About this report

Statutory Annual Reporting Process

The Local Government: Municipal Finance Management Act 56 of 2003 (the 'MFMA'), the Municipal Systems Act 32 of 2000 (in section 46) and the National Treasury's MFMA Annual Report Circular 63, require the City of Johannesburg ('the City' or 'CoJ') and its municipal entities to prepare an annual report for each financial year covering both financial and non-financial performance aspects. The report is informed by the guidelines provided by National Treasury in MFMA Circular 63.

This report comprises six (6) chapters, namely:

- Chapter 1: Forewords and Executive Summary
- Chapter 2: Governance
- Chapter 3: Service Delivery Performance
- Chapter 4: Organisational Development Performance
- Chapter 5: Financial Performance
- Chapter 6: Audit and Oversight Matters
- Annexures

Online Referencing

The City of Johannesburg's 2018/2019 Integrated Annual Report is available on the City's website: <u>www.joburg.org.za</u>.

Scope and Boundary of the Integrated Report

This report relates to the integrated performance of the City of Johannesburg for the period 1 July 2018 to 30 June 2019. The Integrated Report will be considered by the Council in January 2020.

Feedback

The City of Johannesburg aims to establish and maintain constructive and informed relations with its stakeholders. You are invited to give feedback on this report to Ms Hlulani Chauke (e-mail: <u>hlulanic@joburg.org.za</u>).

Assurance

The integrity of the Integrated Annual Report is overseen by the City's independent oversight committees (i.e. the Group Performance Audit Committee and Group Audit Committee) and the City's Municipal Public Accounts Committee (MPAC). Furthermore, the Auditor-General of South Africa has audited the City's reported financial and non-financial performance.

CHAPTER 1: FOREWORDS AND EXECUTIVE SUMMARY

1.1 Executive Mayor's Foreword

Service Delivery Performance

While the 2017/18 financial year signalled the beginning of a new chapter for the City of Johannesburg - the multi-party government passed its own, full year budget - the current financial year under review was one in which we made good on our promises to the City's more than 5 million residents.

With the 2018/19 budget, we continued with directing substantial resources away from noncore expenditure items towards service delivery related infrastructure projects. In fact, 71% of this year's budget was allocated towards capital projects that would improve service delivery.

As always, challenges will remain, but the single-mindedness of the multi-party government in ensuring that we transform the lives of ordinary residents by bringing real, meaningful change meant that these challenges were not insurmountable. Through this singlemindedness and determination, we have once again ensured that the City is in the best financial position it has ever been, as seen by the City's cash position at the closing of the financial year under review. This improved performance should be credited to stable management, courtesy of the City Manager, Dr Ndivhoniswani Lukhwareni and his entire senior management team.

The one area wherein a new approach is beginning to bear fruit, is in housing, specifically during the year under review. However, there are challenges in this area, which unfortunately will remain with us for the foreseeable future. Although conservatively estimated at more than 300 000 units, our housing backlog surely has surpassed this mark, leading to even more people seeking refuge in several informal settlements throughout the City. Therefore, our approach to tackling the housing issue in the City has had to go against the grain of what has taken place over the last 25 years, in South Africa. Among several other priorities, housing is an area that will require a substantial cash injection from National Government, in the medium to long term, if we are to satisfy ourselves that we are making headway in this area.

The City is still faced with a significant infrastructure backlog, which is steadily being addressed through a pro-poor budget that prioritises service delivery related capital projects, such as the R160 million rehabilitation of the M2 Highway Bridge which was re-opened in

October 2019. This infrastructure, however, continues to come under the strain of worsening in migration of approximately 3000 people a month.

Our ambitious Inner-City Rejuvenation Programme - aimed at turning the Joburg Inner City into a construction site - offers hope to the thousands of residents in desperate need of housing, especially near economic opportunities. This programme is centred on the City taking over ownership of hi-jacked, abandoned and dilapidated buildings in the Inner City, and offering them to private developers. This is a process that went through open tender for redevelopment into low-cost housing, cheaper student accommodation and affordable rental space for small businesses.

In 2018/19, 27 awards were made to investors for the inner city programme. This translates to 91 inner city properties having been released to private sector for redevelopment, with a lease value amounting to R1 691 billion. An additional 70 properties were expected to be put out to tender in September and October 2019. While we look forward to more success arising out of the Inner-City Rejuvenation Programme, we understand that, in order to convince more people to adopt the Inner City as a place to live, work and play once again, we must restore the Rule of Law.

With our first adjustment budget in early 2017, the JMPD recruited 1 579 new officers to bolster the number of police on our streets. This was especially important considering that the City only had 700 officers patrolling at any given time. While these cadets completed their training in the year under review, the first group of 1085 officers are expected to be on active duty by the beginning of January 2020, with the remaining cohort set to join in the second half of the year.

Despite this, JMPD was able to make major inroads in dealing with crime and lawlessness in the Inner City and beyond. A large part of this success can be attributed to the JMPD's K-9 unit, which has been successful in undoing several drug networks throughout various parts of the City. In May 2019, the City launched a new anti-crime initiative using surveillance cameras in the Inner City.

More than 400 CCTV surveillance cameras are now operating in the Joburg Inner City to clamp down on escalating crime. The cameras are watched over by more than 100 agents in this 24-hour operations centre. Information on crime-related activity is relayed to 80 hand-selected officers patrolling in plain clothes.

Credit goes to the MMC for Public Safety, Councillor Michael Sun, and the Chief of Police, David Tembe, for providing effective political oversight and energizing the JMPD, respectively. On the anti-corruption front, the City's Group Forensic and Investigation Services (GFIS) has increased the number of cases it has unearthed from 4000 investigations of corruption and maladministration worth R24 billion to 6000 cases involving transactions totalling R33 billion.

A major source of frustration for the City has been the National Criminal Justice system's lack of enthusiasm for prosecuting what we view as clear-cut cases. After numerous attempts at engaging various actors in the National Prosecuting Authority (NPA), we approached Parliament to force the hand of the NPA.

Above all, the 2018/19 financial year was the year of *Diphetogo* - an initiative aimed at ensuring that the City directs most of its financial resources to those projects that are urgent, and which will have the biggest and most immediate material impact on our people. This initiative – aimed at driving real, transformational change in the City - saw an accelerated drive towards directing more money to the things that matter most, including basic services, infrastructure, housing and public safety. In the year under review, this initiative has enabled the City to increase the number of clinics operating on extended hours from 13, in the previous year, to 26. In the 2019/20 financial year, additional resources will be deployed to extend operating hours at more clinics.

Financial Performance

The two financial years preceding the year under review were difficult, specifically because of prevailing external economic circumstances on which the City had absolutely no influence over. Therefore, the City was forced to take tough but necessary decisions that would enable Johannesburg to withstand the headwinds.

The City continued to function within a constrained environment, owing largely to a national economy that is still forecast to grow at between 1% and 2%, according to optimistic economic forecasts. This had a negative bearing on the ability of the City to collect revenue for services as more and more people fell into the unemployment line.

Despite this, the City has recorded significant successes backed up by policy certainty which has given investors, confidence to invest in Johannesburg like never before. This is evidenced by the City facilitating external investment to the amount of R17.29 billion, up from R8.7 billion in the previous year. An internal audit revealed the preliminary figures which showed that

facilitated external investment stood at R16.3 billion, the City had under-reported by R937.3 million.

Additionally, preliminary figures show that the City of Johannesburg ended its 2018/2019 financial year in a stronger financial position:

- With a closing cash balance of approximately R4.4 billion;
- Where long-term assets more than sufficiently cover our long-term liabilities;
- With a Redemption Fund valued at approximately R2.5 Billion to meet its long-term bullet debt maturing obligations, valued at R2.5 Billion at the end of the financial year; and
- With a debt to revenue ratio that remains in line with National Treasury's norm.

Since coming into office, the multi-party government has placed focus on identifying those who can afford to pay for services, but instead consume them illegally. Through the efforts of Operation Buya Mthetho we have sought to target this kind of criminality and improve the City's financial sustainability.

Gratitude

I would like to thank the City Manager, Dr Lukhwareni, and the more than 30 000 employees of the City who have embraced the notion of *Service with Pride*. I would also like to express my appreciation to the Members of the Mayoral Committee for working tirelessly to deliver on our changed mandate in the respective City departments and entities. Accordingly, I would like to thank the DA caucus as well as members of our coalition government; the IFP, ACDP, COPE, UDM and Freedom Front Plus for their continued support in delivering quality basic services to our residents.

I am also thankful for the contributions of the EFF which, although not a member of the coalition, voted with us on an issue by issue basis. Finally, I must thank the Speaker of Council for his ongoing support and the leading role he plays in ensuring that Council fulfils its important oversight function.

In the 2019/20 financial year, I look forward to continued progress in restoring the City of Joburg as a beacon of opportunity. I maintain my belief that a Johannesburg that works is a South Africa that works.

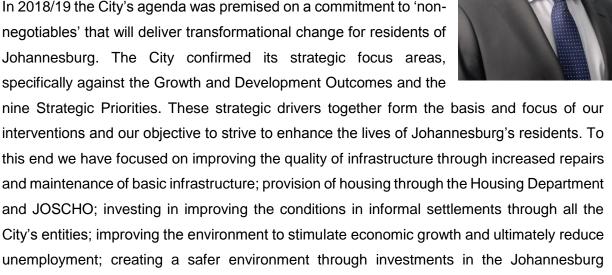

ryu.

Executive Mayor Councillor Herman Mashaba

1.2 City Manager's Foreword

Overview

In 2018/19 the City's agenda was premised on a commitment to 'nonnegotiables' that will deliver transformational change for residents of Johannesburg. The City confirmed its strategic focus areas, specifically against the Growth and Development Outcomes and the

City's entities; improving the environment to stimulate economic growth and ultimately reduce unemployment; creating a safer environment through investments in the Johannesburg Metropolitan Police Department among many other interventions. The detailed performance information is contained later in this report, here I highlight some of the key successes of the year under review.

Achieving economic growth that reduces unemployment

In 2018/19 the City facilitated R17.29 billion worth of investment, managing to double the investment facilitated by the City for the second year in a row. In striving to create an enabling environment that supports job creation, the City has opened seven Opportunity Centres in Diepsloot, Roodepoort, Alexandra, Soweto, Klipfontein, the Inner City, and Montclare, as well as the Orange Farm Business Centre in partnership with Discovery. These centres will support and equip young job seekers.

Moreover, the City aims to ensure optimally managed job opportunities within its own institutional framework – with an awareness of additional long-term spin-off prospects of these opportunities, into the wider city environment. The City continues to offer Expanded Public Works Programme (EPWP) opportunities for the unemployed. Furthermore, we have dramatically increased the number of SMMEs supported, and have successfully insourced over 4000 security guards at no additional cost to the City.

Addressing inequality and poverty through uplifting poor communities

This is about ensuring that the City's resources and funds are focused on addressing spatial and all forms of income inequality, in order to ensure inclusive and diverse communities. We have specifically worked hard to upgrade informal settlements. I am proud to announce that 3191 structures in informal settlements have been provided with electricity - more than double the initial target of 87.03 % of households in informal settlements now have access to water and 76 524 informal households have access to sanitation through the efforts of Joburg Water.

This year the City adopted a new Inclusionary Housing Framework, marking the fact that, in the future, developers will have to make at least 30% of developments available for affordable housing. In the meantime, hundreds of social and affordable housing units were developed for underprivileged residents across the city. More than 1000 title deeds were transferred to residents. In the Inner-City, 27 awards were made to investors. This translates to 91 inner city properties having been released for redevelopment, with a lease value amounting to R1 691 billion.

Financial sustainability

The City's ability to generate and collect revenue, and enforce a level of financial accountability, is key to its long-term financial stability and attracting financing and investment in the future. The City continues to work to improve investor confidence and mobilise financial resources from public and private partnerships, in order to continue to support service delivery and improve the quality of life.

National Treasury 's preliminary Local Government Revenue and Expenditure Results ranked the City of Johannesburg as the top performing metro in South Africa in terms of aggregate revenue (at 98.5% of budgeted revenue). In terms of expenditure the City also performed with excellence, coming second only to Buffalo City at 97.5% of budgeted expenditure. The City's pre-audited financial statements for the 2018/19 financial year show almost universal improvement to the City's key financial ratios. We can celebrate the significant increase in operating revenue, resulting in a substantial improvement in the city's liquidity position with Moody's noting that the "City's strong administration has managed to implement prudent financial practices over the years."

Improving the quality of services

This is about ensuring that all employees of the City uphold the mantra of 'service with pride' to create a professional, committed and responsive civil service. Over the past three years, the City has engaged in a comprehensive skills audit of employees, with the final audit of levels 5 and 6 nearing completion in 2018/19. In addition, the City has been developing a public service charter so that residents know what level of service to expect from the City. This will detail new, benchmarked service standards to support transparent and quality service delivery for customers.

We have placed a greater focus on infrastructure investment in order to start making significant inroads into the City's infrastructure backlog. Importantly, infrastructure projects are implemented under strict monitoring and evaluation procedures to ensure that while expenditure increases, the City's financial sustainability is not compromised. Stemming from this process, the percentage of the City's capital budget allocated towards transport, water & sanitation, electricity and housing has increased from last year. In doing so the City seeks to ensure a reliable supply of basic services, conducive to economic growth and improved quality of life for residents.

By prioritising repairs and maintenance, we have been able to turn the tide on water pipe bursts. 131.6 km of water pipes were replaced, and the total number of water pipe bursts has decreased from a high 45 177 in 2016/17 to 42 977 during the 2018/2019 year. 95.57% of sewer blockages were cleared within 24 hours of notification and 42.8 km of sewer pipes replaced.

Improving public safety

The focus here is on the need for more visible policing in the city, in order to improve public safety and develop a greater sense of security for the residents of Johannesburg. There are currently no less than 700 JMPD officers on duty on any given shift every day enhancing our commitment to visible policing. An additional 1 500 JMPD officers have been recruited and are currently undergoing training. This priority also intends to provide equal access to quality police services and safety support across the entire city.

The launch of our flagship Integrated Intelligent Operation Centre (IIOC) Reaction Unit this year has resulted in a significant decrease in response time and increase in arrests. The JMPD's response to by-law infringements has seen a stellar return with 1 422 by-law enforcement operations enacted in the City. Traffic enforcement has also improved with 6 326 traffic enforcement operations undertaken in 2018/19 to ensure orderly road traffic control.

The City's multi-departmental operation Buya Mthetho aimed at bringing back the rule of law to the City of Johannesburg through recovering funds from revenue defaulters, halting illegal connections, illegal dumping and building plan violations has gone from strength to strength. Since the launch of Buya Mthetho last year, over R1.3 billion in lost revenue has been recovered by the City to date.

An honest and transparent City that fights corruption

The City's GFIS team is engaging in active investigations to identify areas of mismanagement and maladministration with the objective of creating an honest and transparent City that serves the poor and fights corruption. This financial year, GFIS has been able to complete complex cases outstanding from previous years. Furthermore, there was an increase in capacity that contributed to completion of investigations. We have also witnessed an improvement in the prosecution success rate of City courts, which has increased from 4% in November 2018 to 25% in June 2019.

The overall 2019 customer satisfaction survey findings show a significant increase in satisfaction – and it is important that we celebrate these successes, but equally we must pay close attention to the work we still have to do as lower satisfaction scores are overwhelmingly concentrated and observed in our more informal areas and in the inner city. This is a challenge that we are determined to address.

Upholding a customer-centric perspective

Ensuring that our customers and citizens feel acknowledged is critical. Customers will see clear evidence of the care the City takes in responding to queries and delivering quality services. They will experience responsiveness and a proactive stance from all who work within the City. Regardless of the mechanism or platform through which the City is engaged, 44 public participation meetings were held in 2018/19, enabling our residents' voices to inform programme decisions, budget allocation and the strategic agenda for their city.

The Service Standards Charter will promote the ease of doing business within the city, enhancing efficient building plan approvals, issuing of clearance certificates and quick turnaround on resolving queries or disruptions. We have built on the success of previous year, and this year another 13 City clinics offered extended hours of service culminating to a total of 26 clinics offering extended hours of service. Five Community Substance Abuse Centres have been opened by the City, providing free assistance to drug addicts. We have seen outstanding responsiveness from the Department of Health. More residents have been initiated on treatment for HIV and TB enhancing the quality of life of all residents. The increase in percentage of children under 1-year who have been immunized is heart-warming.

The Department of Community Development out did themselves with the number of lifestyle programmes implemented, with the likes of indigenous reading programmes, social cohesion programmes through arts, culture and heritage and programmes. I am delighted with the extension of library hours in 11 libraries. We have seen a growing number of museum

programmes implemented, exhibitions, education tours, theatre attendees and visitors to our beloved Joburg Zoo.

Towards a sustainable future

The preservation of the city's resources for future generations is critical to ensure a sustainable future. This will foster economic growth, promote social and human development, make sure that there is good governance and do no harm to the environment. Johannesburg will be able to provide a clean, healthy, safe environment to our children's generation and for generations after that.

The City plays an important role in ensuring the preservation of good quality water, clean air, the management of land, and ensuring by-law enforcement regarding the exploitation of natural resources. To this end, the City recently won the prestigious Waste Pickers Integration in the Municipal System 2019 award, which recognises local and metropolitan cities that have excelled at all levels of sustainable development.

Encouraging innovation and efficiency

The development of innovative small businesses, and the creation of access to market opportunities is critical. The City's Smart City programme will link its capabilities and create a better-performing government. Partnerships with knowledge partners, technology companies, research institutes and universities that are at the forefront of research and development are being set up, and improved service delivery will take place through real-time monitoring, information management, and optimal management of resources.

The revised draft Smart City Strategy will promote citizen centric smart citizens, smart efficient services, safe city and sustainable, liveable & resilient city through a living lab approach – promoting an environment of innovation and flourishing of new practical ideas and solutions by citizens, especially young people, by promoting, piloting, and demonstrating new solutions.

These performance highlights are evidence of a municipal workforce that is committed to making real change in the lives of City's communities. In 2019/20 the City will continue placing significant emphasis on bringing real change to residents, targeting improving the quality of infrastructure through increased access to housing; expanding sites and services; basic urban management; Inner-City revitalisation; concerted revenue collection; sustainable funding of capital projects; correct billing; and fighting crime and corruption. The City will upscale its smart City initiatives to ride on the 4th industrial revolution.

In conclusion, let me thank the Executive Mayor, Members of the Mayoral Committee and other political leadership for their support over the past financial year. The Speaker of Council, Section 79 Committees and the City's Advisory Committees which continue to play critical roles in supporting and monitoring delivery in the City.

On the administrative side, I am grateful to the Chief Operations Officer, Group Chief Financial Officer, Group Heads, Cluster Conveners, Executive Heads, Boards of Directors, Managing Directors and the entire staff of the City and its entities for their support in ensuring effective service delivery and the achievement of the City's goals, especially in so far as they related to ongoing clean governance and building a professional civil service.

As we continue to emphasise in all our programmes and projects, we aim to establish an honest, responsive and customer-centric government; that listens to the people and prioritises their needs. The 2018/19 financial year has seen significant progress in this regard, and I remain committed to our leadership's goals of delivering services to the people of Johannesburg and ensuring that we always put the residents of our city first.

City Manager Statement by the City Manager, Dr Ndivhoniswani Lukhwareni

COMPONENT A: MUNICIPAL FUNCTIONS, POPULATION AND ENVIRONMENTAL OVERVIEW

1.2.1 The City's strategic direction

The City has developed a series of strategic plans that will respond to, and achieve, the City's outcomes and vision in addressing its challenges. These include:

- Long-term plans in the form of the Growth and Development Strategy (GDS);
- Medium-term planning i.e. the City's regular five-year Integrated Development Plans (IDP); and
- Short-terms plans which are contained in the annual Service Delivery and Budget Implementation Plan (SDBIP) and annual IDP reviews, as well as in the annual business plans of departments and municipal entities.

The long-term strategy identifies five key growth and development outcomes for the City:

- 1. A growing, diverse and competitive economy that creates jobs;
- 2. An inclusive society with enhanced quality of life that provides meaningful redress through pro-poor development;
- 3. Enhanced, quality services and sustainable environmental practices;
- 4. Caring, safe and secure communities; and
- 5. An honest, transparent and responsive local government that prides itself on service excellence.

In addition, nine strategic priorities were identified as key for this term of office. These are detailed in the figure below.

JOBURG 2040 VISION

Johannesburg - a City of the Future - an economically vibrant and equitable African City; strengthened through its diversity; a Smart City that provides high quality of life; a City that provides sustainable service for all its citizens; and a resilient society.

Joburg – a City that works for South Africa to work!

JOBURG 2040 MISSION

We will collectively enable support that drives economic growth, optimal management of natural resources and the environment, and we will develop an inclusive society that contributes to the development of a capable local government.

5 OUTCOMES 1. A growing, diverse and competitive economy that creates jobs 2. An inclusive society with enhanced quality of life that provides meaningful redress through pro-poor development 3. Enhanced, guality services and sustainable environmental practices 4. Caring, safe and secure communities 5. An honest, transparent and responsive local government that prides itself on service excellence

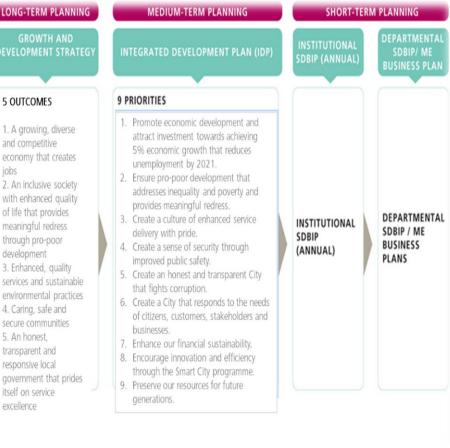

Figure 1: CoJ Strategic planning

1.2.2 Socio-Economic Overview of Johannesburg: A Growing City

The City of Johannesburg is a vibrant and culturally rich city, but one that struggles with the typical challenges associated with developing countries. The rapid urbanisation experienced by many cities in the developing world means that faster population growth rates often contribute to large-scale urban poverty, housing shortages, infrastructure backlogs and environmental degradation. The City of Johannesburg recognises these challenges and is committed to making real change to improve the lives of our residents. In addressing these challenges, it is first necessary to understand the situation we are dealing with.

1.2.3 Demographics and Population

Johannesburg is home to about 5.5 million people, making it the biggest metro by population size in South Africa. The metro also prides itself as the economic and financial hub of the country. In 2018, the city housed nearly 10% of South Africa's total population. The largest share of Johannesburg's population, about 40%, is within the young working age (25-44 years) category (see Figure 2 below). Relative to the national population, Johannesburg has a significantly larger share of the working age population between 25 and 49 years old. This is because many young people migrate to Johannesburg looking for better opportunities. This implies that the City of Johannesburg has a major task towards job and employment creation.

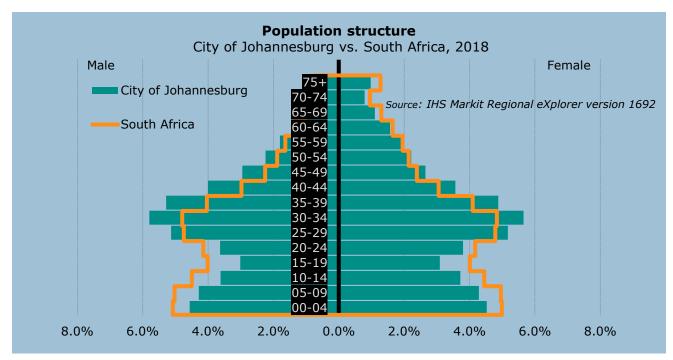

Figure 2: Age structure of CoJ population

Between 2008 and 2018 Johannesburg's population grew at an average of 2.91% per annum which is nearly double the growth rate of South Africa as a whole (1.56%). The number of households is growing at an even faster rate than that of the population. There are around 1 850 000 households in Johannesburg with approximately 3 individuals per household. In many ways this rapid urbanisation is a sign of success – people move to Johannesburg because of the economic opportunities that the City offers; at the same time this expanding population brings challenges as it can put a strain on service infrastructure and needs. In the next five years the city is expected to continue growing at an annual average growth rate of 1.8%. However, with the right support systems in place, this growing economically active population can be a strong resource, strengthening the stability and sustainability of Johannesburg.

1.2.4 Unemployment

The negative side of a fast growing, young population is that unemployment in the city has increased by 1% since last year. In May 2019, the Quarterly Labour Force Survey indicated that the overall, unemployment levels, using the narrow definition was 29.8% while the broader definition of unemployment was at 31.7%. The CoJ recognises that a large youth (18-35) population also has great potential. As such the City is committed to fostering skills and entrepreneurship opportunities among the youth. A fundamental contributor to the structure of unemployment in Johannesburg is the structure of the Johannesburg economy which tends to be specialised and highly skilled.

1.2.5 Structure of Johannesburg Economy

Johannesburg's finance sector enjoys a comparative advantage over the national economy and most of Johannesburg's Gross Value Add (GVA) is concentrated in this sector (28.1%). The second largest contributor is the community services sector which includes government services, at 24.7%, followed by the trade sector with 14.7%.

In the future, the transport sector is expected to grow fastest at an average of 2.80% annually. It is anticipated that mining will be the slowest growing sector with negative growth rate of - 0.85%. The finance sector is estimated to remain the largest sector with a total share of 33.3% growing at an average annual rate of 2.7%. The Johannesburg economy therefore needs to be well placed and SMART to capitalize on business, information and communication technologies.

The City of Johannesburg contributes14.91% of the Gross Domestic Product (GDP) of South Africa. Formal employment accounts for 83.54% of total employment figures in the city. Informal sector account for 16.46% of total employment. Over the past decade, employment through the informal sector has seen an average grown rate of 5.6%.

1.2.6 Poverty and Inequality

In 2018, the City of Johannesburg had a Human Development Index (HDI) of 0.724 which is better than that of South Africa generally, which sits at 0.654. HDI is the combination of three basic dimensions of human development: A long and healthy life, knowledge and a decent standard of living. Over the past decade the city has seen a slow but steady improvement in

HDI. Similarly, the Gini coefficient of the city, a measure of income inequality, moved from 0.64 in 2008 to 0.62 in 2018.

Despite these developments, Johannesburg continues to struggle with high levels of inequality, poverty, social exclusion and underdevelopment. In 2018, about 45% of the city's population lived in poverty. These issues are exacerbated further because many people live in informal conditions with poor access to basic services with long and costly commutes as a result of the city's apartheid spatial planning.

Johannesburg has an inequality and poverty challenge and the ability of the City of Johannesburg to drive a pro-poor agenda depends primarily on sustainable economic growth and a re-distribution of the benefits of growth. Given the rate of the population growth and high structural unemployment, stronger economic growth is required to deal with the challenge of poverty. The city needs to grow economically, in order to create jobs and take care of its social obligations for those who may not be in economically viable situations. The likely effect of high sustained in-migration patterns and population growth is that the growth in demand for jobs and services far outpaces the number of jobs and infrastructure available thereby putting pressure on the service.

In 2018/19, the strategic focus of the City has been to create transformative change that makes a real difference for the residents of Johannesburg. This is what we call *Diphetogo*. The key to accelerating change is narrowing focus to the most critical needs of the City. These include economic growth and job creation; infrastructure development including repairs and maintenance; housing; and public safety. *Diphetogo* demands that the City ensures residents and stakeholders of Johannesburg experience exceptional service coupled with transparent governance and an enabling economic environment.

COMPONENT B: STATUTORY ANNUAL PROCESS

1.3 Business planning and reporting process

1.3.1 Legislative Requirements

Section 25 of Municipal Systems Act (MSA) states that municipal councils must "within a prescribed period after the start of its elected term, adopt a single inclusive and strategic plan for the development of a municipality".

Section 28 of the MSA further states that "a municipality must adopt a process set out in writing to guide the planning, drafting, adoption and review of its integrated development plan". In addition, Section 40 of the MSA states that "a municipality must establish mechanisms to monitor and review its performance management system".

Section 21 of the Municipal Finance Management Act (MFMA) requires the Mayor to coordinate processes for preparing the annual budget and reviewing the IDP and budget-related policies to ensure that these are mutually consistent and credible. MFMA further states that "at least 10 months before the start of the budget year, table in the municipal council a time schedule outlining key deadlines for the preparation, tabling and approval of the annual budget".

1.3.2 Management of the Process Plan

Section 30 of the MSA: "the executive committee or executive mayor must, in accordance with section 29 [of the Act], manage the drafting of the integrated development plan, assign responsibilities in this regard to the municipal manager, and submit the draft plan to the municipal council for adoption".

Three (3) core structures form an integral part of the management of the IDP process plan, namely:

- 1. City Manager (IDP Manager) (EMT);
- 2. Integrated Planning Committee (Strategic Management Support); and
- 3. Public Consultation Process.

These structures are required to play a key role throughout the implementation of the process plan. The below table details the various structures with their roles which are responsible for the development of the IDP process plan.

Structure	Key Roles
IDP Public	1. Ensures and encourages public participation in the IDP process
Consultation	2. Represent the interests of communities.
	3. Provide a mechanism for discussion, negotiation and joint decision-
	making.
	4. Ensure proper communication between the City and its stakeholders
	(sectors).
	5. Monitor the performance of the planning and implementation process.
Integrated Planning	1. Provide strategic support in the management and coordination of the
Task Team	IDP process plan.
	2. Determine mechanisms for ensuring vertical and horizontal alignment
	of key programmes and projects with the City's strategic direction.
	3. Make inputs into and contribute to the crafting of plans and make
	technical recommendations.
	4. Create an enabling environment for strategic dialogue, knowledge and
	information-sharing and peer-review.

Table 1: Structures responsible for the IDP process plan

1.3.3 Planning Cycle/Phase

The below figure outlines the different stages in the planning cycle of the city of Johannesburg as the City streamline planning process.

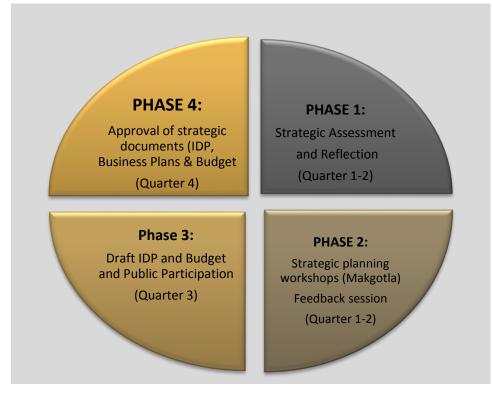

Figure 3: Planning cycle

1.3.4 Integrated Planning Process

The IDP and Budget process plan are critical planning documents that seek to improve efficiency, decision making and effective planning. The process plan outlines the institutional arrangements in terms of the management of the IDP and budget process plan (including roles and responsibilities); a time schedule indicating the various phases and respective timeframes; and public participation mechanisms.

Legislative Action	Legislative Requirement	Date
Approval of the IDP and	Table the IDP and Budget time schedule at least 10	31 August 2019
Budget Process Plan by	months before the start of the financial year. This	
Council	should outline key deadlines for the development	
	of the IDP and annual budget of the municipality.	
Submission of proposed	ME proposed budgets must be submitted to the	31 January 2020;
Municipal Entity (ME)	shareholder at least 150 days before the start of the	20 March 2020
budgets	financial year. If necessary, a revised budget must	
	be submitted to the shareholder not later than 100	
	days before the start of the financial year.

CHAPTER 2: GOVERNANCE

COMPONENT A: POLITICAL AND ADMINIISTRATIVE GOVERNANCE

2.1 Introduction to Political and Administrative Governance

The City of Johannesburg Metropolitan Municipality is a Category A Municipality in South Africa, as defined in the Municipal Structures Act, Act No. 117 of 1998, as amended. In line with having a well-defined politically governed system, the municipality upholds the principles of a well governed administrative system. At the heart of a well-governed administration, lies the principles of King IV on Good Corporate Governance. These principles are not only adopted at ME level, but equally applies to the departments that form the Core administration of the Group.

The City's governance model mirrors National and Provincial government, as is made up of the executive and legislative functions. The legislative function is the political administration or Council, led by the Council's Speaker and holds monthly meetings to discuss Council matters. The Executive arm comprises the Mayoral Committee, chaired by the Executive Mayor, as well as an administrative function led by the City Manager (CM).

The key role of Council is to focus on legislative, participatory and oversight roles. Council delegated its executive function to the Executive Mayor and the Mayoral Committee. Its principal role is that of a policy-maker. The municipal council is mandated with the role of formulating and approving by-laws, approving policies and programmes which will be in the best interest of the public. It also debates issues publicly, facilitates political debate and discussion and plays an oversight role in the municipality.

The figure below depicts the governance model adopted by the City.

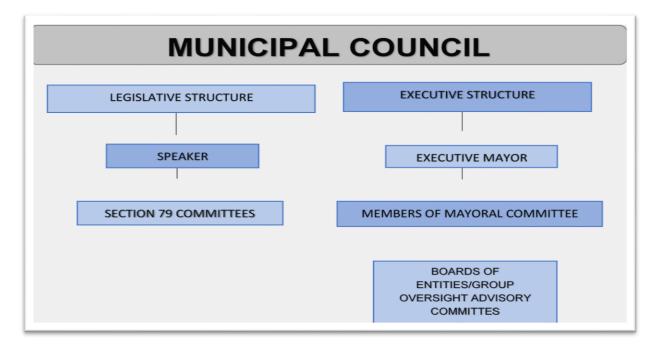

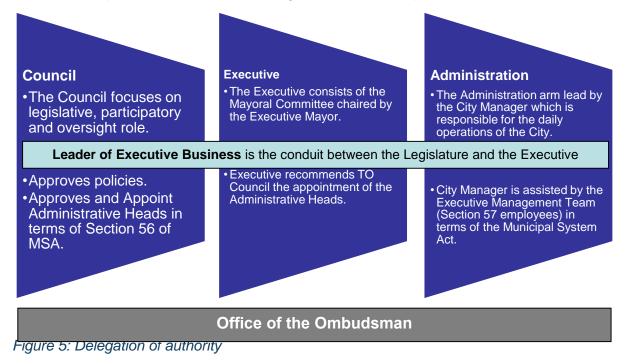

Figure 4: Legislative and Executive composition of the City of Johannesburg

In relation to the structures in the municipality, delegations of authority are schematically depicted in the figure below. The Executive arm of the municipality is headed by the Executive Mayor who is responsible for performing functions and exercising powers delegated by the municipal council. The administrative arm, led by the City Manager, is responsible for ensuring administrative performance in the rendering of services to the public.

2.1.1 Political Governance

Politically, the City was led by DA working with coalition partners, consisting of IFP, ACDP, UDM, COPE, VF+, and Al Jama-ah, supported by EFF in 2018/19. Council, with both legislative and executive functions, remain the main decision-making political governance structure of the City. The Administration is responsible for service delivery and regulation. The City uses Municipal Entities (MEs) as implementation arms, creating focussed, specialised and non-bureaucratic processes. There are also regional structures that monitor service delivery and citizen care, which evaluate service delivery on the ground. They provide a link between the City, its citizens and other stakeholders.

To further entrench good governance and accountability, the City is operating on the separation of powers model framework, whereby the Executive is separated from the Legislative arm of Council to promote oversight; accountability and public participation. This model mirrors that of provincial and national Parliament, and is achieved through the delegation of legislative and executive functions of Council to the legislative and executive arms, respectively.

Service delivery implementation and policy issues such as Integrated Development Planning and tariffs, are delegated to the Executive (led by the Executive Mayor). Legislative functions are delegated to Council and its committees and these include oversight and public participation. The latter is fundamental to the successful delivery of services, accountability and public consultation in local government.

The City established independent oversight committees, including the Municipal Public Accounts. Committee (MPAC), and boards for its municipal entities. These committees enable improved political and administrative oversight, as well as greater scrutiny and increased accountability within Council and its entities. This improved oversight and scrutiny has helped to improve the levels of clean governance in the City, as well as the levels and intensity of citizen engagement through processes of consultation and communication. The role of MPAC through conducting oversight on the City's Annual Report has undoubtedly improve accountability, transparency, economical, effective and efficient use of public resources in executing municipal functions giving effect to service delivery.

Councillors

As of August 2016, after the municipal elections, the City of Johannesburg Municipal Council increased to a total of 270 Councillors. This total number of councillors is divided into (a) 135 ward councillors who have been elected by first-past-the-post voting in 135 wards; and (b) 135 councillors elected by Proportional Representation (PR) from party lists (so that the total number of party representatives is proportional to the number of votes received).

Ward councillors have more local responsibilities, including chairing ward committees in their wards, to raise local issues, commenting on town planning and other local matters in their ward, and liaising with local ratepayers' and residents' associations. PR councillors are usually allocated to more political tasks within their party structures and within the City of Johannesburg.

Political Decision-Taking

Council is the main decision-making political structure in the City of Johannesburg Metropolitan Municipality. The Executive reports quarterly to Council on the implementation of passed Council resolutions. The respective Section 79 committees conduct oversight on the implemented resolutions and report back to Council. Based on the recommendations of the Section 79 committees, Council may pronounce on the implementation of the Council resolutions by the Executive. Between July 2018 and June 2019, Council passed a total of 1435 resolutions. The table below captures the resolutions taken in each Council meeting:

Council meeting	Number of resolutions
25th Ordinary Council meeting: 30 August 2018	67
26th Ordinary Council meeting: 26 September 2018	112
26th Ordinary Council meeting: 27 September 2018	199
27th Ordinary Council meeting: 31 October 2018	227
28th Ordinary Council meeting: 28 November 2018	96
28th Ordinary Council meeting: 29 November 2018	44
29th Ordinary Council meeting: 30 January 2019	31
30th Ordinary Council meeting: 21 February 2019	60
31st Ordinary Council meeting: 14 March 2019	320
32nd Ordinary Council meeting: 28 April 2019	38
33rd Budget Speech Council meeting: 22 May 2018	0
34th Debate on the Budget Speech Council meeting: 24 May 2019	36
35th Ordinary Council meeting: 13 June 2018	205

Table 5: Council meeting held for 2018/19 and total resolutions

Council meeting	Number of resolutions
TOTAL COUNCIL DECISIONS	1 435

2.1.2 Administrative Governance

The City of Johannesburg Metropolitan Municipality, as is the case in the National and Provincial Government, is made up of a Legislative arm (the Council); an Executive arm (consisting of the Executive Mayor and the Mayoral Committee); and an administrative arm.

Council

The main responsibility of Council is legislative, oversight and public participation. Council executive functions are delegated to the Executive Mayor and the Mayoral Committee. Council provides a critical platform for debate and discussion. More importantly, Council passes resolutions on behalf of the municipality.

As per the Section 160(2) of the Constitution, the City of Johannesburg Metropolitan Council has sole power to approve by-laws, City policies, the Integrated Development Plan, tariffs for rates and service charges, and the City's annual budget. Its delegated powers also include the power to appoint a Building Control Officer in terms of Section 5 of the National Building Regulations and Building Standard Act.

Further to its power to take decisions on service delivery agreements in terms of Section 76(b) of the Municipal Systems Act; the Council also champions good governance and accountability by exercising its oversight function over the Executive Mayor and the Mayoral Committee through the various Section 79 committees.

Structure of Council

The City of Johannesburg Council is made up of 270 councillors representing various political parties, as follows:

Table 6: Structure of the Council

Party	Ward	PR	Total	%
African National Congress	84	37	121	44.4
Democratic Alliance	51	53	104	38.4
Economic Freedom Fighters	0	30	30	11.1
Inkatha Freedom Party	0	5	5	1.7
African Independent Congress	0	4	4	1.5
Freedom Front Plus	0	1	1	0.3
African Christian Democratic Party	0	1	1	0.3
Al Jama-ah	0	1	1	0.2
United Democratic Movement	0	1	1	0.2
Congress of the People	0	1	1	0.2

The primary responsibility of councillors, an in particular ward councillors, is to represent the needs and interests of their constituents. They are further responsible for building community involvement, with ward committees playing an important role in providing information on the needs and interests of local communities and ensuring that public voices are heard. The Council debates local government issues - involving both policy and by-laws - and proposals are ratified or rejected. There are various structures dealing with the wide-ranging tasks of Council and the below sections attempt to explain each structure and its role:

The Speaker of Council

The role of Speaker of Council mainly includes:

- Presiding at meetings of the Council;
- Performing the duties and exercising the powers delegated to the Speaker;
- Ensuring that the Council meets at least quarterly;
- Maintaining order during meetings;
- Ensuring compliance by councillors with the Code of Conduct; and
- Ensuring that Council meetings are conducted in accordance with the rules and orders of the Council.

The Chief Whip of Council

The main role of the Chief Whip of Council is to maintain cohesion within the governing party and to build relationships with other political parties. Other tasks include:

• Making sure that each of the political parties are properly represented on the various committees;

- Maintaining sound relations between the various political parties; and
- Attending to disputes amongst political parties.

Section 79 committees

The role of the Section 79 committees mainly includes:

- Exercising oversight on the performance of the Executive;
- Facilitating public participation by receiving submissions from the public on municipal matters; and
- Considering matters or investigating matters referred by Council.

Standing committees

The City of Johannesburg Metropolitan Municipality has the following standing Committees: Ethics & Disciplinary; MPAC; Petitions; Programming; and Rules Committees. Both Section 79 and Standing Committees play an oversight role and are not delegated any decisionmaking powers.

Table 7: Section 79 committee chairpersons

Section 79 Committee	Chairperson
Chair of Chairs	Cllr A Christians
Rules Committee	Cllr GK Mogale
Ethics/Disciplinary Committee	Cllr Niemand
Housing Committee	Cllr S Clarke
Petitions Committee	Cllr SD Kotze
Corporate & Shared Services Committee	Cllr J Mendelsohn
Environment, Infrastructure & Services	Cllr M S Arnolds
Committee	
Finance Committee	Cllr V Penning
Transport Committee	Cllr T Meyers
Economic Development Committee	Cllr FC De Lange
Community Development Committee	Cllr M P Ntuli
Municipal Public Accounts Committee	Cllr TC Nontenja
Development Planning Committee	Cllr G de Kock
Health and Social Development Committee	Cllr IM Reinten
Oversight Committee on Gender, Youth &	Cllr NK Sharif
People with Disabilities	

Section 79 Committee	Chairperson
Oversight Committee on Governance	Cllr S Dos Santos
Oversight Committee on the Legislature	Cllr J Maharaj
Public Safety Committee	Cllr H Masera

Ward Committees

The City of Johannesburg Municipality has ward committees in all wards. Ward committees are meant to encourage participation by the community. Each of these committees are chaired by a ward councillor and comprises 10 members. Ward committees act as advisory bodies, meaning that they make recommendations to the Council, but they do not have the power to take decisions on their own.

Leader of the Executive Business

As the result of the separation of the executive and legislative functions, the Leader of Executive Business plays a critical role in liaising between the two arms of Council. This position ensures that executive business is effectively processed to Council via the Programming Committee. The Leader of Executive Business represents the executive in the Council and the position is occupied by a Member of the Mayoral Committee (MMC).

Chairperson of Committees (Chair of Chairs)

The Chair of Chairs is elected by Council resolution. Responsibilities include overseeing and co-ordinating the work of all Council committees, except those chaired by the Speaker. He/she presides at Council meetings when the Speaker is absent.

The Executive Mayor and Mayoral Committee

The executive sphere of the municipality is spearheaded by the Executive Mayor (Cllr H. Mashaba) who is responsible for the strategic leadership of the City. The Executive Mayor performs functions and exercise the powers delegated by the municipal council and assigned by legislation. The administrative structure is spearheaded by the City Manager.

The Executive Mayor is assisted by an appointed Mayoral Committee. Each member of the Mayoral Committee is responsible for a specific portfolio within the City structure and is directly accountable to the Executive Mayor. The City's Mayoral Committee ensures that service delivery takes place, including but not limited to improving efficiency, credit controls and revenue, as well as the administration of the municipality.

The Administration

The municipal administration is led by the City Manager, who is supported by an Executive Management Team. The role of the Administrative arm is to translate policy into workable programmes and/or deliverables that are measurable. The high level Executive and Administrative structures are depicted in figures 5 & 6 below:-

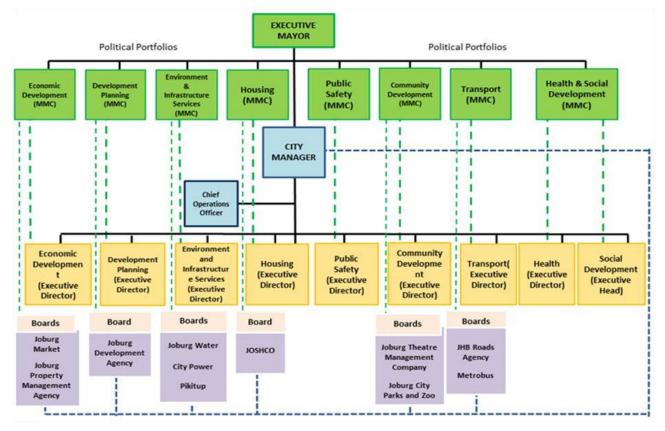

Figure 6: High level Executive & Administrative structure

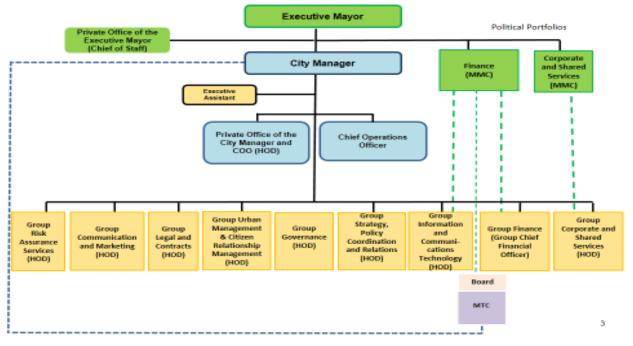

Figure 7: High level Executive & Administrative structure - Group Functions

The City Manager

The City Manager is appointed by the Council in terms of Section 82 of the Municipal Structures Act and is therefore, designated as the Accounting Officer and the Administrative Head of the City. He/she is also the Chief Information Officer of the City and is responsible for the management of the PAIA requirements. Responsibilities of the City Manager include managing financial affairs and service delivery in the municipality.

Executive Management Team

Under the leadership of the City Manager, the Executive Management Team (EMT) works to achieve the strategic objectives, as outlined in the SDBIP and IDP each year. The EMT is made up of Executive Heads, Group Heads, Managing Directors and Chief Executive Officers of the City's departments and entities.

Group Functions

The role of the Group Functions is to ensure that there is alignment and consistency in the strategic approach and implementation of the respective discipline across the entire City of Johannesburg Group i.e. both Core Departments and Municipal Entities. This is done in a manner that provides the required flexibility within the system to meet the specific needs of the Municipal Entities.

The City of Johannesburg Group Functions are:

- Group Strategy, Policy Coordination and Relations, which includes Innovation and Knowledge Management, Corporate Strategy and Research, International and Intergovernmental Relations, Integrated and Community-Based Planning, and Monitoring and Evaluation.
- Group Finance, which includes Revenue Shared Services, Treasury, Group Accounting, Core Accounting, and Supply Chain Management.
- Group Corporate and Shared Services, which includes Group Human Capital Management, Occupational Health, Safety, Environment, Logistics, Administration and Fleet Contract management, as well as Strategic and Management Support Services.
- Group Governance, which includes Committee Support, Shareholder Services and Governance.
- Group Risk Assurance Services, which includes Group Risk Services, Group Compliance and Monitoring, and Combined Assurance and Business Process Excellence and Reporting.
- Group Audit, which includes Group Internal Audit, Regulatory and Compliance.
- Group Forensic and Investigation Services which deals with investigating cases related to fraud and corruption, theft of assets, maladministration etc.
- Citizen Relationship and Urban Management which includes Citizen Relationship and Interface, and Regional Urban Management (Regions A to G).
- Group Information & Communications Technology which is responsible for the provision of Information and Communication technology.

City departments

The role of the departments in the City is to ensure that the operations of the City are executed. The City of Johannesburg departments are:

- **Department of Health:** including integrated Health Policy, Planning and Research and Public Health Services.
- Department of Social Development: including Integrated Social Development Policy, Planning and Research, Social Benefits programmes and the Food Resilience Project Office.

- Department of Community Development: including Integrated Community Development Policy, Planning and Research, Arts, Culture and Heritage programmes and Sport and Recreation programmes.
- Department of Public Safety: including Emergency Management Services, Johannesburg Metropolitan Police and Licensing.
- **Department of Housing**: including Integrated Housing Policy, Planning and Research and Human Settlements programmes.
- **Department of Transportation:** including Integrated Transport Policy, Planning and Research, Transport Transformation and Economic Mobility.
- Department of Environment and Infrastructure Services (EISD): including Resource Sustainability Policy, Planning and Research, Integrated Infrastructure Planning and Coordination and Environmental Protection and Resilience.
- **Department of Economic Development**: including Economic Development Policy, Planning and Research and Economic Development Facilitation.
- **Department of Development Planning:** including Land Use Development Planning, Building Development, and Corporate Geo-Informatics.

Group reporting processes

Reporting flows as outlined in the section below, i.e. from the entities and departments up to the Council where applicable.

Group reporting processes

The reports in City-wide, flows as outlined in the section below, i.e. from the entities and departments up to the Council where applicable.

Figure 8: Group Reporting Process

Group audit opinions

The focus on good corporate governance and activism of the shareholder has assisted the City in obtaining unqualified audit opinions over the past seven financial years. A lot of improvement is still required to achieve the required audit outcomes, such as having clean audit outcomes for most of the municipal entities.

ENTITY	2016/17	2017/18	2018/19

Group advisory oversight committees

Group Advisory Committees have Terms of Reference (ToRs) that assist them in delivering their legislative and advisory mandates. The ToRs are reviewed annually by the committees and recommended to the Mayoral Committee for approval.

Table 9: Advisory committee and meetings held

Advisory Committee	Number of meetings
Group Audit Committee	6
Group Performance Audit Committee	7
Group Risk Governance Committee	3

Group Audit Committee (GAC)

In terms of Section 166 of the MFMA, the GAC is established as an independent oversight and advisory body to advise the City, Council, Mayoral Committee, Accounting Officer and the management, as well as the municipal entities on matters relating to:

• Internal financial control and internal audits;

- Risk management;
- Accounting policies;
- The adequacy, reliability and accuracy of reporting and information;
- Performance management and evaluation;
- Effective governance; and
- Any other issues referred to it by COJ or Mayoral Committee.

GAC primary role is to provide oversight with respect to the financial control environment of the City of Johannesburg and to advise the Mayoral Committee in this regard. The GAC is tasked with *inter alia*, the approval and monitoring of Internal Audit and the Audit Strategy, the review and recommendation for adoption of the Annual Financial Statements (AFS) of the City to Council, and providing reasonable assurance within the Combined Assurance Framework on the adequacy and effectiveness of the CoJs Internal Control Environment as well as the CoJ policies and procedures in this regard. The table below refers to composition of Group Audit Committee.

Member Name	Qualification

Group Performance Audit Committee (GPAC)

In accordance with the provisions of section 14(2) of the Regulations, GPAC is established as an independent oversight and advisory body to advise the City, Council, the Executive Mayor and Mayoral Committee, Accounting Officer and the management on matters relating to:

- Performance management;
- Performance evaluation;
- Compliance with the MSA and any other applicable law; and
- Any other issues referred to it by COJ or Mayoral Committee.

GPAC, amongst other responsibilities, assesses and oversees the organisational performance management system and its service delivery performance including the municipal entities. The other primary objective of the GPAC is to assist the Mayoral Committee in fulfilling its oversight responsibilities and reviewing the performance targets, as set out in the Business Plans, IDP and the SDBIP. The table below refers to the composition of the GPAC.

Group Risk Governance Committee (GRGC)

The GRGC is established as an independent oversight and advisory body that advises the City, Council, the Executive Mayor and Mayoral Committee, Accounting Officer and the management on matters relating to:

- Governance Risk and Compliance, corporate governance practices as per KING III and KING IV;
- Enterprise risk management;
- City wide risk profile and appetite;
- Compliance management processes;
- Information security management; and
- Any other issues referred to it by COJ or Mayoral Committee.

The City's GRGC provides oversight advisory services on matters relating to Risk Governance and Compliance as well as overseeing the Enterprise Risk Management System. The committee also ensures that all risks that might affect service delivery and the attainment of clean audits, are addressed and measures are put in place to prevent future occurrences. The table below refers to the composition of GRGC:

Board of Directors in the Municipal Entities

The City has ensured the stability of the Entity Boards and Group Advisory Committees in 2018/19. This was done through retaining experienced members to ensure that strategic direction is uninterrupted.

The City continued its developmental approach to capacitate the boards and Oversight Committees, where the annual rotation of seasoned members creates a balance and opportunity for new and less experienced individuals to serve with experienced members in the boards and committees. This creates an enormous platform for growth of young professionals. The focus on good corporate governance and activism of the shareholder has seen sustained and improved performance in the audit outcomes at a number of Municipal Entities as well as at core.

Role and Responsibilities of the Board of Directors

The Directors shall be appointed in accordance with the City Group Policy or any other policy determined by the Shareholder from time to time. The Board of Directors is mandated to manage the affairs and the business of the Company and is accountable to the Shareholder for compliance with the applicable legal framework. The Board shall further ensure that the Company complies with the provisions of the Companies Act, MFMA, the Systems Act and other applicable legislations, regulations and/or guidelines issued by the National Treasury and/or any other document or agreement governing the relationship between the parties.

Role and Responsibilities of the Chairperson of the Board

The Board must be led by a chairperson, who shall be independent non-executive director duly appointed in terms of the City's Group Policy. The Chairperson of the Board of the Company together with the CEO shall be the point of contact in dealings with the Shareholder unless otherwise delegated. The chairperson's responsibilities must be separate from those of management led by the CEO.

Role and Responsibilities of the CEO or MD

The Board shall in consultation with the City procure the appointment of the CEO and who shall be appointed as a full-time employee of the Company and manager of the Company's office. The CEO shall be a member of the Board and is accountable to the Board for the management of the Company. The CEO must ensure that the operations of the Company, ensuring that the Company are run effectively and effectively in accordance with the strategic decisions of the Board. The CEO shall be responsible for the day to day management of the Company and to provide the Board with accurate and relevant information provided to the Board timeously.

Term of office and removal

The term of office of each Director shall be determined by the City Group Policy or any policy determined by the City from time to time. A member may resign by giving three months' notice to the City or such notice as determined by the City from time to time. The resigning director must promptly return to the Company all confidential information and other documentation, which may have been given to him as a result of his position as director of the Company. The City shall have sole and absolute discretion to remove or recall one or more Directors of the Company without giving reason thereof.

COMPONENT B: INTERGOVERNMENTAL RELATIONS

2.2 Intergovernmental Relations

The legislative imperative that guides the City's Intergovernmental Relations (IGR) activities is the Constitutional values of cooperative governance alluded to in Chapter 3 and subsequently expressed in the IGR Framework Act which seeks to promote cooperative governance across the three spheres of government. The City's IGR function resides within the Integrated and Community Based Planning Unit (ICBP) and this is as an acknowledgement of the collaborative role that IGR plays in the promotion of integrated planning.

The City participates in the various IGR structures that are geared towards the actualization of collaboration in the integrated planning sphere. The Provincial IGR Practitioners Forum is a useful platform to engage with the Office of the Premier for feedback purposes as well as for deliberation in terms of the plans of the provincial government. The Broad Inter-sectoral Forum is an essential platform for the provincial departments in that they present their respective annual plans to municipalities for interrogation. The forum seeks to unblock constraints relating to service delivery. Other key IGR forums in which the City participates in includes Member of the Executive Committee and Member of Mayoral Committee Forums (MEC/MMC), and the Premiers Coordinating Forum. The Cities Budget Forum is a metro specific forum convened by National Treasury to address budgeting and financial planning in the metros.

The City further continued with its participation in the programmes of structures of government. In this instance the City played a key role in the NCOP's "Taking Parliament to the People" Programme that was held in the Gauteng Province. The City's intergovernmental relations discourse also finds expression in inter-municipal relations which are geared towards information exchange and benchmarking. This manifest itself in various forms inter alia information exchange, study visits, technical expertise and mentoring. To this end the City has engaged with Nelson Mandela Bay Metropolitan Municipality, Metsimaholo Local Municipality, Modimolle Local Municipality and Greater Garden Route District Municipality.

COMPONENT C: PUBLIC ACCOUNTABILITY AND PARTICIPATION

2.3 Public meetings

Ward committees

Ward councillors are responsible for representing the needs and interests of their constituents. Linked to this is the establishment of ward committees in terms of the Local Government Act, 1998, and Section 72 of the Municipal Structures Act, 1998. These committees intend to enhance participatory democracy in local government by assisting ward councillors in carrying out their mandate. Specifically, ward committees should boost the participation of the public in the affairs of Council. They also advise and make recommendations to ward councillors on matters that are affecting the ward.

Ward committees are constituted by portfolios including Housing, Transport, Public Safety, Finance and Economic Development, Infrastructure and Services, Community Development, Health and Social Development, Development Planning and Urban Management. Meetings are held monthly to discuss issues raised within the community and to obtain feedback from the ward councillor on significant issues and decisions reached at council.

The Speaker of the Council manages the effective functioning of ward committees, in order to ensure ongoing and improved community participation in local government.

2.4 IDP Participation and Alignment

The participatory initiatives employed by the City of Johannesburg are derived from Legislation and Council policies. In line with these pieces of legislation and policies, ward councillors are expected to convene one public meeting per quarter, to communicate the IDP and Budget processes, performance management, service delivery issues and other related matters that affects the ward. The target audience is usually members of the community, NGOs, residents' associations, policing forums and various stakeholders that are active in the ward. However, most councillors due to the vastness of their wards, break their wards up into sections, blocks and zones to have smaller meetings, to reach as many residents as possible.

Other methods that are being used for public engagements include social media. The information is disseminated through these platforms to reach out to those community members who are unable to physically attend public meetings. For the 2018/19 financial year; the following IDP/Budget community engagements took place:

Cluster conversations

The City held a total of 38 regional ward-cluster community consultation sessions (Cluster Conversations) across the City's 7 Regions between 31 October 2017 and 27 November 2017. These sessions were aimed at giving feedback on the issues that were raised in the 2017/18 IDP Review cycle, as well as to inform the 2018/19 IDP Review.

Regional Summits

Eight (8) Regional IDP Summits took place in April and May of 2018. The purpose of these summits was to allow the community to engage with the draft 2018/19 IDP Review and to provide feedback on the issues raised during the Cluster Conversations. The table below details the community participation reflections during the 2018/19 IDP review process.

Region	No. of Cluster	Attendance at	Attendance at	Verbal	Written
	Conversations	Cluster	Regional	Inputs	Inputs
		Conversations	Summits		
А	5	1030	220	89	289
В	3	360	101	65	118
С	6	1134	620	47	535
D	7	1413	800	148	1727
Е	6	1057	220	52	172
F	4	700	110	110	208
G	7	1193	609	45	554
TOTAL	38	6887	2680	556	3386

Table 13: Community participation reflections

102 emailed inputs were received from residents' associations and private individuals as well as 3000 social media comments.

COMPONENT D: CORPORATE GOVERNANCE

2.5 Risk Management

The City has affected an effective, efficient and transparent system of risk management and governance. The process is applied in strategy setting and linked to performance management system across the organisation. It is designed to identify potential events that may affect the City, and to manage such risks to be within the risk appetite. The City's Enterprise Risk Management (ERM) also provides reasonable assurance regarding the achievement of the City's strategic objectives, Mayoral Priorities and GDS 2040 outcomes. The risk governance structure, and related roles and responsibilities, is designed to ensure that risks are managed effectively throughout the City. The risks are linked to key performance indicators, and failure to manage or mitigate potential risk will have negative effect on service delivery and overall City performance as per the IDP and SDBIP commitments.

The Group Risk and Advisory department has developed a Risk Management Framework to guide and standardise risk management activities across the City. This Framework is aligned to the COSO Enterprise Risk Management Integrated Framework as well as considering the principles of the National Treasury's Public Sector Risk Management Framework, ISO 31000 and King IV Report on Corporate Governance. The Group Risk Governance Committee provides oversight on city-wide risk governance.

The risk management process if effected at the three organisational levels and has resulted in the following levels of risk registers being developed:

- City Wide Top Risk Register;
- Department and Entity Strategic Risk Register; and
- Department and Entity Operational Risk Register.

In the 2018/19 financial year, the city-wide risk assessment yielded 18 Top City-Wide Strategic Risks based on the Mayoral Priorities.

Table 14:	City-wide risk assessment
-----------	---------------------------

RISK		RISK			
1.	Inability to achieve set economic	10. Inadequate ICT governance			
	growth targets (GVA 5% by 2021)				
2.	Theft, fraud and corruption	11. Cyber and ICT security Threats			
3.	Poor employee performance	12. Deterioration of assets and infrastructure			
4.	Unavailability of suitable land for development	13. Non-Compliance to regulatory requirements			
5.	Inability to meet high increasing demand for service delivery (housing, water, electricity, transport)				
6.	Increasing crime	15. Environmental degradation			
7.	Inability to secure financial sustainability	I 16. Inadequate stakeholder engagement			
8.	Inability to integrate Smart City plans and resources	17. Poor Contract Management			
		18. Socio-economic ills			

In accordance with the City's Governance architecture, risk management reporting plays an important role in ensuring that management and oversight structures have a handle on the risks the City is facing and that mitigating activities are carried to control the risk.

2.6 Anti-corruption and Fraud

The City established an independent Department called Group Forensic and Investigation Service (GFIS), which is mandated to implement an Anti-Fraud and Corruption Strategy. Its aim is to prevent, detect, investigate and resolve all cases reported related to fraud and corruption, theft of City's assets, maladministration, illegal connections, breach of security and hijacked properties. Reporting and investigation of relevant cases is centralised at GFIS. Anti-fraud and corruption awareness programmes are implemented to educate officials and members of communities. Furthermore, there are other programmes such as vetting and joint operations which are implemented in collaboration with other law enforcement agencies (LEAs), in order to deter crimes committed against the City. The process for monitoring the implementation of recommendations emanating from investigations, is now being intensified and is guided by the Group Audit Committee (GAC).

2.7 Supply Chain Management

In the year under review, the City introduced probity audits of significant procurements of goods and services, e.g. all tenders above R5 million. No audits are conducted on procurement of goods and services under contracts secured by other organs of state (in terms of Regulation 32 of Municipal Supply Chain Management Regulations). It is recommended that the City should consider conducting probity audits on Regulation 32 procurement in future.

2.8 By-laws

In 2018/19, the following by-laws were gazetted:

BY-LA	AWS INTRODUCED DURING 2018/19	FY	
Item	Revised	PublicParticipationConducted Prior to adoption	By-laws Gazetted
		of By-Law	(Yes/ No)
		(Yes/No)

3	Air Pollution Control By-Laws	Yes	Yes
4	Air Quality Management Plan	Yes	Yes
5	Water Services By-Laws	Yes	Yes
6	Problem Properties By-law	Yes	Yes
7	Emergency Services By-law	Yes	Yes
8	Office of Ombudsman for the City of	Yes	No
	Johannesburg By-law		
9	Waste Management By-law	withdrawn	
10	By-law relating to Dogs and Cats	Yes	Yes
11	Joburg Market By-law	Yes	No

Table 15: Gazetted by-laws

Legal Framework for developing by-laws

In terms of Section 12(3) (a) & (b): The Local Government: Municipal Systems Act, 2000 ("the Systems Act"), "*No by-law may be passed by a municipal council unless all the members of the council have been given reasonable notice; and the proposed by-law has been published*

for public comment in a manner that allows the public an opportunity to make representations with regard to the proposed by-law."

Whereas Section 7(1) of the Gauteng Rationalisation of Local Government Affairs Act, 1998 ("the Rationalisation Act) provides that:

- a) To make a by-law, a municipal Council must pass a resolution declaring its intention to this effect.
- b) Subsection (2)(b) of the Act, the notice in which the public's comments are invited on a proposed by-law must state that:
 - comments are invited,
 - in summarized form what the by-law deals with,
 - a contact name and address where enquiries may be directed,
 - a place where copies of the by-law can be obtained,
 - where the by-law may be inspected, and
 - the period during which comments may be made which may not be less than a month and the place where comments on the by-law may be lodged.

2.9 Websites

Section 75 of the MFMA requires that a municipality places key documents and information on its website, including the Integrated Development Plan (IDP), annual report, the annual budget, adjustments budgets and budget-related documents and policies. As such the municipality's website is an integral part of its communication strategy, and if managed effectively, it will allow for easy access to relevant information, serve as a tool for community participation and improve stakeholder involvement in monitoring and evaluation of municipal performance, thereby giving impetus to the key elements of good governance, namely transparency and accountability.

Over the past performance year, it can be said that the redesigned website, which can be accessed through the domain name https://joburg.org.za/, has contributed to enhance the interactivity, transparency and openness of the municipality, which are all considered as positive values to increase citizen trust and improve citizens' perceptions about the City of Johannesburg (CoJ), and government in general. It is more user- and search-friendly, with cleaner content presentation and it boasts improved functionality, which includes:

- Social media integration and sharing of content on social media;
- Live-streaming;
- Search engine optimisation;
- Cross-browser compliance; and
- Mobile device compatibility, etc.

Apart from creating a new look and feel, over 13 000 pages were migrated from the old website. Content was edited and updated, where required, and content pages were redesigned for a fresh and cleaner presentation. The website is currently being updated on a daily basis through engagement with departments and stakeholders.

In terms of section 75(1) of the said Act, there are content shortcomings that need to be addressed by the City's senior management. Management action to ensure improved compliance by all departments, business units and entities, may include the implementation and monitoring of a website self-assessment checklist, which will give guidance to the Executive Management Team (EMT) about the financial and non-financial information and documents that should be published on the website.

To maximise the communication between the municipality and its internal and external stakeholders, the Group Communication Department is assigning pages to web officers in the City and training them on managing their web pages. Departments and stakeholders are also engaged in respect of the design of web pages, as well as the updating and maintenance of content.

The City's website is ranked amongst the top 10 high-traffic websites in the country, attracting over a million-page views per month (i.e. an average of 55 000 eyeballs per day). In 2018/2019, over 70 million website visits were recorded and as a result of continued efforts and online marketing tactics, the website reached over 12 million people.

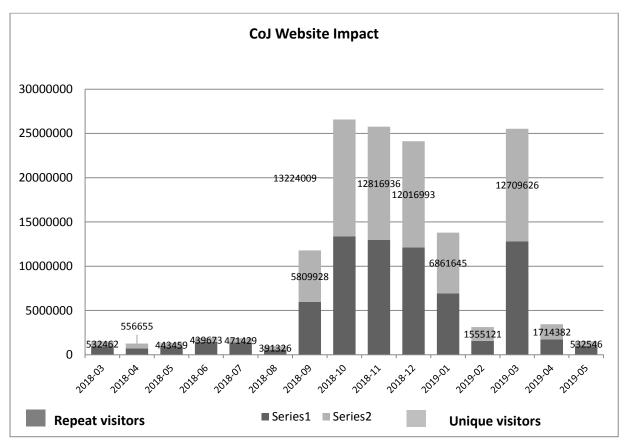

Figure 9: CoJ Website impact

As a communication tool, the redesigned website has improved social consciousness and citizen engagement by bringing the City's agenda and activities closer to the citizens. It has contributed to the improvement of services by opening dialogue with residents and using social media to drive solutions to service delivery queries.

As a media sharing platform it provides for a mixture of functionalities. For example, the new website allows users to access and share videos (YouTube), photographs (i.e. on social media), key documents, public notices, etc. The links to the City's social networks are useful for exchanging information and facilitating robust discussions about service delivery and other government matters. It can furthermore be used to send instant messages to citizens to announce municipal events through Twitter, for example, and it allows insightful perspectives on how the City's events, programmes and projects are perceived by citizens.

As an organisational learning tool, it has also improved knowledge management and will continue to transform relationships within the organisation and between different municipal entities.

The City will increasingly look at new ways of interacting with citizens to increase its own efficiency and to be more pro-active in its citizen relations. The last phase in improving interactivity on the website will include integration with the SAP CRM system. This will allow residents access to a "log-a-call" functionality for reporting service delivery failures. It is envisaged that the service will be available to residents from November 2019.

In 2018/2019 communication action was taken on a variety of fronts and the City's messages were amplified through the contents of the CoJ website. In the next financial year, the City will ensure that it maximises the value of its information by using the evolving website as a 'clearing house'1 for all information related to the City's programmes and activities in order to promote higher levels of transparency and encourage citizens to become involved in shaping their own future.

2.10 Customer Satisfaction Survey on Municipal Services

The City conducts a biennial Customer Satisfaction Survey (CSS) that aims to assess and enhance satisfaction with City services. This project offers our residents a space to express their views; and reciprocally allows the City the opportunity to show that we are listening and responding accordingly.

The CSS fieldwork was conducted from February to March 2019. Face-to-face Computer Assisted Personal Interviews (CAPI) were used to collect data from 5000 respondents across all seven regions of the City. The survey sample is representative at regional and ward level.

The overall 2019 CoJ Household Satisfaction Index is 73%. This is a significant increase in the satisfaction levels, up from 61% in 2017. The survey results show strong satisfaction, but there is still much work to do as the lower satisfaction scores are concentrated in informal areas and the inner city. The key perception areas to improve upon are customer care and public safety.

¹ An agency or organisation which collects and distributes something, especially information (Online Dictionary).

CHAPTER 3: SERVICE DELIVERY PERFORMANCE

COMPONENT A: BASIC SERVICES PROVISION

3.1 Basic Services Provision

3.1.1 Johannesburg Water: Water and Sanitation

Introduction

Johannesburg Water (JW) SOC Ltd was incorporated on 21 November 2000 and commenced business on 1 January 2001. Johannesburg Water is a municipal entity, wholly owned by the City of Johannesburg, and is mandated to provide water and sanitation services to the residents of Johannesburg. Its strategic objectives are linked to the shareholder objectives through the SDBIP and cluster plans and Johannesburg Water is assigned to the Sustainable Services Cluster. In addition, the relationship between the company and the shareholder is governed through the SDA, which is reviewed from time to time and prescribes the company's mandate. The entity provides services to an area stretching from Orange Farm in the south to Midrand in the north, Roodepoort in the west and Alexandra in the east. The entity has no competitors for the services offered, however, it should be noted that the provision of water and sanitation were ranked number one (1) and two (2), respectively in the 2018 City of Johannesburg Customer Satisfaction Survey.

The entity employs 2 716 people and functions within six (6) regions, with ten (10) networks depots and six (6) wastewater treatment plants. It supplies 1.6 billion litres per day of potable water, procured from Rand Water, through a water distribution networks of 12 288 km, 127 reservoirs and water towers, and 37 water pump stations. Wastewater is then collected and reticulated via 11 710 km of wastewater networks and 38 sewer pump stations. Johannesburg Water treats 926 Ml/day of sewer at its six (6) wastewater treatment works (WWTW), which include two biogas-to-energy plants where methane gas is converted to energy.

Significant Factors Affecting the External Environment

During the year under review, load-shedding was implemented due to limited power generation, which impacted the entire country. The impact for Johannesburg Water was that water supply was interrupted in areas where water needed to be pumped into supply towers or directly into the network.

Although the water interruption was not more than two (2) hours in most areas, challenges were experienced in the Crosby and Brixton reservoir supply areas. In these areas, load-shedding resulted in water interruptions of longer than eight (8) hours in some cases. These two reservoir complexes are linked. Water is pumped from the Crosby Reservoir to the Brixton Reservoir and then again from the Brixton Reservoir to the Brixton Tower. Since both the complexes were on the same load-shedding schedule, water could not be pumped from Crosby to Brixton and into the tower. This then resulted in the Brixton reservoir running low and once power was restored, the reservoir had to be recovered before pumping could commence into the tower. This then led to water outages of more than eight (8) hours in the tower area.

Sanitation (Waste Water) Provision

Sanitation Provision

As a service-delivery oriented entity, Johannesburg Water has identified key programmes to ensure the delivery of reliable and quality services to all residents, including marginalised areas. This entails the provision of basic sanitation in informal settlements and sewer infrastructure to various areas, including marginalised spots. About 6 528 households were provided with basic sanitation against a target of 4 834 households in informal settlements.

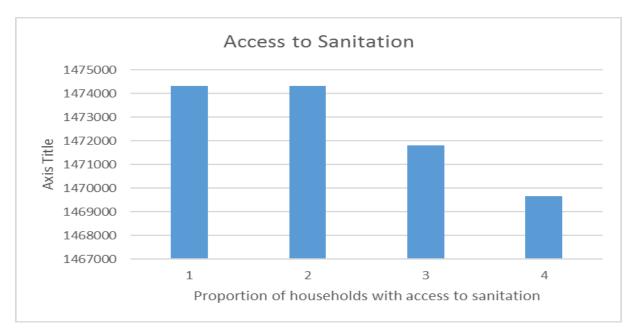

Figure 12: Access to Sanitation

3.1.2 Pikitup

Introduction

Pikitup Johannesburg Limited is a municipal entity, wholly owned by the City of Johannesburg (CoJ) as sole shareholder, and mandated to provide waste management services to the residents of Johannesburg. The entity's strategic goals are linked to the shareholder objectives through the Service Delivery Budget Implementation Plan (SDBIP) and cluster plans. Pikitup is assigned to the Sustainable Services Cluster. In addition, the relationship between the company and shareholder is governed by a Service Delivery Agreement (SDA) that is reviewed from time to time. The entity's strategy is further derived from Growth and Development Strategy (GDS 2040), the Integrated Waste Management Plan and the National Waste Management Strategy to reduce, re-use and recycle waste streams, while extracting value from the waste stream along the waste value chain.

The mandate includes the provision of services to ensure the overall cleanliness of the City's streets (approximately 9 000 kilometres), central business districts, open spaces and certain public areas. Pikitup provides waste collection services through three categories in the main, as follows:

- Level of service 1 (LoS-1) provided with 240 litre wheelie bins and once a week waste collection service;
- Level of service 2 (LoS-2) provided with multiple 85 litre plastic bags and once a week or more waste collection service; and
- Level of service 3 (LoS-3) provided with strategically placed 6m3 communal waste skips and bi-weekly to daily waste collection service.

In the year under review, the entity has provided weekly refuse removal services to approximately 1 182 997 formal households, (Level of service LoS-1), serviced and maintained 157 recognised informal settlement areas at multiple days a week. These areas consist of 249 819 units and 422 communal skips (Level of Service, LoS-3), rudimentary cleaning services has also been provided to 22 hostels within the City, which comprises litter picking, clearing of illegal dumping, bulk container removal and domestic waste collection depending on the requirements of each hostel and 107 055 waste was disposed and diverted.

Monthly clean-up campaigns such as *A Re Sebetseng*, in partnership with key stakeholders, were implemented across the City's seven regions; and 34 illegal dumping spots were eradicated and rehabilitated into food gardens, parks and recreational centres. A total of 32 598 wheelie bins were distributed to formalised areas. The 2019/20 business plan has been aligned to *Diphetogo* and waste-minimisation programmes, namely:

- Further placement of street litter bins to curb littering at high density precincts and walkways and the enhancement of the separation at source programme to ensure maximum participation by the residents of the City of Johannesburg;
- Continued distribution of 240I wheelie bins at formalised areas that have not been provided with bins previously to appropriately contain and curb illegal dumping of household waste (provision of LoS:1); and
- The improvement of refuse containment and collection in informal settlements, hostels including backyard dwellers by providing waste bags (85I) and strategically placing 6m3 skips (LoS:2 and 3 respectively). This supports the City's pro-poor priority.

Comment on Waste Management Services' overall performance

During the year under review, the entity implemented a number of capital projects to the value of R74 581 044.91 against the budget of R86 217 000,00 million. This translates to an achievement of 86% against a target of 95%. The non-achievement of the target was mainly due to delays in the procurement process and non-availability of internal audit support with regard to probity. The entity is addressing this challenge by means of the appointment of audit service providers to support SCM committees on audit requirements on an ongoing basis.

The capital plan for 2019/20 continues to focus on rolling out projects as well as the renewal of infrastructure and capacity upgrades, in line with the entity's waste minimisation plan. The capital budget for 2019/20 was reduced by R77.8 million (R180.047m – R102.250m). Capex projects that are on the acquisition for implementation in the 2019/20 financial year, have been procured and will be implemented in time to ensure that SDBIP targets are met.

3.1.3 City Power

Introduction

As the electricity distribution service provider of the City of Johannesburg, the core competency of City Power Johannesburg (SOC) Ltd (City Power) is to purchase, distribute and sell electricity within its geographical footprint. City Power is not the sole provider of electricity services for the city. The areas not covered by City Power (predominantly Soweto and Sandton) are serviced by Eskom.

The Council, by means of a Service Delivery Agreement, regulates the service in respect of the following: financial issues (such as tariffs and capital expenditure), human resource issues (such as skills development), delivery targets (maintenance of assets and addressing assets) and standards of customer care.

City Power Strategy

The mandate of City Power is to provide reliable supply of energy to the City of Johannesburg by implementing the VUCA strategy. It entails the strategic use of a mix of technologies and energy sources while maintaining the financial sustainability of the business. The value proposition for City Power derived from the company strategy is shown in the figure below.

Figure 13: City Power Value Proposition

City Power was impacted by external and internal factors that have been taken into account in its 2019/20 strategic focus. These include the slowdown in economic growth, emergence of disruptive technologies and the fourth industrial revolution, not to mention the impending unbundling of Eskom. Internally, factors such as the ageing infrastructure, increasing demand for quality service delivery, financial sustainability, escalating unplanned outages, and the need for an enabling culture and leadership have also been considered and decrease in numbers. These factors contribute to City Power finding itself in a volatile, uncertain and complex environment.

To navigate this environment, City Power developed a five-year strategy dubbed VUCA. The strategy aims to ensure that the company becomes financially sustainable, it's a smart utility, it's customer-centric and boasts engaged and skilled employees. The company's five-year strategy and supporting plan are summed up in the shareholder *vision, understanding the sustainability game plan, re-gaining customer confidence, and making our people more agile,* which is aligned to the City's imperatives. The VUCA Strategy is outlined below:

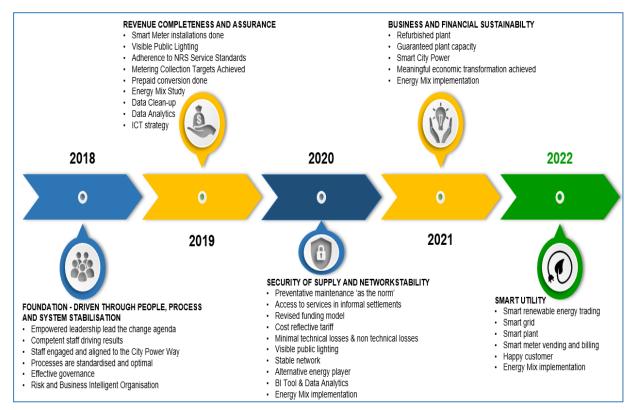

Figure 14: VUCA Strategy

Strategy Execution

The performance on the VUCAs strategic objectives (short, medium and long term) is shown in the figure below:

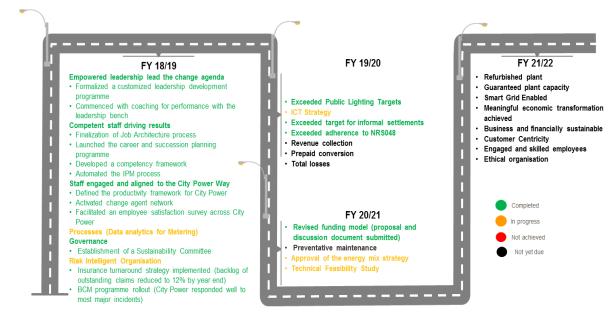

Figure 15: Performance on the VUCAs strategic objectives

In response to changes in the market and industry, City Power has developed a framework to source alternative energy in terms of the GDS 2040, the City's Energy Plan of 2017 and the Integrated Resource Plan (IRP). The framework was drafted in response to the Minister of Energy's stated intent to permit municipal distributors to procure power from sources other than Eskom. The City Power board of directors (BoD) has given a mandate to comment on the IRP dealing with the allocations for embedded generation and energy storage systems.

The management team will continue to fully execute critical priorities of the business, as listed below:

- i) Continue to derive and maintain benefits emanating from the Revenue War Room;
- ii) Work with the City to on-board and integrate the device management back into City Power operations, including the impact on the labour and processes;
- iii) Finalise the feasibility study and embark on a procurement process for the energy mix in order to execute City Power's critical strategic objectives of "partnerships and collaborations";
- iv) Agree and finalise the alternative funding solutions and commence discussions with Group Finance and National Treasury; and
- v) Finalise the labour memorandum of agreement as part of building a resilient and engaged workforce.

Our customer profile

The service is provided to customers in five (5) main living standard measures (LSM), as seen in the tale below:

	2016/17	2017/18	2018/19

Total number of households	413 877	385 567	375 711

Table 31: Electricity Service Delivery Levels

Capital Projects

Capital expenditure is driven by planned network and asset life-cycle maintenance to support operational reliability, new environmental regulations and renewable energy generation. This require early considerations for major capital projects and related funding, as well the consideration of the impact of finance on the balance sheet of City Power and the City.

The City is confronted by a backlog in electrification projects, which is exacerbated by an influx into the City by rural South Africans and migrants in search of better opportunities. This increase is putting a strain on the City's infrastructure, including the electrical network that is already old and decaying as a result of historical disinvestment. Moreover, new technologies that include the roll out of SCADA to enable remote controlling of the substations to improve security and visibility of the network are necessary as these will, over time, enable self-diagnosis that reduces human intervention and improved efficiencies. While this is the case, capital expenditure that is allocated to City Power is never adequate to address these infrastructural needs.

The current funding arrangement for City Power is mainly dependent on external loans arranged by the City of Johannesburg as well as grants. In terms of the agreement between City Power and the shareholder, all financing arrangements of City Power are handled by the City's Treasury office. Internal funds generated by City Power, which can be deployed towards infrastructure maintenance, have over time diminished owing to poor financial performance. Before 2015, City Power provided electricity to proclaimed areas, since then that company

provides service to formal and informal settlement. The table below highlights the number of additional households electrified in informal settlements:

Service objectives	Outline Service	2018/19		2019/20		2020/21

Strategic focus

In the year ahead, management will focus on improving the finances of the organisation. Billing and collection impact heavily on the sustainability of the energy business and they have become major concerns and focus areas. Plans have been developed to turn the situation around and are now at a stage of implementation. City Power also continues to focus on preventative maintenance to reduce outages and improve restoration times to increase customer confidence and allow it to collect the revenue it sorely needs. Approximately 80% of City Power's energy is currently generated by massive coal-fired power plants. These plants are old as they were built in the 60s and 70s. Eskom will have decommissioned 12 000-megawatt by 2030. This is a third of the utility's generating capacity. Nuclear plants provide near constant electricity and emit almost no greenhouse gases. Despite those advantages, future nuclear development in South Africa is extremely unlikely as it is hugely expensive. As a signatory of the Paris Agreement on climate change, South Africa has committed to reducing carbon emissions. This implies it will gradually close most of the existing ageing coal plants. The reduction of cost for the renewable energy has significantly altered the economics relating to the energy sector globally. By 2030, it is estimated that the national grid will be a mixture of:

No	Source of Energy	Percentage contribution
1	Wind	15%
2	Gas	16%
3	Photovoltaic	11%
4	Nuclear	2%
5	Coal	45%
6	Others	11%
Tota	al	100%

Table 38: National Grid Mix

3.1.4 Free Basic Services and Indigent Support

Introduction: Expanded Social Package

The package

The Department enhances and expands the core logic of the existing special cases policy for municipal service subsidies (more generally known as the indigent or social package policy) but combines it with a single-window approach to social assistance delivery and – critically – alters the targeting mechanism from a household based means test to an individually tied poverty index. During 2018/2019, the unit registered 99 285 individuals on the database which comprised new, re-registrations and South African Social Service Agency (SASSA) Grant Recipients who accessed benefits via the automated platform.

Objectives:

> Access to social package by qualifying households;

- Database management;
- Streamline and coordinate the access of vulnerable groups to other basket of services linked to the programme;
- > Align and coordinate the FBS benefit pass through targeting the City's indigents;
- Stakeholder engagement; and
- > Marketing and communication of the programme.

Operations

During the financial year, 39 sites operated as opposed to 41, due to theft of equipment in Lenasia South and Vlakfontein.

Performance highlights

The following achievements can be reported for the year under review, namely:

In July 2018, the unit successfully managed to roll-out the registration footprint to six (6) informal settlements, as listed below:

Name of Informal Settlement	Ward	Region
Slovo Park	119	G
Elias Motsoaledi	24	G
Freedom Park	24	G
Thembelihle	8	G
Protea South	10	G
Organic Market	81	E

Table 39: Registration footprint

Internal data cleansing towards maintaining a credible database;

> Creation of 127 EPWP employment opportunities; and

ESP poverty index income bands increased by 4.9 % average Consumer Price Index (CPIX), based on figures made available by Statistics South Africa allowed more individuals to access FBS.

Sanitation	2527	620	2375	0	620	4834	6528

Table 40: Free Basic Service Policy objectives taken from the IDP

Challenges

- The unit has a highly complex coordination role and has no formal control over the last mile delivery of Expanded Social Package benefits. This means the unit must constantly exercise oversight over benefits passed.
- Old/aging/lack of network infrastructure limited the roll-out of the programme to other informal settlements, including other identified city centres.
- > Theft of capital and leased equipment.
- > Households not collecting FBS.
- Households not purchasing services such as pre-paid water and pre-paid electricity, affect benefit pass through, even though they may have registered to benefit from FBS.
- Master data from entities is corrupted and therefore inaccurate account information is presented by clients during registration.
- > Conversion of households from conventional to pre-paid electricity accounts.
- Communal facilities in areas such as Orange Farm and Alexandra limit registration for FBS, as there is no account number to link services.
- > Households bridging electricity.

Table 43: 2016/17 Free Basic Services – Expanded Social Package

COMPONENT B: HOUSING SERVICES

3.2 Housing and Social Housing Services

The City of Johannesburg's housing backlog is estimated at over 300 000. It's made up of informal settlements, overcrowding in hostels, the non-regulated backyard rental sector, inner city overcrowding, housing waiting list and homeless people in general. To tackle housing demand, a concerted effort at vertical and horizontal level is required. This will also require the human settlement sector to upscale housing delivery and to increase its efforts in partnering with the private sector and meaningfully engage with the communities in general.

In the 2018/2019 financial year, Housing focused on: upgrading informal settlements, construction of mixed housing opportunities, construction of serviced sites, issuing of title deeds to beneficiaries, upgrading and surfacing roads in existing RDP projects and the installation of solar geysers.

The targets of these programmes fell short in addressing the City's ever-increasing housing backlog. The Executive Mayor and his political administration raised concerns and insisted on having Housing make a meaningful impact on the current backlog. To this end, the Executive Mayor has introduced *Diphetogo*, game changers, for the remaining period of his political term, 2018/2019 – 2020/2021.

According to *Diphetogo*, the Department of Housing and the Johannesburg Social Housing Company (JOSHCO) must deliver 100 000 housing opportunities and 20 000 units in the inner city. These housing opportunities will be composed of rental units, free housing (RDP), serviced sites/stands, and bonded houses. It is envisaged that these opportunities will be delivered in partnership with the private sector and JOSHCO delivering on the social rental units.

This requires the department to reconsider its approach in the development of the 2019/2020 business plans and the MTEF targets. The programmes and targets must be in line with Housing's *Diphetogo's* programme and targets.

The increase in the number of units is limited by funding the City receives from the Provincial Government as the Human Settlements Development Grant (HSDG). This grant has been reduced and that cuts the number of housing opportunities that can be delivered by Housing.

3.2.1 Housing Department

Introduction

The Department of Housing is mandated to deliver housing opportunities that provide alternative tenure options; are located close to economic opportunities; are adequately serviced; are affordable; and are preferably found in high-density environments.

The Housing Department derives its mandate from the Constitution of the Republic of South Africa 108 of 1996, which says that: -

- "Everyone has the right to have access to adequate housing";
- Housing is a concurrent function (National and Provincial); and
- National and Provincial governments must assign the Housing function, subject to any conditions, the administration of housing programmes.

The Housing Act 107 of 1997, defines how municipalities must be accredited with regard to the "Administration of national housing programmes by municipalities". The City of Johannesburg was accredited to administer the national housing programmes, as defined in the Housing Code of 2009 on 4 March 2011. The Housing Code defines the accredited municipality, the City of Johannesburg, as the developer of programmes and projects in its jurisdiction.

Comment on overall performance

In the 2016/17 financial year, Housing managed to construct 3418 housing units, and in 2017/18, 2103 units were completed.

Human Settlement Development Grant spend for 2016/17 was 98.6%, and in 2017/18 it was at 65.745%. In 2018/19 it reduced to 58.02%. The capital spending target was achieved at 92.74% in 2016/17, and 86.80% in 2017/18, and then increased to 98% in 2018/19.

Key challenges in the environment

Internal factors:

- Low rental collection;
- High vacancy rate;
- Continuous change of leadership; and
- Inconsistent strategic direction due to change of leadership.

External factors:

- Too little housing: The current housing backlog in Johannesburg is in excess of 300 000 due to immigration. This is evident in sprawling informal settlements, an overcrowded inner city, and mushrooming backyard shacks in township areas.
- Too expensive housing: The property market in Johannesburg is too expensive for the poor to afford in terms of buying or renting. This has seen prices double and triple over the past five years and the cost of newly built housing has also escalated. This has made housing unaffordable to many city residents and most first-time buyers and has also limited the purchasing power of the state subsidy. A key component of the high cost of new housing, is the cost of land and the shortage of it, which has also increased exponentially in recent years. In the context of rising unemployment and high levels of income poverty in the City, the cost of housing has become increasingly difficult for Johannesburg households to bear. There is a clear need to create opportunities for people to move out of subsidised housing when their income improves, however, the current profile of available housing in the city makes this impossible.
- Access to and affordability of well-located land (including land in the infrastructure/amenities-rich inner city and other old centres) for housing development: The prevalent entitlement to land in the periphery and buildings in the core (informal settlements/squatting), has meant that housing development has in the past years consolidated rather than reversed the disjunctive spatial patterns set in motion by apartheid planning.
- Proclamations of townships: Development Planning and MOEs have yet to approve or relax the townships where the second directive properties were built in order to enable Housing to register and issue title deeds to qualifying beneficiaries.

Performance highlights

- The department has issued a total of 8,933 title deeds against a target of 8,900 title deeds to beneficiaries;
- For the past 3 years the department has created a total 5,929 housing opportunities against a target of 5,917 during the current spending the HSDG allocated budget;
- Gauteng Premier launched Riverside View Mixed Project. This Housing Project will yield 10 000 housing opportunities;
- 50,246 km of road was completed this financial year against the target of 50km; and
- The entire USDG and CAPEX budget for the 2017/2018 was spent.

3.2.2 Johannesburg Social Housing Company

Introduction

The Johannesburg Social Housing Company SOC Ltd (JOSHCO) was established in November 2003 and received its mandate in March 2004 from the City of Johannesburg (CoJ). JOSHCOs mandate is to provide and manage affordable rental housing for the lower income market as an integral part of efforts to eradicate the housing backlog of CoJ. JOSHCO is a registered social housing institution and is accredited by the Social Housing Regulatory Authority (SHRA).

The core business of JOSHCO includes: the development of social rental housing; refurbishments, upgrading and management of Council-owned rental housing properties (including hostels); housing management and the refurbishment, conversion and management of inner city buildings into social housing units. As a municipal-owned entity, JOSHCO is required to comply with all the relevant legislation (such as the Municipal Finance Management Act; Municipal Systems Act and the Companies Act). The policies and strategy of JOSHCO are strongly influenced by the vision of the City, as outlined in the Growth Development Strategy 2040 (GDS) and the Integrated Development Plan (IDP).

Performance highlights

- In 2018/2019, JOSHCO delivered a total of 297 social and affordable rental housing across the City of Johannesburg through brownfields (inner city conversions) projects. The units were delivered from Plein Street (216 units), Claim Street (48 units), Durban Street (32 units) and 1 unit from the Chelsea project. Though the units are not yet occupied, they reached practical completion stage by end of the 2018/19 FY;
- The company managed to reduce the extensive application form to a reasonable number of four (4) pages and it is loaded on the property management system for future use;
- The company was able to pay all service providers within 30 days of receiving invoices.
 This ensures that SMMEs who rely on these payments remain sustainable;
- On average, JOSHCO spent 80% of its capital budget on companies that are 51% black owned and 17% on SMMEs that operate within the vicinity of its projects. The entity continues to promote the BBBEE principles in its operations and contributes to the economic development of Johannesburg; and

• JOSHCO has managed to spend R313 192 665 of its allocated R321 000 000 capex, translating into 98% performance against the annual target of 95%.

Key challenges

The main challenge that JOSHCO encountered during the year was the loss of potential revenue due to rental boycott. JOSHCO experienced vandalism in some of its projects such as Devland, where approximately 75 units were vandalised.

Comment on overall performance

JOSHCOs revenue collection target for the 2018/19 financial year was 100% (2017/18: 92%) of billing. We have performed 28% below budgeted target, as on average, we collected 72% (2017/18: 84%) for the financial year. JOSHCO was able to spend 98% of the budgeted R321 million capital budget, which is evidenced by the development of 297 units against a target of 360 units.

COMPONENT C: ROADS, TRANSPORT AND MUNICIPAL BUS SERVICES

3.3 Transportation Services

Introduction

The transport sector of the City of Johannesburg comprises the Transport Department, the Johannesburg Roads Agency (JRA), and the Metropolitan Bus Services (Metrobus).

The Transport Department is responsible for setting the sector's strategic direction and policy framework; transport planning; transport promotions; road safety; public transport infrastructure and the provision of public transport services including the rollout of Rea Vaya BRT system.

The Johannesburg Roads Agency (JRA) is responsible for the planning, design, construction, operation, control, rehabilitation and maintenance of the roads and storm water infrastructure in the City of Johannesburg. This responsibility includes the construction and maintenance of bridges/culverts, traffic signals/traffic signal systems, footways, road signage and road markings.

The Johannesburg Metropolitan Bus Services (Metrobus) is responsible for the provision of quality bus services to Johannesburg residents.

Strategic agenda of Transport services

The strategic agenda of the transport sector is aligned to the City's strategic priorities for 2016-2021, including *Diphetogo*. Central to the transport agenda is pro-poor development and the promotion of economic development by means of addressing the scourge of congestion, enhanced mobility on city roads and spatial transformation.

The transport sector's goals which guide the delivery agenda can be summarised as follow:

- Building a leading, responsive transport sector in the City which works in partnership with stakeholders and residents;
- Developing integrated transport plans at City wide, regional, local and precinct level to

ensure the alignment of land use and spatial planning and that each transport mode plays its rightful role;

- Building a value-based culture to enable behavioral change towards transport issues including use of public transport and road safety;
- Providing high quality, safe, accessible, affordable and environmentally friendly public transport services within 1 km of places of work and residence and that travel times are reduced;
- Building, maintaining and managing our road, public transport and non-motorised transport infrastructure and systems to ensure safety, accessibility and mobility for all road users including pedestrians; and
- Transforming the construction, maintenance and management of storm water to respond to climate change and water scarcity and ensure the safety of residents and infrastructure.

3.3.1 Transport Department

Performance Highlights

During the period under review, various projects and programmes were implemented as summarised below:

- (i) Rollout of the Rea Vaya Bus Rapid Transit (BRT) system The Rea Vaya BRT system is aimed at providing fast, safe, affordable, effective, efficient and convenient public transport services in areas of high demand. It is also aimed at transit-orientated development, road safety and economic empowerment of mini bus taxi operators. The Rea Vaya project is implemented in phases with both phase 1A and 1B operational and operating on average 52 710 passenger trips per working day. Phase 1C(a), the 3rd phase, is currently being implemented taking into account the lessons learnt from the first two phases (i.e. 1A and 1B). The following progress can be reported:
 - Phase 1A starts from Thokoza Park in Soweto to Ellis Park with phase 1B running on the route from Soweto to the Johannesburg CBD past Noordgesig, New Canada, New Clare, Westbury, Coronationville, Westdene, Auckland Park and Parktown.
 - The services are run through two (2) BOCs (Bus Operating Companies),

namely: Piotrans and Litsamaiso, owned by previously disadvantaged public transport operators. The relationship between the City and these two companies is managed through Bus Operating Contract Agreements (BOCAs) and the companies are paid on a fee per km basis.

- An annual average of 52 710 passenger trips per working day ridership can be reported for the review period.
- Phase 1C(a) which stretches between Johannesburg CBD, Alexandra and the Sandton CBD, is currently being implemented. Progress on construction of this route is as follow:
 - Progress on the remaining sections of roadways on the trunk route is at 40%;
 - Average progress on the nine (9) phase 1C(a) stations is at 80%, albeit disruptions and work stoppages;
 - Phase 1 and 2A of the Rea Vaya Selby depot is in place. Progress on the implementation of phase 2B is at 45%. The facility is expected to be completed by June 2020;
 - The construction progress of phase 1 of the Alexandra depot is at 65%;
 - Work on the rehabilitation of Rea Vaya roads and stations infrastructure is in progress;
 - In terms of ITS (Intelligent Transport Systems), the fibre cable was installed. The screens were also installed at the new operations control room centre; and
 - Negotiations with affected public transport operators on phase 1C(a) is underway.

The table below displays the Rea Vaya Bus rapid Transit (BRT) operational service statistics.

		2017/18	2018/19		2019/20
De	tail	Actual No.	Target	Actual No.	Estimate No.
1	Passenger journeys	Rea Vaya : 49,062	53 000	52 710	53 000
2	Seats available for all	Rea Vaya :	108,801	108,801	108,801
	journeys	108,801

9	Proportion of journeys cancelled	Rea Vaya : N/A	2%	0.8%	2%

Transport transformation

This mainly encompasses the transformation of public transport operators, particularly mini bus taxis industry. The milestones for the period under review include:

- Hundred (100) mini bus taxi operators were trained through Wits School of Governance towards running successful businesses. This is the second group as 100 operators were also trained during last financial year;
- As reported above, the negotiations with the affected public transport operators on phase 1C(a) route are underway towards the establishment of a Bus Operating Company (BOC) owned by the affected operator;
- Preliminary verification for affected public transport operators was done;
- The collection of operators' information for regularisation was completed. It is anticipated that the regularisation process will be completed in the new financial year; and
- Engagements towards partnering with mini bus taxi and bus company representatives to operationalise the long distance and cross-border Johannesburg International

Transport Interchange (JITI) in the Inner City. This facility which accommodates crossborder operations will ensure the safety and dignity of residents and visitors.

Transport infrastructure includes public transport facilities, complete streets and managed lanes. The Transport Department is responsible for the design, construction and upgrading of public transport facilities. The following can be reported in this regard for the period under review:

Public Transport Facilities

- A new contractor at JITI (Johannesburg International Transport Interchange) was appointed after the previous one was liquidated. Work towards the completion of this facility which will accommodate cross border busses, is in progress;
- The construction of Drieziek is underway albeit challenges which included ongoing interruptions and work stoppages;
- The detail designs for small commuter public transport facilities at Tshepisong, Zola, Orange farm and Zakariya Park were completed with construction work commencing in the new financial year; and
- Concept designs for a public transport facility at Kya Sands were completed with work on detail designs commencing in the new financial year.

Complete streets

Complete Streets are streets constructed or retrofitted to accommodate all road users (pedestrians, public transport, motorists, etc.). These streets also enhance the safety of road users and the following can be reported for the period under review:

- The complete streets projects at Dube, Merafe and Mzimhlophe are being completed;
- The detail designs for complete streets on the route between Orlando East to Soweto UJ were completed with construction work commencing in the new financial year. This project is funded through external funding from KfW (German Development Bank); and
- The conceptual designs for complete streets links to Chiawelo railway station are completed. Detail designs will be undertaken in the new financial year.

Managed lanes

Phase 1 of managed lanes at Eloff Street in the Inner City is in place. Phase 2 of the project will be completed in the new financial year.

Cycling promotion

The Department annually distributes bikes to disadvantaged learners as part of cycling promotion. In the 2018/19 financial year, the following can be reported:

• Two thousand and ninety-six (2096) bikes were distributed. The areas covered included Orlando, Alexandra, Orange Farm and Sandton. The beneficiaries included learners and low-income earners.

Road safety education, behavioural change and partnerships

As part of promoting safety of road users and behavioural change, the Department implemented seventy-seven (77) road safety education and outreach programmes in partnership with stakeholders and the community. These interventions were implemented at various areas across the city.

During October 2018, the Transport Month programme was implemented in partnership with stakeholders and the community. The programme included the following:

- The commencement of Metrobus digital campaigns: dissemination of safety messages targeted at general public;
- Launch of Metrobus emergency response three weeks training programme;
- Region A senior citizens: experiencing public transport;
- Safety on roads: quality road marking;
- Joburg Public transport: Kasi-to-Kasi public transport adventure;
- Transport career exhibition at Sci-bono;
- Rea Vaya safety: Anti-vandalism;
- Metrobus: aspired women owned SMMEs development programme;
- Freedom ride: Region B, D and F; and
- Metrobus customer campaign.

Strategic transport plans

The following can be reported for the period under review:

- The citywide integrated public transport network (IPTN) plan was developed and will be submitted for approval in the new financial year. Work on the implementation plan is in progress; and
- Work on the Greater Soweto business plan is in progress. The stabilisation plan is part of the IPTN plan and its implementation plan is in progress.

Transport regulation

The transport by-laws are being reviewed. The next phase will be the public participation process which will be undertaken in the new financial year.

3.3.2 Johannesburg Roads Agency

The Johannesburg Roads Agency or "JRA" is a municipal-owned entity that was established by the City of Johannesburg in 2001. The primary mandate of the entity is the design, construction and maintenance of roads, road reserves, storm water infrastructure, and roadsrelated infrastructure such as traffic signals and road-signs. As a service delivery agent of the City of Johannesburg, the JRA has a socio-economic responsibility of balancing available public funds and the service requirements of the ratepayers and road users of Johannesburg. The JRA Strategy 2022 focusses on the following four strategic pillars, namely:

- Service Delivery;
- Good Governance and Sound Financial Management; Human Capital Development and Management; and
- Stakeholder and Customer Relations.

Roads Infrastructure Services

Comment on overall performance

Aligned to the City's pro-poor development focus and the capital investment work, the JRA focused on upgrading of road infrastructure, rehabilitation and reconstruction programme, resurfacing and bridges programme. Some of the key milestones achieved by the JRA in the 2018/19 financial year include:

• Launch of the asphalt plant at the beginning of the financial year;

- Achievement of 74.73% of its pre-determined objectives on the corporate scorecard;
- Contribution to institutional performance by meeting its targets roads resurfacing (291.05Lkm) and roads upgrading (25.014km) contained on the City-wide Institutional Service Delivery Budget Implementation Plan (SDBIP);
- Capex expenditure of 99% against a target of 95%, inclusive of allocated grant funds contributing to the completion of several planned infrastructure projects as well as operating budget expenditure at 91%;
- 97.74% Broad Based Black Economic Empowerment (BBBEE) spending against a target of 75%; and
- The Company exceeded its year-to-date targets for several indicators, including EPWP opportunities created (1512) against a target of 1500; and the number of SMMEs, and supported (153) against a target of 100.

During the financial year several bridges were identified to have a variety of structural defects and require either rehabilitation and or reconstructions. The implementation of these bridge projects as at various stage based on the scope of works. Some like the M1 Double Decker Bridge, Selby and Karsene Bridge and South are already at construction stage whereas most at different design stages.

3.3.3 Metrobus

Introduction

Metrobus is a provider of conventional bus services poised to become an important player in the Integrated Public Transport Network, contributing to the provision of seamless transport services to the citizens of Johannesburg. The 2018/19 financial year has been a year full of activities aimed at improving the service offering to our commuters.

The year was focussed on realigning the organisation to be capable to deliver a reliable and efficient service. We have consistently delivered the service we advertise, operating 93% of the planned trips. This is a significant improvement in comparison to the 87% operated in the previous financial year. We also exceeded our on-time performance target of 95% from the starting point; achieving 97% for the vast majority of morning and afternoon peak periods. This achievement came as a result of having leased ten (10) articulated buses with a carrying capacity of approximately one hundred and fifty (150) passengers per bus as well as on-going matching of schedule with available fleet (trip rationalisation). This year saw a 66% ridership in respect of route 05 and 16% for route 80, augmented by the introduction of articulated buses.

Overall, ridership in the 2018/19 financial year was at 8.1 million. Ridership has been declining since 2014 due to various factors, including bus fleet availability affecting service reliability and changes in customer mobility. Another important factor that has adversely impacted the measurement of rides, is the obsolete revenue collection system which makes it impossible to accurately account for all the rides.

In an effort to re-establish sustained ridership growth, we launched a market research assessing travel demand patterns and route performance in the year under review. The outcome of the market research will inform ridership growth strategy, revenue strategy, fleet management strategy, route rationalisation strategy as well communications and marketing strategy. The overall scope for the project consists of a determination of the market segment that Metrobus currently services, including the sales volume in the industry, as well as ascertaining market size, key role players, current and potential competitors, the need for the service and potential risks. The research includes mapping target market characteristics, spending habits, locations, as well as industry buying patterns.

Performance highlights

- Introduction of new Sales Outlets
- Tag & Ride Campaign
- Management Competency Enhancement: International Training
- C40 Cities participation
- Global Citizens Festival: MANDELA 100 YEARS CENTINARY
- Strides in Green Economy: Fuel Technology Project
- Occupational Health and Safety
- Commuter Health and Safety
- Explored new frontiers in Marketing and Communication
- Celebrating Women at Metrobus
- Take-a-Girl-Child to work participation
- 93 Jobs created

Opportunities

- Increase in passenger numbers
- Increase reliability of service
- Opportunity to meet unmet demand, currently estimated at 2.5 million potential users
- Opportunity to be leader in the use of green fuels

Challenges

- Inadequate fleet availability
- Inadequate investment in technology
- Vacancy rate

Planning Strategies

- Re-fleeting Strategy Strategy formulated and approved by board of directors (BoD).
- Route Rationalization Strategy Research has been completed towards the outcome of ensuring that fleet is more appropriately deployed in pursuit of optimal satisfaction of present need and meeting unmet demand.
- Digitisation The introduction of intelligent transport systems into Metrobus operations. A road map in this regard in alignment with City transport has been developed.

Delivery Priorities

- Meeting the target in relation to trips operated versus trips planned. The target in this regard was 90% for the year under review and a performance level of 95% was achieved.
- Meeting of target on passenger trips per working day, set at 42 000. A performance level of 33 237 was reached.
- Meeting targets in relation to blameworthy accidents. The target in this regard is an accident rate of less than 0.75 per 1000 kilometres travelled. A performance level of 0.76 was achieved.

Metrobus IDP Deliverables

COMPONENT D: ECONOMIC DEVELOPMENT AND PLANNING SERVICES

3.4. Economic Development and Tourism

Introduction to Economic Development

The Department of Economic Development (DED) is mandated to provide strategic economic direction to the City, and to help steer it towards the achievement of 5% economic growth and a reduction in unemployment to under 20%, by 2021. The mandate of DED is drawn from the economic objectives of the IDP priorities and GDS outcomes, namely to:

- Support the alignment of City plans and policies towards achieving a 5% economic growth rate and bringing down unemployment to less than 20% by 2021;
- Support and promote the development of SMMEs;
- Facilitate the creation of an enabling environment that attracts investment and provides dedicated incentive packages for investors, with a focus on the Inner City;
- Entrench Johannesburg as a leading tourism destination in collaboration with key stakeholders;
- Enhance collaboration with public and private sector stakeholders; and
- Ensure business regulation, compliance and enforcement within the informal trade sector.

Economic Development Strategy

The Department is also mandated to drive the implementation of the City's approved Economic Development Strategy, which has a longer-term horizon beyond the 5% growth target. The strategy aims to move the City toward:

- Increasing localised production replacing imports through getting firms in Johannesburg and South Africa to become competitive suppliers;
- Increasing economic activity in different regions within the City promoting increased economic growth in regions based on their different profiles and comparative advantage;
- Increasing small entrepreneurship activity through increased collaboration with the private sector value-chains and City supported-SMME hubs; and
- Increasing connectivity with the rest of Africa through increased trade and investment links with the rest of Africa, including targeted development of economic precincts that reflect that Johannesburg is the economic hub of southern and eastern Africa.

Projects

Some of the Department's projects include the following:

i) Inner City Economic Development and Investment Roadmap / Masterplan

The Inner City Economic and Investment Roadmap is a partnership between the City of Johannesburg and the French Development Agency (AFD). The roadmap is developed in collaboration with local stakeholders, city/government departments and other relevant entities. The strategy includes the following:

- A definition of 'inner city' (section 2);
- Importance of the inner city (section 3);
- Situational analysis of the inner city economy (section 4);
- Future trends (section 5);
- Vision for the inner city (section 6);
- Proposed economic strategy for the inner city (section 7); and
- The way forward (section 8).

The Inner City Office directs the Department in the development of the roadmap and coordinates the implementation of it. The roadmap is intended to provide strategic economic development direction to the City as well as much-needed insight into crucial interventions to promote the redirection of economic and investment promotion within the inner city.

The following key milestones were achieved during the year, namely:

- Final draft roadmap completed in May 2019;
- Steering Committee Workshop held on 14 May 2019 to discuss final findings and recommendations with key departments and entities;
- Presentations were made to the Inner City Technical Cluster on 23 May 2019, the Inner City Sub-Mayoral on 30 May 2019 and the Economic Growth Sub-Mayoral on 12 June 2019; and

• The report for approval was completed, but deferred to July 2019 following a request that the committee be provided with more time to engage the detailed strategy. The deadline for comments by the committee was at the end of June 2019.

ii) Cross Border Shopping Precinct Implementation

The Department appointed a service provider to commission work on the Cross-Border Shopping Precinct Implementation Plan. The project follows research commissioned by the Johannesburg Inner City Partnership (JICP) in 2016/2017 on the nature of cross- border shopping in the inner city of Johannesburg. The Department undertook work looking into an implementation plan to package the Cross-Border Shopping Precinct for investment attraction and brand promotion, in order to help define the future state of the area. The final draft Cross-Border Shopping Precinct Implementation Plan was concluded in May 2019 and presentations of the final draft were tabled at the various COJ committees for review during May and June 2019.

The following key milestones were achieved, namely:

- Final draft implementation plan completed in May 2019;
- Presentations were made to the Inner-City Technical Cluster on 23 May 2019, the Inner City Sub-Mayoral on 30 May 2019 and the Economic Growth Sub-Mayoral on 12 June 2019 for review and comments; and
- The report for approval was completed, but deferred to July 2019 following a request that further revisions be made to the final strategy. The committee members were provided with additional time to consult the final draft and the deadline for all comments was at the end of June 2019.

iii) Priority Economic Zones

A site visit to Aeroton was undertaken by a multi-sectorial team of officials from Pikitup, JMPD, Social Development, Health and Group Citizen Relationship and Urban Management. The main purpose of the tour was to get a better understanding of the challenges hampering business growth and development, and the design interventions required to deal with these obstacles. Emanating from the Aeroton site visit and subsequent engagements with relevant stakeholders, the following interventions were implemented:

- Development of a database of informal traders to assist in regularising the operations of traders, to provide support and ensure compliance;
- Commencement of an initiative to identify suitable sites for traders that are in contravention of by-laws, which includes education on environmental health issues. This project is championed by the DED, working in collaboration with the Health Department and the JMPD;
- JRA successfully resolved long outstanding challenges, *inter alia*, the reprinting of street names and kerbs, stop-sign road markings, the replacement of stop-sign posts, stormwater drain covers and rutting on Adcock Ingram Avenue; and
- Operations were undertaken by Pikitup and City Power to ensure that the environment is aesthetically pleasing and business-friendly. JMPD continues to patrol once a week in an effort to curb crime and ensure by-law compliance.

iv) Economic Development Facilitation Framework

The Economic Development Facilitation Framework is complete and in the process of being approved. The main purpose of the framework is to create an enabling environment for enterprises, local business people, groups, non-profit organisations and the private sector to enter into strategic partnerships with the Department. The objectives of the framework are to:

- Provide a broad framework and a conducive environment so that the strength of strategic partners in terms of their efficiencies, flexibility, and innovativeness are utilised by the Department. This will ensure the provision of optimal services and best value for money;
- Ensure that partnership project-planning takes place within an enabling environment, including political support and buy-in from key stakeholders;
- Put in place a transparent, consistent and efficient administrative mechanism to create a level playing field for all stakeholders;
- Ensure an open and fair public process for soliciting and considering partnership opportunities;
- Provide the Department with full and final decision-making on any partnership opportunity, thus protecting its integrity and the integrity of its facilities and services;
- Help officials, potential partners and the public to better understand the processes and procedures related to partnerships;

- Ensure that there is a deliberate and systematic manner of responding to partnership proposals received by the Department, be it solicited, unsolicited or in-kind;
- Provide a systematic approach to sourcing funding in order to provide the required gapfunding where essential events/programmes funding are intrinsically insufficient; and
- Provide clear guidelines and processes for consideration and approval in respect of unsolicited partnership proposals presented to the Department by potential partners.

Joburg Tourism

Tourism - as a key economic sector - contributes significantly to the City's developmental priority of promoting and attracting investment towards achieving 5% economic growth that will reduce unemployment by 2021.

Joburg Tourism's operations are guided by the City's 2040 Growth and Development Strategy. It contributes to the economic development imperatives of the City and the GDS 2040 outcomes, and in particular to an economy that is competitive, inclusive, and resilient and harnesses the potential of Johannesburg's citizens.

The tourism goal for the City is to become a leading business and leisure tourism destination in Africa through tourism development and marketing. Joburg Tourism implements experience-based destination and tourism marketing as well as demand-driven tourism to stimulate tourism growth and development. Therefore, in execution of its strategy, it aims to align its activities with the overall desired strategic impact, namely:

- Shared sustainable economic growth and development;
- Tourism sector transformation; and
- Stimulating a vibrant second economy.

Joburg Tourism is supported by various smaller business units which all contribute to the overall performance of the Directorate, namely:

- Visitors Services Bureau
- Convention Bureau (Business Tourism)
- Tourism Development
- Tourism Management
- Destination Marketing

Key Service Delivery Highlights

Service delivery highlights for the Department include the following:

- On 12 April 2019, Khoebo Opportunity Centre (OC) hosted a SMME Development Seminar and Networking Session together with the US Consulate.
- On 30 May 2019, the Department hosted a professional delegation from Kenya. The delegation comprised the IDEAS Technical Implementation team, Kenyan State Department of Devolution, Kenyan National Treasury and Council of Governors and the Kenya School of Government who engaged in a ten (10) day study tour of South Africa.
- On 6 and 7 June 2019, the Department hosted the South African Cities Networks (SACN) EPWP Reference Group.
- On 10 June 2019, Khoebo OC hosted a Youth Summit at the Metro Centre. The summit aimed at engaging the youth on entrepreneurship and unemployment issues.
- On 13 June 2019, the Department in collaboration with Gauteng Department of Agriculture and Rural Development, coordinated the SMME Economic Roadshow in Orange Farm.
- On 19 June 2019, the Executive Mayor officially launched the Thusanang Opportunity Centre at the Klipfontein View Multi-purpose Centre.
- On 24 June 2019, the MMC: Economic Development opened the Ikamvalethu Opportunity Centre at the Alexandra Multi-purpose Centre.
- On 25 June 2019, 100 artisans graduated at the Skills Village in Bertrams. The City's representation was led by the MMC for Economic Development.
- On 27 June 2019, the Executive Mayor officially opened the Atlehang Opportunity Centre at the Soweto Empowerment Zone (SEZ) in Diepkloof and the Simunye Opportunity Centre at the Danie van Zyl Recreation Centre.
- Johannesburg won a bid to host the South African Association for the Conference Industry (SAACI) in July 2020.
- City of Johannesburg, in collaboration with Hyatt Regency Johannesburg, was awarded the bid to host the World Federation of Haemophilia in August 2019.
- Johannesburg Tourism Ambassador Programme was launched on 28 May 2019 at the Joburg Theatre. Coverage for the launch included interviews with the MMC for Economic Development on JoburgToday.tv [https://www.joburgtoday247.tv/?t=v&mid=fygzdSzk&fid=JLDHi1bl], as well as China Global Television News (CGTN), with an estimated viewership of 1.8 billion globally.

- Participation at the Africa Travel Indaba (Tourism Indaba) exhibition from 2 to 4 May 2019 at the King Albert Luthuli International Convention Centre in Durban.
- Successfully staged Meetings Africa 2019 (27-28 February 2019) in collaboration with Gauteng Tourism Authority at the Sandton Convention Centre, Johannesburg.
- Johannesburg won a bid to host Africa Travel Association (ATA) 2019 and 2nd Brand Summit and Awards 2019.
- Successfully hosted AfroPunk Joburg Festival 2018.
- Launch of "Jazzy Joburg Market" in partnership with Standard Bank Joy of Jazz on 28 September 2018.
- The department hosted the 12th Annual Smart Procurement World Indaba 2018.
- Launch of the Visitor Information Centre in Sandton, Tourism website and Mobi App on 21 September 2018.

Local Job Opportunities

The following EPWP jobs were created through Local/Regional Economic Development initiatives or projects funded by the capital and operational budgets of the City, as well as the National Department of Public Works EPWP Grant:

Table 71: Job creation through EPWP projects

3.5 Development Planning

Introduction

The City of Johannesburg's Growth and Development Strategy is used by the Department of Development Planning to effectively guide future growth and development and enhance the standard of living and quality of life for all citizens. The general welfare of the community is affected by the way in which it grows, and integrated spatial planning is meant to remove the patterns of spatial segregation and mono-functional use of the urban space that impede people's welfare and prosperity.

It is the strategic intention of Development Planning to push for a more coherent integrated spatial planning that uses a form-based approach to intensification and compaction to stimulate a more rational organization and use of urban spaces, prudent land use and investment and sustainable natural resource use.

The work of the Department has a direct impact on the investment attractiveness of the City since it involves implementing and taking decisions on development applications which have a direct bearing on economic opportunities, densities and housing options. The implementation of approved development proposals, both public and private, in line with the City's multi-scale strategic spatial plans and frameworks, results in urban development, increased urban land values and economic growth.

Summary of performance

The Department is responsible for coordinating and facilitating various strategic processes within the City to improve overall integrated planning and implementation processes. The key focus is on priority areas, as identified in the City's approved Spatial Development Framework, e.g. the Transformation Zone areas (Inner City, Mining Belt, Transit-oriented Development Corridors and precincts) and Deprivation areas (such as Diepsloot and Ivory Park).

The Department's work supports the strategic agenda for 2016-2021, as expounded below:

Priority 1: Promote economic development and attract investment towards achieving 5% economic growth that reduces unemployment, inequality and poverty.

- (i) Inner City Regeneration: The Department is providing direction to the urban regeneration programme of the Inner City by means of its spatial plans and capital programming. The focus this year was to finalise the formulation of the Newtown Urban Development Framework (UDF). The UDF was published for comments in Quarter 4 and open sessions were held over several days in Newtown, where stakeholders could engage directly with the proposals and the project team. Many comments were received from both internal and external stakeholders. The document is being finalised for submission to the City's committees and Council for approval in the first quarter of 2019/2020.
- (ii) Detailed assessment and intervention plan for the City's economic nodes: The Department has completed its nodal review process during 2018, redefining the spatial approach to density and land use intensity for the City's economic nodes to transform them into compact, generative, inclusive urban spaces. The Nodal Review report still needs to be reconsidered by the Section 79 Oversight Committee. The Department has also assessed several economic nodes according to the Assessment Framework that was completed in the 2nd quarter. The nodes assessed range from potential nodes in marginalized areas (Stretford and Ennerdale) to well-established nodes such as Rivonia and Greater Sloane.

Priority 2: Ensure pro-poor development that addresses spatial and all forms of income inequality and provides meaningful redress.

- (i) Inclusionary housing: This is a housing programme that requires private developers to dedicate a certain percentage of new rental housing developments to low income and low middle-income households at affordable housing cost. The final report was submitted to Council for consideration and approved in February 2019. Implementation of inclusionary housing is being monitored.
- (ii) Transit-oriented Development (TOD) Corridors-: The implementation of projects in prioritised TOD precincts will ensure the transformation of urban spaces around Gautrain and Transnet railway stations and Rea Vaya bus stations, into vibrant mixeduse and mixed-income activity hubs that bring people together. The Department coordinates a range of catalytic projects to create an environment conducive to urban development. Some of the projects and interventions include:

Empire-Perth Corridor - The Noordgesig Social Cluster has reached completion in Quarter 3 and the contractor has been completing the snagging list during the fourth quarter. The site will only be handed over to the client departments (i.e. Community Development and Johannesburg City Parks and Zoo) once all outstanding aspects have been addressed. This precinct, which consists of an upgraded swimming pool and park, new public space, library and recreation centre, is linked to the Rea Vaya station and new clinic via a network of pedestrian routes. The precinct serves communities from Orlando East and Pennyville, as well as the existing residents of Noordgesig, creating stronger links between different people and places. The ArtmyJozi Public Art Programme is part of this implementation process and has brought new life into this community through coproduction processes. Several murals have been completed over the course of the financial year along the pedestrian route; creating new landmarks and wayfinding markers for residents and visitors alike. It also creates opportunities to link Noordgesig into the tourism economy, by celebrating local heritage people and places in a visible way. Local artists and artisans were also involved in creating some play furniture for the upgraded library.

The *Brixton Social Cluster* is the new community heart of the Empire-Perth Corridor which will serve residents from the University precinct around Auckland Park, Brixton and inner-city suburbs like Fordsburg and Mayfair. The construction of Phase 1 is on track at the end of quarter 4 with 75% of construction completed. The concrete works, roof structure and roof coverings have been completed. The contractor is currently busy with internal and external finishes and the aim is to complete this phase before the end of 2019.

Public engagements are also being undertaken as part of the ArtmyJozi Public Art Programme to refine place-making interventions as part of Phase 1 implementation. The tender for Phase 2, which comprises the upgraded library, will be initiated in the first quarter of the next financial year, together with some green building interventions as part of the Department's New Building Efficiency process. The *Brixton Social Cluster* is the only sizeable community facility within a 10km radius in an area with significant residential growth and it is critical that this facility be completed in the short term.

Soweto Corridor – The Jabulani Transit Oriented Development - The JDA continues to implement strategic, catalytic projects to transform Jabulani in support of the visionary precinct plan for the area. Projects for 2018/2019 include upgrading Bolani Road to include safe pedestrian movement whilst accommodating informal traders and public transport infrastructure and finishing the construction of a new SAFA sports facility. These projects are mainly funded through the Neighbourhood Development Partnership Grant.

The Department is also formulating a spatial development plan for Vilakazi Street and surrounds, to guide public and private investment in this vibrant local area. The planning process has also involved other spheres of government, specifically with regards to the tourism and local economic development potential of the area. It is important that Corridor interventions link smaller scale economic initiatives into the larger network of urban activities.

Louis Botha Corridor - Paterson Park Social Cluster. The construction of a new social cluster in Paterson Park, consisting of a new library and multi-purpose sports facilities and upgraded recreational centre has been underway since 2015. Unfortunately, a new contractor had to be appointed to complete the project. The new contractor has established site in November 2018, and has made very good progress. Work on the storm water infrastructure in this precinct is also continuing, but requires substantial investment by the City over time to not only repair aging infrastructure, but to create additional capacity for increased storm water run-off.

Paterson Park new residential development forms part of the City's land release to the private sector. Development Planning has assisted with the design and town-planning aspects of this project and is currently working with JPC on the land release process. The tender was advertised during the third quarter and evaluations took place in the last quarter. This new residential development should not only include some inclusionary housing units, but also respond to the requirement of more resource efficient designs.

The Department is also working with the JPC to rezone 82 properties acquired in the Louis Botha Corridor to prepare for release to the private sector. The town-planning applications were lodged in June 2018. The town-planning process is almost complete, with reports for Municipal Tribunal Hearings to be finalised in July 2019. The properties were advertised on public tender and tenders closed at the end of July 2019.

Priority 9: Preserve our resources for future generations.

- (i) Integrated Planning, Policy Development and Standard Setting contributes to this priority area. The Department plays a leading role in compiling the Built Environment Performance Plan (BEPP) annually for the City to comply with National Treasury's grant requirements. The Department has completed its draft 2019/2020 BEPP document in the third quarter and submitted it to National Treasury.
- (ii) The Department has initiated a new policy formulation process related to a "Green Building" Policy for the City. This process, which will be led by Development Planning with strong support from EISD (Climate Change Directorate) and various MEs (e.g. City Power, Joburg Water and Pikitup), as well as C40, will be a 2-year policy and by-law formulation process. It forms part of a broader programme aimed at reducing the City's carbon footprint. The strategic analysis phase has just been completed.

Planning is a legislated activity and several laws and regulations from national to local government govern the way the development Planning Department operates. The Department is responsible for setting out the City's future development trajectory, and for processing the site-level development applications which over time collectively aim to achieve the future city vision. Enterprise-wide development facilitation and coordination is therefore the fulcrum of the Department's role in the City.

Unfortunately, this role is intangible from a programme budget perspective, as it is embedded within the mainly statutory operations that are undertaken as day-to-day services. However, this

role is critical in the attainment of strategic outputs and outcomes of the City's collective institutional machinery.

The Department is the primary decision-maker of the location, type and scale of development within the City. Its strategic urban planning and development management mandates are underpinned by a world-class spatial information system which is of great service delivery value to the Council, the development industry and the public at large.

The Department has the following three (3) primary daily operations with tangible service delivery impact on the City, namely:

- Land use development management (i.e. town planning applications) and law enforcement;
- Building development management (i.e. building plan and outdoor advertising applications) and law enforcement; and
- The processing of property information from the Deeds Office.

To maintain and/or improve the standard of service delivery, the Department has set turnaround times and targets for each of the above operations. Although the department would like to shorten the turnaround times, most of the service standards are governed by legislation and/or statutory frameworks with set time frames to be adhered to.

Comment on overall performance of physical planning

The four largest capital projects in terms of adjustment capital budget allocation for 2018/2019, are Jabulani TOD (R80m); Brixton Social Cluster (R61m); Paterson Park Social Cluster (R27m); and Ghandi Square East (R18,5m).

These capital budget projects a critical part of the investment strategy to restructure the city around public transport (i.e. Transit-oriented Development) and the Inner City as main economic core. Implementation of the Paterson Park project was accelerated and R37 million was spent (i.e. an additional R10m to the approved budget with CM and CFO approval). Budget from the Ghandi Square East project which had an under-expenditure of R10 million, was also used for Paterson Park's acceleration. Jabulani TOD implementation consists of more than one project, funded by NDPG. The under-expenditure will be rolled over to 2019/2020 and implementation is taking place in accordance with the approved Business Plan (National Treasury). Although there was under-expenditure on the Brixton Social Cluster, the project is proceeding according to the planned milestones and will be completed on time and within budget in 2019/20.

3.6 Johannesburg Development Agency

Introduction

The Johannesburg Development Agency (JDA) implemented capital projects in 2018/2019 to the value of R1.043 billion. This translates into over R86 million being spent on average per month. This has taken JDAs capital expenditure over the past 7 years to over R7 billion. However, decreases in the three-year budget estimates over the MTEF indicate that the JDA will have to work smarter to ensure that it sustains both the project implementation as well as the socio-economic outcomes in the communities it operates in.

The JDA implemented just under 90 capital projects across four programmes in the 2018/2019 financial year. The major driver of the JDAs capital expenditure was from Public Infrastructure Delivery (Programme 3). This programme specifically deals with the large construction works that are being undertaken on the Rea Vaya trunk routes along Louis Botha Avenue. It further includes projects to install pedestrian and non-motorised transport (NMT) infrastructure that serves to connect commuters with the Rea Vaya BRT system and commuter rail services. Programme 3 includes a managed portfolio of projects in the City's more marginalised areas, including internal roads and stormwater infrastructure in Braamfischerville for the Department of Housing, the Lehae Multi-purpose Centre for the Department of Community Development through to a range of clinics for the Department of Health. The JDA itself began a new cycle of planning in preparation for projects in Diepsloot where the JDA has worked for many years.

The Strategic Economic Node Programme (Programme 2) has encouraged the optimal development of transit hubs and corridors across the city. The JDA projects in Transit-oriented Development (TOD) Corridors, such as Jabulani, the developments in Orange Grove / Paterson Park, and Rotunda / Turffontein, have laid a solid foundation for these nodes to not only provide affordable accommodation and transport opportunities, but to also emerge as desirable and highly liveable neighbourhoods with vibrant public spaces and good community services.

The renewed focus on the Johannesburg inner city as a Mayoral Priority is strongly aligned with JDAs Inner City Programme (Programme 1). This programme serves to strengthen the position of the inner city as a critical business and residential node and the primary gateway to transit networks for the city. It has delivered both large iconic projects such as the Johannesburg International Transport Interchange (JITI) facility on the western side of Park Station as well as through more localised neighbourhood projects in the Inner City Core and the Eastern Gateway precinct. In 2018/2019, the JDA also began a new planning cycle for areas in and around Gandhi Square and Yeoville as part of the *Our City, Our Block* initiative. Some exciting developments are expected in both of these areas in the following years.

The Alexandra Renewal Programme (Programme 4) has played its role in the development of Alexandra through capital investments, overseeing integrated investments by other departments and entities, and facilitating community-based initiatives and local economic development strategies. Most of the JDAs projects in Alexandra focussed on community and social infrastructure and includes, for example, the Alex Automotive Hub and the 4th Avenue clinic. Various projects in Alexandra, such as the Safe Hub and the Alex Hospice will continue into the 2019/2020 financial year.

Environmental context

A foremost goal of urban development in the transformation of South African cities remains the need to address spatial and systemic inequalities. Striving for a more equitable and just city would result in access to a greater range of opportunities, jobs, livelihood opportunities and services to all of its citizens. Johannesburg, like other South African cities, is changing rapidly and, sometimes, in unpredictable ways. This rapid urbanisation brings with it both challenges and opportunities for urban development. The goal would be to benefit and unlock the urban dividend. As stated in the 2016 Integrated Urban Development Framework (IUDF), the 'urban dividend' describes an optimal situation where the increasing concentration of an economically active population translates into higher levels of economic activity, greater productivity and higher rates of growth. The potential of urban areas is maximised with the alignment and the integration of investments in the following primary drivers of urban development, namely:

- Transportation (public modes and roads);
- Human settlements;
- Infrastructure networks comprising social, economic and ecological infrastructure; and
- Various land-use regulations and effective governance that underpin all of the above.

As a metropolitan municipality, it is our responsibility to use our policies, resources and institutions such as the JDA to bring about the necessary integration and focus, in key areas and unlock the 'urban dividend'. Given this context, it is important that in 2019/2020 the JDA, as the implementer of strategic City projects, continues to both deepen its efforts as well as catalyse new development that supports the spatial transformation of the City of Johannesburg. JDA must continue to make strides in place-making and the development of key infrastructure. We have placed high expectations and trust in the role JDA plays in the TOD Corridors, as well as other priority development areas across the City.

Strategic response

The JDAs responses to five outcomes, nine priorities, *Diphetogo* and spatial policies against which it can be measured and held accountable, are outlined in the table below:

Performance highlights

In 2018/2019, the JDA implemented just under 90 capital projects across five programmes and therefore continues to support the City in transforming the spatial economy by "Building a Better City".

The capital expenditure was R1,04 billion (2017/18: R1,43 billion) against an annual budget of R1,187 billion (2017/18: R1,55 billion). This translates to 88% (2017/18: 92%) of the total annual budget and 92% against the year-to-date target of 95% or R1,127 billion.

The JDA continued to play an important role in the work needed to achieve the spatial and economic goals set out in the Joburg 2040 GDS and in the priorities, as defined by the New Strategic Agenda 2016-2021. Of particular importance are "*Priority 1: To promote economic development and attract investment towards achieving 5% economic growth that reduces unemployment, inequality and poverty*"; and "*Priority 2: To ensure pro-poor development that addresses spatial and all forms of income inequality and provides meaningful redress*".

In 2018/2019, the JDA supported these priorities through its focus on the Inner City, the transport station or TOD precincts, public transit and mobility infrastructure along the corridor routes and on-going investments in marginalised areas, including Alexandra, Ivory Park, Noordgesig and Westbury.

The JDA also contributed to job creation in the construction sector in Johannesburg, as well as local SMMEs' development and BBBEE. The JDA reports on the BBBEE share of both actual expenditure and contractual commitments for all active contracts. For 2018/2019, the overall BBBEE share of expenditure was R1,079,203,801.22. This constitutes an achievement of 106% per cent. The JDA reports on the SMME share of both actual expenditure and contractual commitments for all active contracts. The table below shows the SMME share of capital and operating expenditure. The SMME share of JDAs operating and capital expenditure was R293,343,187.37 for the 2018/2019 financial year. This constitutes an achievement of 29% for the period under review (Capex R279,170,768.01 or 29 %; Opex R14,172,419.36 or 22%).

A total of 493 EPWP opportunities supported by reliable supporting evidence, such as identity documents, attendance registers and proof of payments were reported against the annual target of 1500.

Other milestones include the confirmation that the JDA received a Clean Audit Report from the Auditor-General. This is a huge milestone for us and to achieve it for four consecutive years sets us apart from other City entities' governance structures.

This increased confidence in the agency's capacity to implement projects is clearly shown in its increased capital expenditure budget, as outlined in the table below:

Table 82: Performance of the JDA over the past five (5) years

Performance against IDP targets

In terms of the twenty-one strategic KPIs in 2018/2019 financial year, the JDA fully achieved 52% of its set targets. Fourteen percent (14%) of the targets were partially achieved and 33% were not achieved. In the 2017/2018 financial year, the JDA achieved 42% of its performance targets for nineteen (19) strategic KPIs (11% partially achieved and 47% not achieved).

3.7 Joburg Property Company

Introduction to Joburg Property Company

The Joburg Property Company (JPC) is mandated to manage and develop the City's property portfolio worth R9, 237 billion, and comprises of 29 454 properties for the financial year ending 30 June 2019. The entity utilises council-owned land to leverage private sector investment in public infrastructure, promoting innovative solutions as part of economic growth. The core functions of the JPC are as follows:

- Asset management;
- Property development;
- Facilities management;
- Property management; and
- Outdoor advertising.

JPC's corporate strategy is aligned to the vision and mission of the Integrated Development Plan (IDP), the Growth and Development Strategy (GDS) 2040 and the mayoral priorities. JPC recognises and emphasises its role as an economic and social property company to achieve positive developmental outcomes. JPC's strategic objectives are long-term plans that contribute annually to the vision of the organisation through the annual target linked to the mayoral priorities.

JPC Strategy

The following long-term strategic objectives ensure delivery on the mandate, as indicated in the Corporate Strategy, namely:

- Supporting economic development;
- Supporting community development and social initiatives;
- Utilising the property portfolio to address social imperatives and priorities;
- Utilising the portfolio as a vehicle for transformation;
- Ensuring efficient, economic and effective service delivery to clients, customers and stakeholders; and
- Ensuring a professionally managed and sustainable company.

Performance Highlights

JPC achieved 86% against its performance scorecard. Achievements that contributed to the below-mentioned strategic priorities, were the following:

Priority 1: Promote economic development and attract investments towards achieving 5% economic growth that reduces unemployment by 2021

- (i) JPC has managed to facilitate long-term property development leases, which led to investment attraction amounting to R1, 691, 206, 904.00 on COJ property as part of stimulating economic growth. The release of properties by JPC is aligned to the COJ Spatial Development Framework (SDF) and ensures balanced service provision; proximity to social and economic opportunities, including affordable housing for residents.
- (ii) Council has approved the development plans for four (4) civic precincts in accordance with the SDF. The four precincts are Midrand (Region A), Roodepoort (Region B), Randburg (Region C) and Wynberg: Watt Street (Region E). A Civic Precinct is an important symbolic and functional space to promote inclusive development and optimise office space. Its purpose is to:
 - Promote economic renewal and infrastructure investment;
 - Influence structural elements of the spatial form of the precinct with regard to the current quality of the built form, heritage etc.;
 - Catalyse the revitalisation of nodes in marginalized areas;
 - Create mixed-use precincts that provide for the City's office accommodation needs in order to improve service delivery;
 - Unlock commercial and residential opportunities with a particular focus on the provision of social and affordable housing opportunities;
 - Increase employment trends; and
 - Address the demand for housing, cultural trends and other socio-economic pressures.

These construction projects has led to a rand value investment spend on COJ land worth R744, 932, 600.00.

Priority 2: Ensure pro poor-development that addresses inequality and poverty and provides meaningful redress.

- (i) Two hundred and fifty (250) Asset Management plans were formulated to ensure that Council properties are used optimally, addressing service delivery and maximising return on investment for the City;
- (ii) Nineteen (19) properties were acquired as part of addressing City departments' service delivery requirements;
- (iii) Twenty-seven (27) Inner-City Redevelopment Projects were awarded as part of the key focus on the City's SDF transformation themes, for example: Inclusive City that ensures balanced service provision; proximity to social and economic opportunities, including affordable housing;
- (iv) The refurbishment projects: Protea Glen Fire Station, Diepsloot Licensing Centre and Sandton Licensing Centre contributed to improved service delivery; and
- (v) JPC was instrumental in securing space and refurbishing three (3)Opportunities Centres for the Department of Economic Development.

Priority 7: Enhance our financial sustainability.

JPC has managed to generate revenue amounting to R87, 858, 819.00 from Outdoor Advertising leases. This improvement was as result of Council's approval of the Outdoor Advertising transition plan. The approval by Council of a transitional period enjoins both JPC and the Department of Development Planning to effect measures to resolve various challenges facing the outdoor advertising portfolio through engagements and other mechanisms to usher the sector into an era of lawfulness without any further litigation beyond the 36-month transitional period. The measures implemented focus on formalising lapsed contracts and regulating illegal advertising signs during the 36-month transitional period.

Property transactions being initiated

The table below reflects client enquiries on COJ properties or land for leasing and buying purposes, which prompted the initiation of property transactions:

3.8 Joburg Market

Introduction to the Joburg Market

The Joburg Market SOC Limited, formally known as the Johannesburg Fresh Produce Market, is wholly owned by the City of Johannesburg Metropolitan Municipality. It was created in terms of the provision for alternative delivery mechanisms as embodied in the Municipal Systems Act, and converted into a state-owned company in line with the provisions of the Companies Act 71 of 2008.

The Joburg Market (JM) is the biggest fresh produce market in Africa in terms of the volume of fresh produce traded and has a staff complement of 304 employees. JM trading facilities are made available to farmers across the country, whose produce is marketed and exposed daily to thousands of buyers from the South Africa and the Southern African Development Community (SADC) region. JM, market agents and tenants operating at the market create over 5000 jobs within the sector.

JM plays a critical role in influencing the price for the fresh produce industry in South Africa since it represents 45.5% of the market share of the National Fresh Produce Market, in both volume and turnover. It is the only fresh produce market with a South African National Accreditation System (SANAS TO532) accredited laboratory to ensure the maintenance of food safety standards.

As a shareholder, the City expects the Joburg Market to operate a well-functioning trading facility that create financial returns, and supports the producer, traders, communities and citizens of Johannesburg in the delivery of its strategic agenda. In the process, the company is expected to deliver key outcomes such as food security, a well-nourished and healthy population, job creation and food safety. The following are the entity's strategic objectives, namely:

- Ensure financial sustainability and growth of the entity;
- Operate a sustainable, resilient, premier marketing and trading facility;
- Become an agent for socio-economic transformation;
- Ensure that our staff are engaged skilled; motivated and satisfied;
- Become a high-performance organisation; and

• Ensure effective stakeholder engagement.

JM as the largest market on the African continent is regarded as a preferred channel for fresh produce marketing. This is reflected in the trading results of the entity.

Performance highlights

Key achievements during the 2018/2019 financial year included the following:

- **Improved financial performance:** A turnover achievement of R7.9 billion, which represents a positive growth of 5.6% compared to the budgeted turnover of R 7.5 million;
- **Promulgation of a new set of JM by-laws:** The new bylaws were published for public comment and members of the public were provided with an opportunity to provide written inputs. Subsequently, the Section 79 Oversight Committee facilitated a public consultation session.
- Recapitalisation Strategy and Plan: A Recapitalisation Strategy and Plan was developed during the year under review and used for strategic engagements with key stakeholders. This resulted in the JM being allocated a R304 million capital budget in terms of the Mid-Term Expenditure Framework;
- Joburg Market Precinct Development Plan: In conjunction with the Recapitalisation Strategy and Plan, a Joburg Market Precinct Development Plan was also developed and approved. This plan now informs the deployment of each project at the Joburg Market;
- **Strategic projects:** The Joburg Market successfully completed a number of strategic projects, *inter alia*, the resurfacing of the internal ring road, installation of public Wi-Fi, upgrade of the Exit Gate and the acquisition of new IT infrastructure and accessories;
- **Job creation:** A total of 215 new jobs were created against a target of 200 jobs; providing opportunities to largely the youth and women;
- **Standardised rental rates:** The Board of Directors approved the new standardised rental rates for implementation and stakeholder engagements are underway to discuss new rental rates; and
- Resolution of legacy litigation: A ten-year-long outstanding legal case with SCAI was successfully resolved after protracted legal engagements between JM and SCAI legal teams.

Although the overall performance of the Joburg Market during the business planning period was considered satisfactory, several lowlights were encountered, for example:

- Inter-company invoicing: The invoicing from Pikitup remains erratic, which makes validations of the accuracy of services rendered challenging;
- **Fatality on campus:** A fatality occurred when a contractor of Pikitup lost a staff member during a waste removal exercise at JM;
- **Infrastructure repairs:** Infrastructure repair and maintenance work were not adequately executed due to the delay in the appointment of service providers; and
- **Inadequate trading space:** Sufficient trading space remains a major challenge, as market agents had to temporarily store fresh produce on the platforms and in the roadway.

To ensure the future growth and sustainability of the Joburg Market the following key interventions to future-proof the entity, have been implemented, namely:

- Review of the corporate strategy and business plan to strategically position the company as a leader in the industry;
- Review of the organisational structure to bring on board new capabilities that will take the company forward; and
- Motivating for and being appropriated in the medium term, capital of R305 million to recapitalize the infrastructure and invest in new business requirements.

Comment on the overall performance of the Joburg Market

The overall performance of the Joburg Market can be summarised as follows:

- Excellent financial performance was posted by the company, as follow:
 - Turnover recorded at R7.9bn, which represents an increase of R381m above budget;
 - o Revenue recorded at R496m, which equates to R43m above budget; and
 - Net surplus achieved at R123m, which equates to R28m above prior year.
- Stakeholder engagement sessions to the Top 10 producers and buyers were prioritised and undertaken;
- Significant progress was made on the implementation of capital projects, with an achievement rate of over 86% spent on new infrastructure investments at JM. These project investments are critical to the Joburg Market for the following reasons:
 - The Road Rehabilitation Project was stakeholder-driven and complaints were escalated to the highest office in the City;
 - There was a requirement to ensure that design plans and specifications for the Mandela Market Development Project were finalised so that the project could be rolled-out in the new financial year; and
 - The greatest enabler of the Smart Market Strategy was investment in ICT, particularly computers and server hardware. These projects exceeded the target due to the Rand/Dollar Exchange Rate variation.

COMPONENT E: COMMUNITY DEVELOPMENT AND SOCIAL SERVICES

(Community Development - Libraries; Museums; Galleries, Community Centres and Swimming pools; Johannesburg City Parks and Zoo; and Social Development)

3.9 Community Development Department

Introduction to the Department of Community Development

The Community Development Department advances the delivery of sport and recreation; arts, culture, heritage, libraries and information services within the City. These services promote holistic development and learning as well as overall community well-being through the facilitation and implementation of initiatives that promote social cohesion, support nation building and deliver improved quality of life for residents in the City of Johannesburg.

Community Development seeks to coordinate the efforts of other departments and agencies in the City to ensure alignment of all social cohesion programmes and the achievement of national outcomes related to socio-economic inclusion en equality. Key interventions are designed to impact positively on the development of common values and creatively addressing inequalities and exclusions.

Key focus areas

The department has been progressing well in enabling access to facilities, where residents can enjoy the programmes, services and projects delivered by Libraries, Arts, Galleries and Museums. The objective is to build active and sustainable communities by ensuring equitable access, development and excellence, thereby enhancing social inclusion prospects, and the quality of life using our facilities as a launching pad. In 2018/19, a total number of 5 million people accessed the City's facilities.

The extension of library hours sought to enable access to libraries outside the normal library hours. Libraries are now open on Saturdays from 13:00 to 17:00 and Sundays from 09:00 - 17:00 at eleven (11) regional libraries.

The programmes delivered at Museums and Galleries were aimed at showcasing exhibitions, maximising educational tours and attracting tourists. These have contributed towards the citizens

of Joburg appreciating the inner-city cultural life as well as other areas such as Soweto and Roodepoort where our museums are located.

3.10 Child Care, Aged Care and Social Programmes

Senior Citizens' Programme

In support of our senior citizens, the Social Development Department committed to provide a basket of services to 11 500 elderly people in the 2018/19 financial year. The basket of services is inclusive of social support, empowerment, nutrition, healthy living and excursions. One beneficiary can receive more than one of the basket of services listed. The unit started off in the first quarter by identifying 3 310 senior citizens in need of the social support package. In the second quarter, an additional 3 752 senior citizens were reached. In Quarter 3, the pay-per-services NGOs commenced and they had to identify 8 000 senior citizens for programme implementation in the third and fourth quarters. A total of 14 195 senior citizens were reached and programme implementation took place as outlined below:

- Healthy lifestyle: 9 584 senior citizens were reached. Programmes included exercises and elderly games. The CoJ Health Department assisted in delivering chronic medication to senior citizens in daycare centres. Health screening and information on healthy diet for diabetic patients and ways to prevent diseases and maintain a healthy lifestyle was also delivered.
- 11 616 senior citizens were supported through the following programmes: blanket distribution in partnership with local NGOs, hosting of regional forum meetings, intergenerational dialogue, Mandela Day celebrations, story-telling, support to luncheon clubs, devotions and choirs at daycare centres. The Integrated Referral System is functional and five project teams are operational.
- 9 901 senior citizens attended the following sessions: awareness on substance abuse, available services from the CoJ and other stakeholders, awareness on violence and abuse, organisational development, assist with fund-raising and peace education.
- 11 727 senior citizens were assisted with ESP registration, applications for grants from SASSA, and new SASSA cards.
- 10 925 senior citizens were provided with meals, received information on healthy eating and also benefited from food gardens and food parcels.
- 743 senior citizens went on excursion. The Integrated referral system is functional and regional forums are operational.

 Migration: Orientation programmes enable new comers to adjust to the culture of the local communities and to receive information on how to connect to opportunities, learn about by-laws and also participate in the active life of host communities. Workshops, dialogues, awareness campaigns assisted in changing perceptions about migrants, xenophobia and in general, they promoted social cohesion in communities.

3.11 Joburg City Theatres

Introduction

The Joburg Theatre (SOC) Ltd, known as Joburg City Theatres (JCT), is an independent municipal entity that is wholly owned by the City of Johannesburg. The JCT operates the Joburg Theatre (Braamfontein), Roodepoort Theatre and Soweto Theatre.

Joburg Theatre is also permanent home to Joburg Ballet, which is supported by an annual grant from Joburg City Theatres; as well as the Peoples Theatre Company – performing throughout the year to children between the ages of 3 and 13 – and one of the country's most respected community development projects in the arts, the tiny 'black-box' theatre known as space.com. Since 2017, the Joburg Philharmonic Orchestra is also supported through an annual grant from Joburg City Theatres.

While not its core mandate, over the period since 2013, the hospitality, catering and restaurant services provided by Joburg City Theatres have also matured and grown, contributing significantly to revenue generation and to the suite of services that the Joburg City Theatres offers.

As part of the Social and Human Development Cluster and located under the Department of Community Development with the MMC as Executive Authority, Joburg City Theatres is primarily tasked to support all the GDS Outcomes, aimed at a future that presents significantly improved human and social development realities. It relates to issues of social cohesion and inclusivity and improved quality of life, supported by the establishment of development-driven resilience, and particularly resonates with the work of Joburg City Theatres.

JCT Strategy

GDS Outcomes 3 and 4 form the primary tenet of Joburg City Theatres' strategic intent. JCT's contribution in the cluster is *"targeting deprived spaces and communities through Arts and Culture Programming"*.

The legislated five-year IDP process assists in translating the Growth and Development Strategy's - Joburg 2040 - long-term impacts and outcomes into measureable and achievable targets. In the CoJs case, these are framed within the context of the Mayoral Flagship Programmes, located

within five-year IDPs that contain cluster-specific priorities and plans. The company's strategic objectives include the following: -

- Provision of opportunities for the youth, including future arts practitioners and entrepreneurs;
- High quality performing arts and entertainment experiences and facilities;
- Affordable access to and use of theatres by communities;
- Good governance, financial sustainability and sound management; and
- Mobilisation of resources to support the mandate, and improved brand recognition and awareness of JCT.

The 2018/19 performance information of JCT flows from a direct line-of-sight to the above strategic objectives and result areas / IDP Programmes. The outputs by JCT through the arts programming included the following: -

- Increased accessibility exploring the increased funding opportunities from other spheres
 of government and the public sector in order to make theatre-going practical for
 disadvantaged communities;
- Youth development and partnerships Developing future audience, practitioners and entrepreneurial skills;
- Increased literacy, skills and lifelong learning amongst all citizens;
- Increased earned revenue; and
- Maximised accessibility and usage of theatre facilities by the City of Johannesburg citizens.

Outputs, linked to the SDBIP, IDP and GDS are: -

- Increase self-generated revenue a city at work building the economy;
- Expenditure management cost containment a city at work building the economy;
- Promotion and % procurement spend on SMME's a city at work building the economy;
- Increase literacy, skills and lifelong learning amongst Joburg citizens a city at work building better communities;

- Youth development develop future audiences, practitioners and entrepreneurial skills a city at work building better communities;
- Maximise accessibility and usage of the theatre facilities by Johannesburg citizens a city at work building better communities; and
- Increase accessibility explore the increased funding opportunities from other spheres of government and the private sector in order to make theatre-going practical for disadvantaged communities - a city at work building better communities.

Outcomes are as follows: -

- Commissioning of quality productions aligned to the vision and mission of JCT;
- Increased numbers of learners attending theatres annually developing new audiences for the future;
- Empowered learners and teachers;
- Improved perception of the role of JCT in Youth development;
- Engagement with communities bringing new audiences into contact with JCT venues;
- Structured opportunities for in-depth development of the talents and skills of young people opening up future opportunities for future employment;
- Foundation laid through pilots for three-year relationships and co-productions, widening the participation of local producing partners engaged with JCT;
- Improved operational efficiency, optimization of resources and performance;
- Increased positive social contact and accessibility of theatre through management of the three theatres;
- Increased SMME support through procurement;
- Support and optimize opportunities to promote creative industry; and
- Increased number of emerging young producers and artists.

JCT contributes directly and indirectly to the CoJs achievement of its objectives and priorities, by making available the theatres' facilities and resources throughout the year for departments and entities to explain and promote such priorities. The achievements captured in this report are aligned to the strategic priorities of the City of Johannesburg which drives the strategic direction of the company ensuring that these priorities are implemented in the form of measurable targets and deliverables.

JCT upheld its vision statement: "A leading African artistic platform providing sustainable, development-oriented and diverse programming." The Board and management remain committed to achieving strong financial and operational results, ensuring good corporate governance and transparent compliance to legislation while delivering on the mission of the company:

To produce and present innovative and relevant indigenous and international entertainment programmes that promote multiculturalism, diversity and social cohesion.

Performance highlights

JCT set a total of 18 key performance indicators in the approved business plan for the current financial year (2018/19). The performance was recorded as follows:

- Of the 18 targets due for reporting in the period under review, a total of 17 targets were achieved, translating to 94% target achievement.
- One KPI (on financial sustainability) was not achieved due to the economic climate. However, JCT has put plans in place to rectify this in the next reporting period.

JCT set a total of 18 key performance indicators in the approved business plan for the current financial year (2018/19). The performance was recorded as follows:

During the period under review, we made real progress towards achieving the JCT vision for the 2018/19 financial year, while continuing to expand our range of innovative products and services. The company delivered satisfactory corporate performance during the period under review, under strained financial resources.

JCT maintained a varied blend of programming through rentals, co-productions, and in-house productions. Roodepoort Theatre leads the way as far as rentals go; the theatre has maintained a healthy list of loyal programme producers who mainly provide youth and family oriented programmes. The mobile theatre truck is used to reach communities that are unable to come to the theatre. Soweto Theatre also maintains a strong list of rental clients, but it is through music and theatre co-productions that the theatre is making its mark.

JCT had over one hundred and fifty (150) shows that took place in its different theatre spaces and attracted over two hundred and seventy one thousands and two hundred and ninety nine (271

299) patrons for the full financial year. These were different shows ranging from in-house productions, co-productions with other external producers, and externally produced shows that rented the facilities. Below are the highlights of productions that took place through the year under review.

As part of JCT's continued 'Legacy Programme' and also to as part of the nationwide centenary celebrations of Nelson Mandela's posthumous 100th birthday: Joburg Theatre brought together four living South African musical legends; Jonas Gwangwa, Abigail Khubeka, Sipho 'Hotsticks' Mabuse, and Dorothy Masuka together with the nation's foremost youth vocal ensemble, the Mzansi Youth Choir for a 3 night only concert to honour and celebrate, in song, the late great global icon, Madiba. The concert, aptly named *Legends Celebrating Madiba*, was an audience success.

The winners of the 15th annual Naledi Theatre Awards were announced on the Mandela Stage at the Joburg Theatre on 20 May 2019. These awards are an affirmation of the exceptional skills and world-class talents that exist in South Africa. *The biggest winner of the night was the musical The Color Purple, which collected seven awards*. This is a very special occasion for Joburg City Theatres and for the City of Joburg itself. The all-South African creative team and cast of The Color Purple will be flying the flag for Joburg when they take this glorious production internationally in 2020.

Joburg City Theatres was nominated for 23 Awards in collaboration with renowned producers, *Lara Foot for Tshepang, the third testament & Bernard Jay* for both *The Color Purple & Snow White Pantomime.* The nominations received also included recognition for Akhona Bozo – Senior Sound Technician at Joburg Theatre who has been with the company for 13 years.

Best Production of a Musical:

The Color Purple - Produced by Joburg Theatre and Bernard Jay, Written by Marsha Norman, Brenda Russell, Allee Willis and Stephen Bray, and Directed by Janice Honeyman;

Best Musical Director:

Rowan Bakker for The Color Purple;

Best Director of a Musical/Revue:

Janice Honeyman for The Color Purple;

Best Supporting/Featured Performance by a Female in a Musical:

Lelo Ramasimong as "Shug Avery" for The Color Purple; Best Supporting/Featured Performance by a Male in a Musical: Yamikani Mahaka-Phiri as "Harpo" for The Color Purple; Best Lead Performance in a Musical (Female): Didintle Khunou as "Celie" for The Color Purple; Best Original Choreography in a Play/ Musical: Oscar Buthelezi for The Color Purple; Best Director of a Play: Lara Foot for Tshepang: The Third Testament;

Financial performance

The theatre business continues to be challenged by stiff competition from the other theatres around and other forms of entertainment particularly with advancing technology in the digital age, while financially the consumers of our products and services remain squeezed by the lower disposable income. These challenges require innovative ways to remain in business and run sustainable operations. The economy has seen a contraction of 3.2% in GDP in the first quarter of this year and unemployment rising to 27.6%. JCTs performance is therefore not immune from the effects of these macro-economic factors, more so that the operations of the entity are in entertainment which is viewed as a luxury in the context of a struggling economy. Notwithstanding the aforementioned economic challenges, the entity has shown resilience and relatively maintained satisfactory revenue performance.

-	R63,8 million down 10%	
The earned revenue for 2017/18 finar	ncial year was P71 million and in the 2019/10 is P62.4 mi	
representing a reduction of 10%.		illion
Hospitality and catering 2018/19	R31.9 million up by 7% 1	

Figure 20: Financial Performance: JCT

Reduction on earned revenue primarily results from a shortfall in in-house productions, rentals of facilities and equipment, arts alive budget cut from R10 million to R8.7 million, and the DAC has not sponsored the Africa month celebrations in the current year.

Graph below is a summary of main revenue items:

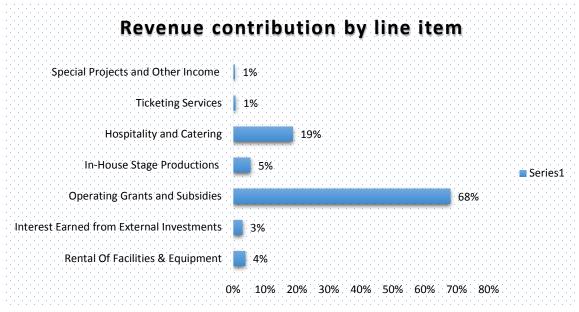

Figure 21: Summary of main revenue items

Revenue for the past 5 years – the revenue for the entity has been increasing for the past 5 years from R100m to R180m which translate to an average increase of 16% per annum. The increase is above inflation rate year on year which indicates a good performance and market growth.

3.12 Johannesburg City Parks and Zoo

Corporate Profile And Overview Of JCPZ

Johannesburg City Parks and Zoo (JCPZ) is a non-profit Company (NPC), duly registered and incorporated in accordance with the Company Laws of the Republic of South Africa under registration number: 2000/028782/08. JCPZ has been legislatively mandated to exist as a mechanism for service delivery. The Company is wholly – owned (i.e. 100%) by the City of Johannesburg (CoJ) Metropolitan Municipality. As a municipal owned entity, JCPZ's mandate which is clearly stipulated in the Shareholder Agreement, is as follows:

The sustainable provision, preservation and management of open spaces, biodiversity, environmental and conservation services through education, research, direct conservation action and recreation, with a focus on the zoo, parks and cemeteries.

The rights and responsibilities of the Entity are limited as the Shareholder retained ownership of all land and buildings at establishment. The Shareholder is also responsible for all policies, bylaw development and enforcement pertaining to the portfolio. The Entity is not sharing any power with other Entities in the CoJ or departments or other municipalities.

The Shareholder exercises an oversight role over the Entity through the Member of the Mayoral Committee (MMC) Community Development as Political Head and the Group Governance Department which manages protocol and reporting between the City and its Entities. The City further appoints and mandates the Board of Directors as to the strategic imperatives and performance objectives expected of the Entity.

The company has a portfolio in excess of 20 000 ha of public green open spaces including parks, cemeteries, nature reserves and approximately 3.2 million trees.

The Zoo has in its collection a total of 323 species and 50 Subspecies. This comprise 2737 specimens of which 1302 specimens are currently housed at the Zoo and currently on display, whilst 32 specimens are out on loan to other Zoos within South Africa, and 1 435 belong to Group Arks (Group Arks is an animal record keeping system for animals that are either in Aviaries (birds) or frogs and fish which cannot be easily counted and thus are grouped together).

The diverse species in the Zoo are demarcated into zones according to their places of origin, and this sets Johannesburg Zoo apart from other zoos. The majority of the species come from Africa and the big five is the draw card. The zones include animals from Savannah grasslands, comprising the majority of antelopes and animals from the rain forests of Central African, with gorillas and chimpanzees as some of the charismatic species.

The Amazonia section is dominated by species from Brazil, represented by a wide range of fresh water specimens such as reptiles and fish species. The Madagascar zone comprises of the animals from that island, including the lemurs. There are also species from the extreme hot and cold climates, that are unique to Johannesburg Zoo, and include camels, lamas and tigers.

Compared to other Zoos in South Africa, Johannesburg Zoo is still regarded as one of the most affordable tourism facilities that is easily accessible by the majority of Gauteng residents. It has a range of services such as a state owned, well managed outdoor restaurant which offers a variety of food, and coffee shops scattered across the whole facility, as well as a very affordable ferry that transports visitors to and from all directions of the facility.

The Company manages the following products and services:

- Urban parks, recreation and leisure facilities;
- Johannesburg Zoo;
- The Zoo conservation and research farm;
- Cemeteries and crematoria;
- Botanical services;
- Nature reserves, including bird sanctuaries, nature trails, dams and lakes;
- Environmental education;
- Biodiversity and conservation management;
- Eco-tourism products and services; and
- Trees and arboriculture services.

RESPONSE TO STRATEGIC DIRECTION

JCPZ has aligned its Business Plan with specific reference to the Strategic Objectives and Key Performance Indicators, to the priorities of the CoJ. The following outlines how the Company has

performed against these predetermined objectives:

STRATEGIC OBJECTIVE 1: SERVICE DELIVERY: To provide our services with pride to all citizens, and to redress imbalances of the past: 75% achieved.

STRATEGIC OBJECTIVE 2: RESPONSIVE GOVERNMENT: To provide a service based on the needs of the community at all times. There are 2 KPIs linked to this strategic objective, and both have been achieved, namely: "Number of educational programmes implemented per annum", and "Open planning research"

STRATEGIC OBJECTIVE 3: JOB CREATION: To facilitate jobs through our resources and partnerships. All four KPIs have been achieved namely: "Number of EPWP job opportunities created"; "Number of jobs created through the Enterprise Development programme"; "Number of primary co-operatives developed and supported"; and "The development and approval of an ecotourism, outdoor and adventure plan for JCPZ".

STRATEGIC OBJECTIVE 4: SAFETY IN COMMUNITIES: To provide safe facilities to communities through awareness, technology and patrolling: KPI has been achieved.

STRATEGIC OBJECTIVE 5: SOUND GOVERNANCE AND EFFECTIVE MANAGEMENT: To ensure sound governance and financial management and internal controls: Six of the nine KPIs have been achieved.

Service Delivery Performance

The organisation delivered on target with the Service Delivery Agreement as all service delivery key performance areas were achieved, i.e. horticultural, arboriculture, biodiversity and ecological maintenance.

JCPZ' operations in the period under review have focused on getting the basics right in providing service delivery through the maintenance of all our facilities, particularly in townships, while changing our focus to connecting with customers by responding rapidly to their complaints and to providing timeous feedback.

Cemeteries and Crematoriums

Cemeteries & Crematoria are responsible for the interments of mortal remains within the City of Johannesburg, together with cremations. A critical challenge is the inadequate burial space available. There are only 4 cemeteries, namely Olifantsvlei, Diepsloot, Westpark and Waterval cemeteries that are currently active for new burials in the City of Johannesburg. Region D & G carries the majority of the burials both with new and reopens amounting to 79% of all burials. The bulk of the funerals in the South are directed to Olifantsvlei Cemetery. Doornkop Cemetery is only conducting second burials as it now fully passive. With Region D & G carrying the majority of the burials, sourcing of additional suitable burial land in the southern areas of the City is critical; this is to meet the needs of the community and to alleviate the congestion at Olifantsvlei cemetery. The North cemeteries namely Waterval Cemetery and Diepsloot Memorial (Regions A and E) account for 4% of Burials and have sufficient burial space based on the current burial trend. The Central cemeteries namely Westpark Cemetery (Region B) account for 17% and has about 15 hectares available and also caters for communities in Regions B, C, D and F. The average burial rate has stabilised to +/- 14,000 per year over the last five (5) years, while the cremations were for 2018/19. for Outlined below is the available burial space in all active cemeteries within the City of Johannesburg:

FACILITY	AVAILABLE BURIAL SPACE	APPROXIMATELY BURIAL\ LIFESPAN OF THE CEMETERY
Olifantsvlei	120 Hectares (+200 ha's	Developed section – 240,000 / 100 years
	Undeveloped)	*
Doornkop	0 Hectares	Fully Passive(only second burials)
Waterval	210 Hectares	420 000 – 100 years **

Table 103: JCPZ - Cemeteries and Crematoriums

Diepsloot	45 Hectares	90 000 – 45 years
Westpark	15 Hectares (Incl.	30 000 – 12 years
	Muslim and	***
	Jewish)	

*No funds allocated for development for the next 2 years

**These numbers are pending the outcome of the court case between the CoJ and the Waterval Islamic Institute

***Muslim to last for 2 years and Jewish 2 to 3 years

In the period under review, burials increased to **14 878**, compared to **the 13 528** for the same period in the previous financial year. Outlined below is the graphical display of the activities:

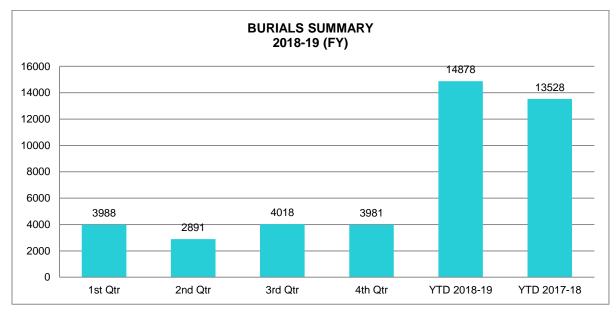

Figure 24: Burials summary 208-19 (FY)

Reopens/ 2nd burials from 4 006 in the 17-18 (FY) period up to a total of 4 297

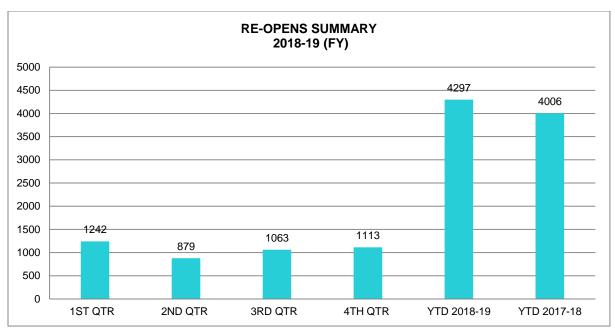

Figure 25: Re-Opens Summary 2018-19 (FY)

Cremations

A total of **3 107** cremations were carried out compared to the **3 260** for same comparative period in 2017/18 (FY):

The Zoo

In the last financial year, the Zoo received 515 623 visitors against the annual target of 480 000, and more than 29 000 were afforded an opportunity to enter the zoo for free through environmental education programmes such as Masibambisane, and biodiversity events such as Arbor Day, Rhino Day, World Environment Day, Bird Week, Earth Hour, Science Week, Flufftail, and Wetland Day.

In the year under review the Zoo achieved the following progress with regard to conservation projects:

- The Pickers gill's reed frog project is progressing very well: 250 Pickers gill's reed frogs were released in their natural environments in KwaZulu Natal.
- The Southern ground hornbill project steering committee approved that one pair from Joburg Zoo be moved to the farm in Parys. The farm has got a conducive atmosphere for animals to mate and breed without disturbance. The process is awaiting a transport permit approval from GDARD.
- The Zoo successfully bred four dwarf burrowing skinks in captivity as the first zoo to breed this species in South Africa as part of Conservation project.
- The new outdoor amphibian enclosure (bull frog) next to the Creature Feature was completed and the specimens have been introduced.

The Agri farming project at the Rietkuil Conservation and Research farm supporting the Joburg Zoo with vegetables and meat, has been fully implemented with no budget allocated.

Capital Projects and Expenditure

For the 2018-19 financial year the capital budget allocation afforded to the organisation through various city funding sources amounted to R36.0 million as outlined in the table below. During the mid-term budget adjustment, the Company's capital development budget was adjusted upwards to R54.3 million. The Company was allocated additional budget for the Olifantsvlei Cemetery project of R15 million, Zoo animals purchase of R1 million and ICT hardware and software of R5

million. Other projects were reduced to partially fund these increases, mainly the Rabie Ridge Park project by R2.2 million, that cannot be implemented currently.

As at 30 June 2019 the Company has spent 86% of its capital expenditure budget against an actual expenditure target of at-least 95%.

The following table shows details of the expenditure.

	Actual spent	Annual Budget	% Actual
Description	R '000	R '000	R '000
Inner-city Parks (COJ)	5 525	5 525	100%

COMPONENT F: HEALTH SERVICES AND ENVIRONMENTAL PROTECTION

3.13 Health Department

Introduction to Health Services

The Health Department is mandated to develop a high quality, efficient, equitable health system that is accessible to all of Johannesburg's residents. The Department is responsible for the provision of primary health care services in the City of Johannesburg through its network of 79 clinics (78 fixed and one satellite).

The City's clinics operate in conjunction with health facilities managed by the Gauteng Department of Health, which include: 30 clinics; 11 community health centres; two district hospitals (South Rand and Bheki Mlangeni); three regional hospitals (Rahima Moosa, Helen Joseph and Edenvale), two tertiary hospitals (Chris Hani Baragwanath, Charlotte Maxeke); and two specialised hospitals (Tara and Sizwe Tropical).

The City is also responsible for the delivery of municipal health services (environmental health services) that are provided as a legislative obligation bestowed to the City in terms of the National Health Act 61 of 2003. Municipal health services encompass those aspects of human health that are determined by physical, chemical, biological, social and psycho-social factors in the environment.

The City's Health Services is therefore mandated to protect the environment and to safeguard the public from contracting communicable diseases from food, water and other environmental impacts. This service is an obligatory service to be rendered by municipalities and is defined in the National Health Act, 2003, as "Municipal Health Services".

Municipal Health Services are listed as:

- Water quality monitoring;
- Food control;
- Waste management;

- Health surveillance of premises;
- Surveillance and prevention of communicable diseases, excluding immunisation;
- Vector control;
- Environmental pollution control;
- Disposal of the dead; and
- Chemical safety.

The City's Health Department also contributes to the strengthening the delivery of primary healthcare services by:

- Strengthening district health systems through improved access to primary health care services;
- Training and deploying municipal, ward-based outreach teams (WBOT);
- Improving health literacy levels;
- Community participation and co-operative governance in health;
- Improving access to antenatal care services;
- Improving the TB cure rates;
- Increasing the number of clinics providing ARV and HIV treatment services; and
- Consolidating the City's focus on Environmental Health Services (Municipal Health Services) through promotional, educational and enforcement programmes.

Performance highlights

Highlights for the 2018/19 financial year included the following: -

- The Executive Mayor's Pilot Project which was launched on 31 October 2016, at Princess Clinic, has now been extended to 26 clinics in the city;
- Since the launch of the eHealth@Joburg that took place at Jabavu Clinic on 8 June 2016, a total of 66 clinics now have the electronic health record system;
- The Department achieved 91.28% and 91% compliance, respectively, among formal and informal food premises against the target of 90%;
- The Department further achieved 85% compliance to Environmental Health legislation by schools against a target of 80%;

- A total of 167 (13 doctors and 154 nurses) were trained in the identification of early warning signs for substance abuse and possible medical interventions against a target of 81 (71 nurses and 10 doctors);
- There was an 8.7% increase in antenatal care early booking rate from the baseline of 63.9% in 2017/18 to 69.5% in 2018/19;
- In terms of the percentage of people tested positive for TB and initiated on treatment, for the period July 2018 June 2019, there were 31,286 TB symptomatic clients (5 years and older) with sputum sent and 2,558 (8.2%) tested positive. Of these, 2,442 (95.5%) patients were placed on treatment. Others were lost to follow-up due to wrong addresses (untraceable);
- In terms of the percentage of children under 1-year immunization coverage: (Integrated) for the period July 2018 - June 2019, this was 84.8% (webDHIS 2018 under 1yr Population estimates = 94,591 as at 26 Jun 2018);
- 100% of public sector clinics and 100% of public sector hospitals were inspected per quarter; and
- All air quality and water quality management requests were attended to.

3.14 Environmental and Infrastructure Services Development (EISD)

Introduction

Unlike most other global cities that are anchored by trade routes or access to oceans or navigable rivers, Johannesburg is founded on the mineral resources found underground. The economic activities that characterise Johannesburg have been responsible for the rapid urban growth within the city, both in terms of physical development and the number of urban dwellers, which drives the transformation of large areas of natural land cover to more 'urban' uses. Uncontrolled, the transformation leads to problems such as urban sprawl, inefficient transportation, environmental pollution, loss of ecosystem functioning, food insecurity and a general decay in perceived urban quality.

The management of natural resources either as pristine resources or as valuable economic commodities is the prime objective of the Environment and Infrastructure Services Department *(EISD)* with a focus on the potential consequences of utilizing these natural resources for human activity. The strain that these actions put on the environment, resulting in the incapability of the planet's ecosystems to sustain future generations, cannot be taken for granted.

The Department's main function is policy development, regulatory and compliance monitoring in respect of environmental matters rather than being an implementation agent or a service delivery agent. The mandate of the Department is embedded in the strategic functions of the Department as is reflected in the following key performance areas:

- Urban Water Management meant to ensure supply of water security and also ensure the quality of river health;
- **Bio-diversity Protection** which is concerned with ensuring protection of eco-systems and bio-diversity;
- Air Quality Management which supports interventions that will lead to clean air (e.g., mitigate against mine dust);
- **Climate Change** which is aimed at ensuring that City's greenhouse gas emissions are reduced to minimise its contribution towards climate change (mitigation) and to ensure resilience through adaptation;
- Waste management and minimization aims to reduce environmental pollution and also to minimize waste going to the landfill sites (taking into consideration the fact that the City has a challenge around the shortage of landfill space);
- Infrastructure planning and coordination is one of the integral areas of focus as it is meant to ensure adequate and resilient infrastructure to support the City's spatial vision; and
- Environmental education & awareness is aimed at behavioral change on environmental sustainability.

Programmes

In 2018/19, EISD focussed on various programmes across the key performance areas, as outlined above. For the purposes of this report, the Department has selected a few programmes to report on, as detailed in the sections to follow:

Integrated Waste Management

Waste Streams	Tonnages Diverted
Commercial	93 944
Dry Waste	25 991
Green Waste	50 959
Builders Rubble	5 978
Waste diverted	176 872

Table 109: EISD - Diversion of Waste to Landfill

Waste Streams	Tonnages Diverted
Waste disposed	951 492
Waste Generated	1 128 364
Percentage	15.7%

The City during 2018/19, continued to encourage waste minimisation as well as improving the regulatory performance of Waste Management Activities (WMA). For the year under review, the overall total of waste diverted from landfill was **176 872** tonnages against **1 128 364** tonnages of waste generated resulting in **15.7%** reduction of waste to landfill. The total waste diverted is a result of the various initiatives including the Commercial Waste Diversion, Dry Waste Recycling, Green Waste Diversion and Builders Rubble Diversion.

Alternative Waste Treatment Technologies (AWTTs)

The City's operating landfill sites have been challenged by declining landfill airspace. The Alternative Waste Treatment Technology Projects were initiated to ensure that the City achieves its objectives of:

- Reduction of waste to landfill;
- Generation of renewable energy; and
- Creation of jobs.

The AWTT projects initiated by the City are outlined below:

 Waste to Energy Plant - A Feasibility study for this project was conducted and approved by the Council. The project structure is a Public Private Partnership (PPP) where a private entity will build, operate and maintain the waste to energy facility on behalf of the City for a period of 20 years. The project entails treatment and disposal of waste. This initiative will minimise waste disposal by landfill and generate electricity from waste through mass burn technologies. The City is currently embarking on Public Notification Process for this project has been completed and the City is in the process of soliciting National Treasury Views and Recommendation (TVR1) approval. Bio-digester Pilot Plant - A feasibility study was undertaken and concluded that a 50 ton per day Anaerobic Digestion (AD) plant would be financially and technically beneficial to the City. The pilot would use 30 tonnes per day of wet waste from the Johannesburg Produce Market (JPC), and 20 tonnes from other sources such as restaurant food waste, and garden waste [from Pikitup and Johannesburg City Parks and Zoo (JCPZ)].

The project entails the treatment and disposal of biodegradable waste in line with the Waste Management Strategy to avoid and minimise waste disposal by landfill and to recover energy from the waste through the generation of bio fuel. The plant will be located in Region F at the Robinson Deep Landfill site. The project is currently at design phase.

Climate Change Action

The City of Johannesburg (CoJ) is amongst the biggest emitters of greenhouse gases in South Africa mainly from industrial activity, transport and residential areas. Anticipated future minimum and maximum daily surface temperatures are expected to be higher than they are at present. On average maximum temperature will be $2 - 3^{\circ}$ C higher than present. In addition, rainfall projections indicate episodes of heavy downpours that will result in flooding in many areas in the city. Industrial activity, veld fires, coal-fired stoves in residential areas and vehicular emissions are major contributors to deteriorating air quality in the city. The following projects were undertaken in 2018/19:

• Tonnes of CO2 offset in GHG emissions based on sector projects - The City's Growth and Development Strategy 2040 (GDS 2040), envisions a City that is resilient, sustainable and liveable. The GDS 2040 further commits to Climate Change Mitigation and equally to Climate Change Adaptation, and further identifies climate change as a cross sectoral imperative of the City. The City's approach to this is that of mainstreaming climate action into normal City processes, such as land use planning and decision making, infrastructure roll-out and service delivery. The Climate Change Strategic Framework is the means to integrate and leverage on the work of key sectors such as the Planning Department, the Transportation Department, and some key entities such as City Power, Joburg Water, and Pikitup, etc. These sectors are encouraged to implement projects and programmes that benefit carbon reduction and build resilience in the City. The EISD undertakes the responsibility of monitoring and reporting on the performance of these projects. Projects that were monitored and reported on in FY2018-19 are as reported below:

Sector	Project	Tons of C02e GHG emissions offset
a. Energy Sector	Energy Mix by Technology	28 334.7 tCO2e
b. Waste Sector	Green Waste Diversion	16 612.63 tCO2e
c. Transport Sector	Rea Vaya BRT project	40 137.28 tCO2e
Total	·	85 84.61 tCO2e

Table 110: EISD - Tonnes of CO2 offset in GHG emissions based on sector projects

- Development of the Climate Action Plan (CAP) The department has initiated a process to develop a Climate Action Plan (CAP). CAP is the City's strategic plan with the objective to prioritize evidence-based transformational actions with the aim of transitioning the City of Johannesburg towards an emission neutral, climate resilience city by 2050. It is envisaged that the CAP will be a City-wide action plan or a public plan to be actioned by the City administration (including the city's Municipal Entities), private sector, civil society, youth etc. The expected outputs of the CAP project are separated in various work packages that will indicate the project milestones. The following are the work packages:
 - Scenario modelling and target setting;
 - Development of climate action and implementation plan; and
 - Stakeholder engagement and reporting.

The project will be completed in the next financial year and implementation will then commence.

Air Quality Management

Air Quality in the City of Johannesburg (CoJ) is influenced by emissions of gaseous and particulate pollutants from anthropogenic activities and natural sources. Transportation and domestic fuel burning are the largest sources of air pollutants in the CoJ with contributions from listed and non–listed industrial activities and commercial activities, open fires and dust from sources such as mine dumps, open areas, construction sites, paved and unpaved roads. Programmes undertaken in 2018/19 to manage the ambient air quality include:

- Atmospheric Emission Licensing EISD is mandated to undertake the responsibility of implementing and enforcing the National Environmental Management: Air Quality Act 39 of, as amended. The key function for the City - through EISD - is to perform the function of the Air Quality Officer which includes the licensing of the listed industrial activities. The type of industrial activities that are regulated by the City have a potential to release emissions that may have a significant detrimental effect on the environment, as well as health, social and economic conditions. To date, the City has issued 37 active Atmospheric Emission Licenses (AELs) which are valid for a period of five (5) years.
- Ambient Air Quality Monitoring The City has a total of eight (8) air quality monitoring stations, which are strategically placed throughout the 7 regions. These stations measure a number of criteria pollutants such as PM10, PM2.5, SO2, NO, NO2, NOx, O3 and CO. At each of these stations' measurements are also done for meteorological data such as wind speed and wind direction, ambient temperature, relative humidity, rainfall, solar radiation and barometric pressure.

Hotspo t Zone	Monitoring Station to represent Hotspot Zone	Region	Address	Rationale

Managing Water Services

Water security is one of the biggest challenges facing the City and the country as a whole. The City is the largest consumer from the Integrated Vaal River System (IVRS). Although the City is currently implementing the Water Conservation and Demand Management Strategy, alternative water sources need to be explored, to avoid a situation where the demand exceeds the supply. Key Programmes implemented in 2018/19 by EISD were:

- Exploration and Development of Groundwater Resource The programme entails two separate projects running concurrently, with the first dealing with groundwater exploration by drilling of boreholes across the City (called Groundwater Exploration Study Phase 2) and the second dealing with the equipping and commissioning of the boreholes that were drilled in the previous financial years (called Equipping and Commissioning of groundwater boreholes – Phase A).
- Groundwater Exploration Study Phase 2: The scope of work for the project included borehole siting, drilling and pump testing of 11 borehole sites across the City, as part of the City's efforts to augment water supplies from alternative sources. Geophysics surveys were conducted for all 11 sites for the preparation of the drilling of the boreholes. Pump testing (which is water testing and sustainable yields) was done for 10 of the 11 boreholes because the 11th borehole was found to be dry.
- Equipping and Commissioning of groundwater boreholes Phase A: This project entailed equipping and commissioning of a total of 16 boreholes that were drilled across the City in previous financial years (FY2015/16 and FY2017/18). The project has been completed and the boreholes are ready for utilization.

The City of Johannesburg contains twelve (12) out of forty-one (41) threatened plant species recorded in Gauteng, three (3) threatened and special concern mammal species and (3) threatened invertebrate species. Eight (8) vulnerable bird species and four (4) near threatened species are particularly reliant on the Gauteng region, and a number of others also occur occasionally. Seven (7) of these bird species are found in the City of Johannesburg.

To achieve its biodiversity conservation objectives, the City developed a draft Bioregional Plan in 2011. This is a map of biodiversity priorities with accompanying land-use planning and decisionmaking guidelines, to inform land-use planning, environmental assessment and authorizations, and natural resource management by a range of sectors whose policies and decisions impact on biodiversity. With the overall biodiversity objective of enhancing human development and wellbeing through sustainable use of biological resources and equitable sharing, the Department implemented the projects below:

- Review of bioregional plan The draft Bioregional Plan classifies Biodiversity Priority Areas into two main categories namely: Critical Biodiversity Areas (CBAs) and Ecological Support Areas. The Draft Bioregional Plan (2011) and its ground verification was concluded in 2016. However, the mandatory stakeholder consultation process (for mandatory users and affected government agencies, as well as civil society stakeholders and land owners), and the process of submitting the bioregional plan for publication has not yet been undertaken. The plan is currently in the process of being gazetted.
- Development of Alien and Invasive Species Monitoring, Control & Eradication Plan -Section 8 of the Invasive Species Regulations of the National Environmental Management: Biodiversity Act 2004 (Act no. 10 of 2004) requires management authorities of protected areas and organs of state in all spheres of government to prepare Invasive Species Monitoring, Control and Eradication Plans. The development of this plan has been concluded.

Alien Vegetation Control

EISD and Johannesburg City Parks and Zoo (JCPZ) have agreed on scope of work for Alien Invasive Vegetation Control Project. JCPZ was appointed as the implementing agent and the project was conducted over a period of three months. A total of 244 hectares have been cleared and a total of 98 job opportunities were created across the various regions of the city.

Comment on performance

The capital projects implemented are addressing the City's priority of preserving our resources for future generations. The department will continue with the management of natural resources either as pristine resources or as valuable economic commodities with a focus on the potential consequences of using these natural resources for sustainable human development, activity and will strive to enhance the capability of the planet's ecosystems to sustain future generations.

COMPONENT F: PUBLIC SAFETY AND SECURITY

The Public Safety Department is mandated to champion by-law management, crime prevention and traffic management, disaster management, emergency related responses and licensing services. Public Safety responds primarily to the City's priorities and objectives with respect to creating a sense of security through improved public safety. The Department comprises the following business units, namely:

- Johannesburg Metro Police Department (JMPD);
- Licensing Department;
- Emergency Management Services (EMS); and
- Disaster Management (DM).

The Department is entrusted with the responsibility of reducing lawlessness and bringing about improved safety in the city so that development and service delivery can prosper in a liveable, resilient and sustainable city.

3.15 Johannesburg Metropolitan Police Department

Introduction

Chapter 12 of the South African Police Services Act 68 of 1998 makes provision for the establishment of municipal and metropolitan police services. In terms of section 64E of the said Act, the metropolitan police is responsible for the following functions, namely: traffic policing (subject to any legislation relating to road traffic), the policing of municipal by-laws and regulations which are the responsibility of the municipality, and the prevention of crime.

Performance highlights

During December 2018 to February 2019, the JMPD developed a deployment strategy to reduce road fatalities. Officers were deployed at all on- and off-ramps to major roads, e.g. N1 from Grasmere to Centurion, M1 from Crown Interchange to Buccleuch and the M2 East and West.

One hundred (100) officers, 37 vehicles, 8 motorcycles and 2 Nyala's were deployed to cover thirty-seven locations. The increased visibility contributed to a 28% reduction in accidents and 29 % reduction in fatalities during the festive season as compared to the previous year.

The introduction of EBAT machines also increased the success rate of convictions within a reasonable period. With the EBAT machine, the alcohol level of a driver is determined conclusively from his/her breath without undergoing blood testing. JMPD arrested more than 750 people using the EBAT machines in the period from 21 December 2018 to February 2019. This technology has contributed greatly to the achievement of one of the main objectives of the Department, which is to improve road safety and minimize road fatalities as a result of drinking and driving.

Details	2018/19		2019/20	
	Estimate No	Actual No	Estimate No

an average day.				
No. of police officers on duty on an	1300	1000	1300	
average day.				

Table 116: Metropolitan Police Service Data

The following areas of concern should, however, be pointed out, namely:

- The number of officers available is determined by sampling the number of officers in the field and in offices and stations on the same day, sampling different times of day and different days of the week throughout the year:
 - o JMPD implemented the 4-day in and off shift system during the month of July 2018;
 - There are 2 shifts, i.e. morning shift (06:00-18:00) and night shift (18:00-06:00);
 - JMPD has more than 1800 operational officers in the field at any given day; and
 - \circ $\,$ More than 900 officers in the morning and 900 officers at night.
- Of the 103 757 accidents recorded in 2018/19, 552 were fatal, 1958 were serious, 11414 were slight and 89 833 were damage only.

Comment on overall performance

Overall, the JMPD performed well in terms of budget spend, except for the fact that a new pound could not be purchased by end of 30 June 2019 which led to an under-expenditure.

Creating a sense of security through improved public safety involves *inter alia*, towing and pounding of vehicles that pose a danger to the public. Two (2) breakdowns were procured to render this service.

3.16 Licensing

Outreach Programmes

The establishment of an outreach programme has enhanced the Licensing Department's revenue and its campaign against fraud and corruption. The objective of the programme is to engage members of the public about the risks and the consequences of obtaining licenses and any other services through fraudulent means. Furthermore, the campaigns also assist in educating members of the public about the services that the Department renders and how to access it.

Extended hours

Opening the licensing centres on Saturdays enables our clients to do their personal licensing activities when it suits them, and also assists to reduce long queues and decongest licensing centres across the City.

Satellite offices

Nine (9) satellite offices were assessed and approved by Department of Transport. The opening of new satellite offices aims to make licensing services accessible to remote and difficult to reach communities around the City of Johannesburg.

Performance highlights

(i) Marlboro Licensing Centre - The improvement and upgrading of the Sandton Licensing facility included the implementation of modern technology to assist in minimising corruption, managing queues and improving the customer's experience through digital information of turnaround times and services. The licensing facility serves as a 'smart', innovative model that can be replicated throughout the Gauteng Province.

- (ii) Project identification and conceptualisation of Business Desk & Revenue Enhancement Unit in Midrand - The Business Desk and Revenue Enhancement Unit will be constructed in Midrand (Region A) and will serve as a one-stop-service for corporate clients.
- (iii) **Cashless system** The following stations were migrated from monetary systems to being cashless:
 - o Wemmer Cash Hall
 - Wemmer Super Bulk
 - Martindale Bulk Centre
 - Randburg DLTC & MVRA
 - o Sandton DLTC & MVRA
 - o Rossetenville Satellite
 - o Lenasia Satellite
 - o Ennerdale Satellite

3.17 Emergency Management Services and Disaster Management

During 2018/19 financial year EMS was running with +- 8 Fire Engines that covered the whole of Johannesburg, therefore service delivery was affected.

These fire engines were allocated per district as there are 6 districts in EMS. Those 6 Fire engines were placed at fire stations with high call volumes and next to the high risk areas where there are lot of informal settlements. The department would want to place 1 fire engine per fire station in the future.

Table 124: Fire - Strategic objectives taken from the IDP

During 2018/19 financial year, EMS operated with approximately eight (8) fire engines for the entire Johannesburg, and service delivery was severely affected. These fire engines were allocated per district – there are six districts in EMS. The 6 fire engines were allocated to fire stations with high call volumes and that are situated next to high risk areas with numerous informal settlements. The Department is aiming to place at least one fire engine per fire station in the near future.

COMPONENT G: METROPOLITAN TRADING COMPANY

3.18 Metropolitan Trading Company

Introduction

The Metropolitan Trading Company (MTC) operates as an independent municipal entity, wholly owned by the City of Johannesburg Metropolitan Municipality (CoJ), since 4 September 2015. It is entrusted with the mandate to enable smart city programmes as well as rendering the full spectrum of ICT services to the City and many of its municipal entities. It furthermore provides capacity on the Johannesburg Broadband Network to the City and to ICASA licensed operators and the public at a cost-effective price, while being profitable.

Performance highlights

Highlights in the 2018/19 performance year, included the following:

- Service Desk and Network Monitoring solution;
- Monitoring and service management tools;
- Communication infrastructure;
- Cost reduction for COJ entities and departments in the 2018/2019 financial year;
- Improving delivery of health care;
- Improving safety and security in the City;
- Capacitation; and
- Efficiency in procurement of ICT solutions.

Challenges

Challenges encountered in the 2018/19 performance year included the following:

- Civil construction works, and vandalism is an ongoing problem to Telco networks;
- The equipment that was due for replacement to improve the efficiency of the network, was not replaced because the awarded supplier is under investigation and therefore MTC cannot proceed with the project;
- Investigation of City contracts has resulted in MTCs free Wi-Fi projects being severely affected;
- Limited capital expenditure budget to improve infrastructure;
- Critical staff shortage;
- GICT receivables outstanding;
- Shareholders loans;
- MTC funding models; and
- Tax matters

Comments on overall capital expenditure

The entity spent 98% of its capital budget as at year-end. Spending was initially slow during the first and second quarters, but accelerated in the third and fourth quarters. Some of the key capital expenditure for the year are as follows:

- New fibre links Sandton, Roodepoort, Troyville and Joburg Market;
- Purchase of laptops, office furniture and office equipment; and
- Video conferencing system.

COMPONENT H: CORPORATE POLICY OFFICES AND OTHER SUPPORT SERVICES

3.19 Group Information and Communication Technology

The Group Information Communications Technology and Information Management Department is responsible for implementing smart city enablement programmes, and furthermore, it has to ensure that the City embraces fourth industrial revolution (4IR) technologies as far as possible and within means.

The department's primary focus is aligned to the following key strategic objectives: -

- Develop, implement and maintain a sound ICT Governance Framework across the City;
- Implement sound ICT Enterprise Architecture for the City;
- Support the Smart City Enablement Agenda;
- Develop and maintain the City's ICT Infrastructure;
- Ensure the adoption and usage of ICT Services both internally and externally;
- Modernise all legacy ICT Systems;
- Provide a robust, reliable and efficient ICT service to enable smart service delivery;
- Develop and support green and blue economy;
- Develop and grow the establishment of ICT Hubs within the City's communities for future ICT skills/literate;
- Ensure development through ICT as centres of development;
- Ensure the development of the informal economy in alignment with BBBEE;
- Create equally shared economic resources within the City;
- Create the competence and capability to enable and integrate City's objectives, operations and related services;
- Ensure the development and implementation of standardised ICT related competency centre/s for the City in a secure and sustainable manner;
- Create a centralised information competence for the City; and
- Demonstrate ICT Investment and Value to the City relating to the ICT project investments, including the management and oversight of supplier relationships, engagement and governance.

Performance overview

Deployment of Wi-Fi Hotspots across the City

Connectivity and Universal Access is a Smart City programme which is within the Department's area of service. This programme ensures that the City bridges the digital divide between the '*haves*' and the '*have nots*'.

Due to the challenge of budget and legal disputes, the Department failed to achieve this, and the KPI was deviated accordingly. Wi-Fi was deployed on 80 sites across the City. However, the hotspots were not activated during the financial year under review, due to a legal dispute. The dispute has been resolved as at the end of the 2018/19 financial year.

Automation of the City's IDP System

The department is in the process of deploying one of the biggest ERP System installations, namely SAP S4 Hana. One of the modules within this deployment is used for automation of the IDP System. All the City's business and entity KPIs have been automated in the SAP SSM module. The system is operational and GSPCR is responsible for the SAP SSM module.

Establishment of the City's Cyber Security War Room

The City's Cyber Security operation centre has been established. Tasks such monitoring of cyber threats, compliance checks of the City's ICT systems and incident reporting and investigation is now happening. In June 2019, the department appointed 15 interns to capacitate the centre. There is a need for the SOC to operate 24/7. The capacitation of the centre is an ongoing project.

Refreshment of the End User Hardware (desktops and laptops)

GICT is responsible to refresh the end-user computing desktops and laptops. The Department consolidates the refresh requirements for the City after looking at the lifespan of the computer equipment. In this reporting cycle, 1438 machines were procured to refresh 'out of warranty' machines within the City's environment.

Refreshment of the WAN and LAN

The City continues to transform its ICT environment, deploying new systems and modernising all legacy systems. The GICT department must also deal with the City's obsolete network infrastructure that has reached its end of life and end of support, which requires massive investment for its upgrade and replacement of faulty equipment. The Department therefore embarked on a project to refresh the outdated network hardware as well as the replacement of faulty hardware.

The objective of the project was to ensure that the City's network infrastructure is robust and responds with speed to the dynamic technology requirements. Network infrastructure has been upgraded and installed at 64 clinics plus 135 other sites across the City's regions.

ICT Services Systems Availability

Systems availability is at 97% and ICT Systems are made up of the following: -

- Windows Servers hosts the following systems and services, E-Mail, Intranet, Authentication Services, e-Health System, e-Venus Cash Receipting System, SharePoint for team sites, Electronic Document Management System and Property and Revenue Value Chain Systems;
- Solaris Servers provide SAP service (CRM, R3, Billing, Business Warehouse)
- Internet Services Web browsing, Social Media and video and audio streaming. (Note that currently social media, video and audio streaming is limited to a department such as Marketing);
- AIX Servers provides LIS, Metro Cash Router and Library System Service; and
- Hosting Availability- which services the Metro Centre, Roodepoort and IS Data Centres. Metro and Roodepoort data centres are undergoing refurbishment which will ensure that availability improves.

Note: The Department's infrastructure environment is obsolete and must be upgraded to enable the improvement in uptime to 99.9%.

Deployment of the New Telephony System

GICT is moving all the City's telephone systems to VOIP. The aim is to centralise management and reduce the telephone bill by using the City's network, where possible, to make calls. A VOIP PABX has been installed at Metro Centre and its functionalities have been extended to other City's sites.

Upgrade of the City's Hardware Infrastructure

The SAP Business Transformation Program Infrastructure (SAP 4HANA) is a priority. The development and quality assurance infrastructure for SAP was delivered and configured in May 2019. Another aspect of upgrading the infrastructure is to ensure the provision of modern Data Centre Infrastructure Environment. In this regard, the generators and air conditioners upgrade has been concluded. The Data Centre hosting area has been refurbished to improve the data transmission lines with proper security switches. Civil and electrical work at the Roodepoort Data Centre has also been completed.

The Metro Data Centre currently has a water leakage problem. An assessment was done and a decision taken in February 2019 to relocate the Data Centre to the JD Building where the Group ICT Department was moving into. There was a delay in the commencement of the JD House Data Centre construction due to the COJ and the landlord taking longer to agree on the conditions of the lease. The upgrade of the switches at Roodepoort and IS Data centre, has been completed.

Tlhabologo - Modernisation of Legacy Applications

The purpose of this project is to provide a modernised platform of all legacy applications. Applications which are accommodated in this project are those that will not be part of the SAP Business Transformation Program, as they are usually referred to as Non-SAP Applications. This project has seven waves. Three (3) out of the seven (7) waves have been delivered, namely: electronic document management, intranet, website and e-services. There was a contractual dispute between the City and the service provider which impacted negatively on the progress of the project. The dispute was resolved with the service provider towards the end of this financial year.

The scope of the programme was reviewed and applications not relevant to current business requirements were removed and replaced with new applications, e.g. E-Petitions. The work resumed on 24 June 2019 with the following prioritised: -

- Document Management (Committees);
- Property Information Search;
- SPLUMA; and
- TAS.

SAP Business Transformation Project

The City of Johannesburg is currently deploying a very large and complex SAP Programme. This is the biggest SAP installation in Africa; if not in the world. Since the City's current SAP version is 4.7, the implementation cannot be referred to as an upgrade hence the programme is called the SAP Business Transformation Program (SAP BTP). Already, a technical Go Live has been achieved for Release 1A and 1B.

The SAP target could not be achieved as the target was not aligned to the SAP BTP timelines (see below).

The programme timelines are depicted below:

3.20 Group Forensics and Investigations Services (GFIS)

Introduction

In this period, Group Forensic and Investigation Service (GFIS) continued with the implementation of its approved mandate as mentioned below. This mandate was executed by the following business units within GFIS:

Business Unit	Function
Commissioner	The Commissioner is responsible for the overall leadership
	and management of the Department.
Operations	This business unit is responsible for investigation of cases
	related to fraud and corruption, theft of City assets and
	Maladministration.
Hijacked Properties	This business unit is responsible for investigation of cases
	related to property crimes and slum lording towards
	reduction of hijacked properties.
Forensic	This business unit is responsible for Minimum Information
Investigation	Security Standards (MISS) within the City. This includes pre-
Management Centre	employment vetting, physical security assessment,
	facilitation of threat and risk assessments, vetting co-
	ordination, security breaching investigations, security
	awareness workshops, support investigations pertaining to
	profiling of suspects.
Criminal Prosecution	This business unit is responsible for the monitoring of the
Services	implementation of recommendations regarding criminal,
	disciplinary and civil action emanating from the
	recommendations of investigations.
Strategic	This business unit is responsible for the promotion of sound
Stakeholder	relationships with key stakeholders to enable GFIS to deliver
Management	on its mandate.
Strategic	This business unit is responsible for providing strategic
Management	planning and performance monitoring, finance
Services	management, human resource management, risk

Table 134: GFIS business units and functions

management,	administrative	support	and	transversal
business deve	elopment to ena	ble GFIS	to de	eliver on its
mandate.				

The core mandate of GFIS is to: -

- Prevent, detect, investigate and resolve all reported cases of fraud and corruption, theft of the City's assets, maladministration, illegal connections, and breach of security as well as hijacked properties;
- Facilitate the arrest and prosecution of offenders;
- Address serious and complex economic crimes through prosecution driven investigations, focusing on the criminal syndicates/enterprises;
- Effective implementation of the Minimum Information Security Standards (MISS) in accordance with the provisions of the National Intelligence Act, Municipal Finance Management Act, Municipal Systems Act etc. This will ensure the protection and safety of personnel, information and assets of the City from any identified or perceived threats through vetting, screening and physical security, etc.;
- Establish a multi-disciplinary team that will work in an integrated manner;
- Monitor implementation of forensic investigation outcomes;
- Provide advice on the resolution of all disciplinary, criminal and civil matters post investigation; and
- Establish and maintain good working relations with stakeholders especially with the Chapter Nine institutions and other relevant stakeholders. Furthermore, engage with internal and external stakeholders through stakeholder engagements forums.

Performance highlights

- GFIS partnered with the Association of Certified Fraud Examiners (ACFE) for the International Fraud Awareness Day which was held on 16th November 2018 at the Old Council Chamber Wing, Metropolitan Centre were the Executive Mayor Herman Mashaba gave a key note address. The event was attended by about 200 delegates.
- Fraud awareness sessions were successfully conducted for Johannesburg Property Company (JPC) staff across the City between the 4th and 13th December 2018.
- A Twitter page for the Department was created during this period. Followers of the page are able to report matters of fraud & corruption, theft of city assets, maladministration and hijacked buildings through the platform. Matters that are reported through this platform are referred to investigators.

- GFIS has an operational face book account as from 1 October 2018 this platform will be used to promote an anti-fraud and corruption culture.
- Community outreach sessions were held in various shopping malls across Johannesburg which include Fourways Crossing, Cedar Square, Cresta Mall, Clearwater Mall, Northgate Mall, Maponya Mall and Southgate Mall.
- Pamphlets for hijacked properties and generic fraud and corruption messages were designed, printed and distributed. These pamphlets are displayed in the reception area of GFIS and other floors where community members can access them.
- GFIS also participated and made presentations in fraud awareness sessions which were organised by the various departments and Entities of the City. Pamphlets were distributed during the awareness session.
- Outreach programmes were conducted as follows:
 - Re-opening of the Marlboro Licensing Centre on 18 April 2019 Pamphlets were distributed to create awareness around the fraud and corruption that is taking place within the City;
 - Region E Open Day awareness drive on 13 May 2019 in Alexandra This was a build-up campaign to the Region E open day where GFIS distributed pamphlets and engaged with members of the community; and
 - Region E Open Day took place on 17 May 2019 at Alexandra Stadium where the Department joined other City departments in engaging with members of the community to talk about the work that GFIS does.
- GFIS participated in two "A Re Sebetseng" campaigns which took place on 18 May 2019 in Glenanda, Johannesburg and 20 June 2019 in Lenasia CBD, respectively. On these days officials from GFIS took part in cleaning the streets while also engaging with residents about the work that the Department does in the City of Johannesburg.
- On 29 June 2019, GFIS conducted an awareness campaign at Cosmo City Mall. On the day, the officials engaged with the community members on how GFIS conducts its work and received concerns that community members have and issues relating to their reported cases.
- As part of strengthening intergovernmental relations, GFIS Department was invited by the Garden Route District Municipality (GRDM) to share the understanding of the impact of corruption on service delivery in the local government sector.
- GFIS was invited to the 12th Annual Leadership for Women in Law Enforcement conference to present on the importance of professional values and ethics for women in law enforcement.

- GFIS presented at the Institute of Traffic Law Enforcement Organisation conference held in Kwa-Zulu Natal, Ethekwini on 14-16 November 2018.
- Of the 9 property owners who regained control of their properties from the hijackers,
 5 have been engaged with the intention to enter into compliance agreements regarding the redevelopment of those properties.
- Continued with the investigations and resolving reported cases.
- The acquisition of the War Room equipment was finalised in consultation with Metro Trading Company (MTC) and Group Information Communication and Technology (GICT). It is envisaged that the War Room will be functional in the next financial year.
- GFIS participated in the Public Participation process together with the Committee on Oversight over Governance (OCG) for the Problem Properties By-Law.
- Of the 9 property owners who regained control of their properties from the hijackers, 5 have been engaged with the intention to enter into compliance agreements regarding the redevelopment of those properties.
- For the Security Insourcing Project, GFIS concluded the verification of the vetting data that was conducted on criminal checks.
- The collaboration between GFIS Department and South African Police Services (SAPS) Gauteng Provincial Office has yielded positive outcomes in tackling property hijacking cases through crime prevention intervention and investigations. On the 2nd of April 2019, a meeting between GFIS Department and South African Police Service (SAPS) Provincial Commissioner was held to address the challenges that GFIS experienced when dealing with criminal cases of property hijacking.
- GFIS and SAPS have established a task team which comprises of six detectives to deal with the cases of property hijacking within the City.
- In the spirit of good governance it was decided that all employees in the City of Johannesburg will be subjected to the vetting process as prescribed by chapter 5 of the MISS document. The process includes the completion of a Z204 form issued by the SSA. On the basis of the information contained on the Z204 and other supporting documents, a detailed criminal, financial and relationship background check is conducted by the SSA. At the end of this reporting period 25 Executive Management Team (EMT) were vetted as supported by the City Manager's intervention.
- 51 joint operations were conducted for the period under review and these were supported by the JMPD, SAPS, Home Affairs and other relevant stakeholders.

GFIS Deliverables

Table 135: GFIS - Strategic objectives taken from the IDP

Service Objectives	2016/17	2017/18	2018/19	2019/20
Service Indicators	Target Actual	Target Actual	Target Actual	Target
% of fraud and corruption, theft and maladministration cases resolved	N/A N/A	50% 27%	30% 54%	33%

REASONS FOR UNDER/OVER SPENDING OPEX

Employee Related Cost

The Department has spent 104% of its budget allocated to employee related cost.

Depreciation

The Department has 100% expenditure on depreciation as it is a non-cash item.

Repairs and Maintenance

There was no expenditure for repairs and maintenance and this is because there were no assets to be repaired.

Contracted Services

The Department was allocated a total amount of R34 million for contracted services which is mainly for the establishment of a forensic panel. At this stage the forensic panel is not yet finalized and the process is at bid evaluation stage. It is envisaged that the panel will be appointed in the first quarter of the new financial year 19/20. The 14% spending of contracted services was used for items such as fleet.

General Expenses

R24.8 million was allocated for general expenses and the actual expenditure was R19.2 million (77%). As a result there is an under expenditure of R5, 5 million (23%) due to the following:

- Rent reimbursement from Offices of the Ombudsman and City Manager As from November 2018, GFIS is subletting some of its office space to the Offices of the Ombudsman and City Manager and as a result, the monthly payments from these two offices offset the total rental expenditure. The total amount received for rental is (R430 000X6months) =R2, 5 million.
- Advertising and Branding The under-spending of R800 000 is due to the delay in procurement processes.
- 3. Telephones under-spending of R800 000 is due to year end and journals still being processed.
- 4. Strategic Break Away The Department had budgeted an amount of R1 million for the team breakaway that could not take place due to internal cost containment reasons.

Internal Charges

There was no expenditure to the R1, 1 million budget for internal charges which takes into account Insurance, Internal Printing and Vetting Services. This under expenditure was due to Insurance transactions not charged to GFIS account and procurement processes of Vetting Services through Metro Trading Company (MTC) did not happen in 18/19 financial year.

Capital Expenditure

Table 138: Capital Expenditure: GFIS

R'000										
	2016/17		2017/18		2018/19					
Capital projects	Budget	Actual Expenditure	Budget	Actual Expenditur e	Budget	Adjuste d Budget	Actual Expenditur e	Variance from original budget		
Total	0	0	10 000	4 489	20 500	20 500	17 982	12%		

The Department was allocated a total amount of R20.5 million for the furnishing of the War Room. An amount of R17 982 million (88%) has been spent. It is to be noted that the 12% is the VAT portion, which will reflect in the books of Group Finance.

COMPONENT I: ORGANISATIONAL PERFORMANCE SCORECARD

3.21 Institutional Service Delivery Budget Implementation Plan 2018/19

This section contains the Annual Performance Report on the City's approved strategic plans implemented by the Municipality's Departments and Entities who are responsible for actual performance against the planned targets as derived from the Municipality's IDP and SDBIP.

Table 139: Institutional Service Delivery Budget Implementation Plan 2018/19

KPI	Key Performance Indicator	Baseline	2017/18 Actual	2018/19 Target	2018/19 Actual Annual Performance
No.			Annual		
			Performance		
Prior	ity: Promote economic development and	attract investmen	t towards achieving	5% economic gr	owth that reduces unemployment by 2021
1.	Rand value of investment and business	R8.69bil	R8.69bil	R15bil	R17.29billion
	facilitated				Target achieved
2.	Number of EPWP work opportunities	23 227	23 227	29 065	18 680
	created citywide				Target not achieved due to under-reporting by
					Departments and Municipal Entities.
					Mitigation: Continue tracking CAPEX project spending
					and implementation. Conduct workshops to ensure that
					all Departments and Municipal Entities partake in EPWP
					implementation and reporting. EPWP workshop for
					MMCs.
3.	Number of SMMEs supported by the City	10 000	10 000	16 000	16 818
					Target achieved

KPI	Key Performance Indicator	Baseline	2017/18 Actual	2018/19 Target	2018/19 Actual Annual Performance
No.			Annual		
			Performance		
Prior	ity: Ensure pro-poor development that a	ddresses inequalit	y and poverty and p	provides meaning	ful redress
4.	Number of Inner-City property	129	129	25	27 awards were made to investors translating to 91 inner
	development projects awarded, approved				city properties released for redevelopment
	in Council for release to the private sector				Target achieved
5.	Percentage of informal Households with	82.62%	82.62%	87.03%	87.18%
	access to water at minimum LoS1				Target achieved
6.	Percentage of informal Households with	37.72%	37.72%	40.69%	41.61%
	access to sanitation at minimum LoS1				Target achieved
7.	Number of unit structures in informal	6 796	6 796	1 580	3 191
	settlements with access to electricity				Target achieved
8.	Number of informal settlements upgraded	2	2	10	0
					Target not achieved due to the current wording of the
					KPI reflect outcome based, as upgrading of the informal
					settlement is 7 to 13 years. The KPI must be amended
					to reflect specific deliverable each year.
					Mitigation: 2019/20 KPI will be reworded to measure the
					number of informal settlements layout plans developed,
					implementation will be done according to the NUSP.

KPI	Key Performance Indicator	Baseline	2017/18 Actual	2018/19 Target	2018/19 Actual Annual Performance
No.			Annual		
			Performance		
9.	Number of mixed housing opportunities	3750	3750	967	408
	constructed				Target not achieved due to the HSD grant was reduced
					by the Province and after the City intervention it was
					reinstated and that delayed the procurement process as
					the results the department did not achieve the target.
					Mitigation: Speed up the appointment of contractors for
					Riverside View and Lufhereng projects by quarter 1 of
					209/20. Furthermore, the City will strengthen relations
					with the National and Provincial to ensure transparency
					facilitation and allocation of the grants.
10.	Percentage of all City recognised	100%	100%	100%	69.34%
	informal settlement households provided				Target not achieved, poor data collection management
	with integrated waste management				by the entity.
	services				Mitigation: Entity's IT will create a processes to upload
					all the informal settlement list in the BIS to ensure that
					all source documents are captured and reports will be
					generated monthly for ease of reporting.

KPI	Key Performance Indicator	Baseline	2017/18 A	Actual	2018/19 Target	2018/19 Actual Annual Performance
No.			Annual			
			Performanc	e		
11.	Number of title deeds transferred to	2 762	2 762		2 000	1 610
	eligible beneficiaries					Target not achieved, due to delays in registration with
						the deeds office attributable to queries and changes
						between the new and old addresses.
						Mitigation: Continuous engagements between with
						Deeds Office, Group Finance and Conveyances to
						unlock the delays encountered in lodging and
						registration of title deeds.
12.	Percentage of qualifying residents	100 000	100%		100%	81%
	receiving free basic services	individuals with				Target not achieved, due to the following reasons:
		access to ESP				Misalignment between the department and City Power
						on smart meters
						Poor data-capturing resulting in system errors
						Mitigation:
						Quarterly workshops to re-iterate the SOP
						Re-training of staff
13.	Number of social and affordable housing	360 (with 260 in	360		360	268
	units developed for underprivileged	the inner City)				Target not achieved, due to project behind schedule.
	beneficiaries City-wide					Mitigation: The remaining 92 units will be ready for
						occupation in quarter 1 of 2019/20
Prior	it: Create a culture of enhanced service of	delivery with pride	and dignity			

KPI	Key Performance Indicator	Baseline	2017/18 Actual	2018/19 Target	2018/19 Actual Annual Performance
No.			Annual		
			Performance		
14.	Percentage completion of skills audit of	100% (levels 1 to	100%	100%	98.86% (1475 of 1492)
	employees	2)			Target not achieved
					Mitigation: Skills audit to be completed in the next
					Financial year.
Prior	ity: Create a sense of security through ir	nproved public saf	ety		
15.	Number of by-law enforcement	173	173	250	1 422
	operations in the City to restore law and				Target achieved
	order				
16.	Number of traffic enforcement operations	4 464	4464	5 000	6 326
	in the City to ensure orderly road traffic				Target achieved
	control				
Prior	ity: Create an honest and transparent Co	J that fights corru	ption		
17.	Percentage increase in customer	59%	59%	1%	>1%
	satisfaction levels				Target achieved
18.	% of investigated fraud, corruption, theft	New Indicator	New Indicator	30%	35%
	and maladministration cases resolved				Target achieved
Prior	ity: Create a City that responds to the ne	eds of the citizens	, customers, stakel	nolders and busir	ness
19.	Number of public participation meetings	New Indicator	New	30	44
	held with respect to planning and				Target achieved
	budgeting				

KPI	Key Performance Indicator	Baseline	2017/18 Actual	2018/19 Target	2018/19 Actual Annual Performance
No.			Annual		
			Performance		
20.	% processing of building plans less than 500 square meters is concluded within	71.7%	71.7%	100%	85.2% Target not achieved due to building plans that were
	statutory timeframes (30 days)				processed by the plans examiner that were not captured
					in the BAS system. There is a time delay of 5 days due
					to manual processing and lack of adequate capacity.
					Mitigation:
					The importance of capturing the information has been
					communicated to the plan examiner. The chief plans
					examiners are conducting a follow up on all plans that
					were submitted from Admin to identify the plans that
					were not captured.
21.	Average number of Rea Vaya passenger	47 000	48 434	53 000	52 710
	trips per working day				Target not achieved, Low passenger figures is due to
					various reasons including service delivery protests,
					vandalized Rea Vaya stations that are currently not in
					use and continued encroachment by motorists on Rea
					Vaya dedicated lanes
					Mitigation: Service promotions and commuter
					engagements.

KPI	Key Performance Indicator	Baseline	2017/18 Actual	2018/19 Target	2018/19 Actual Annual Performance
No.			Annual		
			Performance		
22.	Average number of Metrobus passenger	51 000	38 693	42 000	33 237
	trips per working day				Target not achieved, due to non-availability of buses.
					Mitigation:
					Refurbishment of buses, implementation of the
					integrated maintenance strategy and rationalised shift
					configuration research.
23.	Number of City clinics that offer extended	13	11	13	13
	service hours				Target achieved
24.	Number of additional nurses and doctors	125 (114 nurses	125 (114 nurses	81 (71 nurses	167 (154 Nurses and 13 Doctors)
	trained in the identification of early	& 11 doctors)	& 11 doctors)	and 10 doctors)	Target achieved

48.	Km of open storm water drains converted	1.6km	2.214km	1.5km	1.264 km
	to underground systems				Target not achieved due to delays in SCM process,
					several community work stoppages, on the gravel roads
					upgrade projects in Region A, C and G and poor
					performing service providers.
					Mitigation: Review of JRA supply chain process

CHAPTER 4: ORGANISATIONAL DEVELOPMENT PERFORMANCE

COMPONENT A: INTRODUCTION TO THE MUNICIPAL PERSONNEL

The operations of Group Human Capital Management are guided by the City's objective of "a Well Governed, Efficient and Effective Metropolitan Government Administration, with Professional and Efficient Staff and Resources that Serve with Pride to make the City Work – so that South Africa Can Work"."

The City is committed to the provision of professional, effective and efficient service delivery to its community. For this service delivery to take place the City ensures a skilled workforce by employing people with the required skills, experience and ability to add value to the City's service delivery.

The process to recruit employees with the required profile is supported by Group Human Capital Management (GHCM) through the implementation of the Talent Acquisition Policy and other policies. Through these policies, GHCM assesses the human capital capacity of the City going forward, evolves to adapt to a changing environment and ensures that employees possess the required skills and competencies to deliver the required services.

Specifically, the Human Capital Management Enhancement Programme links directly to the professionalisation of the City as some of the elements that it addresses are:

- Performance Management System;
- Competency Framework;
- Job Profiles inclusive of Job Descriptions and Grading;
- Salary Parity across the City Group;
- Skills Audit; and
- > Organisation Culture.

Employee Relations and Development-

The Employee Relations and Development operating principles are:

- Customer centric;
- > Provide customers and stakeholders with reliable information and advice;
- Be available always;
- > Provide cost effective labour relations solutions; and
- > Promote a culture of learning.

The core business activities are:

- > The promotion and maintenance of progressive and sound Labour Relations;
- Development implementation and maintenance of Labour Relations policies and procedures;
- Training in Labour Relations;
- Labour Relations advocacy;
- Dispute management, conflict resolution;
- Discipline and grievance resolution;
- > Compliance with legislation, collective agreements, policies and procedures;
- > Enhance and maintain relationship with organised labour (unions) and employees;
- > Enhance and maintain relationship with other stakeholders;
- > Communication around Labour Relations issues;
- Collective Bargaining;
- Labour legislation review;
- Industrial action management;
- > Change /transformation management; and
- Labour litigation.

The parties to the South African Local Government Bargaining Council (SALGBC) comprise of SALGA, IMATU and SAMWU. These parties engage under the auspices of the SALGBC to conclude collective agreements on amongst others, the Disciplinary Procedure Collective Agreement which was concluded on 01 February 2019, multi-year Salary and Wage Collective Agreement which was concluded on 15 August 2018 and effective from 01 July 2018 until 30 June 2021.

These National Collective Agreements contribute to Labour Stability in the Municipal environment.

There were no strikes on a national scale in the past five (5) years. However, there was a locally triggered strike in 2018 at one of the City's departments relating to parity issues and the implementation of the Party Facilitated Agreement (PFA).. It should be noted that the work stoppage was un-protected, and the City has since applied the no-work-no-pay principle with an option to take disciplinary action.

The management of the Labour Relations environment still faces challenges because of the two (2) factions within SAMWU. This matter has been referred to courts for an appropriate remedy which it is hoped, will bring about collective bargaining stability in the division.

The City continuously creates awareness with all employees regarding the Code of Conduct as prescribed in the Municipal Systems Act through roadshows, presentations and internal publications.

In order to equip senior and middle management levels, the City continues with the Management and Leadership Development Programmes. Skills Audits and the subsequent identification of skills gaps lead to specific development of employees as a priority for the City. These actions ensure that the required skills to ensure the delivery of a professional service are developed for individual employees in line with the specific functions that they perform to ensure value-add to the City's objectives.

Skills development consists of both daily informal mentoring and quarterly coaching of employees as well as formal training and developmental programmes. The City further implements some external outreach programmes to contribute to the development of the community with a specific intent for the youth to be skilled and obtain experience and exposure in order for them to become employable.

The following employee focused initiatives were implemented:

- > Subsidized Education to enhance City specific skills and career development;
- Career path development for employees through Performance Management and Individual Learning Plan processes;
- Leadership and Management Development Training Programmes;
- Minimum Competency Training Programme to develop competencies in line with National Treasury Competency requirements;
- > Adult Educational Training (AET) Programmes for the previously-disadvantaged;
- > Matric Programme for the previously-disadvantaged; and
- > Skills Development Consulting Services to our internal clients (business units).

The following external Outreach Programmes were implemented:

- > Internship Programme that allow students to complete the practical component linked
- > to their studies which may allow such Interns to become employable;

- Learnership Programme for the community to make an educational contribution of theoretical and practical skills which may allow such Learners to become employable; and
- A Bursary Scheme for the community with a strategic intent to focus these bursaries on City specific skills requirements.

Job profiles inclusive of Job Descriptions and Grading

The New Job Profile Format was designed for input into the SAP Enhancement Project to allow for an employee self-service module. This necessitated the multiple methodology systems to run in parallel, the Job Description Writing session combined with the New Job Profile Format awareness and training sessions. The success of the New Job Profile Format is dependent on the full understanding and comprehension of Job Descriptions.

The train-the-trainer methodology was envisaged where HR Practitioners who are partners with client departments are fully empowered on the writing and possess knowledge competency of Job Profile and the Job Description. However, other Mayoral priorities such as the Insourcing of Security and Cleaning Projects could not be avoided and rendered a rather limited impact of this initiative.

Following the initiation of the Institutional Review during 2017, the Organisation Development (OD) team proceeded with the compilation of Job Profiles for new designated posts titled "Strategic Executive Management" (SEM), which reported directly to the City Manager. Since the Institutional Review process was however terminated the approval of the profiles was not concluded. To date, the following six (6) SEM job profiles have been completed: -

- SEM: Public Safety;
- SEM: Infrastructure Services;
- SEM: Chief Technology Officer;
- SEM: Economic Development;
- SEM: Transportation; and
- SEM: Strategic Management Support.

Since Job Description writing is a challenge in the organisation – the new Job Profile Format empowerment initiative provided an opportunity to start the process with Job Description writing; where parts of the New Profile format were incorporated into the current Job Description to build a "New Job Description Format" This approach was targeted to ensure full capacitation of client departments. The department opted to rather start with an awareness program on Job

Descriptions compilation to build a foundation in preparation for the roll-out of the New Job Profile Format. The CoGTA Staff Regulations (not yet promulgated) were also utilised as part of the awareness program. This was to provide a solution to Job Description writing challenges experienced by the HR Business Partners and Client Line Departments. The status to date of the awareness program to line departments is highlighted below:

Group ICT	8 - 14 December 2018
Group Strategy Policy Coordination and Relations	25 February 2019
JMPD Academy (Wemmer)	06 May 2019
Group Forensic and Investigations Services (GFIS)	17 May 2019
Group Supply Chain	22 May 2019

Employee Wellness Programme

Employee Wellness Programme is designed to create an enabling environment by providing wellness services that enhance mental health, coping skills, and healthy relationships, thereby resulting in improved employee well-being and productivity. The following are the interventions that Employee Assistance Programme (EAP) rendered based on EAP core technologies: Therapeutic Interventions

The purpose of psycho-social support is to address employee's personal and/ or work problems that may hinder their productivity. There were 49 new cases received between April and May and 23 of these cases were formal referrals by line managers. The number of cases dealt with during this quarter is 270. The majority of the presented problems were Family problems and relationship problems. Workplace stress cases were eleven (11). Refer to the table below for detailed statistics.

Prevention, awareness & educational activities

The unit conducted Financial Management workshops in the following areas:

- Jabulani Civic Centre on 30 May 2019. A total of eighteen (18) employees attended the session;
- Dobsonville Fire station on 22 May 2019. A total of thirteen (13) employees attended the session;
- Rietfontein Training academy on 29 May 2019. A total of thirteen (13) employees attended the session;

Presentations on Incapacity Leave Policy Framework took place in the following areas:

> Metro Centre a total of fourteen (14) Human resource personnel attended the session.

- Social Development Department, Sandton Library on 20 May 2019 where fourteen (14) executive managers attended.
- Transport Department, JRA building on 31 May 2019 where forty-seven (47) employees reached

(c) EAP marketing

The following activities were conducted to promote EAP services:

- > Presentations during induction of new recruits (55 employees were reached).
- > EAP presentation at Florida (three employees attended).

Rewards & Recognition

During the 2018/2019 financial year, a draft Recognition and Reward Policy was developed and is in the process of going through the various approval structures of the City.

The draft Policy was developed to attract and retain a quality workforce. It is therefore important to recognise the efforts made by employees in terms of performance, attitude and achievements. The policy aims to provide a fair framework within which such recognition or rewards may be given.

Recognitions and rewards will be applicable to all employees within City Group i.e. City Core and Municipal Entities (MEs). Insofar as it relates to performance rewards, Section 56 employees are excluded as they are rewarded for performance in terms of the applicable legislation and the City's policy framework for managing performance.

The policy framework will recognise and reward outstanding contributions, service excellence and achievements that fall outside the scope of an employee's normal duties. These will be measured against the:

- > Integrated Development Plan and should be linked to the City's mission;
- > Departmental service delivery objectives and business plan;
- > Specific agreed individual or group objective and outcomes; and
- > Individual job profiles that further the goals and objectives of the City.

The objectives of the policy framework are to:

Recognise and promote positive behaviours that support individual, groups, divisions and departments in achieving the City's mission, vision and values;

- Assist in creating a culture of mutual respect, reward, and recognition for employees at all levels;
- Provide timely recognition to employees in a non-monetary reward based on the significance of the contribution;
- Improve employee productivity and quality of work;
- Provide standards and procedures for the recognition and reward for outstanding contributions;
- Recognise employees for excellent and outstanding achievements on specific Key Performance Indicator (KPI) objectives and targets as reflected in individual performance scorecards;
- Assist in creating a positive environment where employees are motivated to achieve service excellence;
- > Assist in creating a culture of acknowledgement for "walking the extra mile"; and
- > Improve staff retention, especially in terms of critical skills.

Employment Equity

Section 23 of the Employment Equity Act states that before the end of the term of its current EE plan, a designated employer (City of Johannesburg) must prepare a subsequent EE plan prior to expiry of the current EE Plan. This section further states that if an organisation (the City) fails to do so it can be liable to a fine of R1 500 000 or 2% to 10% of annual turnover. The City presently has a one (1) year EE plan, which was developed in 2018 after a review by the Department of Labour. This EE plan is for the period of July 2018 to June 2019, which means that the City must have developed a new EE plan by June 2019.

The City embarked on an intensive analysis of all employment-related policies. An independent external service provider conducted this on behalf of the City. The EE Forums were consulted on the process and outcome of the analysis. A report on the analysis of policies, practice and procedures has been presented to the EE and Transformation office. All this information will form part of the plan. The Employment equity compliance for both quantitative and qualitative was an overall 84% for the City Core.

Employee positioning, vacancies and turnover

The City Group has 32 316 employees across the various Departments and MEs and a total staff establishment of 34 741. There are 2 425 vacancies as at the 31 June 2019 with a vacancy rate of 6.98%. Table 85 below depicts the City Group staff establishment and vacancies as at 30 June 2019.

Vacancies and Staff Turnover

The staff vacancy and staff turnover for the City Group for 2018/2019 is 5.49% per annum. The turnover increased (as per Table 87 below) and is indicative of a stable labour environment. Resignations comprised 1.5% of the Turnover Rate and the balance is made up of retirements, deaths, contract terminations, dismissals and medical boarding.

The vacancy and staff turnover rate for Section 56 Senior Managers was 26.89%. It must however be noted that Section 56 Senior Managers are on five (5) year Fixed Term Contracts (FTCs) and the largest proportion of these contracts normally expire after the Local Government Elections because the appointments at this level are mostly made following these elections. These Senior Managers include the City Manager and direct reports which includes Heads of Departments and Managing Directors/Chief Executive Officers of Municipal Entities.

Due to continuous investigations into alleged fraud and corruption, some senior managers have been suspended and some have resigned before the termination of their FTCs which also influenced the turnover rate on this level.

It remains a challenge to appoint specific scarce and critical skills within certain career groups e.g. Nursing, Medical Doctors, Emergency Services Trainers, Valuers, Town Planners, Environmental Specialists, Urban Designers and Engineers.

COMPONENT B: MANAGING THE MUNICIPAL WORKFORCE

Group Human Capital Management

Group Human Capital Management (GHCM) provides the following functions/services across the City Group:

- Strategic Human Capital Management;
- > Talent Acquisition;
- > Remuneration, Benefits Management and Job Evaluation;
- Transformational Services inclusive of Employment Equity, Gender Mainstreaming and People with Disabilities;
- > Individual Performance Management Implementation, Monitoring, Evaluation and Reporting;
- Employee Relations Management;
- Employee Development;
- Employee Assistance Programmes;
- Business Partnering;
- Labour Relations;
- Employee Assistance Programme (EAP);
- > Human Capital Management Administration and Transactional Services (Payroll);
- Group Human Capital Management Reporting; and
- > Organisational Development.

The provision of all of the above functions contributes to the stability of the City and the delivery of a professional, effective and efficient service, specifically with regard to the institutional design, employee development, appropriate policy frameworks, the acquisition of suitably qualified and experienced employees as well as engagement with stakeholders on different levels and forums

All the above is done in compliance to legislative requirements as well as the roll out of National, Provincial and City imperatives.

Regulatory Compliance, Policy and Planning

The City Group currently consists of the Core Administration departments and twelve (12) Municipal Entities (MEs). The City Group formulates and reviews Human Capital Management Policy Frameworks and the MEs are expected to customise or align their policies without downgrading the set guidelines and standards. This contributes to a standardised Human Capital environment within the City Group.

The City ensures compliance with the legislative requirements e.g. Employment Equity Act, Skills Development Act, Labour Relations Act, Collective Agreements, etc. Specifically, for Employment Equity and Skills Development, the City reports on progress made to the applicable structures e.g. Department of Labour and the Local Government SETA.

The parity benchmarking exercise that started in 2016 with the implementation of the common salary key-scales across the City Group is currently being implemented. Phase 1 for Pikitup on the A and B bands has been concluded and Phase 2 is currently under way with the development of Salary Key-Scales.

The governing Policy Frameworks of GHCM address inequality and poverty by:

- > Incorporating EE elements and principles in all policies;
- > Offering a Bursary Scheme and opportunities to interns and learners;
- Providing support to the Extended Public Works Programme (EPWP) in which temporary workers are sourced from the community;
- > Addressing the issue of gender and disability management in the GHCM Policies;
- Providing GHCM Policy Frameworks to the MEs as a minimum standard for supporting the City; and
- > Growth and Development Strategy.

The Human Capital Policy Frameworks are due for review and a need has also been identified for the development of new Policy Frameworks.

The Department of Cooperative Development and Traditional Affairs (CoGTA) is currently in the process of drafting new Local Government Staff Regulations which include specific frameworks for certain Human Capital functions which will affect the development of new Policy Frameworks as well as the review thereof. The promulgation of these Staff Regulations is awaited.

The table below outlines all current approved Human Capital Policy Frameworks as well as those at the development stage.

Performance Management

Performance management implementation remain challenging due to the fact that it is a manual system, which result in difficulties with the monitoring, evaluation, and reporting.

It is imperative that The City must moves to an automated electronic system that will enable the administration and monitoring of the system and will relieve the current time-consuming administrative burden and improve the accuracy of reporting. An automated electronic Performance Management System will be a key factor for the successful integration of the MEs.

The department of Cooperative Governance and Traditional Affairs (COGTA) embarked on a national initiative of developing staff regulations for all Municipalities. The intention was to implement in 2017, however the staff regulations have not been promulgated yet. The City therefore took the initiative of revising its current approved policy framework using the tenets of the draft staff regulations as it relates to performance management.

There is a City-wide acknowledgement that an effective performance management is not just important but is a critical enabler in achieving the organisational mandate.

The rewards systems between the MEs, Core Administration and Section 56 employees differ. The CoGTA Staff Regulations Performance Management Chapter will address the rewards element of performance management and will ensure a standardised implementation of rewards across Municipalities.

The Performance Management of Section 56 Senior Managers is regulated through the Local Government: Municipal Performance Regulations for Municipal Managers and Managers Directly Accountable to the Municipal Managers. The effect of this is that the financial differences between the performance and reward systems will probably remain between Section 56 Senior Managers and other municipal employees.

The table below outlines performance rewards for the City's employees for 2018/19.

Table 145: Performance rewards by Gender

COMPONENT C: CAPACITATING THE MUNICIPAL WORKFORCE

Competency Development

Roll-out of skills audit for levels 5 and 6

The skills audit assessments of professional and mid-management employees on level 5 and 6 commenced on 26 February 2019 in the City core and on 18 March 2019 in the MEs. The City group targeted 5 670 employees at levels 5 and 6 for skills audit assessments. A total of 5 532 employees completed the assessment. The 360-degree assessment method was used to assess employees, whereby the employees were assessed by their line managers, peers and clients9. Attempts were made to assist the outstanding employees/departments by sending the assessors to departments that did not achieve 100%. There was an office set aside on the 6th floor B-Block, Metro centre to assist those who were struggling or those who did not have access to computers. The interventions to achieve a 100% on the skills audit for levels 5 & 6 were the following:

- > A vigorous Change Management process was followed;
- > Daily status updates that were communicated to all HoDs;
- Onsite assistance was provided. SMSs and e-mails were sent out daily to remind stakeholders to attend;
- > The non-compliance was also raised at the Executive Management Team as a risk.

The final percentage achieved was 98% as opposed to the 100% target due to departments and MEs being non-compliant. GCSS has initiated consequence management letters to the departments and MEs to deal with non-compliant employees.

Interventions for skill audit for levels 3 & 4

After having conducted the skills audit assessments for levels 2 and 3A employees, the next skills audit assessments were conducted at levels 3B and 4. A multi-pronged approach was used to close the gaps identified. The table below indicates the interventions that were implemented and the number of employees that have already gone through these interventions:

⁹ Internal clients are defined as employees within scope providing a service/s to another employee within the City

Table 146: Programme intervention

Program Implemented	EMPLOYEES TRAINED

Coaching for Organisational Performance	208
Sub Ed for core and ME's	
Johannesburg Parks and Zoo	25
Johannesburg Metro Bus	24
City Core	64
Total	457

Coaching for Organisational Performance

The coaching for organisational performance commenced on 27 May 2019. To date, 104 employees started attending the programme and finished in October 2019. The programme was aimed at equipping employees with people management skills such as mentoring and coaching. At the end of the programme, the managers will be able to mentor and coach their team members. Problem-solving and decision-making, creative thinking and innovation are also covered in the programme.

Interventions for level 2 & 3A

The interventions for level 2 and 3A employees are in s. Four (4) executives started the Executive Coaching Programme in April 2019 and a further 8 started on 19 June 2019. Each executive has been allocated a coach and the two agree on the development plan using the skills audit result of the executive as a base. This approach allows the executive to agree with the coach on when to meet; instead of classroom training where they will all be forced to meet at a certain time.

The table below reflects the skills levels and number of skilled employees for 2018/2019

During the past financial year the City continued to train its employees on interventions aimed at closing gaps identified through the Skills Audit process. Finance officials and Senior Managers were trained on Minimum Competency Levels. Other forms of training were aimed at gaps identified through the performance review process and career development. The Workplace Skills Plan was used to identify the trainings required and both the Workplace Skills Plan and the Annual Training Report were submitted to the Local Government SETA.

Note: The City does not have Permanent Employees participating in Learnership Programmes and therefore the applicable columns in the above tables are not populated. For the current year the Subsidized Education for the Core Administration is included in the column headed "Skills Programmes and Short Courses" while for the Municipal Entities Subsidized Education is recorded in the column headed "Other forms of training".

During the 2018/19 financial year the City of Joburg continued to capacitate its employees as per the Skills Development Act requirements. Several employees of their job requirements to enable them to function at optimum level. All levels of management were trained on leadership and management skills as per the skills so that they can manage their teams better. The City also continued to train employees affected by the National Treasury requirements on Minimum Competency Le constraints is a problem in the City and makes it difficult to provide all the capacitation required by employees. To deal with this the City has to prioritize and focus is training needs. The City is also looking at building internal capacity in order to reduce over reliance on Service Providers. A number of applications have been ma Government Seta in terms of discretionary grant. The challenge here is that the LG SETA is slow in responding to such requests, and this makes it difficult to plan forward.

The above table (Table 91) refers to the City of Johannesburg Core Administration only. Municipal Entities operate as independent companies and do not necessarily report into a SETA and for this reason they cannot provide the required level of detail per individual. The City does not have Permanent Employees participating in Learnership programmes and therefore the applicable columns in the above tables are not populated.

COMPONENT D: MANAGING THE MUNICIPAL WORKFORCE EXPENDITURE

Municipal Employee Expenditure

The Remuneration Ratio is considered as one of the important indicators which is used to analyse the employee expenditure of a municipality. The guidelines of how this Ratio is determined are provided by National Treasury and the expectation is that it should be below 30%. The Remuneration Ratio is determined by dividing Employee Remuneration by the Total Operating Expenditure (OPEX). This Ratio is an indicator of whether municipal employee cost is under control and it is also used by investors to determine if the municipality is an attractive investment destination. The City's Remuneration Ratio for 2018/2019 is 20.57%.

There are decisions that are not in the control of the municipality payroll such as the Salary and Wage Collective Agreement which determines the salary increase at a National Level and which will affect the Remuneration Ratio.

Table 94 below reflects an increase in the number of employees whose salaries have increased due to upgrading of their positions. This is as a result of the implementation of the Parity Exercise for Bands A and B. It is expected that as the Parity Exercise is further rolled out for Bands C and D, the number of employees reflected in the table below will further increase.

Table 151: Employees whose salaries were increased due to their positions being upgraded during 2018.19

Sick leave

All categories of leave are regulated through the Main Collective Agreement and Collective Agreement Conditions of Service. All processes for Leave Applications, Attendance Registers, Activity Reports and delivery of Leave Applications to the Transactions Processing Unit are manual and on hardcopy and only at the end of these processes are leave captured on the payroll system.

The manual nature of the leave administration processes results in a number of challenges such as:

- > Delays from the time when the leave is applied for until it is captured;
- The above delays can result in inaccurate leave balances and subsequent inaccurate leave accrual figures being reflected in the Annual Financial Statements;
- Extensive and time-consuming control and monitoring mechanisms to ensure accuracy and to prevent attendance fraud; and
- Attendance controls through Attendance Registers is unreliable and prone to fraud and corruption;

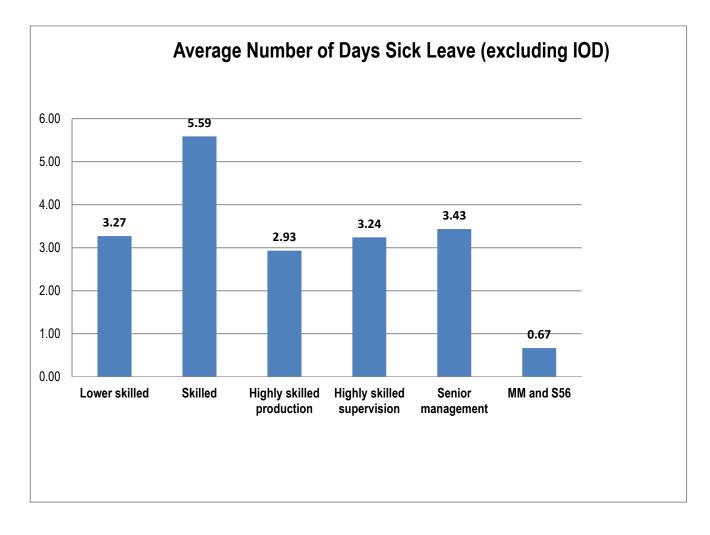

All of the above increase the risk of audit findings against the City, which is difficult to mitigate due to the manual leave system and may very well result in a qualified audit. The automation of all leave processes and accurate attendance recording through biometric attendance systems linked to the Payroll System is crucial for accurate administration and to reduce the risk of Attendance Fraud and Auditor General Findings for incorrect Leave Accruals.

It should further be noted that the automation of the Human Capital Management processes and systems are key to the successful reabsorption of the MEs and to ensure standardised application of Human Capital Management processes within the City Group. Table 95 below reflects the average sick leave per individual employee as 3.64 days for 2018/2019, which is seen as positive. This is a decrease from the previous year of 3.88 days. Once the SAP implementation project has been concluded and all the MEs have been incorporated into one automated electronic system, then reporting for all types of absences can be more regular and the accuracy thereof will improve.

Table 153: Number of days and Cost of Sick Leave (excluding injuries on duty)

The table below outlines the number and cost of injuries for municipal employees on duty for 2018/19

Table 154: Number and cost of injuries on duty

Type of injury	Injury Leave Taken Days	Employees using injury leave No.	Proportion employees using sick leave %	Average Injury Leave per employee Days	Total Estimated Cost R'000
Required basic medical attention only		3,385			10,000
Temporary total disablement		850			6,603

Type of injury	Injury	Employees	Proportion	Average	Total Estimated Cost
	Leave	using	employees	Injury	
	Taken	injury	using sick	Leave per	
		leave	leave	employee	
	Days	No.	%	Days	R'000
Permanent disablement		10			298
Fatal		5			Awards not yet issued by
					Compensation
					Commissioner
Total	0	4250		0	16 901

Note:

Due to the manual nature of the Leave Systems it is not possible for the Municipal Entities to provide the Injury on Duty leave. The information in the table above reflect the number of employees for whom injuries on duties were captured and the cost. The approximate cost was manually calculated by the Safety and Health Branch.

Disciplinary Action

Priority 5: Create an honest and transparent City that fights corruption.

The City endeavors to give effect to Priority five (5) of the IDP "Create an honest and transparent City that fights corruption". This is done in order to maintain discipline and harmonise employment through the adoption of Schedule 2 of the Municipal Systems Act (MSA) 32 of 2000 and Schedule 8 of the Labour Relations Act (LRA) 66 of 1995 as Disciplinary Codes and Policies that employees must observe as a standard of conduct in the workplace. The Disciplinary Procedure and Collective Agreement was concluded on 01 February 2018. A circular was issued to City Departments that all new disciplinary cases should be dealt with in terms of the new Disciplinary Procedure and Collective Agreement.

The above-mentioned legislative frameworks require of the City to follow a fair and reasonable process in instilling discipline to all employees.

Where an employee is a Municipal Manager or reports directly to a Municipal Manager, the Local Government Disciplinary Regulations for Senior Managers 2010 applies, which in many instances are similar to Schedule 2 of the MSA and Schedule 8 of the LRA.

The City strives to eradicate fraud and corruption. There is a focus on investigating alleged misconduct and the necessary disciplinary processes are followed where applicable. The status of disciplinary proceedings in the City Group is as follows:

Core Administration

At the beginning of the period under review 01 July 2018 to 30 June 2019, City Core Administration had two hundred and thirty six (236) pending disciplinary cases to be finalised. At the end of the period under review, 30 June 2019, City Core Administration had a total of one hundred forty-seven (147) pending disciplinary cases. During the period under the review there was a total of sixty-one (61) financial misconduct disciplinary cases. These cases are ongoing, and some hearings have been part-heard and some are pending finalization of investigations.

There were two (2) "Group" Disciplinary Hearings at Community Development, which were finalised, the charges emanated from investigations conducted by the CoJ Group Risk and Assurance Services (GRAS) and an external service provider. The first group of disciplinary cases involved twelve (12) employees, ten (10) of whom were dismissed and one (1) employee was issued with written warning. The second group involved four (4) employees and all four were found guilty and dismissed. The third group involved eight (8) employees from following departments: Economic Development, Group Finance, Group Legal & Contracts, GICT and EISD. The chairperson of the disciplinary hearing found all eight (8) employees guilty and subsequently they were all dismissed.

City Core Administration had one (1) disciplinary case involving a Section 56 Senior Manager. The afore-mentioned Section 56 Senior Manager was placed on precautionary suspension pending investigation into alleged misconduct. The investigation was finalised and subsequently the disciplinary hearing was conducted and concluded against the aforementioned Section 56 Manager. The chairperson of the disciplinary hearing found that the Section 56 Senior Manager guilty and subsequently the Section 56 Senior Manager was dismissed.

There were high-profile cases involving two (2) officials on the level of Group Head. The two (2) employees were placed on precautionary suspensions and were charged for acts of misconduct. One employee resigned as per a settlement agreement and the other employee's disciplinary hearing was conducted and concluded. The employee was found guilty by the chairperson of the

disciplinary hearing and subsequently was dismissed.

There are disputes that involve senior managers which are sub adjudicate at statutory forums viz; South African Local Bargaining Council (SALGBC), Commission for Conciliation, Mediation and Arbitration (CCMA) and the Labour Court.

Other special cases involved four (4) employees from the Development Planning and GICT departments. The afore-mentioned employees were on different levels, Assistant Director (BCO), one (1) Manager, one (1) Director, and one (1) Deputy Director. The investigation was conducted by external forensic companies. The employees were charged for acts of misconduct; the disciplinary hearings have been conducted and concluded. Subsequently, they were all found guilty and dismissed.

Currently, City Core Administration does not have pending disciplinary cases of Section 56 Senior Managers.

There were disciplinary cases that were dealt by the Prosecution Unit which was established during quarter 2 of the period under review. It should be noted that during quarter 2 of the period under review, the Prosecution Unit only appointed one (1) Prosecutor and posts were y filled on 1 July 2019. During quarter 4, the Prosecution Unit dealt with a total of seventeen (17) disciplinary cases. The disciplinary cases were from the following departments: CRUM, Community Development, Sports & Recreation, GHCM, Housing, Transportation and JRA. All the seventeen (17) disciplinary cases were finalised within the 100-day timeframe. It should be noted that the newly established Prosecution Unit dealing with prosecutions/ presenting is yielding positive results, as indicated by the above figures. In terms of the percentage of finalised disciplinary cases within the 100 days, the Prosecution Unit achieved 100% as at the 4th quarter of the period under review.

A total of sixty-two (62) suspensions that were registered in the City Core Administration related to disciplinary cases pending investigations and ongoing disciplinary hearings.

Municipal Entities

The reporting below is confined to the high-level matters dealt with by the MEs and in this instance, there were two (2) disciplinary cases at Johannesburg Roads Agency involving the Managing Director and Head of Department: Planning. Both officials were placed on precautionary suspension pending investigation into alleged misconduct. The Head of Planning was placed on precautionary suspension effectively from 22 March 2019. However, the Head of Department: Planning resigned on 04 June 2019.

The Managing Director was placed on precautionary on 15 April 2019 pending investigation into alleged misconduct. Subsequently the investigation was finalised and the Managing Director was served with a charge sheet and notice of misconduct. A disciplinary hearing was scheduled for 30 and 31 October 2019. Disciplinary hearing is pending finalization.

The table below reflects the number and period of suspensions.

CHAPTER 5: FINANCIAL PERFORMANCE

CHIEF FINANCIAL OFFICER'S REPORT

This report in essence highlights the City's financial position and financial performance for the year under review. The consolidated financial results herein presented are reflective of how the City's financial resources were utilised towards service delivery in all the departments (i.e. Core) and the municipal-owned entities (MEs). It therefore gives me great pleasure to present the Consolidated Group Annual Financial Statements for the year ended 30 June 2019.

These Annual Financial Statements were prepared in compliance with the provisions of the Generally Recognized Accounting Practice (GRAP), which is consistent with the prior year. The Annual Financial statements are attached as *Annexure A*.

Financial Overview

Despite the economically constrained environment the City has been operating under, the City has closed the year under review with a surplus of R6.9 billion compared to the R2.6 billion achieved in the 2018 financial year. The City has remained focussed on continuously strengthening its financial position whilst actively pursuing the achievement of its service delivery goals. Some of the key achievements include:

- Of the budgeted R8.1 billion, 91% was spent on capital investments in response to historical backlogs and to address most pressing service delivery needs. Capital investment is a key tool for improving service delivery and realizing transformational changes as articulated in the *Diphetogo* approach adopted in the City's Integrated Development Plan (IDP).
- The City's cash and cash equivalents at year-end amounted to R5.3 billion, a significant improvement from the R2.2 billion held at the end of 2018 financial year. Our focus has been, and remains, to build adequate cash reserves to fund service delivery programmes through a rigorous cash management strategy that enable agility in managing cash-flows.
- The challenging macro-economic environment continues to negatively impact on our customers' ability to pay for services. In the year under review, the City achieved a revenue collection rate of 89.2%. The City is committed to improving the customer experience throughout the revenue value chain and to this end, a number of interventions

have been put in place as part of an extensive revenue strategy adopted by management from the Revenue Strategy.

• The City has again achieved an unqualified audit opinion, as was the case in the previous financial year. This is a firm indication of the dedicated leadership, which drives governance, compliance and sound financial management. We continue to strive towards clean administration and the highest standards of corporate governance.

Global Credit Rating Co. (GCR) and Moody's recently completed their credit ratings reviews of the City of Johannesburg and the following was the outcome:

- GCR assigned the City with a long-term rating of $AA_{(ZA)}$, with the short-term rating at $A1 +_{(ZA)}$ and a stable outlook.
- Moody's maintained the long-term issuer and debt ratings of *Baa3* (*Global scale, local currency*) and *Aa1.za* (*National scale, local currency*), whilst the short-term issuer ratings were assigned at P 3 (*Global scale, local currency*) and P 1.za (*National scale, local currency*), whilst the outlook remains negative.

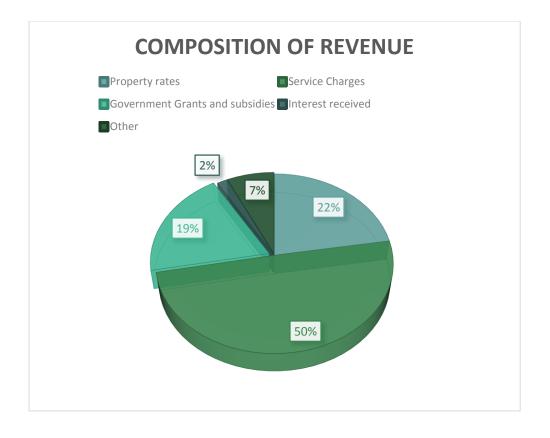

COMPONENT A: ANALYSIS OF THE ANNUAL FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR: 2018/19

		Jun-19		Jun-18	2018-2019

NET SURPLUS / (DEFICIT) FOR THE YEAR	6,882,676	5,225,200	32%	2,614,452	

5.3 Statement of Financial Performance

5.3.1 Revenue

Total revenue is under budget by 2%, however, there is a 16% increase when compared to 2018. The R55.3 billion revenue is mostly derived from service charges (water, electricity, refuse removal and sanitation), government grants and property rates respectively. The revenue composition remained unchanged when compared to the previous financial year with services charges and property rates accounting for 72% [2018: 72%] of the total revenue generated.

Government grants for the current year contribute 19% to total revenue, which is consistent with the prior year. Even though the city's capital budget increased in the financial year under review, the City has continued to be less reliant on grants. This was achieved through the Financial Development Plan initiatives, which have ensured continued generation of surpluses, which are a key component of the City's capital budget funding sources.

	2019	2019		
	Actual		Actual	
	R'000	%	R'000	%
Property Rates Comprise				
Residential	4,588,623	37%	3,392,435	37%
Commercial	7,496,956	61%	5,530,872	61%
State	286,453	2%	187,253	2%
	12,372,032	100%	9,110,560	100%

Analysis of Property Rates

The composition of property rates revenue has remained the same, with Commercial customers being the main contributors at 61%. The 36% (see table 5.3) year on year increase in total property rates revenue, is mainly attributable to an increased property value base following the

implementation of General Valuation Roll 2018 (GV2018) from 01 July 2018, in line with the Municipal Property Rates Act (MPRA).

Analysis of Service Charges

Service charge revenue average growth of 11% (See Table 5.3) is below the budgeted increases due to:

	201	2019		8
	Actual		Actual	
	R'000	%	R'000	%
Service Charges comprise				
Sale of electricity	14,076,466	51%	13,209,621	53%
Sale of water	7,043,361	26%	5,996,861	24%
Refuse removal	1,651,716	6%	1,441,113	6%
Sewerage and sanitation charges	4,115,362	15%	3,644,393	15%
Other services	579,705	2%	532,018	2%
	27,466,610	100%	24,824,006	100%

- Electricity despite a pass through tariff increase of 7.17%, the entity was not able to realise planned improvements in management of non-technical losses, which increased from 23% to 25%.
- Water & Sanitation Revenue billed increased by 15% mainly due to the 12.2% tariff increase as well as some volume increases.

As a result, the composition of service charges has slightly changed when compared to the previous year. Water revenue's contribution has increased by 2% from 24% in 2018, to 26% in 2019, while electricity revenue's contribution has declined by 2% from 53 % in 2018, to 51 % in 2019. Strategic interventions in the new financial year will focus on turning around the business of City power including management of non-technical losses.

5.3.2 Expenditure

Operational expenditure increased by 8% to R48.4 billion. In the financial year under review, the City's major cost drivers were the bulk purchases, employee related cost and debt impairment, respectively.

The 18% increase in employee related cost is attributable to collective bargaining increase of 6.1% and implementation of phase 1 of security in-sourcing.

The 35% increase in allowance of impairments of receivables is mainly due to the collection level of 89.2% compared to budgeted 93%.

5.3.3 Annual Surplus Generated

Despite the challenging economic environment, the City was able to generate a net surplus of R6.9 billion. The achievement of a surplus is in line with the City's Financial Development Plan. The City commits its own funds generated through surpluses alongside investor funding and government grants in order to deliver its accelerated capital expenditure programme. The increase in the surplus in the year under review is a result of budget savings realized on some line items.

	Jun-19	Jun-18	2018-2019	%Of Tota	I
	Actual	Actual	Growth	2018	2017
Net Assets and Liabilities					
Net Assets	52,900,127	46,017,377	15%	55%	53%
Non-current liabilities	27,749,182	25,996,729	7%	29%	30%
Current liabilities	14,716,964	14,705,862	0%	15%	17%
	95,366,273	86,719,968	10%	100%	100%
Assets					
Non-current assets	79,565,863	75,506,668	5%	83%	87%
Current assets	15,800,410	11,213,300	41%	17%	13%
	95,366,273	86,719,968	10%	100%	100%

5.4 Statement of Financial Position

The Statement of Financial Position presented reflects a solid financial position of the City with total assets increasing by 10% to R95.4 billion, driven largely by annual capital expenditure in excess of R7.1 billion.

The City's net assets position has improved by 15% to R52.9 billion. The increase in net assets is attributable to the surplus generated during the year under review of R6.9 billion.

5.5 Consumer debtors

Net outstanding consumer debtors amounted to R6.3 billion as at 30 June 2019 [2018: R5.6 billion]. Electricity and water debtors account for 75% of the total net consumers debtors balance. This is in line with the revenue generated from these services. Total consumer debtors increased by 12% from the previous year, driven mostly by the disposable income pressures faced by consumers under the prevailing economic conditions as well as delays in settling property rates

while awaiting outcomes of objections and appeals. A portion of historical debtors which were previously impaired and assessed as non-recoverable or prescribed, were written off during the year under review.

COMPONENT B: SPENDING AGAINST CAPITAL BUDGET

The 2017/18 capital expenditure, as expressed by the additions capitalized in the current year amounted to R7.1 billion (91% of approved capital budget of R8.1 billion).

COMPONENT C: CASH FLOW MANAGEMENT

5.7. Financial Ratios

Ratio	Benchmark	2018/19
Current ratio	1.5:1 – 2:1	1.08:1
Solvency ratio	Above 2.1:1	2.1:1
Debt to Revenue	Below 45%	40%
Remuneration as % of total operating expenditure	25 – 40%	26%
Repairs & Maintenance as a % of PPE	Above 8%	4%
Capital cost (interest and redemption) as a % of total operating expenditure	6 – 8%	6%
Net Operating Surplus Margin	Above 0%	12%
Cash / Cost coverage (days)	1 – 3 months	43 days

The above ratios, which are closely monitored during the year, ensure that at all times the City remains focused on ensuring continued financial sustainability. All the ratios except for two, namely: *Repairs and Maintenance* as well as *Current Ratio* are within the set parameters.

5.8 Audit Opinion

The City is dedicated to achieving clean administration and achieved an Unqualified Audit Opinion once more at a Group level. The audit report is included in the annual report.

I am pleased to report that the following MOEs have achieved clean audits in 2018/19:

- Joburg City Theatres; and
- Johannesburg Development Agency (JDA).

While some entities that previously achieved clean audits have regressed, management is committed to improving audit outcomes in future through implementing mitigating measures and Operation Clean Audit Action plans to ensure that the matters reported on by the Auditor General are remedied.

5.9 Conclusion

I wish to express my earnest appreciation to the Executive Mayor, Councilors, Member of the Mayoral Committee responsible for Finance, Mayoral Committee, Section 79 Oversight Committees, Group Audit Committee, Group Performance Audit Committee, Group Risk Governance Committee, Municipal Manager, Chief Operations Officer, Executive Management Team, Boards of Directors, Oversight Committees, Managing Directors and Chief Financial Officers of Municipal Owned Entities and their teams, for the support they have provided during the 2018/19 financial year.

The hard work, sacrifices and collective efforts throughout the year, have ensured that the financial statements were produced and finalized within the set timelines.

While there still work to be done to improve the control environment and consequently the audit outcomes, I acknowledge the dedication of our teams in ensuring continuous improvements. We remain committed to strengthening the finances of the City, to improve the capacity to invest in development of our City. South Africa is faced with challenging economic times ahead with the prospect of decreased allocations to Local government from the national fiscus. Thus, it is imperative for the City to continue to strengthen its ability to self-fund whilst safeguarding ongoing financial sustainability.

Manenzhe Manenzhe Group Chief Financial Officer City of Johannesburg Metropolitan Municipality

CHAPTER 6: AUDIT AND OVERSIGHT MATTERS

COMPONENT A: REPORT OF THE AUDITOR-GENERAL TO THE GAUTENG PROVINCIAL LEGISLATURE AND THE COUNCIL ON THE CITY OF JOHANNESBURG METROPOLITAN MUNICIPALITY

Report on the audit of the consolidated and separate financial statements Opinion

I have audited the consolidated and separate financial statements of the City of Johannesburg Metropolitan Municipality and its subsidiaries (the group) set out on pages xx to xx, which comprise the appropriation statement, the consolidated and separate statement of financial position as at 30 June 2019, the consolidated and separate statement of financial performance, statement of changes in net assets, cash flow statement, and statement of comparison of budget and actual amounts or the year then ended, as well as the notes to the consolidated and separate financial statements, including a summary of significant accounting policies.

In my opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of the group as at 30 June 2019 and its financial performance and cash flows for the year then ended in accordance with the South African Standards of Generally Recognised Accounting Practice (SA Standards of GRAP) and the requirements of the Municipal Finance Management Act of South Africa, 2003 (Act No. 56 of 2003) (MFMA) and the Division of Revenue Act, 2018 (Act No. 1 of 2018) (Dora).

Basis for opinion

I conducted my audit in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the auditor-general's responsibilities for the audit of the consolidated and separate financial statements section of this auditor's report. I am I am independent of the group in accordance with sections 290 and 291 of the International Ethics Standards Board for Accountants' Code of ethics for professional accountants and, parts 1 and 3 of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA codes) as well as the ethical requirements that are relevant to my audit in South Africa. I have fulfilled my other ethical responsibilities in accordance with these requirements and the IESBA codes. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key audit matters

Key audit matters are those matters that, in my professional judgement, were of most significance in my audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole and in forming my opinion, and I do not provide a separate opinion or conclusion on these matters.

Key audit matter	How the matter was addressed in the audit
Significant difficulties encountered in ot	otaining information requested for

	resulting in material adjustment journals
	post year-end and amendments to the
	entity's annual financial statements.
	Thereafter, I were happy regarding the
	accounting for revenue.

Emphasis of matters

I draw attention to the matters below. My opinion is not modified in respect of these matters.

Restatement of corresponding figures

As disclosed in note 49 to the consolidated and separate financial statements, the corresponding figures for 30 June 2018 were restated as a result of errors in the consolidated and separate financial statements of the municipality for the year ended 30 June 2019.

Material uncertainties

With reference to note 48 to the consolidated and separate financial statements, the municipality is a defendant in various lawsuits. The outcome of these matters cannot presently be determined and/or reliably measured; therefore, no provision for any liabilities that may result was been made in the financial statements.

Material Impairments

As disclosed in note 10 to the consolidated and separate financial statements, the consumer debtors balance has been impaired. The allowance for impairment of consumer debtors amounts to R20 365 747000 (2017-18: R16 052 473 000) which represents 76,36% (2017-18: 74,09%) of total consumer debtors. The contribution to allowance for impairment was R4 909 196 000 (2017-18: R3 156 030 000).

Material electricity losses

As disclosed in note 42 to the consolidated and separate financial statements, material electricity losses of R2 893 632 000 (2017-18: R2 508 683 000) was incurred, which represents 26,5% (2017-18: 24,2%) of total electricity purchased. Technical losses amounted to R1 029 319 000 (2017-18: R970 859 000) and was due to energy lost in the transportation of electricity from the point of supply to point of distribution through evaporation. Non-technical losses amounted to R1 864 313 000 (2016-17: R1 537 824 000) and were mainly due to theft and bypass of meters, illegal decalibration of meters, damaged meters and faulty voltage and current transformers, billing errors and customers without meters.

Other matter

I draw attention to the matter below. My opinion is not modified in respect of this matter.

Unaudited disclosure notes

In terms of section 125(2)(e) of the MFMA, the municipality is required to disclose particulars of non-compliance with the MFMA in the financial statements. This disclosure requirement did not form part of the audit of the financial statements and, accordingly, I do not express an opinion on it.

Responsibilities of the accounting officer for the financial statements The accounting officer is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with the SA Standards of GRAP, and the requirements of the MFMA and Dora, and for such internal control as the accounting officer determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the accounting officer is responsible for assessing the group's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the appropriate governance structure either intends to liquidate the group or to cease operations, or has no realistic alternative but to do so. Auditor-general's responsibilities for the audit of the financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

A further description of my responsibilities for the audit of the consolidated and separate financial statements is included in the annexure to this auditor's report.

Report on the audit of the annual performance report

Introduction and scope

In accordance with the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA) and the general notice issued in terms thereof, I have a responsibility to report material findings on the reported performance information against predetermined objectives for selected priorities presented in the annual performance report. I performed procedures to identify findings but not to gather evidence to express assurance.

My procedures address the reported performance information, which must be based on the approved performance planning documents of the municipality. I have not evaluated the completeness and appropriateness of the performance indicators included in the planning documents. My procedures also did not extend to any disclosures or assertions relating to planned performance strategies and information in respect of future periods that may be included as part of the reported performance information. Accordingly, my findings do not extend to these matters.

I evaluated the usefulness and reliability of the reported performance information in accordance with the criteria developed from the performance management and reporting framework, as defined in the general notice, for the following selected priorities presented in the annual performance report of the municipality for the year ended 30 June 2019:

Priorities	Pages in the annual performance report
Priority 1: Promote economic development and attract	x – x
investment towards achieving 5% economic growth that	
reduces unemployment by 2021	
Priority 2: Ensure pro-poor development that addresses	x – x
inequality and poverty and provides meaningful redress	
Priority 6: Create a city that responds to the citizens,	x – x
customers, stakeholders and business	
Priority 7: Enhance our financial sustainability	x – x
Priority 9: Preserve our resources for future generations	x – x

I performed procedures to determine whether the reported performance information was properly presented and whether performance was consistent with the approved performance planning documents. I performed further procedures to determine whether the indicators and related targets were measurable and relevant, and assessed the reliability of the reported performance information to determine whether it was valid, accurate and complete.

The material findings in respect of the usefulness and reliability of the selected priorities are as follows:

Priority 2: Ensure pro-poor development that addresses inequality and poverty and provides meaningful redress

Percentage of qualifying residents receiving free basic services

I was unable to obtain sufficient appropriate audit evidence for the reported achievement for the target of 100%. This was due to limitations placed on the scope of my work as the complete listing supporting the performance reported was not submitted for audit. I was unable to confirm the reported achievement by alternative means. Consequently, I was unable to determine whether any adjustments were required to the achievement of 81% as reported in the annual performance report.

Priority 7: Enhance our financial sustainability

Percentage resolution of billing queries as per the service level agreement

I was unable to obtain sufficient appropriate audit evidence to support the reported achievement for the target of 97,7%. This was due to limitations placed on the scope of my work as the necessary adjustments required were not made on the annual performance report. Furthermore, an inconsistent calculation was provided, resulting in the indicator not being verifiable. I was unable to confirm the reported achievement by alternative means. Consequently, I was unable to determine whether any adjustments were required to the achievement of 97% as reported in the annual performance report.

Percentage procurement spend on SMMEs

The achievement for the target of 5% reported in the annual performance report was 49%. However, the supporting evidence provided did not agree to the reported achievement and indicated a projected achievement of 1%.

I did not raise any material findings on the usefulness and reliability of the reported performance information for these priorities:

Priority 1: Promote economic development and attract investment towards achieving 5% economic growth that reduces unemployment by 2021

Priority 6: Create a City that responds to the needs of citizens, customers, stakeholders and businesses

Priority 9: Preserve our resources for future generations

Other matters I draw attention to the matters below.

Achievement of planned targets

Refer to the annual performance report on pages x to x for information on the achievement of planned targets for the year. This information should be considered in the context of the material findings on the usefulness and reliability of the reported performance information in paragraphs 23 to 25 of this report.

Adjustment of material misstatements

I identified material misstatements in the annual performance report submitted for auditing. These material misstatements were on the reported performance information of Priority 1: promote economic development and attract investment towards achieving 5% economic growth that reduces unemployment by 2021; and Priority 6: create a city that responds to the citizens, customers, stakeholders and business. As management subsequently corrected only some of the misstatements, I raised material findings on the usefulness and reliability of the reported performance information. Those that were not corrected are reported above.

Implementation of new rationalised set of indicators as per MFMA Circular 88 of 2017

MFMA Circular 88 of 2017, issued on 30 November 2017, on the rationalisation of planning and reporting requirements for the 2018-19 medium-term revenue and expenditure framework, aims to support the alignment of planning and reporting instruments for a prescribed set of performance indicators for metropolitan municipalities from the 2018-19 financial year onwards. The municipality did not include the common set of indicators in the integrated development plan and 'top-layer' service delivery and budget implementation plan for the 2018-19 planning and reporting cycle due to concerns raised with National Treasury on alignment of these indicators to the municipality's environment and in order to entrench the indicators in the municipality's standard monitoring tools.

Report on the audit of compliance with legislation

Introduction and scope

In accordance with the PAA and the general notice issued in terms thereof, I have a responsibility to report material findings on the compliance of the municipality with specific matters in key legislation. I performed procedures to identify findings but not to gather evidence to express assurance.

The material findings on compliance with specific matters in key legislation are as follows:

Annual financial statements

The financial statements submitted for auditing were not prepared in all material respects in accordance with the requirements of section 122(1) of the MFMA. Material misstatements of revenue; property, plant and equipment; and disclosure items identified by the auditors in the submitted financial statements were subsequently corrected, resulting in the financial statements receiving an unqualified audit opinion.

Asset management

Capital assets were transferred without the municipal council having in a meeting open to the public, decided on whether the assets were still needed to provide the minimum level of basic municipal services, as required by section 14(2)(a) of the MFMA.

Expenditure management

Money owed by the municipality was not always paid within 30 days, as required by section 65(2)(e) of the MFMA.

Reasonable steps were not taken to prevent irregular expenditure amounting to R2 380 792 000, as disclosed in note 54 to the financial statements, as required by section 62(1)(d) of the MFMA. The majority of the irregular expenditure was caused by non-compliance with the Supply Chain Management (SCM) Regulation 32 and 36.

Reasonable steps were not taken to prevent unauthorised expenditure of R493 867 000, as disclosed in note 52 of the financial statements, in contravention of section

62(1)(d) of the MFMA. The majority of unauthoresed expenditure was caused by overspending on non-cash items – expenditure.

Revenue management

An effective system of internal control for debtors and revenue for the entities was not in place, as required by section 97(i) of the MFMA.

Procurement and contract management

Some of the goods and services with a transaction value below R200 000 were procured without obtaining the required price quotations, in contravention of SCM regulation 17(a) and (c). Similar non-compliance was also reported in the prior year. Some of the quotations were accepted from bidders who did not submit a declaration on whether they are employed by the state or connected to any person employed by the state, as required by SCM regulation 13(c).

Some of the goods and services with a transaction value above R200 000 were procured without inviting competitive bids, as required by SCM regulation 19(a). Deviations were approved by the accounting officer even though it was not impractical to invite competitive bids, in contravention of SCM regulation 36(1). Similar non-compliance was also reported in the prior year.

Some of the contracts were awarded to bidders based on points given for criteria that differed from those stipulated in the original invitation for bidding, in contravention of SCM regulations 21(b) and 28(1)(a) and the Preferential Procurement Regulations. Some of the contracts and quotations were awarded to bidders based on prequalification criteria that differed from those stipulated in the original invitation for bidding and quotations, in contravention of the 2017 preferential procurement regulation 4(1) and 4(2) of 2017. Sufficient appropriate audit evidence could not be obtained that all extensions or modifications to contracts were approved by a properly delegated official, as required by SCM regulation 5.

The performance of contractors or providers was not monitored on a monthly basis, as required by section 116(2)(b) of the MFMA. Similar non-compliance was also reported in the prior year.

The contract performance and monitoring measures and methods were not sufficient to ensure effective contract management, as required by section 116(2)(c) of the MFMA. Similar non-compliance was also reported in the prior year.

Awards were made to providers who were in the service of other state institutions or whose directors / principal shareholders were in the service of other state institutions, in contravention of MFMA section 112(j) and SCM regulation 44.

Persons in the service of the municipality whose close family members had a private or business interest in contracts awarded by the municipality failed to disclose such interest, in contravention of SCM regulation 46(2)(e) and the code of conduct for staff members issued in terms of the Municipal Systems Act of South Africa, 2000 (Act No. 32 of 2000).

Consequence management

Some of the irregular expenditure and fruitless and wasteful expenditure incurred by the municipality was not investigated to determine if any person is liable for the expenditure, as required by section 32(2)(b) of the MFMA.

Other information

The accounting officer is responsible for the other information. The other information comprises the information included in the annual report. The other information does not include the consolidated and separate financial statements, the auditor's report and

those selected priorities presented in the annual performance report that have been specifically reported in this auditor's report.

My opinion on the consolidated and separate financial statements and findings on the reported performance information and compliance with legislation do not cover the other information and I do not express an audit opinion or any form of assurance conclusion thereon.

In connection with my audit, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements and the selected priorities presented in the annual performance report, or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

I did not receive the other information prior to the date of this auditor's report. When I do receive and read this information, and if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the other information be corrected. If the other information is not corrected, I may have to retract this auditor's report and re-issue an amended report as appropriate. However, if it is corrected this will not be necessary.

Internal control deficiencies

I considered internal control relevant to my audit of the consolidated and separate financial statements, reported performance information and compliance with applicable legislation; however, my objective was not to express any form of assurance on it. The matters reported below are limited to the significant internal control deficiencies that resulted in the findings on the annual performance report and the findings on compliance with legislation included in this report.

The accounting officer did not adequately exercise oversight responsibility regarding financial and performance reporting and compliance with legislation. The municipality

did not have sufficient monitoring and reviewing controls to ensure that financial and performance reports submitted for auditing were accurate and complete and that action plans developed were adequately and timeously implemented.

Senior management lacked the necessary control disciplines over financial and performance reporting and compliance with key legislation. As a result, there were inadequate year-end reconciliations, a lack of review of reports and a lack of monitoring over proper control implementation. Furthermore, there was a lack of a proper record management system that could support the information reported in the consolidated and separate financial statements and the annual performance report. As a result, material errors and omissions in these reports were identified during the audit process.

Internal audit processes did not always identify internal control deficiencies and recommend appropriate corrective action effectively and timeously. This resulted in significant and recurring control deficiencies relating to the preparation of the consolidated and separate financial statements and annual performance reports and compliance with legislation.

Other reports

I draw attention to the following engagements conducted by various parties that had, or could have, an impact on the matters reported in the municipality's financial statements, reported performance information, compliance with applicable legislation and other related matters. These reports did not form part of my opinion on the consolidated and separate financial statements or my findings on the reported performance information or compliance with legislation.

A total of 1 173 cases of alleged irregularities relating to financial misconduct, fraudulent acts, theft and non-compliance were investigated during the financial year. The majority of these cases were investigated internally by the municipality's forensic department. All these investigations relate to irregularities identified prior to the 2018-19 financial year.

However, none of the irregularities that were identified in 2017-18 have been investigated.

uditor-General

Johannesburg 31 December 2019

Auditing to build public confidence

COMPONENT B: GROUP AUDIT COMMITTEE REPORT

We are pleased to present the Annual Audit Committee Report for City of Johannesburg Municipality for the financial year ended 30 June 2019. The Audit Committee is an independent statutory committee appointed by the Council. Duties performed by the committee are in line with the approved committee Terms of Reference as outlined in section 166 of the Municipal Finance Management Act.

Integrated Independent Oversight

The Audit committee is established as an independent oversight and advisory body, to advise CoJ, Municipal Council ("Council"), Executive Mayor and Mayoral Committee, Accounting Officer and the Management of CoJ on governance, risk management and internal controls.

The City, due to its size and complexity, established three different group advisory committees which collectively fulfil the role of an audit committee. These structures, jointly referred to as the "Audit Committee" are: Group Audit Committee (GAC), Group Risk Governance Committee (GRGC) and Group Performance Audit Committee (GPAC). The chairpersons of the three Group Advisory structures report, on a quarterly bassis, on matters within the scope of their structures to the Council via the Mayoral Committee and Municipal Public Accounts Committee (MPAC). To strengthen integration and continuous feedback, a dual membership system has been adopted. Two members from each group advisory structures represent their structure at the other structure sittings to enable report back.

Audit Committee Responsibility

The committee reports that it has complied with its responsibilities arising from section 166 of the Municipal Finance Management Act, Act 56 of 2003 as amended, and Treasury Regulation 3.1. The committee also reports that it has adopted appropriate formal terms of reference as its

charter, has regulated its affairs during the period under review in accordance with these terms of reference and has discharged all its responsibilities as contained therein.

Audit Committee Members and Attendance

The Audit Committee consisted of an average of fifteen independent members during 2018/19 financial year with each group advisory structure commencing the reporting period with four members and closing with six members following a review of committee membership by the City. These members, appointed into the three group advisory structures collectively have sufficient qualifications and experience to fulfil their duties. The management team, representatives from the internal auditors and external auditors were standing invitees to the committee meetings. The committee also met with the external auditors and internal auditors, without management being present. The internal and external auditors have unrestricted access to the committee.

The table below lists membership of the committee as well as meeting attendance per group advisory structure:

Member Name	Appointment Date	End of Term	Meetings attended
Ms Nalini Maharaj (Chairperson)*	17 Apr 2019	31 Mar 2020	Zero (0)**
Mr Nala Mhlongo (Former Chairperson)	01 Apr 2015	31 Mar 2019	6/6
Mr Zola Fihlani	01 Apr 2017	31 Mar 2019	6/6
Mr Sathie Gounden	17 Apr 2019	31 Mar 2020	Zero (0)**
Ms Karen Muthen (Cross member)	01 Apr 2017	31 Mar 2020	5/6
Mr Lazola Lufefe Mfenyana (Cross member)	17 Apr 2019	31 Mar 2020	Zero (0)**
Mr Malusi William Shezi.	17 Apr 2019	31 Mar 2020	Zero (0)**
Mr Tumi Ramonotsi (Cross Member)	17 Apr 2019	31 Mar 2020	Zero (0)**
Mr Richard Newby	01 Apr 2017	31 Mar 2019	4/6
Mr Norman Baloyi (Cross member)	01 Apr 2018	31 Mar 2019	6/6

Group Audit Committee (GAC)

*Appointed as GAC Chairperson on 17 April 2019

**No meetings were scheduled since appointment until 30 June 2019

Adrian Schofield	01 Apr 2018	31 Mar 2019	4/5

*Reappointed as GPAC Chairperson on 17 April 2019

**Two meetings were scheduled since appointment until 30 June 2019

Effectiveness of internal control

The committee has observed that the overall control environment of the City has not improved during the year under review as compared to the previous financial year. A key contributor for the lack of improvement was prevalence of vacancies in critical positions. It is noted that the resolution of audit findings for both the AGSA and Internal Audit unit is not adequately attended to. The committee has also noted a number of findings relating to non - compliance with the Supply Chain Management processes. The consistently high level of Unauthorized, Irregular, Fruitless and Wasteful expenditure (UIFW) remains a matter of concern to the committee. The committee raised concerns relating to cash lost in transit from from Rea Vaya stations, the high risk of embezzlement of bus fare at Metro-Bus, Pikitup commercial collection losses, as well as water and electricity losses including prepaid electricity losses.

Internal Audit

The committee is satisfied that the Internal Audit plan represents a clear alignment with the key risks, has adequate scope coverage, and a good balance across the different categories of audits, i.e. risk-based, mandatory, performance, computer and follow-up audits.

Internal audit work conducted during the year included assignments on financial control process reviews, SCM compliance reviews, an assessment of IT processes and security, and a review of performance management information. Findings raised by Internal Audit and AGSA during the 2018/19 financial year are followed up with Management as part of the 2019/20 approved audit coverage plan. Progress is in this regard is reported to the committee on a quarterly basis.

Information and Communication Technology (ICT) Governance

The committee has reviewed the ICT governance framework of the City as well as reports on ICT operations. Significant improvements are required particularly in the area of cyber security. The crippling cyber attacks on the City's ICT system experienced subsequent to the reporting period are evidence of the continued rise of this risk. The City also needs to continue with investments in system integration as there remains a number of non-integrated systems across City departments and entities.

Performance Information

The committee reviews quarterly performance reports prepared by management as well as performance information review reports developed by Internal Audit. The reliability and usefulness of performance information is a concern to the committee. The committee further noted a concern relating to Key Performance Indicator (KPI) owners' not adequately complying with the developed performance information KPI Standard Operating Procedures (SOPs), thus exposing the City to reporting shortfalls and reputational damage. The committee is also concerned about the adequacy of the reporting validation procedures applied by the City on performance reporting relating to service level performance indicators. Lastly, the committee remains concerned about the level of performance achieved in the 2018/19 financial year. Management's effort in bolstering performance and performance information management was noted, however, prolonged vacancies in critical positions were an impediment.

Risk Management

The committee noted progress on the City's risk assessment, risk analysis as well as results of risk monitoring and mitigation actions and/or risk treatment plans on the City-wide top strategic risks, departmental and municipal entities top five strategic risks, projects and contract risks updates.

However, the committee remains concerned with lack of progress made on the implementation of the Disaster Recovery Plan and the Business Continuity Plan. The City is yet to finalise its risk appetite and tolerance framework. On compliance management, the committee expressed its concern on the number of departments that are non-compliant. The committee has noted with concern that the position of the Chief Risk Officer (CRO) remains vacant despite repeated assurances by management that the position will be filled.

Group Combined Assurance

The committee is concerned about the slow implementation and embedding of the Combined Assurance Framework by the entities and has encouraged the Group Risk and Assurance Services to step-up the implementation process.

Implementation of Corrective Actions

Group Internal Audit conducted continuous follow-up audit on previous reported audit findings to give reasonable assurance that committed actions plans are adequately and effectively addressing the root causes of the identified control deficiencies. The committee notes and appreciates the establishment of Operation Clean Audit (OPCA) Steering Committee chaired by the City Manager Office, which sit monthly to monitor and hold accountable the respective HOD on the resolution of both internal and external audit findings.

Implementation of Consequence Management

The committee is concerned with consequence management particularly relating to matters of non-compliance with legislation, fraud and corruption. While the City has established in-house capacity to investigate alleged transgressions, the pace of the implementation of the disciplinary action and/or prosecution thereof remains a concern. Exacerbating the situation are capacity gaps in the justice system evidenced by the slow or lack of progress in criminal prosecutions.

Municipal Regulations on a Standard Chart of Accounts (MSCOA) Implementation

The committee is concerned with the implementation of MSCOA as the City is behind schedule. This matter shall continue to receive the attention of the committee.

Evaluation of Financial Statements

The committee has:

• Reviewed and discussed the audited Annual Financial Statements to be included in the Annual Report, with the AGSA and the Accounting Officer;

- Reviewed the Audit Report of the AGSA;
- Reviewed the AGSA's Management Report and Management's response thereto;
- Noted and reviewed the AGSA's assessment of the usefulness and reliability of performance information examined
- Reviewed the Municipality's compliance with legal and regulatory provisions; and
- Reviewed significant adjustments resulting from the audit.

The committee concurs with and accepts the AGSA's conclusions on the Annual Financial Statements and is of the view that the audited Annual Financial Statements be accepted and read together with the report of the AGSA.

Auditor-General South Africa

The committee confirms that it has met with the AGSA and that there are no unresolved issues.

Nalini Maharaj Chairperson of the Group Audit Committee Date: 14 January 2020

COMPONENT C: RISK ASSURANCE

Enterprise Risk Management (ERM)

The GRGC considered and approved the following frameworks, which were successfully implemented by the management with the purpose to ensure that risks are being managed and mitigated to an acceptable level:

- Group Risk Management Implementation Plan for the 2017/18 financial year;
- Annual review of the CoJ ERM Risk Governance Framework, Policy;
- Roll-out of the revised ERM Risk Governance Framework;
- Annual City-wide Strategic Risk Assessment against the Strategic objectives and Mayoral Priorities Register Review;

- Conduct annual Strategic Risk Assessments (departments and entities); and
- Project and Contracts Risk Assessments.

However, the development of Business Continuity Management remains an area which was not achieved. The Project and Contracts Risk Assessments were done, but there were challenges with risk monitoring due to a lack of capacity.

The GRGC noted progress on the City's risk assessment, risk analysis as well as results of risk monitoring and mitigation actions and/or risk treatment plans on the City-wide top risks, and summaries of departments and municipal entities' strategic top 5 risks and project risks updates.

The progress on risk management is reported to the GRGC on a quarterly basis. The committee remains concerned with lack of progress made on the implementation of the Disaster Recovery Plan and the Business Continuity Plan, which remains a high-risk area for the City.

The Citywide Top Strategic Risks 2018/19

The City uses a risk matrix to guide the priority levels for each risk as outlined below:

	5 Critical	Low	Moderate 10	High 15	Very high 20	Very high 25
	4 Major	Low	Moderate 8	High 12	High 16	Very high 20
	3 Moderate	Low 3	Moderate 6	Moderate 9	High 12	High 15
IPACT	2 Minor	Low 2	Low 4	Moderate 6	Moderate 8	Moderate 10
IMPACT	-					
IMPACT	-	2	4	6	8	10

Filling of the Chief Risk Officer (CRO) position

The committee has noted with concern that the position of the CRO remains vacant despite repeated assurances by management that the position will be filled. The committee was previously informed that the position of Chief Risk Officer was being filled, but this did not materialise. Subsequently, the position was re-advertised and is in the process of being finalised.
