Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2018 and, in the light of this review and the current financial position, he is satisfied that the municipality has or had access to adequate resources to continue in operational existence for the foreseeable future.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, they are supported by the municipality's internal auditors.

The external auditors are responsible for independently auditing and reporting on the municipality's annual financial statements.

The annual financial statements set out on pages 4 to 69, which have been prepared on the going concern basis, were approved by the Accounting Officer on the 31 August 2017 and were signed by:

N.Mnyengeza (Acting Municipal Manager)
Accounting Officer

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) issued by the Accounting Standards Board, in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period. The details of any changes in accounting policies are explained in the relevant policy.

1.1 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgements is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Financial assets

The municipality assesses its trade receivables, held to maturity investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the Municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

Fair value estimation

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the fair value assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of related assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of related assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including supply demand for municipal services, timing of cash flows, together with economic factors such as inflation, interest rates.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in the relevant note.

Provisions are measured at the best estimate of the expenditure required to settle the obligation at the reporting date, and are discounted to present value where the effect is material.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (continued)

Provision for rehabilitation of landfill sites

The Municipality has an obligation to rehabilitate its landfill sites in terms of its license stipulations. A provision is made for this obligation based on the net present value of cost.

The uncertainties and assumptions attached to this provision are listed as follows:

- The landfill closure designs are based on current day legislation (Minimum Requirements for Waste Disposal by Landfill, Second Edition 1998) and current permits. Should the Minister require for the sites to be relicensed or brought in line with new legislation, the closure requirements may be affected which may in turn affect the costing analysis.
- It is assumed that clean sand and clay is available locally (nearby/alongside/within) to the site and no importation (long-distance haulage) of materials is required. Material on or close to site is sufficient for closure.
- It is assumed that the general public have not requested a specific final shape or enduse for the landfill sites.

Post-retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in the relevant note.

Useful lives of Property, Plant and Equipment, Intangible assets and Investment property

The municipality depreciates/amortises its property, plant and equipment, investment property and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use.

The useful lives of assets are based on management's estimation. Management considered the impact of technology, availability of capital funding, service requirements and required return on assets in order to determine the optimum useful life expectation, where appropriate.

The estimation of residual values of assets is based on management's judgement as to whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

Water inventory

The estimation of the water stock in the reservoirs is based on the measurement of water after the depth of water in the reservoirs have been determined, which is then converted into volumes based on the total capacity of the reservoir.

Budget information

Deviations between budget and actual amounts are regarded as material differences when a 10% deviation exists. All material differences are explained in the notes to the annual financial statements.

1.3 Investment property

Investment property is property (land or a building, or part of a building, or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.3 Investment property (continued)

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transactions costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Cost model

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property - land	indefinite
Property - buildings	30 years

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.4 Property, plant and equipment (continued)

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight line	indefinite
Buildings	Straight line	25-30 years
Leasehold property	Straight line	3 years
Plant and machinery	Straight line	3 - 5 years
Furniture and fixtures	Straight line	5-10 years
Motor vehicles	Straight line	7-10 years
Office equipment	Straight line	5 years
Infrastructure	Straight line	3-80 years
Other Assets	Straight line	3 - 5 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate. The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.5 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Intangible assets are subsequently carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software	5 years

The gain or loss arising from the derecognition of an intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.6 Heritage assets

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.6 Heritage assets (continued)

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

After recognition as an asset, a class of heritage assets, whose fair value can be measured reliably, is carried at a revalued amount, being its fair value at the date of the revaluation less any subsequent impairment losses.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase is credited directly to a revaluation surplus. However, the increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit.

If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease is recognised in surplus or deficit. However, the decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Impairment

The municipality assess at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.7 Financial instruments

Classification

The Municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Receivables from non-exchange transactions	Financial asset measured at amortised cost
Receivables from exchange transactions	Financial asset measured at amortised cost
Cash and cash equivalents	Financial asset measured at amortised cost

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Borrowings	Financial liability measured at amortised cost
Payables from exchange transactions	Financial liability measured at amortised cost
Unspent conditional grants	Financial liability measured at amortised cost

Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.7 Financial instruments (continued)

Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at amortised cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Impairment and uncollectibility of financial assets

The municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Derecognition

Financial assets

The municipality derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the municipality transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognise either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.7 Financial instruments (continued)

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the municipality has retained substantially all the risks and rewards of ownership of the transferred asset, the municipality continue to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the municipality recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the municipality currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

1.8 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.8 Leases (continued)

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - The Municipality as lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

Income for leases is disclosed under revenue in the statement of financial performance.

Operating leases -The Municipality as lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.9 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.9 Inventories (continued)

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.10 Revenue from non-exchange transactions

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Rates and taxes

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amount are legally enforceable. Penalties interest on unpaid rates is recognised on a time proportion bases with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of rate payers and are deducted from revenue.

Fines

The municipality has two types of fines: spot fines and summonses. There is uncertainty regarding the probability of the flow of economic benefits or service potential in respect of spot fines as these are usually not given directly to an offender. Further legal processes have to be undertaken before the spot fine is enforceable. In respect of summonses the public prosecutor can decide whether to waive the fine, reduce it or prosecute for non-payment by the offender. An estimate is made for the revenue due to the municipality from spot fines and summonses based on past experience of amount collected. Where a reliable estimate cannot be made of revenue summonses, the revenue from summonses is recognised when the public prosecutor pays over to the entity the cash actually collected on summonses issued.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.10 Revenue from non-exchange transactions (continued)

Government Grants and receipts

Equitable share allocations are recognised in the revenue at the start of the financial year if no time-based restrictions exist. Income received from conditional grant, donations and funding are recognised as revenue to the extent that municipality has complied with any of the criteria, condition or obligation embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs are recognised in the statement of financial performance in the period in which they become receivable.

1.11 Borrowing costs

Borrowing costs are interest and other expenses incurred by the municipality in connection with the borrowing of funds.

1.12 Impairment of cash-generating assets

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.13 Share capital / contributed capital

An equity instrument is any contract that evidences a residual interest in the assets of a municipality after deducting all of its liabilities.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.14 Employee benefits

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognise the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.14 Employee benefits (continued)

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

Post-employment benefits: Defined benefit plans

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The entity determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.14 Employee benefits (continued)

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

1.15 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.15 Provisions and contingencies (continued)

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in municipality combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent liabilities are not recognised. Contingencies are disclosed in the relevant note.

1.16 Budget information

The annual budget figures for the year ending 2016/17 have been prepared and presented in accordance with the GRAP standard under the accrual basis of accounting for budgets approved by Council by nature classification, and are consistent with the accounting policies adopted by the Council for the preparation of these financial statements. Explanatory comment is provided in the notes to the annual financial statements giving firstly reasons for overall growth or decline in the budget and secondly motivations for over- or under spending on line items. The annual budget figures included in the financial statements are for the Municipality and do not include budget information relating to subsidiaries or associates. These figures are those approved by the Council at the beginning and during the year following a period of consultation with the public as part of the Integrated development plan.

1.17 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.17 Revenue from exchange transactions (continued)

Rendering of services

Service charges relating to solid waste, sanitation and sewage are levied in terms of the approved tariffs.

Service charges relating to electricity and water are based on consumption. Meters are normally read on a monthly basis and are recognised as revenue when invoiced. Where meters are not read monthly, provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

Interest, Income from agency services and rental of facilities and equipment

Revenue arising from the use by others of Municipality assets yielding interest is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Tariff charges

Revenue arising from the application of the approved tariffs is recognised when the service is rendered by applying the relevant authorising tariff. This includes the issue of licences and permits.

1.18 Related parties

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Related parties include key management personnel such as the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager and close family members of key management personnel.

1.19 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.20 VAT

The Municipality is registered with SARS for VAT on the payment basis, in accordance with Sec15 (2)(a) of the Value-Added Tax Act No 89 of 1991.

1.21 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.22 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of the total amount appropriated in the municipality's approved budget;
- overspending of the total amount appropriated for a vote in the approved budget;
- expenditure from a vote unrelated to the department or functional area covered by the vote;
- expenditure of money appropriated for a specific purpose, otherwise than for that specific purpose;
- spending of an allocation referred to in paragraph (b), (c) or (d) of the definition of "allocation" per the MFMA otherwise than in accordance with any conditions of the allocation; or
- a grant by the municipality otherwise than in accordance with the MFMA.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.23 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.24 Irregular expenditure

Irregular expenditure as defined in section 1 of the MFMA is:

- expenditure incurred by the municipality or that is not in accordance with a requirement of the MFMA, and which has not been condoned in terms of section 170 of the MFMA;
 - expenditure incurred the municipality that is not in accordance with a requirement of the Municipal Systems Act, and which has not been condoned in terms of that MFMA;
 - expenditure incurred the municipality in contravention of, or that is not in accordance with, a requirement of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998); or
 - expenditure incurred the municipality that is not in accordance with a requirement of the supply chain management policy of the municipality or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in terms of such policy or by-law
- but excludes expenditure by the municipality which is considered to be unauthorised expenditure.

Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.25 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.25 Events after reporting date (continued)

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.26 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

1.27 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.28 Going concern

The annual financial statements have been prepared on the assumptions that the municipality will continue to operate as a going concern for at least the next twelve months.

2. New standards and interpretations

2.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2017 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 18: Segment Reporting	01 April 2017	The impact of the amendment is not material.
• GRAP 20: Related parties	01 April 2017	The adoption of this amendment has not had a material impact on the results of the company but has resulted in more disclosure than would have previously been provided in the financial statements
• GRAP 109: Accounting by Principals and Agents	01 April 2017	The impact of the amendment is not material.
• GRAP 21 (as amended 2015): Impairment of non-cash-generating assets	01 April 2017	The impact of the amendment is not material.
• GRAP 26 (as amended 2015): Impairment of cash-generating assets	01 April 2017	The impact of the amendment is not material.
• Directive 12: The Selection of an Appropriate Reporting Framework by Public Entities	01 April 2018	The impact of the amendment is not material.

3. Inventories		
Consumables (At cost)	237 163	224 775
Water (At cost)	3 891	3 113
	241 054	227 888

Inventory pledged as security

No assets are pledged as security.

Inventory held for distribution at no cost or for nominal charge

Property held as part of the Rural Development Housing Program (RDP)

Residential property under the municipality's RDP housing program are held to be distributed through non-exchange transactions (GRAP 12.44). These are held for provision of services to the community and/or to be given to certain groups of people from the general public at no cost.

Future economic benefits will flow to the municipality in the form of rates and taxes that will be charged to the parties involved and the cost can be reliably determined to be Nil as the properties were vested to the municipality at no cost.

The residential property will be measured initially at cost which is Nil (GRAP 12.07) and subsequently at the lower of cost and current replacement cost where they are held for (GRAP 12.18):

- (a) distribution through a non-exchange transaction; or
- (b) consumption in the production process of goods to be distributed at no charge or for a nominal charge.

The municipality's intention is for distribution of low cost houses to the disadvantaged and underprovided individuals at no cost; hence will be held initially and subsequently in the municipality's accounting records at Nil.:

Consumer debtors past due but not impaired

Consumer debtors which are less than 3 months past due are not considered to be impaired. At 30 June 2017, R 11 918 470 (2016: R7 335 404 -) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

1 month past due	5 350 147	4 359 568
2 months past due	3 274 080	2 975 836
3 months past due	3 294 243	-

Receivables from exchange transactions are billed monthly and interest is charged on 5 percent per annum.

The municipality did not pledge any of its receivables from exchange transaction as security for borrowing purposes.

The management of the municipality is of the opinion that the carrying value of receivables from exchange transaction approximate their fair values.

The fair value of Receivables was determined after considering the standard terms and conditions of agreements entered into between the municipality and Debtors as well as the current payment ratio's of the municipality's Receivables.

In determining the recoverability of a receivable from exchange transaction, the municipality considers any change in the credit quality of the receivable from the date credit was initially granted up to the reporting date. The concentration of credit risk is limited due to the customer base being spread over a large number of consumers and is not concentrated in any particular sector or geographical area. Accordingly, management believe that there is no further credit provision required in excess of the provision for impairment.

Details of property

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the offices of the municipality.

The prior year figure has been restated due to land which belongs to the municipality which was not previously recognised. The investment property was valued by a professional valuers as at 30 June 2014. Property discount indices were used to derive the restated balance as at 30 June 2016.

All of the municipality's investment property is held under freehold interests and no investment property had been pledged as security for any liabilities of the municipality.

There are no restrictions on the realisability of investment property or the remittance of revenue and proceeds of disposal. There are no contractual obligations on investment property.

The municipality's investment properties are accounted for according to the cost model and therefore no fair value has been determined. No impairment losses have been recognised on investment property of the municipality at the reporting date.

Opening balance	43 943 211	43 943 211
Additions/capital expenditure	30 983 445	30 983 445
Transferred to completed items	(32 743 041)	(32 743 041)
	42 183 615	42 183 615

The municipality did not pledge any of its assets, other than assets under finance leases as security. No restrictions apply to any of the property, plant and equipment of the municipality, other than assets under finance leases.

At 30 June 2017, assets with a value of R 333 068 was considered to be impaired (2016: R 448 950).

11. Finance lease obligation

Minimum lease payments due

- within one year	618 096	1 553 329
- in second to fifth year inclusive	347 388	405 370
	965 484	1 958 699
less: future finance charges	(81 416)	(125 622)
Present value of minimum lease payments	884 068	1 833 077

Present value of minimum lease payments due

- within one year	565 735	1 436 420
- in second to fifth year inclusive	318 333	396 657
	884 068	1 833 077

Non-current liabilities	318 333	396 657
Current liabilities	565 735	1 436 420
	884 068	1 833 077

It is the municipality's policy to hire office equipment under finance leases.

The average lease term was 3 years. The borrowing rate on office equipment was 15% with no changes in interest rate.

Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

	2017	2016
	R	R
12. Payables from exchange transactions		
Trade payables	21 742 927	20 431 244
Retention	501 621	231 597
Accrued leave pay	5 148 611	2 894 667
Accrued thirteenth cheque	1 449 937	1 077 009
Other payroll accruals	2 165 370	2 056 184
Motor registration control	2 001 822	1 040 997
Unknown Deposit	701 364	-
Other Creditors	1 907 115	132 548
	35 618 767	27 864 246

The average credit period on purchases is 30 days from the receipt of the invoice, as determined by the MFMA, except when the liability is disputed. No interest is charged for the first 30 days from the date of receipt of the invoice. Thereafter interest is charged in accordance with the credit policies of the various individual creditors that the municipality deals with. The municipality has policies in place to ensure that all payables are paid within the credit timeframe.

The fair value of Creditors was determined after considering the standard terms and conditions of agreements entered into between the municipality and other parties.

Staff Leave accrue to the staff of the municipality on an annual basis, subject to certain conditions. The accrual is an estimate of the amount due at the reporting date.

Accrued bonus relates to the thirteenth cheque payable annually by the municipality. The accrual is an estimate of the amount due at the reporting date.

13. VAT payable

VAT provision	3 826 680	1 924 247
---------------	-----------	-----------

No interest is payable to SARS if the VAT is paid over timeously, but interest for late payments is charged according to SARS policies. The municipality has financial risk policies in place to ensure that payments are affected before the due date. Municipality is claiming VAT on as and when the money is paid to suppliers and the money is received from customers. This provision relates to income and expenditure that was invoiced and has not been paid to suppliers or received from customers.

14. Consumer deposits

Electricity	56 362	6 542
-------------	--------	-------

Consumer deposits are paid by consumers on application for new water and electricity connections. The deposits are repaid when the water and electricity connections are terminated. In cases where consumers default on their accounts, the municipality can utilise the deposit as payment for the outstanding account. No interest is paid on consumer deposits held.

The management of the municipality is of the opinion that the carrying value of consumer deposits approximate their fair values. The fair value of consumer deposits was determined after considering the standard terms and conditions of agreements entered into between the municipality and its consumers.

17. Employee benefit obligations		
Defined benefit plan		
The defined benefit plan consists of the post retirement medical aid benefit plan and long service bonuses.		
Long-service awards		
A Long-service award is granted to municipal employees after the completion of fixed periods of continuous service with the municipality. The provision represents an estimation of the awards to which employees in the service of the municipality may become entitled to in the future, based on an actuarial valuation performed.		
The long service bonus plans are defined benefit plans. As at 30 June 2017, 233 (2016: 173) employees were eligible for Long-service Awards.		
The independent valuers, Arch Actuarial ("Arch") have been engaged to carry out an GRAP 25: Employee Benefits actuarial valuation of the Municipality's liability as at 30 June 2017 arising out of the long-service leave awarded to qualifying in-service employees.		
Carrying value

17. Employee benefit obligations (continued)		
Post retirement medical aid plan		
The Municipality operates five accredited medical aid schemes, namely:		
Bonitas		
Key health		
Hosmed		
LA Health		
Samwu		
The municipality provides certain post-retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current conditions of service) is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. The municipality operates an unfunded defined benefit plan for these qualifying employees. No other post-retirement benefits are provided to these employees.		
At 30 June 2017, 4 (2016: 4) employees were eligible for post retirement medical aid plan.		
The independent valuers, Arch Actuarial ("Arch") have been engaged to carry out an GRAP 25: Employee Benefits actuarial valuation of the Municipality's liability as at 30 June 2017 arising out of the post retirement medical aid plan awarded to qualifying in-service employees.

Property Rates are levied on the value of land and improvements, which valuation is performed every four years. The last general valuation came into effect on 1 July 2015. Interim valuations are processed on an continuous basis to take into account changes in individual property values due to alterations and subdivisions. Rates are levied monthly on property owners and are payable the end of each month. Interest is levied at a rate determined by council on outstanding rates amounts.

35. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end are noted under the respective financial assets - investments, trade and other receivables and cash and cash equivalents.

These balances represent the maximum exposure to credit risk:

Financial instrument	2017	2016
Cash and Cash equivalents	14 883 917	7 870 107

Sundays River Valley Municipality

(Registration number EC106)

	R	R
35. Risk management (continued)		
Receivables from exchange transactions	24 651 913	19 811 203

Market risk

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

36. Unauthorised expenditure

Prior year unauthorised expenditure awaiting authorisation brought forward	42 768 382	36 394 077
Overspending discovered current year	44 424 706	6 374 305
	87 193 088	42 768 382

Unauthorised expenditure discovered in the current year amounting to R42 411 358.50 is due to non-cash items (debtors impairment and depreciation) budgeted for under several departments but recognised in one department.

Unauthorised expenditure is in the process of condonement by council.

37. Irregular expenditure

Opening balance	183 371 896	151 413 534
Add: Irregular Expenditure - current year	33 148 834	31 958 362
	216 520 730	183 371 896

Irregular expenditure for the current and previous years has not been condoned by the council. Material balance of irregular expenditure relates to the payments made to contractors whose contracts were destroyed by fire.

38. Fruitless and wasteful expenditure

Opening balance	1 515 123	768 746
Fruitless and wasteful expenditure current year	2 462 314	746 377
	3 977 437	1 515 123

Fruitless and wasteful expenditure relates to interest charged by suppliers for late payments.

-------------	-----------	-----------

Municipality is on the payment basis for VAT and submit monthly returns.

All VAT returns have been submitted by the due date throughout the year.

Deviation from supply chain management regulations

Paragraph 12(1) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of written/verbal quotations, formal written quotations and a competitive bidding process, depending on the specified threshold values.

Paragraph 36 of the above mentioned gazette also provides that the accounting officer may dispense with the official procurement process in certain circumstances provided that he/she records the reasons for any deviations, reports them to the next meeting of the Council and include as a note to the financial statements.

Various items were procured during the financial year under review and the process followed in procuring those goods deviated from the provisions of paragraph 12 (1) as stated above. The reasons for the deviations were documented and reported to the Accounting Officer who considered them and subsequently approved the deviations from the normal supply chain management regulation. These deviations have also been reported to Council.

The reasons for the deviations were mainly due to emergency cases, sole/single suppliers and impracticality in following the official procurement processes.

Incident

Emergency in terms of SRVM policy	727 782	4 576 769
Impractical to obtain quotation	7 480	460 076
Sole provider of goods and services in the areas	566 788	746 849
Other	339 630	-
	1 641 680	5 783 694

41. Prior period errors

Investment Property

Investment property decreased as a result of land property that was erroneously included in the prior year balance. The error was corrected by removing the property that was not included. The net effect of the error is R-603 600. Previously reported amount is R 29 509 100 and the restated amount is R 29 252 700

Infrastructure Assets

The infrastructure assets was restated due to the following reasons:

1. Increase is due to correction of incorrect assessment of asset condition. The physical verification of total population of infrastructure assets was performed and the conditions of assets were re-assessed and the asset register was adjusted.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

	2017	2016
	R	R

41. Prior period errors (continued)

2. Retention was incorrectly capitalised to the cost of an assets , New components were identified and added to the cost of an asset. Components on the assets register could not be traced back to the physical assets and were removed from the asset register.

3. Increase due to correction of omitted asset components on the Fixed Asset register amount R 222 762.

Work in Progress

Capitalisation of repairs and maintenance. WIP was increased as it was understated due to the none inclusion of these expenses.

Land

Land decreased due to the following reasons:

1. The land value decreased as unregistered properties were removed from the asset register.

Buldings

1. During asset verification additional components were identified and added to the asset .

2. Increase is due to capitalisation of repairs and maintenace which were incorrectly classified as an expense in the prior year.

3. Components that could not be verified were removed from the cost of building , and new components identified during asset verification were added to buildings and the asset register was adjusted accordingly.

Movable assets

1. Movable assets increase due to new assets that were identified during the asset verification . The asset register was understated , the adjustment was made to include these identified assets.

Commitments

The commitments schedule was revised to correct errors that were identified during the audit. The overall total of commitments decreased by R 6 064 266 (Reported: R26 498 239; Restated; R32 562504.62

Irregular expenditure

The irregular expenditure register was revised to correct errors that were identified during the audit. The management revisited the total population of irregular expenditure . Overall total of irregular expenditure incurred in the current year , increased by R3 502149 (Reported: R28 456 213 ; Restated: R31 958 362).

Trade and other receivables and rates

1.The decrease in trade and other receivables was due to the correction of billing on property rates that was caused by the change in property values.

Expenditure

General expenditure was adjusted due to the following reasons.

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

	2017	2016
	R	R

41. Prior period errors (continued)

1. The management revisited the entire population of bulk purchases , new invoices that were identified were added to the balance. Balances that appeared on the general ledger but were not included on the statements from the supplier were removed.

2. Repairs and maintenance was capitalised to assets.

VAT Payable

Decrease in VAT payable is due to the following reasons:

1. VAT accounts that were incorrectly captured , output VAT captured in input Vat and input VAT captured in output VAT. VAT due account was not reduced with payments received from SARS and this resulted in material VAT liability.

Retention

The retention decreased as a result of capitalisation of assets which were previously misstated..

Trade and other payables

1. Trade and other payables were adjusted due to invoices identified that were not included in the total balance.

2. Accruals were understated in the prior year due to invoices that were not raised , therefore accruals were understated

The correction of the error(s) results in adjustments as follows:

42. Budget differences

Material differences between budget and actual amounts

Sundays River Valley Municipality

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

	2017	2016
	R	R

42. Budget differences (continued)

Statement of Financial Performance:

FinPer1

Service charges variance is immaterial as it is below 10% and is due to increase in tariffs.

FinPer 2

Budgeted other income includes various revenue items such as, cash sales, which have been disclosed separately on the annual financial statements.

FinPer3

Variances is caused by underspending on capital projects how ever rollovers were approved and the funds are already committed.

FinPer4

Less fines were issued then expected furthermore, revenue was reduced by withdrawn and unequal payments issued by the Court.

FinPer5

Variance is attributable to new appointments , and absorption of contract workers to permanent workers which resulted in increase in bonus and leave pay provisions.

FinPer7

Variance attributable to correction of debt impairment calculation which excludes government and business outstanding balances. The provision in the current year was performed using the recovery rate , the debtors were individually assessed , and provision was then made on the recoverability .

FinPer6

Variance on depreciation is due to increase in current year additions.

Statement of Financial Position:

FinPos1

Variance is a result of lower returns on investments than anticipated .

FinPos2

Variance is attributable to completed assets that were transferred to WIP and capitalised. .

FinPos3

increase in new appointments resulted to increase in provision for leave and bonus which is part of trade and other payables.

FinPos4

No budget was allocated to unspent grant , the management did not anticipate any delays in implementing the procurement plan.

(Registration number EC106)

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

	2017	2016
	R	R
43. (Gains)/Losses on electricity and water distribution		
Gain on electricity distribution	2017	2016
Electricity units (kWh) purchased from Eskom	15 644 968	15 547 950
Electricity units (kWh) sold to consumers	(12 479 984)	(12 979 499)
	3 164 984	2 568 451

Electricity loss for the financial year is 20.23%. The Rand value of the electricity loss for the current financial year at R0.9/kWh is (R 2017 R2 848 486).

These losses are attributable to electricity line losses within the electricity network infrastructure.

Water losses	2017	2016
Number of units pumped to town	10 222 036	4 258 143
Water (KL) sold to consumers	(1 303 216)	(1 478 396)
	8 918 820	2 779 747

Water losses for the financial year is 87.25%. The estimated Rand value of water losses for the current financial year at 9.91 cents per kilolitre is R884 058.

The selling price rate per kilolitre for the current financial year is R6.85

44. Going concern

We draw attention to the fact that at 30 June 2017, the municipality had accumulated surplus of R 578 003 147 and that the municipality's total assets exceeds its liabilities by R 578 003 147.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continues to procure funding for the ongoing operations for the municipality and raise and collect revenue for services rendered.

45. Events after the reporting date

No material fact or circumstance has occurred between the accounting date and the date of the financial statements other than those items already mentioned which required disclosure in the annual financial statements.

46. Change in estimate

Property, plant and equipment

As a result of revaluation of assets, the municipality reassessed the useful life of its assets. and this had the effect of decreasing the depreciation expense for the year ended 30 June 2017 by R2 037 897 (2016 : R467 363).

Depreciation for the remaining useful life of these assets is expected to be similarly affected by these changes in accounting estimates.
