## Accounting Officer's Responsibilities and Approval

---

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2021 and, in the light of this review and the current financial position, she is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the municipality as well as government grants for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page 4.

The annual financial statements set out on page 4, which have been prepared on the going concern basis, were approved by the accounting officer on 31 October 2020 and were signed on:

## Accounting Officer's Report

---

The accounting officer submits her report for the year ended 30 June 2020.

### 1. Review of activities

#### Main business and operations

The municipality is engaged in providing municipal services and maintaining the best interests of the local community.

The operating results and state of affairs of the municipality are fully set out in the attached audited financial statements and do not in our opinion require any further comment.

Net deficit of the municipality was R 29,663,791 (2019: deficit R 13,249,496).

### 2. Going concern

We draw attention to the fact that at 30 June 2020, the municipality had an accumulated surplus of R 386,718,221 .

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

### 3. Accounting Officer's interest in contracts

The Accounting Officer does not have an interest in contracts.

### 4. Accounting policies

The annual financial statements have been prepared in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board as the prescribed framework by National Treasury.

### 5. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

#### Name

Mrs NF Malatjie

### 6. Corporate governance

#### General

The accounting officer is committed to business integrity, transparency and professionalism in all its activities. As part of this commitment, the accounting officer supports the highest standards of corporate governance and the ongoing development of best practice.

The municipality confirms and acknowledges its responsibility to total compliance with the Code of Corporate Practices and Conduct ("the Code") laid out in the King Report on Corporate Governance for South Africa 2002. The accounting officer discuss the responsibilities of management in this respect, at Board meetings and monitor the municipality's compliance with the code on a three monthly basis.

The salient features of the municipality's adoption of the Code is outlined below:

#### Internal audit

The municipality has a fully functional Internal Audit Unit. This is in compliance with the Municipal Finance Management Act, 2003.

### 7. Bankers

ABSA Bank and First National Bank Limited will continue to provide banking services to the municipality.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Officer's Report

---

### 8. Auditors

Auditor General - South Africa will continue in office for the next financial period.

### 9. Public Private Partnership

The Municipality did not enter into any Public Private Partnership for the 2019/2020 financial year, nor does it have any existing PPP's.

### 10. Non-compliance with applicable legislation

In terms of section 65 (2)(e) of the Municipal Finance Act (No. 56 of 2003), all money owing by the municipality be paid within 30 days of receiving the relevant invoice or statement. Due to cash flow constraints, the municipality, could not settle all money owing within the prescribed period.

In terms of section 126 (1)(a) of the Municipal Finance Act (No. 56 of 2003), the accounting officer of a municipality must prepare the annual financial statements within 2 months after the end of the financial year.

However due to the state of disaster declared during our financial year an extension was granted to all municipalities for financials to be submitted by 31 October 2020.

In terms of section 71 (1) of the Municipal Finance Act (No. 56 of 2003), the accounting officer of a municipality must by no later than 10 working days after the end of each month submit to the mayor of the municipality and the relevant provincial treasury a statement in the prescribed format on the state of the municipality's budget reflecting the following particulars for that month and for the financial year up to the end of that month. During the financial year, the municipality did not comply with the required legislation as reports were submitted late.

---

## Statement of Comparison of Budget and Actual Amounts

### Budget on Cash Basis

	Approved budget	Adjustments	Final Budget	Actual amounts on comparable basis	Difference between final budget and actual	Reference
<b>Figures in Rand</b>						
<b>Category</b>	<b>Reason</b>					
Revenue						
Service Charges	This was due to illegal connections on electricity as well as the drought experienced by the Vrede unit which has resulted in less revenue generated through the water service.					
Rental of Facilities	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Other Income	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Interest received- Investment	Due to the credit control measures put in place by the municipality, less interest was charged on consumer debtors.					
Property rates	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Government grants & Subsidies	This is due to the inclusion of both the operational and capital grants in the financial statements whereas these are separate on the budget					
Licenses and permits	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Fines, Penalties and Forfeits	This is due to less people contravening the laws within the municipal boundaries.					
Expenditure						
Personnel	The projections on the budget had accounted for vacant positions which were not filled during the financial year.					
Remuneration of Councilors	This is due to adhoc budget expenses related to Councillors being less than anticipated. The municipality also implemented cost containment measures during the year as the cash flow position of the municipality is still in a dire situation.					
Depreciation and amortization	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Finance costs	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Impairment losses	A condition assessment was performed during the year and a significant amount of infrastructure assets were impaired as due to budget constraints the maintenance of roads could not be kept.					
Bulk Purchases	The budget for bulk purchases was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget expense.					
Debt Impairment	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Contracted Services	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
General Expenses	The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.					
Operating Deficit

## Statement of Comparison of Budget and Actual Amounts

### Budget on Cash Basis

	Approved budget	Adjustments	Final Budget	Actual amounts on comparable basis	Difference between final budget and actual	Reference
<b>Figures in Rand</b>						
Actuarial gains/losses						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.
Gain of disposal of assets and liabilities						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.
Statement of Financial Position						
Current Assets						
Inventory						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.
Consumer Debtors						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget expense.
Vat Receivables						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.
Cash and Cash Equivalents						The cash flow was not accounted for correctly as the 2019 financial year was not used as a basis.
Non-Current Assets						
Investment Property						The Municipality never provided for Investment Property in the Annual budget this error will be corrected in the 2021 Annual budget.
Property, plant and equipment						PPE was restated in the current year due to reworked asset registers.
Other financial assets						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.
Heritage Assets						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.
Current Liabilities						
Other financial liabilities						Incorrect amortization was applied on the DBSA liability.
Payables from Exchange transactions						The 2019 financial year was not used as basis for payables in the budget process. This resulted in an understatement in the budget.
Employee Benefit obligation						This was not provided in the budget.
Provisions						This was not provided in the budget.
Finance lease obligation						The budget was not in line with the actual spend. This was an error on the budget. The 2019 year was not used as a basis for the 2020 budget.
Current portion of long term liabilities						This was not provided in the budget.
Vat Payables						VAT payables was budgeted for but never incurred.
Non-Current Liabilities						
Employee benefit obligation						As the valuation of the provision are only performed at year end, the budget movement was unknown in the budget process.
Provisions						As the valuation of the provision are only performed at year end, the budget movement was unknown in the budget process.

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

Figures in Rand	Note(s)	2020	2019
-----------------	---------	------	------

### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

#### 1.3 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

#### 1.4 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

##### Trade receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables is calculated on a payment rate basis per consumer. The payment rate is calculated on the total payments received per consumer in the current year, and then divided by the total revenue billed per consumer for the current year. The percentage is then converted to a non payment ratio. The non payment ratio is then multiplied with the consumers total outstanding balance. The movement between a consumers yearly impairment balance are accounted through profit and loss in the statement of financial performance.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.4 Significant judgements and sources of estimation uncertainty (continued)

#### Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

#### Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 15 - Provisions.

#### Useful lives of Property, Plant and Equipment and Investment Properties

The municipality's management determines the estimated useful lives and related depreciation charges for the property, plant and equipment and Investment properties. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives. In the event that a depreciating asset is nearing the end of its useful life, the availability of budget to replace the asset is considered. If the asset is not budgeted to be replaced, the useful life is extended by one year. Depreciation is adjusted going forward.

#### Post-retirement benefits

The present value of the post-retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post-retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 6.

#### Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

#### Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

### 1.5 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.5 Investment property (continued)

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### Cost model

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property - land	indefinite
Property - buildings	15 - 50 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

### 1.6 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.6 Property, plant and equipment (continued)

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

---

Item	Depreciation method	Average useful life
Land	Straight-line	Indefinite
Buildings	Straight-line	15 to 50 years
Plant and machinery	Straight-line	10 years
Furniture and fixtures	Straight-line	10 years
Motor vehicles	Straight-line	10 years
Office equipment	Straight-line	10 years
IT equipment	Straight-line	10 years
Landfill sites	Straight-line	20 to 33 years
Electricity Network	Straight-line	15 to 50 years
Roads network	Straight-line	10 to 80 years
Wastewater network	Straight-line	12 to 50 years
Water network	Straight-line	15 to 80 years

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.6 Property, plant and equipment (continued)

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

### 1.7 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

### 1.8 Heritage assets

Assets are resources controlled by an municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an municipality's operations that is shown as a single item for the purpose of disclosure in the annual financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An impairment loss of a cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

An impairment loss of a non-cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable service amount.

An inalienable item is an asset that an municipality is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

Recoverable amount is the higher of a cash-generating asset's net selling price and its value in use.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.8 Heritage assets (continued)

Value in use of a cash-generating asset is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Value in use of a non-cash-generating asset is the present value of the asset's remaining service potential.

#### Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

#### Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

#### Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

#### Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

#### Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

### 1.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Financial instruments are classified into three categories namely, financial instruments at fair value, financial instruments at amortised cost or financial instruments at cost. The Municipality determines the classification of its financial instruments at initial recognition.

#### *Initial recognition and measurement*

A financial instrument is recognised, when the Municipality becomes a party to the contractual provisions of the instrument, and are initially measured at fair value. In the case of a financial instrument not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial instrument are added or deducted from the fair value, as appropriate on initial recognition.

#### Subsequent measurement – financial assets

Financial assets consist of cash and cash equivalents, deposits, receivables and investments.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.9 Financial instruments (continued)

A provision for impairment of receivables is established when there is objective evidence that the Municipality will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. Changes in the carrying amount of the provision is recognised in the Statement of Financial Performance. When a receivable is considered uncollectible, it is written off against the provision. Any gains or losses arising from the change in fair value of investments measured at fair value are recognised in the Statement of Financial Performance.

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognised in surplus or deficit

Residual interests that do not have a quoted market price in an active market, and the fair value of which cannot be reliably are subsequently measured at cost less any impairment. Impairment is considered when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected. Any calculated impairment is recognised in the Statement of Financial Performance.

#### Subsequent measurement – financial liabilities

Financial liabilities consist of payables, interest bearing loans and bank overdrafts. These liabilities are subsequently measured at amortised cost, using the effective interest rate method. Finance costs are expensed in the Statement of Financial Performance in the period in which they are incurred except where stated otherwise (see accounting policy on borrowing costs).

#### Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the Municipality establishes fair value using a valuation technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on municipality-specific inputs.

#### **Cash and cash equivalents**

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried at amortised cost. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are carried at amortised cost.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts.

### 1.9 Financial instruments (continued)

#### Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

<b>Class</b>	<b>Category</b>
Trade receivables from Exchange transactions	Financial asset measured at amortised cost
Trade receivables from Non-Exchange transactions	Financial asset measured at amortised cost
Investments	Financial asset measured at amortised cost
VAT Receivable	Financial asset measured at amortised cost
Cash and cash equivalents	Financial asset measured at amortised cost
Other financial assets	Financial asset measured at fair value

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

<b>Class</b>	<b>Category</b>
Payables from Exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Unspent conditional grants and receipts	Financial liability measured at amortised cost
Employee benefit obligations	Financial liability measured at amortised cost
Provisions	Financial liability measured at amortised cost
Finance lease obligations	Financial liability measured at amortised cost
Other financial liabilities	Financial liability measured at amortised cost

### 1.10 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.10 Leases (continued)

#### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

### 1.11 Inventories

Inventory consist of raw materials and consumables, which are valued at the lower of cost, determined on the first in first out basis, and net realisable value, except for items which are valued at the tariffs charged. Where it is held for distribution or consumption at no charge or for a nominal amount, inventories are valued at the lower of cost and current replacement value.

Cost of inventory comprises all costs of purchase, cost of conversion, and other costs incurred in bringing the inventories to their present location and condition.

Redundant and slow moving inventory are identified and written down to their estimated net realisable values estimated by management. Inventories are written down according to their age, condition and utility. Differences arising on the measurement of such inventory at the lower of cost and net realisable value are recognised in the Statement of Financial Performance in the year in which they arise. The amount of any reversal of any write-down of inventory arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventory recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventory is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

#### Water Inventory

Water is regarded as inventory when the Municipality purchases water in bulk with the intention to resell it to the consumers or to use it internally, or where the Municipality has incurred purification costs on water obtained from natural resources (rain, rivers, springs, boreholes etc.). However, water in dams, that are filled by natural resources and that has not yet been treated, and is under the control of the Municipality but cannot be measured reliably as there is no cost attached to the water, and it is therefore not recognised in the Statement of Financial Position.

The basis of determining the cost of water purchased and not yet sold at Statement of Financial Position date comprises all costs of purchase, cost of conversion and other costs incurred in bringing the inventory to its present location and condition, net of trade discounts and rebates. Water is valued by using the weighted average method, at the lowest of purified cost and net realisable value, insofar as it is stored and controlled in reservoirs at year-end.

### 1.12 Impairment of cash-generating assets

The Municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Municipality estimates the recoverable amount of the individual asset.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.12 Impairment of cash-generating assets (continued)

The best evidence of fair value less cost to sell is the price in a binding sale agreement in an arm's length transaction, adjusted for the incremental cost that would be directly attributable to the disposal of the asset.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

An impairment of assets carried at revalued amount reduces the revaluation surplus for that asset. The decrease shall be debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

An impairment loss is recognised for cash-generating units if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

A Municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

---

### 1.12 Impairment of cash-generating assets (continued)

#### Designation

At initial recognition, the municipality designates an asset as non-cash-generating, or an asset or cash-generating unit as cash-generating. The designation is made on the basis of a municipality's objective of using the asset.

The municipality designates an asset or a cash-generating unit as cash-generating when:

- its objective is to use the asset or a cash-generating unit in a manner that generates a commercial return; such that
- the asset or cash-generating unit will generate positive cash flows, from continuing use and its ultimate disposal, that are expected to be significantly higher than the cost of the asset.

An asset used with the objective of generating a commercial return and service delivery, is designated either as a cash-generating asset or non-cash-generating asset based on whether the municipality expects to use that asset to generate a commercial return. When it is not clear whether the objective is to use the asset to generate commercial return, the municipality designates the asset as a non-cash-generating asset and applies the accounting policy on Impairment of Non-cash-generating assets, rather than this accounting policy.

#### Administrative/owner-occupied assets

It is accepted that all administrative assets, for example, vehicles, office equipment/furniture, plant and machinery, computer equipment and administrative land and buildings are non-cash generating assets as they do not generate any return.

#### Infrastructure assets

Infrastructure assets can be divided into five main groups, roads, water, electricity, sewer and waste management. Roads do not generate any return and is therefore categorised as non-cash generating assets.

Water and electricity infrastructure assets in the municipality generate a return in the form of water and electricity service charges. These returns are not considered to be commercial returns for the following reason:

- These levies are determined annually based on:
  - the funds required as per the budget; and
  - the fees set by ESKOM and NERSA
- The budget is prepared to meet the objective of the municipality as set out in the IDP and SDBIP;
- The objectives of the municipality set in the IDP and SDBIP is to deliver services to the community and not to generate a commercial return.

Water and electricity infrastructure assets are non-cash generating assets.

Waste management do generate a return in the form of a fee charged at landfill sites for the disposing of household waste when the load is of a certain size.

These landfill sites are however management to project health, well-being and the environment by providing the facility to safely dispose of household waste. Landfill sites are treated as non-cash generating assets.

#### Community assets

Community assets are all categorised as non-cash generating assets even if some of these assets, for example, swimming pool, community hall or cemeteries generate a return. The return generated by these assets is small and immaterial in relation to the cost of the assets and therefore is not considered to be a commercial return. In addition, all community assets are held with the primary objectives of service delivery in the community, to uplift the communities and to stimulate and enhance economic growth in the different communities.

### 1.13 Impairment of non-cash-generating assets

The Municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Municipality estimates the recoverable service amount of the asset.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.13 Impairment of non-cash-generating assets (continued)

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount is the higher of a non-cash generating asset's fair value less costs to sell and its value in use. The value in use for a non-cash generating asset is the present value of the asset's remaining service potential.

The value in use for a non-cash generating asset is the present value of the asset's remaining service potential.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable and willing parties, less the costs of disposal.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

A Municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

### 1.13 Impairment of non-cash-generating assets (continued)

#### Designation

At initial recognition, the municipality designates an asset as non-cash-generating, or an asset or cash-generating unit as cash-generating. The designation is made on the basis of a municipality's objective of using the asset.

The municipality designates an asset or a cash-generating unit as cash-generating when:

- its objective is to use the asset or a cash-generating unit in a manner that generates a commercial return; such that
- the asset or cash-generating unit will generate positive cash flows, from continuing use and its ultimate disposal, that are expected to be significantly higher than the cost of the asset.

The municipality designates an asset as non-cash-generating when its objective is not to use the asset to generate a commercial return but to deliver services.

An asset used with the objective of generating a commercial return and service delivery, is designated either as a cash-generating asset or non-cash-generating asset based on whether the municipality expects to use that asset to generate a commercial return. When it is not clear whether the objective is to use the asset to generate a commercial return, the municipality designates the asset as a non-cash-generating asset and applies this accounting policy, rather than the accounting policy on Impairment of Non-cash-generating assets.

#### Administrative/owner-occupied assets

It is accepted that all administrative assets, for example, vehicles, office equipment/furniture, plant and machinery, computer equipment and administrative land and buildings are non-cash generating assets as they do not generate any return.

#### Infrastructure assets

Infrastructure assets can be divided into five main groups, roads, water, electricity, sewer and waste management. Roads do not generate any return and is therefore categorised as non-cash generating assets.

Water and electricity infrastructure assets in the municipality generate a return in the form of water and electricity service charges. These returns are not considered to be commercial returns for the following reason:

- These levies are determined annually based on:
  - the funds required as per the budget; and
  - the fees set by ESKOM and NERSA
- The budget is prepared to meet the objective of the municipality as set out in the IDP and SDBIP;
- The objectives of the municipality set in the IDP and SDBIP is to deliver services to the community and not to generate a commercial return.

Water and electricity infrastructure assets are non-cash generating assets.

Waste management do generate a return in the form of a fee charged at landfill sites for the disposing of household waste when the load is of a certain size.

These landfill sites are however management to project health, well-being and the environment by providing the facility to safely dispose of household waste. Landfill sites are treated as non-cash generating assets.

#### Community assets

Community assets are all categorised as non-cash generating assets even if some of these assets, for example, swimming pool, community hall or cemeteries generate a return. The return generated by these assets is small and immaterial in relation to the cost of the assets and therefore is not considered to be a commercial return. In addition, all community assets are held with the primary objectives of service delivery in the community, to uplift the communities and to stimulate and enhance economic growth in the different communities.

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.14 Employee benefits

The Municipality provides short term benefits, long term benefits and retirement benefits for its employees and councillors.

#### Short-term employee benefits

Remuneration to employees is recognised in the Statement of Financial Performance as the services are rendered, except for non-accumulating benefits which are only recognised when the specific event occurs.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service.

#### Leave pay

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total accrued leave days at year end and is shown as an accrual in the Statement of Financial Position.

#### Bonus Provisions

The Municipality recognises the expected cost of bonuses as a provision only when the Municipality has a present legal or constructive obligation to make such payment and a reliable estimate can be made at reporting date.

#### Post-employment benefits: Defined contribution plans

A defined contribution plan is a plan for Health Care Benefits under which the Municipality pays fixed contributions into a separate entity. The Municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The Municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees.

Past-service costs are recognised immediately, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

#### Post-employment benefits: Defined benefit plans

A defined benefit plan is a plan that defines an amount of benefit that an employee will receive on retirement.

The defined benefit liability is the aggregate of the present value of the defined benefit obligation and unrecognised actuarial gains and losses, reduced by unrecognised past service costs. The plan is unfunded. The defined benefit obligation is calculated using the projected unit credit method, incorporating actuarial assumptions and a discount rate based on the government bond rate. Valuations of these obligations are carried out by independent qualified actuaries regularly, as may be required for fair presentation.

Actuarial gains or losses recognised immediately in the Statement of Financial Performance.

#### Long-service Allowance

The Municipality has an obligation to provide Long-service Allowance Benefits to all of its employees. According to the rules of the Long-service Allowance Scheme, which the Municipality instituted and operates, an employee (who is on the current Conditions of Service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 10, 15, 20, 25 and 30 years of continued service. The Municipality's liability is based on an actuarial valuation. The projected unit credit method has been used to value the liabilities. Actuarial gains and losses on the long-term incentives are accounted for through the statement of financial performance.

### 1.15 Provisions and contingencies

Provisions are recognised when the Municipality has a present (legal or constructive) obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.15 Provisions and contingencies (continued)

The best estimate of the expenditure required to settle the present obligation is the amount that an entity would rationally pay to settle the obligation at the reporting date or to transfer it to a third party at that time and are determined by the judgment of the management of the entity, supplemented by experience of similar transactions and, in some cases, reports from independent experts. The evidence considered includes any additional evidence provided by events after the reporting date. Uncertainties surrounding the amount to be recognised as a provision are dealt with by various means according to the circumstances, where the provision being measured involves a large population of items; the obligation is estimated by weighting all possible outcomes by their associated probabilities.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision. An onerous contract is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it - this unavoidable cost resulting from the contract is the amount of the provision to be recognised.

Provisions are reviewed at reporting date and the amount of a provision is the present value of the expenditure expected to be required to settle the obligation. When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market assessments of the time value of money. The impact of the periodic unwinding of the discount is recognised in the Statement of Financial Performance as a finance cost as it occurs.

#### Environmental Rehabilitation Provisions

Estimated long-term environmental provisions, comprising rehabilitation and landfill site closure, are based on the Municipality's policy, taking into account current technological, environmental and regulatory requirements. The provision for rehabilitation is recognised as and when the environmental liability arises. To the extent that the obligations relate to the asset, they are capitalised as part of the cost of those assets. Any subsequent changes to an obligation that did not relate to the initial related asset are charged to the Statement of Financial Performance.

### 1.16 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

### 1.17 Revenue

Revenue, excluding value-added taxation where applicable, is derived from a variety of sources which include rates levied, grants from other tiers of government and revenue from trading activities and other services provided.

#### Recognition and measurement

The Municipality recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Municipality and when specific criteria have been met for each of the municipalities' activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The Municipality bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. Furthermore, services rendered are recognised by reference to the stage of completion of the transaction at the reporting date.

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, stock rotation, price protection, rebates and other similar allowances.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.17 Revenue (continued)

Revenue from exchange transactions refers to revenue that accrued to the Municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Revenue from non-exchange transactions refers to transactions where the Municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

#### Service Charges – exchange revenue

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without it being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the type of service and the number of sewer connections on all developed property, using the tariffs approved by Council and are levied monthly.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

#### Pre-paid Electricity – exchange revenue

Revenue from the sale of electricity pre-paid meter cards are recognised at the point of sale. Revenue from the sale of electricity prepaid meter cards are recognised based on an estimate of the prepaid electricity consumed as at the reporting date.

#### Sale of goods – exchange revenue

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the Municipality has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the Municipality;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### Dividends – exchange revenue

Dividends are recognised on the date that the Municipality becomes entitled to receive the dividend in accordance with the substance of the relevant agreement, where applicable.

#### Revenue Recognition of Unclaimed Deposits – exchange revenue

Unclaimed deposits older than three (3) years are recognised as revenue.

#### *Rates and Taxes – non-exchange revenue*

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.17 Revenue (continued)

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue.

#### Fines – non-exchange revenue

Fines constitute both spot fines and camera fines. Fines are recognised when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. It is measured at the best estimate, based on past experience, of the amount of revenue the Municipality is entitled to collect.

Subsequent to initial recognition and measurement, the Municipality assess the collectability of the revenue and recognises a separate impairment loss where appropriate.

#### Donations and Contributions – non-exchange revenue

Donations and funding are recognised as revenue to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

#### Transfers and subsidies – non-exchange revenue

##### Unconditional Grants

Equitable share allocations are recognised in revenue at the start of the financial year.

##### Conditional Grants

Conditional grants recognised as revenue to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Interest earned on grants received and invested is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the Municipality's interest it is recognised as interest earned in the Statement of Financial Performance.

#### Services Received In-kind – non-exchange revenue

Services in kind are recognised at its fair value when it is significant to the operations and/or service delivery objectives and when it is probable that the future economic benefits or service potential will flow to the entity and the fair value of the assets can be measured reliably. If the services in-kind are not significant to the operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, only the nature and type of services in-kind received during the reporting period is disclosed.

### 1.18 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.18 Revenue from non-exchange transactions (continued)

Control of an asset arises when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.18 Revenue from non-exchange transactions (continued)

#### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Receivables that arise from statutory (non-contractual) arrangements are initially measured in accordance with this accounting policy, as well as the accounting policy on Statutory Receivables. The entity applies the accounting policy on Statutory Receivables for the subsequent measurement, derecognition, presentation and disclosure of statutory receivables.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.18 Revenue from non-exchange transactions (continued)

#### Rates and Taxes – non-exchange revenue

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue.

#### Fines – non-exchange revenue

Fines constitute both spot fines and camera fines. Fines are recognised when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. It is measured at the best estimate, based on past experience, of the amount of revenue the Municipality is entitled to collect.

Subsequent to initial recognition and measurement, the Municipality assess the collectability of the revenue and recognises a separate impairment loss where appropriate.

#### Donations and Contributions – non-exchange revenue

Donations and funding are recognised as revenue to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

#### Transfers and subsidies – non-exchange revenue

##### Unconditional Grants

Equitable share allocations are recognised in revenue in the beginning of the financial year.

##### Conditional Grants

Conditional grants recognised as revenue to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Interest earned on grants received and invested is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the Municipality's interest it is recognised as interest earned in the Statement of Financial Performance.

#### Services Received In-kind – non-exchange revenue

Services in kind are recognised at its fair value when it is significant to the operations and/or service delivery objectives and when it is probable that the future economic benefits or service potential will flow to the entity and the fair value of the assets can be measured reliably. If the services in-kind are not significant to the operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, only the nature and type of services in-kind received during the reporting period is disclosed.

#### Transfers and subsidies – non-exchange expenditure

---

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.18 Revenue from non-exchange transactions (continued)

The Municipality transfers money to individuals, organisations and other sectors of government from time to time. These transfers are recognised in the financial statements as expenses in the period that the events giving rise to the transfer occurred.

### 1.19 Turnover

Turnover comprises of sales to customers and service rendered to customers. Turnover is stated at the invoice amount and is exclusive of value-added taxation.

### 1.20 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

### 1.21 Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.22 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### 1.23 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.24 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.25 Irregular expenditure

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.25 Irregular expenditure (continued)

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### 1.26 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2019/07/01 to 2020/10/31.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury.

Comparative information is not required.

### 1.27 Related parties

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Management is regarded as a related party and comprises the councillors, Executive Mayor, Mayoral Committee members, Municipal Manager, executive directors and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

### 1.28 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.28 Events after reporting date (continued)

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

### 1.29 Value added tax

The municipality is registered with the SARS for VAT on the payment basis, in accordance with the Section 15(2)(a) of the Value Added Tax Act no 89 of 1991. Revenue, expenses and assets are recognised net of the amounts of value added tax. Value added tax is accounted for using the payment basis.

Revenue, expenses and assets are recognised net of the amount of VAT except:

- Where the VAT incurred on the purchase of assets or services is not recoverable from the taxation authority, in which case the VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item applicable; and
- Receivables and payables that are stated with the amount VAT included.

### 1.30 Grants-in aid (Expense)

The municipality annually awards grants to individuals and organisations based on merit. When making these transfers, the municipality does not

- receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- expect to be repaid in future; or
- expect a financial return, as would be expected from an investment.

## Notes to the Annual Financial Statements

Figures in Rand

2020

2019

### 6. Employee benefit obligations

#### Defined benefit plan

It is the policy of the municipality to provide retirement benefits to all its employees who elect to participate in the different available schemes. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act exist for this purpose. The majority of employees belong to three benefit retirement funds. One fund is administered by the Provincial Pension Fund. These benefit funds are multi-employer funds and as such they are treated as contribution plans in terms of exemption included in GRAP 25.

The last actuarial valuation was dated 30 June 2020.

#### Post retirement medical aid plan

##### NET DISCOUNT RATE

The key assumptions used in the valuation, with the prior years assumptions shown for comparison, are summarised below:

Assumption	30 June 2019	30 June 2020
Discount Rate (D)	8.80%	10.46%
Consumer price inflation (CPI)	4.90%	5.20%
Health care cost inflation (H = 1.50% + CPI)	6.40%	6.70%
Maximum Subsidy Cap Increase (MSC = (1.00% + CPI)*75%)	6.40%	6.70%

It is the relative levels of the discount rate and health care cost inflation to one another that are important, rather than the nominal values. The assumption regarding the relative levels of these two rates is our expectation of the long-term average.

GRAP25 defines the determination of the investment return assumption to be used as the rate that can be determined by reference to market yields (at the balance sheet date) on government bonds. The currency and term of the government bonds should be consistent with the currency and estimated term of the obligation.

The methodology of setting the financial assumptions has been updated to be more duration specific. At the previous valuation date, 30 June 2019 the duration of liabilities was 5.96 years. At this duration the discount rate determined by using the Bond Exchange Zero Coupon Yield Curve as at 30 June 2020 is 8.02% per annum, and the yield on the inflation-linked bonds of a similar term was about 4.38% per annum, implying an underlying expectation of inflation of 3.01% per annum  $([1 + 8.02\% - 0.50\%] / [1 + 4.38\%] - 1)$ .

A healthcare cost inflation rate of 4.51% was assumed. This is 1.50% in excess of the expected inflation over the expected term of the liability, consistent with the previous actuary.

In addition, for continuation pensioners whose subsidy was higher than the subsidy cap of R4,773, we assumed a maximum subsidy cap increase of 3.01% which is 75% of the salary inflation. Salary inflation was assumed to be 1.00% in excess of the expected inflation over the expected term of the liability

##### DEMOGRAPHIC AND DECREMENT ASSUMPTIONS

The demographic and decrement assumptions were consistent in the previous and current valuation period, and are as follows:

Assumption	Continuation Pensioners 30 June 2019	Continuation Pensioners 30 June 2020
Age difference between spouses	5 years	5 years
Proportion married	Actual marital status	Actual marital status

### 6. Employee benefit obligations (continued)

Mortality	PA (90) - 1 with a 1% mortality improvement p.a from 2010	PA (90) - 1 with a 1% mortality improvement p.a from 2010
-----------	---	---

### POST EMPLOYMENT MEDICAL SUBSIDY:

The employer's post-employment health care liability consists of a commitment to pay a portion of the pensioners' post-employment medical scheme contributions. This liability is also generated in respect of dependants who are offered continued membership of the medical scheme on the death of the primary member.

Phumelela is committed to pay subsidies broadly as follows:

In-service members are not eligible to receive the post employment medical subsidy.

All continuation members and their eligible dependants receive a 60% subsidy. As at the valuation date none of the continuation pensioners had a spouse.

All post-employment subsidies are subject to a maximum of R 4,773 as at 1 July 2020. The maximum subsidy amount has been assumed to increase in future at 75% of salary inflation.

### Long service award liability

The Municipality offers employees LSA for every five years of service completed, from five years of service to 45 years of service, inclusive.

Table below describes the benefits awarded.

Completed Service (in years)	Long Service Bonuses (% of Annual Salary)	Description
5	4.0%	$(5 / 250 + 2\%) \times$ annual earnings
10	7.0%	$(10 / 250 + 3\%) \times$ annual earnings
15	10.0%	$(15 / 250 + 4\%) \times$ annual earnings
20	11.0%	$(15 / 250 + 5\%) \times$ annual earnings
25, 30, 35, 40, 45	12.0%	$(15 / 250 + 6\%) \times$ annual earnings

Notes to above Table:

-Long service accumulated leave must be taken within one year of receiving such leave or may be wholly or partially cashed. Phumelela advised that in most cases, employees choose to exercise the option to wholly convert their accumulative leave bonus days into cash.

-The amount of the gift is assumed to stay level, consistent with the assumption at the previous valuation.

### VALUATION ASSUMPTIONS:

#### NET DISCOUNT RATE

The key assumptions used in the valuation, with the prior years' assumptions shown for comparison, are summarised below:

Assumption	30 June 2019	30 June 2020
Discount Rate	8.04%	7.82%
CPI	4.50%	2.86%

# Phumelela Local Municipality

(Registration number Demarcation number: FS 195)  
Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand 2020 2019

### 6. Employee benefit obligations (continued)

Salary increase rate	5.50%	3.86%
Net discount rate	2.41%	3.81%

GRAP25 defines the determination of the investment return assumption to be used as the rate that can be determined by reference to market yields (at the balance sheet date) on government bonds. The currency and term of the obligation should be consistent with the currency and estimated term of the obligation.

The methodology of setting financial assumptions has been updated to be more duration specific. At the previous valuation report, 30 June 2019 the duration of liabilities was 5.85 years. At this duration the discount rate determined by using the Bond Exchange Zero Coupon Yield Curve as at 30 June 2020 is 7.82% per annum, and the yield on inflation-linked bonds of a similar term was about 4.34% per annum. This implies an underlying expectation of inflation of 2.86% per annum  $([1 + 7.82\% - 0.5\%] / [1 + 4.34\%] - 1)$ .

We have assumed that salary inflation would exceed general inflation by 1.00% per annum, i.e. 3.86% per annum

However, it is the relative levels of the discount rate and salary inflation to one another that is important, rather than the nominal values. We have thus assumed a net discount factor of 3.81% per annum  $([1 + 7.82\%] / [1 + 3.86\%] - 1)$ .

### PROMOTIONAL SALARY INCREASE RATES

In addition to the normal salary inflation rate, we have assumed promotional salary increases consistent with the prior actuary. The rates are reflected in the table below:

Age band	Additional promotional scale
20 – 24	5.0%
25 – 29	4.0%
30 – 34	3.0%
35 – 39	2.0%
40 – 44	1.0%
> 44	0.0%

### DEMOGRAPHIC AND DECUREMENT ASSUMPTION

The demographic and decrement assumptions were consistent in the previous and current valuation period, and are as follows:

Assumption	30 June 2019	30 June 2020
Normal retirement age (years)	65	65
Average retirement age (years)	62	62
Mortality	SA85-90	SA85-90

The average retirement age for all active employees was assumed to be 62 years to implicitly allow for ill-health and early retirements

The following withdrawal assumptions were applicable over the prior and current valuation periods

Age	Withdrawal rates (Male)	Withdrawal rates (Female)
20	9%	9%
25	8%	8%
30	6%	6%
35	5%	5%
40	5%	5%

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand

2020

2019

### 6. Employee benefit obligations (continued)

As per the table above, a 1% increase in the medical inflation rate results in a 2.30% increase in the accrued liability whilst a 1% decrease in the medical inflation rate will result in an 2.14% decrease in the accrued liability.

Inversely, a 1% increase in the discount rate results in a 5.13% decrease in the accrued liability whilst a 1% decrease in the discount rate will result in a 5.67% increase in the accrued liability.

#### PEMA Liability Reconciliation:

Opening Accrued Liability	(1,888,833)	(1,722,595)
-Current-service Cost	-	-
-Interest Cost	140,725	(136,112)
-Contributions (benefits paid)	(246,578)	262,934
<b>Total Annual Expense</b>	<b>(105,853)</b>	<b>(126,822)</b>
-Actuarial Loss / (Gain)	(168,199)	(293,060)
<b>Closing Accrued Liability</b>	<b>1,614,781</b>	<b>(1,888,833)</b>

#### LSA Liability Reconciliation:

Opening Accrued Liability	(4,178,230)	(3,470,129)
-Current-service Cost	479,724	(393,593)
-Interest Cost	314,390	(288,127)
-Contributions (benefits paid)	(546,370)	172,271

### 15. Provisions

#### Reconciliation of provisions - 2020

	Opening Balance	Change in discount factor	Reduction due to re-measurement or settlement without cost to entity	Total
Environmental rehabilitation	41,023,897	2,126,754	2,941,992	46,092,643

#### Reconciliation of provisions - 2019

	Opening Balance	Change in discount factor	Reduction due to re-measurement or settlement without cost to entity	Total
Environmental rehabilitation	40,664,929	(2,542,305)	2,901,273	41,023,897
Non-current liabilities			44,073,748	38,081,905
Current liabilities			2,018,895	2,941,992
			<b>46,092,643</b>	<b>41,023,897</b>

#### Rehabilitation provision

There are three existing waste disposal sites, one in each town of Vrede, Memel and Warden. The Memel and Warden sites have to be closed due to them being unsuitable sites for waste disposal. A provision has been recognised to account for the closure cost estimate for the sites in question.

#### Landfill closure and rehabilitation

Landfill operations continue until all the available permitted land space has been filled. Once this happens, the site will be closed and capped with a layer of impermeable clay and a layer of the top soil. Grass and other suitable vegetation types are planted to stabilize the soil and improve the appearance. Environmental monitoring continues for a period of up to 30 years after the closure of the site. No appointment for the closure of the sites has been made, and therefore only rough estimates have been made.

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
<b>18. Revenue</b>		
Change in discount factor - land fill site provision	-	2,542,305
ESKOM rebate on interest received	1,787,795	10,397,927
Fines, Penalties and Forfeits	88,187	163,500
Government grants & subsidies	139,349,141	120,642,332
Interest received - investment	20,357,059	19,801,976
Other income related to municipal services	591,895	600,791
Property rates	14,689,581	12,614,134
Public contributions and donations	11,676	12,700,000
Rental of facilities and equipment	442,331	417,966
Service charges	47,697,834	33,129,757
	<b>225,015,499</b>	<b>213,010,688</b>

### The amount included in revenue arising from exchanges of goods or services are as follows:

Change in discount factor - land fill site provision	-	2,542,305
ESKOM rebate on interest received	1,787,795	10,397,927
Interest received - investment	20,357,059	19,801,976
Other income - (rollup)	591,895	600,791
Rental of facilities and equipment	442,331	417,966
Service charges	47,697,834	33,129,757
	<b>70,876,914</b>	<b>66,890,722</b>

### The amount included in revenue arising from non-exchange transactions is as follows:

<b>Taxation revenue</b>		
Property rates	14,689,581	12,614,134
<b>Transfer revenue</b>		
Government grants & subsidies	139,349,141	120,642,332
Public contributions and donations	11,676	12,700,000
Fines	88,187	163,500
	<b>154,138,585</b>	<b>146,119,966</b>

### Basis on which fair value of inflowing resources was measured

#### Transfers

##### Fines

Fines issued in terms of the Criminal Procedures Act are usually issued by way of notice to offenders, and can (a) indicate the value of the fine to be paid, and that certain reductions could be made to the value of the fine payable and how, or the circumstances under which, such reductions can be applied, or (b) indicate that the offender must appear in Court on a specified date (in these instances, the value of the fine may or may not be indicated but this is often only determined after a separate legal process). In 2012, the ASB revised IGRAP 1 Applying the Probability Test on the Initial Recognition of Revenue to include revenue from non-exchange transactions. This amendment is applicable to municipalities from 1 July 2013. IGRAP 1 indicates that entities should not consider the probability of non-payment on the initial recognition of revenue. This should be considered as a subsequent event when assessing impairment.

2019

### 30. Impairment of assets

#### Impairments

Property, plant and equipment

31,998 2,356,560

An impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation.

Infrastructure assets - GRAP 26.(23) states: In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

(g):Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

Due to significant budget constraints, the municipality could not maintain the maintenance plan as required for the infrastructure assets. This led to the value in use being lower than the economic value of the assets. Assets were therefore impaired to a condition grade lower based on physical assessment of these assets.

Land - IGRAP 18 indicates that land is recognised based on control. Control of land is evidenced by the following criteria:

(a) legal ownership; and/or

(b) the right to direct access to land, and to restrict or deny the access of others to land. During the prior year it was identified that control over land has been lost. The most significant part of this was rural development for housing. As the land was not yet transferred to the legal new owners name, the land was impaired.

Investment property

- 295,177

An impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation. GRAP 26.(23) states: In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

(g):Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

A building was destroyed during an uncontrolled fire during the prior year. The asset is regarded as impaired because its carrying amount exceeds its recoverable amount.

Other receivables from non-exchange revenue

- 88,025

An amendment to IGRAP 1, required the Phumelela Local Municipality to account for Traffic Fine Income on the accrual basis. The Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers) (GRAP 23), requires that revenue is recognised when it is probable that future economic benefits or service potential will flow to the entity and these benefits can be measured. IGRAP 1 clarifies that an entity should recognise the full amount of revenue at the transaction date when there is uncertainty about the entity's ability to collect such revenue based on past history, as the entity has an obligation to collect all revenue due to it. Entities should not consider or assess the probability of collecting revenue at the transaction date because this is a subsequent measurement event. Subsequent to initial recognition and measurement, an entity should assess the collectability of the revenue and recognise an impairment loss where appropriate.

The municipality therefore accounted for each fine issued on the accrual basis, however the probability was assessed and it was found that the current year cash received from fines related to less than 2.36% of fines issued. Therefore the receivable created was impaired with 97.64% of the remain debtor.

**31,998 2,739,762**

#### Reversal of impairments

Property, plant and equipment

(316,929) -

Land parcels previously impaired where disposed off during the year. Therefore the impairment allowance was reversed.

#### Total impairment losses (recognised) reversed

**(284,931) 2,739,762**

### 42. Prior-year adjustments (continued)

The following prior period errors adjustments occurred:

1. During the financial year the municipality conducted a full waste water verification. Takeon assets was identified which were never accounted for. The effect of the error is as follows:

Property, plant and equipment	R2,930,011.48
Depreciation	R 85,067.91
Accumulated surplus	-R3,015,079.39

2. During the financial year the municipality conducted a full road condition assessment. It was identified that when the takeon of assets were accounted, not all foundation layers was added to the register. It was also identified that the previous impairment was not sufficient per asset, and therefore, the impairment was restated to 2018, as no significant changes in the current and previous year occurred on the conditions of the assets. The effect of the error is as follows:

Property, plant and equipment	-R 3,464,348.51
Accumulated surplus	R 5,753,686.56
Depreciation, amortisation and impairment	-R 2,289,338.05

3. Retention's on projects was identified to be misstated. The effect is as follows:

Receivables from exchange transactions	-R 922,621.41
Property plant and equipment	-R 6,860,780.93
Payables from exchange transactions	R 7,783,402.34

4. The legal matter between Rudnat and Ruabex and the municipality has been resolved. The effect of the error is as follows:

Payables from exchange transactions	-R 9,083,247.37
Property, plant and equipment	R 7,898,476.23
Receivables from exchange transactions - VAT	R 1,184,771.14

5. Moveable assets were incorrectly disposed in 2018, this was correct as follows:

Accumulated surplus	-R 22,704.74
Depreciation, impairments and amortisation	R 12,879.08
Property, plant and equipment	R 9,825.66

6. An additional invoice was received from DWA in the 2019 financial year, therefore the municipality accounted for the unrecorded liability. The adjustment is as follows:

Payables from exchange transactions	-R 8,242,024.00
Accumulated surplus	R 8,242,024.00

7. Correction of impairment allocation to the correct financial year, the impairment occurred in the previous financial years.

Accumelated surplus	R18,237,220.00
Depreciation, amortisation and impairments	-R65,646.08
Property, plant and equipment	-R18,171,573.92

8. Correction of creditors understated in the previous year.

General expenditure	-R175,221.38
Payables from exchange transactions	R171,794.03
Receivables from exchange transactions	R 3,427.35

9. Correct classification of expenses

Cash and cash equivalents	R250,888.10
Employee costs	R252,064.50

### 42. Prior-year adjustments (continued)

General expenditure	-R250,888.10
Payables from exchange transactions	-R252,064.50

10. Correction of water network error, a plant donated by department of water affairs was accounted for correctly.

Accumulated surplus	-R18,182,748.90
Depreciation, amortisation and impairments	R493,105.24
Property, plant and equipment	R17,689,643.66

### 43. Risk management

#### Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk, but the exposure is limited to the the municipality's management thereof. Due to largely, "non-trading nature" of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities. Financial instruments play a much more limited role in creating or changing risks that would be typical of listed companies to which the IAS's mainly apply. Generally, financial assets and liabilities are generated by day-to-day operational activities and are not held to manage the risks facing the municipality in undertaking its activities.

The Budget and Treasury Office monitors and manages the financial risks relating to the operations through internal policies and procedures. These risks include interest rate risk, credit risk and liquidity risk. Compliance with policies and procedures is reviewed by internal auditors on a continuous basis, and by external auditors annually. The municipality does not enter into or trade financial instruments for speculative purposes. Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, an independent body that monitors the effectiveness of the internal audit function.

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Liquidity risk is the risk that the municipality will not be able to meet its obligations as they fall due. The Municipality managing of liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses. Liquidity risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met. The tables detail the municipality's remaining contractual maturity for its non-derivative financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the municipality can be required to pay. The table includes both interest and principal cash flows.

At 30 June 2020	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Trade and other payables	329,809,786	-	-	-
At 30 June 2019	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Trade and other payables	287,355,692	-	-	-

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand

2020

2019

### 43. Risk management (continued)

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2020	2019
Receivables from non-exchange transactions	35,239,391	28,292,601
Receivables from exchange transactions	3,060,088	1,165,938
Bank balances	86,327	3,600,574

#### Market risk

##### Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income received on interest on investments are dependent of changes in market interest rates. Interest rate risk is deferred that the fair value of future cash flows associated with a financial instrument will fluctuate in amount as a result in market interest changes.

To decrease interest rate risk exposure, investments is mostly done on a on a term not longer than six months. The current Interest rate shown below is the average interest earned during the year under review on call investment deposits and cash in current banking institutions.

##### Cash flow interest rate risk

Financial instrument	Current interest rate	Due in less than a year	Due in one to two years	Due in two to three years	Due in three to four years	Due after five years
Cash in current banking institutions	- %	20,764	-	-	-	-
Call Investment deposits	3.00 %	58,498	-	-	-	-

#### Price risk

The municipality is not exposed to equity price risks arising from equity investments as the municipality does not trade these investments.

Surplus for the year would increase/decrease as a result of gains/losses on equity securities classified as at fair value through surplus or deficit. Other components of equity would increase/decrease as a result of gains/losses on equity securities classified as available for sale.

### 44. Going concern

We draw attention to the fact that at 30 June 2020, the municipality had an accumulated surplus of R 386,718,221 and that the municipality's total liabilities exceed its assets by R 386,718,221. The current liabilities of R 333,086,306 (2019: R 291,441,531) exceeded its current assets R 26,535,828 (2019: R 43,468,327) by R 306,550,478 (2019: R 247,973,204).

In addition, the municipality owed Eskom R148,070,971 (2019: R126,339,371) and the water board R 101,868,593 (2019: R85,167,539) as at 30 June 2020.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The municipality is experiencing some financial difficulties, indicators are as follows:

1. Suppliers are not paid within the legislative 30 days;
2. Employee benefit obligations are unfunded; refer note 6
3. High levels of distribution losses; refer note 48
4. Slow collection and low recoverability of outstanding consumer accounts; and
5. Unfavourable financial ratios.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

These events and conditions indicate that a material uncertainty exists that may cast significant doubt on the municipality's ability to continue as a going concern,

### 45. Unauthorised expenditure

Opening balance as previously reported	624,800,647	538,159,581
<b>Opening balance as restated</b>	<b>624,800,647</b>	<b>538,159,581</b>
Add: Expenditure identified - current	136,748,196	86,641,066
<b>Closing balance</b>	<b>761,548,843</b>	<b>624,800,647</b>

The municipality has started the process to investigate unauthorised expenditure identified. The process followed is in terms of the guideline issued by National Treasury.

	<b>3,152,471</b>	<b>8,537,924</b>

---

### 49. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.
