRIOR PERIOD ERRORS (continued)

#### The correction of the error(s) results in the restatement of comparative figures as follows - Group - 2013

#### **Johannesburg Water SOC Limited**

Finance Lease - During the current financial year Johannesburg Water Entity discovered that the retained earnings, property, plant and equipment and finance lease obligation were incorrectly stated due to the fleet rental agreement between COJ and Johannesburg Water Entity which was initially treated as operating leases. The finance cost resulting from the finance lease obligation was understated and the depreciation resulting from the property, plant and equipment was also understated.

Trade and other receivables from exchange transactions - The City of Johannesburg Metropolitan Municipality has subsequently recalculated the accrual value and this amounted to a reduction in revenue for the 2012 financial year, comparatives have been adjusted.

The company has historically been discounting trade receivables and trade payables on normal credit terms (i.e.: 30 days). This was inconsistent with the accounting framework (GRAP), circular 09/2006 and common business practice, thus is has now been corrected.

Finance costs - Interest on impaired accounts was previously disclosed under Operating expenses on the Statement of Financial Position. More specifically it was accounted for as a set off against the allowance for impairment (bad debt). This practice is not permitted in term of GRAP 1. The effect of the incorrect treatment was that the allowance for impairment (bad debt) and the interest on overdue accounts were not accurately disclosed in the current and prior year's financial statements to reflect the substance of the transaction. This has now been corrected by accounting for the interest in impaired accounts under Interest Revenue on the Statement of Financial Position. The correction for prior periods is set out below.

#### **Pikitup Johannesburg SOC Limited**

During the current financial year Pikitup discovered that the retained earnings, property plant and equipment and finance lease obligations were incorrectly stated due to fleet rental agreement between Pikitup and COJ which was initially treated as operating leases. The finance cost resulting from the finance lease was understated and the depreciation resulting from the property, plant and equipment was also understated.

#### 52. PRIOR PERIOD ERRORS (continued)

#### **Johannesburg Social Housing Company SOC Limited**

Correction of a prior period error resulting from a credit note received from COJ for rates and taxes that was not supposed to be billed initially as the property are capitalised in the books of COJ.

This resulted in a decrease in Intercompany loans of R1 342 004 and a decrease in municipal charges of R1 342 004.

#### Johannesburg Roads Agency SOC Limited

The adjustments mentioned below is based on services of prior financial year:

#### Provision for invoices under dispute:

The raising of Roadmark/KYK JV invoices which was not accrued due to a dispute between the contractor and JRA total amount raised R4 497 295.

The raising of TP Building services for invoices under dispute which were not accrued for, amount raised R1 010 909.

The correction of expenses which were incorrectly accrued, amounts involved are (R82 325) and (R395 794)

The correction of a payroll disbursement (R102 040)

The correction of payments in advance, amount involved are R326 513 and R776 666.

The correction of JPC related party creditor, amount involved R17 050.

The correction of subsidy to align to approved subsidy R4 620.

#### Developers contribution:

The reclassification of developers contribution liability to equity, amount reclassified amounts to R23 323 633 .

#### 52. PRIOR PERIOD ERRORS (continued)

During the current financial year Johannesburg Roads Agency discovered that the retained earnings, property, plant and equipment and finance lease obligation were incorrectly stated due to the fleet rental agreement between COJ and Johannesburg Roads Agency which was initially treated as operating leases. The finance cost resulting from the finance lease obligation was understated and the depreciation resulting from the property, plant and equipment was also understated.

#### **City of Joburg Property Company SOC Limited**

Trade and other payables - Commission relating to land sales transaction was not recognised in the income statement when the property was transferred. This amount has been corrected and reflected as income. Reversal of accrual for directors emoluments. This was raised as an audit adjustment by MTC in the 2011/12 financial year. Impairment loss - The impairment on furniture and fittings was reversed as the assets have been disposed of.

Finance lease assets - The asset was incorrectly disposed of in the previous financial year when it was send back to supplier for repair and it has been subsequently brought back into use.

Non-current assets - Assets were incorrectly depreciated in the prior. This was discovered upon recalculation using the new fixed asset module on the Nicor accounting software currently in use by the finance department.

Group Annual Financial Statements for the year ended 30 June 2013

| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

#### 52. PRIOR PERIOD ERRORS (continued)

#### Johannesburg Development Agency SOC Limited

The correction of the error(s) results in the restatement of comparative figures as follows:

The restatement of the finance lease obligation was due to an error identified in the amortisation of the finance leases. The net change resulted in an increase in interest paid for finance leases in the prior year.

The restatement of the property, plant and equipment and intangible assets was as a result of restating the prior year carrying values for a reassessment of the useful lives. This resulted in a prior year adjustment as these assets had carrying values of Rnil.

The restatement of the loss adjustment due to further investigation that the fraud identified in the current year had a prior year financial impact.

#### **Metropolitan Trading Company SOC Limited**

Property, plant and equipment - A fixed asset verification was performed and it was found that many of the assets on the fixed asset register did not exist at year end as they could not be physically verified. This resulted in a decrease of R774 064 in cost and R259 014 in accumulated depreciation (Net book value: R515 050). Assets that were found had their uselives changed according to the condition they were in resulting in a reduction in depreciation of R259 014. During the fixed asset verification assets were discovered that were not on the register, a valuator was consuklted to provide values on these assets. A final value of R176 300 was established on all assets identified across all categories.

Taxation Payable - MTC did not submit any tax returns from 2008 upto and including 2012. This was rectified in the 2013 financial year and resulted in a taxation payable position of R3 109 513. The amount payable is made up of penalties and interest of R1 113 198 and tax of R1 996 315.

Loans from shareholders - the loan account transactions consist of BRT shift shortages of R73 884 were allocated to shareholders and the valuation of additional assets discovered of R196 300.

#### Johannesburg Metropolitan Bus Services SOC Limited

Management discovered that there was no accrual provided for the Insurance in the prior year amounting to R 5 765 666. This resulted in understatement of insurance expense in the prior period. The error has been corrected and led to an increase in insurance expense and a correctponding increase in accruals. Management also discovered that there was an error in the previous years inventory valuation amounting to R 2 619 199 and comparative figures have been restated accordingly.

Finance leases were incorrectly classified and accounted for in the previous financial years amounting to R1038 355, comparative figures have been restated accordingly. IT equipment relating to the company's backup system had not been capitalised, comparative figures have been restated with the related cost and accumulated depreciation totaling R1 826 313 and R547 896 respectively.

#### **Johannesburg City Parks NPC**

During the current financial year Johannesburg City Parks discovered that the retained earnings, property, plant and equipment and finance lease obligation were incorrectly stated due to the fleet rental agreement between COJ and Johannesburg City Parks which was initially treated as operating leases. The finance cost resulting from the finance lease obligation was understated and the depreciation resulting from the property, plant and equipment was also understated.

#### **Roodepoort City Theatres**

During the current financial year, the useful lives of assets were reviewed resulting in the carrying value of the assets increasing.

Group Annual Financial Statements for the year ended 30 June 2013

|--------------------------|-------|------|------|------|
| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

#### 52. PRIOR PERIOD ERRORS (continued)

#### **Johannesburg Tourism Company**

A receivables balance relating to sweeping account was incorrectly disclosed as bank and cahs balances.

#### **City Power Johannesburg SOC Limited**

The accrual for electricity sales includes a decrease in revenue reported for the 2012 financial period and previous reporting periods.

Specialised vehicles leased from the City of Johannesburg since 1 March 2012 were previously reported as operating leases. The specialised nature of the asset requires the lease to be classified as a finance lease which has been capitalised as property plant and equipment retrospectively.

#### **City Housing Company**

A decision was taken to liquidate City Housing Company, one of CoJ wholly owned entities, on the 26th June 2006. The winding down of the company began thereafter with the final liquidation taking place in 2009. From the consolidation point of view, City Housing Company trial balance was incorrectly consolidated in Group financial statements which resulted in the mistatement of consolidated assets, liabilities and retained earnings. The effect of the error is only on statement of financial position and changes in equity as disclosed above.

#### 53. RISK MANAGEMENT

#### GROUP

#### Price risk

City Power

**Distribution Losses** 

Distribution Losses o the amount of [R2,145 billion] (2012: R1,554 billion) were incurred as a result of electricity distribution losses. The total technical losses incurred amounted to [R0,754 million] (2012: R0,709 million). Non technical losses of electricity incurred amounted to [R1,390 billion] (2012: R844,9 million) and are due to non-metering of electricity and unauthorised consumption.

The electricity energy losses can be classified into technical and non-technical losses, during 2012/13 financial year. The municipal entity's non-technical losses increased from 10.72% to 16.59%. The non-technical losses are attributable mainly to the following:

- Theft and bypass of meters
- Illegal decalibration of meters
- Damaged meters and faulty voltage and current transformers
- Billing errors
- Customers without meters

As part of the municipal entity's strategy to continuously reduce the impact of non-technical losses, the following interventions have been implemented and are being reviewed and improved on an annual basis:

- Installation of automatic meter management systems, for both large and small power users i.e. automated metering technologies
- Continuous replacement of faulty conventional and pre-paid meters
- Automation of process to acquire new customers and change of meters (through the implementation of automated workflow and escalation system)
- Utilisation of anonymous "hot line" to report theft, vandalism and tampering
- Random and targeted audits are performed, followed by removal of illegal connections and normalisation supply

#### Johannesburg Water

Water losses amounting to [R820,6 million] (2012: R769,3 million) were incurred as a result of water distribution losses. The total technical losses incurred amounted to [R389,0 million] (2012: R374,8 million). Non-technical losses amounted to [R431,6 million] (2012: R443,8 million) and are due to non-metering of water and unauthorised consumption.

#### GROUP

The CJMM, through Group Treasury and Finance Strategy unit (Treasury) manages financial risks through usage of two portfolios comprising of financial instruments. For purposes of this disclosure, portfolios are assigned Portfolio 1 and 2. Portfolio 1 is managed internally by the CJMM while Portfolio 2 is outsourced to a specialist Fund/Portfolio Manager.

#### Portfolio 1 Overview

Effective financial risk management is imperative to CJMM. The realisation of the CJMM's objectives toward service delivery depends on CJMM's sound management of financial risks which enable the City to anticipate and respond to changes in the market environment as well as making informed decisions under conditions of uncertainty.

Group Annual Financial Statements for the year ended 30 June 2013

|                          | GROUP |      | CORE |      |
|--------------------------|-------|------|------|------|
| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

#### 53. RISK MANAGEMENT

The CJMM is exposed to the following financial risks from the use of financial instruments:

- Liquidity risk (including integrated cash flow management)
- Market risk.
- Credit/Counterparty risk

To ensure the execution of and compliance to overall risk management policies and guidelines in terms of exposure limits, concentration limits and volatility limits on financial assets and liabilities, CJMM plays a focal role in:

- The maintenance of sound liquidity levels such that optimal returns on surplus cash are realized and interest expenses minimized.
- Ensuring that CoJ's Credit rating is maintained or improved by ensuring that financial risk ratios fall within required limits.
- Ensuring sustainable financial viability of CoJ by avoiding the occurrence of uncontrolled losses that could arise as a result of exposure in the financial markets with the overall aim of protecting CJMM's financial position.
- To provide Council with reasonable assurance that financial risks the CJMM is exposed to are identified and, to the best extent
  possible, mitigated and controlled.

The Treasury Unit identifies, quantifies and sets up control measures to mitigate financial risks in close co-operation with operating units. Treasury executes its responsibility in line with the approved Treasury and Assets and Liabilities Management (ALM) policies.

#### **Financial Risk Management Framework**

The Risk Management Framework serve to raise awareness, inform and guide the Group on its approved approach to risk management. The framework, which is reviewed on a continuous basis in line with best market practices, seeks to assist the Group in the effective identification, evaluation and control of financial risks that may impact upon the realization of corporate, mayoral and service delivery objectives and priorities that the Group has set itself to achieve.

Council, through Assets and Liabilities Committee (ALCO), has overall responsibility for the establishment and oversight of the CJMM's risk management framework. ALCO, in this regard, is responsible for developing and monitoring the CJMM's financial risk management policies. ALCO reports regularly to the Mayoral Committee and Section 79 on its activities.

The CJMM's financial risk exposures are managed by the Treasury Unit. The CJMM's activities expose it to a variety of financial risks. The municipality's overall financial risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the CJMM's financial performance. The group recognises that an effective risk management function is fundamental to its business. Risk awareness, control and compliance are embedded in Treasury's day-to-day activities.

The CJMM's Treasury unit reports its risk management activities to Mayoral, Council and ALCO on a regular basis. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the CJMM's activities.

#### **Liquidity and Concentration Risk**

Liquidity Risk, in this instance, refers to the risk that CJMM may not meet its periodic obligations with respect to its liabilities when they fall due. Management of liquidity risk is particularly important as it ensures that capital and operating expenditure is met. Treasury enters into liability obligations to bridge funding gaps arising from both capital and operational expenditure with the aim of ensuring that CJMM meets its liability obligations when the fall due.

Group Annual Financial Statements for the year ended 30 June 2013

|                          | GROUP |      | CORE |      |
|--------------------------|-------|------|------|------|
| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

#### 53. RISK MANAGEMENT (continued)

For each financial year, Council approves a funding plan that minimizes liquidity risk. Treasury manages both the long-term and short-term cash requirements, with surplus funds from operations of the City invested in short term money market instruments.

Long-term liquidity risks arising from capital project initiatives are managed through issuance of long-term debt in the form of COJ bonds or long term loans or a combination of the two.

Absa Short term facility of R 380 million, Citi Bank Committed facility of R200 million and ii) Commercial Paper Issuance. CJMM's Treasury makes sure that all short term facilities utilised within the financial year are paid before the end of the financial year in line with Section 45(4)(a) of the MFMA. A cash management policy for managing its short-term cash flows and cash balances in a cost-effective manner is in place. The cash management policy assists the Group in managing its liquidity risk through the use of cash projection models with the aim of minimizing variances between projected and actual usage.

Both Short and Long term borrowings are approved under CJMM's Domestic Medium Term Note (DMTN) programme. The table below indicates approved facilities as at end of June 2013:

| Details               | Approved | Total    | Available for |
|-----------------------|----------|----------|---------------|
|                       | Funding  | Utilised | use           |
|                       | R'000    | R'000    | R'000         |
| Short-Term Borrowings |          |          |               |
| Standard Bank         | 675      | -        | 675           |
| Long Term Borrowings  |          |          |               |
| Borrowing             | 1,311    | (703)    | 608           |
| Total                 | 1,986    | (703)    | 1,283         |

Liquidity risk is also linked to Concentration risk which could be defined as the probability of high cash outflow arising from concentration of debt obligations payable around the same period, resulting in risk of default and the inability to evenly spreading liability obligations.

In line with GRAP 104, the tables below show CJMM's contractual maturity analysis of its interest rate swap and non-derivative financial liabilities.

## **Funding Debt Maturities**

The Group funds its coupon, interest and capital payments for all liabilities, other than bonds, from a Contingency Reserve Fund (CRF). Operational surpluses generated by the City are channeled into the CRF. Capital redemptions for bonds are funded from the Sinking Fund. The CJMM's annual budget contains provisions for coupon, interest and capital payments.

#### Market risk

Market risk is the risk that changes in market prices, such as interest rates and commodity prices will affect the CJMM's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable risk parameters, while optimizing the CJMM's service delivery objectives. GRAP 104 requires entities to disclose sensitivity analysis for each type of market risk as shown in the sections below. Interest rate risk is the main category of market risk which affects the Group.

#### Interest rate risk

This refers to the risk that the value of a financial instrument will change due to a change in i) the absolute level of interest rates; ii) in the spread between two rates; iii) in the shape of the yield curve or in any other interest rate relationship. CJMM's floating rate liabilities are exposed to interest rate risk in terms of both cash flow and fair values.

#### **Interest Rate Fair Value Sensitivity Analysis**

The fair values of the CJMM's floating rate liability portfolio are sensitive to interest rate changes. The fair values of these liabilities are based on projected cash flows calculated using market projected forward rates. The projected cash flows are then discounted using market implied discount factors. The table below shows how the fair values of floating rate liabilities change on the basis of the following assumptions:

- The base case interest rate is at current levels (0%)
- A two percent upward and one percent downward movement in interest rates Management generally expects interest rates to rise in the future.

#### Fair value sensitivity to the interest rate movement/shift for Floating Rate Loans

| Class               | Fair Value | -1%       | -0.50%    | 0         | 0.50%     | 1%        | 1.50%     | 2%        |
|---------------------|------------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|
| Floating Rate Loans | 2,573,471  | 2,500,516 | 2,535,008 | 2,573,471 | 2,603,992 | 2,638,483 | 2,672,975 | 2,707,467 |

Group Annual Financial Statements for the year ended 30 June 2013

|--------------------------|-------|------|------|------|
| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

#### 53. RISK MANAGEMENT (continued)

#### **Fair Value Sensitivity Analysis of Varable Rate Liabilities**

The fair value sensitivity analysis of variable rate liabilities shows that a 2% increase in interest rates will increase the fair value of floating rate liabilities by R133 million, and a 1% decrease in interest rates will decrease the fair value of floating rate liabilities by R73 million.

#### **Interest Rate Cashflow Sensitivity Analysis**

The Floating rate tables below shows the cash flow sensitivity analysis for floating rate liabilities. The sensitivity analysis is based on the following assumptions:

- The base case interest rate is at current levels
- A two percent upward and one percent downward movement in interest rates.

#### 53. RISK MANAGEMENT (continued)

#### **Hedging Interest Rate Risk**

#### Testing Hedge Effectiveness by the City of Johannesburg Dollar-

#### Offset Method

The City of Johannesburg test hedge effectiveness of the interest rate swap using the Dollar Offset Method. The Dollar-Offset Method compares changes in the fair value or cash flow of the hedged item and the derivative (hypothetical swap). A hypothetical swap is one that has a fixed rate which gives a zero value at inception. The fixed rate that gives a zero value at swap initiation is 11.213%.

This rate is used to generate the hypothetical swap. The all in fixed rate on the actual swap is 11.66%. The Dollar-Offset Method can be applied either period-by-period or cumulatively.

The per period approach is used generate accounting entries. Under the per period test, the movement in the swap value from one financial year to the next is compared to the movement in the hypothetical swap in the same period.

The cumulative approach is used to measure hedge effectiveness. Under the cumulative test, the movement in the swap value from inception to the next is compared to the movement in the hypothetical swap in the same period.

Should the hedge be effective, the market and credit risk gets included in Other Comprehensive Income (OCI), by deferring the minimum of the change in fair value of the actual swap and the hypothetical swap, provided the hedge effectiveness ratio is between 80% and 125%.

Per IAS 39 IG F.4.2: The expected hedge effectiveness may be assessed on a cumulative basis if the hedge is so designated and that condition is incorporated into the appropriate hedging documentation. Therefore even if a hedge is not expected to be highly effective in a particular period, hedge accounting is not precluded if effectiveness is expected to remain sufficiently high over the life of the hedging relationship.

#### Hedge effectiveness measurement

Assessment of the actual effectiveness as at 30 June 2013 as per the Dollar-Offset Method was calculated as shown below:

| Date      | Swap Value | Hypothetical<br>Swap Value | Cumulative<br>Effectiveness<br>Test | Per Period<br>Effectiveness<br>Test |
|-----------|------------|----------------------------|-------------------------------------|-------------------------------------|
| 31-Mar-11 | (23,397)   | -                          | -%                                  | -%                                  |
| 30-Jun-12 | (117,449)  | (95,210)                   | 98.78 %                             | 97.26 %                             |
| 30-Jun-13 | (76,629)   | (57,469)                   | 92.63 %                             | 108.16 %                            |

The effectiveness of the cash flow hedge is 92.63 percent which is within the 80-125 percent effectiveness range. Given that the cashflow hedge is effective in the current period (i.e. it is within 80-125 percent effectiveness range), CoJ will continue with hedge accounting in the future financial periods. The per period calculations as at 30 June 2013 are shown below.

| Current movement on swap  | 40,820 |
|---------------------------|--------|
| Effective portion (OCI)   | 37,741 |
| Ineffective portion (P/L) | 3,079  |

#### 53. RISK MANAGEMENT (continued)

#### **Swap Cashflow Sensitivity**

The table below shows how the cashflow resulting from the swap would respond to changes in interest rates assuming:

- The base case interest rate is at current levels
- A two percent upward and one percent downward movement in interest rates

#### **SWAP CASHFLOW SENSITIVITY ANALYSIS**

| Date      | Z - 100Bps | Z - 50Bps | Current   | Z + 50Bps | Z + 100Bps | Z + 150Bps | Z + 200Bps |
|-----------|------------|-----------|-----------|-----------|------------|------------|------------|
|           |            |           | Cashflows |           |            |            |            |
| 30-Sep-13 | (18,560)   | (18,560)  | (18,560)  | (18,560)  | (18,560)   | (18,560)   | (18,560)   |
| 31-Mar-14 | (21,914)   | (19,461)  | (17,018)  | (14,573)  | (12,138)   | (9,709)    | (7,287)    |
| 30-Sep-14 | (18,805)   | (16,462)  | (14,131)  | (11,827)  | (9,534)    | (7,257)    | (4,997)    |
| 31-Mar-15 | (15,507)   | (13,319)  | (11,165)  | (9,019)   | (6,907)    | (4,819)    | (2,754)    |
| 30-Sep-15 | (12,626)   | (10,580)  | (8,564)   | (6,583)   | (4,631)    | (2,710)    | (818)      |
| 31-Mar-16 | (9,776)    | (7,895)   | (6,057)   | (4,243)   | (2,470)    | (731)      | 975        |
| 30-Sep-16 | (7,412)    | (5,697)   | (4,022)   | (2,386)   | (787)      | 777        | 2,306      |
| 31-Mar-17 | (5,031)    | (3,496)   | (2,005)   | (547)     | 871        | 2,253      | 3,600      |
| 29-Sep-17 | (3,984)    | (2,601)   | (1,257)   | 48        | 1,316      | 2,549      | 3,748      |
| 29-Mar-18 | (2,929)    | (1,700)   | (510)     | 643       | 1,761      | 2,845      | 3,896      |
| Total     | (116,544)  | (99,771)  | (83,289)  | (67,047)  | (51,079)   | (35,362)   | (19,891)   |

From the above table we note that a 1% decrease in interest rates would decrease swap cashflows by 40%.

#### **Swap Fair Value Sensitivity**

The table below shows how the fair value of the swap would respond to changes in interest rates assuming:

- The base case interest rate is at current levels
- A two percent upward and one percent downward movement in interest rates.

| Swap F | Fair Val | ue Sens | sitivity |
|--------|----------|---------|----------|
|--------|----------|---------|----------|

| Instrument    | Maturity date | Fair value sensitivity to the interest rate shift |          |          |          |          |          |          |
|---------------|---------------|---|----------|----------|----------|----------|----------|----------|
|               |               | -1%   | -0.50%   | 0%       | 0.50%    | 1%       | 1.5%     | 2%       |
| INTEREST RATE | 29-Mar-18     | (106,631)   | (91,363) | (76,629) | (62,368) | (48,592) | (35,267) | (22,373) |
| SWAP ON R1BN  |               |   |          |          |          |          |          |          |
| loan          |               |   |          |          |          |          |          |          |

On the basis of the above assumptions, a 1% change in interest rates will result in a 37% change in the value of the swap. There is a positive relationship between the swap value and interest rates, thus if interest rates increase, the value of the swap will increase.

#### **Estimation of Fair Values**

The fair value of financial instruments that are not traded in an active market (for example, trading and available for sale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the municipality is the current bid offer price. The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques.

Group Annual Financial Statements for the year ended 30 June 2013

|                          | GRO  |      | CORE |      |  |
|--------------------------|------|------|------|------|--|
| Figures in Rand thousand | 2013 | 2012 | 2013 | 2012 |  |

#### 53. RISK MANAGEMENT (continued)

The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

To determine the fair values of floating rate instruments, the municipality uses market forward rates to estimate future interest and capital cashflows, and then utilises market implied discount rates to calculate their present values. To determine the fair values of fixed rate instruments, the municipality uses market implied discount factors to calculate their present values.

The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows.

#### **Fair Value Hierarchy**

In terms of GRAP 104.130 there are different levels of fair values based on the extent that quoted prices are used in the calculation of the fair value. The fair value hierarchy applies to instruments reported at fair value on the statement of financial position. The interest rate swap is the only instrument reported at fair value and therefore needs to be classified as per fair value hierarchy. Level 2 Fair values are calculated using valuation techniques based on observable inputs either directly or indirectly other than level 1 inputs. This category includes instruments valued using quoted market prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are considered less than active or other valuation techniques where all significant inputs are directly or indirectly observable from market data. The Level 2 all-inclusive fair value of the swap stood at -R76,6 million as at the end of 30 June 2013.

#### **Credit/Counterparty Risk**

The Group deposits surplus funds with financial institutions to mitigate against the negative cost of carry and these funds are diversified around different investment type and institutions.

The credit limit exposure table below depicts all investments with various counterparties as at the 30 June 2013. Total investments were R4,043 billion. The table also shows the credit limit approved per counterparty. Treasury constantly monitors the percentage limit utilized.

|                |           | Operational   |          |               | Ringfe    |           |               |            |

#### Portfolio 2

#### Introduction and overview

In order for the CJMM to meet its debt redemption obligations specific to its long-term borrowing and to mitigate the related risks, the CJMM has mandated a fund manager to operate its Debts Redemption Fund (The Fund).

The key objectives central to the fund included in the mandate are:

- Immunize the liability, in principle eliminating interest rate risk, as well as eliminating reinvestment risk by matching the investment horizon of funds with their anticipated utilization;
- Enable the CJMM to meet their redemption obligations

The fund has exposure to the following risks from financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

This note presents information about the Fund's exposure to each of the above risks, the Fund's objectives, policies and processes for measuring and managing risk.

#### **Risk Management Framework**

The Fund maintains positions in a variety of derivative and non-derivative financial instruments in accordance with its investment management strategy. The Liability Plus approach entails a risk-based investment strategy that manages the fund's assets appropriately, relative to its liabilities. The strategy focuses on mitigating the risks surrounding the liability, whilst at the same time seeking a return from the asset base. Conservative hedges can be employed to provide protection against the risks embodied in the liability. An asset strategy deployed is designed to deliver above-benchmark returns, and this is overlaid on the protective derivative structures. The integrated solution mitigates risks and improves performance.

The Fund's investment manager has been given a discretionary authority to manage the assets in line with the Fund's investment objectives. Compliance with the Fund's risk management framework is monitored quarterly by the Fund's Risk Committee which is chaired by the City Treasurer. Other committee members include senior treasury officials and the investment management team. Overall governance is monitored by the CJMM's Asset and Liability Committee (ALCO) whose primary objective is to manage financial risk emanating from the City's operational and borrowing initiatives.

#### **Credit Risk**

#### 53. RISK MANAGEMENT (continued)

#### **Credit Risk**

Credit Risk, in the instance of Portfolio 2, is the risk that counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund, resulting in a financial loss to the Fund. It arises principally from derivative financial assets, cash and cash equivalents, balances due from agencies and receivables from reverse repurchase agreements.

#### Management of credit risk

The Fund's policy over credit risk is to minimise its exposure to counterparties with perceived higher risk of default by dealing only with counterparties meeting the credit standards set out in the Fund's risk management policy. Credit risk is monitored on a daily basis by the investment manager in accordance with policies and procedures in place. Any deviations on the expected parameters of the Fund's credit risk are acted upon immediately.

In terms of this mandate, the acceptable credit exposures are:

- Government
- Parastatals
- Highly-Rated Corporate, Banks and Institutions

Exposure limits are determined as a function of the primary capital of the issuer, the credit rating provided by a rating agency and the liquidity of the instrument.

#### Exposure to credit risk

The Fund's maximum credit risk at the reporting date is represented by the respective carrying amount of the relevant financial assets in the statement of financial position at 30 June 2013. The Fund was invested in securities the following credit quality:

| Investment            | Fair Value  |
|-----------------------|-------------|
| FRN Assets            | 580,091     |
| Corporate Bond Assets | 1,380,896   |
| Gov Bonds             | -           |
| Assets                | 907,593     |
| Liabilities           | (1,489,193) |
| Swaps                 | -           |
| Assets                | 596,617     |
| Liabilities           | (470,881)   |
| FRA's                 | -           |
| Assets                | 61,954      |
| Liabilities           | (41,875)    |
|                       |             |

#### Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

#### Management of liquidity risk

The Fund's policy and the investment manager's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stress conditions, including estimated redemptions of bonds, without incurring unacceptable losses or risking damage to the Fund's reputation.

The Fund's liquidity risk is managed on a daily basis by the investment manager in accordance with policies and procedures in place. The Fund's overall liquidity risk is monitored on a quarterly basis by the Fund's Risk Committee and CJMM ALCO. Six months prior to any CJMM upcoming bond redemptions, the liquidity of the Fund is assessed in relation to the required redemption amount and necessary measures to meet the obligations are undertaken if necessary.

|                             | (1,589,000) | (1,819,877)                |

#### **Market Risk**

Market Risk is the risk that changes in market prices such as interest rates, equity prices, foreign exchange rate and credit spreads (not relating to changes in the issuers credit standing) will affect the Fund's income or the fair value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

#### Management of market risk

The Fund's strategy for the management of market risk is driven by the Fund's objective. The Fund deploys asset-liability matching principles to design an asset management strategy to immunise the portfolio from the underlying risks inherent in the liability. In addition, an active portfolio management strategy that rebalances the assets in order to take advantage of market mispricing opportunities is followed. Directional trades are overlaid on the asset strategy to provide yield enhancement.

The Fund's market risk is managed on a daily basis by the investment manager in accordance with policies and procedures in place. The Fund manager monitors the market risk in real time using the Rand per-Point metric which defines the profit or loss that would be generated by a one basis point move in the underlying interest rate curve.

The Fund's market positions are monitored quarterly basis by the Fund's Risk Committee and CJMM ALCO.

The Fund uses derivative to manage its exposure to interest rate and other price risks. The instruments used include interest rate swaps, forward contracts, futures and options.

#### Interest rate risk sensitivity analysis

The Fund is exposed to the risk that the fair value or future cash flows of its financial instruments will fluctuate as a result of changes in market interest rates. With respect to the Fund's interest-bearing financial instruments, the Fund is subject to exposure of fair value or cash flow interest rate risk due to fluctuation in the prevailing levels of market interest rates.

The sensitivity analysis reflects how changes in underlying interest rates affect the fair value of the financial instruments.

#### Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the processes, technology and infrastructure supporting the Fund's activities with financial instruments either internally within the Fund or externally at the Fund's service providers, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of investment management behaviour.

The primary responsibility for the development and implementation of controls over operational risk rests with the Fund's Risk Committee. This responsibility is supported by the development of overall standards for the management of operational risk, which encompasses the controls and processes at the service providers and the establishment of service levels with the service providers, in the following areas:

- requirements for appropriate segregation of duties between various functions, roles and responsibilities;
- requirements for the reconciliation and monitoring of transactions;
- compliance with regulatory and other legal requirements;
- documentation of controls and procedures;
- requirements for the periodic assessment of operational risk faced, and the adequacy of controls and procedures to address the risks identified;
- contingency plans;
- ethical and business standards;
- risk mitigation

The Fund's objective is to manage operational risk so as to balance limiting of financial losses and damage to its reputation with achieving its investment objective of generating returns to CJMM.

The Fund as provided the custodian a general lien over the financial assets held in custody for the purpose of covering the exposure from providing custody services. The general lien is part standard contractual terms of the custody agreement, at present, ABSA Bank Limited provide custody services.

#### 53. RISK MANAGEMENT (continued)

#### Valuation of financial instruments

Availability of observable market prices and model inputs reduces the need for management opinion and estimation. This also reduces the uncertainty associated with determination of fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions of financial markets.

The Fund has an established control framework with respect to the measurement of fair values. This framework includes a portfolio valuation function which is independent of front office management and reports to the Funds Risk committee which has overall responsibility of significant fair value measurements. Specific controls include: verification of observable pricing inputs and re-performance of model valuation; a review and approval process for new models and changes to such models; analysis and investigation of significant daily valuation movement and reporting of significant valuation issues to the Funds Risk committee.

The Fund measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in the measurements:

- Level 1: Quoted prices (unadjusted) in an active market for an identical instrument.
- Level 2: Valuation techniques based on observable inputs either directly i.e (as prices) or indirectly (i.e derived from prices). This category includes instruments valued using: quoted market prices in active markets for similarinstruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data
- Level 3: Valuation techniques using significant, unobservable inputs.

This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instruments valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between instruments.

Fair values or financial assets and financial liabilities that are traded in active markets are based on quoted prices or dealer price quotations.

The Fund uses widely recognised valuation models for determining the fair value of common and more simple financial instruments, like interest swaps that use only observable market data and require little management, judgment and/or estimation. Observable prices and model inputs are usually available in the market for listed debt, exchange traded derivatives and simple over the counter derivatives like interest rate swaps.

The table below analyses financial instruments measured at fair value at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorized:

# 30 June 2013 Financial assets at fair valeu through profit or loss

Disciplinary steps/criminal proceedings: Under investigation so appropriate steps can be taken.

# 4 Pikitup (Proprietary) Limited

This relates to the ICT contract that lapsed and running on a month-on-month pending the finalization of the new tender process. A new contract is now in place.

Disciplinary steps/criminal proceedings: None

# 5. City Power Johannesburg

Payments were made to suppliers in contravention of declaration in terms of Supply Chain Management regulation 13.

Disciplinary steps/criminal proceedings: None.

## 56. IRREGULAR EXPENDITURE (continued)

#### 6. Johannesburg City Parks

Acquisitions without 3 quotations, procurements without having followed tender processes and procurements without a signed contract in place.

Disciplinary steps/criminal proceedings: None.

#### **CORE - 2013**

Office of the Speaker

ACA Krans, R922,993.00 condoned for continuing occupance of building without authorised extension of the lease contract.

Khayalami Building - leasing via JPC, EAC Decision Clause 27, amount outstanding to date, R266,422.00.

STD Bank Jabulani Building, contract renewed and signed through JPC, an amount of R369,896.61 approved for financial year end 2013.

Disciplinary steps/criminal proceedings: None.

### **Reclassified Deviations**

1. Audit Command Language Maintenance and Support Fee, R49,008.60.

Reason

The Audit Command Language (ACL) Software is a tool used by Internal Audit to perform various analytics on sets of data. The software was procured from Messrs CQS Technology Holdings (Pty) Ltd as the official sole distributor of ACL and support of ACL licences in South Africa, hence the request for a deviation.

2.. Extension of the Insurance Renewal terms and the contracts of short term insurance fund, R279,780.05.

Reason

The existing contract (256/09) with Guardrisk Insurance Company Ltd for short term self-insurance fund contingency policy administration services will expire on 20 September 2012. The Department has commenced with the process for a new tender to be finalised within 3 months hence the request for the extension of the existing contract.

3. Procurement of General Algebraic Modelling system for Department of Economic Development, R102,400.00.

The Economic Development Department commissioned the construction of a Compatible General Equilibrium (LGE) model that allows for the assessment of the impact of projects, policies and programmes on the economy and it's attributes. The General Equilibrium Models require appropriate computer software to run the simulation and GAMPACK and GAMS are commonly used software programmes, however GAMS is popular locally and is friendly to use than GAMPACK. GAMS is sold and licensed only by GAMS Development Corporation in South Africa. This makes GAMS Development Corporation the sole supplier in South Africa for GAMS hence the request for a deviation.

 Continuation of Technical A192: Provision of Technical and Operational Services Associated with the Macro Surveillance Closed Circuit Television System. Service Provider Omega Risk Solution R1,509,698.22.

Reason

The new contract for the provision of technical and operational services associated with the Macro Surveillance Closed Circuit Television System was considered by the EAC who requested that JRAS audit the process leading to the finalisation of the Bid Evaluation Committee prior to the EAC making the final award. The Deviation to extend the current contract (A192) for a further three months period is to allow JRAS to finalise its due diligence report.

#### 56. IRREGULAR EXPENDITURE (continued)

Adjustment of the Contract Amount for Emma Flats Box Curlert. Service Provider Nesandla Civils Pty (Ltd), R4,590,266.39.
 Reason

The original contract for Emma Flats (308/11) was awarded to Nesandla Civils on the 18th July 2011 for R14,136,000.00. The current contract progress to date is 80% completed and the contractor is 20% behind due to pipe jacking activity. Prior to the commencement of the contract and even during the contract no reasonable prospects of locating the granite rock layer existed at the time of conducting geo technical investigations. The contract price needs to be adjusted in order to deal with this unforeseen circumstances hence the deviation to adjust the price.

6. Extension of the existing Lease Agreement for a further three years relating to office accommodation at Block L, 400 16th Road, Central Park, Midrand, Region A, Sevice Provider, Growthpoint Properties Limited. 1st Year R285,853.09, 2nd Year R314,141.39, 3rd Year R345,555.53.

Reason

The Housing Department Region A offices are located at Block L, 400 16th Road Central Park, Midrand, the public has been using the premises to engage with the Department, hence the request for a deviation to extend the lease for those premises as it is impractical to go out on tender on the same building.

7. Approval for Payment of the service provider: Yebo Shine (Pty) Ltd, R87,001.12.

Reason

Stakeholder Relationship Management continued to utilise the services of Yebo Shine (Pty) Ltd for a period of 4 months (January – April) form the contract which expired in 31 December 2011. This service could not be discontinued as it was going to pose a health risk to Ward Councillor Offices. Hence the ratification for approval of payment.

8. Utilisation of services of Steiner Hygiene Services (Pty) Ltd. R132,577.97.

Reason

The user department engaged the service provider under contract 176/08 approved by the City, however, the contract expired in October 2011 and the user department continued to utilised the services of Steiner Hygiene from the period December 2011 to June 2012 as discontinuing these services would have posed a serious health risk. Hence the ratification for approval of payment.

9. Service Provider Mailtronic Direct Marketing CC. R500,000.00.

Reason

The Section 49 Notification from the supplementary valuation Roll 9 needed as a matter of urgency to be posted with the monthly statements, hence Mailtronic Direct Media CC, the current service provider for the posting of monthly statements was requested to include in those statements the Section 49 notification. Unfortunately due to the urgent nature of the requirement no prior approval was obtained to secure the utilisation of this contract to include the notices, hence the ratification approval.

Approval of payment: Relocation of the Alexandra Renewal Project Office. Service Provider A1 Office Movers, R91,370,59.
 Reason

Development Planning and Urban Management, Alexandra Renewal Project Department has been leasing the building Pendad House, for the period 01 September 2008 to 30 June 2012. The lease was terminated. Quotations for the furniture removal service providers were sourced from the three service providers on the CoJ database, as opposed to being advertised on the Notice Board for seven days as the value exceeds R30,000.00. Due to Financial year end processes it was impossible to follow normal procurement procedures on placing the requirement for the office move on the board for a period of seven days. Hence the ratification for approval of payment.

Group Annual Financial Statements for the year ended 30 June 2013

#### 56. IRREGULAR EXPENDITURE (continued)

Condonation and Ratification with long term resolution, Service Provider Multilingua Translation Interpretation Services, R24,888.00.
 Service Provider, Questek Customer Care R22,029.77.

Reason

Multilingua Translation Interpretation Services is the sole supplier for translation of languages. Questek is the sole supplier for PA Complex and PA Systems. Hence the ratification for approval of payment.

12. Ratification of activities in relation to the design layout, proof-reading, photography, translating and printing of the 2013/16 and the 2012/15 Medium Term Budget. Service Provider Cut-to-Black Media, R604,923.70.

Reason

Ountations were solicited from Proposal Nr. A290B

Quotations were solicited from Proposal Nr A290B for the IDP and Budget Books for 2012. The award was made to Cut-to-Black for R1,330,380.53 on the 16th March 2012. However, additional tasks were given to Cut-to-Black for an additional amount of R604,923.70. The additional requirements could not be sourced through competitive bidding processes because they are linked to the original services/scope of work awarded to Cut-to-Black. As these services were urgently required, no authorisation was solicited prior to engagement of the service provider, hence the request for the ratification.

 Payment to Private Security Companies in terms of Contract 270/09 for September and October 2012. Service Provider, Panel of eleven Private Security Companies, R29,103,000.00.

Reason

The increase in the value of the contract by R29,103,000.00 is due to the pay out of PSIRA Statutory increases to the eleven Private Security Companies for the period of September and October 2012.

 Office Accomodation 222 Smit Street and Parking Bay, Service Provider Redefined Properties Limited, R2,702,278.00 and Service Provider Interpark R221,616.00.

Reason

The request for a Deviation to extend the Lease at 222 Smit Street for the office of the CIO is due to the following reasons: Critical IT infrastructure has been installed in this building. The SAP Competency Unit is housed in the building. For the above reasons and the cost associated with the removal cost, loss of productivity and the fact that the building is within close proximity to Metro Centre, it makes business sense and cost efficiency to renew the current lease, hence the request for the deviation.

15. Extension of the SAP ERP Support, SAP End User and IT Functional Training provided by EOH, UCS and BCX respectively. R13,280,000.00.

Reasor

The new tender A472 was advertised and the Bid Evaluation Committee presented its report to the Bid Adjudication Committee on the 27th July 2012. The Bid Adjudication Committee raised certain concerns that were to be considered by the BEC. However, the current arrangements with EOH will expire on 31st July 2012 and hence the request for a deviation to extend the contract until 31st August 2012 to allow the finalisation of the consideration of contract A472.

16. Payment of Mailtronics, R331,668.24.

Reason

R&CRM needed to inform and educate ratepayers on changes, procedures and policies that impact their municipal accounts i.e annual tariff increase. Having no contract in place, the R&CRM Department made use of Mailtronics who have a contract with the City to book, place and ensure design of the tariff information for placement in 19 newspapers. On invoicing the Department was informed that the contract only relates to marketing and communication with regard to the printing and posting of statements. Hence the ratification for the approval of payment.

Group Annual Financial Statements for the year ended 30 June 2013

|--------------------------|-------|------|------|------|
| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

## 56. IRREGULAR EXPENDITURE (continued)

17. Payment of Nenongwe Building Construction and All Cleaning Services, R265,050.00.

Reason

Jabulani Fire Station was revamped at the cost of R1,402,193.00 excluding VAT. During the renovations it was discovered that the water table was much higher and the soil was spongy which made it impossible to compact to the required standards. An engineer was engaged to replace the spongy soil with imported G5 and G7 soil at the cost of R265,050.00 excluding vat, hence the request for the ratification as the scope of work was extended without obtaining the necessary approval.

18. Extension of the appointment of KMPG to second an Acting Group CFO on temporary basis for a period of six (6) months from 1 October 2012 to 31 March 2013, R4,000,000.00.

Reason

On 20 December 2011 KPMG was appointed to second an Acting Group CFO on a temporary basis for a period of nine months at a cost of R5,859,000.00. Subsequent to the appointment of KPMG the City commenced with the recruitment process of an appropriate Group CFO, however no suitable candidate was found, hence the request for a deviation to extend the original engagement of KPMG by six months.

 Extension of Paper Ticketing, Service Provider, Reakgona Inspectorate (Pty) Ltd, R528,000.00, Tony'sTime & Access R50,000.00, TMT Service & Supplies (Pty) Ltd, R1,130,000.00, Ace Wholesalers R864,000.00, G4S Cash (Pty) Ltd R490,000.00.
 Reason

It was anticipated that the paper ticketing system would be replaced by the AFC system on 1 November 2012. Due to circumstances beyond the control of Rea Vaya, the commencement of the implementation of the AFC system is presently scheduled for 26 November 2012, with an introductory transition period when the two systems will run together. Hence the ratification for the approval of payment.

Appointment of Rea Vaya Strategic Support, Service Provider, Dirk Jacques van Zijl, R1,200.00 per hour.
 Reason

The institutional review process of the City resulted in significant changes that were not anticipated, such as the closure of the Metro Trading Company (MTC) necessitating the incorporation of the entire station management function into the Rea Vaya business unit and this had required a significant number of additional hours from Van Zijl. Hence the request for the approval for the appointment of Mr. D.J (Jacques) van Zijl as a strategic support resource for the Rea Vaya BRT and Scheduled Services Agency.

21. Acquisition of services from Events Galore Event Planning & Management Company for the Special Whippery Political Caucus Meeting. Service Provider, Events Galore, R66,883.00.

Reason

The Department solicited three quotes from the service providers as required by Supply Chain procedures.

Events Galore was recommended since it was the lowest. The services were requested on an emergency basis hence the requirements were not advertised on the Notice Board nor signed off prior to engagement of the service provider by the delegated authority.

 Increase of Current Budget to allow for the Retention of SAHA's AFC Consulting Services to Finalise the Implementation of the Rea Vaya Phase 1A AFC system, R645,810.00.

Reason

Due to mainly the ministerial Automated Fare Collection ("AFC") System Regulations, having necessitated the complete renegotiation of the contract with the City's AFC "Supply & Installation" contractor, the City's AFC Advisory Consultant's contract once again had to be further extended and provision made for the extra costs and fees occasioned by this further delay and all the additional work that had to be done in the process.

Group Annual Financial Statements for the year ended 30 June 2013

|                          | GROUP | GROUP |      | CORE |  |
|--------------------------|-------|-------|------|------|--|
| Figures in Rand thousand | 2013  | 2012  | 2013 | 2012 |  |

#### 56. IRREGULAR EXPENDITURE (continued)

23. Extension of Paper Ticketing Service Level Agreement, Service Provider TMT Services & Supplies (Pty) Ltd R302,841.00, Reakgona Inspectorate (Pty) Ltd R176,000.00, Tony's Time & Access R21,347.60, Ace Wholesalers R649,500.00, G4S Cash (Pty) Ltd R350,000.00.

Reason

Due to the delay in the funding of the bank account required by ABSA to load pre-paid fares on the new EMV smartcards and the fact of the integration of the AFC and APTM systems.

24. Lease of Driehoek Radio High Site from Eskom Enterprises (Pty) Ltd, R77,280.67.

Reason

This ICT high site is critical for continued uninterrupted services to COJ area and it is the only service provider for a high site in terms of specific and ICT requirements.

25. Renewal of Lease Agreements for rented Library Facilities, Service Provider Eris Property Group (Pty) Ltd, R145,245.64, Blend Property Group, R578,880.00, Redefine Properties Limited, R478,667.40, City Property Administration, R104,494.20, Heartland Leasing (Pty) Ltd, R86,701.56, Basfour 2296, R347,328.00.

Reason

The normal procurement processes were dispensed with on the basis that the procurement in question is regarded as an exceptional case where it is impractical to follow the normal procurement processes. The library facilities within the communities will be unhappy, and costs will be too much. These libraries have been established in these communities for a very long time and moving or relocating them might disadvantage the communities and will be costly.

 Appointment of a Service Provider for use of the Private Emergency Medical Services at Primary Health Care Facilities to Prevent Loss of Life, Service Provider Netcare, R6,197.17.

Reason

The Department requested the services of the private medical emergency services at Local Government Primary Health Care (PHC) facilities in the event of non-response by Provincial Ambulances in life threatening situations and unnecessary possible medico-legal implications for the Health Department in the City.

27. Renewal/Extension of Lease Agreement, Alphen Square North Randjespark, Midrand, Service Provider, JT Ross Property Services (Pty) Ltd, R4,957,019.10, R761,624.28 and R198,076.32.

Reason

The Health Department Region A offices are located at Unit 6, 7 and 8, Alphen Square North Randjespark, Midrand. The public has been using the premises to engage with the Department, hence the request for a deviation to extend the lease for those premises as it is impractical to go out on tender on the same building.

28. Utilisation of Services of Steiner Hygiene Services (Pty) Ltd, R3,845.99.

Reason

The user department engaged the service provider under contract 176/08 which was approved by the City, however, the contract expired in October 2011 and the user department continued to utilise the services of Steiner Hygiene from the period March 2012 to June 2012 as discontinuing these services would have posed a serious health risk, hence the ratification for approval of payment.

Undertaking an Educational Trip and Approval to re-imburse the University of Witwatersrand for money paid, R15,648.00.
 Reason

Ms. P Bafo and Mr. Ramashala who are on subsidised education from the City, are currently studying towards a Masters degree in Housing and Development Planning through the University of Witwatersrand. As part of their studies they went on a compulsory field trip to Nairobi from 11 to 15 September 2012, where they participated in a symposium and they presented a paper relevant to their observation as part of an academic assessment. Hence the ratification for approval of payment.

30. Approval of payment of the Service Provider SOS Protect Sure National Division, R1,400,000.00.

Reasor

Installation of CCTV monitoring systems at Midrand and Randburg to minimise the theft, fraud and corruption at the cash sites and testing stations.

Group Annual Financial Statements for the year ended 30 June 2013

## 56. IRREGULAR EXPENDITURE (continued)

31. Approval of payment of the Service Provider Gijima AST Holdings (Pty) Ltd, R40,757.28.

Contract No. 280/10 exists between Gijima AST Holdings (Pty) Ltd and the City of Johannesburg for upgrade, mainten ance and support for an existing Phillips telephony system installed at 66 Jorissen Street linked to 61 Jorissen Street via VOIP. The contract covers the entire telephony system and is therefore applicable for both buildings. Throughout the first year of the contract, no reconciliation of expenditure was done. On submission of the invoice, a reconciliation was done and it was established that the contract amount has been exceeded and no payment was effected.

Approval for payment of the service provider Munghwena Trading Projects, R102,600.00.
 Reason

The absence of a contract and in compliance to Occupational Health and Safety standards, Group Finance requested Mungwena Trading Projects who was supplying the services from August 2012 to October 2012 to continue with the provision of hygiene services at 28 Harrision (Technical Call Centre). This service could not be discontinued as this was going pose a health risk to Call Centre staff and management. A request for quotations was placed on the board between the 17 October 2012 to 24 October 2012. Approval of the recommended supplier has taken longer and this has compelled the officials to continue with current service provider. Invoices for the months of November 2012 and December 2012 could not be paid for the reasons stipulated above.

Approval for payment of the service provider Bonamini Trading Enterprise, R117,800.00.
 Reason

In the absence of a contract and in compliance to Occupational Health and Safety standards Group Finance requested Bonamini Trading Enterprise who was supplying the services from August 2012 to October 2012 to continue with the provision of cleaning services at 28 Harrison (Technical call centre). This service could not be discontinued as this was going pose a health risk to call centre staff and management. A request for quotations was placed on quotation board on 17 October 2012 and closed on 24 October 2012 (copies attached). Approval of the recommended supplier has taken longer and this has compelled the officials to continue with current service provider. Invoices for the months of November 2012 – December 2012 cannot be paid for reasons stipulated above.

34. Approval for payment of the service provider Manenzhe Hygiene Solutions, R41,040.00.

Contract number 144/08 for a panel of contractors to supply cleaning services to the City of Johannesburg expired in March 2012. In the absence of a contract and in compliance to Occupational Health and Safety standards Group Finance requested Manenzhe Hygiene Solutions to continue with the provision of cleaning services at 28 Harrison. This service could not be discontinued as this was going pose a health risk to call centre staff and management. Invoices for the month of July 2012 cannot be paid for reasons stipulated above.

35. Appointment of Two Tone Global Agency to execute AFCON 2013 Communication and Marketing Campaign. Service Provider, Two Tone Global Agency, R2,808,435.34.

Reason

The Department engaged the services of a service provider without following normal procurement processes in terms of utilisation of Panels as per Practice Note 004/2011 and the SSCM representatives were not engaged.

36. Ratification for exceeding the Value of Contract 287/10, Electronic Automate Clearing Services, Service Provider, Mindworx Consulting (Pty) Ltd, R109,982.07.

Reason

A tender No. 287/10 was advertised to a service provider to render services for the Electronic Automated Clearing services and the simplification of the payroll activities and Midworx Consulting (Pty) Ltd was appointed for the period of thirty six (36) months commencing from the date of acceptance 13 August 2010. The award was based on the contract not exceeding R1,296,000.00 for the duration of the contract.

Group Annual Financial Statements for the year ended 30 June 2013

#### 56. IRREGULAR EXPENDITURE (continued)

37. Appointment of Universal Knowledge Software to provide the Symphony Library System. Service provider Universal Knowledge Software (UKS), R5,680,000.00.

Reason

The provision and support of the Library System and that of a new contract for the supply and maintenance of the Library System for a period of thirty six (36) months, starting on 01 February 2013.

38. Delivery and installation of surveillance DVR System, Security Camera, Alarm Connectivity and monitoring of the Civic centre, Florida Park. SOS Service provider, R67,727.40.

Reason

Installation of surveillance DVR System, Security Camera, Alarm Connectivity in the walk-in centre in Roodepoort.

39. The appointment of XON to provide anti-virus protection software security support licenses. XON service provider, R1,413,146.70.

Reason

Security software support services for a period of twelve (12) months from 01 January 2013 until 31 December 2013.

40. Appointment of SKS Business Solution CC for minor works. SKS Business Solution CC service provider, R211,696.69. Reason

Minor works at the Bellavista Clinic (Region F).

41. Actions of the officials of revenue shared services and approval of a deviation from the official procurement processes by the City Manager and the extension of scope of work on the project undertaken by Ernest & Young service provider, R1,093,906.38.

Reason

The increase in value of contract awarded to Ernest & Young to assist Revenue Shared Services Centre (RSSC) to perform additional imaging and analyses of computers in order to complete the cheque/cash management process review and forensic investigation services undertaken by the Department.

42. Ratification for exceeding the value of the contract A491, Acquisition Management Mogale Solution Providers (Pty) Ltd service provider, R214,132.36.

Reason

Appointed to facilitate the process of recruiting candidates for seven positions on the second reporting level, as an additional amount for the second headhunting process to appoint the Executive Director: Environment and Infrastructure Services.

- 43. Relicensing and support for the heritage collections database and ratification of actions of Arts and Culture in relation to utilising Glomas Africa service provider,
  - 1. Ratification R144,177.16,
  - 2. Deviation R459,635.06.

Reason

Approval payment from 01 November 2011 to 31 October 2012.

Reason

Sole Supplier of licenses and support for the STAR databases used for the City for a period of twenty four (24) months from November 2012 to 31 October 2014.

44. Expenditure incurred on EOH Contract No. A472. EOH Resources service provider, R11,935,418.10.

The Revenue Shared Service requested the assistance of EOH Resources in the clearing of error logs for Billing, invoicing and the Print Workbench. These extra resources were not included in the initial budget for 1st line and 2nd SAP Support. The huge volume of error was impacting on Revenue performance. The contract amount was reached between the OCIO and Revenue Department and though Revenue had sufficient estimate provision to accrue expenditure in the previous financial year, the department could not release the payment as approval had not been sought to increase the contract amount.

## 56. IRREGULAR EXPENDITURE (continued)

45. Appointment of Steiner Hygiene Services R173,056.56.

Reason

Utilising the services of Steiner Hygiene Services for the period of four (4) months from 01 February 2013 to 31 May 2013.

46. Appointment of Agonamathata Air Conditions and Projects as service provider, R190,596.60.

Reason

Agonamathata Air Conditions and Projects for a period of six (6) months from 01 February 2013 to 31 July 2013, and that the requirement for a MBD 4 form in the case of Steiner Hygiene Services as well as the requirement of a signature in the case of Agonamathata Air Conditions and Projects is waivered.

47. Request for payment to Bella Recruitment Team for the service rendered to the Private Office of the Executive Mayor. R138,144.00.

The City pays Bella Recruitment Team for the services rendered for paying temporary employment of Tshepiso Mbedzi over the period of ten (10) months.

48. Extension of contract for the expanded social package (ESP) system with resultant finance. Service provider Resultant Finance, R288,728.00.

Reason

The extension of contract approved for the period of six (6) months.

49. Motivation for payment to service provider Lufhereng IT, R35,595.00.

Reason

To continue utilizing the services of Mogale Information Technologies (Pty) LTD for services rendered in June, July, August, September and October 2012. No further payment regarding Lufhereng IT will permitted. 50. Extension of lease to accommodate the department of Economic Development at Jorrisen Place. Service provider LLP, R716,816.01.

Reason

The DED continues with a month-month lease from the 1st February to 31st August 2013 lease contract with LLP, subject to changes in utility consumption and other recoveries and the 9% annual escalation rate as per the lease agreement.

51. The insurance renewal terms and the contracts of short term insurance fund/contingency policy administration services due to unfore seen delays for the appointment of insurance broker/s. Service provider Guardrisk Insurance Company Ltd, R48,000,000.00.
Reason

The Executive Director: Group Assurance be authorised to finalise and sign-off the addendum to the existing service level agreement, to effect the payment to Guardrisk in accordance with this approval.

52. Request for Payment to the Cleaning Services contract. Beef, General and Civil Construction service provider, R49,950.00.

Reason

Resulting in the continued use of a service provider without proper authorization.

53. Extension of lease agreement to accommodate ward councillors and the legislature at the ACA Krans Building Region B, R958,431.09.

Reason

Failure to include the Office of the Speaker into the new lease agreement and continuing to occupy the said premises without the approved lease agreement with the Landlord for the period of 01 August 2012 to 30 April 2013.

### 56. IRREGULAR EXPENDITURE (continued)

54. Extension of the service level agreement. Service provider BNP Capital and Goba (Pty) Ltd, R4,189,363.20.

Reason

The contract was extended for the period of three (3) months or until the budget is exhausted. 55. Appointment of the Organ of State. Service provider CSIR Meraka Institute, R275,000.00.

Reason

Appointment approved to undertake the development of the CoJ Smart City Strategic and Implementation plan.

56. Supply and installation of the workstations. Service provider Badiri ba Setshaba business enterprise, R61,490.09.

Reasor

Enable payment for approval by the City Manager.

57. Extension of the service level agreement. Service provider Exponant (Pty) Ltd, R1,014,000.00.

Reason

Enable payment for approval for six months until 31 October 2013.

58. Request for payment of Office Furniture and Equipment suppliers, Service provider, Imvelo Office Profile CC R873,231.81, Mukulu Library Furniture Manufactures, R222,452.76, Akanani Office Furniture Manufacturers, R556,291.50, Thuthuka Paper (Pty) Ltd R533,504.36.

Reason

Payment for the procurement of office furniture and equipment from Imvelo Office Profile CC, Mukulu Library Furniture Manufactures, Akanani Office Furniture Manufacturers, Thuthuka Paper (Pty) Ltd and Instant Office Furniture CC.

59. Request for payment to Insearch recruitment projects for a temporary driver/messenger. Service provider Insearch recruitment project, R120,000.00.

Reason

Authorises payment for the Insearch Recruitment Projects service rendered from 01 July 2012 to June 2013.

60. Approval of short term employment contracts with recruitment agencies for Administrative assistance. Service providers, Mandisa Human Capital, Vogue HR Services and Innovations Recruitment, R363,400.53.

Reason

Mandisa Human Capital, Vogue HR Services, Innovations Recruitment specialist for the administrative resources from 01 July 2012 to May 2013.

## **CORE - 2012**

- 1. Multilingual: service acquired without contract in place Ratification Approved, R141,215.00.
- 2. Events Galore: service incurred without valid order Awaiting ratification R66,883.00.
- 3. Tim Dollar Cleaning Service: no valid contract Awaiting ratification R52,150.00.
- 4. Butomi: procurement processes not followed (RFQ not done) Awaiting ratification R14,475.00.

Disciplinary steps/criminal proceedings: None

## 56. IRREGULAR EXPENDITURE (continued)

5. Approval to Appoint a Service Provider to Supply Operational Uniforms for Emergency Services using quotations, Service Provider Fine Fit Uniforms and Overall CC, Link Reflective and Protective Designs CC, Simon Setuke Distributors CC, R9,775,275.30.

Emergency Management Services has been unable to procure and issue uniforms to employees over the past three years and the situation reached levels where employees were de-motivated, threatening industrial action and at times report to work in civilian clothes. The issue of the lack and non-provision of uniform had already been a subject of the media through some disgruntled employees and may be used as a basis by labour representatives to incite industrial action. It is on this basis that EMS management approached the City Manager and the Executive Adjudication Committee to allow the process to solicit "quotation process" on the basis of the submissions that have been received during the tender process as the process to re-advertise would be lengthy.

6. Development Planning and Urban Management Building Control, Service Provider JT Ross Properties Services (Pty) Ltd, Lease per month R31,747.00, Operating Cost R8,159.00, 12 Covered Parking R4,549.00, 3 Open Parking Bays R732.00 and Rates and Services R1,293.00.

Reason

The Department Planning & Urban Management has been leasing unit 3, 4A and 5A including 12 covered parking bays and 3 open parking bays situated at 16 street, Alphen Square North, Midrand for the past 3 years. The Department requested a deviation to continue to use/lease the premises as the public is aware of the location of the offices and it has been constructed to accommodate the need of the department.

- Deviation from Supply Chain Management Processes Regarding the Extension of Contract No: A264 for the City of Johannesburg
  Website and News Agency During the Website Migration Project Implementation, Service Provider Dimension Data,
  - (i) Ratification: Reg 36(1)(b) 6 August to 5 September R367,891.66
  - (ii) Deviation: Regulation 36(1)(v) September 2011 to February 2012 R1,839,458.30.

Reason

The current contract for the hosting of the City's website expired on 5 August 2011. The user department requested that the contract be extended to facilitate migration of the website to the City's CIOG office. Sufficient lead times are required to implement the website migration project. The required extension will allow for the procurement of the required infrastructure, installation and hand over the implementation of the project.

8. Authorisation for Procurement of Catering for 500 People at the Funeral of the Late Mrs Albertina Sisulu, Service Provider Lapa La Rona Catering, R345,556.80.

Reason

Urgent requirement, it was impractical for the department to go out on tender.

- 9. Department of Economic Development, Liberty Life, R3,108,840.48.
- Approval of Payment for the Service Provider: Events Galore, Service Provider Events Galore Oasis Initiative and Tsutsumani In Alexandra R1,401,118.44, Marlboro and Alexandra Techno-Hub R3,987,856.80.
   Reason

(1) Quotations were solicited from a panel approved by the EAC: Proposal number A290C:Appointment of Consultants for the provisions of strategic marketing, administration on Events Management for the City of Johannesburg. The two companies recommended by the user department, are only awarded the items/services:

- Events Management
- Brand Management
- Communications

(2) The department awarded project management to the service provider Events Galore who was not allocated/awarded this item in the panel.

#### 56. IRREGULAR EXPENDITURE (continued)

 Request to Approve Variation/Scope of Work: Gas Expansion Strategy for the City of Johannesburg, Service Provider SAHA International (Pty) Ltd R141,600.00.

Reason

The Central Adjudication Committee awarded RFP A390 to SAHA International (Pty) Ltd on 10 November 2010 to develop the strategy for the expansion of natural gas in the City. While conducting these two of the project which was scoped in the original appointment, the Energy Sector (IS) realized that the scope of the project was limited and confines itself only to natural gas. Upon evaluating the risk, cost and opportunity cost of not including other gases in the current strategy, the Energy Sector was of the opinion that the scope of contract be increased to cover other gases rather than confine narrow the assignment to natural gas alone. A decision was taken to have the service provider evaluate the scope change and its impact thereof, which resulted in the increase in the original pricing of R951,200.00 with an additional R141,600.00 hence the request for the deviation under Regulation 36(1)(a)(v).

12. Engaging a service provider without following supply chain management procurement process, Service Provider Ulwaza Protection Services, R86,251,84.

Reason

- (1) There were councillors who were attacked and threatened to be attacked due to service delivery protests and a service provider was identified as a suitable service provider to undertake the risk assessment profile of two
- (2) of councillors of the City. Due to the urgency and sensitivity of the matter, it was therefore impractical or impossible for the City to go out for an open Bid process after the 2011 Municipal Elections.
- Enterprise resource planning frontline support services, Service Provider, Dimension Data, R528,000,00.
   Reason
  - During the transitional period for Contract: A387, previous service providers continued to provide services to the department even after the expiry of their contracts hence the request for the ratification.
- 14. Deviation from the Normal Procurement Processes for the Supply of Resources for a Call Centre, Service Provider EOH, R6,397,281.00.
- 15. Deviation from the Normal Procurement Processes for Enterprise Resource Planning Post Implementation Support and End-User Training, Service Provider EOH Mthombo (Pty) Ltd, R68,706,800.00.

The City entered into an agreement with EOH Mthombo (Pty) Ltd for the period 1 July 2010 to 30 June 2011 to render the Post Programme Phakama implementation support for the 1st and 2nd line ISU/CRM. The Contract came to an end on 30 June 2011 and there was a risk that the COJ SAP ISU/CRM end-users were not skilled enough to transcut on the SAP system without the assistance from the 1st line support consultants; hence the request for the extension of the contract of the service provider to continue to provide the specified specialist post implementation support for the 1st and 2nd line end user training.

Legal & Compliance, Service Provider Fem Power (a Division of the Workforce Group), R137,091.00.

Reason

The process to recruit and appoint a person in the position of City Manager was considered time consuming and the need existed to ensure a smooth transition, since the contract of the former City Manager was expiring at 30 September 2011. As at that time, there was no tender in place for the recruitment of senior executives in the City. The matter for the recruitment and appointment of the City Manager was considered special and urgent where it was impossible to follow the normal procurement process hence the request for deviation.

## 56. IRREGULAR EXPENDITURE (continued)

17. Request for Extension of Contract of Stratalign/Tokiso for the Facilitation of the Seat Allocation Working Group Talks (Talks about Talks with the Potential Operators for Phase 1B of Rea Vaya, Service Provider, StratAlign/Tokiso R1,205,760.00.

Reason

The EAC of 12 November 2010 approved the appointment of StratAlign/Tokiso to facilitate the initial preparatory talks about talks process for the determination of the business modes between the City and potential affected operators. This extension was to facilitate the further preparatory talks for phase 1B and bearing in mind the sensitivities of these talks about talks. This service provider has the detailed understanding and knowledge of the industry and the BRT process. Further the parties were asked who they would feel comfortable with and requested these service providers hence the request for a deviation, as it would be impractical for the City to go out on tender as the taxi industry has identified their choice of a service provider.

Transportation, Service Provider Putco Properties (Pty) Ltd, R1,636,014.00.
 Reason

During August 2009, the EAC authorised conclusion of a lease with Putco of its Nancefield bus depot for two years until 31 August 2011, pending construction of the Dobsonville Rea Vaya depot. As indications were that the Dobsonville depot would be ready by the end of April 2012 and that it would take about a month to move over from Nancefield, the EAC was prior to the existing lease with Putco during July 2011 asked for permission to w.e.f 1 September 2011 extend it by 9 months until the end of May 2012 at the agreed annually escalated (9%) rent of R181,779.30, plus VAT, per month.

19. Renewal of Taxi Storage Contract for 48 Taxis with "Bohlokoa", Service Provider Bohlokoa Outdoor Advertising (Pty) Ltd, R171,000,00.

Reason

This is for the storage of mini bus taxis which was required prior to the mini bus taxis being disposed of. The service provider was initially sourced on open tender. However as the tender needed to be extended since the process of disposal to look longer than anticipated due to the fact that some taxis had problems with their operating licenses and others still had HP amounts owing. The Transport Department working with the taxi industry have been working on solutions for these problems but at the time of this EAC request, 48 taxis still needed to be stored. It was impractical for the department to go out on competitive bidding process to finalise the assignment already undertaken and awarded to the service provider.

20. Transportation, Learncorp, Afrigis and BPS Capital, R1,434,145.00.

In a Memorandum of Understanding ("MOU") between the Taxi Industry and the City, the former Executive Mayor committed the City to: Provide the Taxi Industry with the human and material resources necessary for the industry to adequately and competently participate in the project. Assist with resources that ensure adequate consultation of the Taxi Industry on all aspects of the project. A similar Memorandum Of Agreement ("MOA") is to be signed with the present Executive Mayor and City Manager, wherein a similar commitment will be made. In the above MOA, the terms and conditions under which the POA's are able procure their own technical support are set out, including that, while there is a deviation from normal procurement processes, all other City procurement and payment processes must be adhered to.

21. Transportation, FOT Consulting CC, R359,600.00.

Reason

This was not approved by the EAC.

Group Annual Financial Statements for the year ended 30 June 2013

|                          | GROUP |      | CORE |      |
|--------------------------|-------|------|------|------|
| Figures in Rand thousand | 2013  | 2012 | 2013 | 2012 |

## 56. IRREGULAR EXPENDITURE (continued)

22. Transportation, Saha International SA (Pty) Ltd, R5,258,454.00.

Reason

Due to various delays in the implementation of the AFC system by TMT, inter alia the above-mentioned renegotiation of the AFC Main Agreement with TMT as a consequence of the Regulations promulgated by the national Department of Transport ("DoT"), Saha was unable to complete its agreed work scope at the time of the expiry on 18 August 2011 of its AFC Consultancy Services SLA with the City, which was previously extended from 2 to 3 years for the same reasons. It furthermore transpired that, once installation of the AFC System by TMT commences, professional assurance services would be required to ensure that the City is getting what is required by the NDOT regulations as Saha had assisted with the design of the AFC system and has the necessary institutional background and the procurement of another service provider capable of taking over from Saha would be too time consuming and cause even further delays, the extension was authorized by the EAC.

23. Chief Whip Office, Robby's Place Catering, R50,000.00.

Reason

No reasons provided.

24. Ratification of Actions of Department Community Development for Exceeding Value of the Carnival 2010 Programme and Request to Increase the Value, Service Provider Event Masters R172,532.95.

Reasons

- (1) The Community Development (Directorate Arts/Culture) processed a call for proposal under panel approved by the City, panel for the provision of strategic marketing services project management, administrators and event management services to manage the implementation of the 2010 carnival event.
- 2) However during the process of reconciling the invoices with payments made, it was established that the original budget of R2,000,000 has been exceeded by R172,532.95.
- 25. Corporate and Shared Services, Imbali Props 59 (Pty) Ltd, R6,720,300.00.

Reason

- (1) The former Region 9 Head Office (now Region F) is located at Eureka House in Springfield for the past 9 years. The previous 3 year lease agreement expired on 28 February 2011 and the City entered into a month to month lease until end June 2011 to allow Facility Management to complete a feasibility study to evaluate the suitability of the facility for the continued occupation by the Region (2) There are no other commercial buildings available within a radius of 5km from the current location. There are however suitable B grade facilities available within the CBS of Johannesburg but in most cases at high cost.
- 26. Planning Urban Management, Viking Pony Properties (Pty) Ltd, R301,251.00.

Reason

When the urban management model for the inner City was devised the quadrant approach was adopted. The Department region F faced complex challenges in its search for suitable office space to accommodate quadrant 1 and 2. After extensive research, suitable office space was identified at 137 Siverwright Avenue, new doornfontein to accommodate 20 staff members. If it would thus be impractical to undertake the entire exercise of identifying alternate office accommodation particularly with faults by management and maintenance having to take decision on the future of the region's corporate building which could impact on quadrant offices. It is therefore proposed that the lease agreement be extended for a period of twelve (12) months.

27. Extension for the Utilisation of the Sithole Human Capital, Service Provider, Sithole Human Capital R946,382.

Reason

Initial approval for work done was exceeded due to the amendment of the Strategy and this did not allow the department sufficient time to solicit additional funding and authorisation hence the request for deviation.

28. Transportation, Ernst & Young, R612,612.00.

Reason

No reasons provided.

Group Annual Financial Statements for the year ended 30 June 2013

## 56. IRREGULAR EXPENDITURE (continued)

 Extension of SAHA's AFC Consulting Services contract until installation of AFC System by TMT, Service Provider SAHA, R5,408,502.00.

Reason.

This motivation was taken to the EAC to report on the necessity to renegotiate the TMT AFC tendered contract after the publication of the Automated Fare Collection regulations by the National Department of transport and to seek permission to commence. It also addressed the necessity to contract ABSA outside of the banking agreement for a period of three years.

30. Extension of SAHA's AFC Consulting Services contract until installation of AFC System by TMT, Service Provider SAHA R586,135.85.

Reason

This is the deviation including a scope adjustment and it was impractical for the department to go out on tender.

31. Extension of Taxi Storage contract for 53 taxis with Bohlokoa (Pty) Ltd, Service Provider, Bohlokoa Outdoor Advertising (Pty) Ltd R63,380.

Reason

This is a further deviation in respect of the above. The number increased because some taxis that were repossessed by the banks were returned after the City paid the outstanding HP requirements, hence the request for the ratification as the vehicles were already stored at the same venue by the same service provider.

32. Extension of procurement of protection services at the Erstwhile and the newly elected executive mayors residences Service Provider, Zungizile protection services R175,050.03, R350,100,06 and R83,357,16 and R66,120.00.

Reason

Contract to provide Security Services to the residence of the Erstwhile Executive mayor and new Mayor extended due to the hand over period and pending finalization of a new procurement process to appoint a new service provider.

33. Public Liason, Thuso group T/A Thuso exhibition, R3,000,000.00.

Reason

No reasons provided.

34. Finance, Hunter Van Ryneveld (Pty) Ltd, R3,796,656.00.

Reason

No reasons provided.

35. JMPD, Nkonki Incorporated, R7,299,000.00.

Reason

No reasons provided.

36. Community Development (library and information services), Momentum Property Investments (Pty) Ltd, R132,063.00, Midrand Business Park (Halfway House Library), R448,140.00, Killarney Mall Properties (Pty) Ltd (Killarney Library), R95,278.00, Malvern Plaza CC (Malvern Library), R121,710.00.

Reason

No reasons provided.

37. Housing Department, Urban Dynamics Gauteng, R32,324,488.00.

Reason

No reasons provided.

38. Public Liason, Gear House South Africa, R475,900.00, The Moving Billboards Picture Co, R175,000.00.

Reason

No reasons provided.

## 56. IRREGULAR EXPENDITURE (continued)

39. Community development (Library and information services), Universal Knowledge Software, R5,540,913.00.

Reason

No reasons provided.

40. Appointment of a service provider for temporary staff for the Billing Management Department, Service Provider, Mandisa Personnel CC, R481,536.00.

Reason

When the procurement process to appoint a Recruitment Agency commenced, it was established that the contract expired and that Corporate and Shared Services (Human Resources Shared Services) commenced with the tender process but that the process was not finalised. Due to the lengthy process of finalising the tenders, awarding a contract as well as the urgency of dealing with the Auditor General matters, Revenue and Customer Relations Management made a decision to obtain three quotations from an expired contract hence the request for a ratification.

41. Payment of the Service Provider: Netgen for Upgrade of the City's Waste Information System during 2010/2011 Financial Year, Service Provider Netgen R184,942.00.

Reason

All procurement process followed, however there was an oversight from the user department to obtain the signature from the delegated official in terms of SCM delegations to approve the appointment and therefore the service provider was engaged without proper authority, hence the request for a ratification.

42. Corporate Shared and Services, CEZ Investment CC, R8,012,544.00.

Reason

No reasons provided.

43. Accommodation-Health Department, Region B, Auckland Park period 3 years, service provider, ACA Krans Trust R2,661,815.52.

The Health Department has eastablished its offices at 35 Symons Road, Auckland Park over the period of 8 years and the public and the suppliers have been using the premises to engage with the Department, hence the request for a deviation to extend the lease for those premises as it is impractical to go out on tender on the same building.

44. Appointment of Events Galore Once off payment, Service provider Events R53,547.00.

Reason

Service Providers scope of work extended to cover the emergencies that occurred as a result of demonstrations by communities.

45. Appointment of Technical Support to Phase 1A BRT Mini-Bus Taxi Operators Owned Investment Companies (TOIC's) Once off payment, Service Provider FOT Consulting R154,400.00.

Reason

Extension of the original scope of work done by FOT.

46. Appointment of Gil Penelosa from "8-80 Cities" to Conduct a series of "Street Alive" Workshops for Transport Officials, Key Stakeholders and Members of the Public. Once off payment, Service provider Mr Gil Penelosa R151,864.00.
Reason

The City's Transport department has adopted the "Streets Alive" programme as part of its goals of transforming the way transport programmes are implemented in communities. The Street Alive programme is in line with the City's 2040 GDS strategy, which aims to transform Johannesburg into an African City that provides quality of life for it's citizens.

## 56. IRREGULAR EXPENDITURE (continued)

47. Accommodation - Shareholders Unit, Service Provider Kuper Leigh Property Management Pty Ltd R1,819,041.17,
Reason

The Shareholders Unit lease at Parktown was extended on a month to month basis for a period of 3 years whilst the department awaits the outcome of the institutional design.

48. Accommodation - Corporate and Shared Services, Service provider Life Properties R11,905,710.24,

The Finance Department lease at 66 Jorissen Street was extended on a month to month basis for a period of 12 months as the department was awaiting the consolidation strategy championed by Group Corporate and Shared Services.

49. Approval of Payment of the Service Provider: Turncard Trading 111 (Pty) Ltd for Bruma Lake Bioremediation Project, Service Provider: Turncard Trading 111 (Pty) Ltd R199,785.00.

Reason

The Procurement Process relating to the advertisement of quotations on the Notice Board was followed however: The service provider was engaged without the appointment report being signed by Director SCM in terms of her SCM delegation, hence the request for a ratification

50. Approval of Payment of the Service Provider, Kaleo Consulting, for the Facilitation of the GDS Environmental Week Session, Service provider Kaleo Consulting R96,843.00.

Reason

The GDS Co-Ordinating Committee through the Central Strategy Unit was mandated to source services for all department for the outreach process. However this could not materialise due to the short notice given and therefore Individual departments were only advised to source their services directly. This was only after the consumption of such services. Hence the request for a ratification.

51. New Lease Agreement at Traduna Centre Braamfontein, service Provider Kovacs Investment R18,449,540.00.

Reason

In terms of the institutional Review Process (IRP), the Infrastructure Services Department and Environmental Management Services Department have integrated. This has resulted in the extension of the lease at Tradunabeing extended to accommodate the integration of the two departments. Hence the request for a deviation.

52. Baseline Increase: Current Microsoft Enterprise Agreement, Service Provider, Microsoft, R3,449,089.01.

Reason

Sole provider of Microsoft Software.

53. Approval of payment of the Service Provider, Manenzhe Hygiene Solutions, Service Provider, Manenzhe Hygiene Solutions, R72,000.00.

Reason

Revenue and Customer Relations Management utilised the services of Manenzhe Hygiene Solution from FMMU approved (Contract 144/08) Panel of Service Providers to provide services to the City of Johannesburg. This contract expired in March 2012 but the department continued to untilise the service provider for a period of three months (April to June), as these services could not be discontinued as it was going to pose a health risk to call centre staff and management.

54. Approval of Payment of Service Provider: Steiner Hygiene, Service Provider Steiner Hygiene R80,401.60.

Reason

Revenue and Customer Relations Management utilised the services of Steiner Hygiene from FMMU approved Contract 176/08), which expired on the 31 September 2011. This service could not be discoontinued as it was going to pose a health risk to call centre staff and management. Hence the ratification for approval of payment.

#### 56. IRREGULAR EXPENDITURE (continued)

55. Request for subscribing to HIS Information & Insight (Global Insight) Pty and Quantec Research (Pty) Ltd Service Provider HIS Information & Insight (Pty) Ltd (Global Insight) R49,590.00 and Quantec Research (Pty) Ltd R69.084.00.

Reason

Sole Provider of Regional Explorer (Rex) Database and EasyData.

56. Approval of Payment of Service Provider: Steiner Hygiene R151,044.00.

Reason

Community Development (Art Culture and Heritage) utilised the services of Steiner Hygiene from FMMU approved (Contract 176/08) Panel of Service Providers to provide Cleaning Services to the City of Johannesburg, that later expired and R&CRM informed FMMU but response was not clear whether the contract would be renewed by FMMU. This service could not be discontinued as it was going to pose a health risk to the museum staff and public, hence the ratification for approval of payment.

57. Approval of Payment of the Service: Request to appoint Events Galore to Facilitate a Strategic Breakaway of the Private Office of the Executive Mayor 13-14, Service Provider Events Galore, R127,442.70.

Reason

The private Office of the Executive Mayor followed the normal procurement process in terms of soliciting three quotations from a approved panel, but however the adjudication report was not submitted to the Director: SCM for consideration/approval prior to the engagement of the supplier. Hence the ratification for approval of payment.

58. Ratification of Actions on contract 207/08: The Supply and Delivery of Weekday and Weekend Newspapers to the City. Service Provider Continent Transport Services R241,642.54.

Reason

Service were rendered after the expiry and within the transition to the new contract which came into effect in January 2012. the amount of R241 642.54 was for the services rendered in December 2011. Hence the ratification for approval of payment.

 Approval of Payment of Printing for the Notifications to Property Owners of Supplementaries as printed in Supplementary Valuation roll 9 for the period, 2 January 2012 to 23 April 2012, Service Provider Mailtronic Direct Marketing CC R463,002.15.
 Reason

The Sec 49 notification from the supplementary valuation Roll 9 needed in terms of urgency to be posted with the monthly statements, hence Mailtronic Direct Media cc, the current service provider for the posting of monthly statements was requested to include in those statements the section 49 notification. Unfortunately due to urgent nature of the requirement no price approval was obtained. Hence the ratification for approval.

60. Extension of the existing Lease Agreement for a further period of three years relating to Office Accommodation at 222 Smit Street, Braamfontein, Service Provider Broll Property Management Company R11,301,848.02.

Reason

The Housing Department has established its offices at 222 Smit Street, Braamfontein the public and the suppliers has been using the premises to engage with the Department, hence the request for a deviation to extend the lease for those premises as it is impractical to go out on tender on the same building.

61. Extension of the existing Lease Agreement, Service Provider ACA Krans R314,094.51.

Reason

FMMU has established its offices at 222 Smit Street, Braamfontein the public and the suppliers has been using the premises to engage with the Department, hence the request for a deviation to extend the lease for those premises as it is impractical to go out on tender on the same building.

## 56. IRREGULAR EXPENDITURE (continued)

62. Deviation and Ratification of actions of Community Development in Relation to the services and period of operation Service Provider Steiner Hygiene, R240,000.00.

#### Reason

The user department engaged the service provider under contract 176/08 approved by the city, however the contract expired in October 2011 and the user department continued to utilised the services of Steiner Hygiene from the period February to July 2012 as discountinuing these services would have posed a serious health risks.

63. Extension of the existing Lease Agreement, Service Provider Liberty Life Properties (Pty) Ltd R751,786.78.

The department had requested permission to reside in Jorissen Place from 1st January 2012 to 31 December 2012, being the period which an alternative accommodation would be sourced.

## 59. DEVIATION FROM SUPPLY CHAIN MANAGEMENT REGULATIONS

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the group annual financial statements.

In terms of Section 36 (2) of the supply chain management regulation.

Johannesburg Tourism Company (Pty) Ltd

- 1. Procurement during the year under review amounting to R681,754.65 as a result of deviations from the Supply Chain manage ment policy. The deviations were documented and approved as per the normal supply chain management regulations.
- Lack of required quotations as per the Supply Chain Management Policy and Procedures, transactions amounting to R318, 719.05
  relating to Courier IT (courier services), Hamba Nathi (travel bookings) and WSE Stone Consulting (International Marketing Strategy
  Development for the City Of Johannesburg.

### CORE

1st Quarter Deviations.

1. Approval of the Payment of the service provider: Tim Dollar Cleaning Service, R30,000.00.

Stakeholder Relationship Management utilised an expired contract. This contract expired in March 2012 but the Department continued to utilise the service provider until 30 April 2012, as these services could not be discontinued as it was going to pose a health risk to Ward Councillors Offices. Hence the ratification for approval of payment.

2nd Quarter Deviations.

 Renewal of Bona Electronic Solutions Capital Contracts. Service Provider Bona Electronic Solutions, R10,999,689.78 and R10,121,086.96.

Reason

The contractor could not commence work on Rea Vaya Phase 1B due to various delays beyond its control with the finalisation of Rea Vaya Phase 1A, and was paid only portions of the total contract prices. Both its contracts were renewed without any additional budget in order to enable it to continue with its work until completion.

#### 60. HEDGING ACTIVITIES

During the financial year 2010/2011, CJMM entered into an interest rate swap by exchanging the Nedbank R1 billion 3 months JIBAR rate + 280 bsp for a 11.66% fixed interest rate.

#### Swap Details

Trade Date: 30 March 2011
Settlement Date: 29 March 2018
Nominal Amount: R 1,000 (million) Fixed

Rate: 11.66% Payable: Semi- annual

The swap was designated as a cash flow hedge in accordance with IAS 39.88 and the actual hedge relationship was measured as 100% effective as it was between the effective range of 80% - 125% and thus the full portion of the loss on the hedging instrument shall be recognized in other comprehensive income in the statement of financial performance.

The hedge effectiveness was assessed using the following method:

• Dollar - Offset Method 108%

Note that the SWAP value presents the clean fair value as at 28 February 2013. (All inclusive price less any SWAP interest accrual outstanding).

#### SWAP market-to-fairvalue as at 30 June 2013

#### 61. CASH MANAGEMENT

During the 2013 financial year the City of Johannesburg had cash losses due to fraudulent activities amounting to R 0,281 million (2012: R 0,497 million). The losses incurred involve both internal fraud by staff members and banking's made which were never credited to our bank account. Management is in the process of prosecuting personnel implicated in fraudulent activities and/or in dereliction of duty. The process of recovering losses incurred through fraudulent activities by staff will follow the outcome of the disciplinary process now underway. The process of recovering deposits not credited (long-outstanding deposited) had been commenced. The gross losses for the year amounted to: R0, 281 million.

During the 2012/2013 financial year, Community Development incurred two cash losses incidents amounting to R0, 022 million. The loss incurred involves both burglary and banking's made which does not agree to the takings. Management and JRAS are in the process of investigating if any fraudulent activity was committed by staff. The burglary was reported to the police, and an internal investigation is also underway. The gross losses for the year amounted to: R0, 022 million

#### 63. CHANGE IN ESTIMATE

#### Property, plant and equipment

In terms of GRAP 17, the depreciation method applied to assets shall be reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method shall be changed to reflect the changed pattern.

For the current year under review the useful life of property, plant and equipment remained unchanged.

#### Intangible assets

In terms of GRAP 102, the amortisation period and the amortisation method for intangible assets with a finite useful life shall be reviewed at least at each reporting date. If the expected useful life of the asset is different from previous estimates, the amortisation period shall be changed accordingly. If there has been a change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the amortisation method shall be changed to reflect the changed pattern.

For the current year under review the useful life of intangible assets remained unchanged.

#### 64. AWARDS TO CLOSE FAMILY MEMBERS OF PERSONS IN THE SERVICE OF THE STATE

During the year under review the municipality has given the following awards to a person who is either a spouse, child or parent of a person in the service of the state or has been in the service of the state for the previous twelve months.

| Name of the person (Service of the State) | Capacity               | Name of the person/<br>company award  | Name of company                     | Amount  |

# **Chapter 6**

# REPORT OF THE AUDITOR-GENERAL TO THE GAUTENG PROVINCIAL LEGISLATURE AND THE COUNCIL ON THE CITY OF JOHANNESBURG METROPOLITAN MUNICIPALITY

#### REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

#### Introduction

1. I have audited the consolidated and separate financial statements of the City of Johannesburg Metropolitan Municipality set out on pages xx to xx, which comprise the consolidated and separate statement of financial position as at 30 June 2013 and the consolidated and separate statement of financial performance, statement of changes in net assets, cash flow statement, statement of comparison of budget and actual amounts for the year then ended, and the notes comprising a summary of significant accounting policies and other explanatory information.

#### Accounting officer's responsibility for the financial statements

2. The accounting officer is responsible for the preparation and fair presentation of these consolidated and separate financial statements in accordance with South African Standards of Generally Recognised Accounting Practice (SA Standards of GRAP) the requirements of the Municipal Finance Management Act of South Africa, 2003 (Act No. 56 of 2003) (MFMA) and Division of Revenue Act of South Africa, 2011 (Act No. 6 of 2011) (DORA), and for such internal control as the accounting officer determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor-general's responsibility

- 3. My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA), the general notice issued in terms thereof and International Standards on Auditing. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.
- 4. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.
- 5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

#### Opinion

6. In my opinion, the consolidated and separate financial statements present fairly, in all material respects, the financial position of the City of Johannesburg Metropolitan Municipality (municipality) and its entities as at 30 June 2013, and their financial performance and cash flow for the year then ended in accordance with SA Standards of GRAP and the requirements of the MFMA and DORA.

#### **Emphasis of matters**

7. I draw attention to the matters below. My opinion is not modified in respect of these matters.

#### Significant uncertainties

8. As disclosed in note 51 to the consolidated financial statements, the municipality and its entities are the defendants in various lawsuits. The ultimate outcome of these matters cannot currently be determined and reliably measured, therefore no provision for any liabilities that may result has been made in the financial statements.

#### Restatement of corresponding figures

9. As disclosed in note 52 to the consolidated financial statements, the corresponding figures for 30 June 2012 have been restated as a result of errors discovered during the year ended 30 June 2013.

#### Material impairments

10. As disclosed in note 10 to the consolidated financial statements, receivables have significantly been impaired. The impairment of receivables amounts to R14 440 605 000 (2012: R13 360 488 000), which represents 75% (2012: 71%) of consumer debtors. The contribution to the provision for debt impairment in the current year was R1 080 117 000 (2012: R2 869 675 000).

#### Material losses

- 11. As disclosed in note 53 to the consolidated financial statements, material losses to the amount of R2 144 771 000 (2012: R1 554 360 000) were incurred as a result of electricity distribution losses. The total technical losses incurred amounted to R754 332 (2012: R709 461). Non technical losses of electricity incurred amounted to R1 390 439 000 (2012: R844 899 000) and are due to non-metering of electricity and unauthorised consumption.
- 12. As disclosed in note 53 to the consolidated financial statements, material losses amounting to R820 600 000 (2012:R769 300 000) were incurred as a result of water distribution losses. The total technical losses incurred amounted to R389 004 152 (2012: R374 806 920). Non technical losses amounted to R431 600 000 (2012: R443 800 000) and are due to non-metering of water and unauthorised consumption.

#### Restructuring of entities

13. As disclosed in note 18 to the consolidated financial statements, the municipality finalised the process of re-structuring some of the functions conducted through its municipal entities. This process will result in the legal deregistration of some of the municipal entities.

#### Additional matter

14. I draw attention to the matter below. My opinion is not modified in respect of this matter.

#### Unaudited supplementary schedules

15. The supplementary information set out on pages xx to xx does not form part of the consolidated financial statements and is presented as additional information. I have not audited these schedules and accordingly I do not express an opinion thereon.

# REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS PAA REQUIREMENTS

16. In accordance with the PAA and the general notice issued in terms thereof, I report the following findings relevant to performance against predetermined objectives, compliance with laws and regulations and internal control, but not for the purpose of expressing an opinion.

#### Predetermined objectives

- 17. I performed procedures to obtain evidence about the usefulness and reliability of the information in the annual performance report as set out on pages xx to xx of the annual report.
- 18. The reported performance against predetermined objectives was evaluated against the overall criteria of usefulness and reliability. The usefulness of information in the annual performance report relates to whether it is presented in accordance with the National Treasury's annual reporting principles and whether the reported performance is consistent with the planned objectives. The usefulness of information further relates to whether indicators and targets are measurable (i.e. well defined, verifiable, specific, measurable and time bound) and relevant as required by the National Treasury Framework for managing programme performance information (FMPPI). The reliability of the information in respect of the selected programmes is assessed to determine whether it adequately reflects the facts (i.e. whether it is valid, accurate and complete).
- 19. The material findings are as follows:

Usefulness of information

Presentation

Measures taken to improve performance not disclosed Consistency

20. Section 46 of the Municipal Systems Act (MSA) requires disclosure in the annual performance report of measures taken to improve performance where planned targets were not achieved. Measures to improve performance for a total of 44% of the planned targets not achieved by the municipality were not reflected in the annual performance report. This was due to the fact that management was not able to apply the requirements of the FMPPI due to capacity constraints.

#### Changes to indicators not approved

21. Section 25(2) of the MSA determines that an integrated development plan adopted by a municipal council may be amended in terms of section 34 and remains in force until an integrated development plan is adopted by the next elected council. Therefore, if the integrated development plan is changed during the year this process has to take place in accordance with the process as prescribed per section 34 of the MSA. A total of 31% of indicators relating to Economic Growth cluster of the municipality were changed during the-year without following the process as prescribed in section 34 of the MSA. This was due to a lack of management review and monitoring of compliance with applicable laws and regulations governing predetermined objectives.

#### Measurability

Performance targets not specific

22. The FMPPI requires that performance targets be specific in clearly identifying the nature and required level of performance. A total of 39% of the targets relating to Sustainable Services were not specific in clearly identifying the nature and the required level of performance. This was due to the fact that management was not able to apply the requirements of the FMPPI due to capacity constraints.

#### Performance Indicators/measures not well defined

23. The FMPPI requires that indicators/measures should have clear unambiguous data definitions so that data is collected consistently and is easy to understand and use. A total of 25% of the indicators and targets relating to Sustainable Services cluster of the municipality were not well defined in that clear, unambiguous data definitions were not available to allow for data to be collected consistently. This was due to the fact that management was not able to apply the requirements of the FMPPI due to capacity constraints.

#### Performance targets not measurable

24. The FMPPI requires that performance targets be measurable. With regards to PIKITUP Johannesburg SOC Ltd the required performance could not be measured for a total of 27% of targets relevant to upgrading of landfill sites, extension of landfill airspace and regular domestic waste collection. This was due to management not implementing all required FMPPI prescripts.

#### Reliability of information

- 25. The FMPPI requires that institutions should have appropriate systems to collect, collate, verify and store performance information to ensure valid, accurate and complete reporting of actual achievements against planned objectives, indicators and targets. 26. With regards to Johannesburg Metropolitan Bus Services SOC Ltd material targets with respect to Finance, Customer Perspective and Growth and Safety and Security objectives were not reliable. The evidence provided to support performance information reported was not adequate. 27. This was due to the lack of standard operating procedures for the accurate recording of actual achievements and frequent review of validity of reported achievements against source documentation.
- 26. With regards to Johannesburg Metropolitan Bus Services SOC Ltd material targets with respect to Finance, Customer Perspective and Growth and Safety and Security objectives were not reliable. The evidence provided to support performance information reported was not adequate. 27. This was due to the lack of standard operating procedures for the accurate recording of actual achievements and frequent review of validity of reported achievements against source documentation.

#### Additional matters

28. In addition to the above material findings, I draw attention to the following matters and these do not have an impact on the predetermined objective findings reported above.

#### Achievement of planned targets

- 29. Of the total number of 162 targets planned for the year, 71 targets were not achieved by the municipality during the year under review. This represents 44% of the total planned targets that were not achieved during the year under review. This was mainly due to the fact that indicators and targets were not suitably developed during the strategic planning process.
- 30. Of the total number of 56 targets planned for the year, 23 targets were not achieved during the year under review for City Power Johannesburg SOC Ltd. This represents 42% of total planned targets that were not achieved during the year under review .This was as a result of the entity not considering the evidential requirements during the annual strategic process.
- 31. Of the total number of 24 targets planned for the year, nine were not achieved during the year under the review for Johannesburg Water SOC Ltd. This represents 37% of total planned targets that were not achieved during the year under review. This was mainly due to the fact that indicators and targets were not suitably developed during the strategic planning process.
- 32. Of the total number of 18 targets planned for the year, six targets were not achieved during the year under review for PIKITUP Johannesburg SOC Ltd. This represents 33% of total planned targets that were not achieved during the year under review. This was as a result of the institution not considering relevant systems and evidential requirements during the annual strategic planning process.

- 33. Of the total number of 26 targets planned for the year, 14 of targets were not achieved during the year under review for Johannesburg Metropolitan Bus Services SOC Ltd. This represents 54% of total planned targets that were not achieved during the year under review. This was due to reduced number of bus trips due to aging fleet.
- 34. Of the total number of 31 targets planned for the year, seven targets were not achieved during the year under review for Johannesburg City Parks Soc Ltd. This represents 23% of total planned targets that were not achieved during the year under review. This was as a result of the institution reprioritisation of the budget during the year under review.
- 35. Of the total number of 21 targets planned for the year, five targets were not achieved during the year under review for Johannesburg Property Company SOC Ltd. This represents 24% of total planned targets that were not achieved during the year under review. This was mainly due to the fact that indicators and targets were not suitably developed during the strategic planning process.
- 36. Of the total number of 41 targets planned for the year, 20 targets were not achieved during the year under review for Johannesburg Road Agency SOC Ltd. This represents 49% of total planned targets that were not achieved during the year under review. This was as a result of the institution reprioritisation of the budget during the year under review.

#### Material adjustments to the annual performance report

37. Material audit adjustments in the annual performance report of the municipality were identified during the audit, all of which were corrected by management.

#### Compliance with laws and regulations

38. I performed procedures to obtain evidence that the entity has complied with applicable laws and regulations regarding financial matters, financial management and other related matters. My findings on material non-compliance with specific matters in key applicable laws and regulations as set out in the general notice issued in terms of the PAA are as follows:

#### **Budget**

- 39. Expenditure was incurred in excess of the limits of the amounts provided for in the votes of the approved budget, in contravention of section 15 of the MFMA.
- 40. The total unforeseen and unavoidable expenditure incurred exceeded R15 million in contraventions of Municipal Budget and Reporting Regulation 72. Annual financial statements
- 41. The financial statements submitted for auditing were not prepared in all material respects in accordance with the requirements of section 122(1) of the MFMA. Material misstatements of revenue, receivables and property, plant and equipment identified by the auditors in the submitted financial statements were subsequently corrected, resulting in the financial statements receiving an unqualified audit opinion.

#### Assets management

42. An adequate management, accounting and information system which accounts for assets was not in place, as required by section 63(2) (a) of the MFMA.

#### Procurement and contract management

- 43. Contracts and quotations were awarded to bidders who did not submit a declaration on whether they are employed by the state or connected to any person employed by the state, as required by National Treasury's Municipal Supply Chain Management regulation (SCM regulation) 13(c).
- 44. Awards were made to providers who are in the service of other state institutions or whose directors/ principal shareholders are in the service of other state institutions, in contravention of section 112(j) of the MFMA and SCM regulations 44. Similar awards were identified in the prior year and no effective steps were taken to prevent or combat the abuse of the SCM process in accordance with SCM regulation 38(1).

- 45. Goods and services with a transaction value of below R200 000 were procured without obtaining the required price quotations as required by SCM regulation 17(a) & (c).
- 46. Goods and services of a transaction value above R200 000 were procured without inviting competitive bids, as required by SCM regulation 19(a). Deviations were approved by the accounting officer even though it was not impractical to invite competitive bids, in contravention of SCM regulation 36(1).

#### Expenditure management

47. Money owing by the municipality was not always paid within 30 days of receiving an invoice or statement, as required by section 65(2)(e) of the MFMA.

#### Leadership

48. The accounting officer did not adequately exercise oversight responsibility regarding financial and performance reporting. The municipality did not have sufficient monitoring controls to ensure that financial and performance reports submitted for audit are accurate and complete.

#### Financial and performance management

49. There is lack of proper record management system that provides for the maintenance of information reported in the financial statements and performance reporting. Non-compliance with laws and regulations such as the MFMA, SCM regulations and MSA regulations could have been prevented had compliance been properly reviewed and monitored.

#### **OTHER REPORTS**

#### Investigations

50. Twenty cases of alleged irregularities were being investigated. Five of these were conducted by external investigators and the remainder were investigated by the forensic section of the municipality's internal audit division during the 2012-13 financial year. Of these, three have been finalised. The nature of the cases covered a wide spectrum of activities, namely, bribery, theft, financial corruption, tender irregularities and various other issues.

Johannesburg

14 December 2013

Auditing to build public confidence

| Corporate and Shared Services                | Public participation and oversight over the IDP, budget<br>and by-law processes of the Department of Corporate<br>and Shared Services.                           |
| Standing committees                          |  |
| Municipal Public Accounts Committee          | Political oversight over financial management and value for money in the City.   |
| Rules Committee                              | Review over amendments to the membership/s to council and its committees and review of a local/internal legislation (processes, policies, standing rules, etc.). |
| Oversight Committee on the Legislature       | Public participation and oversight over the IDP, budget and by-law processes of the legislative arm of Council.  |
| Gender Youth and People With Disability      | Public participation and oversight over the IDP, budget and by-law processes of programmes that target designated groups.  |
| Mayoral Committees                           | Sub-Mayoral clusters are established to assist the Mayoral Committee in fulfilling its executive or strategic function.  |
| Ethics and Disciplinary                      | Resolution over breaches in the code of conduct for municipal employees and councillors.   |
| Petitions and Public Participation Committee | Managing the city's petitions systems and oversight over legislated public consultation processes  |

## Appendix C: List of Municipal Entities

| Entity                                       | Function  |
|--|---|
| City Power                                   | City Power is responsible for electricity supply and therein, contributes to improved quality of life. It further educates customers about the safe use of electricity, participates in renewal projects that empower entire communities, and provides and maintains the public lighting that reduces crime and keeps communities safe.                                     |
| Johannesburg City Parks                      | City Parks is responsible for developing and maintaining all city parks, open spaces, cemeteries and conserved areas.   |
| Joburg Theatre Company                       | The Joburg Theatre is Africa's leading provider of live entertainment, presenting world-class international and home-grown theatre. It is responsible for providing venues where performing arts professionals and amateurs alike can showcase their work.  |
| Johannesburg Development Agency (JDA)        | JDA is responsible for stimulating and supporting area-based economic development initiatives throughout the Johannesburg metropolitan area in support of the long-term Growth and Development Strategy (GDS).  |
| Johannesburg Fresh Produce Market (JFPM)     | JFPM is South Africa's major centre for the marketing of fresh produce. It is also the largest fresh produce market in Africa. It deals in fruit, vegetables, meat, fish and general groceries, most of them on sale to the public at wholesale prices.   |
| Johannesburg Property Company (JPC)          | JPC is responsible for property development; alienation of the Greater Johannesburg Metropolitan Council properties; property management services; and all associated ancillary services. The company develops and manages Council-owned properties for the purpose of maximising both social and commercial opportunities for the Council in the short and longer term.    |
| Johannesburg Social Housing Company (Joshco) | Joshco provides and manages affordable rental housing stock for the lower income market as part of its contribution to eradicating the housing backlog.   |
| Johannesburg Roads Agency (JRA)              | JRA is responsible for the design, maintenance, repair and development of Johannesburg's road network and stormwater infrastructure, including bridges and culverts, traffic lights and signage.  |
| Johannesburg Tourism Company                 | JTC is a destination marketing organisation, dedicated to promoting tourism growth in Johannesburg and to promote Johannesburg as a business, lifestyle, and sport and leisure destination, both locally and internationally.   |
| Johannesburg Water (JW)                      | JW is mandated to provide water and sanitation services to the residents of Johannesburg. It supplies water and sanitation services to an area stretching from Orange Farm, in the south of Johannesburg, to Midrand in the north, Roodepoort in the west and Alexandra in the east. It operates in six regions with 10 network depots and six wastewater treatment plants. |
| Johannesburg Zoo                             | Johannesburg Parks and Zoo is responsible for the accommodation, enrichment, and husbandry and medical care of wild animals. The Johannesburg Zoo also offers a variety of educational and entertainment programmes.  |
| Metrobus                                     | Metrobus is responsible for providing customer-friendly public bus transport within greater Johannesburg.   |
| Metro Trading Company                        | Metro Trading Company is responsible for informal traders and taxis, giving developmental support to the sector and managing the facilities the City has set aside for micro retailers and taxi operators.  |
| Pikitup                                      | Pikitup is responsible for keeping the city clean and preserving an attractive and hygienic environment for residents and visitors.   |
| Roodepoort Theatre                           | Roodepoort Theatre is responsible for providing a venue where performing arts professionals and amateurs alike can showcase their work.   |
